AMERICAN SAFETY INSURANCE HOLDINGS LTD
Form 10-K
March 21, 2006

SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTIONS 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2005

Commission file number 1-14795

AMERICAN SAFETY INSURANCE HOLDINGS, LTD.
(Exact name of Registrant as specified in its charter)

Bermuda
(State of incorporation
or organization)

Not applicable
(I.R.S. Employer
Identification No.)

44 Church Street
P.O. Box HM 2064
Hamilton, Bermuda
(Address of principal executive offices)

HM HX
(Zip Code)

Registrant's telephone number: (441) 296-8560

Securities registered pursuant to Section 12(b) of the Act:

Title of each class
Common Stock, \$0.01 par value

Name of each exchange on which registered
New York Stock Exchange, Inc.

Securities to be registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well known seasoned issuer as defined in Rule 405 of the Act:
 Yes No

Indicate by check mark whether registrant: (1) has filed all reports required to be filed by the Securities Exchange Act of 1934 during the preceding 12 months and (2) has been subject to such filing requirements during the preceding 12 months:
 Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is required, but not being disclosed, to the best of registrant's knowledge, in definitive proxy or information statements filed during the preceding 12 months in compliance with the requirements of Part III of this Form 10-K or any amendment to this Form 10-K.
 Yes No

Indicate by check mark whether the registrant is an accelerated filer (as defined in Exchange Act Rule 12b-2):
 Yes No

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act):
 Yes No

The aggregate market value of registrant's voting common stock held by non-affiliates on December 31, 2005, for purposes of this calculation, shares of common stock of the Registrant held by directors, officers, and persons owning more than 5% of the outstanding shares have been excluded.

The number of shares of registrant's common stock outstanding on March 10, 2006 was 6,762,731.

Documents Incorporated by Reference: Part III of this Form 10-K incorporates by reference certain information from the Registrant's annual report on Form 10-K for the year ended December 31, 2005.

In this Report, the terms we, our, us, Company and American Safety Insurance refer to American Safety Insurance Holdings, Ltd. and, unless context requires otherwise, includes our subsidiaries.

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

We maintain a web site at www.americansafetyinsurance.com that contains additional information regarding the Company. We have filed as exhibits to this report copies of the charters of our Board committees and our code of business conduct and ethics. Under the caption "SEC Filings" on our website, we provide access, free of charge, to our SEC filings, including Forms 3, 4 and 5 filed by our officers and directors as soon as reasonably practical after electronically filing such material with the SEC.

Who We Are

We are a specialty insurance company that provides customized insurance products and solutions to small and medium-sized businesses in industries that we believe are underserved by the standard insurance market. For twenty years, we have developed specialized insurance coverages and alternative risk transfer products not generally available to our customers in the standard insurance market because of the unique characteristics of the risks involved and the associated needs of the insureds. We specialize in underwriting these products for insureds with environmental risks and construction risks as well as in developing programs for other specialty classes of risks.

We were formed in 1986 as an insurance company in Bermuda and began our operations providing insurance solutions to environmental remediation businesses in the U.S. at a time when insurance coverage for these risks was virtually unavailable. Since then, we have continued to identify opportunities in other industry sectors underserved by the standard insurance carriers where we believe we can achieve strong and consistent returns on equity. We capitalize on these opportunities by (i) leveraging our strong relationships with agents and brokers, which we refer to as producers, among whom we believe we have a recognized commitment to the specialty insurance market, (ii) charging a higher premium for the risks we underwrite and the services we offer due to the limited availability of insurance coverages for these risks and (iii) mitigating our loss exposure through customized policy terms, specialized underwriting and proactive loss control and claims management.

We insure and place risks primarily through our two U.S. insurance subsidiaries, American Safety Casualty Insurance Company ("American Safety Casualty") and American Safety Indemnity Company ("American Safety Indemnity"), and our U.S. non-subsiary risk retention group affiliate, American Safety Risk Retention Group, Inc. ("American Safety RRG"). We reinsure a portion of these risks through our Bermuda reinsurance subsidiary, American Safety Reinsurance, Ltd. ("American Safety Re") and our Bermuda segregated account captive, American Safety Assurance Ltd. ("American Safety Assurance"). American Safety Assurance serves as a risk sharing vehicle for program managers and insureds. Our Bermuda subsidiaries also facilitate the allocation of risk among our insurance subsidiaries and provide us with greater flexibility in managing our capital. Our subsidiary American Safety Insurance Services, Inc. ("ASI Services") provides a range of insurance management and administrative services for American Safety Casualty, American Safety Indemnity and American Safety RRG.

Our Market

We actively participate in both the excess and surplus lines and the alternative risk transfer insurance markets.

Excess and Surplus Lines

Excess and surplus lines insurers provide coverage for difficult-to-place risks that do not fit the underwriting criteria of insurance companies operating in the standard insurance market. In the standard insurance market, policies must be written by insurance companies that are licensed to transact business as admitted carriers by the state insurance regulators in the state in which the policy is issued. Standard insurance market policy rates and forms are highly regulated and coverages are largely uniform. In contrast, excess and surplus lines insurers are less restricted by these rate and form filing regulations, thereby providing them with more flexibility over the premiums they can charge and the policy terms and conditions they can offer.

Also included in our description of the excess and surplus lines market is the specialty admitted market. Insurance carriers operating in the specialty admitted market underwrite complex risks similar to excess and surplus lines carriers, but are licensed by the insurance regulators in the states in which they operate as admitted insurance companies. Although they are admitted in the jurisdictions in which they operate, specialty admitted carriers are typically less restricted by policy rate and form regulations than standard admitted carriers due to the complexity of the risks being underwritten, the absence of standard market coverage, or the nature of the coverages provided. Some insureds with complex insurance needs require coverage from an admitted insurance company due to regulatory, legal, marketing or other factors. We currently underwrite specialty admitted policies in our environmental business line in California, Illinois, New Jersey, Texas and New York. We also write a small portion of our specialty program business on an admitted basis. Additionally, all of our surety bonds are written on an admitted basis in accordance with standard industry practice.

The property and casualty insurance industry has historically been a cyclical industry consisting of both "hard market" periods and "soft market" periods. The excess and surplus lines market has historically moved in response to the underwriting cycles in the standard insurance market. Hard market periods are characterized by shortages of underwriting capacity, limited availability of capital, less competition and higher

premium rates. Typically, during hard markets, as rates increase and coverage terms become more restrictive, business shifts from the standard insurance market to the excess and surplus lines market as standard insurance market carriers rely on traditional underwriting techniques and focus on their core business lines. In soft markets, business shifts from the excess and surplus lines market to the standard insurance market as standard insurance market carriers tend to loosen underwriting standards and seek to expand market share by moving into business lines traditionally characterized as surplus lines.

Since 2000, the excess and surplus lines market has grown substantially both in terms of available premium as well as in relation to the overall U.S. commercial property and casualty market. According to A.M. Best, from 2000 to 2003, the excess and surplus lines market grew at a 29.5% compounded annual growth rate and increased as a percentage of the overall U.S. commercial property and casualty insurance market from 7.6% to 13.7%. However, from 2003 to 2004, the latest year for which industry data is available from A.M. Best, the year-over-year growth rate was 0.7% as competition increased and the rate of price increases slowed. In 2004, the U.S. excess and surplus lines direct premiums written totaled over \$33.0 billion and represented approximately 14.9% of the total U.S. commercial property and casualty insurance market.

Since 2004, we believe the property and casualty insurance market has started to soften and that the number of insurers competing for premium in the excess and surplus lines market has increased. These competitors include several start-up companies as well as larger standard market insurers looking to capture market share by moving from the admitted market to the excess and surplus lines market. This increased competition has caused rates to modestly decline in some of our targeted markets. Despite this modest softening trend, we believe that the current market environment is favorable and believe there are profitable growth opportunities from which we can benefit.

Alternative Risk Transfer

The alternative risk transfer market, or ART market, provides insurance and risk management products for insureds who want more control over the claims administration process and who pay very high insurance premiums or are unable to find adequate insurance coverage. The ART market originated during the 1980s when obtaining various types of commercial liability insurance coverages was difficult for businesses in certain industries due to the nature of their operations or the industries in which they operated. To meet the risk management or insurance needs of these businesses, new risk transfer solutions were developed, such as captive insurance companies and risk retention groups. Captive insurance companies are risk sharing vehicles, the assets of which are contributed by one interest or a group of related interests so as to provide insurance coverage for their business operations. Risk retention groups are companies that are owned by their insureds that, while being licensed only in the state of their formation, are able to write insurance in all states. These alternative risk transfer arrangements blend risk transfer and risk retention mechanisms and, along with self-insurance, form the ART market.

The ART market has grown substantially over the past five years through the creation of additional captives and risk retention groups. According to A.M. Best, net premiums written in the ART market grew approximately 56% between 2000 and 2004, although only by 3.6% from 2003 to 2004. During this time, the ART market expanded to include a wider range of risk sharing vehicles, and benefited from more favorable regulation in certain jurisdictions in the U.S. The ART market has responded effectively to the strategic needs of insureds for better financial management, improved claims handling, more effective risk management, customized insurance programs and access to reinsurance markets.

The ART market has traditionally been inversely correlated to the standard market's underwriting cycle, expanding in hard market periods and retracting in soft market periods. We believe, however, that this correlation has become less meaningful in recent years as ART solutions have become more accessible and better managed, evidenced by a sharp increase in the number of captive formations and more domestic and offshore domiciles, such as Vermont and Bermuda, offering regulatory environments conducive to captive formations and operations. While this continued growth has contributed to the competitive environment in the ART market, customers in certain industries, such as healthcare and construction, continue to experience difficulty obtaining adequate and affordable coverages that meet their needs.

Our Products

Our core product segments include excess and surplus lines and alternative risk transfer products:

Excess and Surplus Lines. We focus our excess and surplus lines segment on small to medium-sized businesses in industries such as environmental and construction because we believe that, due to the complex risk profile of those businesses and their smaller account sizes, there is less competition in the market to underwrite these risks. We provide the following excess and surplus lines products in the following industries:

Environmental. We underwrite various types of environmental risks including contractors' pollution liability, environmental consultants' professional liability and environmental impairment liability. We do not provide coverage for manufacturers or installers of products containing asbestos that have been the subject of class action lawsuits, but instead insure the contractors who remediate asbestos. For the year ended

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

December 31, 2005, we had gross premiums written of \$51.0 million and net premiums written of \$41.5 million in our environmental business line, representing 21.4% and 29.5% of our total gross and net premiums written, respectively. Since 2000, we have achieved a compounded annual growth rate in gross premiums written of 30.4% in our environmental business line.

The environmental risks we underwrite are as follows:

Contractors Pollution Liability. Includes general and pollution liability coverage for third party claims for bodily injury and property damage, including clean-up costs resulting from pollution conditions. Many of these contractors operate in the pollution remediation industry, engaging in activities such as hazardous waste remediation, soil remediation, emergency response and storage tank installation or removal. This coverage is offered on either an occurrence basis or a claims made and reported basis. Coverage written on an occurrence basis provides coverage to the insured for occurrences during the coverage period while coverage written on a claims made and reported basis provides coverage to the insured only for losses reported during the coverage period.

Environmental Consultants Professional Liability. Includes professional liability coverage for the unique exposures inherent to environmental professionals including consultants, engineers, design professionals and laboratories. We provide coverage for third party claims resulting from professional services rendered by the insured. This coverage is written on a claims made and reported basis.

Environmental Impairment Liability. Includes coverage for both off-site and on-site third party bodily injury, property damage and clean-up costs arising from pollution conditions emanating from or at sites owned or operated by an insured. Our typical insureds for this coverage include waste treatment and disposal facilities, manufacturing facilities, chemical manufacturers and blenders, electric utilities, recyclers, owners and operators of storage tank facilities, dry cleaners, convenience stores, gasoline stations, trucking and distribution centers and petroleum marketers. Coverage is written on a claims made and reported basis.

Construction. We underwrite various types of residential and commercial construction risks. Our construction insurance coverages consist mostly of primary general and excess general liability coverages for insureds located primarily in the western U.S. For the year ended December 31, 2005, we had gross premiums written of \$95.4 million and net premiums written of \$78.0 million in our construction business line, representing 40.1% and 55.5% of our total gross premiums written and net premiums written, respectively. Since 2000, we have achieved a compounded annual growth rate in gross premiums written of 51.6% in our construction business line.

The construction risks we underwrite include:

Residential Construction. We provide coverage for contractors involved with the construction and remodeling of residential homes. The types of residential contractors we insure primarily include graders, framers, concrete workers and drywall installers. For the year ended December 31, 2005, residential construction represented 57.0% of our total construction gross premiums written.

Commercial Construction. The commercial contractors we insure primarily include framers (predominantly for apartments), concrete workers and graders. Many of the commercial contractors we insure derive a portion of their revenues from residential construction work, and consequently, most standard market insurance companies will not offer them coverage. Due to our understanding of the residential construction market, we are able to fill a market void for certain commercial contractors and can insure these contractors for an attractive premium per dollar of risk and with customized policy terms. For the year ended December 31, 2005, commercial construction represented 34.0% of our total construction gross premiums written.

Also included in our construction business line are other excess and surplus lines coverages for underserved markets, including general liability for building owners and equipment dealers and products liability for product manufacturers and distributors. The gross premiums written associated with these excess and surplus lines policies represented 9.0% of our total construction business line gross premiums written for the year ended December 31, 2005.

- o *Surety.* Surety is a contract under which an insurer guarantees certain obligations of a second party to a third party. We are listed as an acceptable surety on federal bonds, commonly known as a Treasury-listed or T-listed surety, primarily providing contract performance and payment bonds to environmental contractors and general construction contractors in 47 states and the District of Columbia. For the year ended December 31, 2005, we had gross premiums written of \$2.6 million and net premiums written of \$1.3 million in our surety business line, representing 1.1% and 1.0% of our gross premiums written and net premiums written, respectively.

Alternative Risk Transfer. We provide the following alternative risk transfer products:

- o *Specialty Programs.* Working with third party program managers, reinsurance intermediaries and reinsurers, we target small and medium-sized businesses with homogenous groups of specialty risks where the principal insurance requirements are general, professional or pollution liability. We outsource the underwriting and program administration duties for these programs to program managers with established underwriting expertise in the specialty program area. Our specialty programs consist primarily of casualty insurance coverages for construction contractors, pest control operators, small auto dealers, real estate brokers, apartment owners, restaurant owners, tavern owners, bail bondsmen and Hawaii taxicab operators.

We differentiate ourselves from our program competitors in primarily two ways. First, we typically require the originators of the business to share in the risk and profits of the business they produce by assuming a portion of the premiums and the losses on the coverage being offered through the provision of collateral. Our Bermuda segregated account captive, American Safety Assurance, facilitates the risk sharing position of the program manager by providing a vehicle for the program manager to collateralize their portion of the risk. The requirement to share a portion of the risk encourages the program manager to focus on underwriting profitability rather than solely on the production of commission income through premium volume. Second, we choose to focus on smaller programs where there are fewer competitors, thereby allowing us to obtain terms and conditions more favorable to us.

In 2005, we had gross premiums written of \$85.1 million and net premiums written of \$19.7 million in our specialty programs business line, representing 35.8% and 14.0% of our total gross and net premiums written, respectively. Since 2000, we have achieved a compounded annual growth rate in gross premiums written of 20.2% in our specialty programs business line. We also earn fee income on certain specialty program business that we write.

Fully-Funded. Fully-funded policies allow us to meet the needs of insureds that, due to the nature of their businesses, pay very high insurance premiums or are unable to find adequate insurance coverage. Typically, our insureds are required to maintain insurance coverage to operate their business and the fully-funded product allows these insureds to provide evidence of insurance, yet at the same time maintain more control over insurance costs and handling of claims. Our fully-funded product accomplishes this by giving our insureds the ability to fund their liability exposures via a self-insurance vehicle, such as our segregated account captive, American Safety Assurance, or through another captive vehicle established by the insured. We do not assume underwriting risk on these policies, but instead earn a fee for providing the policies. Policy limits are set based on the requirements of the insured, and the insured funds the entire aggregate limit through a combination of cash and irrevocable letters of credit. These cash amounts are accounted for as a liability. The aggregate policy limit caps the total damages payable under the policy, including all defense costs. We write fully-funded general and professional liability policies for businesses operating primarily in the healthcare and construction industries. During 2005, we generated \$1.2 million in fees from fully-funded business.

Runoff Lines

When certain business lines do not meet our profit or production expectations, we take corrective actions, which may include exiting those business lines. When we exit a business line, we no longer renew or write any new policies in that business line, although we do continue to service existing policies until they expire and administer any claims associated with those policies. The business lines we have exited since 2002 are:

- o *Workers Compensation.* In 1994, we began writing workers compensation insurance for environmental contractors. During 2003, we placed this business line into runoff due to unfavorable loss experience as well as the high expenses associated with servicing this business line. The claims associated with this business line are being administered by a third party. At December 31, 2005, we were carrying net reserves of \$12.0 million related to this business line.
- o *Excess Liability Insurance for Municipalities.* We began writing excess liability insurance for municipalities in 2000. During 2003, we placed this business line into runoff due to a lack of premium production and difficulty in obtaining affordable reinsurance coverage. At December 31, 2005, we were carrying net reserves of \$11.1 million related to this business line.

Our Competition

The property and casualty insurance market is highly competitive with respect to a number of factors, including overall financial strength of a given insurer, ratings of insurance companies by rating agencies, premium rates, policy terms and conditions, services offered, reputation and commission rates. We believe competition in the sectors of the specialty insurance market we target is fragmented and not dominated by one or more competitors. We frequently encounter competition from other insurance companies that insure risks in business lines that may encompass the specialty markets in which we operate, as well as from standard insurance carriers as they try to gain market share and become more comfortable underwriting the risks in the markets which we serve. The insurance companies with which we compete vary by the industries we target and the types of coverage we offer.

We believe our A (Excellent) rating from A.M. Best, focus on underserved markets, strong relationships with producers and versatile corporate structure are competitive advantages for us and are important factors in providing opportunities for growth.

Rating

In November 2005, A.M. Best, the most widely recognized insurance company rating agency, reaffirmed its rating of A (Excellent), with a negative outlook on a group basis of American Safety Insurance, including our two U.S. insurance subsidiaries, our Bermuda reinsurance subsidiary and our U.S. non-sub subsidiary risk retention group affiliate. An A (Excellent) rating is the third highest of fifteen ratings assigned by A.M. Best to companies that have, in the opinion of A.M. Best, an excellent ability to meet their ongoing obligations to policyholders. A.M. Best assigned a negative outlook to the rating in September 2004 in response to our reserve development in the second quarter 2004 because of a concern by A.M. Best with the underwriting results from our core business lines and the potential need for further reserve developing in the future.

Some policyholders are required to obtain insurance coverage from insurance companies that have an A- (Excellent) rating or higher from A.M. Best. Additionally, many producers are prohibited from representing insurance companies that are rated below A- (Excellent) by A.M. Best. A.M. Best assigns ratings that represent an independent opinion of an insurer's ability to meet its obligations to policyholders that is of concern primarily to policyholders, insurance brokers and agents and its rating and outlook should not be considered an investment recommendation. This rating is not a continually monitored rating and is subject to change. Any investor for whom this rating may be important as of any date subsequent to the date of this report should obtain this rating from A.M. Best and not rely on the rating set out above.

We have also been assigned a financial size category of Class VIII by A.M. Best. A financial size category of Class VIII is assigned by A.M. Best to companies with adjusted policyholder surplus of \$100 million to \$250 million, which, on a statutory basis of accounting, is the amount remaining after all liabilities, including loss reserves, are subtracted from all admitted assets.

The Company has not retained S&P or any other service to rate its subsidiaries. Despite this, based solely on publicly available information, in October 2005, S&P rated American Safety RRG, American Safety Casualty and American Safety Indemnity Bpi, and Fitch Ratings rated these three entities BBBq. An S&P pi rating is a financial strength rating based on published financial information, as distinguished from ratings determined through in-depth meetings with company officials. Similarly, a rating from Fitch Ratings with a q subscript is generated solely using a model that utilizes publicly available financial statement information, without any discussion with senior management.

Distribution

The specific distribution channels we use vary by business line. We market our excess and surplus products through approximately 230 producers in all 50 states and the District of Columbia. Within our excess and surplus lines segment, our environmental insurance products are written through a mix of retailers and wholesalers, while our construction insurance products are marketed exclusively through wholesale brokers. The only producers that produce greater than 10% of our construction business line total gross premiums written are Cooney, Rikard & Curtain Insurance Services, Inc. and Brown & Brown, Inc. which produced approximately 29.6% and 15.4% of our total gross premiums written for the year ended December 31, 2005, respectively. Our alternative risk transfer specialty program products are distributed through active solicitation by program managers and managing general agents with established underwriting expertise in a specialty program area, to whom we outsource the underwriting and program administration duties. In addition to program managers, reinsurance intermediaries and brokers also serve as a distribution source of program business. Our fully-funded products are marketed primarily through retail brokers, particularly those with a sophisticated understanding of the alternative risk transfer market.

Technology

We seek to improve the efficiency of our operations by integrating data throughout the organization and by moving data entry functions closer to the source of the information by providing our producers access to our systems via the Internet. We utilize two primary information processing systems that are an integral part of our operations and are discussed below. Ultimately, we believe that these investments in technology will result in a decrease in our expense ratio by enabling us to increase premium volume without requiring significant additional staff. Our information technology department consists of eleven full-time employees, as well as third-party vendors who support our existing technology platform.

- o *ProStar.* Our ProStar system improves efficiency by creating a balance between effective underwriting and excellent client service. Launched in 2001, ProStar is an online electronic submission, rating and quoting system used to process new and renewal business submissions for smaller businesses with environmental risks. The policies we process through ProStar are combined general, professional and pollution liability policies designed for environmental contractors and consultants with annual revenues of \$3.0 million or less. ProStar increases product distribution for smaller environmental accounts while reducing associated underwriting and operating costs. In 2005, gross premiums written generated through ProStar totaled approximately \$27.0 million, representing a 103.0% increase from 2004. In addition, policy counts were up 25.0% in 2005 as compared to 2004. We believe this technology is adaptable to other products and can be modified to accommodate our growth.
- o *Integrated Software Package.* We purchased an integrated software package in 2003 that addresses underwriting, premium accounting, claims and forms processing functions and is a secure and consolidated collection of primary insurance data that feeds a data warehouse for management reporting and analysis. The system has been implemented in our construction and environmental business lines, and we believe it is adaptable to other products as they are developed.
- o *WorkSmart Initiative.* In 2004, we began a process improvement initiative in our underwriting and claims departments, which we internally refer to as WorkSmart. This initiative has resulted in the restructuring of workflow within the Company. As a result, we have improved both the efficiency of how we process business and the productivity of our underwriting and claims personnel. We believe this initiative will result in our ability to increase operations without increasing personnel.

Underwriting

Excess and Surplus Lines

Our underwriting staff handles the insurance underwriting functions for all excess and surplus lines products, with specific underwriting authority related to the experience and knowledge level of each underwriter. Risks that are perceived to be more difficult and complex are underwritten by experienced staff and reviewed by management. The principal factors we use for underwriting these risks include the professional experience of the insured, its operating history, and its loss history and, in the case of renewals, its demonstrated commitment to effective loss control and risk management practices.

