Form 10-Q
March 10, 2015

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D. C. 20549

FORM 10-Q

(Mark One)

- Quarterly Report Pursuant to Section 13 or 15(d)
of the
Securities Exchange Act of 1934
For the Quarterly Period Ended January 31, 2015
- or
- Transition Report Pursuant to Section 13 or 15(d) of the
Securities Exchange Act of 1934
For the transition period from _____ to _____

Commission File Number 001-12622

OIL-DRI CORPORATION OF AMERICA
(Exact name of the registrant as specified in its charter)

Delaware
(State or other jurisdiction of incorporation or
organization)

36-2048898
(I.R.S. Employer
Identification No.)

410 North Michigan Avenue, Suite 400
Chicago, Illinois
(Address of principal executive offices)

60611-4213
(Zip Code)

The registrant's telephone number, including area code: (312) 321-1515

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for at least the past 90 days.
Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).
Yes No

Edgar Filing: OIL DRI CORP OF AMERICA - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Indicate the number of shares outstanding of each of the issuer’s classes of common stock as of January 31, 2015.

Common Stock – 5,016,942 Shares and Class B Stock – 2,064,994 Shares

FORWARD-LOOKING STATEMENTS

Certain statements in this report, including, but not limited to, those under the heading “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and those statements elsewhere in this report and other documents that we file with the Securities and Exchange Commission (“SEC”), contain forward-looking statements that are based on current expectations, estimates, forecasts and projections about our future performance, our business, our beliefs and our management’s assumptions. In addition, we, or others on our behalf, may make forward-looking statements in press releases or written statements, or in our communications and discussions with investors and analysts in the normal course of business through meetings, webcasts, phone calls and conference calls. Words such as “expect,” “outlook,” “forecast,” “would,” “could,” “should,” “project,” “intend,” “plan,” “continue,” “believe,” “seek,” “estimate,” “assume,” and variations of such words and similar expressions are intended to identify such forward-looking statements, which are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995.

Such statements are subject to certain risks, uncertainties and assumptions that could cause actual results to differ materially, including those described in Item 1A, Risk Factors, of our Annual Report on Form 10-K for the fiscal year ended July 31, 2014. Should one or more of these or other risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those anticipated, intended, expected, believed, estimated, projected or planned. Investors are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. Except to the extent required by law, we do not have any intention or obligation to update publicly any forward-looking statements after the distribution of this report, whether as a result of new information, future events, changes in assumptions or otherwise.

OIL-DRI CORPORATION OF AMERICA & SUBSIDIARIES

Notes To Condensed Consolidated Financial Statements

(Unaudited)

1. BASIS OF STATEMENT PRESENTATION

The accompanying unaudited condensed Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”) for interim financial information and in compliance with instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. The financial statements and the related notes are condensed and should be read in conjunction with the Consolidated Financial Statements and related notes for the year ended July 31, 2014 included in our Annual Report on Form 10-K filed with the SEC.

The unaudited condensed Consolidated Financial Statements include the accounts of Oil-Dri Corporation of America and its subsidiaries. All significant intercompany transactions are eliminated. Except as otherwise indicated herein or as the context otherwise requires, references to “Oil-Dri,” the “Company,” “we,” “us” or “our” refer to Oil-Dri Corporation of America and its subsidiaries.

The unaudited condensed Consolidated Financial Statements reflect all adjustments, consisting of normal recurring accruals, which are, in the opinion of management, necessary for a fair presentation of the statements contained herein. Operating results for the three and six months ended January 31, 2015 are not necessarily an indication of the results that may be expected for the fiscal year ending July 31, 2015.

The preparation of the unaudited condensed Consolidated Financial Statements in conformity with U.S. GAAP requires the use of estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses and related disclosures. Estimates and assumptions are revised periodically. Actual results could differ from these estimates.

We recognize revenue when risk of loss and title are transferred under the terms of our sales agreements with customers at a fixed and determinable price and collection of payment is probable. Trade promotion reserves are provided for sales incentives made directly to consumers, such as coupons, and sales incentives made to customers, such as slotting, discounts based on sales volume, cooperative marketing programs and other arrangements. Such trade promotion costs are netted against sales. Sales returns and allowances are not material.

Selling, general and administrative expenses include salaries, wages and benefits associated with staff outside the manufacturing and distribution functions, all advertising and marketing-related costs, any miscellaneous trade spending expenses not required to be included in net sales, research and development costs, depreciation and amortization related to assets outside the manufacturing and distribution process and all other non-manufacturing and non-distribution expenses.

We record an allowance for doubtful accounts based on our historical experience and a periodic review of our accounts receivable, including a review of the overall aging of accounts and analysis of specific customer accounts. A customer account is determined to be uncollectible when we have completed our internal collection procedures, including termination of shipments, direct customer contact and formal demand of payment.

We mine sorbent materials on property that we either own or lease as part of our overall operations. A significant part of our overall mining cost is incurred during the process of removing the overburden (non-usable material) from the mine site, thus exposing the sorbent material used in a majority of our production processes. These stripping costs are

treated as a variable inventory production cost and are included in cost of sales in the period they are incurred. We defer and amortize the pre-production overburden removal costs associated with opening a new mine.

Additionally, it is our policy to capitalize the purchase cost of land and mineral rights, including associated legal fees, survey fees and real estate fees. The costs of obtaining mineral patents, including legal fees and drilling expenses, are also capitalized. Pre-production development costs on new mines and any prepaid royalties that may be offset against future royalties due upon extraction of the minerals are also capitalized. All exploration related costs are expensed as incurred.

We perform ongoing reclamation activities during the normal course of our overburden removal. As overburden is removed from a mine site, it is hauled to previously mined sites and is used to refill older sites. This process allows us to continuously reclaim older mine sites and dispose of overburden simultaneously, thereby minimizing the costs associated with the reclamation process.

2. NEW ACCOUNTING PRONOUNCEMENTS

Recently Adopted Accounting Standards

The tangible property regulations ("repair regulations") released by the Internal Revenue Service in September 2013 under Sections 162(a) and 263(a) of the Internal Revenue Code were effective for our tax year beginning August 1, 2014. The repair regulations provide guidance regarding the timing of deductions and the capitalization of amounts paid to acquire, produce or improve tangible property. We believe our accounting policies comply with the requirements of the repair regulations and there is no material impact on our Consolidated Financial Statements.

Recently Issued Regulations

In May 2014, the FASB issued guidance under ASC 250, Revenue from Contract with Customers, which establishes a single comprehensive revenue recognition model for all contracts with customers and will supersede most existing revenue guidance. This guidance requires entities to recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled to receive in exchange. Transition options include either a full or modified retrospective approach and early adoption is not permitted. This guidance will be effective at the beginning of our first quarter of fiscal 2017. We are currently evaluating the impact of the adoption of this requirement on our Consolidated Financial Statements.

