SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

For the fiscal year ended December 31, 2001

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 1-7283

REGAL-BELOIT CORPORATION
(Exact Name of Registrant as Specified in Its Charter)

Wisconsin
(State of Incorporation)

39-0875718
(I.R.S. Employer
Identification No.)

200 State Street
Beloit, Wisconsin
(Address of principal executive offices)

53511-6254
(Zip Code)

Registrant's telephone number, including area code: (608) 364-8800

Securities registered pursuant to Section 12 (b) of the Act:

Title of Each Class	Name of Each Exchange on Which Registered

Common Stock (\$.01 Par Value)	American Stock Exchange

Securities registered pursuant to Section 12 (g) of the ActNone
(Title of Class)

Indicate by check mark whether the registrant (1) has filed all reports required
to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during
the preceding 12 months (or for such shorter period that the registrant was
required to file such reports), and (2) has been subject to such filing
requirements for the past 90 days.

Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405
of Regulation S-K is not contained herein, and will not be contained, to the
best of registrant's knowledge, in definitive proxy or information statements
incorporated by reference in Part III of this Form 10-K or any amendment to this

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

Form 10-K. [X]

The aggregate market value of the voting stock held by non-affiliates of the registrant as of March 20, 2002 was approximately \$609,000,000.

On March 20, 2002 the registrant had outstanding 25,000,135 shares of common stock, \$.01 par value, which is registrant's only class of common stock.

=====
DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Proxy Statement for 2002 Annual Meeting of Shareholders (to be filed with the Commission under Regulation 14A within 120 days after the end of the registrant's fiscal year and, upon such filing, to be incorporated by reference into Part III)

CAUTIONARY STATEMENT

The following is a cautionary statement made under the Private Securities Litigation Reform Act of 1995: With the exception of historical facts, the

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

statements contained in this Annual Report on Form 10-K or incorporated by reference may be forward looking statements. Actual results may differ materially from those contemplated. Forward looking statements involve risks and uncertainties, including but not limited to the following risks: 1) cyclical downturns affecting the markets for capital goods, 2) our ability to achieve anticipated synergies in our acquired businesses, 3) substantial increases in interest rates that impact the cost of the Company's outstanding debt, 4) our ability to satisfy various covenant requirements under our existing credit facility, 5) the success of Management in increasing sales and maintaining or improving the operating margins of its businesses, 6) the availability of or material increases in the costs of select raw materials or parts, and 7) actions taken by competitors. Investors are directed to the Company's documents filed with the Securities and Exchange Commission.

PART I

Unless the context requires otherwise, references in this Annual Report to "we," "us" or "our" refer collectively to REGAL-BELOIT CORPORATION and its subsidiaries.

ITEM 1. Business

Our Company

We are a leading manufacturer and marketer of industrial electric motors, electric power generation components and controls, mechanical motion control products, and cutting tools, serving markets predominantly in the United States as well as throughout the world. Our products are used in a variety of essential industrial applications, and we believe we have one of the most comprehensive product lines in the markets we serve. We sell our products using more than 20 recognized brand names through a multi-channel distribution model, which we believe provides us with a competitive selling advantage and allows us to more fully penetrate our target markets.

Our business is organized in two segments: our electrical group, which represented 69% of our 2001 net sales, and our mechanical group, which represented 31% of our 2001 net sales. Our electrical group manufactures and markets a full line of alternating current (AC) and direct current (DC) industrial electric motors, electric power generation components and controls, and electrical connecting devices. Our mechanical group manufactures and markets a broad array of mechanical products, including gears and gearboxes, marine transmissions, high-performance automotive transmissions and ring and pinions, manual valve actuators, and cutting tools. Original equipment manufacturers and end users in a variety of motion control and other industrial applications increasingly combine the types of electrical and mechanical products we offer. We seek to take advantage of this trend and to enhance our market penetration by leveraging cross-marketing and product line bundling opportunities between products in our electrical and mechanical groups.

We sell our products directly to original equipment manufacturers and distributors across many markets. Our two business segments are divided into multiple business units, with each unit typically having its own branded product offering and sales organization. These sales organizations consist of varying combinations of our own internal direct sales people as well as exclusive and non-exclusive manufacturers' representative organizations. We manufacture the vast majority of the products that we sell and have manufacturing, sales and distribution facilities throughout the United States and Canada as well as in Europe and the Far East.

We believe our competitive strengths include our:

- o leadership in our major market segments

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

- o comprehensive product offering and leading brands
- o multi-channel and multi-brand distribution model
- o rapid response capabilities o product development focus
- o broad and diverse customer base
- o experienced management team

Our business strategy includes growing revenues organically in excess of market rates, continuously lowering our manufacturing costs and pursuing strategic acquisitions. Our specific revenue growth initiatives include:

- o leveraging cross-marketing and product line bundling opportunities
- o introducing new products

2

- o capturing custom product sales
- o growing our power generation business

Major initiatives in process to lower our manufacturing costs include completing the integration of Leeson Electric Corporation and capitalizing on operating synergies from the acquisition; further improving our operational efficiencies; and focusing on sourcing and logistics opportunities. We will also seek to broaden our market coverage by acquiring businesses and product lines that provide a strategic fit with our existing businesses.

Electrical Group

Our electrical group manufactures and markets a full line of AC and DC industrial electric motors, electric power generation components and controls, and electrical connecting devices. We entered the industrial electric motor and electric power generation markets in March 1997 with our acquisition of Marathon Electric Manufacturing Corporation. Subsequent acquisitions of the Lincoln Motors business of Lincoln Electric Holdings, Inc. in 1999, Thomson Technology, Inc. in 2000 and Leeson Electric Corporation in 2000 have been integrated to form our current electrical group. Our expansion into the electric motor and electric power generation markets in 1997 was part of our strategy to leverage our core competencies in industrial manufacturing and to complement our existing mechanical businesses. We estimate that a substantial portion of the mechanical motion control products that we manufacture are powered by an electric motor.

Our electrical group manufactures and markets AC and DC industrial electric motors ranging in size from sub-fractional to large integral horsepower through 800 horsepower in AC and from sub-fractional through small integral horsepower in DC. We offer approximately 5,500 stock models of electric motors in addition to the motors we produce to specific customer specifications. We also produce and market precision servo motors, electric generators ranging in size from five kilowatts through four megawatts, automatic transfer switches and paralleling switchgear to interconnect and control electric power generation equipment and electrical connecting devices such as terminal blocks, fuse holders and power blocks. Additionally, our electrical group markets a line of AC and DC adjustable speed drives. We sell our electrical group products to distributors, original equipment manufacturers and end users across many markets.

In 2001, we created, within the electrical group, our motor technologies group to fully leverage potential efficiencies across our electric motor operations.

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

This motor technologies group will centralize and manage the manufacturing, purchasing, engineering, accounting, information technology and quality control activities of our Marathon, Lincoln and Leeson electric motor businesses. Furthermore, the motor technologies group is specifically fostering the sharing of best practices across each of the three motor businesses and creating focused centers of excellence in each of our motor manufacturing functions.

Our power generation business, which includes electric generators and power generation components and controls, represents a significant and growing portion of our electrical group net sales. The market for electric power generation components and controls is growing as a result of a desire on the part of end users to reduce losses due to power disturbances. We intend to continue to seek ways to take advantage of the growing market for prime and standby power generation in the United States and overseas by expanding our line of generators to meet higher and more sophisticated power generation requirements. With our June 2000 acquisition of Thomson Technology, we specifically targeted the emerging power generation controls market and now offer automatic transfer switches, paralleling switchgear and controls, and systems controls. When these control products are bundled with our Marathon generators, we are able to provide critical components of a system solution to power generation markets throughout the world.

