OVERVIEW

LETTER TO SHAREHOLDERS February 20, 2002

Dear Shareholder,

Last year's market uncertainty continued into the early days of 2002, reinforcing the importance of a long-term investment strategy. While it is impossible to predict the market's ups and downs, we at Van Kampen are hopeful the year will be filled with peace and prosperity.

With a legacy that spans nearly four generations, Van Kampen has helped investors pursue their goals through social, political and economic change. In the face of challenges and uncertainty, our core investment philosophy has been tested and, we believe affirmed. Whether you're new to the Van Kampen family or revisiting your investment strategy, we encourage you to focus on two fundamental investing principles:

SEEK FINANCIAL ADVICE BEFORE YOU INVEST. Your financial advisor can help you develop a tailored investment strategy based on several factors, including your

age, family status and goals. While no portfolio is immune to volatility, your advisor can help you structure a portfolio designed to address your long-term financial goals.

EXAMINE YOUR PORTFOLIO AND MODERATE YOUR INVESTMENT RISK--DIVERSIFY. Consider including a variety of stock and fixed-income funds in your portfolio, which may improve your long-term performance.

We are grateful for your continued trust in Van Kampen and appreciate the opportunity to manage your assets. In the new year, we hope you and your loved ones enjoy life's true wealth—family, friends and life's daily pleasures.

Sincerely,

[SIG]
Richard F. Powers, III
President and CEO
Van Kampen Investment Advisory Corp.

ECONOMIC SNAPSHOT

THE ECONOMY AND INTEREST RATES

JANUARY 2002 WAS A MONTH MARKED BY SURPRISES. PROMISING CHANGES IN THE RATE OF UNEMPLOYMENT, MANUFACTURING AND RETAIL SALES LED SOME ANALYSTS TO BELIEVE A POSSIBLE RECOVERY WAS NEAR. CONSUMER SPENDING, WHICH DRIVES TWO-THIRDS OF U.S. ECONOMIC GROWTH, CONTINUED TO TREND HIGHER--DESPITE EARLIER PREDICTIONS. ALSO IN JANUARY, CONSUMER CONFIDENCE ROSE FOR THE SECOND-STRAIGHT MONTH, WHILE INFLATIONARY PRICE PRESSURES REMAINED SUBDUED.

IN CONTRAST, THESE POSITIVE DEVELOPMENTS WERE TEMPERED BY A NUMBER OF OTHER DEVELOPMENTS:

- FEDERAL RESERVE BOARD (THE FED) CHAIRMAN, ALAN GREENSPAN, STATED THAT SUSTAINED RISKS ARE OFTEN PRESENT AT THE START OF A RECOVERY.
- THE GROWING CORPORATE ACCOUNTING SCANDAL IN THE U.S.--AND THE QUESTIONS IT RAISED IN THE INVESTMENT COMMUNITY WORLDWIDE.
- THE POLITICAL AND ECONOMIC FALLOUT STEMMING FROM INCREASED VIOLENCE ABROAD.

SO AS THE MONTH DREW TO A CLOSE, MANY MARKET OBSERVERS WERE SURPRISED WHEN THE BUREAU OF LABOR STATISTICS REPORTED THAT GROSS DOMESTIC PRODUCT (GDP)—THE PRIMARY MEASURE OF ECONOMIC GROWTH—HAD GROWN 1.4 PERCENT DURING THE FOURTH QUARTER OF 2001. PRIOR TO THE REPORT, MOST HAD EXPECTED THE GDP DATA TO REFLECT A SHRINKING ECONOMY.

ON THE HEELS OF THIS BETTER-THAN-ANTICIPATED ECONOMIC NEWS, THE FED ENDED ITS RATE-CUTTING CAMPAIGN AND DID NOT CHANGE INTEREST RATES. THE 11 RATE REDUCTIONS MADE DURING 2001 HAD BROUGHT THE FEDERAL FUNDS RATE TO 1.75 PERCENT--A 40-YEAR LOW.

