NOTICE OF EXTENSION

December 14, 2005

TO: THE HOLDERS OF COMMON SHARES OF FALCONBRIDGE

By notice to the Depositary and as set forth in this Notice of Extension, Inco has extended its Original Offer dated October 24, 2005 to purchase all of the issued and outstanding Falconbridge Shares other than any Falconbridge Shares owned directly or indirectly by Inco and including Falconbridge Shares that may become issued and outstanding after the date of the Offer but before the Expiry Time upon the conversion, exchange or exercise of any securities of Falconbridge that are convertible into or exchangeable or exercisable for Falconbridge Shares (other than SRP Rights), on the basis of, at the election of the Shareholder:

(a) Cdn.\$34.00 in cash in respect of each Falconbridge Share held (the Cash Alternative); or

(b) 0.6713 of an Inco Share and Cdn.\$0.05 in cash in respect of each Falconbridge Share held (the Share Alternative),

in each case, as elected by the Shareholder in the applicable Letter of Transmittal, and subject to pro ration as set out in the Original Offer.

Except as otherwise set forth in this Notice of Extension, the terms and conditions of Inco's offer to purchase the Falconbridge Shares as previously set forth in the Original Offer continue to be applicable in all respects and this Notice of Extension should be read in conjunction with the Offer and Circular, the Letter of Transmittal and the Notice of Guaranteed Delivery, the provisions of which are incorporated herein by reference.

Unless the context requires otherwise or unless otherwise defined, defined terms used in this Notice of Extension have the same meaning as in the Offer and Circular. The term Offer means the Original Offer as amended or supplemented by this Notice of Extension.

1. Extension of the Offer

Inco has extended the Original Offer by extending the Expiry Time for the Offer from 8:00 p.m. (Toronto time) on December 23, 2005 to 8:00 p.m. (Toronto time) on January 27, 2006. Accordingly, the definition of Expiry Date in the Original Offer is deleted in its entirety and replaced with the following definition:

Expiry Date means January 27, 2006 or such other date as is set out in a notice of variation of the Offer issued at any time and from time to time accelerating or extending the period during which Falconbridge Shares may be deposited under the Offer.

2. Withdrawal of Deposited Falconbridge Shares

Except as otherwise provided in Section 4 of the Offer to Purchase, Withdrawal Rights, all deposits of Falconbridge Shares to the Offer will be irrevocable. Unless otherwise required or permitted by applicable Laws, any Falconbridge Shares deposited in acceptance of the Offer may be withdrawn by or on behalf of the depositing Shareholder:

(a) at any time before the Falconbridge Shares have been taken up by Inco pursuant to the Offer;

(b) if the Falconbridge Shares have not been paid for by Inco within three business days after having been taken up; or

(c) at any time before the expiration of 10 days from the date upon which either:

(i) a notice of change relating to a change in the information contained in the Offer, as amended from time to time, that would reasonably be expected to affect the decision of a Shareholder to accept or reject the Offer (other than a change that is not within the control of the Offeror or an affiliate of the Offeror, unless it is a change in a material fact relating to the Inco Shares), in the event that such change occurs at or before the Expiry Time or after the Expiry Time but before the expiry of all rights of withdrawal in respect of the Offer; or

(ii)

a notice of variation concerning a variation in the terms of the Offer (other than a variation consisting solely of an increase in the consideration offered for the Falconbridge Shares where the Expiry Time is not extended for more than 10 days);

is mailed, delivered, or otherwise properly communicated, but subject to abridgement of that period pursuant to such order or orders as may be granted by applicable courts or securities regulatory authorities and only if such Deposited Shares have not been taken up by the Offeror at the date of the notice.

Withdrawals may not be rescinded and any Falconbridge Shares properly withdrawn will thereafter be deemed not validly deposited for the purposes of the Offer. However, withdrawn Falconbridge Shares may be re-deposited at any subsequent time prior to the Expiry Time by again following any of the procedures described in Section 3 of the Offer to Purchase, *Manner of Acceptance*.

Shareholders are referred to Section 4 of the Offer to Purchase, *Withdrawal Rights*, for a description of the procedures for exercising the right to withdraw Falconbridge Shares deposited under the Offer.

