### Terms

Allowance for loan losses to total loans Represents period-end allowance for loan losses divided by retained loans.

Assets under administration Assets under

Represents assets that are beneficially owned by clients and all investment decisions

pertaining to these assets are also made by clients.

management

Represents assets that are managed on behalf of clients.

Basel III

A comprehensive set of reform measures designed to improve the regulation, supervision, and risk management within the banking sector. The reforms require banks to maintain

proper leverage ratios and meet certain capital requirements.

Benefit obligation

Refers to the projected benefit obligation for pension plans and the accumulated

postretirement benefit obligation for OPEB plans.

Capital Bank

Division of Chemung Canal Trust Company located in the "Capital Region" of New York

State and includes the counties of Albany and Saratoga.

Product involving a network of financial institutions that exchange certificates of deposits among members in order to ensure FDIC insurance coverage on customer deposits above the single institution limit. Using a sophisticated matching system, funds are exchanged on a dollar-for-dollar basis, so that the equivalent of an original deposit comes back to the

originating institution.

**CDARS** 

Captive insurance

company Collateralized debt

obligation

A company that provides risk-mitigation services for its parent company.

A structured financial product that pools together cash flow-generating assets, such as

mortgages, bonds, and loans.

Collateralized mortgage

obligations

Dodd-Frank Act

A type of mortgage-backed security with principal repayments organized according to their maturities and into different classes based on risk. The mortgages serve as collateral and are organized into classes based on their risk profile.

The Dodd-Frank Act was enacted on July 21, 2010 and significantly changed the bank regulatory landscape and has impacted and will continue to impact the lending, deposit, investment, trading and operating activities of financial institutions and their holding

companies. The Dodd-Frank Act requires various federal agencies to adopt a broad range of

new rules and regulations, and to prepare various studies and reports for Congress. Income from tax-exempt loans and investment securities that have been increased by an amount equivalent to the taxes that would have been paid if this income were taxable at

Fully taxable equivalent basis

> within income tax expense. Accounting principles generally accepted in the United States of America.

**GAAP** Consists of the operations for Chemung Financial Corporation (parent only). Holding company Product involving a network of financial institutions that exchange interest-bearing money

market deposits among members in order to ensure FDIC insurance coverage on customer deposits above the single institution limit. Using a sophisticated matching system, funds are exchanged on a dollar-for-dollar basis, so that the equivalent of an original deposit comes

An obligation extending beyond the current year, which is related to a long term capital

statutory rates; the corresponding income tax impact related to tax-exempt items is recorded

back to the originating institution.

Residential real estate loans originated for sale on the secondary market with maturities Loans held for sale

from 15-30 years.

Long term lease obligation

**ICS** 

Mortgage-backed

securities

A type of asset-backed security that is secured by a collection of mortgages.

lease that is considered to have the economic characteristics of asset ownership.

Municipal clients A political unit, such as a city, town, or village, incorporated for local self-government. N/A

Data is not applicable or available for the period presented.

N/M Not meaningful.

Non-GAAP A calculation not made according to GAAP.

Obligations of state and political subdivisions Obligations of U.S.

Government

Obligations of U.S. Government sponsored enterprise obligations

An obligation that is guaranteed by the full faith and credit of a state or political subdivision that has the power to tax.

A federally guaranteed obligation backed by the full power of the U.S. government,

including Treasury bills, Treasury notes and Treasury bonds.

Obligations of agencies originally established or chartered by the U.S. government to serve public purposes as specified by the U.S. Congress; these obligations are not explicitly guaranteed as to the timely payment of principal and interest by the full faith and credit of the U.S. government.

Represents real property owned by the Corporation, which is not directly related to its business and is **OREO** 

most frequently the result of a foreclosure on real property.

Impairment charge taken on a security whose fair value has fallen below the carrying value on the OTTI

balance sheet and whose value is not expected to recover through the holding period of the security.

Represents loans that were acquired in the Fort Orange Financial Corp. transaction and deemed to be

credit-impaired on the acquisition date in accordance with the guidance of FASB.

A county, city, town, or other municipal corporation, a public authority, or a publicly-owned entity **Political** subdivision

that is an instrumentality of a state or a municipal corporation.

Represents total net revenue less noninterest expense, before income tax expense (benefit). The Pre-provision Corporation believes that this financial measure is useful in assessing the ability of a bank to generate profit/(loss)

income in excess of its provision for credit losses.

Risk-weighted assets consist of on- and off-balance sheet assets that are assigned to one of several broad risk categories and weighted by factors representing their risk and potential for default. On-balance sheet assets are risk-weighted based on the perceived credit risk associated with the obligor or counterparty, the nature of any collateral, and the guarantor, if any. Off-balance sheet assets such as lending-related commitments, guarantees, derivatives and other applicable off-balance

sheet positions are risk-weighted by multiplying the contractual amount by the appropriate credit conversion factor to determine the on-balance sheet credit equivalent amount, which is then

risk-weighted based on the same factors used for on-balance sheet assets. Risk-weighted assets also

incorporate a measure for market risk related to applicable trading assets-debt and equity

instruments. The resulting risk-weighted values for each of the risk categories are then aggregated to

determine total risk-weighted assets.

SBA loan pools Business loans partially guaranteed by the SBA.

Securities sold

**RWA** 

PCI loans

under

agreements to repurchase

Sale of securities together with an agreement for the seller to buy back the securities at a later date.