PERFORMANCE SUMMARY

RETURN HIGHLIGHTS

(as of January 31, 2002)

	MARKET (1)	NAV (2)
TOTAL RETURNS		
Six-month total return	-5.51%	-0.21%
One-year total return	-5.90%	2.07%
Life-of-Trust average annual total return	-0.81%	2.49%
Commencement date		06/24/98
DISTRIBUTION RATE		
Distribution rate as a % of closing common share market price(3)		6.95%
SHARE VALUATIONS		
Net asset value		\$8.21
Closing common share market price		\$7.08
Six-month high common share market price (08/01/01)		\$7.83
Six-month low common share market price (09/21/01)		\$6.51

4

- (1) Total return based on market assumes an investment at the common share market price at the beginning of the period indicated, reinvestment of all distributions for the period in accordance with the Trust's dividend reinvestment plan, and sale of all shares at the closing common share market price at the end of the period indicated.
- (2) Total return based on net asset value (NAV) assumes an investment at the beginning of the period indicated, reinvestment of all distributions for the period, and sale of all shares at the end of the period, all at NAV.
- (3) Distribution rate represents the monthly annualized distributions of the

Trust at the end of the period and not the earnings of the Trust.

Past performance is no guarantee of future results. Investment return, common share market price and net asset value will fluctuate and Trust shares, when sold, may be worth more or less than their original cost. An investment in the Trust is subject to investment risks, and you could lose money on your investment in the Trust. As a result of recent market activity, current performance may vary from the figures shown. For more up-to-date information, please visit vankampen.com or speak with your financial advisor.

Market forecasts provided in this report may not necessarily come to pass.

Q&A WITH YOUR PORTFOLIO MANAGER

WE RECENTLY SPOKE WITH THE PORTFOLIO MANAGER OF THE VAN KAMPEN SENIOR INCOME TRUST ABOUT THE KEY EVENTS AND ECONOMIC FORCES THAT SHAPED THE MARKETS AND INFLUENCED THE TRUST'S RETURN DURING THE SIX MONTHS ENDING JANUARY 31, 2002. HOWARD TIFFEN, PORTFOLIO MANAGER, HAS MANAGED THE TRUST SINCE 1999 AND BRINGS MORE THAN 30 YEARS OF GLOBAL AND DOMESTIC INVESTMENT EXPERIENCE TO VAN KAMPEN'S SENIOR LOAN MANAGEMENT TEAM. THE FOLLOWING DISCUSSION REFLECTS HIS VIEWS ON THE TRUST'S PERFORMANCE.

- Q HOW WOULD YOU CHARACTERIZE THE

 MARKET ENVIRONMENT IN WHICH THE TRUST OPERATED IN THE LAST SIX MONTHS, AND
 HOW DID THE TRUST PERFORM IN THAT ENVIRONMENT?
- A The dominant factor in the market over the bulk of the period was the slowing U.S. economy. The tragic events of September 11 made a bad economic situation worse. Business activity came to a standstill nationwide and across industries, and the travel sector was especially hard hit. Employment, which had been weak to begin with, fell sharply as companies announced layoffs as part of a general move to cut costs to address a markedly weaker future. For the third quarter of 2001, gross domestic product (GDP) fell by 1.3 percent, its largest decline since recession of the early 1990s. In the fourth quarter, however, GDP showed improvement with 1.4 percent growth.

The Federal Reserve Bank (the "Fed") responded to this economic weakness decisively. The group initiated a string of interest rate cuts in January of 2001 that continued through the end of the year. The bond market reacted favorably to the interest rate cuts through October 2001. Rates fell across the yield curve, with the most dramatic declines happening on the short end of the yield curve, which is the most responsive to changes in monetary policy. This shift steepened the curve significantly as short and intermediate—term paper rallied strongly. That trend only strengthened in the wake of September 11 as investors flocked to the perceived safety of shorter—duration, lower—risk assets.

The market shifted in early November, as confidence seemed to slowly return to the investor psyche. The better tone resulted from a combination of a stabilization in geopolitical events and a growing belief that the economy was likely to turn positive in the first half of 2002.

The market for senior secured loans continued to be challenging in this environment. As we have noted in previous reports, corporate America has suffered a sort of rolling recession $\frac{1}{2}$

that has affected a string of sectors since mid-1999. Energy was the weak sector at the beginning of that rolling recession because of weak oil prices, followed by healthcare when regulatory changes led to cash flow challenges. The next to be hit was the auto sector, followed by technology and telecommunications. Most recently, the gaming and leisure sectors suffered over travel concerns stemming from the events of September 11. Most of these sectors remained mired in credit weakness, though as 2001 unfolded, energy and healthcare had shown signs of recovery.

