UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2001

Commission File Number 1-7850

SOUTHWEST GAS CORPORATION

(Exact name of registrant as specified in its charter)

California
(State or other jurisdiction of
incorporation or organization)

88-0085720
(I.R.S. Employer
Identification No.)

5241 Spring Mountain Road
Post Office Box 98510
Las Vegas, Nevada
(Address of principal executive offices)

89193-8510
Zip Code)

Registrant's telephone number, including area code: (702) 876-7237

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock, \$1 par value	New York Stock Exchange, Inc. Pacific Stock Exchange, Inc.
9.125% Trust Originated Preferred Securities	New York Stock Exchange, Inc. Pacific Stock Exchange, Inc.
Stock Purchase Rights	New York Stock Exchange, Inc. Pacific Stock Exchange, Inc.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. **Yes** **No**

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Aggregate market value of the voting stock held by nonaffiliates of the registrant:
\$777,042,220 as of March 11, 2002

Edgar Filing: SOUTHWEST GAS CORP - Form 10-K405

The number of shares outstanding of common stock:
Common Stock, \$1 Par Value, 32,745,142 shares as of March 11, 2002

Table of Contents**PART I****Item 1. BUSINESS**

Southwest Gas Corporation (the Company) is incorporated, effective March 1931, under the laws of the State of California. The Company is comprised of two business segments: natural gas operations (Southwest or the natural gas operations segment) and construction services. Southwest is engaged in the business of purchasing, transporting, and distributing natural gas in portions of Arizona, Nevada and California. Southwest is the largest distributor in Arizona, selling and transporting natural gas in most of central and southern Arizona, including the Phoenix and Tucson metropolitan areas. Southwest is also the largest distributor and transporter of natural gas in Nevada, serving the Las Vegas metropolitan area and northern Nevada. In addition, Southwest distributes and transports natural gas in portions of California, including the Lake Tahoe area and the high desert and mountain areas in San Bernardino County.

Northern Pipeline Construction Co. (Northern or the construction services segment), a wholly owned subsidiary, is a full-service underground piping contractor which provides utility companies with trenching and installation, replacement, and maintenance services for energy distribution systems.

Financial information with respect to industry segments is included in Note 11 of the Notes to Consolidated Financial Statements which is included in the 2001 Annual Report to Shareholders and is incorporated herein by reference.

NATURAL GAS OPERATIONS**General Description**

Southwest is subject to regulation by the Arizona Corporation Commission (ACC), the Public Utilities Commission of Nevada (PUCN), and the California Public Utilities Commission (CPUC). These commissions regulate public utility rates, practices, facilities, and service territories in their respective states. The CPUC also regulates the issuance of all securities by the Company, with the exception of short-term borrowings. Certain accounting practices, transmission facilities, and rates are subject to regulation by the Federal Energy Regulatory Commission (FERC).

Southwest purchases, transports, and distributes natural gas to 1,397,000 residential, commercial, and industrial customers in geographically diverse portions of Arizona, Nevada, and California. There were 60,000 customers added to the system during 2001.

The table below lists the percentage of operating margin (operating revenues less net cost of gas) by major customer class for the years indicated:

For the Year Ended	Residential and Small Commercial	Other Sales Customers	Transportation
December 31, 2001	82%	8%	10%
December 31, 2000	84%	3%	13%
December 31, 1999	83%	4%	13%

Southwest is not dependent on any one or a few customers to the extent that the loss of any one or several would have a significant adverse impact on earnings.

Transportation of customer-secured gas to end-users accounted for 50 percent of total system throughput in 2001. Although the volumes were significant, these customers provide a much smaller proportionate share of operating margin. In 2001, customers who utilized this service transported 127 million dekatherms, down from 148 million dekatherms in 2000. This reduction primarily reflected a shift by a number of large commercial and industrial customers from transportation service to sales service.

Table of Contents

The demand for natural gas is seasonal. Variability in weather from normal temperatures can materially impact results of operations. It is the opinion of management that comparisons of earnings for interim periods do not reliably reflect overall trends and changes in operations. Also, earnings for interim periods can be significantly affected by the timing of general rate relief.

