NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
SUMMIT BANCSHARES, INC. AND SUBSIDIARIES
FOR THE SIX MONTHS ENDED JUNE 30, 2001 AND 2000 (UNAUDITED)
AND FOR THE YEAR ENDED DECEMBER 31, 2000 (UNAUDITED)

NOTE 1 - Summary of Significant Accounting Policies

The accounting and reporting policies of Summit Bancshares, Inc. (the "Corporation") and Subsidiaries are in accordance with accounting principles

Edgar Filing: SUMMIT BANCSHARES INC /TX/ - Form 10-Q

generally accepted in the United States of America and the prevailing practices within the banking industry. A summary of the more significant policies follows:

Basis of Presentation and Principles of Consolidation

The consolidated financial statements of the Corporation include its accounts and those of its wholly-owned subsidiaries, Summit National Bank and Summit Community Bank, National Association (the "Subsidiary Banks") and Summit Bancservices, Inc., a wholly-owned operations subsidiary. Effective May 14, 2001, Summit Community Bank, N.A. merged with and into Summit National Bank and Summit National Bank changed its name to Summit Bank, National Association. Also Summit Bancservices, Inc. was liquidated effective May 14, 2001 and its assets were contributed by the Corporation to Summit Bank, N.A. All operations of Summit Bancservices will be continued in the Bank. All significant intercompany balances and transactions have been eliminated in consolidation.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Cash and Due From Banks

The Subsidiary Bank is required to maintain certain balances at the Federal Reserve Bank based on their levels of deposits. During the first six months of 2001 the average cash balance maintained at the Federal Reserve Bank was \$815,000. Compensating balances held at correspondent banks, to minimize service charges, averaged approximately \$18,698,000 during the same period.

Investment Securities

The Corporation has adopted Statement of Financial Accounting Standards No. 115, Accounting for Certain Investments in Debt and Equity Securities ("SFAS 115"). At the date of purchase, the Corporation is required to classify debt and equity securities into one of three categories: held-to-maturity, trading or available-for-sale. At each reporting date, the appropriateness of the classification is reassessed. Investments in debt securities are classified as held-to-maturity and measured at amortized cost in the financial statements only if management has the positive intent and ability to hold those securities to maturity. Securities that are bought and held principally for the purpose of selling them in the near term are classified as trading and measured at fair value in the financial statements with unrealized gains and losses included in earnings. Investments not classified as either held-to-maturity or trading are classified as available-for-sale and measured at fair value in the financial statements with unrealized gains and losses reported, net of tax, in a separate component of shareholders' equity until realized.

The Corporation has the ability and intent to hold to maturity its investment securities classified as held-to-maturity; accordingly, no adjustment has been made for the excess, if any, of amortized cost over market. In determining the investment category classifications at the time of purchase of securities, management considers its asset/liability strategy, changes in interest rates and prepayment risk, the need to increase capital and other factors. Under certain circumstances (including the deterioration of the

Edgar Filing: SUMMIT BANCSHARES INC /TX/ - Form 10-Q

issuer's creditworthiness, a change in tax law, or statutory or regulatory requirements), the Corporation may change the investment security classification. In the periods reported for 2001 and 2000 the Corporation held no securities that would have been classified as trading securities.

All investment securities are adjusted for amortization of premiums and accretion of discounts. Amortization of premiums and accretion of discounts are recorded to income over the contractual maturity or estimated life of the individual investment on the level yield method. Gain or loss on sale of investments is based upon the specific identification method and the gain or loss is recorded in non-interest income. Income earned on the Corporation's investments in state and political subdivisions is not taxable.

Loans and Allowance for Loan Losses

Loans are stated at the principal amount outstanding less unearned discount and the allowance for loan losses. Unearned discount on installment loans is recognized as income over the terms of the loans by a method approximating the interest method. Interest income on all other loans is recognized based upon the principal amounts outstanding, the simple interest method. Direct costs related to loan originations are not separately allocated to loans but are charged to non-interest expense in the period incurred. The net effect of not recognizing such fees and related costs over the life of the related loan is not considered to be material to the financial statements. The accrual of interest on a loan is discontinued when, in the opinion of management, there is doubt about the ability of the borrower to pay interest or principal. Interest previously earned, but uncollected on such loans, is written off. After loans are placed on

9

NOTE 1 - Summary of Significant Accounting Policies (cont'd.)

non-accrual all payments received are applied to principal and no interest income is recorded until the loan is returned to accrual status or the principal has been reduced to zero.