In August 2014, the FASB issued guidance under ASC 205, Presentation of Financial Statements - Going Concern, which defines management's responsibility to evaluate whether there is substantial doubt about an organization's ability to continue as a going concern and to provide related footnote disclosures. This guidance will be effective for our fiscal year ended July 31, 2017. We are currently evaluating the impact of the adoption of this requirement on our Consolidated Financial Statements.

3. INVENTORIES

The composition of inventories is as follows (in thousands):

	January 31, 2015	July 31, 2014
Finished goods	\$ 13,234	\$ 14,326
Packaging	5,226	5,402
Other	5,201	4,755
Total Inventories	\$ 23,661	\$ 24,483

Inventories are valued at the lower of cost (first-in, first-out) or market. Inventory costs include the cost of raw materials, packaging supplies, labor and other overhead costs. We perform a detailed review of our inventory items to determine if an obsolescence reserve adjustment is necessary. The review surveys all of our operating facilities and sales groups to ensure that both historical issues and new market trends are considered. The obsolescence reserve not only considers specific items, but also takes into consideration the overall value of the inventory as of the balance sheet date. The inventory obsolescence reserve values at January 31, 2015 and July 31, 2014 were \$483,000 and \$390,000, respectively.

4. FAIR VALUE MEASUREMENTS

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The inputs used to measure fair value are prioritized into categories based on the lowest level of input that is significant to the fair value measurement. The categories in the hierarchy are as follows:

Level 1: Financial assets and liabilities whose values are based on quoted market prices in active markets for identical assets or liabilities.

Level 2: Financial assets and liabilities whose values are based on:

- 1) Quoted prices for similar assets or liabilities in active markets.
- 2) Quoted prices for identical or similar assets or liabilities in markets that are not active.
- 3) Valuation models whose inputs are observable, directly or indirectly, for substantially the full term of the asset or liability.

Level 3: Financial assets and liabilities whose values are based on valuation techniques that require inputs that are unobservable. These inputs may reflect estimates of the assumptions that market participants would use in valuing the financial assets and liabilities.

The following table summarizes our financial assets and liabilities that were measured at fair value by level within the fair value hierarchy:

	Fair Value at January 31, 2015 (in thousands)		Fair Value at July 31, 2014 (in thousands)	
	Total	Level 1	Total	Level 1
Assets				
Cash equivalents	\$3,052	\$3,052	\$5,728	\$5,728
Marketable equity securities	—	—	117	117

Cash equivalents were classified as Level 1 of the fair value hierarchy because they were valued using quoted market prices in active markets. These cash instruments are primarily money market mutual funds and are included in cash and cash equivalents on the condensed Consolidated Balance Sheets.

Marketable equity securities were valued using quoted market prices in active markets and as such are classified as Level 1 in the fair value hierarchy. We owned stock in one publicly traded company at July 31, 2014, which was included in other assets on the condensed Consolidated Balance Sheets. We sold the stock of this company in the first quarter of fiscal 2015 after it was acquired by another company.

Short-term investments on the condensed Consolidated Balance Sheets included U.S. Treasury securities and certificates of deposit. We intend and have the ability to hold our short-term investments to maturity; therefore, these investments were reported at amortized cost on the condensed Consolidated Balance Sheets, which approximated fair value as of January 31, 2015 and July 31, 2014. These balances are excluded from the above table.

Accounts receivable and accounts payable balances on the condensed Consolidated Balance Sheets approximated their fair values at January 31, 2015 and July 31, 2014 due to the short maturity and nature of those balances; therefore, these balances are excluded from the above table.

Prepaid expenses and other assets on the condensed Consolidated Balance Sheets as of July 31, 2014 included a receivable of \$255,000 related to our acquisition of certain assets of MFM Industries Inc. ("MFM") during fiscal 2014. This receivable is excluded from the above table. The receivable represented the estimated amount due to us upon the sale of the real property retained by MFM. We evaluated the value of this receivable during fiscal 2015 and reduced the balance to \$114,500 as of the end of the first quarter of fiscal 2015. We received \$116,000 in settlement upon sale

of the land during the second quarter of fiscal 2015, thereby eliminating the receivable balance as of January 31, 2015.

Notes payable on the condensed Consolidated Balance Sheets are carried at the face amount of future maturities and are excluded from the above table. The estimated fair value of notes payable, including current maturities, was \$20,039,000 and \$23,940,000 as of January 31, 2015 and July 31, 2014, respectively. Our debt does not trade on a daily basis in an active market, therefore the fair value estimate is based on market observable borrowing rates currently available for debt with similar terms and average maturities and is classified as Level 2.

We apply fair value techniques on at least an annual basis associated with: (1) valuing potential impairment loss related to goodwill, trademarks and other indefinite-lived intangible assets and (2) valuing potential impairment loss related to long-lived assets. See Note 5 for further information about goodwill and other intangible assets.

5. GOODWILL AND OTHER INTANGIBLE ASSETS

Intangible amortization expense was \$400,000 and \$337,000 in the second quarter of fiscal 2015 and 2014, respectively. Intangible amortization expense was \$820,000 and \$425,000 for the first six months of fiscal 2015 and 2014, respectively. Estimated intangible amortization for the remainder of fiscal 2015 is \$788,000. Estimated intangible amortization for the next five fiscal years is as follows (in thousands):

2016	\$1,416
2017	\$1,188
2018	\$979
2019	\$792
2020	\$621

We have one acquired trademark recorded at \$376,000 that was determined to have an indefinite life and is not amortized.

Our annual goodwill impairment analysis was performed in the first quarter of fiscal 2015 and did not indicate any impairment.

6. PENSION AND OTHER POSTRETIREMENT BENEFITS

The components of net periodic pension and postretirement health benefit costs were as follows:

	Pension Benefits (in thousands)			
	For the Three Months Ended January 31,		For the Six Months Ended January 31,	
	2015	2014	2015	2014
Service cost	\$371	\$361	\$803	\$721
Interest cost	457	435	925	871
Expected return on plan assets	(469)	(429)	(939)	(858)
Amortization of:				
Prior service costs	3	4	5	7
Other actuarial loss	139	78	289	156
Net periodic benefit cost	\$501	\$449	\$1,083	\$897
	Postretirement Health Benefits (in thousands)			
	For the Three Months Ended January 31,		For the Six Months Ended January 31,	
	2015	2014	2015	2014
Service cost	\$34	\$30	\$67	\$60
Interest cost	26	29	53	58
Amortization of:				
Net transition obligation	—	4	—	8
Prior service costs	(1)	(2)	(3)	(3)
Other actuarial loss	9	8	18	15

Edgar Filing: OIL DRI CORP OF AMERICA - Form 10-Q

Net periodic benefit cost	\$68	\$69	\$135	\$138
---------------------------	------	------	-------	-------

The postretirement health plan is an unfunded plan. We pay insurance premiums and claims from our assets.