Rates and Regulation

Rates that Southwest is authorized to charge its distribution system customers are determined by the ACC, PUCN, and CPUC in general rate cases and are derived using rate base, cost of service, and cost of capital experienced in a historical test year, as adjusted in Arizona and Nevada, and projected for a future test year in California. The FERC regulates the northern Nevada transmission and liquefied natural gas (LNG) storage facilities of Paiute Pipeline Company (Paiute), a wholly owned subsidiary, and the rates it charges for transportation of gas directly to certain end-users and to various local distribution companies (LDCs). The LDCs transporting on the Paiute system are: Sierra Pacific Power Company (serving Reno and Sparks, Nevada), Avista Utilities (serving South Lake Tahoe, California), and Southwest Gas Corporation (serving Truckee and North Lake Tahoe, California and various locations throughout northern Nevada).

Rates charged to customers vary according to customer class and rate jurisdiction and are set at levels allowing for the recovery of all prudently incurred costs, including a return on rate base sufficient to pay interest on debt, preferred securities distributions, and a reasonable return on common equity. Rate base consists generally of the original cost of utility plant in service, plus certain other assets such as working capital and inventories, less accumulated depreciation on utility plant in service, net deferred income tax liabilities, and certain other deductions. Rate schedules in all service areas contain purchased gas adjustment (PGA) clauses, which allow Southwest to file for rate adjustments as the cost of purchased gas changes. In Nevada, tariffs provide for annual adjustment dates for changes in purchased gas costs. In addition, Southwest may request to adjust rates more often, if conditions warrant. In Arizona, Southwest adjusts rates monthly for changes in purchased gas costs, within pre-established limits. In California, a monthly gas cost adjustment based on forecasted monthly prices is used to adjust rates. PGA rate changes affect cash flows but have no direct impact on profit margin. Filings to change rates in accordance with PGA clauses are subject to audit by state regulatory commission staffs. Information with respect to recent general rate cases and PGA filings is included in the Rates and Regulatory Proceedings section of Management's Discussion and Analysis (MD&A) in the 2001 Annual Report to Shareholders.

The table below lists the docketed general rate filings last initiated and/or completed within each ratemaking area:

Ratemaking Area	Type of Filing	Month Filed	Month Final Rates Effective
Arizona	General rate case	May 2000	November 2001
California: Northern and Southern	General rate case	February 2002	Pending
Nevada: Northern and Southern	General rate case	July 2001	December 2001
FERC: Paiute	General rate case	July 1996	January 1997

Table of Contents

Restructuring Initiatives

Over the past four years, both the CPUC and the PUCN have initiated the development of new rules for the further restructuring of the natural gas distribution industry to allow more competition. However, the development of new rules has slowed in recent years and, in fact, the trend is toward re-regulation after the recent unfavorable experiences in the California market related to energy pricing. There are no similar initiatives in Arizona.

In October 2000, an Energy Policy Committee was formed by the Governor of Nevada to recommend a long-term energy plan for the state. The 17-member committee, which included state government officials, utility company executives and other community and industry representatives, submitted their recommendations in January 2001. They submitted a series of policy proposals regarding conservation and alternative energy sources, but made it clear that given the instability of the electric energy market, they did not support full deregulation in the immediate future. During the 2001 session of the Nevada State Legislature, a bill was approved that repealed electric utility deregulation legislation previously passed.

Demand for Natural Gas

Deliveries of natural gas by Southwest are made under a priority system established by state regulatory commissions. The priority system is intended to ensure that the gas requirements of higher-priority customers, primarily residential customers and other customers who use 500 therms of gas per day or less, are fully satisfied on a daily basis before lower-priority customers, primarily electric utility and large industrial customers able to use alternative fuels, are provided any quantity of gas or capacity.

Demand for natural gas is greatly affected by temperature. On cold days, use of gas by residential and commercial customers may be as much as eight times greater than on warm days because of increased use of gas for space heating. To fully satisfy this increased high-priority demand, gas is withdrawn from storage, or peaking supplies are purchased from suppliers. If necessary, service to interruptible lower-priority customers may be curtailed to provide the needed delivery system capacity. No curtailment occurred during the latest peak heating season. Southwest maintains no backlog on its orders for gas service.