3

The following is a description of our major electrical group businesses and the primary products that they manufacture and market:

Leeson Electric. Manufactures AC motors up to 800 horsepower and DC motors up to five horsepower, gear reducers, gearmotors and drives primarily for the power transmission, pump, food processing, fitness equipment and industrial machinery markets.

Lincoln Motors. Manufactures AC motors from 1/4 horsepower to 800 horsepower primarily for industrial and commercial pumps, compressors, elevator and machine tools, and specialty products.

Marathon Electric. Manufactures AC motors up to 800 horsepower primarily for HVAC, pumps, power transmissions, fans and blowers, compressors, agriculture products, processing and industrial manufacturing equipment.

Marathon Generators. Manufactures AC generators from five kilowatts to four megawatts that primarily serve the standby power, prime power, refrigeration, irrigation and wind power markets.

Marathon Special Products. Manufactures fuse holders, terminal blocks, and power blocks primarily for the HVAC, telecommunications, electric control panel, utilities and transportation markets.

Thomson Technology. Manufactures automatic transfer switches, paralleling switchgear and controls, and systems controls primarily for the electric power generation market.

Mechanical Group

Our mechanical group manufactures and markets a broad array of mechanical motion control products and cutting tools. Our products include: standard and custom worm gear, bevel gear, helical gear and concentric shaft gearboxes; marine transmissions; high-performance after-market automotive transmissions and ring and pinions; custom gearing; gearmotors; manual valve actuators and cutting tools. Our gear and transmission related products primarily control motion by transmitting power from a source, such as a motor or engine, to an end use, such

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

as a conveyor belt, usually reducing speed and increasing torque in the process. Our valve actuators are used primarily in oil and gas, water distribution and treatment and chemical processing applications. Our high-speed steel and carbide rotary perishable cutting tools are used in metalworking applications. Mechanical group products are sold to original equipment manufacturers, distributors and end users across many industry segments.

The following is a description of our major mechanical group businesses and the primary products they manufacture and market:

CML (Costruzioni Meccaniche Legnanesi S.r.L.). Manufactures bevel gear valve actuators primarily for the oil, gas, wastewater and water distribution markets.

Durst. Manufactures standard and specialized industrial transmissions and hydraulic pump drives primarily for the construction, agriculture, energy, material handling, forestry, lawn and garden and railroad maintenance markets.

Electra-Gear. Manufactures specialized aluminum gear reducers and gearmotors primarily for the food processing, medical equipment, material handling and packaging markets.

Foote-Jones/Illinois Gear. Manufactures large-scale parallel shaft and right-angle gear drives and custom gears up to 100 inches in diameter primarily for the mining, oil, pulp and paper, forestry, aggregate, construction and steel markets.

Grove Gear. Manufactures standard and custom industrial gear reducers primarily for the material handling, food processing, robotics, healthcare and power transmission markets.

4

Hub City. Manufactures gear drives, sub-fractional horsepower gearmotors, mounted bearings and accessories primarily for the packaging, construction, material handling, healthcare and food processing markets.

Mastergear. Manufactures manual valve actuators for liquid and gas flow control primarily for the petrochemical processing, fire protection and wastewater markets.

New York Twist Drill. Manufactures a full line of industrial quality cutting tools in high speed steel and carbide primarily for the aerospace, automotive, railroad and general manufacturing markets.

Ohio Gear. Manufactures gear reducers and gearmotors primarily for the material handling, lawn and garden vehicle and food processing markets.

Opperman Mastergear, Ltd. Manufactures valve actuators and industrial gear drives primarily for the material handling, agriculture, mining and liquid and gas flow control markets.

Regal Cutting Tools. Manufactures high-speed steel and carbide rotary cutting tools primarily for the aerospace, agriculture, automotive and general industrial markets.

Richmond Gear. Manufactures ring and pinions and transmissions primarily for the high-performance automotive aftermarket.

Velvet Drive Transmissions. Manufactures marine and industrial transmissions primarily for the pleasure boat, off-road vehicle and forestry

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

markets.

The Building of Our Business

Our growth from our founding as a producer of high-speed cutting tools in 1955 to our current size and status has largely been the result of the acquisition and integration of 37 businesses to build a strong multi-product offering. Our senior management has substantial experience in the acquisition and integration of businesses, aggressive cost management, and efficient manufacturing techniques, all of which represent activities that are critical to our long-term growth strategy. Since 1979, our current management team has completed and successfully integrated 22 acquisitions. We have a proven track record of acquiring complementary businesses and product lines, integrating their activities into our organization and aggressively managing their cost structures to reduce waste and unnecessary expenditures. The history of our major electrical and mechanical group acquisitions since 1990 is outlined below.

5

Business/Product Line -----	Year Acquired -----	Annual Revenues at Acquisition (in millions) -----	Product Listing at Acquisition -----
Electrical Group			
Leeson Electric Corporation	2000	\$175	AC motors (to 350 horsepower) and (to 3 horsepower) gear reducers, g and drives
Thomson Technology, Inc.	2000	\$14	Automatic transfer switches, paral switchgear and controls, and syste
Lincoln Motors	1999	\$50	AC motors (1/4 to 800 horsepower)
Marathon Electric Manufacturing Corporation	1997	\$245	AC motors (to 500 horsepower), AC (5 kilowatt to 2.5 megawatt), fuse terminal blocks and power blocks
Mechanical Group			
Spiral bevel gear product line of Philadelphia Gear	2001	\$4	Spiral bevel gears
Velvet Drive Transmissions	1995	\$27	Marine and industrial transmission
Hub City, Inc.	1992	\$44	Gear drives, sub-fractional horsep gearmotors, mounted bearings and a
Opperman Mastergear, Ltd. (U.K., U.S. and Germany)	1991	\$20	Manual valve actuators for liquid flow control and industrial gear d

Sales, Marketing and Distribution

We sell our products directly to original equipment manufacturers and distributors across many markets. Our two business segments are divided into multiple business units, with each unit typically having its own branded product offering and sales organization. These sales organizations consist of varying combinations of our own internal direct sales people as well as exclusive and non-exclusive manufacturers' representative organizations. On a combined basis,

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

our individual business units' sales organizations consist of more than 120 direct sales employees and 430 exclusive and non-exclusive manufacturers' representatives from 170 organizations as of January 2002. In 2001, across all of our business units, we sold products to more than 6,500 original equipment manufacturers and 11,000 distributors.

We believe that our effective use of information technology significantly enhances our ability to provide customer focused quality and further differentiates us from many of our competitors. Our website allows customers easy access to business and product information, and contains the latest product introductions, distributor information, installation manuals, technical bulletins and customer service. For example, through our electrical group websites, we have an e-commerce portal that provides our independent manufacturers' representatives, distributors and employees with constant access to real-time information such as account status, order status, engineering and competitive information, stock product availability, pricing and order entry. In addition, customers are able to search our stock catalogs for motor, gearmotor, drive, part or catalog number.

Markets and Competitors

The overall market for our electrical products is estimated at \$8 billion annually, although we believe that we compete primarily in the industrial sector of the domestic electric motor market, a \$2.5 billion segment of the overall market. We believe approximately 60% of all electricity generated in the U.S. runs through electric motors. With the acquisitions of Marathon Electric in 1997, Lincoln Motors in 1999 and Leeson Electric in 2000, we believe we have become one of the largest producers of industrial electric motors in the United States and hold a market position in this segment close to Baldor Electric Company, the current market leader. In addition, we believe that we are the largest electric generator manufacturer in the United States that is not affiliated with a diesel engine manufacturer. Major domestic competitors for the electrical group other than Baldor Electric include U.S. Electrical Motors (a division of Emerson

6

Electric Co.), Reliance Electric Company (a division of Rockwell International), General Electric Company and Newage (a division of Cummins, Inc). Major foreign competitors include Siemens AG, Toshiba Corporation, Weg S.A., Leroy-Somer, Inc. and ABB Ltd.