In the secondary market, liquidity suffered during much of the period under review. This was a particular issue in the weeks following September 11, though we saw a steady, gradual improvement in liquidity and prices in the months after.

The unprecedented 11 Federal funds rate cuts last year had a direct and dramatic impact on short-term borrowing rates. Because the lending rates charged on the senior loans in which the trust invests are tied to these short-term rates, the ongoing reductions put significant downward pressure on the portfolio's dividend throughout the reporting period. The trust's dividend of \$0.041 per share translates to a distribution rate of 6.95 percent, based on the trust's closing common share market price on January 31, 2002.

For the six months through January 31, 2002, the trust produced a total return of -5.51 percent based on common share market price. This reflects a decrease in market price from \$7.79 per share on July 31, 2001, to \$7.08 per share on January 31, 2002. As of January 31, 2002, approximately 99 percent of the trust's senior loan assets had been priced using independent pricing services. Past performance is no guarantee of future results. As a result of recent market activity, current performance may vary from the figures shown. The return above does not reflect the deduction of taxes that a shareholder would pay on trust distributions or the redemption of trust shares. Investment return and principal value will fluctuate and trust shares, when sold, may be worth more or less than their original cost. For more up-to-date information, please visit vankampen.com or speak with your financial advisor. For additional performance results, please refer to the chart and footnotes on page 4.

- Q HOW DID THESE FACTORS AFFECT THE WAY YOU MANAGED THE TRUST?
- A Given the difficulties faced by so many sectors in recent years, we instituted a policy several quarters ago that we continued through the period. The main component of this policy has been a progressive diversification of the portfolio in order to attempt to reduce the potential risk of exposure to any one troubled issuer or sector. We have achieved this through a combination of purchases on the primary market as well as purchases and sales on the secondary market.

As a result of this policy of diversification, we believe we entered the period well-positioned to weather further weakness in the market as credit weakness rotated through various

9

sectors. We were comfortable maintaining what we felt to be appropriate exposure to most sectors because of the trust's diversification.

We have also maintained our long-term outlook for the asset class, which we believe is best viewed over a three-to five-year time horizon. This outlook has led us to avoid short-term judgments and trend-following. Instead, we have adhered to our process of searching out those companies that we believe will be best positioned to pay off their debt. The companies we favor generally feature

strong cash flow as well as talented management. The slower economy over the reporting period only highlighted the need to remain vigilant about these factors, as investors seemed to increasingly turn to this method of thinking about the market.

Q WHAT IS YOUR OUTLOOK FOR THE MARKET?

A We are optimistic that the U.S.

government's monetary and fiscal stimuli could start to have an effect in the second half of 2002. Unlike previous recent recoveries, however, we believe that this one will largely be driven by growth in public spending. If this does occur, then areas like defense and healthcare could outperform relative to private areas such as telecommunications that are still suffering from overcapacity. In this scenario, credit quality should begin to show improvement in the second half of the year as the economy strengthens, consumers begin to rebuild confidence and jobs start to be won back again. As spending power increases, the market for consumer durables may begin to show strength again. That combined with continued progress in profitability, should, in our opinion, improve debt service capabilities and therefore credit quality.

Historically, the equity market has usually been the first to turnaround in a recovery, generally followed by the bond market. It usually has taken another three to six months for improvement to be seen in corporate balance sheets, at which point the senior secured asset class typically begins to rally. As a result, it would appear that the asset class may be headed for better times in the coming year. Just when those might come, however, remains to be seen. In the interim, we will continue to keep the portfolio diversified and will search for issuers that meet our credit quality and debt servicing requirements.

10

GLOSSARY OF TERMS

A HELPFUL GUIDE TO SOME OF THE COMMON TERMS YOU'RE LIKELY TO SEE IN THIS REPORT AND OTHER FINANCIAL PUBLICATIONS.

FEDERAL RESERVE BOARD (THE FED): The governing body of the Federal Reserve System, which is the central bank of the United States. Its policy-making committee, called the Federal Open Market Committee, meets at least eight times a year to establish monetary policy and monitor the economic pulse of the United States.