Natural Gas Supply

Southwest is responsible for acquiring (purchasing) and arranging delivery of (transporting) natural gas to its system for all sales customers. Southwest believes that natural gas supplies and pipeline capacity for transportation will continue to be sufficient to meet market demands in its service territories.

The primary objective of Southwest with respect to gas supply is to ensure that adequate, as well as economical, supplies of natural gas are available from reliable sources. Gas is acquired from a wide variety of sources and a mix of purchase provisions, including spot market purchases and firm supplies with a variety of terms. During 2001, Southwest acquired gas supplies from approximately 60 suppliers. This practice mitigates the risk of nonperformance by any one supplier.

Balancing reliable supply assurances with the associated costs results in a continually changing mix of purchase provisions within the supply portfolios. To address the unique requirements of its various market areas, Southwest assembles and administers separate natural gas supply portfolios for each of its jurisdictional areas. Firm and spot market natural gas purchases are made in a competitive bid environment. California purchases are subject to both fixed-price and index-based pricing arrangements. For the Nevada and Arizona portfolios, the majority of purchases involve index-based pricing arrangements. However, a portion of firm supplies is contracted on a fixed-price basis. This process allows Southwest to acquire gas at current market prices in conjunction with a level of mitigation of price volatility. In managing its gas supply portfolio, Southwest does not currently utilize stand-alone derivative financial instruments, but may do so in the future to hedge against possible price increases. Any such change would be undertaken only with regulatory commission authorization to recover costs associated with these activities.

Table of Contents

From the second quarter of 2000 through the second quarter of 2001, Southwest experienced unprecedented increases in natural gas prices. The increase was due to many factors and was a nationwide phenomenon affecting utilities and consumers throughout the United States. These increases peaked during the winter of 2000-2001 when the system-wide average cost of gas for Southwest was nearly \$7.00 per dekatherm. Prices were significantly lower by the end of 2001, averaging less than \$4.00 per dekatherm in December primarily as a result of lower energy demand, increased storage levels, and general economic conditions.

Gas supplies for the southern system of Southwest (Arizona, southern Nevada, and southern California properties) are primarily obtained from producing regions in Colorado and New Mexico (San Juan basin), Texas (Permian basin), and Rocky Mountain areas. For its northern system (northern Nevada and northern California properties), Southwest primarily obtains gas from Rocky Mountain producing areas and from Canada.

Southwest arranges for transportation of gas to its Arizona, Nevada, and California service territories through the pipeline systems of El Paso Natural Gas Company (El Paso), Kern River Gas Transmission Company (Kern River), Transwestern Pipeline Company, Northwest Pipeline Corporation, Paiute Pipeline Company, and Southern California Gas Company. Supply and pipeline capacity availability on both short- and long-term bases is continually monitored by Southwest to ensure the continued reliability of service to its customers. Southwest currently receives firm transportation service, on both short- and long-term bases, for all of its service territories on the pipeline systems noted above, and also has interruptible contracts in place that allow additional capacity to be utilized should an unforeseen need arise.

The Company believes that the current level of contracted firm interstate capacity is sufficient to serve each of the service territories. As the need arises to acquire additional capacity on one of the interstate pipeline transmission systems, primarily due to customer growth, Southwest considers available options to obtain the capacity, either through the use of firm contracts with a pipeline company or by purchasing capacity on the open market.

In its Arizona service territories, Southwest receives the contractual benefit of being a full-requirements shipper on the El Paso system. The capacity needs of a full-requirements shipper are met before those of other shippers. Certain filings by El Paso with the FERC during 2001 prompted non full-requirements shippers to file a complaint with the FERC. This complaint alleges among other things that unlimited rights of full-requirements shippers cause damage to other shippers because there is insufficient pipeline capacity to serve all firm requirements for all shippers. The FERC has currently taken no action on the complaint although management believes that the status of full-requirements shippers may change as a result of these complaints. Southwest, along with the ACC and other full-requirements shippers, has and will continue to actively participate in any proceedings related to the complaint in order to serve the best interests of its Arizona customers.