Our mechanical group serves various markets and competes with a number of different companies depending on the particular product offering. We believe that we are the leading manufacturer of several products offered by our mechanical group and that we are the leading manufacturer in the United States of worm gear drives and bevel gear drives. Our competitors in these markets include Boston Gear (a division of Colfax Corporation), Reliance Electric Company (a division of Rockwell International), Emerson Electric Co. and Winsmith (a division of Peerless-Winsmith, Inc.). Major foreign competitors include SEW Eurodrive GmbH & Co., Flender GmbH, Sumitomo Corporation and Zahnrad Fabrik GmbH & Co.

During the past several years, niche product market opportunities have become more prevalent due to changing market conditions. Our markets have also been impacted by decisions by larger manufacturers not to compete in lower volume or specialized markets. Other manufacturers, which historically may have made component products for inclusion in their finished goods, have chosen to outsource their requirements to specialized manufacturers like us because we can make these products more cost effectively. In addition, we have capitalized on this competitive climate by making acquisitions and increasing our manufacturing

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

efficiencies. Some of these acquisitions have created new opportunities by allowing us to enter new markets in which we had not been involved. In practice, our operating units have sought out specific niche markets concentrating on a wide diversity of customers and applications. We believe that we compete primarily on the basis of quality, price, service and our promptness of delivery.

Product Development and Engineering

Each of our business units has its own product development and design teams that continuously enhance our existing products and develop new products for our growing base of customers that require custom solutions. We have one of the electric motor industry's most sophisticated product development and testing laboratories. We believe these capabilities provide a significant competitive advantage in the development of high quality motors and electric generators incorporating leading design characteristics such as low vibration, low noise, improved safety, reliability and enhanced energy efficiency. An example of the success of our research and development efforts is our recently introduced line of microMAX™ AC inverter duty motors, which won the 2001 "Product of the Year" award in its category from Plant Engineering magazine.

We are continuing to expand our business by developing new, differentiated products in each of our business segments. We work closely with our customers to develop new products or enhancements to existing products that improve performance and meet their needs. For example, we have redesigned more than 50% of our electric motor line to meet the new NEMA Premium Compliant Electric Motor standards. These redesigned motors offer increased efficiency that results in significant cost savings for customers over previous models. In addition, we have recently introduced many new product lines, including a line of AC inverter duty motors, a line of high efficiency, low vibration severe duty electric motors and large frame 1 1/2 to 4 megawatt electric generators. Furthermore, in 2002, we plan to introduce various new products, including a line of high efficiency helical worm, helical bevel and parallel shaft drives. This new line of drives will complement our existing high efficiency helical in-line drives and will allow us to compete more effectively in this growing segment of the gear drive market.

Manufacturing and Operations

Our vertically integrated manufacturing operations, including our own cast iron foundry and aluminum die casting and steel stamping operations, are an important element of our rapid response capabilities. In addition, we have an extensive internal logistics operation that consists of 56 semi-tractors and 90 semi-

7

trailers and a network of distribution facilities with the capability to modify stock products to quickly meet specific custom requirements in many instances.

We manufacture a majority of the products that we sell but also strategically outsource components and finished goods to an established global network of suppliers. Although we have aggressively pursued global sourcing to reduce our overall costs, we still maintain a dual sourcing capability in our existing domestic facilities to ensure a reliable supply source for our customers. Most of our operating units conduct their manufacturing operations independently in one or more facilities. Our electrical group businesses, other than Marathon Special Products and Thomson Technology, are operated as part of our motor technologies group, which also has responsibility for all power generation operations, including sales and marketing. We regularly invest in machinery and equipment and other improvements to, and maintenance of, our facilities.

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

Additionally, we have typically obtained significant amounts of quality capital equipment as part of our acquisitions, often increasing overall capacity and capability.

The manufacturing operations of both our electrical group and mechanical group are highly integrated. Although raw materials and selected parts such as bearings and seals are purchased, this vertical integration permits us to produce most of our required component parts when needed. We believe this results in lower production costs, greater manufacturing flexibility and higher product quality, as well as reducing our reliance on outside suppliers. Base materials for our products consist primarily of: steel in various types and sizes, including bearings and weldments; copper magnet wire; and ferrous and non-ferrous castings. We purchase our raw materials from many suppliers and, with few exceptions, do not rely on any single supplier for any of our base materials.

We have also continued to upgrade our manufacturing equipment and processes, including increasing our use of computer aided manufacturing systems, developing our own testing systems, redesigning plant layout and redesigning products to take full advantage of our more productive equipment and to improve product flow. We believe that our continued product redesign and efficient plant layout often provide us with a competitive cost advantage in our manufacturing operation. Our goal is to be a low cost producer in our core product areas.

Backlog

Our business units have historically shipped the majority of their products in the month the order is received. Since total backlog is less than 15% of our annual sales, we believe that backlog is not a reliable indicator of our future sales. As of December 31, 2001, our backlog was \$68,152,000 as compared to \$96,000,000 on December 31, 2000. We believe that virtually all of our backlog is shippable in 2002.

Patents, Trademarks and Licenses

We own a number of United States patents and foreign patents relating to our businesses. While we believe that our patents provide certain competitive advantages, we do not consider any one patent or group of patents essential to our business. We also use various registered and unregistered trademarks, and we believe these trademarks are significant in the marketing of most of our products. However, we believe the successful manufacture and sale of our products generally depends more upon our technological, manufacturing and marketing skills.

Employees

As of December 31, 2001, the Company employed approximately 5,300 persons, of which approximately 20% were covered by collective bargaining agreements. We consider our employee relations to be very good.

Environmental Matters

We are subject to Federal, State and local environmental regulations. We are currently involved with environmental proceedings related to certain of our facilities. Based on available information, we believe that the outcome of these proceedings and future known environmental compliance costs will not have a material adverse effect on our financial position or results of operations.

Executive Officers

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

The names, ages, and positions of the executive officers of the Company as of December 31, 2001, are listed below along with their business experience during the past five years. Officers are elected annually by the Board of Directors at the Meeting of Directors immediately following the Annual Meeting of Shareholders in April. There are no family relationships among these officers, nor any arrangements of understanding between any officer and any other persons pursuant to which the officer was selected.

Name ----	Age ---	Position -----	Business Experience and Principal Occ -----
James L. Packard.....	59	Chairman, President and Chief Executive Officer	Elected Chairman in 1986; Chief Executive since 1984; President since 1980.
Henry W. Knueppel.....	53	Executive Vice President	Elected Executive Vice President in 1 September, 1997 until December, 1999, as President of Marathon Electric.
Kenneth F. Kaplan.....	56	Vice President, Chief Financial Officer and Secretary	Joined Company in September 1996; elected President, Chief Financial Officer in 1997 and Secretary in April, 1997; previously Gehl Company, West Bend, Wisconsin, a President - Finance and Treasurer.
David L. Eisenreich.....	58	Vice President and President, Motor Technologies Group	Elected Vice President and named President of Motor Technologies Group in 2001; Senior Vice President of Operations at Marathon Electric from 1997 until 2001; former Senior Vice President of Administration and Vice President of Administration and Vice President of Corporate Industrial Relations at Marathon Electric.
Gary M. Schuster.....	46	Vice President and President, Mechanical Components Group	Elected Vice President and named President of Mechanical Components Group in 2001; previously Vice President of Manufacturing at Marathon Electric from 1997 until 2001; Vice President and General Manager at Lincoln Electric from 1978 until 1997.
Fritz Hollenbach.....	47	Vice President, Administration and Human Resources	Named Vice President, Administration and Human Resources in 2001; Vice President Human Resources at Marathon Electric from 1997 until 2001; previously Human Resource Manager at Foote-Jones/Illinois Gear and Manufacturing from 1994 until 1997; Human Resource Manager at Cutting Tool Group from 1991 until 1994.