GROSS DOMESTIC PRODUCT (GDP): The total market value of all finished goods and services produced in a country in a given year.

NET ASSET VALUE (NAV): The value of a trust share, calculated by deducting a trust's liabilities from the total assets applicable to common shareholders in its portfolio and dividing this amount by the number of common shares outstanding.

SECONDARY MARKET: A market where securities are traded after they are initially offered.

SECTOR: A group of securities that are similar with respect to industry, maturity, credit rating, or coupon.

SENIOR LOANS: Loans or other debt securities that are given preference to junior securities of the borrower. In the event of bankruptcy, payments to holders of senior loan obligations are given priority over payments to holders of subordinated debt, as well as shareholders of preferred and common stock. Senior

loans may share priority status with other senior securities of the borrower, and such status is not a guarantee that monies to which the investor is entitled will be paid.

YIELD CURVE: The pattern that results from viewing the yields of U.S. Treasury securities maturing in 1, 5, 10, and 30 years. When grouped together and graphed, a pattern of increasing yield is often reflected as the time to maturity extends. This pattern creates an upward sloping "curve." A "flat" yield curve represents little difference between short— and long-term interest rates, while a "negative" yield curve represents decreasing yields as the time to maturity extends.

11

A FOCUS ON SENIOR LOANS

The Senior Income Trust invests primarily in senior collateralized loans to corporations, partnerships, and other business entities that operate in a variety of industries and geographic locations. Senior loans have a number of characteristics that, in the opinion of the trust's management team, are important to the integrity of the trust's portfolio. These include:

SENIOR STANDING

With respect to interest payments, senior loans generally have priority over other classes of loans, preferred stock, or common stocks, though they may have equal status with other securities of the borrower. This status is not a guarantee, however, that monies to which the trust is entitled will be paid. If they are not fully paid, it potentially could have a negative effect on the trust's net asset value.

COLLATERAL BACKING

Senior loans are often secured by collateral that has been pledged by the borrower under the terms of a loan agreement. Forms of collateral include trademarks, accounts receivable or inventory, buildings, real estate, franchises, and common and preferred stock in subsidiaries and affiliates. Under certain circumstances, collateral might not be entirely sufficient to satisfy the borrower's obligations in the event of nonpayment of scheduled interest or principal, and in some instances may be difficult to liquidate on a timely basis.

Additionally, a decline in the value of the collateral could cause the loan to become substantially undersecured, and circumstances could arise (such as bankruptcy of a borrower) that could cause the trust's security interest in the loan's collateral to be invalidated. This could potentially have a negative effect on the trust's net asset value.

CREDIT QUALITY

Many senior loans carry provisions designed to protect the lender in certain circumstances. In addition, the variable-rate nature of the portfolio is expected to lessen the fluctuation in the trust's net asset value. However, the net asset value will still be subject to the influence of changes in the real or perceived credit quality of the loans in which the trust invests. This may occur, for example, in the event of a sudden or extreme increase in prevailing interest rates, a default in a loan in which the trust holds an interest, or a substantial deterioration in the borrower's creditworthiness. From time to time, the trust's net asset value may be more or less than at the time of the investment.

SPECIAL CONSIDERATIONS

Under normal market conditions, the trust may invest up to 20 percent of its assets in senior loans that are not secured by any specific collateral. In addition, the trust may invest in senior loans made to non-U.S. borrowers, although these loans must be U.S.-dollar denominated.

NR--Not rated

- + Bank Loans rated below Baa by Moody's Investor Service, Inc. or BBB by Standard & Poor's Group are considered to be below investment grade.
- (1) Industry percentages are calculated as a percentage of net assets.
- (a) This Senior Loan interest is non-income producing.
- (b) 144A Securities are those which are exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These securities may only be

resold in transactions exempt from registration which are normally transactions with qualified institutional buyers.

- (c) This borrower has filed for protection in federal bankruptcy court.
- (d) Affiliated company. See Notes to Financial Statements.
- (e) Non-income producing security as this stock currently does not declare dividends.
- (f) Restricted Security
- (g) Subsequent to January 31, 2002, this borrower has filed for protection in federal bankruptcy court.
- (h) Subsequent to January 31, 2002, this borrower has emerged from bankruptcy.
- (i) The borrower is in the process of restructuring or amending the terms of this loan.