Competition

Electric utilities are the principal competitors of Southwest for the residential and small commercial markets throughout its service areas. Competition for space heating, general household, and small commercial energy needs generally occurs at the initial installation phase when the customer/builder typically makes the decision as to which type of equipment to install and operate. The customer will generally continue to use the chosen energy source for the life of the equipment. As a result of its success in these markets, Southwest has experienced consistent growth among the residential and small commercial customer classes.

Unlike residential and small commercial customers, certain large commercial, industrial, and electric generation customers have the capability to switch to alternative energy sources. To date, Southwest has been successful in retaining most of these customers by setting rates at levels competitive with alternative energy sources such as electricity, fuel oils, and coal. However, increases in natural gas prices, if sustained for an extended period of time, may impact Southwest's ability to retain some of these customers. Overall, management does not anticipate any material adverse impact on operating margin from fuel switching.

Southwest continues to compete with interstate transmission pipeline companies, such as El Paso, Kern River, and Tuscarora Gas Transmission Company, to provide service to certain large end-users. End-use customers located in close

Table of Contents

proximity to these interstate pipelines pose a potential bypass threat and, therefore, require Southwest to closely monitor each customer situation and provide competitive service in order to retain the customer. Southwest has remained competitive through the use of negotiated transportation contract rates, special long-term contracts with electric generation and cogeneration customers, and new tariff programs. These competitive response initiatives have helped mitigate the financial impact from the threat of bypass and the potential loss of margin currently earned from large customers.

Environmental Matters

Federal, state, and local laws and regulations governing the discharge of materials into the environment have had little direct impact upon Southwest. Environmental efforts, with respect to matters such as protection of endangered species and archeological finds, have increased the complexity and time required to obtain pipeline rights-of-way and construction permits. However, increased environmental legislation and regulation are also beneficial to the natural gas industry. Because natural gas is one of the most environmentally safe fossil fuels currently available, its use helps energy users comply with stricter environmental standards.

Employees

At December 31, 2001, the natural gas operations segment had 2,507 regular full-time equivalent employees. Southwest believes it has a good relationship with its employees. In May 1999, non-exempt employees in the Central Arizona Division voted to have the International Brotherhood of Electrical Workers (IBEW) represent them in employee-related matters with Southwest. In July 2000, Southwest, the National Labor Relations Board (NLRB) and the IBEW entered into a NLRB Settlement Agreement whereby Southwest recognized the IBEW as the bargaining agent for these employees. Subsequently, Southwest and the IBEW have been negotiating a contract. However, currently, there is no contract in place related to the 482 full-time equivalent non-exempt Central Arizona Division employees. No other natural gas operations segment employees are represented by a union.

CONSTRUCTION SERVICES

Northern Pipeline Construction Co. (Northern or the construction services segment) is a full-service underground piping contractor, which provides utility companies with trenching and installation, replacement, and maintenance services for energy distribution systems. Northern contracts primarily with LDCs to install, repair, and maintain energy distribution systems from the town border station to the end-user. The primary focus of business operations is main and service replacement as well as new business installations. Construction work varies from relatively small projects to the piping of entire communities. Construction activity is seasonal in most areas. Peak construction periods are the summer and fall months in colder climate areas, such as the midwest. In the warmer climate areas, such as the southwestern United States, construction continues year round.

Northern business activities are often concentrated in utility service territories where existing energy lines are scheduled for replacement. An LDC will typically contract with Northern to provide pipe replacement services and new line installations. Contract terms generally specify unit-price or fixed-price arrangements. Unit-price contracts establish prices for all of the various services to be performed during the contract period. These contracts often have annual pricing reviews. During 2001, approximately 92 percent of revenue was earned under unit-price contracts. As of December 31, 2001 no significant backlog existed with respect to outstanding construction contracts.

Competition within the industry has traditionally been limited to several regional competitors in what has been a largely fragmented industry. Several national competitors also exist within the industry. Northern currently operates in approximately 17 major markets nationwide. Its customers are the primary LDCs in those markets. During 2001, Northern served 53 major customers, with Southwest accounting for approximately 33 percent of their revenues. No other customer had a relatively significant contribution to Northern revenues.