Most of our underwriters have approximately 20 years of underwriting experience and in excess of ten years of underwriting experience in the specialty areas we target. We differentiate ourselves from other companies by individually underwriting and pricing each risk, as opposed to the general classification pricing practices which are often performed by larger insurance companies. We seek to instill a culture of underwriting profitability over premium volume and our underwriters' incentive compensation is based on underwriting profits rather than premium growth. We also enforce an internal quality control standard through periodic audits of underwriter files. Underwriters meet monthly to discuss the status of renewal business with members of the claims department, who adjust claims as reported under a policy, and members of the loss control department, who measure and monitor an insureds' safety and risk management policies.

An important part of the underwriting and risk control process is the use of customized policy forms and contract wording to limit our ultimate exposure on many of the specialty risks we insure and to adequately respond to evolving claims trends in our core product lines. These trends are often identified through the monthly meetings among claims, loss control and underwriting personnel. Policy terms and conditions are crafted in cooperation with legal counsel to avoid or restrict coverage for certain high exposure risks. Standard, or admitted, carriers do not have the same flexibility to control policy language because they are more heavily regulated by the individual states in which they operate, and are

generally required to use standard insurance forms that are broader in coverage.

Alternative Risk Transfer

To assist in evaluating program managers, we perform an extensive due diligence process which involves detailed reviews of underwriting, policy pricing practices, claims handling, management expertise, information systems and distribution networks on every new program we develop. Based on the results of the due diligence, underwriting guidelines are developed that are specific to each program, and must be adhered to by program managers. We also perform an actuarial analysis on each program, to ensure that the business projections meet our profitability requirements, as well as to determine the appropriate level of risk participation by us and the program manager. After the program is implemented, we utilize our internal underwriting, claims, accounting and regulatory personnel to conduct semi-annual audits of each program's underwriting, actuarial, claim handling and insurance processing functions to ensure adherence to established guidelines and to assess the long-term profit potential of the program.

Claims Management

Excess and Surplus Lines

The specialty risks that we underwrite are complex and the claims reported by our insureds often involve coverage issues, or may result in litigation, that requires handling by a claims professional with specialized knowledge and claims management expertise. Accordingly, we employ experienced claims professionals with broad backgrounds, many with more than 20 years of experience in resolving the types of claims that typically arise from the specialty risks we underwrite. Our Chief Claims Officer has more than 25 years of diverse experience in claims management for specialty risks including specific experience with claims involving complex coverage issues and has managed claims operations with as many as 1,000 employees. We believe our claims management approach, which is focused on achieving the best possible financial outcome through prompt case evaluation and proactive litigation management practices, combined with our industry expertise is integral to controlling our losses and loss adjustment expenses. We also utilize the knowledge and expertise that we gain through the claims management process to enhance our underwriting and marketing activities through frequent interaction among the claims, underwriting and loss control staffs.

With the exception of construction defect claims associated with our construction business line, claims arising out of policies issued in our excess and surplus lines segment are handled primarily by our internal claims adjustors. Because construction defect claims require specialized knowledge of local markets and regulations, since 2004, the majority of our construction defect claims have been handled by third party administrators (TPAs) located in California. However, as a result of premium growth in the construction business line and our decision to take a larger risk position on the construction policies we underwrite, in February 2006 we established an internal claims handling office in California to manage our construction defect claims. This office is staffed with eight adjustors with an average of more than 15 years experience managing construction defect claims. We believe that the establishment of this office will reduce our reliance on TPAs, enhance our market presence in the western U.S. and enable us to more effectively and profitably manage our construction defect claims.

We have established claims management best practices, which emphasize the thorough investigation of claims, prompt settlement of valid claims, aggressive defense against claims we believe to be without merit and the accurate establishment of reserves. We recently established a quality assurance unit that is responsible for establishing and maintaining claims handling best practices and monitoring the uniform and consistent application of these practices. This is accomplished primarily through monthly audits of claims files as well as broader departmental audits, as necessary. The audit process includes a detailed evaluation of all facets of the claims management process including investigation, litigation and reserving. These audits are used to measure both departmental and individual performance and identify areas for improvement.

We have a claims committee, comprised of claims adjusting staff and claims management, that meets on a bi-weekly basis to discuss high exposure and complex claims to address litigation management strategies, coverage issues and the setting of reserves above established authority levels.

Alternative Risk Transfer

Claims management also plays an important role in achieving our profitability goals in our alternative risk transfer segment. We use TPAs to handle substantially all of the claims arising from policies written in our alternative risk transfer segment. In some cases, the program manager responsible for the development and management of a particular program has established claims management expertise in the business line written under the program and will act as the TPA for the program. By utilizing TPAs, we gain immediate access to the required claims handling expertise in the unique business lines we underwrite. Our selected TPAs undergo a rigorous pre-qualification process and are closely monitored

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

and regularly audited. We select only TPAs with claims personnel experienced in handling claims for the types of risks typical of our specialty programs and fully-funded accounts.

To assist us in our selection and monitoring of TPAs, we employ an internal claims staff responsible for both selecting the TPAs as well as ensuring the quality of claims adjudication by the TPAs. Our internal program claims staff pre-qualifies TPAs based on a detailed process that considers, among other characteristics, expertise in a particular business line, reserving philosophy, litigation management philosophy and management controls.

Once a TPA is qualified and selected, it is given limited reserve and settlement authority. We approve every claim in excess of a TPA's established settlement authority. Additionally, all coverage issues or disputes are required to be reported to our internal staff. To ensure that the TPAs we employ meet our performance standards, we conduct regular on-site claims audits. Recommendations arising from the claims audits are communicated to the TPA and an agreed upon action plan is implemented. Compliance with the action plan is closely monitored by our staff to ensure acceptable resolution to all recommendations.

Loss Control

Loss control is not a widely utilized risk management tool by excess and surplus lines companies. We believe, however, that loss control provides significant value to our underwriters as part of their risk selection process, and to our insureds in the improvement of their risk management practices. Our loss control unit assists insureds and our underwriters with regulatory compliance monitoring, the identification and analysis of risk exposures and the selection and implementation of effective risk management practices. Loss control services are utilized most often by our environmental and construction underwriting units as part of their account evaluation and maintenance process. Loss control reports are generated on individual accounts and reviewed by underwriters as part of their underwriting evaluation. Underwriters meet monthly with the loss control unit to discuss the results of inspections on individual accounts as part of their renewal risk selection process. Our loss control services for individual accounts include an initial assessment of regulatory policies and procedures, and risk management practices and targeted physical inspections, which are performed by outside professional loss control services companies.

Within our construction and environmental business lines, the only business lines for which we perform loss control, our inspection process includes an office interview with company management to assess the written policies and procedures as well as the overall corporate approach toward risk management processes. In our environmental business line, we have developed specific work standards or guidelines to which insureds must adhere. On our construction business line, we review standard contracts utilized for projects as part of our risk management analysis. A jobsite survey is also performed to assess the implementation and adherence to company, state and federal regulations.

Reinsurance

Reinsurance is a contractual arrangement under which one insurer (the ceding company) transfers to another insurer (the reinsurer) a portion of the liabilities that the ceding company has assumed under an insurance policy it has issued. A ceding company may purchase reinsurance for any number of reasons, including obtaining, through the transfer of a portion of its liabilities, greater underwriting capacity than its own capital resources would otherwise support, to stabilize its underwriting results, to protect against catastrophic loss and to enter into or withdraw from a business line. Reinsurance can be written on either a quota share basis (where premiums and losses are shared proportionally) or excess of loss basis (where losses are covered if they exceed a certain amount), under either a treaty (involving more than one policy) or facultative (involving only one policy) reinsurance agreement.

Our philosophy is to utilize reinsurance for asset protection against business and capital risks where economically appropriate and to maximize our use of capital. A description of our reinsurance structure for our business is as follows:

Environmental. Our reinsurance treaty for environmental products operates on an excess of loss basis, with our current maximum exposure, on a per occurrence basis, limited to \$500,000. The balance of the risk, up to \$10.5 million in excess of our retention, is ceded to unaffiliated reinsurers. Our reinsurance coverage is renewable on April 1, 2006. We are unable to determine what changes, if any, may be made to the treaty upon renewal.

Construction. Effective July 1, 2005, we discontinued purchasing reinsurance on the primary general liability portion of our construction business line. We made this decision after performing a loss cost and dynamic financial analysis, and concluding that our reinsurance purchases were uneconomical. We believe retaining this exposure will enhance our financial results and returns on capital. Prior to July 1, 2005, the reinsurance treaty for our primary general liability portion of our construction business line operated on an excess of loss basis providing reinsurance of \$650,000 for each occurrence in excess of a \$350,000 per occurrence retention. We continue to maintain a reinsurance treaty for our excess liability construction insurance business line that provides reinsurance coverage of \$2.0 million for each occurrence in excess of a primary general liability policy that provides \$1.0 million of coverage. We maintain a 25% quota share participation on this excess treaty.

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

Specialty Programs. The majority of our program business is reinsured under separate quota share reinsurance treaties that are purchased for each program. Effective September 1, 2005, we entered into an excess of loss reinsurance structure with several unaffiliated reinsurers that provides reinsurance limits of up to \$800,000 in excess of a \$200,000 per occurrence retention for each program covered under the treaty. This treaty allows us to consolidate our programs under one reinsurance treaty and provides a more efficient means of securing reinsurance for our programs from both a time and cost standpoint. We have the option of purchasing quota share reinsurance on a program basis for a portion of our retention amount if we choose not to retain the full \$200,000 of each occurrence for a given program.

Surety. For our surety business, we entered into a quota share reinsurance treaty during the second quarter of 2004 which provides reinsurance for a single bond limit not to exceed \$3.0 million, subject to a maximum for any one principal of \$6.0 million. We retain a 50% participation in this treaty with the balance reinsured by unaffiliated reinsurers.

Other. We also purchase reinsurance coverage on certain products that protects us from claims associated with bad faith allegations, improper claims handling and multiple insureds being involved in the same occurrence. This reinsurance provides limits of \$5.0 million for any one event, subject to an aggregate limit of \$10.0 million.

We do not have any exposures that exceed the limits stated above. We may decide to purchase reinsurance that exceeds this coverage for certain programs. For the year ended December 31, 2005, we ceded \$97.3 million of premium (40.9% of direct premiums written) to unaffiliated third party reinsurers. Ceded reinsurance premiums from the specialty programs business line were 67.2% of this amount.

Our Reinsurers

While reinsurance obligates the reinsurer to reimburse us for a portion of our losses, it does not relieve us of our primary liability to our insureds. If our reinsurers are either unwilling or unable to pay some or all of the claims made by us on a timely basis, we bear the financial exposure. We have written reinsurance security procedures that establish financial requirements for reinsurance companies that must be met prior to reinsuring any of the business we write. Among these requirements is a stipulation that reinsurance companies must have an A.M. Best rating of at least A- (Excellent) and a financial size category of Class VIII or greater at the time of writing any reinsurance, unless sufficient collateral has been provided at the time we enter into our reinsurance agreement. A financial size category of Class VIII is assigned by A.M. Best to companies with adjusted policyholder surplus of \$100 million to \$250 million, which, on a statutory basis of accounting, is the amount remaining after all liabilities, including loss reserves, are subtracted from all admitted assets. We have also established an internal reinsurance security committee, consisting of members of senior management, which meets quarterly to discuss and monitor our reinsurance coverage.

To protect against our reinsurers inability to satisfy their contractual obligations to us, our reinsurance contracts stipulate a collateral requirement for reinsurance companies that do not meet the financial strength and size requirements described above. These collateral requirements can be met through the issuance of unconditional letters of credit, the establishment and funding of escrow accounts for our benefit or cash advances paid into a trust account. Collateral may also include amounts we owe reinsurers for premium in the ordinary course of business. The following table is a listing of our largest reinsurers ranked by reinsurance recoverables and includes the collateral posted by these reinsurance companies as of December 31, 2005:

<u>Reinsurers</u>	<u>A.M. Best Rating</u>	Total Recoverables at December 31, <u>2005 (1)</u>	Collateral at December 31, <u>2005</u>

Combined Ratio.

The combined ratio is a standard measure of a property and casualty insurer's performance in managing its losses and expenses. Underwriting results are generally considered profitable when the combined ratio is less than 100%. On a GAAP basis, the combined ratio is determined by adding losses incurred and insurance expenses and dividing the sum of those numbers by net premiums earned. Our GAAP combined ratio was 96.8% in 2003, 102.7% in 2004 and 97.8% in 2005.

The combined ratio of an insurance company measures only the underwriting results of insurance operations and not the profitability of the overall company. Our reported combined ratio for our insurance operations may fluctuate from time to time depending on our mix of business and may not reflect the overall profitability of our insurance operations.

Losses and Loss Adjustment Expenses Reserves

We are required to maintain reserves to cover the unpaid portion of our ultimate liability for losses and loss adjustment expenses with respect to (i) reported claims and (ii) incurred but not reported (IBNR) claims. A full actuarial analysis is performed to estimate all of our unpaid losses and loss adjustment expenses under the terms of our contracts and agreements. In evaluating whether the reserves are reasonable for unpaid losses and loss adjustment expenses, it is necessary to project future losses and loss adjustment expenses payments. It is probable that the actual losses and loss adjustment expenses will not develop exactly as projected and may, in fact, vary significantly from the projections. See Management's Discussion and Analysis of Financial Condition and Results of Operations for additional information regarding our historical losses and loss adjustment expenses.

With respect to reported claims, reserves are established on a case-by-case basis. The reserve amounts on each reported claim are determined by taking into account the circumstances surrounding each claim and policy provisions relating to the type of loss. Loss reserves are reviewed on a regular basis, and as new information becomes available, appropriate adjustments are made to reserves.

As of December 31, 2005, approximately \$188.3 million, or 80.5%, of our net reserves, related to our excess and surplus lines segment, \$21.4 million, or 9.2%, of our net reserves were attributable to our alternative risk transfer segment and the balance of our net reserves, or \$24.2 million, was allocated among workers' compensation and other runoff business lines.

In establishing reserves, we employ several methods in determining our ultimate losses: (i) the expected loss ratio method; (ii) the loss development method based on paid and reported losses; and (iii) the Bornhuetter-Ferguson method based on expected loss ratios, paid losses and reported losses. The expected loss ratio method incorporates industry expected losses which are adjusted for our historical loss experience. The loss development method relies on industry payment and reporting patterns to develop our estimated losses. The Bornhuetter-Ferguson method is a combination of the other two methods, using expected loss ratios to produce expected losses, then applying loss payment and reporting patterns to our expected losses to produce our expected IBNR losses. We review the ultimate projections from all three methods and, based on the merits of each method, determine our estimated ultimate losses. In response to the reserve development experienced in the first two quarters of 2004 in our excess and surplus lines segment and management's concern that existing reserves for this segment might be inadequate, we commenced an actuarial reserve evaluation. This evaluation analyzed reserves by specific risk categories within our excess and surplus lines segment, such as general liability for building owners and California contractors, in addition to analyzing the entire line as a single risk category. The results of the specific risk analysis were then compared to the results of the single risk analysis in determining the final carried reserves.

All of the methods used, as described above, are generally accepted actuarial methods and rely in part on loss reporting and payment patterns while considering the long term nature of some of the coverages and inherent variability in projected results from year-to-year. The patterns used are generally based on industry data with supplemental consideration given to our experience as deemed warranted. Industry data is also relied upon as part of the actuarial analysis, and is used to provide the basis for reserve analysis on newer business lines. Provisions for inflation are implicitly considered in the reserving process. Our reserves are carried at the total estimate for ultimate expected losses and loss adjustment expenses, without any discount to reflect the time value of money. Reserve calculations are reviewed regularly by management and periodically by regulators. A full actuarial analysis is performed annually, assessing the adequacy of statutory reserves established by our management. A statutory actuarial opinion is filed with the various jurisdictions in which our insurance and reinsurance subsidiaries and our non-subsidiary risk retention group affiliate are licensed. Statutory reserves are reserves established to provide for future obligations with respect to all insurance policies as determined in accordance with statutory accounting principles (SAP), the rules and procedures prescribed or

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

permitted by state insurance regulatory authorities for recording transactions and preparing financial statements. Based upon the practices and procedures employed by us described above, management believes that our reserves are adequate

The net carried reserves at December 31, 2004 and December 31, 2005 are as follows (in thousands)

	<u>December 31,</u> <u>2004</u>	<u>December 31,</u> <u>2005</u>

Total	\$ 5,236	\$ 14,402	\$ 2,606
	=====	=====	=====

Reserve development for prior years in the construction business line in 2003 was attributable to developing losses on (i) contractors liability business written in New York during 1999 and 2000 and (ii) products liability on certain types of risk. The reserve development for prior years in 2003 in the runoff lines was primarily due to a \$3.6 million increase in workers compensation reserves reflecting claim development trends that exceeded actuarial modeling expectations. In response to this trend, we changed the assumptions in our workers compensation valuation model to better reflect historical loss development patterns.

Reserve development for prior years in the construction line in 2004 was attributable to developing losses on (i) certain New York contractor risks written in 2001 and (ii) a change in actuarial reserving methodologies to reflect risk categories. Exposure to New York contractor risks was significantly reduced during 2002 and 2003. The runoff lines reserve development for prior years was primarily due to \$2.9 million of increases in workers compensation reserves and \$1.6 million of increases in reserves on our assumed liability program.

Construction line reserve development in 2005 for prior years was primarily attributable to the commutation of reinsurance contracts with a former reinsurer. This transaction resulted in the Company recognizing losses of \$1.0 million. In 2005, the runoff lines reserve development for prior years was due to \$1.2 million of increases in reserves on the Company's excess municipality program.

The following table shows the gross, ceded and net development of the reserves for unpaid losses and loss adjustment expenses from 1995 through 2005 for our primary insurance and reinsurance subsidiaries and our non-subsidiary risk retention group affiliate on a GAAP basis. The top line of the table shows the liabilities at the balance sheet date for each of the indicated years and reflects the estimated amounts for losses and loss adjustment expenses for claims arising in that year and all prior years that are unpaid at the balance sheet date, including IBNR losses. In the gross and ceded sections of the table, the second line shows the re-estimated amount of previously recorded liability based on experience as of the end of each succeeding year. The lower portion of the table in the net section shows the cumulative amounts subsequently paid as of successive years with respect to the liability. The estimates change as more information becomes known about the frequency and severity of claims for individual years. A redundancy (deficiency) exists when the re-estimated liability at each December 31 is less (greater) than the prior liability estimate. The cumulative redundancy(deficiency) depicted in the table, for any particular calendar year, represents the aggregate change in the initial estimates over all subsequent calendar years.

	<u>Year Ended December 31, (1)</u>

Investments

The Company's investment portfolio is managed to maximize total economic return, with due consideration for the preservation of principal, operating income targets and the Company's overall asset/liability strategy.

Our investment portfolio is managed by an independent, nationally recognized investment management company that manages our investment portfolio pursuant to the investment policies and guidelines established by our Board of Directors. We have investment policies which limit the maximum duration and maturity of individual securities within the portfolio and set target levels for average duration and maturity of the entire portfolio. Our investment guidelines limit the percentage of our portfolio that is permitted to be invested in any one market sector. The guidelines further limit the amount that may be invested by issuer quality rating. Additionally, we use specific criteria to judge the credit quality and liquidity of our investments and use a variety of credit rating services to monitor these criteria. In conjunction with our investment policy, guidelines and strategy, we have invested predominantly in investment grade fixed income securities. Our investment portfolio consists primarily of government and government agency securities and high quality marketable corporate securities which are rated investment grade or better. We also invest in equity securities that track the S&P 500. At December 31, 2005, equity securities represented 20.0% of our prior year-end GAAP shareholders' equity. At December 31, 2005, we had \$3.5 million invested in dividend paying preferred stocks to increase our investment yield.

Pursuant to our investment guidelines, we have general limitations on the type of investments that may be made, including, among others, prohibitions on investments in certain types of securities without prior approval from management, credit quality limitations and maturity and duration requirements.

At December 31, 2004 and December 31, 2005, our cash and invested assets totaled approximately \$353.9 million and \$438.8 million, respectively, and were classified as follows:

Type of Investment	Fair Value At December 31, 2004	Amortized Cos At December 31, 2005

- (1) Ratings are assigned by S&P or, if no S&P rating is available, by Moody's Investors Service
(2) The BB rated securities were investment grade rated at the time of investment; they mature

The National Association of Insurance Commissioners (the NAIC) has a security rating system by which it assigns investments to classes called NAIC designations that are used by insurers when preparing their annual financial statements. The NAIC assigns designations to publicly traded as well as privately placed securities. The designations assigned by the NAIC range from class 1 to class 6, with a rating in class 1 being the highest quality. As of December 31, 2005, the majority of our portfolio was invested in securities rated in class 1 or class 2 by the NAIC, which are considered investment grade.

The weighted average maturity of our bond portfolio at December 31, 2005, was 4.4 years. The maturity distribution of our bond portfolio, as of December 31, 2005, based on stated maturity dates with no prepayment assumptions, was as follows:

<u>Maturity</u>	<u>Fair Value</u>	<u>Amortized Cost</u>
	(In thousands)	
Due in one year or less	\$35,834	\$ 36,205
Due from one to five years	107,332	108,951
Due from five to ten years	53,865	54,521
Due after ten years	37,357	36,567
Mortgage-backed securities	130,469	132,992

Total	\$364,857	\$369,236
	=====	

Our mortgage-backed securities are subject to risks associated with the variable prepayment loans.

Our Non-Subsidiary Affiliate

Enacted in 1986, the Risk Retention Act of 1986 (the Risk Retention Act) allowed companies with specialized liability insurance needs not available in the standard insurance market to create a new type of entity called a risk retention group. We assisted in the formation of American Safety RRG in 1988 in order to establish a U.S. insurance company to market and underwrite specialty environmental coverages. The advantage of writing policies through a risk retention group is that it is permitted to write policies without having to qualify to do so in each state.

American Safety RRG is not owned by us, but by its insureds, and is managed by ASI Services. American Safety RRG is authorized to write liability insurance in all 50 states as a result of the Risk Retention Act and is licensed by the Vermont Department of Banking, Insurance, Securities and Healthcare Administration (the Vermont Department) under Title 8 of the Vermont Statute Annotated (the "Vermont Captive Act") as a stock captive insurance company. Presently, five of our directors are also directors of American Safety RRG: David V. Brueggen, William O. Mauldin, Jr., Thomas W. Mueller, Cody W. Birdwell and Stephen R. Crim. The directors of American Safety RRG are elected annually by the shareholders/insureds of American Safety RRG.

We transferred our book of environmental insurance business to American Safety RRG in 1988 to allow us to write that insurance on a domestic basis. Today, our insurance subsidiaries participate in the ongoing business of American Safety RRG through a pooling agreement (whereby we retain 75% of the premiums and risk), and write other environmental coverages.

In December 2003, the FASB revised Interpretation No. 46, Consolidation of Variable Interest Entities, which requires the consolidation of the financial statements of American Safety RRG into our financial statements. See Note 1(n) to our consolidated financial statements herein for more information relating to this matter. As a result, the financial information presented herein, unless specifically noted, includes balances of American Safety RRG.

Insurance Services

ASI Services, directly and through its subsidiaries, provides business development, underwriting, accounting, program management, brokerage, claims administration, marketing and administrative services to our U.S. insurance operations and our non-subsidiary risk retention group affiliate.

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

ASI Services has developed many of our primary insurance and reinsurance programs. Since 1990, ASI Services has served as the program manager for American Safety RRG, providing it with program management, underwriting, loss control, marketing and accounting services pursuant to guidelines and procedures established by the Board of Directors of American Safety RRG.