A TDR is deemed to occur when the Corporation modifies the original terms of a loan agreement by **TDR** granting a concession to a borrower that is experiencing financial difficulty.

A hybrid security with characteristics of both subordinated debt and preferred stock which allows for Trust preferred securities early redemption by the issuer, makes fixed or variable payments, and matures at face value.

Financial statements and information that have not been subjected to auditing procedures sufficient to Unaudited

permit an independent certified public accountant to express an opinion.

Provides services as executor and trustee under wills and agreements, and guardian, custodian, trustee and agent for pension, profit-sharing and other employee benefit trusts, as well as various investment,

financial planning, pension, estate planning and employee benefit administration services.

# CHEMUNG FINANCIAL CORPORATION AND SUBSIDIARIES NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

### NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### Organization

The Corporation, through its wholly-owned subsidiaries, the Bank and CFS, provides a wide range of banking, financing, fiduciary and other financial services to its clients. The Corporation and the Bank are subject to the regulations of certain federal and state agencies and undergo periodic examinations by those regulatory authorities.

CRM, a wholly-owned subsidiary of the Corporation, which was formed and began operations on May 31, 2016, is a Nevada-based captive insurance company which insures against certain risks unique to the operations of the Corporation and its subsidiaries and for which insurance may not be currently available or economically feasible in today's insurance marketplace. CRM pools resources with several other similar insurance company subsidiaries of financial institutions to spread a limited amount of risk among themselves. CRM is subject to regulations of the State of Nevada and undergoes periodic examinations by the Nevada Division of Insurance.

### **Basis of Presentation**

The accompanying unaudited consolidated financial statements have been prepared in conformity with GAAP for interim financial information and pursuant to the requirements for reporting on Form 10-Q and Article 10 of Regulation S-X of the Exchange Act. These financial statements include the accounts of the Corporation and its subsidiaries, and all significant intercompany balances and transactions are eliminated in consolidation. Amounts in the prior periods' consolidated financial statements are reclassified whenever necessary to conform to the current period's presentation.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions based on available information. These estimates and assumptions affect the amounts reported in the financial statements and disclosures provided, and actual results could differ. In the opinion of management, all adjustments (consisting of normal recurring adjustments) and disclosures necessary for the fair presentation of the accompanying consolidated financial statements have been included. The unconsolidated financial statements should be read in conjunction with the Corporation's 2017 Annual Report on Form 10-K for the year ended December 31, 2017. The results of operations for any interim periods are not necessarily indicative of the results which may be expected for the entire year.

### Reclassifications

Some items in the prior year financial statements were reclassified to conform to the current presentation. Reclassifications had no effect on prior year net income or shareholders' equity.

### **Recent Accounting Pronouncements**

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842). ASU 2016-02 requires companies that lease valuable assets to recognize on their balance sheets the assets and liabilities generated by contracts longer than a year. The amendments in this update are effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2018, though early adoption is permitted. The Corporation intends to adopt the new lease guidance as of January 1, 2019 and is currently evaluating the impact that adoption of these updates will have on

its consolidated financial statements. Currently, the Corporation believes the implementation of this ASU will create a right of use asset of less than \$10.0 million for the Corporation's 15 leased facilities and a related capital obligation of the same amount as of January 1, 2019.

In June 2016, the FASB issued ASU 2016-13, Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. The objective of the ASU is to provide financial statement users with more decision-useful information about the expected credit losses on financial instruments and other commitments to extend credit held by a reporting entity at each reporting date by replacing the incurred loss impairment methodology in current GAAP with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to form credit loss estimates. The amendments in this ASU are effective for public companies for fiscal years beginning after December 15, 2019, though entities may adopt the amendments earlier for fiscal years beginning after December 15, 2018. The Corporation is currently evaluating the impact of the adoption of this guidance on its consolidated financial statements. The Corporation anticipates that the adoption of the CECL model will result in an increase to the Corporation's allowance for loan losses. The Corporation has established a committee to oversee the implementation of CECL and has selected a vendor to assist in the implementation process. In 2018 the committee plans to begin establishing parameters which will be used in the CECL model with the selected vendor. The Corporation further plans to run its current incurred loss model and a CECL model concurrently for twelve months prior to the adoption of this guidance on January 1, 2020.

In January 2017, the FASB issued ASU 2017-04, Intangibles - Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment. The objective of the ASU is to simplify the manner in which an entity is required to test goodwill for impairment by eliminating Step 2 from the goodwill impairment test. Additionally, the ASU removes the requirement for any reporting unit with a zero or negative carrying amount to perform a qualitative assessment and, if it fails such qualitative test, to perform Step 2 of the goodwill impairment test. The amendments in this ASU are effective for annual, or any interim, goodwill impairment tests in fiscal years beginning after December 15, 2019. The adoption of the ASU is not expected to have a significant impact on the Corporation's consolidated financial statements.

In March 2017, the FASB issued ASU 2017-08, Receivables - Nonrefundable Fees and Other Costs (Subtopic 310-20): Premium Amortization on Purchased Callable Debt Securities. The objective of the ASU is to align the amortization period of premiums and discounts to expectations incorporated in market pricing on the underlying securities. The amendment requires that the premium be amortized to the earliest call date, but does not require an accounting change for securities held at a discount; the discount continues to be amortized to maturity. The amendments in this ASU are effective for fiscal years, and for interim periods within those fiscal years, beginning after December 15, 2018. The adoption of the ASU is not expected to have a significant impact on the Corporation's consolidated financial statements.