Employment fluctuates between seasonal construction periods, which are normally heaviest in the summer and fall months. At December 31, 2001, Northern had 2,000 regular full-time-equivalent employees. Employment peaked in

Table of Contents

October 2001 when there were 2,370 employees. The majority of the employees are represented by unions and are covered by collective bargaining agreements, which is typical of the utility construction industry.

Operations are conducted from 17 field locations with corporate headquarters located in Phoenix, Arizona. All buildings are leased from third parties. The lease terms are typically five years or less. Field location facilities consist of a small building for repairs and land to store equipment.

COMPANY RISK FACTORS

Described below are some of the identified risk factors of the Company that may have a negative impact on our future financial performance. Unless indicated otherwise, references below to we, us and our should be read to refer to Southwest Gas Corporation and its subsidiaries.

OUR LIQUIDITY, AND IN CERTAIN CIRCUMSTANCES, EARNINGS, COULD BE ADVERSELY AFFECTED BY THE COST OF PURCHASING NATURAL GAS DURING PERIODS IN WHICH NATURAL GAS PRICES ARE RISING SIGNIFICANTLY.

Rate schedules in each of our service territories contain purchased gas adjustment clauses which permit us to file for rate adjustments to recover increases in the cost of purchased gas. Increases in the cost of purchased gas have no direct impact on our profit margins, but do affect cash flows and can therefore impact the amount of our capital resources. Natural gas prices were unusually high during the first half of 2001, but have since dropped. We have used short-term borrowings in the past to temporarily finance increases in purchased gas costs, and we expect to do so during 2002, if the need again arises.

We may file requests for rate increases to cover the rise in the costs of purchased gas. Due to the nature of the regulatory process, there is a risk of a disallowance of full recovery of these costs during any period in which there has been a substantial run-up of these costs. Any material disallowance of purchased gas costs could have a material impact on cash flow and earnings. Gas procurement costs for our southern California customers are under review by the California Public Utilities Commission. Hearings in this matter were held in January 2002 with a final decision anticipated in the second quarter of 2002.

SIGNIFICANT CUSTOMER GROWTH IN ARIZONA AND NEVADA COULD STRAIN OUR CAPITAL RESOURCES AND IMPACT EARNINGS.

We continue to experience significant population and customer growth throughout our service territories. During 2001 we added 60,000 customers, a four percent growth rate. Over the last several years, customer growth has averaged five percent. This growth has required large amounts of capital to finance the investment in new transmission and distribution plant. In 2001, our natural gas construction expenditures totaled \$248 million. Approximately 74 percent of these current-period expenditures represented new construction, and the balance represented costs associated with routine replacement of existing transmission, distribution and general plant.

Cash flows from operating activities (net of dividends) have been inadequate, and are expected to continue to be inadequate, to fund all necessary capital expenditures. We have been funding this shortfall through the issuance of additional debt and equity securities, and will continue to do so. Our ability to issue additional securities is dependent upon, among other things, conditions in the capital markets, regulatory authorizations and our level of earnings.

Our ability to earn the rates of return authorized by the Arizona Corporation Commission and the Public Utilities Commission of Nevada is also adversely affected by significant customer growth, because the rates we charge our distribution customers in Arizona and Nevada are derived using rate base, cost of service and cost of capital experienced in an historical test year, as adjusted. This results in regulatory lag which delays our recovery of some of the costs of capital improvements and operating costs from customers in Arizona and Nevada.

Table of Contents

OUR EARNINGS ARE GREATLY AFFECTED BY VARIATIONS IN TEMPERATURE DURING THE WINTER HEATING SEASON.

The demand for natural gas is seasonal and is greatly affected by temperature. Variability in weather from normal temperatures can materially impact results of operations. On cold days, use of gas by residential and commercial customers may be as much as eight times greater than on warm days because of the increased use of gas for space heating. Weather has been and will continue to be one of the dominant factors in our financial performance.

UNCERTAIN ECONOMIC CONDITIONS MAY AFFECT OUR ABILITY TO FINANCE CAPITAL EXPENDITURES AND TO REFINANCE MATURING DEBT.