ASI Services provides a number of services to our two U.S. insurance subsidiaries and to American Safety RRG. These services include:

- o business development services for developing new producer relationships and new business
- o program management services for the overall management and administration of a program
- o underwriting services for evaluating individual risks or classes of risk;
- o reinsurance services for placing reinsurance for a program;
- o loss control services for evaluating the risks posed by a particular class of risk, and control their losses;
- o claims administration services for the prompt reporting and handling of claims, and TPAs;
- o marketing services for designing and placing advertisements and other marketing materials and programs to producers; and
- o administrative services, including policy and endorsement issuance, data processing, premium collection, producing financial reports and paying claims.

Regulatory Environment

Insurance Regulation Generally

Our insurance operations are subject to regulation under applicable insurance statutes of the jurisdictions or states in which each subsidiary is domiciled and writes insurance. Insurance regulations are intended to provide safeguards for policyholders rather than to protect shareholders of insurance companies or their holding companies.

The nature and extent of state regulation varies from jurisdiction to jurisdiction, but typically involves prior approval of the acquisition of control of an insurance company or of any company controlling an insurance company, regulation of certain transactions entered into by an insurance company with an affiliate, approval of premium rates for lines of insurance, standards of solvency and minimum amounts of capital and surplus which must be maintained, limitations on types and amounts of investments, restrictions on the size of risks which may be insured by a single company, deposits of securities for the benefit of policyholders and reports with respect to financial condition and other matters. In addition, state regulatory examiners perform periodic examinations of insurance companies. American Safety RRG, American Safety Casualty and American Safety Indemnity are all subject to examination by state regulatory examiners every three years, and the last state regulatory examination for each entity occurred in 2003, 2005 and 2003, respectively. No exams are currently ongoing.

Although the federal government does not directly regulate the business of insurance in the U.S., federal initiatives often affect the insurance business in a variety of ways. The insurance regulatory structure has also been subject to scrutiny in recent years by the NAIC, federal and state legislative bodies and state regulatory authorities. Various new regulatory standards have been adopted and proposed in recent years. The development of standards to ensure the maintenance of appropriate levels of statutory surplus by insurers has been a matter of particular concern to insurance regulatory authorities. The statutory surplus is the amount remaining after all liabilities, including loss reserves, are subtracted from all admitted assets and determined in accordance with SAP.

Bermuda Regulation

Our Bermuda subsidiaries that conduct reinsurance business, American Safety Re and American Safety Assurance, are subject to regulation under The Insurance Act 1978, as amended, of Bermuda and related regulations (the Bermuda Act), which provide that no person shall conduct insurance business (including reinsurance) in or from Bermuda unless registered as an insurer under the Bermuda Act by the Supervisor of

Insurance (the Supervisor).

The Bermuda Act requires, among other things, Bermuda insurance companies to meet and maintain certain standards of solvency, to file periodic reports in accordance with the Bermuda Statutory Accounting Rules, to produce annual audited financial statements and to maintain a minimum level of statutory capital and surplus. In general, the regulation of insurers in Bermuda relies heavily upon the auditors, directors and managers of the Bermuda insurer, each of which must certify that the insurer meets the solvency capital requirements of the Bermuda Act. Furthermore, the Supervisor is granted powers to supervise, investigate and intervene in the affairs of insurance companies.

Neither American Safety Insurance, American Safety Re nor American Safety Assurance are registered or licensed as an insurance company in any state or jurisdiction in the U.S.

U.S. Regulation

As a Bermuda insurance holding company, we do not do business in the U.S. Our two U.S. insurance subsidiaries' operations are subject to state regulation where each is domiciled and where each writes insurance.

We acquired American Safety Casualty, a U.S. insurance subsidiary domiciled in Delaware, in 1993. American Safety Casualty is licensed as a property and casualty insurer in 48 states and the District of Columbia. American Safety Casualty is subject to regulation and examination by the Delaware Insurance Department and the other states in which it is an admitted insurer. The Delaware Insurance Department examines American Safety Casualty on a triennial basis. The insurance laws of Delaware place restrictions on a change of control of American Safety Insurance as result of our ownership of American Safety Casualty. Under Delaware law, no person may obtain 10% or more of our voting securities without the prior approval of the Delaware Insurance Department.

American Safety Casualty, as a licensed insurer, is subject to state regulation of rates and policy forms in the various states in which its direct premiums are written. Under these regulations, a licensed insurer may be required to file and obtain prior approval of its policy form and the rates that are charged to insureds. American Safety Casualty is also required to participate in state insolvency funds, or shared markets, which are designed to protect insureds or insurers that become unable to pay claims due to an insurer's insolvency. Assessments made against insurers participating in these funds are usually based on direct premiums written by participating insurers, as a percentage of total direct premiums written of all participating insurers. Premiums Written are those premiums written, whether or not earned, during a time period.

We acquired American Safety Indemnity, a U.S. insurance subsidiary domiciled in Oklahoma, in 2000. American Safety Indemnity is currently licensed or approved as an excess and surplus lines insurer in 40 states and the District of Columbia. American Safety Indemnity is subject to examination by the Oklahoma Insurance Department and the other states in which it is approved as an excess and surplus lines insurer. The Oklahoma Insurance Department examines American Safety Indemnity on a triennial basis. The insurance laws of Oklahoma place restrictions on a change of control of American Safety Insurance as a result of our ownership of American Safety Indemnity. Under Oklahoma law, no person may obtain 10% or more of our voting securities without the prior approval of the Oklahoma Insurance Department.

The premium rates of American Safety Indemnity, as an excess and surplus lines insurer, are not filed and approved with the various state insurance departments, but certain requirements regarding the types of insurance written by excess and surplus lines insurers still must be met. Generally, excess and surplus lines insurers may only write coverage that is not available in the admitted market and strict guidelines regarding the coverages are set forth in various state statutes. Surplus lines brokers are the licensed individuals or entities placing coverage with excess and surplus lines insurers, and in most states, the broker is responsible for the payment of surplus lines taxes which are payable to the state in which the surplus lines risk is located. Surplus lines insurers are exempt from participation in state insolvency funds which are designed to protect insureds if admitted insurers become insolvent and are unable to pay claims. While American Safety Indemnity is exempt from the majority of state regulatory requirements, it must be approved to write the type of insurance in the states where its surplus business lines insurance is written. The Oklahoma Insurance Department retains primary regulatory authority over American Safety Indemnity, as a licensed and admitted insurance company in Oklahoma.

Additionally, American Safety Casualty and American Safety Indemnity are required to comply with NAIC risk-based capital (RBC) requirements. RBC is a method of measuring the amount of capital appropriate for an insurance company to support its overall business in light of its size and risk profile. The ratio of a company's actual policyholder surplus to its minimum capital requirements will determine whether any state regulatory action is required. State regulatory authorities use the RBC formula to identify insurance companies which may be undercapitalized and may require further regulatory attention.

Regulation of Our Non-Subsidiary Affiliate

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

The Risk Retention Act facilitates the establishment of risk retention groups to insure certain liability risks of its members. The statute applies only to liability insurance and does not permit coverage of personal risk liability or workers' compensation.

The Risk Retention Act and Title 8 of the Vermont Statutes Annotated (the Vermont Captive Act) require that each insured of American Safety RRG be a shareholder. Each insured is required to purchase one share of American Safety RRG's common stock upon acceptance as an insured. There is no trading market for the shares of common stock of American Safety RRG and each share is restricted as to transfer. If and when a holder of American Safety RRG common stock ceases to be an insured, whether voluntarily or involuntarily, that holder's share of common stock is automatically canceled and that person is no longer a shareholder of American Safety RRG. The ownership interests of members in a risk retention group are considered to be exempt securities for purposes of the registration provisions of the Securities Act of 1933, as amended (the Securities Act) and the Securities Exchange Act of 1934, as amended (the Exchange Act) and are likewise not considered securities for purposes of any state securities law.

Congress intended under the Risk Retention Act that the primary responsibility for regulating the financial condition of a risk retention group would rest on the state in which the group is licensed or chartered. American Safety RRG is subject to regulation as a captive insurer under the insurance laws of Vermont and, to a lesser extent, under the laws of each state in which it does business. Any merger or acquisition of American Safety RRG is subject to the prior written approval of the commissioner of the Vermont Department. The Risk Retention Act requires a risk retention group to provide a notice on each insurance policy which it issues to the effect that (i) the policy is issued by a risk retention group; (ii) the risk retention group may not be subject to all of the insurance laws and regulations of the state in which the policy is being issued; and (iii) no state insurance insolvency guaranty fund is available to the policies issued by the risk retention group.

Additionally, American Safety RRG is also required to comply with NAIC RBC requirements, as discussed above.

Harbour Village Development

In March 2000, our subsidiary Ponce Lighthouse Properties Inc. and our general contracting subsidiary Rivermar Contracting Company began development of Harbour Village, located in Ponce Inlet, Florida, with 676 condominium units, a marina containing 142 boat slips, a par-3 golf course and beach club. We acquired the Harbour Village property (comprising 173 acres) through foreclosure in April 1999 from an individual to whom the Company had extended a loan in order to satisfy the loan after it was in default. Development of Harbour Village is substantially complete and all of the condominium units and boat slips had been sold and closed by the second quarter of 2005. We do not plan to engage in any additional real estate development activities. However, we are in the process of building a beach club facility that we expect to be completed by the end of the second quarter of 2006. There are two remaining employees that focus on managing the remaining warranty claims on closed condominium units and who oversee the beach club construction. We have an accrual for the estimated completion cost for the remainder of Harbour Village of \$1.7 million.

Real estate income was \$3.0 million in 2005, \$68.0 million in 2004 and \$57.6 million in 2003. This revenue was generated from the sales of condominium units and boat slips at Harbour Village. We recognized revenue when a closing occurred and title passed to the buyer. The following chart shows the number of condominium units and boat slips that were closed each year:

	<u>2003</u>	<u>2004</u>	<u>2005</u>
Condominium Units	197	203	7
Boat Slips	<u>17</u>	<u>4</u>	<u>0</u>
Total	214	207	7
	===	===	===

Real estate expenses were \$2.4 million in 2005, \$55.5 million in 2004 and \$54.0 million in 2003. The majority of real estate expenses, including construction costs, capitalized interest and commissions were recognized at the same time as revenue. General and administrative expenses were expensed as incurred.

Employees

At December 31, 2005, we employed 114 persons, none of whom were represented by a labor union.

Item 1A. Risk Factors

Our business is subject to the following risk factors, among others, in addition to the information (including disclosures relative to forward-looking statements) set forth elsewhere in this report.

Risk Factors Relating to American Safety Insurance

A downgrade in our A.M. Best rating or increased capitalization requirements could impair our ability to sell insurance policies.

Some policyholders are required to obtain insurance coverage from insurance companies that have an A- (Excellent) rating or higher from A.M. Best, the most widely recognized insurance company rating agency. Additionally, many producers are prohibited from representing insurance companies that are rated below A- (Excellent) by A.M. Best. In November 2005, A.M. Best reaffirmed its rating of A (Excellent), with a negative outlook on a group basis of American Safety Insurance, including our two U.S. insurance subsidiaries, our Bermuda reinsurance subsidiary and our U.S. non-subsidiary risk retention group affiliate. An A (Excellent) rating is assigned to companies that have, in the opinion of A.M. Best, an excellent ability to meet their ongoing obligations to policyholders. A.M. Best assigned a negative outlook to the rating in September 2004 in response to our reserve development in the second quarter of 2004 because of a concern by A.M. Best with the underwriting results from our core business lines and the potential need for further reserve development in the future. A.M. Best reaffirmed this rating and outlook in November 2005. If A.M. Best requires us to increase our capitalization in order to maintain our rating, and we are unable to raise the required amount of capital to be contributed to our insurance subsidiaries, A.M. Best may downgrade us.

A.M. Best assigns ratings that represent an independent opinion of an insurer's ability to meet its obligations to policyholders that is of concern primarily to policyholders, insurance brokers and agents and its rating and outlook should not be considered an investment recommendation. Because A.M. Best continually monitors companies with regard to their ratings, our ratings could change at any time, and any downgrade of our current rating could impair our ability to sell insurance policies and, ultimately, our financial condition and operating results.

The exclusions and limitations in our policies may not be enforceable.

We write our excess and surplus lines policy language to manage our exposure to expanding theories of legal liability like those that have given rise to claims for lead paint, asbestos, mold and construction defects. Many of the policies we issue include exclusions or other conditions that define and limit coverage. In addition, many of our policies limit the period during which a policyholder may bring a claim under the policy, which period in many cases is shorter than the statutory period under which these claims can be brought against our policyholders. While these exclusions and limitations help us assess and control our loss exposure, it is possible that a court or regulatory authority could nullify or void an exclusion or limitation, or legislation could be enacted modifying or barring the use of these exclusions and limitations. This could result in higher than anticipated losses and loss adjustment expenses by extending coverage beyond our underwriting intent or increasing the number or size of claims, which could have a material adverse effect on our operating results. In some instances, these changes may not become apparent until some time after we have issued the insurance policies that are affected by the changes. As a result, the full extent of liability under our insurance contracts may not be known for many years after a policy is issued.

The risks we underwrite are concentrated in relatively few industries. Adverse conditions in one of those industries could materially impact our operating results.

We focus much of our underwriting on specialty risks in the construction and environmental remediation industries. For the year ended December 31, 2005, approximately 61.6% of our gross premiums written were in these two industries. Accordingly, our operating results could be more exposed to unfavorable changes in business, economic or regulatory conditions and legal precedents affecting these industries than our more diversified competitors. For instance, a change in federal, state or local environmental standards could result in additional claims or losses. Similarly, a significant incident impacting one of the industries in which we operate that has the effect of increasing claims generally (or their settlement value) could negatively impact our operating results. A significant negative incident in one of our core business lines could have a material adverse effect on our financial condition or operating results.

We may respond to market trends based on our assessment of the profitability of certain business opportunities by expanding our contracting activities in certain business lines, which may cause our financial results to be volatile.

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

Although we perform substantial due diligence and risk analysis before entering into a new business line or insuring a new type of risk, and carefully assess the impact of exiting a business line, changing business lines inherently has more risk than remaining in the same business lines over a period of time. Because we actively seek to expand or contract our capacity in the markets we serve in response to factors such as loss experience and premium production, our operating results may experience material fluctuations. If our assessment of the potential to grow underwriting profit in a new business line is more favorable than actual results, our operating results may suffer.

Our industry is highly competitive and we may lack the financial resources to compete effectively.

We believe that competition in the specialty insurance markets that we target is fragmented and not dominated by one or more competitors. We face competition from several companies, such as insurance companies, reinsurance companies, underwriting agencies, program managers and captive insurance companies. Many of our competitors are significantly larger and possess greater financial, marketing and management resources than we do. We compete on the basis of many factors, including coverage availability, claims management, payment terms, premium rates, policy terms, types of insurance offered, overall financial strength, financial strength ratings and reputation. If any of our competitors offers premium rates, policy terms or types of insurance that are more competitive than ours we could lose business. If we are unable to compete effectively in the markets in which we operate or to establish a competitive position in new markets, our financial condition and operating results would be adversely impacted.

Our actual incurred losses may be greater than our reserves.

Insurance companies are required to maintain reserves to cover their estimated liability for losses and loss adjustment expenses with respect to both reported and incurred but not reported (IBNR) claims. Reserves are estimates at a given time involving actuarial and statistical projections of what we expect to be the cost of the ultimate resolution and administration of claims. These estimates are based on facts and circumstances then known, predictions of future events, estimates of future trends, projected claims frequency and severity, potential judicial expansion of liability precedents, legislative activity and other factors, such as inflation. A full actuarial analysis of our reserves is performed on an annual basis, which may include reserve studies, rate studies and regulatory opinions

Notwithstanding these efforts, the establishment of appropriate losses and loss adjustment expenses reserves is an inherently uncertain process, particularly in the environmental remediation industry, construction industry and some of the other industries for which we write policies where extensive historical data may not exist and where claims that have occurred may not be reported to an insurance company for long periods of time. For instance, there is little empirical data for residential construction defect claims and hence, traditional actuarial analysis may be inapplicable or less reliable. Due to these uncertainties, it is possible that ultimate losses could materially exceed our losses and loss adjustment expenses reserves. For example, during the last two years, we experienced development with respect to loss reserves as a result of litigation matters specifically related to our construction lines policies and policies written on runoff lines, which lowered our net earnings and shareholders equity during these periods.

To the extent that losses or loss adjustment expenses reserves are estimated in the future to be inadequate, we would have to increase our reserves and incur charges to earnings in the periods in which the reserves are increased, which would adversely impact our financial condition and operating results. For more information on our losses and loss adjustment expenses, see Management s Discussion and Analysis of Financial Condition and Results of Operations.

If we are unable to obtain reinsurance on favorable terms, our ability to write new policies would be adversely affected.

Reinsurance is a contractual arrangement under which one insurer (the ceding company) transfers to another insurer (the reinsurer) a portion of the liabilities that the ceding company has assumed under an insurance policy it has issued. Our business continues to involve ceding parts or significant portions of the risks that we underwrite to reinsurers. The availability and cost of reinsurance are subject to prevailing market conditions that are beyond our control and are factors that could materially impact our financial condition and operating results. There is no certainty that reinsurance will continue to be available in the form or in the amount that we require or, if available, at an affordable cost. The availability of reinsurance is dependent not only on reinsurers reaction to the specific risks that we underwrite, but also events that impact the overall reinsurance industry, such as the recent hurricanes in 2005. If we are unable to maintain or replace our reinsurance, our total loss exposure would increase and, if we were unwilling or unable to assume that increase in exposure, we would be required to mitigate the increase in exposure by writing fewer policies or writing policies with lower limits or different coverage.

If we are unable to recover amounts due from our reinsurers our financial condition will be adversely affected.

While reinsurance contractually obligates the reinsurer to reimburse us for a portion of our losses, it does not relieve us of our primary financial liability to our insureds. If our reinsurers are either unwilling or unable to pay some or all of the claims made by us on a timely basis, we bear the financial exposure. As a result, we are subject to credit risk with respect to our reinsurers. The total amount of reinsurance recoverables at December 31, 2005 was \$203.4 million, or 171.7% of shareholders' equity for the year ended December 31, 2005. Of this amount, \$72.2 million, or approximately 35.5% of the total amount recoverable is collateralized by cash or irrevocable letters of credit or other acceptable forms of collateral posted by the reinsurer.

We purchase reinsurance from reinsurers we believe to be financially sound. We have written reinsurance security procedures that establish financial requirements for reinsurance companies that must be met prior to reinsuring any of the business we write. Among these requirements is a stipulation that reinsurance companies must have an A.M. Best rating of at least A- (Excellent) and a financial size category of Class VIII or greater at the time of writing any reinsurance unless sufficient collateral has been provided at the time we enter into our reinsurance agreement. A financial size category of Class VIII is assigned by A.M. Best to companies with adjusted policyholder surplus of \$100 million to \$250 million, which, on a statutory basis of accounting, is the amount remaining after all liabilities, including loss reserves, are subtracted from all admitted assets. We have also established an internal reinsurance security committee, consisting of members of senior management, which meets quarterly to discuss and approve reinsurance security. To protect against our reinsurers' inability to satisfy their contractual obligations to us, our reinsurance contracts stipulate a collateral requirement for reinsurance companies that do not meet the financial strength and size requirements described above. These collateral requirements can be met through the issuance of unconditional letters of credit, the establishment and funding of escrow accounts for our benefit or cash advances paid into a segregated account. In the event collateral is not sufficient, there is no certainty that these reinsurers will be able to provide additional capital.

We are unable to ensure the credit worthiness of our reinsurers. For example, in 2005 and 2006, as a result of significant adverse loss reserve development, A.M. Best and Standard and Poor's, a division of The McGraw Hill Companies, Inc. (S&P) downgraded the financial strength ratings of the insurance and reinsurance operating subsidiaries of Alea Group Holdings (Bermuda) Ltd., including among others, Alea North American Insurance Company and Alea London Limited (Alea), one of our reinsurers, several times. Subsequently, Alea requested that A.M. Best withdraw all ratings of Alea. A.M. Best currently has assigned a NR-4 (Company Request) to Alea. As of December 31, 2005, our unsecured estimated net exposure to Alea was approximately \$8.8 million primarily in our specialty programs. This estimate is based upon our estimates of losses and will not reflect our exposure if our actual losses differ from those estimates. The business we have reinsured with Alea is in run-off, and Alea continues to indemnify us under our reinsurance agreements.

We rely on independent insurance agents and brokers to market our products, and their failure to successfully market our products could impair our growth initiatives and negatively impact our operating results.

We market most of our insurance products through approximately 230 independent insurance agents and brokers, which we refer to as producers. These producers are not obligated to promote our products and may sell competitors' products. Our profitability depends, in part, on the marketing efforts of these producers and on our ability to offer insurance products and services and maintain financial strength ratings that meet the requirements of our producers and their customers. The failure or inability of producers to market our insurance products successfully would have a material adverse effect on our business and operating results. Furthermore, as of December 31, 2005, approximately 45.0% of our gross premiums written for our excess and surplus lines segment (or approximately 28.2% of our aggregate gross premiums written) were produced through two producers (who focus on our construction business line). The loss of one or more of these producers going forward could have a material adverse effect on our operating results.

We are subject to credit risk in connection with producers that market our products.

In accordance with industry practice, when the insured pays premiums for our policies to producers for payment over to us, these premiums are considered to have been paid and, in most cases, the insured is no longer liable to us for those amounts, whether or not we actually have received the premiums. Consequently, we assume a degree of credit risk associated with the producers with whom we choose to do business. To date, we have not experienced any material losses related to these credit risks.

Our growth strategy is dependent on several factors, the failure to achieve any one of which may impair our ability to expand our operations or may prevent us from operating profitably.

Our growth strategy includes expanding in our existing markets, entering new geographic markets, creating relationships with new producers and developing new insurance products. In order to generate this growth, we are subject to various risks, including risks associated with our ability to:

o identify insurable risks not adequately served by the standard insurance market; o maintain adequate levels of capital; o obtain reinsurance on favorable terms; o obtain necessary regulatory approvals when writing on an admitted basis; o attract and retain qualified personnel to manage our expanded operations; and o maintain our financial strength ratings.

Any of these factors could affect our growth strategy and may cause our business and operating results to suffer.

If we lose key personnel or are unable to recruit qualified personnel, our ability to implement our business strategies could be delayed or hindered.

Our future success will depend, in part, upon the efforts of our executive officers and other key personnel. We have employment agreements with three of our executive officers. Our ability to recruit and retain key personnel will depend upon a number of factors, such as our results of operations, business prospects and the level of competition then prevailing in the market for qualified personnel. The loss of any of these officers or other key personnel or our inability to recruit key personnel could prevent us from fully implementing our business strategies and could materially adversely affect our business, financial condition and operating results.

We routinely evaluate opportunities to expand our business through acquisitions of other companies or business lines. There are many risks associated with acquisitions that we may be unable to control.

We evaluate potential acquisition opportunities as a means to grow our business. There are a number of risks attendant to any acquisition. These risks include, among others, the difficulty in integrating the operations and personnel of an acquired company; potential disruption of our ongoing business; inability to successfully integrate acquired systems and insurance programs into our operations; maintenance of uniform standards, controls and procedures; possible impairment of relationships with employees and insureds of an acquired business as a result of changes in management; and that the acquired business may not produce the level of expected profitability. As a result, the impact of any acquisition on our future performance may not be consistent with original expectations, and may impair our business, financial condition and operating results.