### Adoption of New Accounting Standards

On December 31, 2017, the Corporation elected for early adoption of ASU 2018-02, Income Statement - Reporting Comprehensive Income: Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income ("ASC 220"). The objective of ASC 220 was to allow a reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulting from the Tax Act passed in December 2017. Adoption of ASC 220 eliminated the stranded tax effects within accumulated other comprehensive income resulting from the revaluation of the net deferred tax asset. Results for the three and twelve months ended December 31, 2017 were presented in accordance with ASC 220, with a reclassification of \$1.8 million from accumulated other comprehensive income to retained earnings. The adoption of ASC 220 did not result in any adjustments during the first quarter of 2018 and the Corporation does not expect any adjustments going forward.

On January 1, 2018, the Corporation adopted ASU 2014-09 Revenue from Contracts with Customers and all subsequent amendments to the ASU (collectively, "ASC 606"), which (1) creates a single framework for recognizing revenue from contracts with customers that fall within its scope and (2) revises when it is appropriate to recognize a gain (loss) from the transfer of nonfinancial assets, such as other real estate owned. The majority of the Corporation's

revenues come from interest income and other sources, including loans, leases, securities, and derivatives, that are outside the scope of ASC 606. The Corporation's services that fall within the scope of ASC 606 are presented within Non-interest income and are recognized as revenue as the Corporation satisfies its obligation to the customer. Services within the scope of ASC 606 include deposit service charges on deposits, interchange income, wealth management fees, investment brokerage fees, and the sale of other real estate owned. Refer to Note 10 Revenue from Contracts with Customers for further discussion on the Corporation's accounting policies for revenue sources within the scope of ASC 606.

The Corporation adopted ASC 606 using the modified retrospective method applied to all contracts not completed as of January 1, 2018. Results for reporting periods beginning after January 1, 2018 are presented under ASC 606, while prior period amounts continue to be reported in accordance with legacy GAAP. The adoption of ASC 606 did not result in a change to the accounting for any of the in-scope revenue streams; as such, no cumulative effect adjustment was recorded.

On January 1, 2018, the Corporation adopted ASU 2016-01, an amendment to Recognition and Measurement of Financial Assets and Financial Liabilities ("ASC 825"). The objectives of the ASC 825 were (1) require equity investments to be measured at fair value, with changes in fair value recognized in net income, (2) simplify the impairment assessment of equity investments without readily determinable fair values, (3) eliminate the requirement to disclose methods and significant assumptions used to estimate fair value for financial instruments measured at amortized cost on the balance sheet, (4) require the use of the exit price notion when measuring the fair value of financial instruments, and (5) clarify the need for a valuation allowance on a deferred tax asset related to available-for-sale securities in combination with the entity's other deferred tax assets.

The Corporation adopted ASC 825 using the modified retrospective method applied to equity investments as of January 1, 2018. Results for reporting periods beginning after January 1, 2018 are presented under ASC 825, with comparable consolidated balance sheets also reported. The adjustments to opening retained earnings and accumulated other comprehensive loss related to the adoption of ASC 825 and are immaterial to the financial statements.

On January 1, 2018, the Corporation adopted ASU 2016-15, Statement of Cash Flows: Classification of Certain Cash Receipts and Cash Payments ("ASC 230"). The objective of ASC 230 was to reduce the existing diversity in practice relating to eight specific cash flow issues: (1) debt prepayment or debt extinguishment costs, (2) settlement of zero-coupon debt instruments or other debt instruments with coupon interest rates that are insignificant in relation to the effective interest rate of the borrowing, (3) contingent consideration payments made after a business combination, (4) proceeds from the settlement of insurance claims, (5) proceeds from the settlement of corporate-owned life insurance policies, including bank-owned life insurance policies, (6) distributions received from equity method investees, (7) beneficial interests in securitization transactions, and (8) separately identifiable cash flows and application of the predominance principal. Results for reporting periods beginning after January 1, 2018 are presented under ASC 230, while prior periods amounts continue to be reported in accordance with legacy GAAP. The adoption of ASC 230 did not result in a change to how the Corporation accounts for its cash flows.

On January 1, 2018, the Corporation adopted ASU 2017-07, Compensation - Retirement Benefits - Improving the Presentation of Net Periodic Cost and Net Periodic Postretirement Benefit Cost ("ASC 715"). The objective of ASC 715 was to improve guidance related to the presentation of defined benefit costs in the income statement. Specifically, ASC 715 required that an employer report the service cost component in the same line item(s) as other compensation costs arising from services rendered by the pertinent employees during the period. The other components of net benefit cost are required to be presented in the income statement separately from the service cost component and outside a subtotal of income from operations, if one is presented. Additionally, ASC 715 allows only the service cost component to be eligible for capitalization, when applicable. Results for reporting periods beginning after January 1, 2018 are presented under ASC 715, while prior period amounts continue to be reported in accordance with legacy GAAP, with comparable periods presented retrospectively for the presentation of the service cost and net periodic postretirement benefit cost in the income statement. The Corporation elected the practical expedient, which permits employers to use the amounts disclosed in its pension and other postretirement benefit plan note for the prior comparative periods as the estimation for applying retrospective presentation requirements.