ITEM 2. Properties

We have manufacturing, sales and service facilities throughout the United States and Canada and in Europe and the Far East. Our electrical group currently operates 38 manufacturing and service and distribution facilities. The electrical group's present operating facilities contain a total of approximately 2,091,000 square feet of space of which approximately 622,000 square feet are leased. Our mechanical group currently operates 19 manufacturing and service and distribution facilities. The mechanical group's present operating facilities contain a total of approximately 1,530,000 square feet of space of which approximately 57,000 square feet are leased. Our principal executive offices are

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

located in Beloit, Wisconsin in an owned approximately 24,000 square foot office building. We believe our equipment and facilities are well maintained and adequate for our present needs.

ITEM 3. Legal Proceedings

On or about February 1, 2002, an action was filed in the United States District Court for the Central District of Illinois against the Company and its Ohio Gear division ("Ohio Gear"). The plaintiffs in the litigation allege that in 1998 and 1999 Ohio Gear supplied defective differential assemblies that were used in transaxles manufactured by the plaintiffs. The alleged defect relates to a component part that Ohio Gear had sourced from a third party supplier. The plaintiffs allege that they have incurred damages in excess of \$3.2 million, including repair and replacement costs, lost profits, and loss of goodwill. The plaintiffs seek recovery of \$3.2 million plus fees and expenses.

The Company believes it has both the right to recover costs that it incurs in the litigation from the third party supplier of the defective component part and defenses to the bulk of the plaintiffs' claims. The Company intends to defend its position vigorously in the litigation and to pursue recovery from the third party supplier to the extent that the Company incurs costs in connection with this matter. Given the preliminary stage of the process, the Company cannot currently predict the ultimate outcome of the litigation.

From time to time, the Company, in the normal course of business, is also involved in various other claims and legal actions arising out of its operations. The Company does not believe that the ultimate disposition of any currently pending claims or actions would have a material adverse effect on the Company or its financial condition.

ITEM 4. Submission of Matters to a Vote of Security Holders

There were no matters submitted to a vote of security holders during the quarter ended December 31, 2001.

10

PART II

ITEM 5. Market for the Registrant's Common Equity and Related Shareholder Matters

The Company's Common Stock, \$.01 par value ("Common Stock"), is traded on the American Stock Exchange under the symbol "RBC." The following table sets forth the range of high and low closing sales prices for the Common Stock for the period from January 1, 2000 through December 31, 2001:

	2001			2000	
	Price Range		Dividends Paid	Price Range	
	High	Low		High	Low
1st Quarter.....	\$22.30	\$16.40	\$.12	\$21.63	\$16.50
2nd Quarter.....	21.35	16.10	.12	19.00	15.63

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

3rd Quarter.....	22.50	16.90	.12	17.78	15.25
4th Quarter.....	22.90	17.05	.12	19.35	14.60

The Company has paid 166 consecutive quarterly dividends through January 2002. The number of registered holders of Common Stock as of December 31, 2001 was 923.

ITEM 6. Selected Financial Data

The selected statement of income data for the years ended December 31, 2001, 2000 and 1999 and the balance sheet data at December 31, 2001 and 2000 are derived from, and are qualified by reference to, the audited financial statements of the Company included elsewhere in this Annual Report on Form 10-K. The selected statement of income data for the years ended December 31, 1998 and 1997 and the balance sheet data at December 31, 1999, 1998 and 1997 are derived from audited financial statements not included herein.

(In Thousands, Except Per Share Data)

	Year Ended December 31			
	2001	2000	1999	1998
	-----	-----	-----	-----
Net Sales.....	\$663,571	\$598,203	\$550,661	\$550,2

ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read together with "Selected Financial Data" and our consolidated financial statements, including the related notes, included elsewhere in this report.

Overview

We are a leading manufacturer and marketer of industrial electric motors, electric power generation components and controls, mechanical motion control products, and cutting tools, serving markets predominantly in the United States as well as throughout the world. Our business is organized in two segments. Our electrical group manufactures and markets a full line of alternating current

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

(AC) and direct current (DC) industrial electric motors, electric power generation components and controls, and electrical connecting devices. Our mechanical group manufactures and markets a broad array of mechanical products, including gears and gearboxes, marine transmissions, high-performance automotive transmissions and ring and pinions, manual valve actuators and cutting tools. We have grown our business during the past several years, in part, through a series of acquisitions, including the acquisitions of the spiral bevel gear product line of Philadelphia Gear Company in January 2001, Leeson Electric Corporation in September 2000, Thomson Technology, Inc. in June 2000 and the Lincoln Motors business of Lincoln Electric Holdings, Inc. in May 1999. See Note 4 of Notes to Consolidated Financial Statements.

Our business is cyclical and dependent on industrial and consumer spending and is therefore impacted by the strength of the economy generally, interest rates and other factors. The economic slowdown that began in mid-2000 and became an economic recession in 2001 was the most significant factor in our reduced performance in 2001. Our net sales, while reaching a record \$663,571,000 in 2001, 10.9% greater than in 2000, were down 11.4% when the impact of the two acquisitions we made in 2000 is excluded. Net income in 2001 was \$19,590,000, a 42.0% reduction from the previous year.

We improved our operating cash flow by more than \$29,600,000 in 2001, primarily as a result of reductions in receivables and inventories. Combined with cash flow from net income, depreciation, and amortization, we generated nearly \$82,000,000 of operating cash flow in 2001. This enabled us, after funding capital expenditures and paying shareholder dividends, to reduce our outstanding total debt by nearly \$48,000,000 during 2001.

Results of Operations

2001 versus 2000

Net sales in 2001 were \$663,571,000, a 10.9% increase from 2000 net sales of \$598,203,000. Excluding those net sales from the 2000 acquisitions of Leeson Electric and Thomson Technology necessary for comparability purposes, our 2001 net sales were 11.4% below 2000 net sales. This decrease was primarily due to reduced sales volumes as a result of the economic recession that impacted both of our operating groups. Electrical group net sales increased 29.1% to \$456,956,000 in 2001 from \$353,954,000 in 2000. Excluding the two acquisitions we made in 2000, electrical group net sales in 2001 were 8.6% below comparable 2000. Mechanical group net sales decreased 15.4% to \$206,615,000 in 2001 from \$244,249,000 in 2000.