We may require additional capital in the future, which may not be available or may only be available on unfavorable terms.

Our future capital requirements depend on many factors, including our ability to write profitable new business, retain existing customers and establish premium rates and reserves at levels sufficient to cover losses and related expenses. Many factors will affect our capital needs and their amount and timing, including our growth and profitability, our claims experience and the availability of reinsurance, as well as possible acquisition opportunities, market disruptions and other unforeseeable developments. If we have to raise additional capital, equity or debt financing may not be available at all or may be available only on terms that are unfavorable to us. In the case of equity financings, dilution to our shareholders could result. In any case, those securities may have rights, preferences and privileges that are senior to those of the Common Shares offered hereby. In the case of debt financings, we may be subject to covenants that restrict our ability to freely operate our business. If we cannot obtain adequate capital on favorable terms or at all, we may not have sufficient funds to implement our operating plans and our business, financial condition and operating results could be adversely affected.

Changes in the value of our investment portfolio may have a material impact on our operating results.

We derive a significant portion of our net income from our invested assets. As a result, our operating results depend in part on the performance of our investment portfolio. As of, and for the year ended, December 31, 2005, the fair value of our investment portfolio was \$415.5 million and our income derived from these assets was \$14.3 million, or 89.2% of our pre-tax earnings. Our investment portfolio is subject to various risks, including:

IXI credit risk, which is the risk that our invested assets will decrease in value due to unfavorable changes in the financial prospects or a downgrade in the credit rating of an entity in which we have invested; IXI interest rate risk, which is the risk that our invested assets may decrease due to changes in interest rates;

IXI equity price risk, which is the risk that we will incur economic loss due to a decline in equity prices; and

IXI duration risk, which is the risk that our invested assets may not adequately match the duration of our insurance liabilities.

Our investment portfolio is comprised mostly of fixed-income securities. We do not hedge our investments against interest rate risk and, accordingly, changes in interest rates may result in fluctuations in the value of these investments.

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

Our investment portfolio is invested by a professional management firm in accordance with detailed investment guidelines that stress diversification of risks, conservation of principal and liquidity. If our investment portfolio is not appropriately matched with our insurance and reinsurance liabilities, we may be forced to liquidate investments prior to their maturity at a significant loss in order to cover these liabilities. This might occur, for instance, in the event of a large or unexpected claim. Large investment losses could significantly decrease our asset base, thereby affecting our ability to underwrite new business. For more information about our investment portfolio, see [Business?Investments](#).

We rely on our information technology, information processing and telecommunication systems, and the failure of these systems could materially and adversely affect our business.

Our business is highly dependent upon the successful and uninterrupted functioning of our information technology, information processing and telecommunications systems. We rely on these systems to support our marketing operations, process new and renewal business, provide customer service, make claims payments, support premium financing activities and facilitate premium collections and policy cancellations. These systems also enable us to perform actuarial and other modeling functions necessary for underwriting and rate development. We have a highly trained staff that is committed to the continual development and maintenance of these systems. However, the failure of these systems could interrupt our operations or materially impact our ability to evaluate and write new business. Because our information technology, information processing and telecommunications systems interface with and depend on third party systems, we could experience service denials if demand for this service exceeds capacity or if the third party systems fail or experience interruptions. If sustained or repeated, a system failure or service denial could result in a deterioration of our ability to write and process new and renewal business and provide customer service or compromise our ability to pay claims in a timely manner. There can be no guarantee that these systems can effectively support our continued growth. Additionally, some of our systems are not fully redundant, and our disaster recovery planning does not account for all eventualities, which could adversely affect our business.

We are subject to risks related to litigation.

From time to time, we are subject to lawsuits and other claims arising out of our insurance and real estate operations. We have responded to the lawsuits we face and, although the outcome of these lawsuits cannot be predicted, we believe that there are meritorious defenses and intend to vigorously contest these claims. Adverse judgments in one or more of these lawsuits could require us to pay significant damage amounts or to change aspects of our operations, which could have a material adverse effect on our business and operating results, particularly where we have not established an accrual, or a sufficient accrual for those judgments. For information on the material litigation in which we are involved, see [Management's Discussion and Analysis of Financial Condition and Results of Operations?Legal Proceedings](#).

Risk Factors Related to Taxation

We may be subject to U.S. tax, which may have a material adverse effect on our financial condition and operating results.

American Safety Insurance, its reinsurance subsidiary, American Safety Reinsurance ([American Safety Re](#)), and its segregated account captive, American Safety Assurance Ltd. ([American Safety Assurance](#)), are organized in Bermuda. American Safety Insurance, American Safety Re and American Safety Assurance are operated in a manner such that none should be subject to U.S. tax (other than U.S. excise tax on insurance and reinsurance premium income attributable to insuring or reinsuring U.S. risks and U.S. withholding tax on some types of U.S. source investment income) because none of these companies should be treated as engaged in a trade or business within the U.S. (and, in the case of American Safety Re and American Safety Assurance, to be doing business through a permanent establishment within the U.S.). However, because there is considerable uncertainty as to the activities that constitute being engaged in a trade or business within the U.S. (and what constitutes a permanent establishment under the income tax treaty between the U.S. and Bermuda (the [Bermuda Treaty](#)) as well as the entitlement of American Safety Re and American Safety Assurance to treaty benefits), there can be no assurances that the U.S. Internal Revenue Service (the [IRS](#)) will not contend successfully that American Safety Insurance, American Safety Re and/or American Safety Assurance is engaged in a trade or business in the U.S. (or that American Safety Re or American Safety Assurance is carrying on business through a permanent establishment in the U.S.). If any of American Safety Insurance, American Safety Re or American Safety Assurance were considered to be engaged in a trade or business in the U.S., it could be subject to U.S. corporate income and additional branch profits taxes on the portion of its earnings effectively connected to such U.S. business, in which case its operating results could be materially adversely affected. See [Certain Tax Considerations](#) [Certain U.S. Federal Tax Considerations](#) [U.S. Taxation of American Safety Insurance and its Bermuda Subsidiaries](#).

If you acquire 10% or more of the Common Shares, you may be subject to taxation under the controlled foreign corporation (CFC) rules.

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

Under certain circumstances, a U.S. 10% shareholder (as defined in Certain Tax Considerations Certain U.S. Federal Income Tax Considerations Tax Treatment of Shareholders Classification as a Controlled Foreign Corporation) of a foreign corporation that is a CFC for an uninterrupted period of 30 days or more during a taxable year must include in gross income for U.S. federal income tax purposes that U.S. 10% shareholder's subpart F income, even if the subpart F income is not distributed to that U.S. 10% shareholder. Subpart F income of a foreign insurance corporation typically includes foreign personal holding company income (such as interest, dividends and other types of passive income), as well as insurance and reinsurance income (including underwriting and investment income) attributable to the insurance of risks situated outside the CFC's country of incorporation.

We believe that because of the dispersion of our Common Share ownership, provisions in our organizational documents that limit voting power and other factors, no U.S. person who acquires Common Shares directly or indirectly through one or more foreign entities should be required to include our subpart F income in income under the CFC rules of the Code. It is possible that the IRS could challenge the effectiveness of these provisions and that a court could sustain that challenge, in which case your investment could be materially adversely affected.

U.S. persons who hold Common Shares may be subject to U.S. federal income taxation at ordinary income rates on their proportionate share of our related party insurance income (RPII).

If the RPII of American Safety Re or American Safety Assurance were to equal or exceed 20% of its gross insurance income in any taxable year and direct or indirect insureds (and persons related to those insureds) own directly or indirectly through entities 20% or more of the voting power or value of American Safety Re or American Safety Assurance, then a U.S. person who owns any Common Shares (directly or indirectly through foreign entities) on the last day of the taxable year would be required to include in income for U.S. federal income tax purposes that person's pro rata share of that company's RPII for the entire taxable year, determined as if that RPII were distributed proportionately only to U.S. persons at that date regardless of whether that income is distributed. In addition, any RPII that is includible in the income of a U.S. tax-exempt organization may be treated as unrelated business taxable income. Neither American Safety Re nor American Safety Assurance expects gross RPII to equal or exceed 20% of its gross income for 2005 or subsequent years, and neither expects its direct or indirect insureds (including related persons) to directly or indirectly hold 20% or more of its voting power or value, but we cannot be certain that this will be the case because some of the factors which determine the extent of RPII may be beyond our control. If these thresholds are met or exceeded, and if you are an affected U.S. person, your investment could be materially adversely affected. The RPII provisions, however, have never been interpreted by the courts or the U.S. Treasury Department (the Treasury Department) in final regulations, and regulations interpreting the RPII provisions of the Code exist only in proposed form. It is not certain whether these regulations will be adopted in their proposed form or what changes or clarifications might ultimately be made thereto or whether any of those changes, as well as any interpretation or application of RPII by the IRS, the courts or otherwise, might have retroactive effect. The Treasury Department has authority to impose, among other things, additional reporting requirements with respect to RPII. Accordingly, the meaning of the RPII provisions and the application thereof to us is uncertain. See Certain Tax Considerations Certain U.S. Federal Tax Considerations Tax Treatment of Shareholders Related Person Insurance Income.

U.S. persons who dispose of Common Shares may be subject to U.S. federal income taxation at the rates applicable to dividends on apportionment of their gain, if any.

Section 1248 of the Internal Revenue Code of 1986, as amended (the Code) provides that if a U.S. person sells or exchanges stock of a foreign corporation and that person owned, directly, indirectly through certain foreign entities or constructively, 10% or more of the voting power of the corporation at any time during the five-year period ending on the date of disposition when the corporation was a CFC, any gain from the sale or exchange of the shares will be treated as a dividend to the extent of that person's share of the CFC's earnings and profits (determined under U.S. federal income tax principles) during the period that person held the shares and while the corporation was a CFC (with certain adjustments). We believe that because of the dispersion of our Common Share ownership, provisions in our organizational documents that limit voting power and other factors, no U.S. shareholder, other than Fredrick C. Treadway or Treadway Associates, L.P., of American Safety Insurance should be treated as owning (directly, indirectly through foreign entities or constructively) 10% or more of the total voting power of American Safety Insurance. As a result, American Safety Insurance should not be a CFC and Section 1248 of the Code, as applicable under the general CFC rules, should not apply to dispositions of our shares. It is possible, however, that the IRS could challenge these provisions in our organizational documents and that a court could sustain that challenge. To the extent American Safety Insurance is a CFC, a 10% U.S. Shareholder may in certain circumstances be required to report a disposition of Common Shares by attaching IRS Form 5471 to the U.S. federal income tax or information return that it would normally file for the taxable year in which the disposition occurs.

For purposes of Section 1248 of the Code and the requirement to file Form 5471, special rules apply with respect to a U.S. person's disposition of shares of a foreign insurance company that has RPII during the five-year period ending on the date of the disposition. In general, if a U.S. person disposes of shares in a foreign insurance corporation in which U.S. persons own 25% or more of the shares (even if the amount of gross RPII is less than 20% of the corporation's gross insurance income and the ownership of its shares by direct or indirect insureds and related persons is less than the 20% threshold), any gain from the disposition may be treated as a dividend to the extent of that person's share of the

corporation's undistributed earnings and profits that were accumulated during the period that person owned the shares (whether or not those earnings and profits are attributable to RPII). As a result of these special rules and proposed Treasury Department regulations, the IRS may assert that Section 1248 of the Code and the requirement to file Form 5471 apply to dispositions of Common Shares because American Safety Insurance is engaged in the insurance business indirectly through subsidiaries. See *Certain Tax Considerations* *Certain U.S. Federal Income Tax Considerations* *Tax Treatment of Shareholders* *Dispositions of Shares in a CFC or RPII CFC*.

U.S. persons who hold Common Shares will be subject to adverse tax consequences if American Safety Insurance is considered to be a Passive Foreign Investment Company (a PFIC) for U.S. federal income tax purposes.

If American Safety Insurance is considered a PFIC for U.S. federal income tax purposes, a U.S. person who owns Common Shares will be subject to adverse tax consequences, including subjecting the investor to a greater tax liability than might otherwise apply and subjecting the investor to tax on amounts in advance of when tax would otherwise be imposed, in which case your investment could be materially adversely affected. In addition, if American Safety Insurance were considered a PFIC, upon the death of any U.S. individual owning Common Shares, that individual's heirs or estate would not be entitled to a step-up in the basis of the shares which might otherwise be available under U.S. federal income tax laws. American Safety Insurance does not believe that it is, and does not expect to become, a PFIC for U.S. federal income tax purposes. No assurance can be given, however, that American Safety Insurance will not be deemed a PFIC by the IRS. If American Safety Insurance were considered a PFIC, it could have material adverse tax consequences for an investor that is subject to U.S. federal income taxation. There are currently no regulations regarding the application of the PFIC provisions to an insurance company. New regulations or pronouncements interpreting or clarifying these rules may be forthcoming. We cannot predict what impact, if any, that guidance would have on an investor that is subject to U.S. federal income taxation. See *Certain Tax Considerations* *Certain U.S. Federal Income Tax Considerations* *Tax Treatment of Shareholders* *Passive Foreign Investment Company*.

Risk Factors Relating to the Property and Casualty Insurance Industry

Policy pricing in our industry is cyclical, and our financial results are impacted by that cyclicity.

The property and casualty insurance industry has historically been a cyclical industry consisting of both hard market periods and soft market periods. During soft market periods, insurers tend to be more aggressive in writing policies and competitive in the pricing of those policies. Hard market periods are characterized by shortages of underwriting capacity and high premium rates. Beginning in 2000, we believe our industry experienced a hardening market, reflected by increasing rates and more restrictive coverage terms. These trends appeared to have started slowing in 2004. We believe the industry is now experiencing a softening market, where pricing generally has become more competitive and policy terms and conditions have become less restrictive. Therefore, we may not be able to achieve our growth and profitability goals. Because this cyclicity is due in large part to the economy, the particular needs of insureds and the actions of our competitors, we cannot predict the timing or duration of changes in the insurance market cycle.

Our industry is subject to significant regulatory scrutiny.

Recently, the insurance industry has been subject to a significant level of scrutiny by various regulatory bodies, including state attorneys general and insurance departments, concerning certain practices within the insurance industry. These practices include the receipt of contingent commissions by insurance brokers and agents from insurance companies and the extent to which this compensation has been disclosed, bid rigging and related matters. As a result of these and related matters, there have been a number of recent revisions to existing, or proposals to modify or enact new, laws and regulations regarding the relationship between insurance companies and producers. Any changes or further requirements that are adopted by federal, state or local governments could adversely affect our business and operating results. In addition, these issues have increased the regulatory scrutiny of our industry.

We operate in a heavily regulated industry, and existing and future regulations may constrain how we conduct our business and could impose liabilities and other obligations upon us.

Insurance Regulation. Our primary insurance and reinsurance subsidiaries, as well as our non-subsidiary risk retention group affiliate, are subject to regulation under applicable insurance statutes of the jurisdictions in which they are domiciled or licensed and write insurance. This regulation may limit our ability to, or speed with which we can, effectively respond to market opportunities and may require us to incur significant annual regulatory compliance expenditures. Insurance regulation is intended to provide safeguards for policyholders rather than to protect shareholders of our insurance companies. Insurance regulation relates to authorized business lines, capital and surplus requirements,

types and amounts of investments, underwriting limitations, trade practices, policy forms, claims practices, mandated participation in shared markets, loss reserve adequacy, insurer solvency, transactions with related parties, changes in control, payment of dividends and a variety of other financial and nonfinancial components of an insurance company's business. For instance, our insurance subsidiaries are subject to risk-based capital, or RBC, restrictions. RBC is a method of measuring the amount of capital appropriate for an insurance company to support its overall business in light of its size and risk profile. The ratio of a company's actual policyholder surplus to its minimum capital requirements will determine whether any state regulatory action is required. State regulatory authorities use the RBC formula to identify insurance companies which may be undercapitalized and may require further regulatory attention. Each of our domestic insurance subsidiaries satisfies its minimum capital requirements and none of them has been identified by any regulatory authority as being undercapitalized or requiring further regulatory attention. A number of legislative initiatives currently are under consideration by Congress. Any changes in insurance laws and regulations could materially adversely affect our operating results. We are unable to predict what additional laws and regulations, if any, affecting our business may be promulgated in the future or how they might be interpreted.

Dividend Regulation. Like other insurance holding companies, American Safety Insurance Holdings, Ltd. relies on dividends from its insurance subsidiaries to be able to pay dividends and fulfill its other financial obligations. The payment of dividends by these subsidiaries and other intercompany transactions are subject to regulatory restrictions and will depend on the surplus and future earnings of these subsidiaries. As a result, insurance holding companies may not be able to receive dividends from their subsidiaries at times and in amounts sufficient to pay dividends and fulfill their other financial obligations. Additionally, as a Bermuda holding company, American Safety Insurance Holdings, Ltd. is subject to Bermuda regulatory constraints that will affect its ability to pay dividends on the Common Shares and to make other payments. Under the Companies Act, of 1981 ("the Companies Act") insurance holding companies may declare or pay a dividend out of distributable reserves only if it has reasonable grounds to believe that it is, and would after the payment be, able to pay liabilities as they become due and if the realizable value of its assets would thereby not be less than the aggregate of its liabilities and issued share capital and share premium accounts. We currently do not pay dividends on the Common Shares, nor do we expect to do so in the future.

Environmental Regulation. Environmental remediation activities and other environmental risks are heavily regulated by both federal and state governments. Environmental regulation is continually evolving, and changes in the regulatory patterns at federal and state levels may have a significant effect upon potential claims against our insureds and us. These changes also may affect the demand for the types of insurance offered by and through us and the availability or cost to us of reinsurance. We are unable to predict what additional laws and regulations, if any, affecting environmental remediation activities and other environmental risks may be promulgated in the future, how they might be applied, and what their impact might be.

Item 1B. Unresolved Staff Comments

None

Item 2. Properties

Our offices are located at 44 Church Street, Hamilton, Bermuda, and the telephone number is (441) 296-8560. The principal corporate offices of our U.S. subsidiaries are located at 1845 The Exchange, Suite 200, Atlanta, Georgia 30339, and the telephone number is (770) 916-1908.

Item 3. Legal Proceedings

The Company, through its subsidiaries, is routinely a party to pending or threatened litigation or arbitration disputes in the normal course of its business. Based upon information presently available, in view of legal and other defenses available to the Company's subsidiaries, management does not believe that any pending or threatened litigation or arbitration disputes will have any material adverse effect on the Company's financial condition or operating results, except for the following matters.

Acquisition Rescission Litigation. In April 2000, the Company filed a lawsuit in the U.S. District Court for the Northern District of Georgia for damages and, alternatively, to rescind the stock purchase of a Michigan insurance agency and two related insurance companies specializing in insurance program business based upon the sellers' breach of the representations and warranties made in the definitive agreements concerning the business affairs and financial condition of the acquired companies. This case and related litigation were settled in December 2005 with the release of 109,716 shares of escrowed stock and cash of \$355,000 payable to the various defendants.

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

Assumed Reinsurance Litigation. The Company is a defendant in several cases, liquidation actions and reinsurance claims, collectively identified as the National Warranty issue. American Safety Reinsurance was an excess of loss reinsurer through a reinsurance treaty with National Warranty Risk Retention Group (National Warranty) that, in turn, provided insurance coverage to automobile dealerships and other providers that became obligors pursuant to extended automobile warranty contracts they sold to consumers. National Warranty filed for liquidation in the Cayman Islands (the location of its legal creation). This liquidation had a cascading effect, including the subsequent filing of bankruptcy by various obligors of vehicle service contracts insured by National Warranty. As a result, there are potentially over one million vehicle service contracts that are not being honored by the obligors.

The liquidators of National Warranty have made claims in excess of \$24 million pursuant to two reinsurance contracts issued by American Safety Reinsurance to National Warranty. In addition, purchasers of vehicle service contracts have made claims against American Safety Reinsurance, including a claim by one purchaser group for \$10 million. Lastly, claims have been made by sellers/obligors of the vehicle service contracts who were insured by National Warranty. One case has been certified as a class action, although the Company is appealing that determination. The Company continues to believe that American Safety Reinsurance has valid defenses to the claims including, among others, that it had commuted its obligations under reinsurance treaties, its liability is limited to the amount of coverage provided under the policies and that most of the claimants cannot make claims directly against it.

Donald Griggs et al. v. American Safety Reinsurance, Ltd. Et al., Case No 2003-31509, Circuit Court, Seventh District, Volusia County, Florida. Seven plaintiffs filed suit against the Company and three of its subsidiaries seeking to recover a \$2,100,000 loan made by the plaintiffs in 1986 to Ponce Marina, Inc., the former owner of the Harbour Village property. The plaintiffs claimed that the Company was responsible for the repayment of the loan, with interest. The plaintiffs propounded four theories of liability and the court granted judgment for the Company on three of the theories. However, the court entered judgment on August 10, 2005 against the Company for \$3,426,703, which includes interest, on the remaining theory. The court held that the Company, as a condition of its loan, required the former owner to demand that the plaintiffs take certain actions as to their loan, to their detriment and to the benefit of the Company, and thus, the Company had entered into a quasi-contract with the plaintiffs to repay their loan with interest.

The Company filed an appeal in December 2005. Based on the merits of the case and the probability of ultimate payment, the Company has not established an accrual for the decision.

Dick Sizemore v. American Safety Insurance Services, Inc. Et al., Case No 2005-31704, Circuit Court of Volusia County, Florida ASI Services, its parents and a number of its affiliates are defendants in a suit brought by an individual who contends that defendants are liable to him for a debt owed to him by ASI Services former borrowers, Ponce Marina, Inc. and Herman McMurray, in the amount of \$400,000 plus interest and costs. The plaintiff also intends to seek class certification for the case on these claims. On January 27, 2006, the trial court dismissed the case. The plaintiff was permitted to file an amended complaint on or before March 6, 2006. The plaintiff filed an amended complaint on March 7, 2006, alleging various theories of recovery. The Company continues to vigorously defend this case, as it believes that the case is without merit.

Baber v. Boroweic v. American Safety Casualty Insurance Company This case arises out of a claim brought by the Baber family against two lawyers (the Boroweics) for legal malpractice who were insured by American Safety Casualty Insurance Company (American Safety Casualty) under a lawyer's professional liability program underwritten and managed through American Safety Casualty's program manager Professional Coverage Managers, Inc. During the adjustment of this claim, American Safety Casualty issued a reservation of rights letter, denied the claim based on a coverage issue, rejected a policy limits demand and intervened into the underlying suit. The Babers and Boroweics eventually entered into a Morris Agreement wherein the Babers agreed not to pursue any judgment against the Boroweics. Rather, the Boroweics assigned their bad faith rights against American Safety Casualty to the Babers. The court found this to be reasonable and also found that the Babers, as a result of the accident, had incurred \$11 million in damages. The Babers sued American Safety Casualty for bad faith. This case was settled out of court in December 2005 for \$5.5 million.

American Safety Casualty is billing reinsurers under a 90/10 Quota Share treaty with a \$2.0 million ECO/XPL (extra contractual obligations/excess of policy limits) limit and also has a Clash Cover treaty with a \$5.0 million limit, and anticipates \$1.3 million of the loss to be its ultimate exposure, which was recorded in 2005.