### NOTE 2 EARNING PER COMMON SHARE (shares in thousands)

Basic earnings per share is net income divided by the weighted average number of common shares outstanding during the period. Issuable shares, including those related to directors' restricted stock units and directors' stock compensation, are considered outstanding and are included in the computation of basic earnings per share. All outstanding unvested share based payment awards that contain rights to non-forfeitable dividends are considered participating securities for this calculation. Restricted stock awards are grants of participating securities and are considered outstanding at grant date. Earnings per share information is adjusted to present comparative results for

stock splits and stock dividends that occur. Earnings per share were computed by dividing net income by 4,822 and 4,790 weighted average shares outstanding for the three-month periods ended March 31, 2018 and 2017, respectively. There were no common stock equivalents during the three-month periods ended March 31, 2018 or 2017.

### NOTE 3 SECURITIES

Amortized cost and estimated fair value of securities available for sale are as follows (in thousands):

	March 31	, 2018	,

Other-Than-Temporary Impairment

As of March 31, 2018, the majority of the Corporation's unrealized losses in the investment securities portfolio related to mortgage-backed securities. At March 31, 2018, all of the unrealized losses related to mortgage-backed securities were issued by U.S. government sponsored entities, Fannie Mae and Freddie Mac. Because the decline in fair value is

attributable to changes in interest rates and not credit quality, and because it is not likely that the Corporation will be required to sell these securities before their anticipated recovery, the Corporation does not consider these securities to be other-than-temporarily impaired at March 31, 2018.

### NOTE 4 LOANS AND ALLOWANCE FOR LOAN LOSSES

The composition of the loan portfolio, net of deferred origination fees and costs, is summarized as follows (in thousands):

	March 31, 2018	December 31, 2017
Commercial and agricultural:		
Commercial and industrial	\$199,947	\$198,463
Agricultural	529	544
Commercial mortgages:		
Construction	55,404	45,558
Commercial mortgages, other	592,195	598,772
Residential mortgages	194,600	194,440
Consumer loans:		
Credit cards	1,418	1,517
Home equity lines and loans	100,611	100,591
Indirect consumer loans	156,958	153,060
Direct consumer loans	18,249	18,879
Total loans, net of deferred origination fees and costs	\$1,319,911	\$1,311,824
Interest receivable on loans	3,618	3,758
Total recorded investment in loans	\$1,323,529	\$1,315,582

The Corporation's concentrations of credit risk by loan type are reflected in the preceding table. The concentrations of credit risk with standby letters of credit, committed lines of credit and commitments to originate new loans generally follow the loan classifications in the table above.

The following tables present the activity in the allowance for loan losses by portfolio segment for the three-month periods ended March 31, 2018 and 2017 (in thousands):

### Troubled Debt Restructurings:

A modification of a loan may result in classification as a TDR when a borrower is experiencing financial difficulty and the modification constitutes a concession. The Corporation offers various types of modifications which may involve a change in the schedule of payments, a reduction in the interest rate, an extension of the maturity date, extending the maturity date at an interest rate lower than the current market rate for new debt with similar risk, requesting additional collateral, releasing collateral for consideration, substituting or adding a new borrower or guarantor, a permanent reduction of the recorded investment in the loan or a permanent reduction of the interest on the loan.

As of March 31, 2018 and December 31, 2017, the Corporation has a recorded investment in TDRs of \$7.3 million and \$7.7 million, respectively. There were specific reserves of \$0.5 million and \$0.7 million allocated for TDRs at March 31, 2018 and December 31, 2017, respectively. As of March 31, 2018, TDRs totaling \$1.5 million were accruing interest under the modified terms and \$5.8 million were on non-accrual status. As of December 31, 2017, TDRs totaling \$1.7 million were accruing interest under the modified terms and \$6.0 million were on non-accrual status. The Corporation had committed no additional amounts as of both March 31, 2018 and December 31, 2017, to customers with outstanding loans that are classified as TDRs.

During the three-month periods ended March 31, 2018 and 2017, the terms of certain loans were modified as TDRs. The modification of the terms of one commercial & industrial term loan during the three months ended March 31, 2018 included an extension of the maturity date at a stated rate of interest lower than the current market rate for new debt with similar risk. The modification of the terms of one commercial mortgage loan during the three months ended March 31, 2017 included a reduction of the scheduled amortized payments of the loan for greater than a three month period.

The following table presents loans by class modified as TDRs that occurred during the three month periods ended March 31, 2018 and 2017 (dollars in thousands):

	Number		Modification		
March 31, 2018	of		standing		standing
1,141011 3 1, 2010	Loans	Rec	orded	Rec	orded
	Loans	Inve	estment	Inve	estment
Troubled debt restructurings:

Commercial and industrial	1	\$	100	\$	100
Total	1	\$	100	\$	100
	NT 1	Pre-			-Modification
March 31, 2017	Number of Loans	Rec	standing orded estment	Reco	orded stment
March 31, 2017  Troubled debt restructurings:	of	Rec	orded	Reco	
·	of	Rec	orded	Reco	
Troubled debt restructurings:	of	Rec	orded	Reco	

The TDRs described above did not increase the allowance for loan losses and resulted in no charge-offs during the three month periods ended March 31, 2018 and 2017.

A loan is considered to be in payment default once it is 90 days contractually past due under the modified terms. There were no payment defaults on any loans previously modified as TDRs within twelve months following the modification during the three month periods ended March 31, 2018 and 2017.

### **Credit Quality Indicators**

The Corporation establishes a risk rating at origination for all commercial loans. The main factors considered in assigning risk ratings include, but are not limited to: historic and future debt service coverage, collateral position, operating performance, liquidity, leverage, payment history, management ability, and the customer's industry. Commercial relationship managers monitor all loans in their respective portfolios for any changes in the borrower's ability to service its debt and affirm the risk ratings for the loans at least annually.