14

The pension plan is funded based upon actuarially determined contributions that take into account the amount deductible for income tax purposes, the normal cost and the minimum contribution required and the maximum contribution allowed under applicable regulations. We contributed \$350,000 and \$581,000 to our pension plan during the second quarter and first six months of fiscal 2015, respectively. We estimate contributions will be \$1,276,000 for the remainder of fiscal 2015. See Item 3. "Quantitative and Qualitative Disclosures About Market Risk" for a discussion of the potential impact of financial market fluctuations on pension plan assets and future funding contributions.

Assumptions used in the previous calculations were as follows:

	Pension Benefits		Postretirement Health Benefits			
	For the Three and Six Months Ended January 31,		2015		2014	
	2015	2014	2015	2014	2015	2014
Discount rate for net periodic benefit cost	4.28	% 4.80	% 3.87	% 4.80		%
Rate of increase in compensation levels	3.50	% 3.50	% —	—		
Long-term expected rate of return on assets	7.50	% 7.50	% —	—		

The medical cost trend assumption for postretirement health benefits was 7.5%. The graded trend rate is expected to decrease to an ultimate rate of 5.0% in fiscal 2024.

7. OPERATING SEGMENTS

We have two operating segments: (1) Retail and Wholesale Products Group and (2) Business to Business Products Group. These operating segments are managed separately and each segment's major customers have different characteristics. The Retail and Wholesale Products Group customers include: mass merchandisers; wholesale clubs; drugstore chains; pet specialty retail outlets; dollar stores; retail grocery stores; distributors of industrial cleanup and automotive products; environmental service companies; and sports field product users. The Business to Business Products Group customers include: processors and refiners of edible oils, petroleum-based oils and biodiesel fuel; manufacturers of animal feed and agricultural chemicals; distributors of animal health and nutrition products; and marketers of consumer products.

Our operating segments are also our reportable segments. Net sales and operating income for each segment are provided below. Revenues by product line are not provided because it would be impracticable to do so. The accounting policies of the segments are the same as those described in Note 1 of the Consolidated Financial Statements included in our Annual Report on Form 10-K for the fiscal year ended July 31, 2014.

We do not rely on any segment asset allocations and we do not consider them meaningful because of the shared nature of our production facilities; however, we have estimated the segment asset allocations below for those assets for which we can reasonably determine. The unallocated asset category is the remainder of our total assets. The asset allocation is estimated and is not a measure used by our chief operating decision maker about allocating resources to the operating segments or in assessing their performance. The corporate expenses line includes certain unallocated expenses, including primarily salaries, wages and benefits, purchased services, rent, utilities and depreciation and amortization associated with corporate functions such as research and development, information systems, finance, legal, human resources and customer service. Corporate expenses also include the estimated annual incentive plan bonus accrual.

	Assets	
	January 31, 2015	July 31, 2014
	(in thousands)	
Business to Business Products	\$55,716	\$53,823
Retail and Wholesale Products	95,768	95,712
Unallocated Assets	32,830	36,669
Total Assets	\$184,314	\$186,204

	For the Six Months Ended January 31,			
	Net Sales		Income	
	2015	2014	2015	2014
	(in thousands)			
Business to Business Products	\$46,695	\$49,179	\$14,314	\$15,644
Retail and Wholesale Products	83,992	83,672	2,148	4,257
Total Sales	\$130,687	\$132,851		
Corporate Expenses			(9,021)	(9,825)
Income from Operations			7,441	10,076
Total Other Expense, Net			(690)	(653)
Income before Income Taxes			6,751	9,423
Income Taxes			(1,834)	(2,255)
Net Income			\$4,917	\$7,168

	For the Three Months Ended January 31,			
	Net Sales		Income	
	2015	2014	2015	2014
	(in thousands)			
Business to Business Products	\$23,047	\$25,264	\$7,443	\$7,993
Retail and Wholesale Products	41,596	44,041	1,262	2,982
Total Sales	\$64,643	\$69,305		
Corporate Expenses			(4,424)	(5,241)
Income from Operations			4,281	5,734
Total Other Expense, Net			(395)	(204)
Income before Income Taxes			3,886	5,530
Income Taxes			(1,089)	(1,249)
Net Income			\$2,797	\$4,281

8. STOCK-BASED COMPENSATION

We determine the fair value of stock options and restricted stock issued under our long term incentive plans as of the grant date. We recognize the related compensation expense over the period from the date of grant to the date when the award is no longer contingent on the employee providing additional service to the Company.

The Oil-Dri Corporation of America 2006 Long Term Incentive Plan (the "2006 Plan") permits the grant of stock options, stock appreciation rights, restricted stock, restricted stock units, performance awards and other stock-based and cash-based awards. Our employees and outside directors are eligible to receive grants under the 2006 Plan. The total number of shares of stock subject to grants under the 2006 Plan may not exceed 937,500. Stock options have been granted to our outside directors with a vesting period of one year and stock options granted to employees generally vest 25% two years after the grant date and in each of the three following anniversaries of the grant date. In

addition, restricted shares have been issued under the 2006 Plan as described in the restricted stock section below.

Stock Options

A summary of stock option transactions is shown below:

	Number of Shares (in thousands)	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value (in thousands)
Options outstanding and exercisable, July 31, 2014	44	\$ 15.43	1.9	\$611
Exercised	(1)	\$ 15.37		\$13
Options outstanding and exercisable, January 31, 2015	43	\$ 15.43	1.4	\$661

There were no stock options exercised in the second quarter of either fiscal 2015 or 2014. The amount of cash received from the exercise of stock options during the first three months of fiscal 2015 was \$15,000 and the related tax benefit was \$3,000. The amount of cash received from the exercise of stock options during the first three months of fiscal 2014 was \$51,000 and the related tax benefit was \$24,000.

No stock options were granted in the first six months of either fiscal 2015 or 2014.

Restricted Stock

All of our non-vested restricted stock as of January 31, 2015 was issued under the 2006 Plan with vesting periods between two years and five years.

Under the 2006 Plan, 2,000 restricted shares of Common Stock were granted in the second quarter of fiscal year 2015. No restricted shares were granted in the second quarter of fiscal 2014.

Stock-based compensation expense related to non-vested restricted stock in the second quarter of fiscal years 2015 and 2014 was \$348,000 and \$319,000, respectively. In the first six months of fiscal years 2015 and 2014, the stock-based compensation expense related to non-vested restricted stock was \$656,000 and \$560,000, respectively.