The Corporation has adopted Statement of Financial Accounting Standards No. 114, "Accounting by Creditors for Impairment of a Loan," as amended by Statement of Financial Accounting Standards No. 118, "Accounting by Creditors for Impairment of a Loan - Income Recognition and Disclosure." Under this standard, the allowance for loan losses related to loans that are identified for evaluation in accordance with Statement No. 114 (impaired loans) is based on discounted cash flows using the loan's initial effective rate or the fair value of the collateral for certain collateral dependent loans.

The allowance for loan losses is comprised of amounts charged against income in the form of a provision for loan losses as determined by management. Management's evaluation is based on a number of factors, including the Subsidiary Banks' loss experience in relation to outstanding loans and the existing level of the allowance, prevailing and prospective economic conditions, and management's continuing review of the discounted cash flow values of impaired loans and its evaluation of the quality of the loan portfolio. Loans are charged against the allowance for loan losses when management believes that the collectibility of the principal is unlikely.

The evaluation of the adequacy of loan collateral is often based upon estimates and appraisals. Because of changing economic conditions, the valuations determined from such estimates and appraisals may also change.

Edgar Filing: SUMMIT BANCSHARES INC /TX/ - Form 10-Q

Accordingly, the Corporation may ultimately incur losses which vary from management's current estimates. Adjustments to the allowance for loan losses will be reported in the period such adjustments become known or are reasonably estimable.

Premises and Equipment

Premises and equipment are stated at cost less accumulated depreciation and amortization. Depreciation expense is computed on the straight-line method based upon the estimated useful lives of the assets ranging from three to forty years. Maintenance and repairs are charged to non-interest expense. Renewals and betterments are added to the asset accounts and depreciated over the periods benefited. Depreciable assets sold or retired are removed from the asset and related accumulated depreciation accounts and any gain or loss is reflected in the income and expense accounts.

Other Real Estate

Other real estate is foreclosed property held pending disposition and is valued at the lower of its fair value or the recorded investment in the related loan. At foreclosure, if the fair value, less estimated costs to sell, of the real estate acquired is less than the Corporation's recorded investment in the related loan, a writedown is recognized through a charge to the allowance for loan losses. Any subsequent reduction in value is recognized by a charge to income. Operating expenses of such properties, net of related income, and gains and losses on their disposition are included in non-interest expense.

Federal Income Taxes

The Corporation joins with its Subsidiary in filing a consolidated federal income tax return. The Subsidiary pays to the parent a charge equivalent to its current federal income tax based on the separate taxable income of the Subsidiary.

The Corporation and the Subsidiary maintain their records for financial reporting and income tax reporting purposes on the accrual basis of accounting. Deferred income taxes are provided in accordance with Statement of Financial Accounting Standards No. 109, "Accounting for Income Taxes". Deferred income taxes are provided for accumulated temporary differences due to basic differences for assets and liabilities for financial reporting and income tax purposes.

Realization of net deferred tax assets is dependent on generating sufficient future taxable income. Although realization is not assured, management believes it is more likely than not that all of the net deferred tax assets will be realized. The amount of the net deferred tax asset considered realizable, however, could be reduced in the near term if estimates of future taxable income are reduced.

Cash and Cash Equivalents

For the purpose of presentation in the Statements of Cash Flows, cash and cash equivalents are defined as those amounts included in the balance sheet caption "Cash and Due from Banks."

Reclassification

Edgar Filing: SUMMIT BANCSHARES INC /TX/ - Form 10-Q

Certain reclassifications have been made to the 2000 financial statements to conform to the 2001 presentation.

10

NOTE 1 - Summary of Significant Accounting Policies (cont'd.)

Earnings Per Common and Common Equivalent Share

Earnings per common and common equivalent share is calculated by dividing net income by the weighted average number of common shares and common share equivalents. Stock options are regarded as common share equivalents and are therefore considered in earnings per share calculations, if dilutive. The number of common share equivalents is determined using the treasury stock method.