Our gross profit increased 5.4% to \$165,877,000 in 2001 from \$157,429,000 in 2000. Gross profit as a percentage of net sales (gross profit margin) declined to 25.0% in 2001 from 26.3% in 2000 due primarily to lower production volumes resulting from decreasing sales and planned inventory reductions and to increased price competition. Income from operations declined 21.7% to \$56,060,000 in 2001, or 8.4% of net sales, from \$71,608,000, or 12.0% of net sales, in 2000. The decrease in income from operations as a percentage of net sales (operating income margin) was due to a combination of the decrease in gross profit margin and an increase in operating expenses as a percentage of net sales to 16.5% in 2001 from

14.3% in 2000. The increase in operating expenses as a percentage of net sales was due primarily to the fact that Leeson Electric selling expenses, as a percentage of net sales, were greater than those we have historically incurred. In addition, a large part of our operating expenses are relatively fixed and our goodwill amortization increased by \$3.4 million in 2001. Electrical group

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

operating income margin decreased to 8.8% in 2001 from 11.5% in 2000 and mechanical group operating income margin declined to 7.7% in 2001 from 12.6% in 2000. The decrease in electrical group operating income margin was due primarily to the increase in operating expenses as a percentage of net sales described above. The decrease in mechanical group operating income margin resulted from a combination of higher operating expenses as a percentage of net sales and to a lower 2001 gross profit margin. See Note 10 of Notes to Consolidated Financial Statements.

Interest expense increased to \$22,239,000 in 2001 from \$15,332,000 in 2000, primarily as a result of debt incurred to finance our acquisition of Leeson Electric at the end of September 2000. Interest expense decreased steadily by quarter in 2001, due to declining interest rates and as a result of our reducing total debt by nearly \$48,000,000 during 2001. The average rate of interest we paid on outstanding debt in 2001 was 5.9% as compared to 7.4% in 2000. Because our income before income taxes decreased in 2001 from 2000, the impact of non-deductible goodwill amortization resulted in an increase in our effective tax rate in 2001 to 42.5% of income before income taxes from 40.3% in 2000.

Net income decreased 42.0% to \$19,590,000 in 2001 from \$33,771,000 in 2000. As a percentage of net sales, net income decreased to 3.0% in 2001 from 5.6% in 2000. Basic earnings per share were \$.94 and diluted earnings per share were \$.93 in 2001, as compared to \$1.61 (both basic and diluted) in 2000, representing a 41.6% and 42.2% decrease, respectively.

2000 versus 1999

Our net sales increased 8.6% to \$598,203,000 in 2000 from \$550,661,000 in 1999. Electrical group net sales increased 19.7% to \$353,954,000 in 2000 from \$295,694,000 in 1999. This increase reflects a full year of sales from Lincoln Motors, which we acquired in 1999. Excluding the Leeson Electric and Thomson Technology acquisitions, the increase in 2000 from 1999 was 3.8%. Mechanical group net sales decreased 4.2% to \$244,249,000 in 2000 from \$254,967,000 in 1999. This decrease was due primarily to broad-based weakness in the agriculture, transportation, marine, construction equipment and industrial machinery markets, particularly in the second half of 2000. We consider the diversity of markets served by our two operating groups as a key asset; however, new product introductions and increased market penetration achieved in 2000 did not offset the broad-based market slowdown.

All net sales, cost of sales and operating expenses have been restated to reflect the required accounting change, adopted October 1, 2000, for shipping and handling billings and costs. As a result of this accounting change, 2000 net sales increased \$7,919,000, cost of sales increased \$17,930,000, and operating expenses decreased \$10,011,000. Similarly, 1999 net sales increased \$6,029,000, cost of sales increased \$13,321,000 and operating expenses decreased \$7,292,000. This change had no impact on net income or income from operations in any period. All prior periods have been restated to reflect this accounting change.

Gross profit increased 9.2% to \$157,429,000 in 2000 from \$144,168,000 in 1999. As a percentage of net sales, gross profit margin of 26.3% in 2000 was slightly higher than 26.2% in 1999. Income from operations decreased 1.1% to \$71,608,000 in 2000, or 12.0% of net sales, from \$72,440,000, or 13.2% of net sales, in 1999. The decrease in operating income margin was due to an increase in operating expenses as a percentage of net sales to 14.3% in 2000 from 13.0% in 1999. The increased percentage resulted primarily from higher selling expenses during 2000 and to Leeson Electric's selling expenses as a percentage of net sales being greater than those we have historically incurred. Electrical group operating income margin decreased to 11.5% in 2000 from 12.4% in 1999, while the mechanical group operating income margin declined to 12.6% in 2000 from 14.0% in 1999. The operating income margin decrease in the electrical group resulted primarily from increased selling expenses as a percentage of net sales, which

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

were partly offset by improvement in gross profit margin from 1999. Favorable product mix of sales and

13

improved manufacturing productivity enabled the electrical group to more than offset the impact of higher manufacturing costs in 2000. The mechanical group decrease was primarily due to a combination of lower sales volume, higher raw material, fuel and labor costs, reduced production levels and higher selling expenses as a percentage of net sales.

Interest expense increased 63.0% to \$15,332,000 in 2000 from \$9,406,000 in 1999, virtually all as a result of the Leeson Electric acquisition. The higher interest expense was due to a combination of borrowing approximately \$260,000,000 to finance the Leeson Electric acquisition, an increase in the interest rate paid on virtually all our debt from 6.9% to 7.9% effective September 29, 2000 and increases during the first half of 2000 in the London Interbank Offered Rate, or LIBOR, the rate upon which the interest rate we pay is based. The average rate of interest we paid on outstanding debt in 2000 was 7.4% as compared to 5.6% in 1999. Our effective tax rate in 2000 increased to 40.3% of income before taxes from 39.8% in 1999. The increase was due primarily to miscellaneous foreign tax-related items in 2000.

Net income decreased 11.3% to \$33,771,000 in 2000 from \$38,067,000 in 1999. Net income as a percentage of net sales decreased to 5.6% in 2000 from 6.9% in 1999. The reduced percentage was due in part to the impact on the fourth quarter of the Leeson Electric acquisition, which added net sales but was approximately neutral to net income as we had expected, and in part to lower earnings in 2000 from our other operations. Basic and diluted earnings per share in 2000 were \$1.61, 11.5% and 10.6% below, respectively, 1999's basic earnings per share of \$1.82 and diluted earnings per share of \$1.80.

Liquidity and Capital Resources

Our working capital decreased 13.3% to \$161,044,000 at December 31, 2001 from \$185,781,000 at December 31, 2000. The decrease resulted primarily from an aggregate reduction of more than \$33,000,000 in our receivables and inventories in 2001. The reduction in our receivables was due primarily to the impact of the U.S. economic recession on our sales volume and operations and occurred primarily in the fourth quarter of 2001. The decrease in inventories was due in part to planned reductions in production levels and was made primarily in the first nine months of 2001. Despite the reduction in our working capital, our current ratio at December 31, 2001 remained substantially the same as it was at December 31, 2000.

Cash flow from operations increased 57.0% to \$81,769,000 in 2001 from \$52,089,000 in 2000. The major factors contributing to the increased operating cash flow were \$16,673,000 from reduced receivables and \$17,014,000 from reduced inventories. Cash flow used in investing activities was \$18,246,000 in 2001 and \$285,020,000 in 2000. The 2000 investing activities included the acquisition of Leeson Electric. In 2001, capital expenditures were \$15,426,000 compared to \$16,994,000 in 2000. The capital expenditure figures in any year do not include the amounts of property, plant and equipment obtained in connection with our acquisitions. Such capital additions are included as part of acquisition costs under the heading "Business acquisitions" in the Consolidated Statements of Cash Flows. We currently expect capital expenditures for 2002 to be approximately \$20,000,000, although our commitments for property, plant and equipment as of December 31, 2001 were \$431,000. We believe that our present facilities, augmented by planned capital expenditures, are sufficient to provide adequate capacity for our operations in 2002. Cash flow used in financing activities in 2001 totaled \$59,474,000, of which \$48,598,000 on a net basis was used to repay

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

debt, \$10,022,000 was used to pay shareholder dividends and \$1,042,000 was used in January 2001 to repurchase 60,700 shares of our common stock at a weighted average purchase price of \$17.17 per share. We have not repurchased any shares of our common stock since January 2001.