A summary of restricted stock transactions is shown below:

	Restricted Shares (in thousands)	Weighted Average Grant Date Fair Value
Non-vested restricted stock outstanding at July 31, 2014	122	\$27.31
Granted	11	\$28.68
Vested	(25)	\$21.82
Forfeitures	(2)	\$31.15
Non-vested restricted stock outstanding at January 31, 2015	106	\$28.69

9. ACCUMULATED OTHER COMPREHENSIVE INCOME

The following table summarizes the changes in accumulated other comprehensive income by component as of January 31, 2015 (in thousands):

	Unrealized Gain (Loss) on Marketable Securities	Pension and Postretirement Health Benefits	Cumulative Translation Adjustment	Total Accumulated Other Comprehensive Income
Balance as of July 31, 2014	\$114	\$(8,632)	\$255	\$(8,263)
Other comprehensive loss before reclassifications, net of tax	(9)	—	(437)	(446)
Amounts reclassified from accumulated other comprehensive income (loss), net of tax	(105)	a) 192	b) —	87
Net current-period other comprehensive income (loss), net of tax	(114)	192	(437)	(359)
Balance as of January 31, 2015	\$—	\$(8,440)	\$(182)	\$(8,622)

a) Amount is included in the condensed Consolidated Statements of Income on the Other, net line item.

b) Amount is net of tax expense of \$117,000. Amount is included in the components of net periodic benefit cost for the pension and postretirement health plans. See Note 6 for further information.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our financial condition and results of operations should be read together with the financial statements and the related notes included herein and our Consolidated Financial Statements, accompanying notes and Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our Annual Report on Form 10-K for the fiscal year ended July 31, 2014. This discussion contains forward-looking statements that involve risks and uncertainties. Our actual results may differ materially from the results discussed in the forward-looking statements. Factors that might cause a difference include, but are not limited to, those discussed under "Forward-Looking Statements" and Item 1A, Risk Factors, of our Annual Report on Form 10-K for the fiscal year ended July 31, 2014.

OVERVIEW

We develop, mine, manufacture and market sorbent products principally produced from clay minerals and, to a lesser extent, other clay-like sorbent materials. Our principal products include agricultural and horticultural chemical carriers, animal health and nutrition products, cat litter, fluids purification and filtration bleaching clays, industrial and automotive floor absorbents and sports field products. Our products are sold to two primary customer groups, including customers who resell our products as originally produced to the end consumer and those who use our products as part of their production process or use them as an ingredient in their final finished product. We have two reportable operating segments based on the different characteristics of our two primary customer groups: Retail and Wholesale Products Group and Business to Business Products Group, as described in Note 7 of the notes to condensed Consolidated Financial Statements.

RESULTS OF OPERATIONS

SIX MONTHS ENDED JANUARY 31, 2015 COMPARED TO SIX MONTHS ENDED JANUARY 31, 2014

CONSOLIDATED RESULTS

Consolidated net sales for the six months ended January 31, 2015 were \$130,687,000, a decrease of 2% from net sales of \$132,851,000 for the six months ended January 31, 2014. Consolidated net income for the first six months of fiscal 2015 was \$4,917,000, compared to \$7,168,000 for the first six months of fiscal 2014. Operating income declined for both our Retail and Wholesale Products Group and our Business to Business Products Group. Diluted net income per share was \$0.69 for the first six months of fiscal 2015, compared to \$1.01 for the first six months of fiscal 2014.

Net sales for the first six months of fiscal 2015 were flat for our Retail and Wholesale Products Group; however sales declined for our Business to Business Products Group due to lower sales of fluids purification and co-packaged cat litter products.

Consolidated gross profit as a percentage of net sales for the first six months of fiscal 2015 was 22%, which was lower than the 25% reported for the first six months of fiscal 2014. Gross profit declined due primarily to higher manufacturing and packaging costs per ton and an unfavorable product mix. The increase in manufacturing costs per ton was driven by reduced fixed cost absorption due to fewer tons produced and increased labor, benefits and depreciation costs. Depreciation costs increased as we continue to invest in machinery and equipment at our plants. Partially offsetting these cost increases was a 16% decline in the cost per manufactured ton for natural gas used to operate kilns that dry our clay. Freight costs per ton were essentially flat as lower diesel fuel costs were mostly offset

by increased cost pressures, including heightened regulations, in the freight industry. The packaging cost increase and product mix change are discussed by operating segment below.

Total selling, general and administrative expenses were lower for the first six months of fiscal 2015 compared to the first six months of fiscal 2014. Selling, general and administrative expenses as a percentage of net sales were also lower at 16% compared to 18% for the first six months of fiscal 2015 and 2014, respectively. The discussions of the segments' operating incomes below describe the change in the selling, general and administrative expenses that were allocated to the operating segments, particularly lower advertising costs in the Retail and Wholesale Products Group. The remaining unallocated corporate expenses in the first six months of fiscal 2015 included a lower estimated annual incentive plan bonus accrual as compared to the prior year. The incentive bonus expense was based on performance targets that were established for the fiscal year. Expenses in the first six months of fiscal 2014 also included costs related to the MFM acquisition.

Interest expense was \$120,000 lower for the first six months of fiscal 2015 compared to the same period in fiscal 2014 due to a reduction of notes payable and the capitalization of interest on a capital project.

Our effective tax rate was 27% of pre-tax income in the first six months of fiscal 2015, which was higher than the 24% rate for the first six months of fiscal 2014. Our effective tax rate was based on the estimated level of our taxable income for the year and the assessment of various deductions, including depletion.

BUSINESS TO BUSINESS PRODUCTS GROUP

Net sales of the Business to Business Products Group for the first six months of fiscal 2015 were \$46,695,000, a decrease of \$2,484,000, or 5%, from net sales of \$49,179,000 for the first six months of fiscal 2014. Net sales of fluid purification products were down approximately 9% as a result of fewer tons sold. Usage of our product by edible oil producers declined due primarily to natural variations in the quality and characteristics of the soybean crop. Our co-packaged traditional coarse cat litter net sales were also down approximately 10% compared to the first six months of the prior year. Partially offsetting these declines was approximately 8% higher sales of animal health and nutrition products. Sales of animal health and nutrition products increased due primarily to sales by our subsidiary in China (Amlan Trading (Shenzhen) Company, Ltd.) and a favorable product sales mix (defined as a greater proportion of sales from products with a higher selling price). Net sales of products used by agricultural chemical producers were essentially even with the same period of the prior year.

The Business to Business Products Group's operating income for the first six months of fiscal 2015 was \$14,314,000, a decrease of \$1,330,000, or 9%, from operating income of \$15,644,000 for the first six months of fiscal 2014. Operating income was negatively impacted by the reduced sales described above, but was positively impacted by the lower cost per manufactured ton for natural gas used to operate kilns that dry our clay. See further discussion of manufacturing and freight costs in "Consolidated Results" above. Packaging costs per ton were similar to the prior year.

Selling, general and administrative expenses for the Business to Business Products Group were up slightly compared to the first six months of fiscal 2014. Our subsidiary in China was fully operational in the first six months of fiscal 2015 with additional sales personnel and related costs, which in turn reduced commissions paid to outside distributors.