Our ability to finance capital expenditures, to refinance maturing debt and other matters will depend upon general economic conditions in the capital markets. The direction of interest rates is uncertain. Declining interest rates are generally believed to be favorable to utilities while rising interest rates are believed to be unfavorable because of the high capital costs of utilities. In addition, our authorized rate of return is based upon certain assumptions regarding interest rates. If interest rates are lower than assumed rates, our authorized rate of return could be reduced. If interest rates are higher than assumed rates, our ability to earn our authorized rate of return may be adversely impacted.

OUR ABILITY TO PAY DIVIDENDS, ALTHOUGH RESTRICTED BY CALIFORNIA CORPORATION LAW, IS MORE LIKELY TO BE DEPENDENT UPON FUTURE EARNINGS, OUR ABILITY TO REFINANCE MATURING DEBT AND THE TERMS OF OUR DEBT INSTRUMENTS.

We do not anticipate that restrictions imposed by California Corporation Law will impact our ability to pay dividends in the foreseeable future.

It is likely that the amount of dividends declared by our Board of Directors will depend to a substantial degree on the level of our future earnings, our ability to refinance debt of \$308 million which matures in 2002, and the terms of our debt instruments. None of our current debt instruments directly restricts our ability to pay dividends. Certain of our debt instruments do, however, contain leverage and net worth covenants. We do not anticipate that these covenants will impact our ability to pay dividends unless the amount to be paid out in dividends greatly exceeds our earnings. The last year dividends paid exceeded earnings was 1997. In 2001, earnings exceeded the amount paid out in dividends by an aggregate of \$11 million.

Item 2. PROPERTIES

The plant investment of Southwest consists primarily of transmission and distribution mains, compressor stations, peak shaving/storage plants, service lines, meters, and regulators which comprise the pipeline systems and facilities located in and around the communities served. Southwest also includes other properties such as land, buildings, furnishings, work equipment, vehicles and software systems in plant investment. The northern Nevada and northern California properties of Southwest are referred to as the northern system; the Arizona, southern Nevada, and southern California properties are referred to as the southern system. Several properties are leased by Southwest, including an LNG storage plant on its northern Nevada system, a portion of the corporate headquarters office complex located in Las Vegas, Nevada, and the administrative offices in Phoenix, Arizona. Total gas plant, exclusive of leased property, at December 31, 2001 was \$2.6 billion, including construction work in progress. It is the opinion of management that the properties of Southwest are suitable and adequate for its purposes.

Substantially all gas main and service lines are constructed across property owned by others under right-of-way grants obtained from the record owners thereof, on the streets and grounds of municipalities under authority conferred by franchises or otherwise, or on public highways or public lands under authority of various federal and state statutes. None of the numerous county and municipal franchises are exclusive, and some are of limited duration. These franchises are renewed regularly as they expire, and Southwest anticipates no serious difficulties in obtaining future renewals.

Table of Contents

With respect to the right-of-way grants, Southwest has had continuous and uninterrupted possession and use of all such rights-of-way, and the associated gas mains and service lines, commencing with the initial stages of the construction of such facilities. Permits have been obtained from public authorities in certain instances to cross or to lay facilities along roads and highways. These permits typically are revocable at the election of the grantor and Southwest occasionally must relocate its facilities when requested to do so by the grantor. Permits have also been obtained from railroad companies to cross over or under railroad lands or rights-of-way, which in some instances require annual or other periodic payments and are revocable at the election of the grantors.

Southwest operates two primary pipeline transmission systems: (i) a system owned by Paiute, a wholly owned subsidiary, extending from the Idaho-Nevada border to the Reno, Sparks, and Carson City areas and communities in the Lake Tahoe area in both California and Nevada and other communities in northern and western Nevada; and (ii) a system extending from the Colorado River at the southern tip of Nevada to the Las Vegas distribution area.

The following map shows the locations of major Southwest facilities and transmission lines, and principal communities to which Southwest supplies gas either as a wholesaler or distributor. The map also shows major supplier transmission lines that are interconnected with the Southwest systems.