Our primary financing source is our \$350,000,000 long-term revolving credit facility that expires on December 31, 2005, which we reduced from \$375,000,000 when we completed the stock offering described in this paragraph. Our credit facility requires us to maintain specified financial ratios and to satisfy certain financial condition tests. We were in compliance with all of the financial ratios and financial condition tests specified by our amended credit agreement as of December 31, 2001. In March 2002, we completed a public offering of 4,109,985 shares of our common stock, including the sale of

14

536,085 shares pursuant to the exercise of the underwriters' over-allotment option. The net proceeds of the 4,109,985 shares issued were approximately \$90,200,000, which was used to repay our outstanding debt. With the application of the net proceeds from this offering, we believe we will be able to satisfy the financial ratios and tests specified in our credit facility for the foreseeable future, absent unexpected changes in general business and economic conditions.

At December 31, 2001, we had, after deducting approximately \$2,800,000 of standby letters of credit, \$30,200,000 of available borrowing capacity. On a pro forma basis giving effect to the public offering of our common stock, we would have had \$95,400,000 of available borrowing capacity at December 31, 2001. We believe that the combination of borrowing availability under our credit facility and operating cash flow will provide sufficient cash availability to finance our existing operations for the foreseeable future. Our outstanding total debt of \$345,787,000 at December 31, 2001 reflected a reduction of \$47,829,000 from \$393,616,000 at December 31, 2000. The debt reduction was due primarily to the application of cash generated from operations by the above-mentioned receivables and inventory reductions. See Note 5 of Notes to Consolidated Financial Statements.

As a result of our capital structure, we are exposed to interest rate risk. Virtually all of our debt is under a credit facility with a variable interest rate based on a margin above LIBOR. As a result, interest rate changes impact our future earnings and cash flows assuming other factors are constant. A hypothetical 10% change in our weighted average borrowing rate on the outstanding debt at December 31, 2001, would result in a change in after-tax annual earnings of approximately \$900,000. We have no material foreign currency rate risk. In addition, we do not have any material derivative instruments.

Recent Accounting Pronouncements

On June 30, 2001, the Financial Accounting Standards Board finalized Statements of Financial Accounting Standards No. 141, "Business Combinations", and No. 142, "Goodwill and Other Intangible Assets". Statement No. 141 requires all business combinations initiated after June 30, 2001 to use the purchase method of accounting. Under the requirements of Statement No. 142, intangible assets meeting specific criteria will be separately identified from goodwill acquired in future acquisitions and amortized over their individual useful lives. Also, our existing goodwill at June 30, 2001 will no longer be amortized, effective January 1, 2002. This will eliminate approximately \$8,400,000 of annual goodwill amortization and have a favorable annual impact on net income of approximately \$6,700,000. As of December 31, 2001, we had goodwill on our balance sheet of \$312,735,000, relating to our acquisitions of Leeson Electric, Marathon Electric and, to a lesser extent, Thomson Technology. The amount of goodwill constituted

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

approximately 42.0% of our total assets. An assessment of fair value will be used to test for impairment of goodwill on an annual basis or when circumstances indicate a possible impairment. We have completed our 2002 annual impairment test and there has been no impairment of goodwill.

Additionally, Statement No. 143, "Asset Retirement Obligations", and Statement No. 144, "Impairment or Disposal of Long-Lived Assets", have been issued by the FASB. Adoption of these Statements on January 1, 2002 will not have a material adverse effect on our consolidated financial statements.

ITEM 7A. Quantitative and Qualitative Disclosures About Market Risk

Information required by Item 305 of Regulation S-K is contained in "Management's Discussion and Analysis of Financial Condition and Results of Operations" on pages 14-15 of this report.

REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS

To the Shareholders of REGAL-BELOIT CORPORATION:

We have audited the accompanying consolidated balance sheets of REGAL-BELOIT CORPORATION (a Wisconsin Corporation) and subsidiaries as of December 31, 2001 and 2000, and the related consolidated statements of income, shareholders' investment and cash flows for each of the three years in the period ended December 31, 2001. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of REGAL-BELOIT CORPORATION and subsidiaries as of December 31, 2001 and 2000, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2001, in conformity with accounting principles generally accepted in the United States.

REGAL-BELOIT NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For The Three Years Ended December 31, 2001

(1) Nature of Operations

REGAL-BELOIT CORPORATION (the Company) is a United States-based multinational corporation. The Company is organized into two operating groups, the Mechanical Group with its principal line of business in mechanical products which control motion and torque, and the Electrical Group, with its principal line of business in electric motors and power generation products. The principal markets for the Company's products and technologies are within the United States.

(2) Accounting Policies

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly-owned and majority-owned subsidiaries. The minority interest in the earnings of the majority-owned consolidated subsidiary is not material.

Revenue Recognition

Sales and related cost of sales for all products are recognized upon shipment of the products, as shipments are FOB shipping point.

Use of Estimates

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

The preparation of financial statements in conformity with accounting principles generally accepted in the U.S. ("GAAP") requires management to make estimates and assumptions, in certain circumstances, that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expense during the reporting period. Actual results could differ from those estimates.

Foreign Currency Translation

Net assets of non-U.S. subsidiaries, whose functional currencies are other than the U.S. Dollar, are translated at the rates of exchange in effect as of year-end. Income and expense items are translated at the average exchange rates in effect during the year. The translation adjustments relating to net assets are recorded directly into a separate component of shareholders' investment. Certain other translation adjustments continue to be reported in net income and were not significant in any of the three years ended December 31, 2001.

Cash and Cash Equivalents

Cash and cash equivalents consist primarily of highly liquid investments with insignificant interest rate risk and original maturities of three months or less at date of acquisition. The carrying value of cash equivalents closely approximates their fair market value.

Life Insurance Policies

The Company maintains life insurance policies on certain officers and management which name the Company as beneficiary. The total face value of these policies was \$7,963,000 at both December 31, 2001 and 2000. The cash surrender value, net of policy loans, is \$251,000 and \$3,209,000 at December 31, 2001 and 2000, respectively, and is included as a component of Other Noncurrent Assets.

Intangible Assets

The cost of goodwill and other intangible assets is amortized on a straight-line basis over the estimated periods benefited ranging from 5 to 40 years. Goodwill amortization was \$8,401,000,

21

\$4,994,000 and \$3,845,000 in 2001, 2000 and 1999, respectively. Accumulated goodwill amortization was \$23,965,000 at December 31, 2001 and \$15,564,000 at December 31, 2000.

Effective January 1, 2002, goodwill will no longer be amortized, in accordance with SFAS No. 142, "Goodwill and Other Intangible Assets." Intangible assets with definitive lives will continue to be amortized. Goodwill and intangible assets will be evaluated in 2002 for impairment of their carrying values and at least annually thereafter. Earnings will be charged if the carrying value of goodwill or an intangible asset exceeds its fair market value.

Impairment of Long-Lived Assets

The Company reviews long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of these assets may not be recoverable. The Company assesses these assets for impairment based on estimated future cash flows from these assets.

Inventories

The approximate percentage distribution between major classes of inventory is as follows:

December 31,

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

	2001 -----	2000 -----
Raw Material.....	11%	11%
Work In Process.....	19%	21%
Finished Goods and Purchased Parts.....	70%	68%

Inventories are stated at cost, which is not in excess of market. Cost for approximately 87% of the Company's inventory at December 31, 2001 and 89% in 2000, was determined using the last-in, first-out (LIFO) method. If all inventories were valued on the first-in, first-out (FIFO) method, they would have increased by \$4,417,000 and \$3,233,000 as of December 31, 2001 and 2000, respectively. Material, labor and factory overhead costs are included in the inventories.