For the retail loans, which include residential mortgages, indirect and direct consumer loans, home equity lines and loans, and credit cards, once a loan is properly approved and closed, the Corporation evaluates credit quality based upon loan repayment.

The Corporation uses the risk rating system to identify criticized and classified loans. Commercial relationships within the criticized and classified risk ratings are analyzed quarterly. The Corporation uses the following definitions for criticized and classified loans (which are consistent with regulatory guidelines):

Special Mention – Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or the institution's credit position at some future date.

Substandard – Loans classified as substandard are inadequately protected by the current net worth and paying capability of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Doubtful – Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Commercial loans not meeting the criteria above to be considered criticized or classified are considered to be pass rated loans. Loans listed as not rated are included in groups of homogeneous loans performing under terms of the loan notes. Based on the analyses performed as of March 31, 2018 and December 31, 2017, the risk category of the recorded investment of loans by class of loans is as follows (in thousands):

Loans

The Corporation considers the performance of the loan portfolio and its impact on the allowance for loan losses. For residential and consumer loan classes, the Corporation also evaluates credit quality based on the aging status of the loan, which was previously presented, and by payment activity. The following table presents the recorded investment in residential and consumer loans based on payment activity as of March 31, 2018 and December 31, 2017 (in thousands):

	March 31,		_		
	Residentia Mortgages	Credit	ner Loans Home Equity Lines and Loans	Indirect Consumer Loans	Other Direct Consumer Loans

At the time of the merger with Fort Orange Financial Corp., the Corporation identified certain loans with evidence of deteriorated credit quality, and the probability that the Corporation would be unable to collect all contractually required payments from the borrower. These loans were classified as PCI loans. The Corporation previously adjusted its estimates of future expected losses, cash flows, and renewal assumptions on the PCI loans. These adjustments were made for changes in expected cash flows due to loans refinanced beyond original maturity dates, impairments recognized subsequent to the acquisition, advances made for taxes or insurance to protect collateral held and payments received in excess of amounts originally expected. During the first quarter of 2018, management determined that the disclosure of PCI loans was no longer material and will analyze these loans as part of the overall impairment process going forward.

#### NOTE 5 FAIR VALUE

Fair value is the exchange price that would be received for an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. There are three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a reporting entity's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The Corporation used the following methods and significant assumptions to estimate fair value on a recurring basis:

Available for Sale Securities: The fair values of securities available for sale are usually determined by obtaining quoted prices on nationally recognized securities exchanges (Level 1 inputs), or matrix pricing, which is a mathematical technique widely used to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities' relationship to other benchmark quoted securities (Level 2 inputs). For securities where quoted prices or market prices of similar securities are not available, fair values are calculated using discounted cash flows or other market indicators (Level 3 inputs).

Equity Investments: Securities that are held to fund a deferred compensation plan and securities that have a readily determinable fair market value, are recorded at fair value with changes in fair value included in earnings. The fair values of equity investments are determined by quoted market prices (Level 1 inputs).

Impaired Loans: At the time a loan is considered impaired, it is valued at the lower of cost or fair value. Impaired loans carried at fair value have been partially charged-off or receive specific allocations as part of the allowance for loan loss accounting. For collateral dependent loans, fair value is commonly based on real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value. Non-real estate collateral may be valued using an appraisal, net book value per the borrower's financial statements, or aging reports, adjusted or discounted based on management's historical knowledge, changes in market conditions from the time of the valuation, and management's expertise and knowledge of the client and client's business, typically resulting in a Level 3 fair value

classification. Impaired loans are evaluated on a quarterly basis for additional impairment and adjusted accordingly.

OREO: Assets acquired through or instead of loan foreclosures are initially recorded at fair value less costs to sell when acquired, establishing a new cost basis. These assets are subsequently accounted for at lower of cost or fair value less estimated costs to sell. Fair value is commonly based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value.

Appraisals for both collateral-dependent impaired loans and OREO are performed by certified general appraisers (commercial properties) or certified residential appraisers (residential properties) whose qualifications and licenses have been reviewed and verified by the Corporation. Once received, appraisals are reviewed for reasonableness of assumptions, approaches utilized, Uniform Standards of Professional Appraisal Practice and other regulatory compliance, as well as the overall resulting fair value

in comparison with independent data sources such as recent market data or industry-wide statistics. Appraisals are generally completed within the previous 12 month period prior to a property being placed into OREO. On impaired loans, appraisal values are adjusted based on the age of the appraisal, the position of the lien, the type of the property and its condition.

Derivatives: The fair values of interest rate swaps are based on valuation models using observable market data as of the measurement date (Level 2 inputs). Derivatives are traded in an over-the-counter market where quoted market prices are not always available. Therefore, the fair values of derivatives are determined using quantitative models that utilize multiple market inputs. The inputs will vary based on the type of derivative, but could include interest rates, prices, and indices to generate continuous yield or pricing curves, prepayment rates, and volatility factors to value the position. The Corporation also incorporates credit valuation adjustments to appropriately reflect both its own nonperformance risk and the respective counter-party's nonperformance risk in the fair value measurements. In adjusting the fair value of its derivative contracts for the effect of nonperformance risk, the Corporation has considered the impact of any applicable credit enhancements, such as collateral postings. Although the Corporation has determined that the majority of the inputs used to value its derivatives fall within Level 2 of the fair value hierarchy, the credit valuation adjustments associated with its derivatives utilize credit default rate assumptions (Level 3 inputs).

