ITEM 2.05 COSTS ASSOCIATED WITH EXIT OR DISPOSAL ACTIVITIES.

On August 2, 2007, the Company announced a plan to discontinue operations at its press fabric manufacturing facility in East Greenbush, New York, and to cease the manufacture of dryer fabrics in Menands, New York. These actions are part of a series of restructuring measures begun by the Company in 2006, and discussed

in earlier filings, intended to reduce the Company's annualized costs by \$0.50 per share by the end of 2007 and at least \$1.00 per share by the end of 2008. Discussions with labor representatives at the affected operations began shortly after that announcement. Given that requirement, the Company was at the time unable to determine the amount of expense to be incurred for severance and termination payments, and therefore was unable to determine total costs expected to be incurred.

Type of restructuring expenses:

The Company has now determined that it expects to incur net restructuring charges of \$7.7 million related to these actions. The restructuring charges include approximately \$7.4 million of cash charges for severance and other termination benefits, \$2.1 million of non-cash asset impairment charges, and \$1.3 million of cash expenses for site restoration and other. Those charges will be partially offset by a net reduction of \$3.1 million in restructuring expense that results from the curtailment effect of these actions on the Company's United States pension and postretirement benefit programs.

Timing of restructuring expense recognition:

Related to these actions, the Company expects to report restructuring charges of \$10.1 million in the third quarter of 2007, of which \$2.1 million will be non-cash. The Company expects most of the curtailment effect to be recorded in the fourth quarter of 2007, but a portion is likely to be recorded in the first quarter of 2008. Additionally, the Company expects to incur restructuring expenses of approximately \$0.7 million for site restoration over the next two fiscal quarters.

Other related costs:

In addition to costs that will be reported as restructuring expenses, the Company estimates that it will incur idle capacity costs in these plants of between \$2.0 million and \$2.5 million in the third quarter, a comparable amount in the fourth quarter of 2007, and a lesser amount in the first quarter of 2008.