Property, Plant and Equipment

Property, plant and equipment is stated at cost. Maintenance and repairs are charged to expense as incurred and major renewals and improvements are capitalized.

The cost of property, plant and equipment retired or otherwise disposed of is removed from the accounts, the accumulated depreciation is removed from related reserves, and the net gain or loss is reflected in income.

The provisions for depreciation are based on the estimated useful lives of plant and equipment from the dates of acquisition and are calculated primarily using the straight-line method for financial reporting purposes and accelerated methods for income tax purposes. The estimated useful lives are:

Description -----	Life -----
Buildings and Improvements.....	10 to 45 years
Machinery and Equipment.....	3 to 15 years

Shipping and Handling Revenues and Costs

Shipping and handling costs are recorded as costs of sales and the related billings are recorded as sales.

Reclassifications

Certain reclassifications were made to the 2000 and 1999 financial statements to conform to the 2001 presentation.

22

Earnings per Share

The difference between basic and diluted earnings per share is attributable to the incremental shares to be issued under the Company's stock option plans, which totaled 255,308, 11,766 and 210,398 at December 31, 2001, 2000 and 1999, respectively.

(3) Leases and Rental Commitments

Rental expenses charged to operations amounted to \$7,314,000 in 2001, \$4,934,000 in 2000 and \$4,189,000 in 1999. The Company has future minimum rental commitments under operating leases as shown in the following table:

Year -----	(In Thousands of Dollars) -----
---------------	------------------------------------

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

2002	\$4,164
2003	3,081
2004	2,926
2005	2,227
2006	1,847
Thereafter	2,037

(4) Acquisitions

On January 16, 2001, the Company acquired, for cash, selected assets of Philadelphia Gear Company, which now comprise the Company's spiral bevel gear product line. The purchased assets included inventory and selected machinery, equipment and tooling. The operating results and assets purchased are not material to the performance or financial position of the Company.

On September 29, 2000, the Company acquired 100% of the stock of Leeson Electric Corporation, a private company, for approximately \$260,000,000 in cash. During 2001, the purchase price allocation was finalized and resulted in an increase to goodwill of approximately \$4,000,000. This resulted in approximately \$86,000,000 of the purchase price being allocated to the net assets acquired, and the remaining \$174,000,000 being recorded as goodwill. Leeson is a leading North American manufacturer and marketer of electric motors and related products. On June 29, 2000, the Company acquired the assets and liabilities of Thomson Technology, Inc. ("TTI") for approximately \$10,000,000. TTI is a Vancouver, BC, Canada based manufacturer of power systems controls for the worldwide power generation market.

On May 28, 1999, the Company purchased the Lincoln Motors business of Lincoln Electric Holdings, Inc., for a cash purchase price of approximately \$32,100,000. Lincoln Motors manufactures and markets a line of AC electric motors from 1 horsepower to 800 horsepower.

23

(5) Long-Term Debt and Bank Credit Facilities

	(In Thousands of Dollars)	
	December 31,	
Long-term debt consists of the following:	2001	2000
Revolving Credit Facility.....	\$342,000	\$392,500
Other.....	3,787	1,116
	345,787	393,616
Less-Current maturities.....	120	106
Noncurrent portion.....	\$345,667	\$393,510

The Company maintained at December 31, 2001, a \$375,000,000 revolving

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

credit facility which expires December 31, 2005 (the "Facility"). The Facility permits the Company to borrow at interest rates based upon a margin above LIBOR, which margin varies with the ratio of debt to earnings before interest, taxes, depreciation and amortization ("EBITDA"). These interest rates also vary with LIBOR. The Facility, as amended during 2001, restricts the payment of dividends to the current \$.12 per quarter and also limits acquisitions for cash to \$15 million for an individual acquisition and to \$30 million in the aggregate. The Company has pledged in the amended Facility the stock of its major subsidiaries as security for this agreement. The stock pledge and the dividend and acquisition restrictions are subject to release if the Company's ratio of funded debt to EBITDA meets certain requirements. The Facility also includes various financial covenants regarding minimum net worth, permitted debt levels and minimum interest coverage. The most restrictive financial covenant included in the Facility is the ratio of funded debt to EBITDA. This covenant ratio was 4.15 at December 31, 2001, but declines in future quarters throughout 2002 to 3.25 at December 31, 2002. The Company was in compliance with all financial covenants as of December 31, 2001.

The average balance outstanding under the Facility in 2001 was \$372,512,000. The average interest rate paid under the Facility in 2001 was 5.9% and was 4.2% at December 31, 2001. The Company had \$30,200,000 of available borrowing capacity, after deducting approximately \$2,800,000 for standby letters of credit, under the Facility at December 31, 2001. (See Management's Discussion and Analysis of Financial Statements, "Liquidity and Capital Resources").

The Company also has other loans with a total balance outstanding of \$3,787,000 at December 31, 2001. The largest is a \$2,000,000 industrial development bond issue completed on September 6, 2001.

Based on the borrowing rates currently available to the Company for bank loans with similar terms and average maturities, the fair market value of long-term debt is not materially different from the carrying value.

Maturities of long-term debt are as follows:

Year	(In Thousands of Dollars)
-----	-----
2002	\$120
2003	107
2004	232
2005	342,222
2006	678
Thereafter	2,428
Total	----- \$345,787 =====

(6) Contingencies

The Company is, from time to time, party to lawsuits arising from its normal business operations. It is believed that the outcome of these lawsuits will have no material effect on the Company's financial position or its results of operations.

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

(7) Retirement Plans

The Company has a number of retirement plans that cover most of its employees. The plans include defined contribution plans and defined benefit plans. The defined contribution plans provide for Company contributions based, depending on the plan, upon one or more of participant contributions, service and profits. Company contributions to defined contribution plans totaled \$3,329,000, \$4,628,000 and \$4,820,000 in 2001, 2000 and 1999, respectively. Benefits provided under defined benefit plans are based, depending on the plan, on employees' average earnings and years of credited service, or a benefit multiplier times years of service. Funding of these qualified defined benefit plans is in accordance with federal laws and regulations.

Net periodic pension benefit costs for the defined benefit plans were as follows:

	(In Thousands of Dollars)		
	2001	2000	1999
Service cost.....	\$1,330	\$1,253	\$1,375
Interest cost.....	3,078	2,993	2,809
Expected return on plan assets....	(5,410)	(4,858)	(4,158)
Net amortization and deferral.....	(355)	(125)	58
Net periodic (income) expense.....	\$ (1,357)	\$ (737)	\$84

25

The following table presents a reconciliation of the funded status of the defined benefit plans using an assumed discount rate of 7.5% in 2001 and 2000, annual compensation increases of 3.75% in 2001 and 4.5% in 2000, and an assumed long-term rate of return on plan assets of 9.0% in 2001 and 2000.

	(In Thousands of Dollars)	
	2001	2000
Change in projected benefit obligation:		
Obligation at beginning of period.....	\$41,042	\$39,909
Service cost.....	1,330	1,253

Intangible asset.....	376	--
Accumulated other comprehensive loss.....	1,529	--
	-----	-----
Net amount recognized.....	\$9,076	\$7,437
	=====	=====

The projected benefit obligation, accumulated benefit obligation and fair value of plan assets for the defined benefit plans with accumulated benefit obligations in excess of plan assets were \$7,740,000, \$7,699,000 and \$4,094,000, respectively, as of December 31, 2001, and \$3,105,000, \$3,054,000 and \$0, respectively, as of December 31, 2000.