<sup>(1)</sup> Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

#### NOTE 6 GOODWILL AND INTANGIBLE ASSETS

The changes in goodwill included in the core banking segment during the periods ended March 31, 2018 and 2017 were as follows (in thousands):

2018 2017

Beginning of year \$21,824 \$21,824

Acquired goodwill — —

Ending balance March 31, \$21,824 \$21,824

Acquired intangible assets were as follows at March 31, 2018 and December 31, 2017 (in thousands):

At March 31, 2018 At December 31, 2017 Balance Accumulated Balance Accumulated Acquired Amortization Acquired Amortization

Core deposit intangibles	\$5,975	\$ 5,301	\$5,975	\$ 5,196
Other customer relationship intangibles	5,633	4,416	5,633	4,327
Total	\$11,608	\$ 9,717	\$11,608	\$ 9,523

Aggregate amortization expense was \$0.2 million for both of the three month periods ended March 31, 2018 and 2017.

The remaining estimated aggregate amortization expense at March 31, 2018 is listed below (in thousands):

Year Estimated Expense
2018 \$ 540
2019 609
2020 484
2021 258
2022 —
Total \$ 1,891

#### NOTE 7 SECURITIES SOLD UNDER AGREEMENTS TO REPURCHASE

A summary of securities sold under agreements to repurchase as of March 31, 2018 and December 31, 2017 is as follows (in thousands):

March 31 2018

	Watch 31, 2016
	Overnight Up to 1 1 - 3 3+ Total Year Years Years
Mortgage-backed securities, residential	\$ <del>-\$</del> 12,000 \$ <del>-\$</del> 12,000

	December 31, 2017
	Overnight Up to 1 1 - 3 3+ Total Year Years Years
Mortgage-backed securities, residential	\$ <del>-\$</del> 11,798 \$ <del>-\$</del> - <del>\$</del> 11,798
	(1.700 )
Excess collateral held	-(1,798) — $(1,798)$
Excess collateral held Gross amount of recognized liabilities for repurchase agreements	\$\_\$10,000 \$ \_\$ \_\$10,000

The Corporation enters into sales of securities under agreements to repurchase and the amounts received under these agreements represent borrowings and are reflected as a liability in the consolidated balance sheets. The securities underlying these agreements are included in investment securities in the consolidated balance sheets.

The Corporation has no control over the market value of the securities which fluctuate due to market conditions, however, the Corporation is obligated to promptly transfer additional securities if the market value of the securities falls below the repurchase agreement price. The Corporation manages this risk by utilizing highly marketable and easily priced securities, monitoring these securities for significant changes in market valuation routinely, and maintaining an unpledged securities portfolio believed to be sufficient to cover a decline in the market value of the securities sold under agreements to repurchase.

#### NOTE 8 COMMITMENTS AND CONTINGENCIES

The Corporation is a party to certain financial instruments with off-balance sheet risk such as commitments under standby letters of credit, unused portions of lines of credit, overdraft protection and commitments to fund new loans. In accordance with GAAP, these financial instruments are not recorded in the financial statements. The Corporation's

policy is to record such instruments when funded. These transactions involve, to varying degrees, elements of credit, interest rate and liquidity risk. Such transactions are generally used by the Corporation to manage clients' requests for funding and other client needs.

The following table lists the contractual amounts of financial instruments with off-balance sheet risk at March 31, 2018 and December 31, 2017 (in thousands):

	March 3	1 2019	December 31,			
	Maich 3	1, 2016	2017			
	Fixed Variable I		Fixed	Variable		
	Rate	Rate	Rate	Rate		
Commitments to make loans	\$19,547	\$29,057	\$16,019	\$28,591		
Unused lines of credit	1,171	203,064	1,604	200,353		
Standby letters of credit	_	14,694	_	15,022		

On March 23, 2016, the Bank received a summons and complaint for an action brought in the State of New York Supreme Court for the County of Tompkins, regarding its lease of 202 East State Street, Ithaca, NY, a branch location which the Bank had vacated. The owner of the leased premises has alleged that the Bank has breached its contract and is requesting a judgment declaring that the term of the lease runs through December 31, 2025 or a judgment in his favor in the amount of \$4.0 million. The Bank has denied that it breached the contract. On July 25, 2016, the Corporation received Notice of Entry of the decision and order of the New York Supreme Court for the County of Tompkins, involving claims by the owner of the leased premises at 202 East State Street, Ithaca, New York against the Bank. The Court granted, in part, partial summary judgment in favor of the plaintiff - on the issue of liability only-for anticipatory breach and breach of contract. The fraud claims were dismissed, and summary judgment was denied on the plaintiff's trespass claims. The Court set the matter down for an inquest on damages at a later date, with the original claim by the plaintiff seeking \$4.0 million in damages. The Corporation established a legal reserve of \$1.2 million in connection with this case during the second quarter of 2016.

Subsequent to an appeal of the lower court determination, which was perfected in the Appellate Division, Third Department of State Supreme Court, on June 29, 2017, the Bank received Notice of Entry of the decision and Order of that Court which affirmed the lower court's decision in favor of the plaintiff with damages to be determined at a later proceeding. The Bank established an additional legal reserve in the amount of \$850 thousand, in connection with this case, during the second quarter of 2017. The Bank's total reserve with respect to this matter now stands at \$2.3 million, including \$0.2 million accrued for related expenses not yet paid. A motion to the Appellate Division for reargument or permission for leave to appeal to the Court of Appeals was filed and denied during the fourth quarter of 2017. The parties have agreed to mediate the question of damages with an independent mediator with a scheduled date of May 30, 2018.