Item 4. Submission of Matters to a Vote of Security Holders

No matter was submitted to a vote of the Company's security holders during the fourth quarter of the fiscal year ended December 31, 2005.

Management of the Company

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

The following table provides information regarding the management of the Company. Biographical information for each person is set forth immediately following the table.

<u>Name</u>	<u>Age</u>	<u>Position</u>
Stephen R. Crim	42	President, Chief Executive Officer
Joseph D. Scollo, Jr.	42	Executive Vice President
William C. Tepe	48	Chief Financial Officer
Steven B. Mathis	38	Vice President, Planning and Treasurer
Ambuj Jain	45	Vice President - Planning and Operations
Dorothy J. Giglio	51	Secretary
Pamela M. Moniz	45	Vice President - Finance

Stephen R. Crim became President and Chief Executive Officer of the Company in January 2003 and he became President of the Company's insurance and reinsurance operations effective January 2002. Previously, Mr. Crim had been responsible for all underwriting functions since joining the Company in 1990. Previously, Mr. Crim was employed in the underwriting department of Aetna Casualty and Surety and The Hartford Insurance Co. between 1986 and 1990. Mr. Crim has 19 years experience in the insurance industry.

Joseph D. Scollo, Jr. became Executive Vice President of the Company in January 2003 and was Senior Vice President - Operations since November 1998. Previously, Mr. Scollo served as senior vice president-operations of United Coastal Insurance Company, New Britain, Connecticut since 1989. Mr. Scollo has 16 years experience in the insurance industry.

William C. Tepe became Chief Financial Officer of American Safety Insurance on November 14, 2005. Prior to joining American Safety Insurance, Mr. Tepe was the Chief Financial Officer for GAB Robins Inc., an international insurance claims management and adjusting company. Mr. Tepe has also been employed in senior financial reporting and accounting positions within major property and casualty insurance companies such as W. R. Berkley Corp. and USF&G Corporation. Mr. Tepe is a certified public accountant.

Steven B. Mathis became Vice President, Planning and Treasurer effective November 14, 2005. Previously, he served as Chief Financial Officer of American Safety Insurance since August 1998. He also served as American Safety Insurance's Controller from 1992 to 1998. Mr. Mathis has 16 years accounting experience in the insurance industry having held accounting positions with American Insurance Managers, Inc. and American Security Group.

Ambuj Jain joined American Safety Insurance in 2004, and brings more than 20 years of marketing and operations experience. Previously, he served as a consultant to the Company's Executive Management Team since 1999 and as Senior Vice President, Marketing and Planning for Resort Condominiums International. Mr. Jain has also served as Senior Manager with Deloitte Consulting, Partner with WorldMark Group, Inc., and a marketing professor at Southern Methodist University in Dallas.

Dorothy J. Giglio became Secretary of the American Safety Insurance in January 2005. Ms. Giglio joined American Safety Insurance in August 1990 as the Office Manager and served in that capacity until 1993. Ms. Giglio returned to the Company in 1996 as the Office Manager and was subsequently promoted to Director of Special Projects in 2000. In 2004, she was named Director of Operations Support Group.

Pamela M. Moniz is Vice President of Finance for our Bermuda captive operations and joined American Safety Insurance in April 2005. Ms. Moniz has over 23 years of experience in the accounting field; including over 9 years of experience in the insurance industry. Ms. Moniz has held various positions within both the U.S. and Bermuda insurance and reinsurance markets with CNA Risk Services, SAFECO Property & Casualty, Rosemont Reinsurance (formerly Goshawk Re) and Goshawk Insurance Holdings.

PART II

Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

The Company's common shares trade on the New York Stock Exchange, Inc. under the symbol ASI. As of December 31, 2005, there were approximately 2,200 holders of the Company's common shares.

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

The following table sets forth the high and low prices per share of the Company's common shares for the periods indicated.

<u>Fiscal Year Ended December 31, 2004</u>	<u>High</u>	
First Quarter	\$16.00	\$1
Second Quarter	18.30	1
Third Quarter	15.21	
Fourth Quarter	16.45	1
<u>Fiscal Year Ended December 31, 2005</u>	<u>High</u>	
First Quarter	\$16.24	\$1
Second Quarter	15.75	1
Third Quarter	17.98	1
Fourth Quarter	17.98	1

The Company did not pay any cash dividends during fiscal year 2004 and 2005. Future cash dividends will be periodically reviewed by the Board of Directors. As an insurance holding company, the Company's ability to pay cash dividends to its shareholders will depend, to a significant degree, on the ability of the Company's subsidiaries to generate earnings from which to pay cash dividends to American Safety. The Company's current plans are for its insurance and reinsurance subsidiaries to principally retain their capital for growth.

The jurisdictions in which American Safety and its insurance and reinsurance subsidiaries are domiciled place limitations on the amount of dividends or other distributions payable by insurance companies in order to protect the solvency of insurers. See "Regulatory Environment" in Item 1 of this report.

Equity Compensation Plan Information

<u>Plan category</u>	<u>Number of securities to be issued upon exercise of outstanding options, warrants and rights</u>	<u>Weighted-average exercise price of outstanding options, warrants and rights</u>	<u>Number of securities remaining available for future issuance under the equity compensation plan</u>
Equity compensation plans approved by security holders (1)	881,433	\$8.62	430
Equity compensation plans approved by security holders (2)	7,815	N/A	55
Total	889,248		485

(1) Includes securities available for future issuance under the 1998 Incentive Stock Option Plan.

(2) The 7,815 represents amounts actually issued to directors under the 1998 Directors Stock Award Plan. The amounts available for future awards under the 1998 Directors Stock Award Plan.

Item 6. Selected Financial Data

The following table sets forth selected consolidated financial data with respect to the Company for the periods indicated. The balance sheet and income statement data have been derived from the audited consolidated financial statements of the Company. This information should be read in conjunction with "Management's Discussion and Analysis of Financial Condition and Results of Operations" and the Company's consolidated financial statements and notes thereto included elsewhere in this Report.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

We are a specialty insurance company that provides customized insurance products and solutions to small and medium-sized businesses in industries that we believe are underserved by the standard insurance market. For twenty years, we have developed specialized insurance coverages and alternative risk transfer products not generally available to our customers in the standard insurance market because of the unique

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

characteristics of the risks involved and the associated needs of the insureds. We specialize in underwriting these products for insureds with environmental risks and construction risks as well as in developing programs for other specialty classes of risks.

During 2005, we changed our segment reporting to coincide with our strategic direction. In our segment reporting for periods prior to the year ended December 31, 2005, we segregated our business into real estate operations, insurance operations and other (which included realized gains and losses on investments and rescission expenses). We continue to segregate our business into real estate operations, insurance operations and other, but the insurance operations segment is further classified into three additional segments: excess and surplus lines, alternative risk transfer and runoff. The excess and surplus lines segment is further classified into three business lines: environmental, construction and surety. The alternative risk transfer segment is further classified into two business lines: specialty programs and fully-funded. Prior year amounts have been reclassified to conform to the current year presentation. Our real estate operations consist solely of our development of the Harbour Village property as described below under Business Harbour Village Development. See Note 10 to our consolidated financial statements for more information on our segment reporting.

The following information is presented on the basis of accounting principles generally accepted in the United States of America (GAAP) and should be read in conjunction with Business "and" Risk Factors, and our consolidated financial statements and the related notes included elsewhere in this report. All amounts and percentages are rounded.

The following table sets forth the Company's consolidated premium and total revenue information:

	<u>Year Ended December 31,</u>

Combined ratio	96.8%	102.7%	97.8%
	=====	=====	=====

Year Ended December 31, 2004 compared to Year Ended December 31, 2005

Net earnings from insurance operations increased to \$13.6 million for the year ended December 31, 2005 from \$4.3 million for the year ended December 31, 2004. Net earnings were \$14.7 million, or \$2.05 per diluted share, for the year ended December 31, 2005 as compared to \$14.8 million, or \$2.01 per diluted share, for the year ended December 31, 2004.

The following table sets forth the Company's net earnings (in thousands) for the years ended December 31, 2004 and 2005:

	<u>Year Ended</u> <u>December 31, 2004</u>	<u>Year Ended</u> <u>December 31, 2005</u>
Insurance Operations	\$4,263	\$13,618
Real Estate Operations	7,816	209
Other, including realized gains and (losses) from the sale of investments and rescission expenses	<u>2,678</u>	<u>829</u>
Net Earnings	<u>\$14,757</u>	<u>\$14,656</u>
	=====	=====

Net earnings from insurance operations for the year ended December 31, 2005 increased from 2004 as a result of improved underwriting results and increased investment income. The decrease in net earnings from real estate operations was due to the substantial completion of the Harbour Village project. In 2004, earnings from other items included a \$2.6 million payment received by the Company in settlement of an impaired note receivable. Total revenues for the year ended December 31, 2005 decreased 27.4% to \$155.9 million compared to 2004 as a result of lower real estate income. Net premiums earned for the year ended December 31, 2005 increased 1.6% to \$138.5 million from 2004 due to increased production in the Company's core business lines. Investment income increased 46.5% to \$14.3 million compared to 2004 as a result of increased invested assets of \$88.5 million. Net cash flow from operations decreased to \$70.4 million for the year ended December 31, 2005 from \$89.8 million for 2004 as a result of increased loss payments, which were anticipated as a result of the long-tail nature of the risks that the Company insures, where, with the maturity of the Company's business, loss payments are expected to continue to increase.

The Company's book value of outstanding shares increased 9.4% to \$17.54 at December 31, 2005 from \$16.04 at December 31, 2004, due primarily to the Company's continued profitability during the years offset by an unrealized loss of \$3.4 million in the Company's investment portfolio.

Net Premiums Earned

Excess and Surplus Lines

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

Environmental. Net premiums earned increased 18.4% to \$38.1 million for the year ended December 31, 2005 compared to \$32.2 million for 2004. Net premiums written increased to \$41.5 million for the year ended December 31, 2005 compared to \$35.0 million for 2004. Most of the growth in this business line for 2005 was due to an increase in online production, as well as an increase in gross premiums of \$2.4 million generated as a result of standard audits that were performed on certain expired policies in order to adjust estimated premiums to actual premiums. The Company believes that these increases were offset by a decline in the State of New York environmental contractor and consultant premiums as a result of changes implemented in its underwriting process in the State of New York, which the Company believes will improve the ultimate profitability of the environmental business line. The Company continues to experience a slight decline in premium rates from 2004 primarily in its middle-market business, which includes environmental accounts with insureds with greater than \$3.0 million in annual revenue, due to increased competition and the overall changing pricing conditions in the market place. See *Business-Our Market-Excess and Surplus Lines* for a description of these changing conditions. Premium rates in its ProStar on-line rating and quoting system (*ProStar*) business have remained stable. The Company intends to focus its efforts on expanding ProStar's capabilities and increasing its market share of insuring environmental risks of small and medium-sized businesses.

Construction. Net premiums earned increased 2.7% to \$81.9 million for the year ended December 31, 2005 compared to \$79.8 million for 2004. Net premiums written increased 0.2% to \$78.0 million for the year ended December 31, 2005 compared to \$77.9 million for 2004. During 2005, the Company had \$14.3 million of gross premiums written generated as a result of audits. Premium rates on the residential construction business have remained stable. The Company, however, has started to experience a slight decline in premium rates on its renewal book of commercial construction business due to increased competition and a general softening of pricing in the market place. The changing market conditions have resulted in a decline in the Company's renewal retention rates and new business volume. See *Business- Our Market-Excess and Surplus Lines* for a description of these changing conditions. The Company remains committed to its disciplined underwriting approach and the Company also has not broadened its policy terms and conditions. The Company intends for construction risks to be a focus of its new business efforts as it believes this area continues to offer modest growth opportunities in selected geographic areas. Effective July 1, 2005, the Company discontinued purchasing reinsurance on the primary general liability portion of this business line. The Company made this decision after performing a loss cost and dynamic financial analysis, and concluding that its reinsurance purchases were uneconomical. The Company believes retaining this exposure will enhance its financial results and returns on capital.

Surety. Surety is a contract under which an insurer guarantees certain obligations of a second party to a third party. The Company is listed as an acceptable surety on federal bonds, commonly known as a Treasury-listed or T-listed surety primarily providing contract performance and payment bonds to environmental contractors and general construction contractors in 47 states and the District of Columbia. Net premiums earned remained stable at \$1.1 million for the year ended December 31, 2005 and 2004. Net premiums written increased 14.6% to \$1.3 million for the year ended December 31, 2005 from \$1.2 million for 2004. This increase was attributable to the Company's efforts to modestly expand its surety business as a supporting product line to the environmental business line.

Alternative Risk Transfer

Specialty Programs. Net premiums earned increased 10.8% to \$18.3 million for the year ended December 31, 2005 compared to \$16.5 million for 2004. Net premiums written increased 14.1% to \$19.7 million for the year ended December 31, 2005 compared to \$17.3 million for 2004. The increase in 2005 was due primarily to premiums written from three new programs added in late 2004 and the first half of 2005. The Company had 10 active programs at the end of 2005 as compared to 15 at the end of 2004. The Company has focused its efforts on increasing its retention levels on programs, thereby allowing the Company the opportunity to increase its earnings potential from underwriting profits. The Company's focus on its specialty programs business line is on insurance programs that allow the Company to participate in underwriting profits, while also earning fee income as the policy-issuer. These increased retentions, in part, drove the increase in premiums earned in 2005. See *Business-Our Products-Alternative Risk Transfer Specialty Programs* for additional information on our programs.

Fully Funded Policies. Net premiums earned increased to \$0.9 million for the year ended December 31, 2005 as compared to \$89,000 for 2004. Net premiums written increased to \$2.0 million for the year ended December 31, 2005 as compared to \$257,000 for 2004. Fee income earned for the year ended December 31, 2005 increased to \$1.2 million from \$210,000 for 2004. The Company anticipates continued growth opportunities for this business line in the healthcare and residential construction industries, which were primary drivers for the growth mentioned above and new growth opportunities in the product manufacturing industry.

Runoff

Net premiums earned decreased to negative \$1.9 million for the year ended December 31, 2005 compared to \$6.7 million for 2004. Net premiums written decreased to negative \$2.0 million for the year ended December 31, 2005 compared to \$299,000 for 2004. The decrease in runoff net premiums earned was attributable to the Company's exit from specific business lines that did not meet its profit or production expectations. In addition, in 2005 net premiums earned and net premiums written decreased due to an accrual of \$2.0 million for reinsurance premiums on the discontinued workers compensation business, which was put into runoff in 2004 as a result of the Company's potential payment

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

of a reinstatement premium to reinstate reinsurance coverage in connection with a certain claim. See [Business-Our Products-Runoff Lines](#) for additional information about our runoff segment.

Net Investment Income

Net investment income increased 46.5% to \$14.3 million for the year ended December 31, 2005 from \$9.8 million for 2004 due to an increase in the Company's invested assets and higher investment yields. Average invested assets increased to \$371.3 million as of December 31, 2005 from \$274.7 million as of December 31, 2004, reflecting approximately \$70.4 million in cash flows from operations and \$24.4 million in net proceeds from the issuance of trust preferred securities in November 2005. The average pre-tax and after tax investment yields were 3.9% and 3.2% compared to 3.6% and 2.8% for the years ended December 31, 2005 and 2004, respectively.

Net Realized Gains

Net realized gains and losses from the sale of investments decreased to a net loss of \$54,000 for the year ended December 31, 2005 from a net gain of \$208,000 for 2004. The Company sold investments in 2005 of fixed income securities and common stock in accordance with its investment policies described under [Business-Investments](#).

Real Estate Income

Real estate income decreased to \$3.0 million for the year ended December 31, 2005 as compared to \$68.0 million in 2004. The reduction in real estate income was due to the substantial completion of the Harbour Village project. The final condominium units at Harbour Village were sold and closed in the second quarter of 2005. The Company does not expect to engage in any further real estate activities. The funds generated from Harbour Village have been invested into the Company's insurance operations. See [Business-Harbour Village Development](#) and Note 3 to the Company's consolidated financial statements for additional information regarding Harbour Village.

Losses and Loss Adjustment Expenses

For the year ended December 31, 2005, the Company's losses and loss adjustment expenses ratio decreased 7.7 percentage points to 60.9% from 68.6% primarily due to improved underwriting results. The table below sets forth the prior year reserve development made by the Company for the years ended December 31, 2004 and 2005 (in thousands):

	<u>Year Ended December 31,</u>	
	<u>2004</u>	<u>2005</u>
Excess & Surplus lines	\$ 94	\$ (754)
Environmental	7,700	2,204
Construction	<u>37</u>	<u>311</u>
Surety	7,831	1,761
Alternative Risk Transfer		
Programs	1,496	(266)
Runoff	<u>5,075</u>	<u>1,111</u>
Total	<u>\$ 14,402</u>	<u>\$2,606</u>
	=====	=====

The construction business line experienced reserve development of \$2.2 million in 2005 compared to \$7.7 million in 2004. During 2005, the Company experienced reserve development of \$1.1 million on its runoff segment compared to \$5.1 million in 2004. In 2005, the reserve development in this segment consisted of \$1.2 million relating to the excess municipality program resulting from aggregate coverage provided. Construction lines reserve development in 2005 was primarily attributable to the commutation of reinsurance contracts with a former reinsurer. This transaction resulted in the Company recognizing losses of \$1.0 million in 2005. See [Business-Losses and Loss Adjustment Expenses Reserves](#) and Note 12 to the Company's consolidated financial statements for additional information regarding the Company's reserves for unpaid losses and loss adjustment expenses.

Acquisition Expenses

Policy acquisition expenses are amounts that are paid to producers for the production of premium for the Company offset by the ceding commissions we retain from our reinsurers. For our program business, fees typically are earned through ceding commissions and have the effect of lowering our acquisition expenses. Policy acquisition expenses also include amounts paid for premium taxes to the states where we do business on an admitted basis. Policy acquisition expenses increased to \$28.5 million for the year ended December 31, 2005 from \$26.5 million for 2004. Policy acquisition expenses as a function of net premiums earned increased to 20.6% for the year ended December 31, 2005 from 19.5% for 2004, primarily due to higher earned premiums and lower 2004 acquisition expenses due to the accrual of profit commissions on reinsurance.

Real Estate Expenses

Real estate expenses associated with the Harbour Village project decreased to \$2.2 million for the year ended December 31, 2005 from \$55.5 million for 2004. In 2005, the Company received \$980,000 for settlement on roof litigation at Harbour Village. This receipt was applied as a reduction to real estate expenses as it had been expensed previously.

Payroll Expenses

Payroll expenses increased to \$12.1 million for the year ended December 31, 2005 from \$10.3 million for 2004. This increase reflects an accrual for bonuses based on the Company's performance and normal salary increases.

Other Expenses

Other expenses increased to \$13.2 million for the year ended December 31, 2005 from \$9.6 million for 2004. In 2004, the Company collected \$2.6 million as final settlement of a note receivable, which was applied as a reduction to 2004 other expenses. Absent this \$2.6 million receipt, other expenses increased \$1.0 million primarily due to the establishment of a \$1.3 million reinsurance recoverable allowance.

Rescission Litigation

In connection with the Company's 2000 acquisition of a brokerage firm and a related entity, the Company recorded a benefit of \$1.4 million in 2005 due to the reversal of an accrual. This compares to a net benefit of \$230,000 in 2004 related to the same dispute as a result of settlement of litigation. See [Legal Proceedings](#) for additional information.

Income taxes

The effective tax rate decreased to 8.7% for the year ended December 31, 2005 from 20.0% for 2004. This decrease was due primarily to the reversal of a deferred tax asset reserve of our non-subsiary affiliate American Safety Risk Retention Group, Inc. (American Safety RRG), of \$555,000. Absent this adjustment, the effective tax rate would have been 12.1% for the year ended December 31, 2005. In addition, the effective tax rate was lower due to a decrease in real estate earnings and lower taxable income on the Company's U.S. insurance subsidiaries.

Operations by Geographic Segment

The Company conducts business in the U.S. and Bermuda. Significant differences exist in the regulatory environment in each country. The table below describes the Company's operations by geographic segment for the years ended December 31, 2004 and 2005 (in thousands):

December 31, 2004	U.S.	Bermuda	Total
Income Tax	3,696	-	3,696
Net earnings	5,543	9,214	14,757
Assets	449,322	134,838	584,160

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

Equity	56,126	52,654	108,780
--------	--------	--------	---------

December 31, 2005	U.S.	Bermuda	Total
Income Tax	1,392	-	1,392
Net earnings	4,396	10,260	14,656
Assets	529,768	167,267	697,135
Equity	59,002	59,433	118,435

Net Income. Net income from Bermuda operations increased to \$10.3 million for the year ended December 31, 2005 compared to \$9.2 million for 2004. Net income from Bermuda operations increased in 2005 due to improved underwriting results in the Company's insurance operations. Net income from U.S. operations decreased to \$4.4 million for the year ended December 31, 2005 compared to \$5.5 million for 2004. This decrease is due to lower real estate income offset by improved insurance operations. U.S. insurance earnings increased by \$6.5 million to \$4.2 million at December 31, 2005 compared to a loss of \$2.3 million at December 31, 2004. Real estate income decreased to \$209,000 at December 31, 2005 compared to \$7.8 million for the same period of 2004.

Assets. Assets from Bermuda operations increased to \$167.4 million at the end of 2005 compared to \$134.8 million at the end of 2004. This increase resulted from an increase in premium writings assumed from growing U.S. operations. Assets from U.S. operations at the end of 2005 increased to \$529.7 million, compared to \$449.3 million at the end of 2004. This increase is a result of the Company issuing a trust preferred security in 2005 raising approximately \$25 million and the growth in the Company's core business lines offset by a decrease in real estate assets as the Harbour Village project is substantially complete.

Equity. Equity of the Bermuda operations increased to \$59.4 million at the end of 2005 compared to \$52.6 million at the end of 2004. This increase was largely due to higher net income offset by a stock repurchase during the second quarter of 2005 and an increase in the net unrealized losses on the Company's investment portfolio. Equity of the U.S. operations increased to \$59.0 million at the end of 2005, compared to \$56.1 million at the end of 2004. This increase was a result of higher net income offset by an increase in net unrealized losses on the Company's investment portfolio.

Year Ended December 31, 2003 compared to Year Ended December 31, 2004

Net earnings from insurance operations decreased to \$4.3 million for the year ended December 31, 2004 from \$7.1 million for the year ended December 31, 2003. Net earnings increased to \$14.8 million, or \$2.01 per diluted share, for the year ended December 31, 2004 from \$7.4 million, or \$1.42 per diluted share, for the year ended December 31, 2003.

The following table sets forth the Company's net earnings (in thousands) for the years ended December 31, 2003 and 2004:

	<u>Year Ended</u> <u>December 31, 2003</u>	<u>Year Ended</u> <u>December 31, 2004</u>
Insurance Operations	\$7,076	\$4,263
Real Estate Operations	2,218	7,816
Other, including realized gains and (losses) from sale of investments and rescission expenses	<u>(1,880)</u>	<u>2,678</u>
Net Earnings	\$7,414 =====	\$14,757 =====

Net earnings from insurance operations for the year ended December 31, 2004 include reserve development of \$14.4 million relating to prior accident years. The increase in net earnings from real estate operations was due to closings of units at Harbour Village with higher profit margins. Earnings from other items include a \$2.6 million payment received by the Company in settlement of an impaired note receivable that was written off in the fourth quarter of 2003. Total revenues for the year ended December 31, 2004 increased 22.0% to \$214.7 million compared to 2003 as a result of increased net premiums earned and real estate and investment income. Net premiums earned for the year ended December 31, 2004 increased 24.8% to \$136.4 million from 2003 due to increased production in the Company's core business lines. Net investment income increased 68.5% to \$9.8 million compared to 2003 as a result of an increase in invested assets of \$104.6 million excluding real estate. Net cash flow from operations increased to \$89.8 million for the year ended December 31, 2004 from \$80.2 million for 2003.

