Item 2.05. Costs Associated with Exit or Disposal Activities.

On March 18, 2016, Olin Corporation (Olin) approved a plan to permanently close Olin's Henderson, Nevada chlor alkali facility and to reconfigure that site to manufacture bleach and distribute caustic soda and hydrochloric acid.

As the result of this production change, Olin will incur approximately \$95 million of additional pretax restructuring charges in first quarter 2016. Olin currently estimates that these restructuring charges will consist of:

Description	Amount
Restructuring Costs Related to Henderson	(in millions)
Write-off of equipment and facilities	\$75
Employee-related costs	6
Facility exit costs	2
Lease and other contract termination costs	12
Total	\$95

Item 2.06. Material Impairments.

As noted in Item 2.05 above, Olin intends to close its Henderson, Nevada chlor alkali manufacturing facility. On March 18, 2016, Olin concluded that it expects to recognize an impairment loss of approximately \$75 million, related to this closure. Although Olin expects that property, plant and equipment will be impaired, it believes that all of the impairment charges will be non-cash charges.

Item 7.01. Regulation FD Disclosure.

Attached as Exhibit 99.1 and incorporated herein by reference is a copy of Olin's press release dated March 21, 2016 announcing that its first quarter 2016 results will contain approximately \$95 million of pretax restructuring charges. These charges are associated with plans to reduce our chlor alkali manufacturing capacity by 153,000 tons. Approximately 80 percent of these restructuring charges represent non-cash asset impairment charges. The cash component of these charges includes employee related costs and contract terminations associated with the Henderson, Nevada facility.

Item 9.01. Financial Statements and Exhibits.