RETAIL AND WHOLESALE PRODUCTS GROUP

Net sales of the Retail and Wholesale Products Group for the first six months of fiscal 2015 were \$83,992,000, an increase of \$320,000 from net sales of \$83,672,000 for the first six months of fiscal 2014. Net sales increased for industrial absorbents products, were essentially flat for both cat litter products and our United Kingdom subsidiary, and declined for our Canadian subsidiary. Our foreign subsidiaries are discussed under "Foreign Operations" below. An 11% increase in sales of industrial absorbents was attributed primarily to more tons sold and a higher average selling price. Sales of both branded and generic floor absorbents increased to existing customers. Overall cat litter net sales and tons sold were similar to the first six months of the prior year. Private label cat litter sales increased approximately 18%. Additional sales from the acquisition of MFM in the second quarter of fiscal 2014 were included in the full six months sales of fiscal 2015, which more than offset a continued decline in the coarse litter market. Our branded cat litter net sales decrease of approximately 12% was attributed primarily to our competitors' introduction of new products, increased advertising and aggressive price discounts. In addition, our trade spending was higher for Cat's Pride Fresh & Light products (trade spending is reported as a reduction of sales). We introduced our new Cat's Pride Fresh & Light Ultimate Care and new lightweight weight private label cat litter products at the end of the second quarter. We anticipate these products will provide opportunities for sales growth in the second half of fiscal 2015.

The Retail and Wholesale Products Group's operating income for the first six months of fiscal 2015 was \$2,148,000, a decrease of \$2,109,000, or 50%, from operating income of \$4,257,000 for the first six months of fiscal 2014. Operating income was diminished by the increased proportion of total cat litter sales derived from private label cat litter, which generally has a lower gross profit than branded cat litter. Higher non-fuel manufacturing and packaging costs further reduced operating income. See discussion of manufacturing and freight costs in "Consolidated Results"

above. Packaging costs rose approximately 7% due to higher prices for plastics commodities, particularly resin, used for many of our cat litter products. We have yet to realize the benefits of the recent drop in resin prices, but we expect some relief later in fiscal 2015. These unfavorable effects more than offset the benefits of lower selling general and administrative expenses, discussed below, and the lower cost per manufactured ton for natural gas used to operate kilns that dry our clay.

Selling, general and administrative expenses for the Retail and Wholesale Products Group were 12% lower than the first six months of fiscal 2014 due to lower advertising expenses, which were partially offset by higher amortization of intangible assets related to the MFM acquisition.

FOREIGN OPERATIONS

Foreign operations include our subsidiaries in Canada and the United Kingdom, which are included in the Retail and Wholesale Products Group, and our subsidiary in China, which is included in the Business to Business Products Group. Net sales by our foreign subsidiaries during the first six months of fiscal 2015 were \$5,867,000, a 5% increase compared to net sales of \$5,582,000 during the first six months of fiscal 2014. The net sales increase was attributed primarily to our subsidiary in China, which more than offset lower cat litter sales by our Canadian subsidiary. Net sales by our foreign subsidiaries represented 4% of our consolidated net sales during the first six months of both fiscal years 2015 and 2014.

Our foreign subsidiaries reported a net loss of \$662,000 for the first six months of fiscal 2015 compared to a net loss of \$242,000 for the first six months of fiscal 2014. The net loss increased due primarily to a reported loss at our new subsidiary in China, which is still being integrated into the market, and foreign currency exchange losses that resulted from the strength of the U.S. Dollar.

Identifiable assets of our foreign subsidiaries as of January 31, 2015 were \$7,677,000, compared to \$7,504,000 as of January 31, 2014. The increase was due primarily to higher inventories and deferred income taxes, which were partially offset by lower net fixed assets.

THREE MONTHS ENDED JANUARY 31, 2015 COMPARED TO THREE MONTHS ENDED JANUARY 31, 2014

CONSOLIDATED RESULTS

Consolidated net sales for the three months ended January 31, 2015 were \$64,643,000, a decrease of 7% from net sales of \$69,305,000 for the three months ended January 31, 2014. Consolidated net income for the second quarter of fiscal 2015 was \$2,797,000, compared to \$4,281,000 for the second quarter of fiscal 2014. Operating income declined for both our Retail and Wholesale Products Group and our Business to Business Products Group. Diluted net income per share was \$0.39 for the second quarter of fiscal 2015, compared to \$0.60 for the second quarter of fiscal 2014.

Net sales for the second quarter of fiscal 2015 declined for our Retail and Wholesale Products Group due primarily to lower sales of cat litter products, which more than offset an increase in sales of industrial absorbents. Sales also declined for our Business to Business Products Group due primarily to lower sales of fluid purification, co-packaged cat litter and agricultural chemical carrier products, which offset higher sales of animal health and nutrition products.

Our consolidated gross profit as a percentage of net sales for the second quarter of fiscal 2015 was 24%, the same as for the second quarter of fiscal 2014. Gross profit was positively impacted by a 23% decline in the cost per manufactured ton for natural gas used to operate kilns that dry our clay, which was offset by an increase in other manufacturing costs. The increase in manufacturing costs per ton was attributed to reduced fixed cost absorption due to fewer tons produced and increased labor, benefits and depreciation costs. Depreciation costs increased as we continue to invest in machinery and equipment at our plants. Gross profit was also negatively impacted by an unfavorable product mix and higher packaging costs, as described by operating segment below. Freight costs per ton were essentially flat as lower diesel fuel costs were mostly offset by increased cost pressures, including heightened regulations, in the freight industry.

Total selling, general and administrative expenses were lower for the second quarter of fiscal 2015 compared to the second quarter of fiscal 2014; however, as a percent of sales they were slightly higher at 17% compared to 16% for the second quarter of fiscal 2014 and 2015, respectively. The discussion of the segments' operating incomes below describes the change in the selling, general and administrative expenses that were allocated to the operating

segments. The remaining unallocated corporate expenses in the second quarter of fiscal 2015 included a lower estimated annual incentive bonus accrual as compared to the prior year. The incentive bonus expense was based on performance targets that were established for the fiscal year. Expenses in the second quarter of fiscal 2014 also included costs related to the MFM acquisition.

Interest expense was \$78,000 lower for the second quarter of fiscal 2015 compared to the same period in fiscal 2014 due primarily to a reduction of notes payable and the capitalization of interest on a capital project.

Our effective tax rate was 28% of pre-tax income in the second quarter of fiscal 2015 compared to 23% in the second quarter of fiscal 2014. Our effective tax rate was based on the estimated level of our taxable income for the year and the assessment of various deductions, including depletion.