See Notes to Financial Statements

32

YOUR TRUST'S INVESTMENTS

January 31, 2002 (Unaudited)

- * Senior Loans in the Trust's portfolio generally are subject to mandatory and/or optional prepayment. Because of these mandatory prepayment conditions and because there may be significant economic incentives for a Borrower to prepay, prepayments of Senior Loans in the Trust's portfolio may occur. As a result, the actual remaining maturity of Senior Loans held in the Trust's portfolio may be substantially less than the stated maturities shown. Although the Trust is unable to accurately estimate the actual remaining maturity of individual Senior Loans, the Trust estimates that the actual average maturity of the Senior Loans held in its portfolio will be approximately 18-24 months.
- ** Senior Loans in which the Trust invests generally pay interest at rates which are periodically redetermined by reference to a base lending rate plus a premium. These base lending rates are generally (i) the lending rate offered by one or more major European banks, such as the London Inter-Bank Offered Rate ("LIBOR"), (ii) the prime rate offered by one or more major United States banks and (iii) the certificate of deposit rate. Senior Loans are generally considered to be restricted in that the Trust ordinarily is contractually obligated to receive approval from the Agent Bank and/or borrower prior to the disposition of a Senior Loan.

- (a) Net asset value on June 24, 1998 of \$10.00 is adjusted for common share offering costs of \$.013.
- (b) Total return based on common share market price assumes an investment at the common share market price at the beginning of the period indicated,

^{*} If certain expenses had not been voluntarily assumed by Van Kampen, total return would have been lower and the Ratio of Operating Expenses to Average Net Assets and the Ratio of Net Investment Income to Average Net Assets would have been 1.21% and 6.90% for the period ended July 31, 1998.

^{**} Non-Annualized

reinvestment of all distributions for the period in accordance with the Trust's dividend reinvestment plan, and sale of all shares at the closing common share market price at the end of the period indicated.

- (c) Total return based on net asset value (NAV) assumes an investment at the beginning of the period indicated, reinvestment of all distributions for the period, and sale of all shares at the end of the period, all at NAV.
- (d) Calculation includes the proceeds from principal repayments and sales of variable rate senior loan interest.
- (e) Calculated by subtracting the Trust's total liabilities (not including the Borrowings) from the Trust's total assets and dividing by the total number of senior indebtedness units, where one unit equals \$1,000 of senior indebtedness.
- (f) As required, effective August 1, 2001, the Trust has adopted the provisions of the AICPA Audit and Accounting Guide for Investment Companies and began amortizing premium on fixed income securities. The effect of this change for the six-months ended January 31, 2002 was to decrease net investment income per share by \$.01 and increase net realized and unrealized gains and losses per share by \$.01. The change had no effect on the ratio of net investment income to average net assets. Per shares, ratios and supplemental data for periods prior to January 31, 2002 have not been restated to reflect this change in presentation.

NOTES TO FINANCIAL STATEMENTS

January 31, 2002 (Unaudited)

1. SIGNIFICANT ACCOUNTING POLICIES

Van Kampen Senior Income Trust (the "Trust") is registered as a non-diversified closed-end management investment company under the Investment Company Act of 1940 (the "1940 Act"), as amended. The Trust's investment objective is to provide a high level of current income, consistent with preservation of capital. The Trust seeks to achieve its objective by investing primarily in a portfolio of interests in floating or variable rate senior loans to corporations, partnerships and other entities which operate in a variety of industries and geographical regions. The Trust borrows money for investment purposes which will create the opportunity for enhanced return, but also should be considered a speculative technique and may increase the Trust's volatility. The Trust commenced investment operations on June 24, 1998.

The following is a summary of significant accounting policies consistently followed by the Trust in the preparation of its financial statements. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

A. SECURITY VALUATION The Trust's Senior Loans are valued by the Trust following valuation guidelines established and periodically reviewed by the Trust's Board of Trustees. Under the valuation guidelines, Senior Loans for which reliable

market quotes are readily available are valued at the mean of such bid and ask quotes. Where reliable market quotes are not readily available, Senior Loans are valued, where possible, using independent market indicators provided by independent pricing sources approved by the Board of Trustees. Other Senior Loans are valued by independent pricing sources approved by the Board of Trustees based upon pricing models developed, maintained and operated by those pricing sources or valued by Van Kampen Investment Advisory Corp. (the "Adviser") by considering a number of factors including consideration of market indicators, transactions in instruments which the Adviser believes may be comparable (including comparable credit quality, interest rate, interest rate redetermination period and maturity), the credit worthiness of the Borrower, the current interest rate, the period until next interest rate redetermination and the maturity of such Senior Loan. Consideration of comparable instruments may include commercial paper, negotiable certificates of deposit and short-term variable rate securities which have adjustment periods comparable to the Senior Loans in the Trust's portfolio. The fair value of Senior