(8) Shareholders' Investment

The Company has one stock option plan available for new grants to officers, directors and key employees, the 1998 Stock Option Plan, as amended. Additionally, the Company's 1991 Flexible Stock Incentive Plan and 1987 Stock Option Plan, which have expired as to new grants, have shares previously

26

granted remaining outstanding. Options under all the plans were granted at prices that equaled the market value on the date of the grant and with a maximum term of 10 years from the date of grant. Options vest over various periods up to 10 years. A summary of the Company's three stock option plans follows:

	At December 31, 2001		
	1987 Plan	1991 Plan	1998 Plan
	-----	-----	-----
Total Plan shares.....	450,000	1,000,000	1,000,000
Options granted.....	449,850	762,882	705,400
Options outstanding.....	38,700	731,324	690,100
Options available for grant.....	--	--	294,600

A summary of the status of the Company's three stock option plans as of December 31, 2001, 2000 and 1999, and changes during the years then ended is presented below:

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

	2001		2000		Sha
	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price	
Outstanding at beginning of year.....	1,477,718	\$18.01	1,430,682	\$18.47	839
Granted.....	41,850	18.71	134,750	18.14	705
Exercised.....	(26,194)	7.52	(26,018)	6.97	(78)
Forfeited.....	(33,250)	21.28	(61,696)	22.61	(35)
Outstanding at end of year.	1,460,124	\$18.49	1,477,718	\$18.01	1,430
Options exercisable at year-end.....	889,824		865,968		656

The following table provides information on the three Plans at various exercise price ranges:

	Range of Exercise Prices			
	\$7.18-\$10.78	\$10.79-\$16.18	\$16.19-\$24.27	\$24.28
Options outstanding at 12/31/01	355,510	34,464	963,300	106
Options exercisable at 12/31/01	355,510	29,464	401,000	103

The Company accounts for its stock option plans under APB Opinion No. 25. Accordingly, no compensation cost has been recognized in the statements of income. Had compensation cost for these plans been determined consistent with FASB Statement No. 123 "Accounting for Stock-Based Compensation", the Company's net income and earnings per share ("EPS") would have been reduced to the following pro-forma amounts:

	(In Thousands, Except Per Share)	
	2001	2000
Net income:		
As Reported.....	\$19,590	\$33,771
Pro Forma.....	\$18,886	\$33,018

Earnings Per Share - Assuming Dilution		
As Reported.....	\$.93	\$1.61
Pro Forma.....	\$.89	\$1.57

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option pricing model with the following weighted-average assumptions used for grants in 2001, 2000 and 1999, respectively: risk-free interest rates of 5.1%, 6.3% and 5.4%; expected dividend yield of 2.5% for all years; expected option lives of 7.0 for all years; expected volatility of 33% in both 2001 and 2000, and 32% in 1999.

On January 28, 2000, the Board of Directors approved a Shareholder Rights Plan (the "Plan"). Pursuant to this Plan, one common share purchase right is included with each outstanding share of common stock. In the event the rights become exercisable, each right will initially entitle its holder to buy one-half of one share of the Company's common stock at a price of \$60 per share (equivalent to \$30 per one-half share), subject to adjustment. The rights will become exercisable if a person or group acquires, or announces an offer for, 15% or more of the Company's common stock. In this event, each right will thereafter entitle the holder to purchase, at the right's then-current exercise price, common stock of the Company or, depending on the circumstances, common stock of the acquiring corporation having a market value of twice the full share exercise price. The rights may be redeemed by the Company at a price of one-tenth of one cent per right at any time prior to the time a person or group acquires 15% or more of the Company's common stock. The rights expire on January 28, 2010, unless otherwise extended.

The Board of Directors approved in 2000 a repurchase program of up to 2,000,000 common shares of Company stock. Management was authorized to effect purchases from time to time in the open market or through privately negotiated transactions. Through December 31, 2001, the Company repurchased 159,900 shares at an average purchase price of \$17.06 per share. Management ceased repurchases in January 2001.

(9) Income Taxes

Earnings before income taxes consisted of the following:

	(In Thousands of Dollars)		
	2001	2000	1999
United States.....	\$30,213	\$55,879	\$62,143
Foreign.....	3,829	671	1,111
Total.....	\$34,042	\$56,550	\$63,254

The provision for income taxes is summarized as follows:

	(In Thousands of Dollars)		
	2001	2000	1999
Current			
Federal.....	\$9,155	\$12,858	\$20,594

A reconciliation of the statutory Federal income tax rate and the effective tax rate reflected in the statements of income follows:

	2001	2000	1999
	-----	-----	-----
Federal statutory tax rate.....	35.0%	35.0%	35.0%
State income taxes, net of federal benefit.....	2.3	2.5	3.0
Nondeductible goodwill amortization.....	4.0	2.4	2.3
Other, net.....	1.2	.4	(.5)
	-----	-----	-----
Effective tax rate.....	42.5%	40.3%	39.8%
	=====	=====	=====

Deferred taxes arise primarily from differences in amounts reported for tax and financial statement purposes. The Company's net deferred tax liability as of December 31, 2001 of \$34,602,000 is classified on the consolidated balance sheet as a current income tax benefit of \$8,420,000 and a long-term deferred income tax liability of \$43,022,000. The December 31, 2000 net deferred tax liability was \$31,588,000, consisting of a current income tax benefit of \$9,475,000 and a long-term deferred income tax liability of \$41,063,000. The components of this net deferred tax liability are as follows:

(In Thousands of Dollars)
December 31

Net deferred tax liability.....	\$ (34,602)	\$ (31,588)
	=====	=====

(10) Industry Segment Information

The Company's reportable segments are strategic businesses that offer different products and services. The Company has two such reportable segments:

Edgar Filing: REGAL BELOIT CORP - Form 10-K405

Mechanical Group and Electrical Group. The Mechanical Group produces mechanical speed reducers and related products for sale to original equipment manufacturers and distributors. The Electrical Group produces electric motors, power generation equipment and related products for sale to original equipment manufacturers and distributors.

The Company evaluates performance based on the segments' income from operations. Corporate costs have been allocated to each Group based primarily on the net sales of each Group. The reported net sales of each segment are solely from external customers. No single customer accounts for 10% or more of the Company's net sales.

29

The Company's products manufactured and sold outside the United States were approximately 8%, 4% and 3% of net sales in 2001, 2000 and 1999, respectively. Export sales from U.S. operations were approximately 6% of net sales in 2001, 6% in 2000 and 7% in 1999.

Pertinent data for each industry segment in which the Company operated for the three years ended December 31, 2001 is as follows:

	(In Thousands of Dollars)			
	Net Sales	Income From Operations	Identifiable Assets	Capital Expenditures
2001				
Mechanical Group.....	\$206,615	\$15,872	\$125,201	\$5,110

Report of Independent Public Accountants

We have audited, in accordance with auditing standards generally accepted in the United States, the financial statements of Regal-Beloit Corporation in this Form 10-K, and have issued our report thereon dated January 29, 2002. Our audit was made for the purpose of forming an opinion on those statements taken as a whole. The schedule listed in the index to financial statements is the responsibility of the Company's management and is presented for purposes of complying with the Securities and Exchange Commission's rules and is not part of the basic financial statements. This schedule has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, fairly states in all material respects the financial data required to be set forth therein in relation to the basic financial statements taken as a whole.