3. Take Up of and Payment for Deposited Falconbridge Shares

Upon the terms and subject to the conditions of the Offer (including, without limitation, the conditions specified in Section 5 of the Offer to Purchase, *Conditions of the Offer*, and, if the Offer is further extended or varied, the terms and conditions of any such extension or variation), Inco will take up Falconbridge Shares validly deposited under the Offer and not withdrawn pursuant to Section 4 of the Offer to Purchase, *Withdrawal Rights*, not later than 10 calendar days after the Expiry Time and will pay for the Falconbridge Shares taken up as soon as possible, but in any event not later than three business days after taking up the Falconbridge Shares. Any Falconbridge Shares deposited under the Offer after the date on which Inco first takes up Falconbridge Shares will be taken up and paid for not later than 10 calendar days after such deposit.

Shareholders are referred to Section 6 of the Offer to Purchase, *Take Up of and Payment for Deposited Shares*, for details as to the take up of and payment for Falconbridge Shares under the Offer.

4. Recent Developments

Regulatory Clearances

Inco and Falconbridge each received a request dated November 16, 2005 for additional information, commonly referred to as a second request, from the Antitrust Division of the U.S. Department of Justice (DOJ) in connection with the Offer. Inco and Falconbridge have been working with the DOJ staff since shortly after the announcement of the Original Offer on October 11, 2005 and anticipated the issuance of the second request as part of that process given the nature and size of the proposed combination of Inco and Falconbridge following the successful completion of the Offer.

The effect of the second request is to extend the waiting period under the U.S. *Hart-Scott-Rodino Antitrust Improvements Act of 1976* beyond the initial waiting period, which ended November 16, 2005, until 30 days after both Inco and Falconbridge have substantially complied with the second request, unless the waiting period is terminated earlier by the DOJ or extended voluntarily by Inco and Falconbridge.

Inco and Falconbridge are responding to the second request, and continue to work with the DOJ and the competition authorities in Europe and Canada in connection with the review by these authorities of the Offer.

Recent Nickel Market and Other Developments

The London Metal Exchange (LME) benchmark cash nickel price has averaged \$12,490 per tonne (\$5.67 per pound) for the fourth quarter of 2005 through December 14, 2005, as compared with a third quarter 2005 average of \$14,567 per tonne (\$6.61 per pound). For the month of December 2005 through December 14, 2005, the LME cash nickel price has averaged \$13,495 per tonne (\$6.12 per pound) and was \$13,920 per tonne (\$6.31 per pound) on December 14, 2005. Inco believes that the decline in the LME cash nickel price during the third quarter of 2005 and for most of the first two months of the fourth quarter of 2005 was due principally to an oversupply of nickel-containing stainless steel, the principal end-use for primary nickel. This condition resulted in stainless steel production cutbacks intended to correct the build-up of inventory of stainless steel. While this oversupply situation in the stainless steel industry has had a short-term effect on nickel prices, Inco currently believes that overall nickel market fundamentals remain relatively strong. Inco has recently seen some signs of the end of this stainless steel inventory correction. A number of leading economic indicators remain positive and Inco currently expects that, once this stainless steel inventory correction has run its course, stainless steel production growth should resume in early 2006. Non-stainless steel markets for nickel continue to show very favourable growth. Demand in non-stainless steel applications such as for aerospace in the United States and Europe and plating in China continues to be extremely

strong. Growth in these

markets has also been enhanced by increased activity in those end-uses for nickel relating to oil and gas and liquid natural gas exploration and production and hybrid automobiles. Nickel supply growth has continued to be slow as recent production disruptions have curtailed output from several producers, and nickel producer inventories remain at historically low levels.

The LME benchmark cash copper price has averaged \$4,227 per tonne (\$1.92 per pound) for the fourth quarter of 2005 through December 14, 2005, as compared with a third quarter 2005 average of \$3,753 per tonne (\$1.70 per pound). For the month of December 2005 through December 14, 2005, the LME cash copper price has averaged \$4,568 per tonne (\$2.07 per pound). A new record LME cash price of \$4,405 per tonne (\$2.00 per pound) was set on November 18, 2005. Having exceeded \$4,405 for the first time, the LME cash copper price has remained above or near this threshold for a number of days through December 14, 2005 and the LME cash price for copper was \$4,582 per tonne (\$2.08 per pound) on December 14, 2005.