40

NOTES TO FINANCIAL STATEMENTS

January 31, 2002 (Unaudited)

Loans are reviewed and approved by the Trust's Valuation Committee and the Board of Trustees.

Equity securities are valued on the basis of prices furnished by pricing services or as determined in good faith by the Adviser under the direction of the Board of Trustees.

Short-term securities with remaining maturities of 60 days or less are valued at amortized cost, which approximates market value. Short-term loan participations are valued at cost in the absence of any indication of impairment.

- B. SECURITY TRANSACTIONS Investment transactions are recorded on a trade date basis. Realized gains and losses are determined on an identified cost basis.
- C. INVESTMENT INCOME Interest income is recorded on an accrual basis. Facility fees received are treated as market discounts. Market premiums are amortized and discounts are accreted over the stated life of each applicable senior loan, note, or fixed income security. Other income is comprised primarily of amendment fees. Amendment fees are earned as compensation for agreeing to changes in loan agreements.

As required, effective August 1, 2001, the Trust has adopted the provisions of the AICPA Audit and Accounting Guide for Investment Companies and began amortizing premiums on fixed income securities. Prior to August 1, 2001, the Trust did not amortize premiums on senior loans, notes, or fixed income securities. The cumulative effect of this accounting change had no impact on total net assets of the Portfolio, but resulted in a \$241,113 reduction in cost of securities and a corresponding \$241,113 decrease in net unrealized depreciation based on securities held by the Trust on July 31, 2001.

The effect of this change for the six months ended January 31, 2002 was to decrease net investment income by \$48,542; increase net unrealized depreciation by \$62,242, and decrease net realized loss by \$110,784. The statement of changes in net assets and financial highlights for prior periods have not been restated to reflect this change in presentation.

D. FEDERAL INCOME TAXES It is the Trust's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no provision for federal income taxes is required.

The Trust intends to utilize provisions of the federal income tax laws which allow it to carry a realized capital loss forward for eight years following the year of the loss and offset such losses against any future realized capital gains. At July 31, 2001, the Trust had an accumulated capital loss carryforward for tax purposes of

41

NOTES TO FINANCIAL STATEMENTS

January 31, 2002 (Unaudited)

\$4,851,995, which will expire on July 31, 2009. Net realized gains or losses may differ for financial and tax reporting purposes primarily as a result of the deferral of losses relating to wash sale transactions, post October losses which may not be recognized for tax purposes until the first day of the following fiscal year and losses that were recognized for book purposes but not for tax purposes at the end of the fiscal year.

At January 31, 2002, for federal income tax purposes cost of long- and short-term investments is \$2,013,889,114, the aggregate gross unrealized appreciation is \$33,844,608 and the aggregate gross unrealized depreciation is \$201,373,854, resulting in net unrealized depreciation on long- and short-term investments of \$167,529,246.

E. DISTRIBUTION OF INCOME AND GAINS The Trust intends to declare and pay monthly dividends from net investment income to common shareholders. Net realized gains, if any, are to be distributed at least annually to common shareholders.

2. INVESTMENT ADVISORY AGREEMENT AND OTHER TRANSACTIONS WITH AFFILIATES

Under the terms of the Trust's Investment Advisory Agreement, the Adviser will provide investment advice and facilities to the Trust for an annual fee of .85% of the average daily managed assets. Managed assets are defined as the gross asset value of the Trust minus the sum of accrued liabilities, other than the aggregate amount of borrowings undertaken by the Trust. In addition, the Trust will pay a monthly administrative fee to Van Kampen Investments Inc., the Trust's Administrator, at an annual rate of .20% of the average daily managed assets of the Trust. The administrative services provided by the Administrator include monitoring the provisions of the loan agreements and any agreements with respect to participations and assignments, record keeping responsibilities with respect to interests in Variable Rate Senior Loans in the Trust's portfolio and providing certain services to the holders of the Trust's securities.