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

The Company's book value of outstanding shares increased 16.2% to \$16.04 at December 31, 2004 from \$13.80 at December 31, 2003, due primarily to the Company's net earnings during the year.

Net Premiums Earned

Excess and Surplus Lines

Environmental. Net premiums earned increased 43.2% to \$32.2 million for the year ended December 31, 2004 compared to \$22.4 million for 2003. Net premiums written increased 28.6% to \$35.0 million for the year ended December 31, 2004 compared to \$27.2 million for 2003. This growth was attributable primarily to growth in premiums in ProStar as well as increased business written in our middle-market offices which target environmental accounts with insureds with greater than \$3.0 million in revenue. Gross premiums written through ProStar increased 35.8% to \$12.9 million for the year ended December 31, 2004 compared to \$9.5 million for 2003.

Construction. Net premiums earned increased 39.0% to \$79.8 million for the year ended December 31, 2004 compared to \$57.4 million for 2003. Net premiums written increased 5.9% to \$77.9 million for the year ended December 31, 2004 compared to \$73.6 million for 2003. The Company continued to capitalize on market conditions, specifically, the lack of insurance capacity for certain construction risks. In addition, the Company introduced a new excess general liability coverage product in the second quarter of 2004 to meet the market need for higher limits of liability above the Company's primary policies.

Surety. Net premiums earned increased 69.8% to \$1.1 million for the year ended December 31, 2004 from \$734,000 for 2003. Net premiums written increased 59.9% to \$1.2 million for the year ended December 31, 2004 from \$670,000 for 2003. This increase was attributable to the Company's efforts to modestly expand its surety business as a supporting product line to the environmental business line. In addition, in order to capitalize on underwriting opportunities in this business line, the Company entered into a quota share reinsurance treaty during the second quarter of 2004. This treaty allowed the Company to share half of the exposures in an amount up to \$2 million per bond with the reinsurer, which allowed more premiums to be written. This reinsurance agreement has the effect of lowering the Company's premiums and losses in this business line by 50%.

Alternative Risk Transfer

Specialty Programs. Net premiums earned increased 17.4% to \$16.5 million for the year ended December 31, 2004 compared to \$14.1 million for 2003. Net premiums written increased 13.9% to \$17.3 million for the year ended December 31, 2004 compared to \$15.2 million for 2003. Prior to 2002, the Company had not retained significant portions of risk in this business line. In 2003, the Company expanded its risk position in certain programs. These increased retentions drove the increase in premiums earned. The Company also earns fee income on certain specialty program business that it writes. The Company had 15 active programs at the end of 2004 compared to 14 at the end of 2003.

Fully-Funded Policies. Net premiums earned increased to \$89,000 for the year ended December 31, 2004 as compared to \$0 for 2003. Net premiums written increased to \$257,000 for the year ended December 31, 2004 as compared to \$0 for 2003. Fee income earned for the year ended December 31, 2004 increased to \$210,000 from \$62,000 for 2003.

Runoff

Net premiums earned decreased 54.5% to \$6.7 million for the year ended December 31, 2004 compared to \$14.8 million for 2003. Net premiums written decreased 97.9% to \$208,000 for the year ended December 31, 2004 compared to \$14.8 million for 2003. The decrease in runoff premiums earned was attributable to the Company's exit from specific business lines that did not meet its profit or production expectations, such as workers' compensation.

Net Investment Income

Net investment income increased 68.5% to \$9.8 million for the year ended December 31, 2004 from \$5.8 million for 2003 due to an increase in the Company's invested assets and higher investment yields. Average invested assets increased to \$274.7 million as of December 31, 2004 from \$167.2 million as of December 31, 2003. The average pre-tax and after tax investment yields were 3.6% and 2.8% compared to 3.5% and 2.7% for the years ended December 31, 2004 and 2003, respectively.

Net Realized Gains

Net realized gains from the sale of investments decreased to \$0.2 million for the year ended December 31, 2004 from \$3.1 million for 2003. This decrease was due to the Company's decision to realize gains on fixed income securities in 2003.

Real Estate Income

Real estate income increased to \$68.0 million for the year ended December 31, 2004 compared to \$57.6 million for 2003. This revenue was generated from closings of condominium units and boat slips at the Company's Harbour Village project. We did not recognize revenue until a closing occurred and title passed to the buyer. The following chart shows the number of condominium units and boat slips that were closed each year:

	<u>2003</u>	<u>2004</u>
Condominium Units	197	203
Boat Slips	<u>17</u>	<u>4</u>
Total	214	207
	===	===

The Company had an increase in real estate income in 2004 as compared to 2003 resulting from increased closings of condominium units and higher priced unit closings at the Harbour Village project. The average sales price of condominiums closed in 2004 was \$297,000 as compared to \$275,000 in 2003.

Losses and Loss Adjustment Expenses

For the year ended December 31, 2004, the Company's losses and loss adjustment expenses ratio increased 8.4 percentage points to 68.6% from 60.2% primarily due to increase reserve development for prior years. For the year ended December 31, 2004, reserve development for prior years increased to \$14.4 million from \$5.2 million for 2003. The table below sets forth the reserve development (in thousands) made for prior years by the Company for the years ended December 31, 2003 and 2004:

	<u>Year Ended December 31,</u>	
	2003	2004
Excess & Surplus lines		
Environmental	\$ (457)	\$ 94
Construction	1,602	7,700
Surety	<u>(791)</u>	<u>37</u>
	354	7,831
Alternative Risk Transfer		
Programs	191	1,496
Runoff	<u>4,691</u>	<u>5,075</u>
Total	\$ 5,236	\$ 14,402
	=====	=====

Of this amount, \$7.7 million was attributable to certain New York contractor risks, which were significantly reduced during 2002 and 2003. In response to this development and management's concern that existing reserves for this line might be inadequate, the Company commenced an actuarial reserve evaluation of this line. Following completion of this evaluation, the Company changed actuarial reserving methodologies and recorded \$3.0 million of additional reserves for the construction line.

Acquisition Expenses

Policy acquisition expenses increased to \$26.5 million for the year ended December 31, 2004 from \$21.8 million for 2003 due to higher net premium volume. Policy acquisition expenses as a function of net premiums earned decreased to 19.5% for the year ended December 31, 2004 from 20.0% for 2003 primarily due to a shift in business mix toward business with lower acquisition costs.

Real Estate Expenses

Real estate expenses associated with the Harbour Village project increased to \$55.5 million for the year ended December 31, 2004 from \$54.0 million for 2003. The majority of real estate expenses, including construction costs, capitalized interest and commissions were recognized at the same time as revenue is recognized. General and administrative expenses were expensed as incurred.

Payroll and Other Expenses

Payroll and other expenses decreased to \$19.9 million for the year ended December 31, 2004 from \$23.7 million for 2003. Payroll expenses increased to \$10.3 million for the year ended December 31, 2004 from \$9.0 million for 2003 due to additional employees. Other expenses in 2004 included a \$2.6 million recovery related to impaired notes receivable, and other expenses in 2003 included a \$3.9 million impairment charge.

Rescission Litigation

Rescission expenses decreased to a benefit of \$230,000 in 2004 from an expense of \$255,000 in 2003. The benefit in 2004 included a \$1.8 million payment received in settlement of professional liability claims in a rescission matter relating to the Company's acquisition of a brokerage firm and a related entity. Also included in 2004 are \$1.4 million of additional expenses as a result of adverse court rulings in March 2005 in connection with the same dispute See [Legal Proceedings](#) for additional information.

Income taxes

The effective tax rate decreased to 20% for the year ended December 31, 2004 from 27% for 2003. This decrease was the result of lower taxable income in the Company's U.S. subsidiaries during 2004.

Operations by Geographic Segment

The Company conducts business in the U.S. and Bermuda. Significant differences exist in the regulatory environment in each country. The table below describes the Company's operations by geographic segment for the years ended December 31, 2003 and 2004 (in thousands):

December 31, 2003	U.S.	Bermuda	Total
Income tax	2,675	-	2,675
Net earnings	5,827	1,587	7,414
Assets	410,177	104,083	514,260
Equity	50,445	44,898	95,343
December 31, 2004	U.S.	Bermuda	Total
Income tax	3,696	-	3,696
Net earnings	5,543	9,214	14,757
Assets	449,322	134,838	584,160
Equity	56,126	52,654	108,780

Net Income. Net Income from Bermuda operations increased to \$9.2 million for the year ended December 31, 2004 compared to \$1.6 million for 2003. This increase is attributable to the Company collecting \$2.6 million as final settlement of a note receivable for which an allowance was established in 2003 and the remainder of the increase is due to growth in insurance operations. Net income from U.S. operations decreased to \$5.5 million for the year ended December 31, 2004 compared to \$5.8 million in 2003. The overall decrease in U.S. operations primarily resulted from a decrease in insurance operations resulting from adverse loss development offset by an increase in real estate income. U.S. insurance earnings decreased to a loss of \$2.3 million at December 31, 2004 compared to \$3.6 million at December 31, 2003. Real estate income increased to \$7.8 million at December 31, 2004 compared to \$2.2 million for the same period of 2003.

Assets. Assets from Bermuda operations increased to \$134.8 million at the end of 2004 compared to \$104.1 million at the end of 2003. This increase was a result of a public stock offering in 2003 and an increase in premium writings assumed from growing U.S. operations. Assets from

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

U.S. operations at the end of 2004 increased to \$449.3 million, compared to \$410.2 million at the end of 2003. This change was a result of increased premium writings as the Company has capitalized on favorable market conditions offset by a decrease in real estate assets at the end of 2004. Real estate assets decreased at the end of 2004 as the Harbour Village project neared completion.

Equity. Equity of the Bermuda operations increased to \$52.6 million at the end of 2004 compared to \$44.9 million at the end of 2003. This increase was largely due to a public stock offering in 2003 which raised \$27.2 million in new equity, higher net income and increased net unrealized gains in the Company's investment portfolio offset by a stock repurchase during the third quarter of 2004. Equity of the U.S. operations increased to \$56.1 million at the end of 2004 compared to \$50.4 million at the end of 2003. This increase was a result of higher net income and increased net unrealized gains in the Company's investment portfolio.

Liquidity and Capital Resources

The Company meets its cash requirements and finances its growth principally through cash flows generated from operations. Since 2000 the Company has operated in a hardening market with increased insurance premium rates for general liability coverages and increased fees for program business opportunities. During 2004 and 2005, the Company began to experience a leveling of premium rates due to entrance of new insurance competitors and overall market conditions. The Company's primary sources of short-term cash flow are premium writings and investment income and income from real estate development sales. Short-term cash requirements relate to claims payments, reinsurance premiums, commissions, salaries, employee benefits, real estate development expenses and other operating expenses. Due to the uncertainty regarding the timing and amount of settlements of unpaid claims, the Company's future liquidity requirements may vary; therefore, the Company has structured its investment portfolio maturities to help mitigate the variations in those factors. The Company believes its current cash flows are sufficient for the short-term needs of its business and its invested assets are sufficient for the long-term needs of its insurance business. However, the Company does expect to grow its business, in which event, it will need to raise additional capital.

Net cash provided from operations was \$70.4 million for the year ended December 31, 2005, \$89.8 million for the year ended December 31, 2004 and \$80.2 million for the year ended December 31, 2003. The decrease in cash flow from operations between 2005 and 2004 was primarily caused by increased loss payments, which increased to \$46.9 million from \$20.5 million. During 2004, the Company received \$2.6 million in final settlement of previously fully reserved notes receivable and also received \$1.8 million in settlement of professional liability claims in a rescission matter relating to the Company's acquisition of a brokerage firm and a related entity. See *Legal Proceedings* for additional information.

The Company's ability to pay future dividends to shareholders will depend, to a significant degree, on the ability of its subsidiaries to generate earnings from which to pay dividends. The jurisdictions in which the Company and its insurance and reinsurance subsidiaries are domiciled place limitations on the amount of dividends or other distributions payable by insurance companies in order to protect the solvency of insurers. Given the Company's growth and the capital requirements associated with that growth, the Company does not anticipate paying dividends on the Common Shares in the near future.

The Company substantially completed the Harbour Village project in 2005. The estimated completion cost for the remainder of Harbour Village is approximately \$1.7 million and represents amounts needed to complete construction of a beach club and manage remaining warranty claims on closed condominium units. An accrual of this amount has been established. Management believes that cash on hand at Harbour Village will meet the remaining liquidity needs of Harbour Village.

To further provide for the capital requirements associated with our current growth strategy, the Company entered into the following arrangements. In May 2003, in conjunction with American Safety Capital Trust, a non-consolidated 100%-owned subsidiary, the Company issued a 30-year trust preferred obligation in the amount of \$8.0 million. This obligation bears interest at the three-month London Interbank Offer Rate (LIBOR) plus 4.2%, is payable on a quarterly basis and may be called solely at our option after five years. In order to hedge this obligation for the first five years, the Company entered into an interest rate swap with a fixed interest rate of 7.1% for five years. In September 2003, in conjunction with American Safety Capital Trust II, a non-consolidated 100%-owned subsidiary, the Company issued a 30-year trust preferred obligation in the amount of \$5.0 million. This obligation bears interest at three-month LIBOR plus 3.95%, is payable on a quarterly basis and may be called solely at our option after five years. In order to hedge this obligation for the first five years, the Company entered into an interest rate swap with an interest rate of 7.6% for five years. In November 2003, the Company completed a secondary offering of over 2.1 million common shares whereby the Company received \$27.2 million of additional capital. Additionally, in November 2005, in conjunction with American Safety Capital Trust III, the Company issued a 30-year trust preferred obligation in the amount of \$25.0 million. This obligation bears a fixed interest rate of 8.31% for the first five years, and a floating rate of three-month LIBOR plus 3.4% thereafter. At the current time, the Company does not anticipate entering into an interest rate swap with respect to this issuance. Interest is payable on a quarterly basis and the securities may be called solely at the Company's option after five years.

Contractual Obligations

Our contractual obligations (in thousands) as of December 31, 2005 were:

	Total	Less than 1 year	1-3 Years	3-5 Years
Long term debt	\$ 37,811	\$ -	\$ -	\$ -
Interest (1)	95,062	3,026	6,155	6,471
Operating leases	1,262	661	590	11
Total Contractual Obligations	\$134,135	\$ 3,687	\$6,745	\$ 6,482

(1) The above table includes all interest payments through the expiration of interest rate swaps as discussed in Note 8 to the Company's consolidated financial statements. At that time the Company may redeem the debt or continue with variable interest payments. All amounts are reflected based on final maturity dates. Variable rate interest obligations are estimated based on current interest rates. As a result of applying current interest rates to the respective LIBOR for each capital trust, the interest rate is 9.0%, 8.8% and 8.2% for American Safety Capital Trust, American Safety Capital Trust II and American Safety Capital Trust III, respectively. These rates are used to calculate the variable interest rate obligations through maturity. Fixed rates include, where applicable, the effects of interest rate derivatives employed to manage such interest rate risk.

For these purposes routine purchase of services, including insurance, that are expected to be used in the ordinary course of the Company's business have been excluded. More information about our contractual obligations is in Note 8 to our consolidated financial statements.

Critical Accounting Policies

The accounting policies described below are those we consider critical in preparing our financial statements. These policies include significant estimates made by management using information available at the time the estimates are made. However, as described below, these estimates could change materially if different information or assumptions were used.

Investments. We routinely review our investments that have experienced declines in fair value to determine if the decline is other than temporary. These reviews are performed with consideration of the facts and circumstances of an issuer in accordance with the Securities and Exchange Commission (SEC) Staff Accounting Bulletin No. 59, Accounting for Non-Current Marketable Equity Securities; Statement of Financial Accounting Standards (SFAS) No. 115, Accounting for Certain Investments in Debt and Equity Securities; and related guidance. The identification of distressed investments, and the assessment of whether a decline is other than temporary involve significant management judgment and require evaluation of factors including but not limited to:

- |X| Percentage decline in value and the length of time during which the decline has occurred,
- |X| Recoverability of principal and interest,
- |X| Market conditions,
- |X| Ability to hold the investment to maturity,
- |X| A pattern of continuing operating losses of the issuer,
- |X| Rating agency actions that affect the issuer's credit status,
- |X| Adverse changes in the issuer's availability of production resources, revenue sources, technology,
- |X| Adverse changes in the issuer's economic, regulatory or political environment.

Reserves. Certain of our insurance policies and reinsurance assumed, including general and pollution liability policies covering environmental remediation, construction, and workers' compensation risks, may be subject to claims brought years after an incident has occurred or the policy period has ended. Claims made policies provide coverage for claims that are reported during the policy period. Occurrence form policies provide coverage for claims that occur during the policy period regardless of when they are reported. We are required by our regulators to maintain reserves to cover the unpaid portion of our ultimate liability for losses and loss adjustment expenses with respect to (i) reported claims and (ii) IBNR claims. A full actuarial analysis is performed to estimate all of our unpaid losses and loss adjustment expenses under the terms of our contracts and agreements. In evaluating whether the reserves are reasonable for unpaid losses and loss adjustment expenses, it is necessary to project future losses and loss adjustment expenses payments. It is certain that the actual future losses and loss adjustment expenses will not develop exactly as projected and may, in fact, vary significantly from the projections. If the net loss reserves were to increase by 5% this would reduce pre-tax income by \$11.7 million. If the net loss reserves were to decrease by 5% this would increase pre-tax income by \$11.7 million.

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

With respect to reported claims, reserves are established on a case-by-case basis. The reserve amounts on each reported claim are determined by taking into account the circumstances surrounding each claim and policy provisions relating to the type of loss. Loss reserves are reviewed on a regular basis, and as new information becomes available, appropriate adjustments are made to reserves.

In establishing reserves, we employ several methods in determining our ultimate losses: (i) the expected loss ratio method; (ii) the loss development method based on paid and reported losses; and (iii) the Bornhuetter-Ferguson method based on expected loss ratios, paid losses and reported losses. The expected loss ratio method incorporates industry expected losses which are adjusted for our historical loss experience. The loss development method relies on industry payment and reporting patterns to develop our estimated losses. The Bornhuetter-Ferguson method is a combination of the other two methods, using expected loss ratios to produce expected losses, then applying loss payment and reporting patterns to our expected losses to produce our expected IBNR losses. We review the ultimate projections from all three methods and, based on the merits of each method, determine our estimated ultimate losses.

In response to the reserve development experienced in the first two quarters of 2004 in our excess and surplus lines segment and management's concern that existing reserves for this segment might be inadequate, we commenced an actuarial reserve evaluation. This evaluation analyzed reserves by specific risk categories within our excess and surplus lines segment, such as general liability for building owners and California contractors in addition to analyzing by a single risk category for the entire excess and surplus lines segment. The results of the specific risk analysis were then compared to the single risk analysis in determining the final carried reserves. The establishment of appropriate loss reserves is an inherently uncertain process, and there can be no assurance our ultimate liabilities will not materially exceed our reserves. For more information on our reserves, see Business Losses and Loss Adjustment Expenses Reserves .

Reinsurance. Ceded unearned premiums and reinsurance balances recoverable on paid and unpaid losses and settlement expenses are reported separately as assets, instead of being netted with the related liabilities, since reinsurance does not relieve us of our legal liability to our policyholders.

We continuously monitor the financial condition of our reinsurers. Our policy is to periodically charge to earnings, in the form of an allowance, an estimate of unrecoverable amounts from troubled or insolvent reinsurers. We believe that current reserve levels for uncollectible reinsurance are sufficient to cover our exposures.

Policy acquisition costs. We defer commissions and premium taxes that are related to the acquisition of insurance contracts. These costs are capitalized and charged to expense in proportion to premium revenue recognized. The method followed in computing deferred policy acquisition costs limits the amount of such deferred costs to their estimated realizable value. This would also give effect to the premiums to be earned and anticipated losses and settlement expenses as well as certain other costs expected to be incurred as the premiums are earned. Judgments as to the ultimate recoverability of such deferred costs are highly dependent upon estimated future loss costs associated with the premiums written.

Deferred Income Taxes. We are required to establish a valuation allowance for the portion of any deferred tax asset, that we believe will not be realized. The majority of our deferred tax assets associated with the Harbour Village project were realized in 2005. The majority of our deferred taxes associated with our premium writings will be realized over the policy period and payout of related claims. We believe it is more likely than not that we will realize the full benefit of our deferred tax assets; therefore no valuation allowance has been established. See Note 6 to the Company's consolidated financial statements for additional information on deferred tax assets.

Recognition of Premium Income. General liability premiums are estimated based upon the annual revenues of the underlying insureds. Additional or return premiums are recognized for differences between provisional premiums billed and estimated ultimate general liability premiums due when the final audit is complete after the policy has expired. General liability, surety, commercial auto, other commercial lines and workers' compensation premiums are recorded ratably over the policy period with unearned premium calculated on a pro rata basis over the lives of the underlying coverages.

Income Taxes

We are incorporated under the laws of Bermuda and, under current Bermuda law, are not obligated to pay any taxes in Bermuda based upon income or capital gains. We have received an undertaking from the Minister of Finance in Bermuda pursuant to the provisions of the Tax Protection Act, which exempts us and our shareholders, other than shareholders ordinarily resident in Bermuda, from any Bermuda taxes computed on profits, income or any capital asset, gain or appreciation, or any tax in the nature of estate, duty or inheritance until March 28, 2016. Exclusive of our U.S. subsidiaries, we do not consider ourselves to be engaged in a trade or business in the U.S. and accordingly do not expect to be subject to direct U.S. income taxation. Our U.S. subsidiaries are subject to taxation in the U.S.

Impact of Inflation

Property and casualty insurance premiums are established before the amounts of losses and loss adjustment expenses are known and therefore before the extent by which inflation may affect these expenses is known. Consequently, we attempt, in establishing our premiums, to anticipate the potential impact of inflation. However, for competitive and regulatory reasons, we may be limited in raising premiums consistent with anticipated inflation, in which event we, rather than our insureds, would absorb inflation costs. Inflation also affects the rate of investment return on our investment portfolio with a corresponding effect on our investment income.

Combined Ratio

The combined ratio of an insurance company measures only the underwriting results of insurance operations and not the profitability of the overall company. Our reported combined ratio for our insurance operations may not provide an accurate indication of our overall profitability. For instance, depending on our mix of business, the combined ratio may fluctuate from time to time and may not reflect the overall profitability of our insurance operations.

Variable Interest Entities (VIE)

In January 2003, the Financial Accounting Standards Board (the FASB) issued FASB Interpretation No. 46 (FIN 46). This interpretation requires the consolidation of entities in which an enterprise absorbs a majority of the entity's expected losses, receives a majority of the expected residual gains, or both, as a result of ownership, contractual or other financial interests in the entity. In December 2003, the FASB issued a revised version of FIN 46, FIN 46(R), which finalized the accounting guidance for VIE. As a result of adopting FIN 46(R), the Company consolidated its non-subsidiary affiliate American Safety RRG and deconsolidated its trust subsidiaries American Safety Capital Trust, American Safety Capital Trust II and American Safety Capital Trust III.