BUSINESS TO BUSINESS PRODUCTS GROUP

Net sales of the Business to Business Products Group for the second quarter of fiscal 2015 were \$23,047,000, a decrease of \$2,217,000, or 9%, from net sales of \$25,264,000 for the second quarter of fiscal 2014. Net sales of fluid purification products were approximately 12% lower primarily as a result of fewer tons sold. Usage of our product by edible oil producers declined due primarily to natural variations in the quality and characteristics of the soybean crop. Our co-packaged traditional coarse cat litter net sales were also down approximately 12% compared to the second quarter of the prior year. Sales were down approximately 8% for products used as agricultural chemical carriers by corn rootworm pesticide producers. Partially offsetting these declines were approximately 5% higher sales of animal health and nutrition products. Sales of animal health and nutrition products increased due primarily to sales by our subsidiary in China and a favorable product sales mix.

The Business to Business Products Group's operating income for the second quarter of fiscal 2015 was \$7,443,000, a decrease of \$550,000, or 7%, from operating income of \$7,993,000 in the second quarter of fiscal 2014. Operating income was negatively impacted by the reduced sales described above, but was positively impacted by the lower cost per manufactured ton for natural gas used to operate kilns that dry our clay. See further discussion of manufacturing and freight costs in "Consolidated Results" above.

Selling, general and administrative expenses for the Business to Business Products Group were flat compared to the second quarter of fiscal 2014. Our subsidiary in China was fully operational in the second quarter of fiscal 2015 with additional sales personnel and related costs, which in turn reduced commissions paid to outside distributors.

RETAIL AND WHOLESALE PRODUCTS GROUP

Net sales of the Retail and Wholesale Products Group for the second quarter of fiscal 2015 were \$41,596,000, a decrease of \$2,445,000, or 6%, from net sales of \$44,041,000 for the second quarter of fiscal 2014. Net sales declined for cat litter products and for our Canadian subsidiary, but increased for industrial absorbents products and for our United Kingdom subsidiary. Our foreign subsidiaries are discussed under "Foreign Operations" below. An 11% increase in sales of industrial absorbents was attributed primarily to more tons sold and a higher average selling price for both branded and generic floor absorbents. Overall cat litter net sales and tons sold were down compared to the second quarter of the prior year. Our branded cat litter net sales decrease of approximately 12% was attributed primarily to our competitors' introduction of new products, increased advertising and aggressive price discounts. Our private label cat litter sales declined approximately 3% due to similar competitive pressures and a continued decline in the coarse litter market. We introduced our new Cat's Pride Fresh & Light Ultimate Care and new lightweight weight private label cat litter products at the end of the second quarter. We anticipate these products will provide opportunities for sales growth in the second half of fiscal 2015.

The Retail and Wholesale Products Group reported operating income of \$1,262,000 for the second quarter of fiscal 2015, a decrease of \$1,720,000, or 58%, from operating income of \$2,982,000 for the second quarter of fiscal 2014. The decrease in sales described above contributed to the lower operating income. The increased proportion of total cat litter sales derived from private label cat litter, which generally has a lower gross profit than branded cat litter, further diminished operating income. Higher non-fuel manufacturing, packaging and selling and administrative costs also negatively impacted operating income. See discussion of manufacturing and freight costs in "Consolidated Results" above. Packaging costs rose approximately 8% due to higher prices for plastics commodities, particularly resin, used for many of our cat litter products. We have yet to realize the benefits of the recent drop in resin prices, but we expect some relief later in fiscal 2015. These negative factors more than offset the benefit of a lower cost per manufactured ton for natural gas used to operate kilns that dry our clay.

Selling, general and administrative expenses for the Retail and Wholesale Products Group were 10% higher than the second quarter of fiscal 2014 due primarily to increased product development costs and additional amortization of intangible assets related to the MFM acquisition in the second quarter of fiscal 2014. These cost increases were partially offset by lower advertising costs.

FOREIGN OPERATIONS

Foreign operations include our subsidiaries in Canada and the United Kingdom, which are included in the Retail and Wholesale Products Group, and our subsidiary in China, which is included in the Business to Business Products Group. Net sales by our foreign subsidiaries during the second quarter of fiscal 2015 were \$2,746,000, a 5% increase compared to net sales of \$2,604,000 during the second quarter of fiscal 2014. The net sales increase was attributed primarily to our subsidiary in China, which more than offset lower cat litter sales by our Canadian subsidiary. Net sales by our foreign subsidiaries represented approximately 4% of our consolidated net sales during the second quarter of both fiscal years 2015 and 2014.

Our foreign subsidiaries reported a net loss of \$420,000 for the second quarter of fiscal 2015 compared to a net loss of \$125,000 for the second quarter of fiscal 2014. The net loss increased due primarily to a reported loss at our new subsidiary in China, which is still being integrated into the market, and foreign currency exchange losses that resulted from the strength of the U.S. Dollar.

LIQUIDITY AND CAPITAL RESOURCES

Our principal capital requirements include: funding working capital needs; purchasing and upgrading equipment, facilities and real estate; supporting new product development; investing in infrastructure; repurchasing Common Stock; paying dividends; and business acquisitions. During the first six months of fiscal 2015, we principally used cash generated from operations and from previous debt issuances to fund these requirements. We also have the ability to borrow under our credit facilities; however, we have not borrowed under the credit agreement in recent years. Cash and cash equivalents decreased \$3,467,000 during the first six months of fiscal 2015 to \$12,763,000 as of January 31, 2015.

The following table sets forth certain elements of our condensed Consolidated Statements of Cash Flows (in thousands):

	For the Six Months Ended January 31,	
	2015	2014
Net cash provided by operating activities	\$10,607	\$2,400
Net cash used in investing activities	(7,967) (8,410
Net cash used in financing activities	(6,092) (5,919
Effect of exchange rate changes on cash and cash equivalents	(15) (24
Net decrease in cash and cash equivalents	\$(3,467) \$(11,953

Net cash provided by operating activities

In addition to net income, as adjusted for depreciation and amortization and other non-cash operating activities, the primary sources and uses of operating cash flows for the first six months of fiscal years 2015 and 2014, were as follows:

Accounts receivable, less allowance for doubtful accounts, increased \$1,258,000 in the first six months of fiscal 2015 compared to an increase of \$5,874,000 in the first six months of fiscal 2014. Sales in the second quarter of fiscal 2015 were lower than in the second quarter of fiscal 2014. The change in both periods is also subject to the timing of sales and collections and the payment terms provided to various customers.

Inventories decreased \$822,000 in the first six months of fiscal 2015 compared to an increase of \$1,347,000 in the same period in fiscal 2014. Finished goods inventory was down in the first six months of fiscal 2015 as lower sales required fewer tons to be held in inventory. The lower finished goods inventory was partially offset by an increase in additives inventories due to favorable purchasing opportunities. In the first six months of fiscal 2014, finished goods inventory was up primarily due to higher costs and increased tons in inventory. Packaging inventories were also up due to higher costs and production projections for certain products.