Copper prices continue to be driven by strong demand, critically low inventories, supply constraints, operating disruptions and strong fund interest in copper. Demand has been supported by ongoing economic growth in the United States, notwithstanding the recent difficult hurricane season. Demand for copper and copper products is expected to remain strong over the next 18 months driven by rebuilding of housing and electrical infrastructure in the geographic region of the United States adversely affected by the latest hurricane season. Outlook for copper demand in China and India remains strong.

Inco believes that the world's refined copper production capacity expansions currently in the planning pipeline will be barely sufficient to meet forecast demand. This supply-demand balance would imply high utilization rates for existing operations, low levels of inventory and volatile copper prices in the event of unexpected supply disruptions over the next few years.

Benchmark prices for certain of the platinum-group metals reached multi-year highs during early December 2005. Platinum futures prices for January 2006 reached \$1,026 per ounce on the New York Mercantile Exchange (NYMEX) in early December 2005, the highest benchmark price for platinum since March 1980, with the NYMEX spot platinum price averaging about \$1,000 per ounce for the month of December 2005 through December 13, 2005. Palladium spot prices on the NYMEX rose to 20-month highs in early December 2005.

Management's expectations with respect to nickel prices, the resumption of stainless steel production growth and demand for copper and copper products are subject to various risks and assumptions. See STATEMENTS REGARDING FORWARD-LOOKING INFORMATION in the Offer and Circular.

Goro Project

As of the end of November, 2005, the engineering work required for the construction of the Goro project in New Caledonia was approximately 64% complete. Construction on site, including earthworks, foundation work and work on the port facilities, has proceeded, subject to delays in the receipt of certain permits required for construction, largely on schedule. Inco currently expects that, subject to the effect of certain developments referred to below, start-up of the project will be in late 2007. The project continues to experience cost pressures related principally to commodities and other materials required for construction, including for fuel and hydrocarbon-based products.

Taking into account the cost pressures for such construction materials and other input costs, the currently anticipated trends in such costs and the latest regulatory requirements for the configuration of the project's tailings area, Inco currently believes that, if it were to formally update its latest forecast for the capital cost for Goro's mine, process plant and infrastructure of \$1.878 billion with a -5% plus 15% confidence level, such updated forecast would be expected to be at the high end of the plus 15% confidence level. As part of its ongoing work on the project, Inco has implemented a number of systems to monitor all key costs trends which could affect the capital cost forecast. Inco currently expects to be in a position to have a definitive cost estimate, reflecting all relevant factors at that time, and which is currently expected to be subject to a confidence or accuracy level developed as part of that estimate, sometime in the second quarter of 2006 when engineering will have been at least 80% complete and all major construction contracts will have been awarded.

There have been a number of recent boycotts and other related actions in New Caledonia that have affected the operations of Eramet and its subsidiary, Société Le Nickel (SLN), and other businesses there as a result of labour and other disruptions and other developments. While those actions and developments have not to date affected the

construction of the Goro project to any significant degree, they could have a substantial adverse effect on the project's construction schedule and capital costs if these disruptions were to continue for any extended length of time.

Management's capital cost estimates for the Goro project are subject to various risks and assumptions. See STATEMENTS REGARDING FORWARD-LOOKING INFORMATION in the Offer and Circular.

Falconbridge's Koniambo Project

Falconbridge has recently submitted a proposal to the current majority shareholder in this project, the Société Minière du Sud Pacifique (SMSP), covering the proposed terms for the ongoing development of its Koniambo project. SMSP is currently considering this proposal and both SMSP and Falconbridge are currently in discussions with other interested parties directed towards reaching agreement on the key terms and conditions that would enable this project to proceed and meet the requirements of Falconbridge and the other interested parties and the relevant accords applicable to the project.

Other

Since the Offer and Circular were delivered to Shareholders, Inco has filed an application with the NYSE to list the Inco Shares to be issued in connection with the Offer.

3. Made enquiries of certain officials of the Company who have responsibility for financial and accounting matters about:
 - (a) the basis for determination of the pro forma adjustments; and
 - (b) whether the pro forma consolidated financial statements comply as to form in all material respects with the regulatory requirements of the various Securities Commissions and similar regulatory authorities in Canada.The officials:
 - (a) described to us the basis for determination of the pro forma adjustments, and
 - (b) stated that the pro forma consolidated financial statements comply as to form in all material respects with the regulatory requirements of the various Securities Commissions and similar regulatory authorities in Canada.
4. Read the notes to the pro forma consolidated financial statements, and found them to be consistent with the basis described to us for determination of the pro forma adjustments.
5. Recalculated the application of the pro forma adjustments to the aggregate of the amounts in the columns captioned Inco and Falconbridge as at September 30, 2005 and for the nine months then ended, and for the year ended December 31, 2004, and found the amounts in the column captioned Pro forma Inco to be arithmetically correct.