Off-Balance Sheet Arrangements

The Company has guaranteed a \$2 million letter of credit to the State of Vermont on behalf of American Safety RRG, its non-subsidiary affiliate. This letter of credit served as initial capitalization of American Safety RRG and may be drawn upon in the event of the insolvency of American Safety RRG.

Forward Looking Statements

This report contains forward-looking statements. These forward-looking statements reflect the Company's current views with respect to future events and financial performance, including insurance market conditions, premium growth, acquisitions and new products and the Harbour Village real estate development project. Forward-looking statements involve risks and uncertainties which may cause actual results to differ materially, including competitive conditions in the insurance industry, levels of new and renewal insurance business, developments in loss trends, adequacy and changes in loss reserves and actuarial assumptions, timing or collectibility of reinsurance recoverables, market acceptance of new coverages and enhancements, changes in reinsurance costs and availability, potential adverse decisions in court and arbitration proceedings, the integration and other challenges attendant to acquisitions, and changes in levels of general business activity and economic conditions. For additional factors, which could influence the Company's operating and financial performance, see the Company's filings with the Securities and Exchange Commission.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Market risk is the risk of economic losses due to adverse changes in the estimated fair value of a financial instrument as the result of changes in equity prices, interest rates, foreign exchange rates and commodity prices. Our consolidated balance sheets include assets whose estimated fair values are subject to market risk. The primary market risks to us are interest rate and credit risk associated with our investments. We have no direct commodity or foreign exchange risk as of December 31, 2005. The estimated fair value of our investment portfolio at December 31, 2005 was \$415.5 million, of which 93.9% was invested in fixed maturities and short-term investments and 6.1% was invested in equities.

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

Interest Rate Risk. Our fixed rate holdings are invested predominantly in high quality corporate, government and municipal bonds with relatively short durations. The fixed rate portfolio is exposed to interest rate fluctuations; assuming all other factors remain constant as interest rates rise, their fair values decline and as interest rates fall, their fair values rise. The changes in the fair market value of the fixed rate portfolio are presented as a component of shareholders' equity in accumulated other comprehensive income, net of taxes.

We work to manage the impact of interest rate fluctuations on our fixed rate portfolio. The effective duration of the fixed rate portfolio is managed with consideration given to the estimated payout timing of our liabilities. We have investment policies which limit the maximum duration and maturity of individual securities within the portfolio and set target levels for average duration and maturity of the entire portfolio. For additional information on our investments and investment policies, see Business Investments.

The table below summarizes our interest rate risk and shows the effect of hypothetical changes in interest rates as of December 31, 2005. The selected hypothetical changes do not indicate what would be the potential best or worst case scenarios (dollars in thousands):

	Estimated Fair Value at December 31, 2005	Hypothetical Change in Interest Rate (bp=basis points)	Estimated Fair Value after Hypothetical Change in Interest Rate	Pe	Sh
Total Fixed Maturity Investments (including short-term investments)	\$390,183	200bp decrease	\$413,843		
		100bp decrease	399,811		
		100bp increase	369,338		
		200bp increase	353,779		

Interest rate risk related to our loans payable to American Safety Capital Trust and American Safety Capital Trust II, two of our non-consolidated 100% owned subsidiaries, is hedged for the first five years of the debt obligations through the use of interest rate swaps. We have not hedged the interest rate risk related to our loan payable to American Safety Capital Trust III.

Credit Risk. We invest primarily in the debt securities markets, which exposes us to credit risk. Credit risk is a consequence of extending credit and/or carrying investment positions. We require that all securities be rated investment grade at the time of purchase. We use specific criteria to judge the credit quality and liquidity of our investments and use a variety of credit rating services to monitor these criteria. For additional information on our investments and our investment criteria, see Business-Investments. The Company's market rate risk has not changed materially since December 31, 2005.

Item 8. Financial Statements and Supplementary Data

The Company's consolidated financial statements required under this Item 8 are included as part of Item 15 of this report.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

On July 26, 2004 the Company dismissed KPMG LLP (KPMG) as the principal accountant to audit the Company's financial statements. The decision to change accountants was approved by the Audit Committee of the Board of Directors of the Company.

KPMG's audit report on the Company's consolidated financial statements as of and for the fiscal year ended December 31, 2003 did not contain an adverse opinion or disclaimer of opinion nor was that report qualified or modified as to uncertainty, audit scope, or accounting principles.

In connection with the audit of the fiscal year ended December 31, 2003 and the subsequent interim period through July 26, 2004, there were no disagreements with KPMG on any matter of accounting principles or practices, financial statement disclosure, or auditing scope of procedure that, if not resolved to KPMG's satisfaction, would have caused KPMG to make reference to the subject matter of the disagreement in connection with its report. During the fiscal year ended December 31, 2003, and the subsequent interim period, the Company has had no reportable events as defined in Item 304(a)(1)(v) of Regulation S-K under the Securities Act of 1933, as amended (the Securities Act).

BDO Seidman, LLP was engaged by the Company as its new principal accountants to audit the Company's financial statements, and began such engagement in auditing the Company's financial statements for the year ended December 31, 2004.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

As of December 31, 2005, an evaluation of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) was carried out on behalf of American Safety Insurance Holdings, Ltd., and its subsidiaries by our management with the participation of our Chief Executive Officer and Chief Financial Officer. Based upon the evaluation, management concluded that these disclosure controls and procedures were effective as of December 31, 2005. In addition, during the fourth quarter of our year ended December 31, 2005, no change in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) occurred that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Changes in Internal Controls

There were no changes in our internal controls over financial reporting that occurred during our last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

None.

PART III

Item 10. Directors and Executive Officers of the Registrant

The information required by this Item 10. regarding directors and executive officers of the Company will be set forth in the Company's 2006 Proxy Statement which will be filed with the Securities and Exchange Commission pursuant to applicable regulations, and is hereby incorporated by this reference. Additional information required by this Item 10. with respect to executive officers is set forth in Item 4. of this Report.

The information set forth in the second paragraph of Item 1. of this Report is incorporated herein by reference. The code of business conduct and ethics referenced therein applies to our principal executive officers, principal financial officer, principal and senior accounting officers or controller, or persons performing similar functions.

Item 11. Executive Compensation

The information required by this Item 11. regarding executive compensation will be set forth in the Company's 2006 Proxy Statement which will be filed with the Securities and Exchange Commission pursuant to applicable regulations, and is hereby incorporated by this reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by this Item 12. regarding security ownership of certain beneficial owners and management of the Company will be set forth in the Company's 2006 Proxy Statement which will be filed with the Securities and Exchange Commission pursuant to applicable regulations, and is hereby incorporated by this reference.

Item 13. Certain Relationships and Related Transactions

The information required by this Item 13. regarding certain relationships and related transactions of the Company will be set forth in the Company's 2006 Proxy Statement which will be filed with the Securities and Exchange Commission pursuant to applicable regulations, and is hereby incorporated by this reference.

Item 14. Principal Accountant Fees and Services

The information required by this Item 14. regarding principal accountant fees and services will be set forth in the Company's 2006 Proxy Statement which will be filed with the Securities and Exchange Commission pursuant to applicable regulations, and is hereby incorporated by reference.

PART IV

Item 15. Exhibits and Financial Statements Schedules.

(a) Financial Statements Schedules, and Exhibits 1. Financial Statements

The following is a list of financial statements, together with Reports thereon, filed as part of this Report:

Report of BDO Seidman, LLP Independent Registered Public Accounting Firm

Report of KPMG LLP Independent Registered Public Accounting Firm

Consolidated Balance Sheets at December 31, 2004 and 2005

- Consolidated Statements of Operations for the Years Ended December 31, 2003, 2004 and 2005 - Consolidated Statements of Shareholders' Equity for the Years Ended December 31, 2003, 2004 and 2005 - Consolidated Statements of Cash Flow for the Years Ended December 31, 2003, 2004 and 2005 - Consolidated Statements of Comprehensive Earnings for the Years Ended December 31, 2003, 2004 and 2005

Notes to Consolidated Financial Statements

Selected Quarterly Financial Data

2. Financial Statement Schedules and Exhibits

The following is a list of financial statement schedules and exhibits filed

Schedule/Exhibit Number

- Schedule II - Condensed Financial Statements
(Parent only)
- Schedule III -Supplemental Information
- Schedule IV - Reinsurance

Other schedules have been omitted as they are not applicable to the Company, or the required information has been included in the financial statements and related notes.

3. Exhibits

The following is a list of exhibits required to be filed as part of this Report:

<u>Exhibit Number</u>	<u>Title</u>

Consolidated Financial Statements

December 31, 2004 and 2005

With Independent Auditors Report Thereon

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors
American Safety Insurance Holdings, Ltd.

We have audited the accompanying consolidated balance sheets of American Safety Insurance Holdings, Ltd and subsidiaries as of December 31, 2004 and 2005 and the related consolidated statements of operations, shareholders' equity, cash flows and comprehensive income for the years then ended. We have also audited Schedules II, III, and IV as of and for the period ended December 31, 2004 and 2005. These consolidated financial statements and schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and schedules based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal controls over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of American Safety Insurance Holdings, Ltd. and subsidiaries at December 31, 2004 and 2005, and the results of its operations and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, the related schedules present fairly, in all material respects, the information set forth therein.

/s/ BDO Seidman, LLP

Atlanta, Georgia

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders
American Safety Insurance Holdings, Ltd.

We have audited the accompanying consolidated statements of operations, shareholders' equity, cash flows, and comprehensive income of American Safety Insurance Holdings, Ltd. and subsidiaries for the year ended December 31, 2003. In connection with our audit of the consolidated financial statements, we also have audited financial statement schedules II, III, and IV for the year ended December 31, 2003. These consolidated financial statements and schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and schedules based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the results of operations and the cash flows of American Safety Insurance Holdings, Ltd. and subsidiaries for the year ended December 31, 2003, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedules, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

AMERICAN SAFETY INSURANCE HOLDINGS, LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

December 31, 2004 and 2005

(1) Summary of Significant Accounting Policies

(a) Basis of Presentation

The accompanying consolidated financial statements of American Safety Insurance Holdings Ltd. and its subsidiaries and American Safety Risk Retention Group Inc. ("American Safety Risk Retention Group" collectively, the "Company") are prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"). The preparation of financial statements requires management to make estimates, based on the best information available, in recording certain assets and liabilities and operations. The balance sheet amounts that involve a greater extent of accounting estimates and determinations subject to future changes are the Company's invested assets, deferred income taxes, and provisions for unpaid losses and loss adjustment expenses. As additional information becomes available (where not determinable), the recorded estimates may be revised and reflected in operating results. If these estimates are adequate, such estimates may change in the future.

(b) Description of Common Stock - Voting and Ownership Rights

The authorized share capital of the Company is 20 million shares, consisting of 15 million common shares per share ("Common Shares"), and 5 million preferred shares, par value \$.01 per share. All Shares are validly issued, fully paid, and non-assessable. There are no provisions in the Company's Bye-Laws which impose any limitations on the rights of shareholders to hold or vote on Shares, other than shareholders not being residents of Bermuda. Holders of Common Shares are entitled to one vote per share and as declared by the Board of Directors out of funds legally available therefore.

Each holder of Common Shares is entitled to one vote per share on all matters to be voted on by the shareholders, subject to the 9.5% voting limitation described below. All matters to be voted upon at any duly held shareholders meeting shall be authorized by a majority of the votes of the shareholders represented in person or by proxy, except (i) approval of a merger, consolidation, sale, lease, or exchange of all or substantially all of the assets of the Company, and (ii) amendments to the provisions of the Bye-Laws, which each require the approval of at least 66-2/3% of the votes of the holders of a majority of the Common Shares (in addition to any regulatory or court approvals). The Common Shares have non-cumulative voting rights. The holders of a majority of the Common Shares may elect all of the directors of the Company, and the holders of the remaining shares will not be able to elect any directors.

The Bye-Laws contain certain provisions that limit the voting rights that may be exercised by the holders of Common Shares. The Bye-Laws provide that each holder of Common Shares is entitled to one vote per share, except that if, and so long as, the shares owned by such person constitute 9.5% or more of the issued and outstanding Common Shares, the voting rights of such person shall be limited, in the aggregate, to 9.5% of the votes of the holders of Common Shares. The voting rights of Frederick C. Treadway or Treadway Associates, L.P., an affiliate of the Company, shall be limited, in the aggregate, to 9.5% of the votes of the holders of Common Shares. "Controlled Shares" mean (i) all shares of the Company directly, indirectly, or beneficially owned by such person and (ii) all shares of the Company directly, indirectly, or beneficially owned by any person or group of persons of Section 13(d) of the Exchange Act (including any shares owned by a group of persons that would otherwise be excluded by the provisions of Section 13(d)(6) of the Exchange Act), if, and so long as, any person directly, indirectly, or constructively owns or controls more than 9.5% of the total number of votes exercisable in respect of all shares of the Company, the voting rights attributable to such shares will be limited, in the aggregate, to 9.5% of the votes of the holders of Common Shares.

No holder of Common Shares of the Company shall, by reason only of such holder's ownership of such shares, be entitled to any additional issue of shares of any class or series nor to any security conversion rights.

(c) Principles of Consolidation

The consolidated financial statements include the accounts of American Safety company, American Safety Reinsurance, Ltd. ("American Safety Re"), American Safety licensed Bermuda insurance companies, American Safety Holdings Corp. ("American Safety Holdings"), American Safety Risk Retention Group, Inc. ("American Safety Risk Retention Group"), American Safety Holdings in turn wholly owns American Safety Casualty ("American Safety Casualty"), a property and casualty insurance company, American Safety Services ("American Safety Services"), an underwriting and administrative subsidiary, Ponce Lighthouse Property Services ("Ponce Lighthouse Property Services"), a property and casualty insurance company of the Harbour Village project, and Rivermar Contracting Company ("Rivermar Contracting Company"), a property and casualty insurance company of the Harbour Village project. American Safety Casualty wholly owns American Safety Casualty Excess and Surplus Lines Insurance Company. ASI Services wholly owns the American Safety Financial Services, Inc. ("Sureco"), a bonding agency; Environmental Claims Services, Inc. ("Environmental Claims Services"), a financial services subsidiary; and American Safety as a purchasing group for the placement of business with American Safety Casualty.

In accordance with FASB Interpretation No. 46 (FIN 46), Consolidation of Variable Interest Entities, and FASB Interpretation No. 46 Revised (FIN 46R), the accompanying financial statements consider the Company's status as VIE and the Company's status as the primary beneficiary of the trusts established for the equity holders of American Safety RRG. The accompanying financial statements also consider the status of American Safety Capital Trust, American Safety Capital Trust II and American Safety Capital Trust III, "American Safety Capital II" and "American Safety Capital III", and American Safety Variable Interest Special Purpose Entities of the Company's status as not being consolidated. American Safety Capital, American Safety Capital II and American Safety Capital III are accounted for as investments.

All significant intercompany balances have been eliminated, as appropriate, in consolidation.

(d) Business Environment

The following is a description of certain risks facing the Company and its subsidiaries:

Legal/Regulatory Risk is the risk that changes in the legal or regulatory environment create additional expenses not anticipated by the insurer in pricing its products. That is, regulatory initiatives designed to reduce insurance industry in which the insurer operates, new legal theories or insurance company assessments, may create costs for the insurer beyond those recorded in the financial statements. The Company mitigates this risk by actively writing insurance business in several states, the geographic area.

The Potential Risk of United States Taxation of Bermuda Operations. Under current law, American Safety is required to pay any taxes in Bermuda on either income or capital gains. American Safety has obtained a ruling from the Minister of Finance in Bermuda that will exempt American Safety from tax on any such taxes being imposed. Whether a foreign corporation is engaged in a trade or business in the United States depends upon the level of activities in the United States. If the activities of a foreign company are "continuous, regular, and consistent" with a trade or business, the company is deemed to be engaged in a United States trade or business. Due to the fact that American Safety maintains an office in Bermuda and American Safety's, American Safety Re's and American Safety Services' reinsuring contracts via treaty reinsurance agreements, which are all signed by American Safety, American Safety does not consider itself to be engaged in a trade or business in the United States. American Safety expects to be subject to United States income taxes. This position is consistent with the position of other entities that have similar operational structures as American Safety.

However, because the Internal Revenue Code of 1986, as amended, the Treasury Regulations do not definitively identify activities that constitute being engaged in a United States trade or business, the factual nature of the determination, there can be no assurance that the Internal Revenue Code will not require American Safety or its Bermuda insurance subsidiary are engaged in a United States trade or business. American Safety or its Bermuda insurance subsidiaries are considered to be engaged in a United States trade or business if it would be subject to (i) United States Federal income tax on its taxable income in the United States at graduated rates and (ii) the 30 percent branch profits tax on its connected earnings and profits deemed repatriated from the United States. Certain subsidiaries are however subject to U.S. Federal and state income tax, as they are domiciled and conduct business in the United States.

Credit Risk is the risk that issuers of securities owned by the insurer or secured

other parties, including reinsurers that have obligations to the insurer, will not attempt to mitigate this risk by adhering to a conservative investment strategy, by obtaining reinsurance obligations and by maintaining sound reinsurance, credit and collection policies.

Interest Rate Risk is the risk that interest rates will change and cause a decline in the value of investments. The Company attempts to mitigate this risk by attempting to match the duration of its investments with expected payouts of its liabilities.

(e) Investments

Fixed maturity securities for which the Company has the positive intent and ability to hold them to maturity are classified as "held to maturity" and are reported at amortized cost. Fixed maturity and equity securities that are not held to maturity and are not principally for the purpose of selling them in the near term are classified as "trading" and are reported at fair value with unrealized gains and losses included in earnings. Fixed maturity and equity securities that are not held to maturity or trading are classified as "available for sale" and are reported at fair value with unrealized gains and losses (net of deferred taxes) charged or credited as a component of accumulated other comprehensive income.

While it is the Company's intent to hold fixed maturity securities until the end of their term, the Company may sell such securities in response to, among other things, market conditions or changes in interest rate fluctuations. At December 31, 2004 and 2005, the Company considered all of its fixed maturity securities available-for-sale.

Investment income is recorded as earned on the accrual basis and includes amortization of discounts using the interest method. Realized gains or losses on disposal of investments are recorded on an identification basis and are included in revenues. Investments in real estate are reported at fair value plus capitalized development costs. Premiums and discounts arising from the sale of fixed maturity securities are treated as yield adjustments over their estimated lives.

The Company's portfolio managers routinely monitor and evaluate the difference between the carrying amount of investments and fair value. Additionally, credit analysis and/or credit rating issues related to investments are subject to intensive monitoring to determine if a decline in market value is other than temporary. If the market value falls below cost, the process includes evaluating the length of time and the extent of the decline, the prospects and financial condition of the issuer, and evaluation for a potential recovery. Other factors include the extent to which the decline can be controlled, and interest rate risk, which cannot be controlled. If the market value exceeds its market value solely due to changes in interest rates, impairment is not recognized. If, after monitoring and analysis, the Company believes that a decline in fair value is other than temporary, the amortized cost of the security and reports a realized loss in the consolidated statement of income.

(f) Recognition of Premium Income

General liability premiums are estimated based upon the annual revenues of the policy. Return premiums are recognized for differences between provisional premiums based on estimates and actual liability premiums due when the final audit is complete after the policy has expired. Commercial auto, other commercial lines and workers' compensation premiums are recognized as earned with unearned premium calculated on a pro rata basis over the lives of the underlying policies.

(g) Deferred Policy Acquisition Costs

The costs of acquiring business, primarily commissions and premium tax expenses, are recognized as incurred (recoverable from future premium income) and amortized to earnings in relation to the revenue earned. If necessary, investment income is considered in the determination of the recoverable amount of deferred policy acquisition costs. Deferred revenue results when reinsurance ceding commissions received exceed the amortized cost of direct and assumed business.

An analysis of deferred policy acquisition costs follows:

	Years ended December 31,	
	2003	2004
	-----	-----

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

Balance, beginning of period	\$ 8,550,919	\$ 11,960,495
Acquisition costs deferred	25,227,293	26,127,411
Costs amortized during the period	(21,817,717)	(26,528,721)
	-----	-----
Balance, end of period	\$ 11,960,495	\$11,559,185
	=====	=====

(h) Unpaid Losses and Loss Adjustment Expenses

The Company provides a liability for unpaid losses and loss adjustment expenses based on reported claims and estimates for incurred but not reported losses. Because of the ultimate liability for losses and loss adjustment expenses to be determined for each year, the Company has limited experience upon which to base an estimate of the ultimate liability. Management has established loss and loss adjustment expense reserves based on actual losses and loss adjustment expenses utilizing a combination of both industry and company patterns, as appropriate. One primary set of actuarial methods utilized, Bornhuetter-Vogel, is an initial expected loss ratio based upon gross ultimate losses from prior accidents. The ultimate losses expected to be reported and unreported, and adding the actual reported losses to derive the indicated ultimate losses. However, the net amounts that the Company's liability may be more or less than the estimated amounts provided.

(i) Income Taxes

For subsidiaries subject to taxation, deferred tax assets and liabilities are recorded based on amounts attributable to differences between the financial statement carrying amounts of assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates to taxable income in the years in which those temporary differences are expected to reverse. Changes in deferred tax assets and liabilities of a change in tax rates is recognized in the period of enactment date.

(j) Reinsurance

Reinsurance contracts do not relieve the Company from its obligation to policyholders. If reinsurers' obligations could result in losses to the Company. The Company evaluates the financial strength of reinsurers and monitors concentration of credit risk to minimize its exposure to reinsurer insolvencies. Reinsurance recoverables on unpaid losses and prepaid reinsurance premiums are due from reinsurers for unpaid losses and unearned ceded reinsurance premiums, respectively.

(k) Goodwill and Intangibles

The Company adopted SFAS 142 on January 1, 2002. Under SFAS 142, goodwill and intangible assets are no longer amortized but are reviewed annually (or more frequently if impairment indicators are present). Upon adoption, the Company amortized goodwill over a 20 year period. Separable intangible assets with an indefinite life will continue to be amortized over their useful lives (but with no amortization if the useful life is indefinite).

At December 31, 2004 and 2005, the Company had \$1,467,000 of goodwill.

In accordance with the disclosure requirements of SFAS 142 goodwill and intangible assets are included in net income for the years ended December 31, 2003, 2004 and 2005 respectively.

(l) Net Earnings Per Share

Basic earnings per share and diluted earnings per share are computed by dividing net income by the number of shares outstanding for the period (basic EPS) plus dilutive shares subject to conversion.

Earnings per share are as follows:

2003

2004

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

Weighted average shares outstanding	5,105,770	6,863,61
Shares attributable to stock options	<u>127,946</u>	<u>479,26</u>
Weighted average common and common equivalents	5,233,716	7,342,87
	=====	=====
Earnings per share:		
Basic	\$ 1.45	\$ 2.15
Diluted	\$ 1.42	\$ 2.01

(m) Employee Stock Options

At December 31, 2005, the Company had an employee stock option plan, which is Company applies the recognition and measurement principles of APB Opinion No. Employees, and related interpretations in accounting to the plan. No compensation as all options granted under the stock option plan have an exercise price equal common stock on the date of grant. The majority of options in the plan vest ev following table illustrates the effect on net earnings and earnings per share, provisions of SFAS No. 123R Accounting for Share Based Payments had been applied.

