- Shares of the Company common stock may be issued to the reporting person upon the vesting of the performance restricted stock units, also referred to as "PRsUs." The number of shares of Company common stock shown is the award at the "target" performance level. The actual number of the shares of common stock that may be issued to the reporting person upon vesting ranges from a minimum of zero to a maximum of 45,160 shares, and depends on the relative total shareholder return, or "TSR," for the Company as compared to a company in a peer group that achieves the median TSR performance for the peer group. The TSR for the company and each company in the peer group will be calculated based on annual growth rate over a three-year performance period, from the volume weighted average trading price for each company's common stock for sixty consecutive trading days prior to March 8, 2016 to the sixty consecutive trading days prior to March 8, 2019.
- (3) The PRsUs are expected to vest March 8, 2019. The expiration date of the award of this grant is the same date as the vesting date.