Audited Financial Statements

The consolidated balance sheet as of December 31, 2000, and the consolidated statements of income, changes in shareholders' equity and cash flows for the year ended December 31, 2000 are headed "unaudited" in these financial statements. These statements were reported in the Securities Exchange Commission Form 10-K as of December 31, 2000 as "audited" but are required to be reflected in these statements as unaudited because of the absence of an independent auditor's report.

The Corporation, through its subsidiary, has available a line of credit with the Federal Home Loan Bank of Dallas which allows the subsidiary to borrow on a collateralized basis at a fixed term. At June 30, 2001, the subsidiary had no borrowings outstanding. For the six months ended June 30, 2001, the subsidiary had no borrowings. At June 30, 2000, the subsidiary had borrowings outstanding of \$10,000,000. For the year ended December 31, 2000, the subsidiary had borrowed an average balance of \$4,929,000 under the line of credit, bearing an average interest rate of 6.49%.

NOTE 8 - Notes Payable

On July 15, 2000, the Corporation obtained lines of credit from a bank under which the Corporation may borrow \$9,000,000 at prime rate. The lines of credit are secured by stock of the Subsidiary Bank and mature in July 2001, whereupon, if balances are outstanding, the lines convert to term notes having

Edgar Filing: SUMMIT BANCSHARES INC /TX/ - Form 10-Q

five year terms. The Corporation will not pay a fee for any unused portion of the lines. As of June 30, 2001, no funds had been borrowed under these lines nor were any borrowings outstanding.

NOTE 11 - Related Party Transactions

The Subsidiary Bank have transactions made in the ordinary course of business with certain of its officers, directors and their affiliates. All loans included in such transactions are made on substantially the same terms, including interest rate and collateral, as those prevailing at the time for comparable transactions with other persons. Total loans outstanding to such parties amounted to approximately \$3,241,000 at December 31, 2000.

NOTE 12 - Commitments and Contingent Liabilities

In the normal course of business, there are various outstanding commitments and contingent liabilities, such as guarantees and commitments to extend credit, which are not reflected in the financial statements. No losses are anticipated as a result of these transactions. Commitments are most frequently extended for real estate, commercial and industrial loans.

At June 30, 2001, outstanding documentary and standby letters of credit totaled \$5,333,000 and commitments to extend credit totaled \$125,400,000.

NOTE 13 - Stock Option Plans

The Corporation has two Incentive Stock Option Plans, the 1993 Plan and the 1997 Plan, ("the Plans"). Each Plan has reserved 600,000 shares (adjusted for two-for-one stock splits in 1995 and 1997) of common stock for grants thereunder. The Plans provide for the granting to executive management and other key employees of Summit Bancshares, Inc. and subsidiaries incentive stock options, as defined under the current tax law. The options under the Plans will

Edgar Filing: SUMMIT BANCSHARES INC /TX/ - Form 10-Q

be exercisable for ten years from the date of grant and generally vest ratably over a five year period. Options will be and have been granted at prices which will not be less than 100-110% of the fair market value of the underlying common stock at the date of grant.

The Corporation applies APB Opinion No. 25 and related Interpretations in accounting for its plans. Since the option prices are considered to approximate fair market value at date of grant, no compensation expense has been reported. Had compensation cost for these plans been determined consistent with Statement of Financial Accounting Standards No. 123, "Accounting for Stock-Based Compensation" the Corporation's net income and earnings per share would have been reduced by insignificant amounts on a proforma basis for the year ended December 31, 2000, and the six months ended June 30, 2001.

The following is a summary of transactions during the periods presented:

	Shares Under Option	
	Six Months Ended June 30, 2001	Year Ended December 31, 2000
Outstanding, Beginning of Period	359,559	445,497

	=====	=====

Options outstanding at June 30, 2001 ranged in price from \$3.00 to \$19.375 per share with a weighted average exercise price of \$10.36 and 309,859 shares exercisable. At June 30, 2001, there remained 483,300 shares reserved for future grants of options under the 1997 Plan.