A pro forma financial statement is based on management assumptions and adjustments which are inherently subjective. The foregoing procedures are substantially less than either an audit or a review, the objective of which is the expression of assurance with respect to management's assumptions, the pro forma adjustments, and the application of the adjustments to the historical financial information. Accordingly, we express no such assurance. The foregoing procedures would not necessarily reveal matters of significance to the pro forma consolidated financial statements, and we therefore make no representation about the sufficiency of the procedures for the purposes of a reader of such statements.

The following selected unaudited pro forma consolidated financial information is presented for illustrative purposes only and is not necessarily indicative of the operating results or financial condition of the consolidated entities that would have been achieved if the Offer had been completed during the periods presented, nor is the selected pro forma consolidated financial information necessarily indicative of the future operating results or financial position of the consolidated entities. The pro forma consolidated financial information does not reflect (1) any special items such as payments pursuant to change of control provisions or integration costs which may be incurred as a result of the acquisition, and does not give effect to operating efficiencies, cost savings and synergies that are expected to result from the acquisition, or (2) the impact of undertakings that Inco is prepared, if required, to make in order to address regulatory clearance requirements, as there are no current agreements providing for implementation of such undertakings which, however, are expected to be carried out after the completion of the Offer.

INCO LIMITED
NOTES TO PRO FORMA CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

(millions of US dollars, except per share amounts)

1. BASIS OF PRESENTATION

The unaudited pro forma consolidated financial statements of Inco Limited (Inco) have been prepared in accordance with generally accepted accounting principles in Canada. These unaudited pro forma consolidated financial statements should be read in conjunction with the audited consolidated financial statements of Inco as at and for the year ended December 31, 2004 and the unaudited interim consolidated financial statements of Inco as at and for the nine months ended September 30, 2005, including the related notes thereto.

The unaudited pro forma consolidated financial statements have been prepared assuming that the acquisition of Falconbridge Limited (Falconbridge) had been completed as of January 1, 2004 for the consolidated statements of earnings and as of September 30, 2005 for the consolidated balance sheet.

These unaudited pro forma consolidated financial statements are not intended to reflect the financial position and results of operations which would have actually resulted had the transaction and other adjustments been effected on the dates indicated. Further, the pro forma results of operations are not necessarily indicative of the results of operations that may be obtained by Inco in the future.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The unaudited pro forma consolidated financial statements have been compiled using the significant accounting policies as set out in the audited consolidated financial statements of Inco for the year ended December 31, 2004 and the unaudited interim consolidated financial statements of Inco for the nine months ended September 30, 2005.

The 2004 consolidated statements of earnings have been restated to reflect the adoption of Canadian Institute of Chartered Accountants Section 3860, *Financial Instruments - Disclosure and Presentation*, on a retroactive basis. The revisions relate to the accounting for instruments for which the issuer has the right to settle in cash or its own shares. Consistent with this change, interest expense is recorded in lieu of accretion charges with respect to these convertible debt securities.

3. PRO FORMA ADJUSTMENTS AND ASSUMPTIONS

The pro forma consolidated financial statements include the following pro forma assumptions and adjustments:

- (a) The acquisition is accounted for using the purchase method of accounting, whereby Falconbridge's assets and liabilities are revalued to their fair value and its shareholders' equity is eliminated. Inco's assets and liabilities are not revalued. The pro forma adjustments reflect Inco's acquisition of 100 per cent of Falconbridge's net assets at their fair values as at September 30, 2005 and the accounting for Falconbridge as a wholly-owned subsidiary. Falconbridge's interest in joint ventures in which it has joint control are reflected using the proportionate consolidation method.

The determination of the purchase price, based on management's preliminary estimate, is as follows:

Purchase Price

Consideration in Inco common shares	\$ 8,607
Consideration in Inco options issued	35
Cash	2,407
Transaction costs	75
Total	\$ 11,124

The purchase price was calculated using a price of \$43.95 for each Inco common share issued. The cash portion of the purchase price will be financed through committed loan facilities.

