Section 2. Financial Information

Item 2.02. Results of Operations and Financial Condition.

On March 4, 2019, State Auto Financial Corporation (the "Company") issued a press release reporting that it was revising previously disclosed financial information related to accounting for its pension and postretirement benefits (the "Release"). As described in the Release, the Company had been pooling the net liabilities and the unrecognized actuarial gains and losses along with prior service costs recorded in accumulated other comprehensive income for pension and postretirement benefits to affiliated companies pursuant to a quota share reinsurance agreement or pooling agreement. However, the Company and its auditors have determined that such pooling is not appropriate for these items. The full text of the Release is furnished as Exhibit 99.1 to this Current Report on Form 8-K.

The Release included two non-GAAP financial measures, net income (loss) from operations per diluted share and adjusted book value per share. The Company uses net income (loss) from operations because it believes this calculation better indicates the Company's operating performance than GAAP net income (loss) in that net income (loss) from operations excludes the sometimes volatile investment gains/losses, net of applicable federal income taxes, that can produce inconsistent results. In addition, the Company uses adjusted book value per share because it believes this calculation is informative to the Company's management and investors.

Net income (loss) from operations differs from GAAP net income (loss) only by the exclusion of net investment gain (loss), net of applicable taxes, on investment activity for the periods being reported. For the three-month periods ended December 31, 2018 and 2017, GAAP net loss was \$(0.57) and \$(0.33) per diluted share, respectively, while net income from operations was \$0.67 per diluted share and net loss from operations was \$(0.65) per diluted share for the same respective periods. For the three-month periods ended December 31, 2018 and 2017, net investment (loss) gain, net of applicable taxes, impacted GAAP net (loss) income per diluted share by \$(1.25) and \$0.32, respectively. For the fiscal years ended December 31, 2018 and 2017, GAAP net income was \$0.29 per diluted share while net loss was \$(0.42) per diluted share, respectively, while net income from operations was \$1.06 per diluted share and net loss from operations was \$(1.43) per diluted share for the same respective periods. For the fiscal years ended December 31, 2018 and 2017, net investment (loss) gain, net of applicable taxes, impacted GAAP net income (loss) per diluted share by \$(0.91) and \$1.01, respectively.

Adjusted book value per share differs from GAAP book value per share only by the exclusion of accumulated other comprehensive (loss) income, net of applicable taxes, for the periods being reported. This amounted to a decrease of \$2.23 per share and increase of \$0.09 per share for the years ended December 31, 2018 and 2017.