NOTE 14 - Employee Benefit Plans

401(k) Plan

The Corporation implemented a 401(k) plan in December 1997 covering substantially all employees. The Corporation made no contribution to this plan in 1999 or 1998. In 2000, the Corporation made matching contributions to the participant's deferrals of compensation up to 100% of the employee contributions not to exceed 6% of the employee's annual compensation.

For the first six months of 2001, the Corporation expensed \$172,000 in support of the plan.

Management Security Plan

In 1992, the Corporation established a Management Security Plan to provide key employees with retirement, death or disability benefits in addition to those provided by the Pension Plan. The expense charged to operations for such future obligations was \$85,000 and \$94,000 during the first six months of

Edgar Filing: SUMMIT BANCSHARES INC /TX/ - Form 10-Q

2001 and 2000, respectively, and \$203,000 for the year 2000.

Other Post Retirement Benefits

The Corporation provides certain health care benefits for certain retired employees who bear all costs of these benefits. These benefits are covered under the "Consolidated Omnibus Budget Reconciliation Act" (COBRA).

17

NOTE 16 - Financial Instruments with Off-Balance Sheet Risk

The Corporation is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include loan commitments, standby letters of credit and documentary letters of credit. The instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the financial statements.

The Corporation's exposure to credit loss in the event of non-performance by the other party of these loan commitments and standby letters of credit is represented by the contractual amount of those instruments. The Corporation uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments.

The total contractual amounts of financial instruments with off-balance sheet risk are as follows (in thousands):

June 30,

2001

2000

Financial Instruments Whose Contract Amounts Represent Credit Risk:

Loan Commitments Including Unfunded Lines of Credit	\$ 125,400	\$ 137,
Standby Letters of Credit	5,333	3,

Since many of the loan commitments may expire without being drawn upon, the total commitment amount does not necessarily represent future cash requirements. The Corporation evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Corporation upon extension of credit, is based on management's credit evaluation of the counterparty. Collateral held varies but may include accounts receivable, inventory, property, plant and equipment, owner occupied real estate and income-producing commercial properties.

The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers.

NOTE 17 - Concentrations of Credit Risk

The Subsidiary Bank grants commercial, consumer and real estate loans in their direct market which is defined as Fort Worth and its surrounding area. The Board of Directors of the Subsidiary Bank monitors concentrations of credit by purpose, collateral and industry at least quarterly. Certain limitations for concentration are set by the Board. Additional loans in excess of these limits must have prior approval of the directors' loan committee. Although its Subsidiary Bank has a diversified loan portfolio, a substantial portion of its debtors' abilities to honor their contracts is dependent upon the strength of the local and state economy.

NOTE 18 - Litigation

The Subsidiary Bank is involved in legal actions arising in the ordinary course of business. It is the opinion of management, after reviewing such actions with outside legal counsel, that the settlement of these matters will not materially affect the Corporation's financial position.

18

NOTE 19 - Stock Repurchase Plan

On April 17, 2001, the Board of Directors approved a stock repurchase plan. The plan authorized management to purchase up to 318,973 shares of the Corporation's common stock over the next twelve months through the open market or in privately negotiated transactions in accordance with all applicable state and federal laws and regulations.

In the first six months of 2001, 70,005 shares were purchased through the open market by the Corporation through this plan or a similar repurchase plan approved in the prior year.

NOTE 20 - Subsequent Event

Edgar Filing: SUMMIT BANCSHARES INC /TX/ - Form 10-Q

On July 17, 2001, the Board of Directors of the Corporation approved a quarterly dividend of \$.11 per share to be paid on August 15, 2001 to shareholders of record on August 1, 2001.

NOTE 21 - Fair Values of Financial Instruments

The following methods and assumptions were used by the Corporation in estimating its fair value disclosures for financial instruments:

Cash and cash equivalents: The carrying amounts reported in the balance sheet for cash and due from banks and federal funds sold approximate those assets' fair values.

Investment securities (including mortgage-backed securities): Fair values for investment securities are based on quoted market prices, where available. If quoted market prices are not available, fair values are based on quoted market prices of comparable instruments.