Prepaid expenses decreased \$1,628,000 in the first six months of fiscal 2015 compared to an increase of \$725,000 in the first six months of fiscal 2014. The decrease in the first six months of fiscal 2015 was due primarily to a reclassification of prepaid rents and royalties to other long-term assets and a decrease in prepaid income taxes. These decreases were partially offset by increases in both prepaid insurance and prepaid advertising. The increase in prepaid expenses in the first six months of fiscal 2014 was due primarily to increases in both prepaid insurance and prepaid

advertising.

Other assets increased \$1,205,000 in the first six months of fiscal 2015 compared to an increase of \$312,000 in the first six months of fiscal 2014. The increase in the first six months of fiscal 2015 was due primarily to the reclassification of prepaid rents and royalties from current prepaid expenses. The cash surrender value of life insurance on key employees also increased in both periods.

Accounts payable decreased \$1,232,000 in the first six months of fiscal 2015 compared to an increase of \$381,000 in the first six months of fiscal 2014. Trade and freight payables varied in both periods due to timing of payments, fluctuations in the cost of goods and services we purchased, production volume levels and vendor payment terms. In the first six months of fiscal 2014, an increase in trade accounts payable was partially offset by a decrease in accrued income taxes.

Accrued expenses decreased \$867,000 in the first six months of fiscal 2015 compared to a decrease of \$3,558,000 in the first six months of fiscal 2014. The purchase of plant equipment previously under a capital lease decreased accrued expense in the first six months of fiscal 2015. Accrued salaries included the discretionary incentive bonus accrual, which in the first six months of

both fiscal 2015 and 2014 decreased by the payout of the prior fiscal year's bonus and increased by a lesser amount for the fiscal year's first six months' accrual. The payout in the first six months of fiscal 2014 was substantially higher than the payout in the first six months of fiscal 2015. Accrued trade promotions and advertising in the first six months of both fiscal 2015 and 2014 varied due to the timing of marketing programs. Similar to accounts payable, accrued plant expenses fluctuated due to timing of payments, fluctuations in the cost of goods and services we purchased, production volume levels and vendor payment terms.

Deferred compensation increased \$357,000 in the first six months of fiscal 2015 compared to an increase of \$407,000 in the first six months of fiscal 2014. Deferred compensation balances in both periods were reduced by scheduled payouts and were increased by employee deferrals and interest earned on accumulated balances.

Pension and other postretirement liabilities increased \$519,000 in the first six months of fiscal 2015 compared to an increase of \$528,000 in the first six months of fiscal 2014. The liability for both periods was determined based on annual actuarial valuations using various assumptions. See Note 6 of the notes to condensed Consolidated Financial Statements for further discussion of our postretirement benefit obligations.

Other liabilities increased \$172,000 in the first six months of fiscal 2015 compared to an increase of \$243,000 in the first six months of fiscal 2014. Our mine site reclamation liability increased in the first six months of both fiscal 2014 and 2015. A reclassification of the uncertain tax positions accrual to long-term also contributed to the increase for the first six months of fiscal 2014.

Net cash used in investing activities

Cash used in investing activities was \$7,967,000 in the first six months of fiscal 2015 compared to net cash used in investing activities of \$8,410,000 in the first six months of fiscal 2014. In the first six months of fiscal 2014, \$12,505,000 of cash was used in the acquisition of MFM, plus an additional \$500,000 was classified as restricted cash held in escrow at January 31, 2014. The final restricted cash disbursement was made and the remaining balance was returned to operating cash in the first six months of fiscal 2015. Cash used for capital expenditures of \$9,920,000 and \$6,782,000 in the first six months of fiscal 2015 and 2014, respectively, was primarily for new processing and packaging equipment as well as equipment replacement at our manufacturing facilities. Disposition of investment securities exceeded purchases by \$1,701,000 and \$11,361,000 in the first six months of fiscal 2015 and 2014, respectively. Purchases and dispositions of investment securities in both periods are subject to variations in the timing of investment maturities and the operating cash needs of the Company.

Net cash used in financing activities

Cash used in financing activities was \$6,092,000 in the first six months of fiscal 2015 compared to cash used in financing activities of \$5,919,000 in the first six months of fiscal 2014. Scheduled payments on long-term debt in the first six months of fiscal 2015 and 2014 were both \$3,500,000. Dividend payments in the first six months of fiscal 2015 were \$2,623,000 compared to \$2,478,000 paid during the same period of fiscal 2014 due to a dividend increase.

Other

Total cash and investment balances held by our foreign subsidiaries of \$1,154,000 as of January 31, 2015 were lower than the January 31, 2014 balances of \$1,250,000. See further discussion in "Foreign Operations" above.

On December 4, 2014, we signed a fourth amendment to our credit agreement with BMO Harris Bank N.A. ("BMO Harris"), to extend the term to December 4, 2019. The new agreement provides for a \$25,000,000 unsecured revolving credit agreement, including a maximum of \$5,000,000 for foreign letters of credit. The remaining terms are

substantially unchanged from our previous agreement with BMO Harris, including the provision that we may select a variable rate based on either the BMO Harris prime rate or a LIBOR-based rate, plus a margin which varies depending on our debt to earnings ratio, or a fixed rate as agreed between us and BMO Harris. At January 31, 2015, the variable rates would have been 3.25% for the BMO Harris prime-based rate or 1.63% for the LIBOR-based rate. The credit agreement contains restrictive covenants that, among other things and under various conditions, limit our ability to incur additional indebtedness or to dispose of assets. The agreement also requires us to maintain a minimum fixed coverage ratio and a minimum consolidated net worth. We did not borrow under the credit agreement during the six months ended January 31, 2015 and 2014, and we were in compliance with its covenants.

As of January 31, 2015, we had remaining authority to repurchase 309,613 shares of Common Stock under a repurchase plan approved by our Board of Directors. These repurchases may be made on the open market (pursuant to Rule 10b5-1 plans or otherwise) or in negotiated transactions. The timing and amount of shares repurchased will be determined by our management.

We believe that cash flow from operations, availability under our revolving credit facility, current cash and investment balances and our ability to obtain other financing, if necessary, will provide adequate cash funds for foreseeable working capital needs, capital expenditures at existing facilities, dividend payments and debt service obligations for at least the next 12 months. We believe cash requirements for capital expenditures in fiscal 2015 will be comparable to fiscal 2014 due to projects at our manufacturing facilities. Our cash requirements are subject to change as business conditions warrant and opportunities arise. We continually evaluate our liquidity position and anticipated cash needs, as well as the financing options available to obtain additional cash reserves. Our ability to fund operations, to make planned capital expenditures, to make scheduled debt payments and to remain in compliance with all financial covenants under debt agreements, including, but not limited to, the current credit agreement, depends on our future operating performance, which, in turn, is subject to prevailing economic conditions and to financial, business and other factors. The timing and size of any new business ventures or acquisitions that we complete may also impact our cash requirements.

The tables in the following subsection summarize our contractual obligations and commercial commitments (in thousands) as of January 31, 2015 for the time-frames indicated.