	Year Ending December 31,	
	<u>2003</u>	<u>2004</u>
	(In thousands, except per share amount)	
Net earnings		
As reported	\$ 7,414	\$ 14,757

Pro forma net earnings	7,226	14,558
	=====	=====
Net earnings per share:		
Basic - as reported	1.45	2.15
Basic - pro forma	1.42	2.12
Diluted - as reported	1.42	2.01
Diluted - pro forma	1.40	1.98

(n) Accounting Pronouncements

During the last two years, the Financial Accounting Standard Board (FASB) pronouncements with various effective dates.

In December 2004, the FASB issued a revised version of SFAS 123, SFAS 123 (R), Sh the accounting for stock options. The statement requires that compensation relat be recognized in the financial statements. The cost will be measured based on t instrument issued. The Company plans to adopt SFAS 123 (R) in the first quarter of

In November 2005, the FASB issued Staff Position Number FAS 115-1, The Meaning of Its Application to Certain Investments (FSP 115-1). FSP 115-1 addresses the determ considered impaired, whether that impairment is other than temporary, and the meas also includes accounting considerations subsequent to the recognition of an other- requires certain disclosures about unrealized losses that have not been recognized The guidance in FSP 115-1 amends FASB Statement No. 115, Accounting for Certain In Securities, and was effective January 1, 2006.

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

(o) Revenue Recognition of Real Estate

The Company recognizes revenue from the sale of real estate when the title to each unit passes to the purchaser. When the title passes, the Company uses a percentage of completed actual costs to total estimated costs (including allocated common costs that the Company recognizes revenue. The revenue recognized relates only to units and boat slips that are sold in paragraph 37 for SFAS 66, Accounting for Sales of Real Estate. The actual and estimated costs are allocated to each individual unit or boat slip. The difference between total sales and costs is set up as deferred revenue and is recognized as the additional costs of each unit sold herein for more information regarding the Company's real estate operations.

(p) Capitalizing Costs on Real Estate

The Company capitalizes the following costs with respect to real estate: (a) project design and planning costs, and construction costs, all of which are directly associated with the project; (b) insurance incurred during the planning, design and construction periods; (c) cost of transfer to an owner's association at no charge when the project is complete); (d) interest on construction loans until the assets are ready for their intended use; and (e) indirect costs of construction.

(q) Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, money market instruments and other investments with a maturity of 90 days or less when purchased.

(r) Derivatives

The Company has limited activity with derivative financial instruments. They are not used for trading purposes. The Company engage in leveraged derivative transactions. At December 31, 2005, the Company had interest rate swap contracts related to certain of its trust preferred obligations. The Company reports unrealized gain or loss on these interest rate swaps as interest rates change.

(s) Reclassifications

Certain items in the prior periods' financial statements have been reclassified to conform with the 2005 the Company changed its segment presentation, see Note 10.

(2) Investments

Net investment income is summarized as follows:

	<u>Years ended December</u>	
	<u>2003</u>	<u>2004</u>
Fixed maturities	\$ 5,735,889	\$ 9,695,600
Common stock securities	12,264	195,000
Preferred stock securities	-	-
Short-term investments and cash	<u>337,367</u>	<u>298,300</u>
	6,085,520	10,188,900
Less investment expenses	<u>284,984</u>	<u>416,200</u>
Net investment income	\$5,800,536	\$9,772,700
	=====	=====

Realized and unrealized gains and losses were as follows:

	<u>Years ended December</u>	
	<u>2003</u>	<u>2004</u>

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

Realized gains:		
Fixed maturities	\$ 3,125,760	\$ 182,3
Common stock securities	<u>57,806</u>	<u>118,9</u>
Total gains	<u>3,183,566</u>	<u>301,2</u>
Realized losses:		
Fixed maturities	(36,756)	(66,9
Common stock securities	<u>(6,903)</u>	<u>(26,1</u>
Total losses	<u>(43,659)</u>	<u>(93,1</u>
Net realized gains (losses)	\$ 3,139,907	\$ 208,
Changes in unrealized gains (losses):		
Fixed maturities	\$ (2,493,177)	\$ (758,8
Common stock securities	173,806	905,6
Preferred stock securities	<u>-</u>	<u>-</u>
Net change in unrealized gains (losses)	\$ (2,319,371)	\$ 146,

At December 31, 2004 and 2005, the Company did not hold fixed-maturity securities, which individually exceeded 10% of shareholders' equity, except U.S. government, and government agency securities.

The amortized cost and estimated fair values of investments at December 31, 2004 and 2005 are as follows:

	Amortized Cost	Gross unrealized gains	Gross unrealized losses
	=====	=====	=====
<u>December 31, 2004</u>			
Fixed maturities:			
U.S. Treasury securities and obligations of U.S. Government corporations and agencies	\$ 65,887,315	\$ 800,811	\$ 467,383

Bonds with an amortized cost of \$24,206,791 and \$34,405,204 were on deposit with insurance regulatory authorities at December 31, 2004 and 2005 in accordance with statutory requirements.

The fair value of the investments in debt securities can fluctuate greatly as a result of changes in interest rates. The Company believes that the declines in fair value noted below primarily resulted from changes in interest rates rather than credit issues.

Therefore, the Company has no concern regarding the ultimate collectibility of the security value, and accordingly, has not recorded any impairment write-down. The tables below show the securities the Company is holding which have been held at a loss for less than 12 months and greater than 12 months at December 31, 2004 and December 31, 2005 respectively.

(3) Investment in Real Estate

The Company's investment in real estate is known as Harbour Village Golf and Yacht Club, 100 acres of property in Ponce Inlet, Florida that was acquired in foreclosure during April 1999. The Company evaluated the carrying value of its investment in real estate by comparing the fair value of the real estate to the value of the underlying loan and accrued interest. As the book value of the loan and accrued interest exceeded the value of the collateral, no loss was recognized on foreclosure and the book balance of the loan and accrued interest was written down to the real estate.

The Harbour Village project is substantially complete as all units are sold and the Company will not engage in any further real estate activities. No additional revenue from Harbour Village is expected and the expenses for the project associated with legal, insurance and other matters are being accrued.

(4) Financial Instruments

The carrying amounts for short-term investments, cash, premiums receivable, commissions receivable, ceded premiums payable, funds held, collateral held and accounts payable and accrued expenses are reported at the short-term nature of these instruments.

Estimated fair values for fixed maturities were provided by outside consultants using market makers or estimates of fair values obtained from yield data relating to the characteristics of the securities.

(5) Reinsurance

Excess and Surplus Lines

Environmental

The Company has excess of loss reinsurance treaties with various reinsurers for the environmental business. These treaties provide varying levels of reinsurance protection depending on the policy that was written.

Construction

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

The Company previously had excess of loss treaties with various reinsurers for the Company. These treaties provide varying levels of reinsurance protection depending on the date the policy was written.

Effective July 1, 2005, the Company discontinued purchasing excess of loss reinsurance on its business. The Company made this decision after performing a loss cost and dynamic financial model. Our reinsurance purchases were uneconomical. The Company believes that retaining this excess percentage of premiums to the reinsurance market will enhance our balance sheet.

Surety

For our surety business, we entered into a quota share reinsurance treaty during the year ended December 31, 2004 for a single bond limit not to exceed \$3.0 million, subject to a maximum of 50% participation. We retain a 50% participation in this treaty with the balance reinsured by unaffiliated reinsurers.

Alternative Risk Transfer

Specialty Programs

The Company's specialty programs business division buys various forms of reinsurance on both a direct and assumed loss basis. These treaties cover the majority of risks written by the Company in its specialty programs. Collateral is obtained from the reinsurers to secure their obligations.

Runoff

Workers' Compensation

The Company has excess of loss treaties with various reinsurers. These treaties provide varying levels of reinsurance protection depending on the date the underlying insurance policy was written.

The approximate effects of reinsurance on the financial statement accounts listed below are:

	2003	Years ended December 2004
		(In thousands)

(6) Income Taxes

Total income tax expense for the years ended December 31, 2003, 2004 and 2005 was allocated

	<u>2003</u>	<u>2004</u>
Tax expense attributable to:		
income from continuing operations	\$ 2,675,375	\$ 3,695,950
Unrealized gain on hedging transactions	32,624	27,851
Unrealized gain (losses) on securities available-for-sale	<u>(663,297)</u>	<u>38,082</u>
Total	\$ 2,044,702	\$3,761,883
	=====	=====

U.S. Federal and state income tax expense (benefit) from continuing operations consists of

	<u>2003</u>	<u>2004</u>	<u>2005</u>
Current	\$ 6,323,726	\$ 2,300,361	\$ 3,695,950
Deferred	(3,648,351)	1,395,589	(2,000,000)
Total	2,675,375	3,695,950	1,695,950

The state income tax components aggregated \$213,718, \$677,840 and \$307,485 for the years ended December 31, 2003, 2004 and 2005, respectively.

Income tax expense from continuing operations for the years ended December 31, 2003, 2004 and 2005 differed from the amount computed by applying the U.S. Federal income tax rate of 34% to earnings before Federal income taxes as a result of the following:

	<u>2003</u>	<u>2004</u>
Expected income tax	\$ 3,430,527	\$ 6,273,527
Foreign earned income not subject to direct taxation	(540,000)	(3,132,000)
Valuation allowance	-	-
State taxes and other	<u>(215,152)</u>	<u>554,000</u>
Total income tax	\$ 2,675,375	\$ 3,695,950
	=====	=====

Deferred income taxes are based upon temporary differences between the financial statement and tax bases of assets and liabilities. The following deferred taxes are recorded:

2004

Deferred tax assets:	
Loss reserve discounting	\$ 7,565,625
Unearned premium reserves	3,145,646
Difference between tax and GAAP basis of Harbour Village project	366,348
Difference between tax and GAAP method of Harbour Village project	146,738
Warranty reserve	282,556
Unrealized loss on securities	—
Other	<u>611,443</u>
Gross deferred tax assets	12,118,356
Valuation allowance	<u>(554,515)</u>
Gross deferred tax assets after valuation allowance	11,563,841
Deferred tax liabilities:	
Deferred acquisition costs	2,033,536
Unrealized gain on securities	288,062
NOL Carryforward	(88,443)
Other	<u>249,696</u>
Gross deferred tax liabilities	<u>2,482,851</u>
Net deferred tax assets	\$9,080,990 =====

The Company believes it is more likely than not that it will realize the full benefit of the valuation allowance has not been established against these assets. However, given the Safety RRG (RRG), it had established a 100% valuation allowance on its net deferred tax assets changed due to RRG's profitability. This reduction in income tax expense interest expense and had no overall effect on the earnings or shareholders' equity of the

(7) Insurance Accounting

The consolidated financial statements have been prepared in conformity with GAAP which Company, American Safety Casualty, American Safety Indemnity and American Safety RRG, prescribed or permitted by regulatory authorities. Statutory accounting practices in general administrative rules, as well as a variety of publications of the National Association of Insurance Commissioners ("NAIC"). In its March 1998 meeting, the NAIC membership adopted the Codification of Statutory Accounting Principles (the "Codification") as the NAIC-supported basis of accounting. The Codification was issued by the NAIC commissioner discretion in determining appropriate statutory accounting for insurers. The Codification will continue to allow prescribed or permitted accounting practices that may differ from state

The maximum amount of dividends the Company's insurance subsidiaries can pay out with respect to the subsidiaries' domicile state insurance commissioners, is limited to the greater of 10% of net income, excluding realized capital gains of the preceding year. Dividends are also limited to surplus.

The National Association of Insurance Commissioners (the "NAIC") has established risk-based capital requirements to help state regulators monitor the financial strength and stability of property and casualty insurance companies that may be inadequately capitalized. Under the NAIC's requirements, each company must maintain a risk-based capital ratio above a calculated threshold or take corrective measures to achieve the threshold. The risk-based capital ratio is based on a formula that takes into account the amount of risk each company faces on its products. The formula takes into consideration four major areas of risk: (i) asset risk which primarily focuses on the quality of the insurance risk which encompasses coverage-related issues and anticipated frequency and severity of claims; (ii) designing insurance coverages; (iii) interest rate risk which involves asset/liability matching; and (iv) business risks.

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

American Safety Casualty, American Safety Indemnity and American Safety RRG have determined that their capital and surplus is in excess of threshold requirements.

The Bermuda Insurance Act of 1978 and related regulations (the "Act") requires America margin. American Safety Re's statutory capital and surplus as of December 31, 2003, 2004 and \$38,586,734, respectively, and the amounts required to be maintained by the Comp \$12,868,524, respectively. American Safety Assurance, Ltd (ASA) capital and surplus \$44,646 and \$1,480,424 respectively. ASA is required to maintain a minimum of \$120,000 liquidity ratio must be maintained whereby relevant assets, as defined by the Act, mus Once these requirements have been met, there is no restriction on the remaining retained e

(8) Loans Payable

Trust Preferred Offerings

During 2003 American Safety Capital and American Safety Capital II, both non-consolidat Company, issued \$8 million and \$5 million, respectively, of variable rate 30-year trust being used by the Company to support the growth of its insurance business. The securi quarterly basis calculated at a floating rate of LIBOR + 4.2% and LIBOR + 3.95% for Ameri Capital II, respectively. The securities can be redeemed by the Company commencing issuance.

During 2005, the American Safety Capital Trust III a non-consolidated wholly-owned subsidia trust preferred obligation in the amount of \$25 million. This obligation bears a fixed int five years and LIBOR plus 3.4% thereafter. Interest is payable on a quarterly basis and the Company's option in five years.

The underlying debt obligations between the Company and American Safety Capital and Company to variability in interest payments due to changes in interest rates. Management these trust preferred offerings to manage that variability. Under each interest rate interest payments and makes fixed interest rate payments to the applicable capital trust long-term debt. The overall effective fixed rate expense as a result of this hedge is 7.1 and American Safety Capital II, respectively, over the first five years of the obligation.

Interest expense for the twelve months ended December 31, 2004 and December 31, 2005 interest rate swaps. Changes in fair value of the interest rate swaps designated as hedg cash flow associated with a floating rate, long-term debt obligation are reported in accu The gross unrealized gains and (losses) on the interest rate swaps at December 31, 200 and \$347,481 for American Safety Capital and \$(14,724) and \$141,742 for American Safety Ca rate swaps are 100% effective at December 31, 2005.

Other Borrowings

The Company has trust preferred's payable totaling \$37,810,099 that mature after 2010.

(9) Related Party and Affiliate Transactions

ASI Services, American Safety's underwriting and administrative services subsidiary, le is owned by certain directors, officers and shareholders of the Company. The lease com August 31, 2007. The Company paid rent of \$533,093 and \$512,666 in 2005 and 2004, respect

(10) Segment Information

The Company initially segregates its business into the following segments: Real Estate Op Other. The Insurance Operations segment is further classified into three additional lines Alternative Risk Transfer (ART), and Runoff lines. The E&S lines is then further classifi business: Environmental Specialty (Env.), Construction (Const.), and Surety. ART is then reportable lines of business: Specialty Programs (Programs) and Fully Funded (FF).

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

Real estate consists of the Harbour Village project in Ponce Inlet, Florida as discussed in

In our E&S line, Environmental Specialty writes insurance coverages for the environmental provides commercial casualty insurance coverages, generally in the area of construction and payment and performance bonds to the environmental remediation industry.

In our ART line, Specialty Programs facilitates the offering of insurance to homogeneous n provides a mechanism for insureds to post collateral and self-insure their risks. We are p transaction.

The Other segment consists of amounts associated with realized gains and losses on investm

The Company measures all segments using net income, total assets and total equity. segments are measured by net premiums earned, incurred losses and loss adjustment expen are not allocated to the Reportable Insurance Operations segments. The following table for years ended December 31, 2003, December 31, 2004 and December 31, 2005 (in thousands):

Incurred related to:		
Current year	60,598	79,101
Prior years	5,236	14,402
Total incurred	65,834	93,503
Paid related to:		
Current year	2,490	2,567
Prior years	17,922	21,939
Total paid	20,412	24,506

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

Net unpaid loss and loss adjustment expenses, December 31	115,043	184,040
Reinsurance recoverable on unpaid loss and loss adjustment expenses, December 31	115,061	137,583
	-----	-----
Unpaid loss and loss adjustment expenses, December 31	\$ 230,104	\$ 321,623
	=====	=====

The reserve development for prior years for 2003, 2004 and 2005 occurred in the following

	<u>Year Ended December 31,</u>		
	<u>2003</u>	<u>2004</u>	<u>2005</u>
	(In thousands)		
Excess and Surplus Lines	\$ (457)	\$ 94	\$ (754)
Environmental	1,602	7,700	2,204
Construction	<u>(791)</u>	<u>37</u>	<u>311</u>
Surety	354	7,831	1,761
Alternative Risk Transfer Programs	191	1,496	(266)
Runoff	<u>4,691</u>	<u>5,075</u>	<u>1,111</u>
Total	\$ 5,236	\$ 14,402	\$ 2,606
	=====	=====	=====

Construction line reserve development in 2005 for prior years was primarily attributable to the commutation of reinsurance contracts with a former reinsurer. This transaction resulted in the Company recognizing losses of \$1.0 million. In 2005, the runoff lines reserve development for prior years was due to \$1.2 million of increases in reserves on the Company's excess municipality program. Construction line reserve development in 2004 was attributable to developing losses on (i) certain New York contractor risks written in 2001 and (ii) a change in actuarial reserving methodologies to reflect risk categories. Exposure to New York contractor risks was significantly reduced during 2002 and 2003.

Management continually attempts to improve its loss estimation process by refining its ability to analyze loss development patterns, claims payments and other information, but many reasons remain for potential adverse development of estimated ultimate liabilities. For example, the uncertainties inherent in the loss estimation process have become increasingly subject to changes in legal trends. In recent years, this trend has expanded the liability of insureds, established new liabilities and reinterpreted contracts to provide unanticipated coverage long after the related policies were written. Such changes from past experience significantly affect the ability of insurers to estimate the liabilities for unpaid losses and related expenses.

Management recognizes the higher variability associated with certain exposures and books of business and considers this factor when establishing liabilities for losses. Management currently believes the Company's gross and net liabilities are adequate.

The net liabilities for losses and loss adjustment expenses maintained by the Company's insurance subsidiaries are equal under both statutory accounting practices and GAAP.

(13) Stock Options

The Company's stock option plan grants incentive stock options to employees. The options have a term of 10 years. The exercise price is equal to the fair market value at the date of grant. The majority of our options generally vest over three years. At December 31, 2005, 430,627 shares were available for future grants.

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

The intrinsic value method is used to value stock options in accordance with APB No. 25. Under this method, we do not recognize compensation cost for stock options provided the option price equals fair market value at the date of grant. Under the terms of the stock option plan, the exercise price is equal to the fair market value at the date of grant.

The following table shows the stock option activity for the Company during 2003, 2004 and 2005.

	<u>Option Shares</u>	<u>Weighted average exercise price</u>
Outstanding at December 31, 2002	958,350	\$ 8.34

=====	=====	=====	=====		=====

For the pro-forma information presented in Note 1(m), the fair value of each option granted during 2003, 2004 and 2005 was estimated on the date of grant using the Black-Scholes multiple option approach with the following assumptions: dividend yield of 0.0% in 2003, 2004 and 2005, respectively; expected volatility of 41.80%, 41.33% and 39.29% in 2003, 2004 and 2005, respectively; risk-free interest rate of 3.5% for 2003 through 2005 and expected life from the grant dates ranging from 0.50 years to 10.00 years.

The Company expects to grant additional awards in future years. The Company granted options in 2003, 2004 and 2005 at an amount deemed to be fair market value at the date of grant. See Note 1(m) for more information.

(14) Litigation

The Company, through its subsidiaries, is routinely a party to pending or threatened the normal course of its business. Based upon information presently available, in view to the Company's subsidiaries, management does not believe that any pending or threatened will have any material adverse effect on the Company's financial condition or operational matters.

Acquisition Rescission Litigation. In April 2000, the Company filed a lawsuit in the U. District of Georgia for damages and, alternatively, to rescind the stock purchase of a Mid related insurance companies specializing in insurance program business based upon the sell and warranties made in the definitive agreements concerning the business affairs and financial companies. This case and related litigation were settled in December 2005 with the release of stock and cash of \$355,000 payable to the various defendants.

Assumed Reinsurance Litigation. The Company is a defendant in several cases, liquidation collectively identified as the "National Warranty" issue. American Safety Reinsurance was a reinsurance treaty with National Warranty Risk Retention Group ("National Warranty") that coverage to automobile dealerships and other providers that became obligors pursuant to excess they sold to consumers. National Warranty filed for liquidation in the Cayman Islands (the This liquidation had a cascading effect, including the subsequent filing of bankruptcy by contracts insured by National Warranty. As a result, there are potentially over one million are not being honored by the obligors.

The liquidators of National Warranty have made claims in excess of \$24 million pursuant by American Safety Reinsurance to National Warranty. In addition, purchasers of vehicle service against American Safety Reinsurance, including a claim by one purchaser group for \$10 million by sellers/obligors of the vehicle service contracts who were insured by National Warranty class action, although the Company is appealing that determination. The Company continues Reinsurance has valid defenses to the claims including, among others, that it had commuted treaties, its liability is limited to the amount of coverage provided under the policies and make claims directly against it.

Donald Griggs et al. v. American Safety Reinsurance, Ltd. Et al., Case No 2003-31509, Circuit Volusia County, Florida. Seven plaintiffs filed suit against the Company and three of its \$2,100,000 loan made by the plaintiffs in 1986 to Ponce Marina, Inc., the former owner of plaintiffs claimed that the Company was responsible for the repayment of the loan, with four theories of liability and the court granted judgment for the Company on three of the entered judgment on August 10, 2005 against the Company for \$3,426,703, which includes interest court held that the Company, as a condition of its loan, required the former owner to demand actions as to their loan, to their detriment and to the benefit of the Company, and thus, quasi-contract with the plaintiffs to repay their loan with interest.

Edgar Filing: AMERICAN SAFETY INSURANCE HOLDINGS LTD - Form 10-K

The Company filed an appeal in December 2005. Based on the merits of the case and the Company has not established an accrual for the decision.

Dick Sizemore v. American Safety Insurance Services, Inc. Et al., Case No 2005-31704, Circuit Florida. ASI Services, its parents and a number of its affiliates are defendants in a suit contends that defendants are liable to him for a debt owed to him by ASI Services' former Herman McMurray, in the amount of \$400,000 plus interest and costs. The plaintiff also in for the case on these claims. On January 27, 2006, the trial court dismissed the case. The an amended complaint on or before March 6, 2006. The plaintiff filed an amended complaint theories of recovery. The Company continues to vigorously defend this case, as it believe

Taber v. Boroweic v. American Safety Casualty Insurance Company This case arises out of against two lawyers ("the Boroweics") for legal malpractice who were insured by American S ("American Safety Casualty") under a lawyer's professional liability program underwritten Casualty's program manager Professional Coverage Managers, Inc. During the adjustment of issued a reservation of rights letter, denied the claim based on a coverage issue, rejecte intervened into the underlying suit.

The Babers and Boroweics eventually entered into a "Morris Agreement" wherein the Babers against the Boroweics. Rather, the Boroweics assigned their bad faith rights against Amer The court found this to be reasonable and also found that the Babers, as a result of the a damages. The Babers sued American Safety Casualty for bad faith. This case was settled o \$5.5 million.

American Safety Casualty is billing reinsurers under a 90/10 Quota Share treaty with a \$ has a Clash Cover treaty with a \$5.0 million limit, and anticipates \$1.3 million of the lo was recorded in 2005.