Loans: For variable-rate loans, fair values are based on carrying values. The fair values for fixed rate loans such as mortgage loans (e.g., one-to-four family residential) and installment loans are estimated using discounted cash flow analysis. The carrying amount of accrued interest receivable approximates its fair value.

Deposit liabilities: The fair value disclosed for interest bearing and noninterest-bearing demand deposits, passbook savings, and certain types of money market accounts are, by definition, equal to the amount payable on demand at the reporting date or their carrying amounts. Fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered on certificates to a schedule of aggregated expected monthly maturities on time deposits.

Short-term borrowings: The carrying amounts of borrowings under repurchase agreements approximate their fair values.

The estimated fair values of the Corporation's financial instruments are as follows (in thousands):

	June 30,			
	2001		2000	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value

NOTE 22 - Comprehensive Income

The Corporation has adopted Financial Accounting Standards Board ("FASB") Statement of Financial Accounting Standards No. 130 "Reporting Comprehensive Income". This standard requires an entity to report and display comprehensive income and its components. Comprehensive income is as follows (in thousands):

	Six Months Ended June 30,		Year Ended December 31,

Item 2 - Management's Discussion and Analysis of Financial Condition and Results of Operations

Summary

Management's Discussion and Analysis of Financial Condition and Results of Operations of the Corporation analyzes the major elements of the Corporation's consolidated balance sheets and statements of income. This discussion should be read in conjunction with the consolidated financial statements and accompanying notes.

Net income for the second quarter of 2001 was \$2,376,000, or \$.37 diluted earnings per share, compared with \$1,347,000, or \$.21 diluted earnings per share, for the second quarter of 2000. Net income for the first six months of 2001 was \$4,487,000, or \$.69 diluted earnings per share, compared with \$3,797,000 or \$.58 diluted earnings per share for the first six months of the prior year. On a per share basis, diluted earnings per share increased 76.2% over the second quarter of the prior year. Per share amounts are based on average diluted shares outstanding of 6,506,127 for the first six months of 2001 and 6,530,614 for the comparable period of 2000 adjusted to reflect stock options granted.

Outstanding loans at June 30, 2001 of \$402.4 million represented an increase of \$24.8 million, or 6.6%, over June 30, 2000 and an increase of \$22.4 million, or 5.9%, from December 31, 2000.

Edgar Filing: SUMMIT BANCSHARES INC /TX/ - Form 10-Q

Total deposits at June 30, 2001 of \$542.6 million represented an increase of \$39.3 million, or 7.8%, over June 30, 2000 and an increase of \$2.9 million, or .5%, from December 31, 2000.

The following table summarizes the Corporation's performance for the six months ended June 30, 2001 and 2000 (tax equivalent basis and dollars in thousands).

Net Interest Income

Net interest income (tax equivalent) for the second quarter of 2001 was \$7,284,000 which represented an increase of \$173,000 or 2.4%, over the second quarter of 2000. In this same period, total interest income increased \$2,000 while total interest expense decreased \$171,000 or 3.8% and reflects a 275 basis point decrease in the national prime rate for loans from the first of January 2001 to mid-June 2001.

The following table summarizes the effects of changes in interest rates, average volumes of earning assets and interest bearing liabilities on net interest income (tax equivalent) for the periods ended June 30, 2001 and 2000.

Allowance for Loan Losses and Non-Performing Assets

The Corporation's allowance for loan losses was \$5,745,000, or 1.43% of total loans, as of June 30, 2001 compared to \$6,899,000, or 1.83% of total loans, as of June 30, 2000.

Transactions in the provision for loan losses are summarized as follows

Non-accrual loans to total loans were .65% at June 30, 2001 and non-performing assets were .81% of loans and other real estate owned/foreclosed assets at the same date.

As of June 30, 2001, the Corporation had four credits that represented over 91% of the total non-accrual loans. The largest of these loans with a current balance of \$1.2 million has been on non-accrual status since the second quarter of 1998. The balance of this loan has been reduced from approximately \$2.2 million as the borrower has continued to make monthly payments. These payments, principal and interest, have reduced the balance. The total balance of non-accrual loans of \$2.6 million is reported before reducing the amount for SBA guarantees or cash collateral in the amount of \$588,000 on certain of the loans.