In the normal course of business, there are various outstanding claims and legal proceedings involving the Corporation or its subsidiaries. Except for the above matter, we believe that we are not a party to any pending legal, arbitration, or regulatory proceedings that could have a material adverse impact on our financial results or liquidity.

#### NOTE 9 ACCUMULATED OTHER COMPREHENSIVE LOSS

Accumulated other comprehensive loss represents the net unrealized holding gains or losses on securities available for sale and the funded status of the Corporation's defined benefit pension plan and other benefit plans, as of the consolidated balance sheet dates, net of the related tax effect.

The following is a summary of the changes in accumulated other comprehensive loss by component, net of tax, for the periods indicated (in thousands):

	Unrealized Defined
	Gains and Benefit
	Losses on and Total
	Securities Other
	Available Benefit
	for Sale Plans

#### NOTE 10 REVENUE FROM CONTRACTS WITH CUSTOMERS

All of the Corporation's revenue from contracts with customers in the scope of ASC 606 is recognized within non-interest income. The following table presents the Corporation's non-interest income by revenue stream and reportable segment for the three months ended March 31, 2018 and 2017 (in thousands). Items outside the scope of ASC 606 are noted as such.

<sup>(</sup>b) The Corporation elected the modified retrospective approach of adoption; therefore, prior period balances are presented under legacy GAAP and may not be comparable to current year presentation.

A description of the Corporation's revenue streams accounted for under ASC 606 follows:

Service Charges on Deposit Accounts: The Corporation earns fees from its deposit customers for transaction-based, account maintenance, and overdraft services. Transaction-based fees, which included services such as ATM use fees, stop payment charges, statement rendering, and ACH fees, are recognized at the time the transaction is executed as that is the point in time the Corporation fulfills the customer's request. Account maintenance fees, which relate

<sup>(</sup>c) The Holding Company, CFS, and CRM column above includes amounts to eliminate transactions between segments.

primarily to monthly maintenance, are recognized at the time the maintenance occurs. Overdraft fees are recognized at the point in time that the overdraft occurs. Service charges on deposits are withdrawn from the customer's account balance.

Interchange Income from Debit Card Transactions: The Corporation earns interchange fees from debit cardholder transactions conducted through the Mastercard payment network. Interchange fees from cardholder transactions represent a percentage of the underlying transaction value and are recognized daily, concurrently with the transaction processing services provided to cardholder.

WMG Fee Income (Gross): The Corporation earns wealth management fees from its contracts with trust customers to manage assets for investment, and/or to transact on their accounts. These fees are primarily earned over time as the Corporation provides the contracted monthly or quarterly services and are generally assessed based on a tiered scale of the market value of assets under management (AUM) at quarter-end.

CFS Fee and Commission Income (Net): The Corporation earns fees from investment brokerage services provided to its customers by a third-party service provider. The Corporation receives commissions from the third-party service provider on a monthly basis based upon customer activity for the month. The Corporation (i) acts as an agent in arranging the relationship between the customer and the third-party service provider and (ii) does not control the services rendered to the customers. Investment brokerage fees are presented net of related costs. The Corporation also earns fees from tax services provided to its customers.

Net Gains/Losses on Sales of OREO: The Corporation records a gain or loss from the sale of OREO when control of the property transfers to the buyer, which generally occurs at the time of an executed deed. When the Corporation finances the sale of OREO to the buyer, the Corporation assesses whether the buyer is committed to perform their obligations under the contract and whether collectability of the transaction price is probable. Once these criteria are met, the OREO asset is derecognized and the gain or loss on sale is recorded upon the transfer of control of the property to the buyer. In determining the gain or loss on the sale, the Corporation adjusts the transaction price and related gain (loss) on sale if a significant financing component is present.

#### NOTE 11 COMPONENTS OF QUARTERLY AND YEAR TO DATE NET PERIODIC BENEFIT COSTS

The components of net periodic expense for the Corporation's pension and other benefit plans for the periods indicated are as follows (in thousands):

	Three Months					
	Ended

Amortization of unrecognized net loss	28	2	29		
Net periodic postretirement, medical and life benefit	\$(24	) \$	\$(22	)	

#### NOTE 12 SEGMENT REPORTING

The Corporation manages its operations through two primary business segments: core banking and WMG. The core banking segment provides revenues by attracting deposits from the general public and using such funds to originate consumer, commercial, commercial real estate, and residential mortgage loans, primarily in the Corporation's local markets, and to invest in securities. The WMG services segment provides revenues by providing trust and investment advisory services to clients.

Accounting policies for the segments are the same as those described in Note 1 of the Corporation's 2017 Annual Report on Form 10-K, which was filed with the SEC on March 8, 2018. Summarized financial information concerning the Corporation's reportable segments and the reconciliation to the Corporation's consolidated results are shown in the following table. Income taxes are allocated based on the separate taxable income of each entity and indirect overhead expenses are allocated based on reasonable and equitable allocations applicable to the reportable segment. The Holding Company, CFS, and CRM column below includes amounts to eliminate transactions between segments (in thousands).