The information appearing in **Part I, Item 1. Business**, page 5 with respect to the construction services segment is incorporated herein by reference.

Table of Contents

Item 3. LEGAL PROCEEDINGS

Litigation is pending in the U.S. District Court for the District of Arizona consisting of two cases that were originally filed in the District of Arizona (Civ 99 1294 PHX ROS and Civ 00 0119 PHX ROS), two cases that were transferred to the District of Arizona from the U.S. District Court for the Northern District of Oklahoma (Civ 00 1775 PHX ROS and Civ 00 1812 PHX ROS) and one case that was transferred to the District of Arizona from the U.S. District Court for the District of Nevada (Civ 00 0452 PHX ROS). All of the litigation relates to the now terminated acquisition of the Company by ONEOK, Inc. (ONEOK) and the rejection of competing offers from Southern Union Company (Southern Union). After multiple court rulings on motions to dismiss and motions for summary judgment, only a few of the original claims remain.

Original Claims of Southern Union

On July 19, 1999, Southern Union filed a complaint against the Company, several of its officers and directors, ONEOK and others. The complaint was amended on October 11, 1999 and July 24, 2000. As amended, the complaint alleged that the Company, Michael O. Maffie, President and Chief Executive Officer of the Company, Thomas Y. Hartley, Chairman of the Board of the Company, and Edward S. Zub, Senior Vice President Regulation and Pricing of the Company, ONEOK and others conspired to block Company shareholders from voting upon the Southern Union offer and have acted to ensure that the Company's Board of Directors would approve and recommend the ONEOK offer to the Company's shareholders and to influence the vote of members of regulatory commissions required to approve the proposed acquisition of the Company by ONEOK in violation of state and federal criminal laws. The complaint, as amended, further alleged that the defendants fraudulently induced Southern Union to enter into the February 21, 1999 confidentiality and standstill agreement, Southwest breached the terms of that agreement and its covenant of good faith and fair dealing, and all defendants, other than Southwest, Mr. Hartley and Mr. Zub, intentionally interfered with a business relationship between the Company and Southern Union and tortiously interfered with contractual relations between the Company and Southern Union. The complaint, as amended, further alleged that the defendants violated both the federal and Arizona racketeering statutes.

Southern Union sought damages in an amount not less than \$750 million to be trebled for the alleged violations of state and federal criminal law, compensatory damages in an amount not less than \$750 million, plus interest, rescission of the confidentiality and standstill agreement between the Company and Southern Union and punitive damages.

Original Claims of ONEOK

On January 21, 2000, ONEOK filed a complaint against the Company in the U.S. District Court for the Northern District of Oklahoma and amended its complaint on August 23, 2000. As amended, the complaint sought rescission of the merger agreement executed by the Company and ONEOK (the Merger Agreement) due to fraudulent inducement, damages for fraudulent inducement and damages for breach of contract. The action was transferred to the U.S. District Court for the District of Arizona (Case No. Civ 00 1775 PHX ROS) on September 18, 2000.

Original Claims of the Company

On April 30, 1999, the Company filed a complaint against Southern Union in the U.S. District Court for the District of Nevada alleging a breach of the confidentiality and standstill agreement between the Company and Southern Union, breach of the implied covenant of good faith and fair dealing, misappropriation of trade secrets, intentional interference with contract, intentional interference with prospective economic advantage and other violations of California and Nevada law. The Company amended its complaint on May 6, 1999, adding an additional claim against Southern Union pursuant to Section 14(a) of the Securities Exchange Act of 1934. On July 22, 1999, Southern Union filed a motion for leave to amend its answer in the Nevada federal action and to assert counterclaims against the Company. The counterclaims mirror the contractual claims filed by Southern Union in the Arizona action described above. Southern Union's motion for leave to amend was granted. On March 8, 2000, this action was transferred to the U.S. District Court for the District of Arizona (Case No. Civ 00 0452 PHX ROS).