CONTRACTUAL OBLIGATIONS AND COMMERCIAL COMMITMENTS

Contractual Obligations	Payments Due by Period				
	Total	Less Than 1 Year	1 – 3 Years	4 – 5 Years	After 5 Years
Notes Payable	\$18,900	\$3,483	\$6,167	\$6,167	\$3,083
Interest on Notes Payable	2,598	756	1,109	611	122
Operating Leases	5,778	1,842	2,523	939	474
Total Contractual Cash Obligations	\$27,276	\$6,081	\$9,799	\$7,717	\$3,679

We made total contributions to our defined benefit pension plan of \$581,000 during the first six months of fiscal 2015. We estimate contributions of approximately \$1,276,000 will be made during the remainder of fiscal 2015. We have not presented this obligation for future years in the table above because the funding requirement can vary from year to year based on changes in the fair value of plan assets and actuarial assumptions. See “Item 3. Quantitative and Qualitative Disclosures About Market Risk” below for a discussion of the potential impact of financial market fluctuations on pension plan assets and future funding contributions.

Other Commercial Commitments	Amount of Commitment Expiration Per Period				
	Total	Less Than 1 Year	1 – 3 Years	4 – 5 Years	After 5 Years
Other Commercial Commitments	\$34,817	\$34,817	\$—	\$—	\$—

The other commercial commitments in the table above represent open purchase orders, including blanket purchase orders, for items such as packaging, additives and pallets used in the normal course of operations. The expected timing of payments for these obligations is estimated based on current information. Timing of payments and actual amounts paid may be different depending on the time of receipt of goods or services, or changes to agreed-upon amounts for some obligations.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

This discussion and analysis of financial condition and results of operations is based on our unaudited condensed Consolidated Financial Statements, which have been prepared in accordance with U.S. GAAP for interim financial information and in compliance with instructions to Form 10-Q and Article 10 of Regulation S-X. The preparation of these financial statements requires the use of estimates and assumptions related to the reporting of assets, liabilities, revenues, expenses and related disclosures. In preparing these financial statements, we have made our best estimates

and judgments of certain amounts included in the financial statements. Estimates and assumptions are revised periodically. Actual results could differ from these estimates. See the information concerning our critical accounting policies included under “Management’s Discussion of Financial Condition and Results of Operations” in our Annual Report on Form 10-K for the fiscal year ended July 31, 2014.

Recently Adopted Accounting Standards

The tangible property regulations ("repair regulations") released by the Internal Revenue Service in September 2013 under Sections 162(a) and 263(a) of the Internal Revenue Code were effective for our tax year beginning August 1, 2014. The repair regulations provide guidance regarding the timing of deductions and the capitalization of amounts paid to acquire, produce or improve tangible property. We believe our accounting policies comply with the requirements of the repair regulations and there is no material impact on our Consolidated Financial Statements.

Recently Issued Regulations

In May 2014, the FASB issued guidance under ASC 250, Revenue from Contract with Customers, which establishes a single comprehensive revenue recognition model for all contracts with customers and will supersede most existing revenue guidance. This guidance requires entities to recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled to receive in exchange. Transition options include either a full or modified retrospective approach and early adoption is not permitted. This guidance will be effective at the beginning of our first quarter of fiscal 2017. We are currently evaluating the impact of the adoption of this requirement on our Consolidated Financial Statements.

In August 2014, the FASB issued guidance under ASC 205, Presentation of Financial Statements - Going Concern, which defines management's responsibility to evaluate whether there is substantial doubt about an organization's ability to continue as a going concern and to provide related footnote disclosures. This guidance will be effective for our fiscal year ended July 31, 2017. We are currently evaluating the impact of the adoption of this requirement on our Consolidated Financial Statements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to interest rate risk and employ policies and procedures to manage our exposure to changes in the market risk of our cash equivalents and short-term investments. We believe that the market risk arising from holdings of our financial instruments is not material.

We are exposed to foreign currency fluctuation risk, primarily the U.S. Dollar relative to the British Pound, Euro, Canadian Dollar and Chinese Yuan Renminbi, as related to certain accounts receivable and to our foreign operations. We are also subject to translation exposure of our foreign subsidiaries' financial statements. In recent years, our foreign subsidiaries have not generated a substantial portion of our consolidated sales or net income. In addition, a small portion of our consolidated accounts receivable are denominated in foreign currencies. In the first six months of fiscal 2015, we did not enter into any hedge contracts in an attempt to offset any adverse effect of changes in currency exchange rates. We believe that the overall foreign currency fluctuation risk is not material to our Consolidated Financial Statements.

We are exposed to market risk as it relates to the investments of plan assets under our defined benefit pension plan. The fair value of these assets is subject to change due to fluctuations in the financial markets. A lower asset value may increase our pension expense and may increase the amount of future funding contributions.

We are exposed to regulatory risk in the fluid purification, animal health and agricultural markets, principally as a result of the risk of increasing regulation of the food chain throughout the world, but particularly in the United States and Europe. We actively monitor developments in this area, both directly and through trade organizations of which we are a member.

We are exposed to commodity price risk with respect to fuel. Factors that could influence the cost of natural gas used in the kilns to dry our clay include the creditworthiness of our natural gas suppliers, the overall general economy, developments in world events, general supply and demand for natural gas, seasonality and the weather patterns throughout the United States and the world. We monitor fuel market trends and, consistent with our past practice, we may contract for a portion of our anticipated fuel needs using forward purchase contracts to mitigate the volatility of our kiln fuel prices. We have not purchased any natural gas contracts for our planned kiln fuel needs for fiscal 2015. We continue to purchase natural gas at spot rates on a month to month basis.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Management conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the “Exchange Act”)) as of the end of the period covered by this Quarterly Report on Form 10-Q. The controls evaluation was conducted under the supervision and with the participation of management, including our Chief Executive Officer (“CEO”) and Chief Financial Officer (“CFO”). Based upon the controls evaluation, our CEO and CFO have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified by the SEC, and that such information is accumulated and communicated to management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that occurred during the fiscal quarter ended January 31, 2015 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Inherent Limitations on Effectiveness of Controls

Our management, including the CEO and CFO, do not expect that our disclosure controls and procedures or our internal control over financial reporting will prevent or detect all errors and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system’s objectives will be met. The design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Further, because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Projections of any evaluation of controls effectiveness to future periods are subject to risks. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures.

PART II – OTHER INFORMATION

Items 1, 1A, 2, 3 and 5 of this Part II are either inapplicable or are answered in the negative and are omitted pursuant to the instructions to Part II.

ITEM 4. MINE SAFETY DISCLOSURES

Our mining operations are subject to regulation by the Mine Safety and Health Administration under authority of the Federal Mine Safety and Health Act of 1977, as amended. Information concerning mine safety violations or other regulatory matters required by section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act and Item 104 of Regulation S-K is included in Exhibit 95 to this Quarterly Report on Form 10-Q.