For the six months ended January 31, 2002, the Trust recognized expenses of approximately \$92,700 representing legal services provided by Skadden, Arps, Slate, Meagher & Flom (Illinois), counsel to the Trust, of which a trustee of the Trust is an affiliated person.

Under a Legal Services agreement, the Adviser provides legal services to the Trust. The Adviser allocates the cost of such services to each trust. For the six months ended January 31, 2002, the Trust recognized expenses of approximately \$18,800 representing Van Kampen Investments Inc.'s or its affiliates' (collectively "Van Kampen") cost of providing legal services to the

Trust, which are reported as "Legal" expenses in the Statement of Operations.

42

NOTES TO FINANCIAL STATEMENTS

January 31, 2002 (Unaudited)

Certain officers and trustees of the Trust are also officers and directors of Van Kampen. The Trust does not compensate its officers or trustees who are officers of Van Kampen.

The Trust provides deferred compensation and retirement plans for its trustees who are not officers of Van Kampen. Under the deferred compensation plan, trustees may elect to defer all or a portion of their compensation to a later date. Benefits under the retirement plan are payable for a ten-year period and are based upon each trustee's years of service to the Trust. The maximum annual benefit per trustee under the plan is \$2,500.

During the period, the Trust owned shares of the following affiliated companies. Affiliated companies are defined by the 1940 Act as those companies in which a trust holds 5% or more of the outstanding voting securities.

NAME	SHARES*	REALIZED GAIN/(LOSS)	DIVIDEND INCOME	MARKET VALUE 1/31/02
Imperial Home Decor Group, Inc	512,023	0	0	0
Imperial Home Decor Realty, Inc	512,023	0	0	0
Rowe International Inc	87 , 636	0	0	0

^{*} Shares acquired through the restructuring of Senior Loan interests.

3. INVESTMENT TRANSACTIONS

During the period, the costs of purchases and proceeds from investments sold and repaid, excluding short-term investments, were \$597,457,163 and \$550,196,379, respectively.

4. COMMITMENTS

Pursuant to the terms of certain of the Variable Rate Senior Loan agreements, the Trust had unfunded loan commitments of approximately \$35,973,900 as of January 31, 2002. The Trust generally will maintain with its custodian short-term investments and/or cash having an aggregate value at least equal to the amount of unfunded loan commitments.

5. SENIOR LOAN PARTICIPATION COMMITMENTS

The Trust invests primarily in participations, assignments, or acts as a party to the primary lending syndicate of a Variable Rate Senior Loan interest to United States and foreign corporations, partnerships, and other entities. When the Trust purchases a participation of a Senior Loan interest, the Trust typically enters into a contractual agreement with the lender or other third party selling the participation, but not with the borrower directly. As such, the Trust assumes the

NOTES TO FINANCIAL STATEMENTS

January 31, 2002 (Unaudited)

credit risk of the borrower, selling participant or other persons interpositioned between the Trust and the borrower.

At January 31, 2002, the following sets forth the selling participants with respect to interests in Senior Loans purchased by the Trust on a participation basis.

	PRINCIPAL	
	AMOUNT	VALUE
SELLING PARTICIPANT	(000)	(000)
Chase Securities, Inc	\$23 , 500	\$23 , 453
Banker's Trust Company	20,000	16,167
Wachovia	12,072	11,505
Bank of America	5,000	2,813
Total	\$60,572	\$53 , 938
	======	======

6. BORROWINGS

In accordance with its investment policies, the Trust may borrow money for investment purposes in an amount up to approximately $33\ 1/3\%$ of the Trust's total assets.

The Trust has entered into an \$800 million revolving credit agreement with VVR Funding LLC, a Delaware limited liability company whose sole purpose is the issuance of commercial paper. VVR has the authority to issue a maximum of \$800 million of commercial paper, at a discount, with maturities of up to 180 days, the proceeds of which are used to make advances to the Trust. This revolving credit agreement is secured by the assets of the Trust. For the six months ended January 31, 2002, the average daily balance of borrowings under the revolving credit agreement was \$355 million with a weighted average interest rate of 2.73%.