Table of Contents

On January 24, 2000, the Company filed a complaint against ONEOK and Southern Union in the U.S. District Court for the District of Arizona (Case No. Civ 00 0119 PHX ROS). The lawsuit sought unspecified damages from ONEOK for breach of contract, breach of the implied covenant of good faith and fair dealing, fraud in the inducement, and fraud related to its actions connected to the Merger Agreement and its cancellation of the Merger Agreement. The lawsuit also sought unspecified damages from Southern Union for breach of contract, breach of the implied covenant of good faith and fair dealing, and interference with a contract, all related to attempts by Southern Union to block the proposed Southwest Gas-ONEOK combination after the unsolicited offer by Southern Union was rejected by the Company.

Claims That Remain

U.S. District Judge Roslyn O. Silver presides over the Arizona litigation. Through the course of the litigation, Judge Silver has dismissed with prejudice numerous claims, most recently by order dated January 4, 2002. Following conclusion of a trial on the merits, any of the parties may appeal Judge Silver's dismissal of some or all of the claims that have been dismissed.

The following claims involving the Company and its officers and directors have not been dismissed:

- (1) Claims by Southern Union for fraudulent inducement against the Company and Mr. Maffie and claims by Southern Union for breach of contract and breach of covenant of good faith and fair dealing against the Company. Damages for these claims are limited to out-of-pocket expenses of Southern Union and any punitive damages Southern Union can prove.
- (2) Claims by ONEOK for fraudulent inducement against the Company. Damages for this claim are limited to out-of-pocket expenses of ONEOK and any punitive damages ONEOK can prove.
- (3) Claims by the Company against ONEOK for breach of contract, breach of the implied covenant of good faith and fair dealing, fraud in the inducement and fraud. Damages for these claims are limited to out-of-pocket expenses of the Company and any punitive damages the Company can prove.

All claims against Southern Union by the Company have been dismissed.

A trial date for the remaining claims is set for October 2002. It is anticipated that the trial could last two to three months.

There is also an ongoing joint federal, state and county criminal investigation in Phoenix, Arizona concerning activities surrounding the failed acquisition of the Company by ONEOK. The Company is cooperating fully with this investigation.

Other Proceedings

The Company has been named as defendant in various other legal proceedings. The ultimate dispositions of these proceedings are not presently determinable; however, it is the opinion of management that none of this litigation will have a material adverse impact on the Company's financial position or results of operations.

Item 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

(e) *Business Experience.* Information with respect to Directors is set forth under the heading "Election of Directors" in the definitive Proxy Statement dated April 2, 2002, which by this reference is incorporated herein. All Executive Officers have held responsible positions with the Company for at least five years as described in (b) above.

(f) *Involvement in Certain Legal Proceedings.* None.

(g) *Promoters and Control Persons.* None.

Section 16(a) Beneficial Ownership Reporting Compliance. Section 16(a) of the Securities Exchange Act of 1934 requires officers and directors, and persons who own more than ten percent of a registered class of equity securities, to file reports of ownership and changes in ownership with the Securities and Exchange Commission (SEC) and the New York Stock Exchange. Officers, directors, and beneficial owners of more than ten percent of any class of equity securities are required by SEC regulation to furnish the Company with copies of all Section 16(a) forms they file.

Table of Contents

The Company has adopted procedures to assist its directors and executive officers in complying with Section 16(a) of the Securities and Exchange Act of 1934, as amended, which includes assisting in the preparation of forms for filing. For 2001, all the required reports were filed timely.

Item 11. EXECUTIVE COMPENSATION

Information with respect to executive compensation is set forth under the heading *Executive Compensation and Benefits* in the definitive Proxy Statement dated April 2, 2002, which by this reference is incorporated herein.

Item 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) *Security Ownership of Certain Beneficial Owners.* Information with respect to security ownership of certain beneficial owners is set forth under the heading *Securities Ownership by Nominees, Executive Officers, and Beneficial Owners* in the definitive Proxy Statement dated April 2, 2002, which by this reference is incorporated herein.

(b) *Security Ownership of Management.* Information with respect to security ownership of management is set forth under the heading *Securities Ownership by Nominees, Executive Officers, and Beneficial Owners* in the definitive Proxy Statement dated April 2, 2002, which by this reference is incorporated herein.

(c) *Changes in Control.* None.

Item 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

None.