	Three months ended March 31, 2018 Holding

#### NOTE 13 STOCK COMPENSATION

#### Board of Directors' Stock Compensation

Pursuant to the Corporation's Directors' Compensation Plan, members of the Board of Directors receive common shares of the Corporation equal in value to the amount of fees individually earned during the previous year for service as a director. The common shares are distributed to the Corporation's individual board members from treasury shares of the Corporation on or about January 15 following the calendar year of service.

Additionally, the Chief Executive Officer of the Corporation, who does not receive cash compensation as a member of the Board of Directors, is awarded common shares equal in value to the average of those awarded to board members not employed by the Corporation who have served for 12 months during the prior year.

During January 2018 and 2017, 6,015 and 7,880 shares, respectively, were re-issued from treasury to fund the stock component of directors' compensation. An expense of \$85 thousand and \$79 thousand related to this compensation was recognized during the three-month periods ended March 31, 2018 and 2017, respectively. This expense is accrued as shares are earned.

#### Restricted Stock Plan

Pursuant to the Corporation's Restricted Stock Plan, the Corporation may make discretionary grants of restricted stock to officers other than the Corporation's Chief Executive Officer. Compensation expense is recognized over the vesting period of the awards based on the fair value of the stock at issue date.

A summary of restricted stock activity for the three month period ended March 31, 2018 is presented below:

Weighted–Average
Shares Grant Date Fair
Value

Nonvested at January 1, 2018 25,522 \$ 38.01

Granted — —

Vested (1,589 ) 30.75

Forfeited or cancelled — —

Nonvested at March 31, 2018 23,933 \$ 38.12

As of March 31, 2018, there was \$792 thousand of total unrecognized compensation cost related to nonvested shares granted under the Plan. The cost is expected to be recognized over a weighted-average period of 3.46 years. The total fair value of shares vested was \$73 thousand and \$16 thousand for the three month periods ended March 31, 2018 and 2017, respectively.

#### Item 2: Management's Discussion and Analysis of Financial Condition and Results of Operations

#### Introduction

The following is the MD&A of the Corporation in this Form 10-Q for the three months ended March 31, 2018 and 2017. Reference should be made to the accompanying unaudited consolidated financial statements and footnotes, and the Corporation's 2017 Annual Report on Form 10-K, which was filed with the SEC on March 8, 2018, for an understanding of the following discussion and analysis. See the list of commonly used abbreviations and terms on

pages 3-5.

The MD&A included in this Form 10-Q contains statements that are forward-looking within the meaning of the Private Securities Litigation Reform Act of 1995. These statements are based on the current beliefs and expectations of the Corporation's management and are subject to significant risks and uncertainties. Actual results may differ from those set forth in the forward-looking statements. For a discussion of those risks and uncertainties and the factors that could cause the Corporation's actual results to differ materially from those risks and uncertainties, see Forward-looking Statements below and in Part I, Item 1A, Risk Factors, on pages 17–24 of the Corporation's 2017 Form 10-K. For a discussion of use of non-GAAP financial measures, see pages 64–67 of the Corporation's 2017 Form 10-K or pages 59-61 in this Form 10-Q.

The Corporation has been a financial holding company since 2000, the Bank was established in 1833, CFS in 2001, and CRM in 2016. Through the Bank and CFS, the Corporation provides a wide range of financial services, including demand, savings and time deposits, commercial, residential and consumer loans, interest rate swaps, letters of credit, wealth management services, employee benefit plans, insurance products, mutual funds and brokerage services. The Bank relies substantially on a foundation of locally generated deposits. The Corporation, on a stand-alone basis, has minimal results of operations. The Bank derives its income primarily from interest and fees on loans, interest income on investment securities, WMG fee income, and fees received in connection with deposit and other services. The Bank's operating expenses are interest expense paid on deposits and borrowings, salaries and employee benefit plans, and general operating expenses. CRM is a Nevada-based captive insurance company which insures against certain risks unique to the operations of the Corporation and its subsidiaries and for which insurance may not be currently available or economically feasible in today's insurance marketplace. CRM pools resources with several other similar insurance company subsidiaries of financial institutions to spread a limited amount of risk among themselves.

#### Forward-looking Statements

This discussion contains forward-looking statements within the meaning of Section 27A of the Securities Act and Section 21E of the Exchange Act. The Corporation intends its forward-looking statements to be covered by the safe harbor provisions for forward-looking statements in these sections. All statements regarding the Corporation's expected financial position and operating results, the Corporation's business strategy, the Corporation's financial plans, forecasted demographic and economic trends relating to the Corporation's industry and similar matters are forward-looking statements. These statements can sometimes be identified by the Corporation's use of forward-looking words such as "may," "will," "anticipate," "estimate," "expect," or "intend." The Corporation cannot promise that its expectations in such forward-looking statements will turn out to be correct. The Corporation's actual results could be materially different from expectations because of various factors, including changes in economic conditions or interest rates, credit risk, difficulties in managing the Corporation's growth, competition, changes in law or the regulatory environment, including the Dodd-Frank Act, and changes in general business and economic trends. Information concerning these and other factors can be found in the Corporation's periodic filings with the SEC, including the discussion under the heading "Item 1A. Risk Factors" in the Corporation's 2017 Annual Report on Form 10-K. These filings are available publicly on the SEC's web site at http://www.sec.gov, on the Corporation's web site at http://www.chemungcanal.com or upon request from the Corporate Secretary at (607) 737-3746. Except as otherwise required by law, the Corporation undertakes no obligation to publicly update or revise its forward-looking statements, whether as a result of new information, future events or otherwise.