F-5

The allocation of the purchase price, based on management's preliminary estimate, is as follows:

Allocation of Purchase Price

	Book Value	Fair Value Increment	Purchase Price Allocation
Assets			
Cash and cash equivalents	\$ 787	\$	\$ 787
Accounts receivable	853	27	880
Inventories	1,508	238	1,746
Property, plant and equipment and other non-current assets	8,658	8,992	17,650
Total assets	\$ 11,806	\$ 9,257	\$ 21,063
Liabilities			
Long-term debt due within one year	\$ 103	\$	\$ 103
Other current liabilities	1,137		1,137
Long-term debt	3,799	188	3,987
Deferred income and mining taxes	1,151	1,791	2,942
Other long-term liabilities	695	693	1,388
Minority interest	382		382
Total liabilities	\$ 7,267	\$ 2,672	\$ 9,939
Total net assets purchased	\$ 4,539	\$ 6,585	\$ 11,124

The book value of Falconbridge, as shown above:

Reflects Falconbridge's stated book values as at September 30, 2005; and

Reflects the assumed exercise of vested stock options.

This allocation is based upon preliminary estimates and certain assumptions with respect to the fair value increment associated with the assets to be acquired and the liabilities to be assumed. The actual fair values of the assets and liabilities will be determined as of the date of acquisition and may differ materially from the amounts disclosed above in the assumed pro forma purchase price allocation due to the change in fair values of the assets and liabilities between September 30, 2005 and the date of the transaction, and as further analysis is completed. The actual allocation of the purchase price may result in different adjustments being expensed in the consolidated statement of earnings.

- (b) The increase in cost of sales and other operating expenses reflects the elimination of deferred gains on derivative contracts on the pro forma consolidated statements of earnings. The deferred gains arise from derivative contracts that qualified for hedge accounting and were realized as a reduction of the cost of operations over the original delivery schedule of contracts. The gains would not have been realized in the year ended December 31, 2004 and the nine months ended September 30, 2005 since the purchased derivative contracts would have been fair valued as of January 1, 2004.

- (c) The decrease in cost of sales and other operating expenses reflects the elimination of amortized past service costs and amortized net actuarial losses relating to post retirement benefits which were expensed in the year ended December 31, 2004 and the nine months ended September 30, 2005.
- (d) Represents the amortization of the preliminary fair value increment allocated to operating capital assets. The pro forma amortization excludes the total amount of the purchase price allocation not subject to amortization of approximately \$2.6 billion as it has been allocated to non-operating assets. On finalization of the purchase price allocation, if this amount is allocated to operating assets, pro forma amortization would change by approximately \$113 million, before taxes, for the year ended December 31, 2004 and \$84 million, before taxes, for the nine months ended September 30, 2005. Pro forma amortization and the above noted sensitivity have been based on a remaining weighted average estimated economic life of 23 years, and a reduction of one year in the weighted average estimated economic life would alter pro forma amortization by \$28 million, before taxes, for the year ended December 31, 2004 and by \$21 million for the nine months ended September 30, 2005.
- (e) The increase in selling, general and administrative expenses reflects the expense relating to the expected exchange of stock options to be issued pursuant to the acquisition of Falconbridge.
- (f) The increase in cost of sales and other operating expenses reflects the amortization of the allocation of the purchase price to equity accounted investments.
- (g) The increase in interest expense reflects the issuance of CDN\$2.87 billion of debt in connection with the acquisition of Falconbridge.
- (h) The adjustment reflects the elimination of the Falconbridge minority interest in earnings assuming that Falconbridge and Noranda were amalgamated at the beginning of the period.
- (i) The adjustment reflects the tax effect on the above adjustments.
- (j) The adjustment reflects the reclassification of preferred share dividends to minority interest.

4. ITEMS NOT ADJUSTED

The pro forma consolidated financial information does not reflect (1) any special items such as payments pursuant to change of control provisions or integration costs which may be incurred as a result of the acquisition, and does not give effect to operating efficiencies, cost savings and synergies that are expected to result from the acquisition, or (2) the impact of undertakings that Inco is prepared, if required, to make in order to address regulatory clearance requirements, as there are no current agreements providing for implementation of such undertakings which, however, are expected to be carried out after the completion of the Offer.