As of June 30, 2001 the Corporation has \$643,000 in Other Foreclosed Assets, reported in Other Assets on the Balance Sheet, which represents an inventory of textbooks. These assets are in process of liquidation, however the process is expected to take several months. The cost of liquidation is recorded as a current period expense and all proceeds from sale of inventory reduces the carrying-value of the inventory.

The following table summarizes the relationship between non-performing loans, criticized loans and the allowance for loan losses (dollars in thousands).

Non-Interest Income

The major component of non-interest income is service charges on deposits. Other service fees are the majority of other non-interest income.

The following table reflects the changes in non-interest income during the periods presented (dollars in thousands).

Total Non-interest Income	\$ 1,111	\$ 918	21.0	\$ 2,149	\$ 1,826
---------------------------	----------	--------	------	----------	----------

The increase in other non-interest income in the second quarter of 2001 as compared to the same quarter last year is primarily due to increases in mortgage brokerage/origination fees, letters of credit fees, collection fees and fees earned on investment services to customers.

Non-interest Expense

Non-interest expenses include all expenses other than interest expense, provision for loan losses and income tax expense.

The following table summarizes the changes in non-interest expense during the periods presented (dollars in thousands).

Total Non-interest Expense	\$ 4,452	\$ 4,449	0.1	\$ 9,275	\$ 8,442	

Total non-interest expense increased 0.1% in the second quarter of 2001 over 2000, reflecting increases in salaries and benefits, occupancy expense, and other operating expenses partially offset by decreases in business development expense, legal and professional expense, state franchise taxes and other real estate expense. As a percent of average assets, non-interest expenses were 2.86% in the second quarter of 2001 (annualized) and 3.18% in the same period of 2000. The "efficiency ratio" (non-interest expenses divided by total non-interest income plus net interest income) was 53.0% for the second quarter of 2001.

Edgar Filing: SUMMIT BANCSHARES INC /TX/ - Form 10-Q

The increase in occupancy expense is primarily due to a decline in rent income because of a vacancy earlier in the year at one bank-owned facility that has third party rental space. The property has subsequently been rented.

The Merger Related Expenses recorded in the first quarter of 2001 include expenses, accrued and incurred, related to the merger of the Company's two banking subsidiaries and its non-banking subsidiary to form one unit. The expenses include the cost of severance payment to a former chief executive officer of one of the units, legal and professional fees and expenses related to the merger and to the name change of Summit Bank, N.A.

Other Operating Expense in the second quarter of 2001 includes \$72,000 of expense related to Other Foreclosed Assets. These expenses are the costs to liquidate the inventory of textbooks.

Interest Rate Sensitivity

Interest rate sensitivity is the relationship between changes in market interest rates and net interest income due to the repricing characteristics of assets and liabilities.

The following table, commonly referred to as a "static gap report", indicates the interest rate sensitivity position at June 30, 2001 and may not be reflective of positions in subsequent periods (dollars in thousands):

Cumulative Gap to Total Earning Assets	1.42%	(4.83%)	(1.75%)		
Cumulative Gap to Total Assets	1.32%	(4.50%)	(1.63%)		

The preceding static gap report reflects a cumulative liability sensitive position during the one year horizon. An inherent weakness of this report is that it ignores the relative volatility any one category may have in relation to other categories or market rates in general. For instance, the rate paid on NOW accounts typically moves slower than the three month T-Bill. Management attempts to capture this relative volatility by utilizing a simulation model with a "beta factor" adjustment which estimates the volatility of rate sensitive assets and/or liabilities in relation to other market rates.

Beta factors are an estimation of the long term, multiple interest rate environment relation between an individual account and market rates in general. For instance, NOW, savings and money market accounts, which are repricable within 30 days will have considerably lower beta factors than variable rate loans and most investment categories. Taking this into consideration, it is quite possible for a bank with a negative cumulative gap to total asset ratio to have a positive "beta adjusted" gap risk position.

As a result of applying the beta factors established by management to the earning assets and interest bearing liabilities in the static gap report via a simulation model, the negative cumulative gap to total assets ratio at one year of (1.63%) was reversed to a positive 11.59% "beta adjusted" gap position.

Management feels that the "beta adjusted" gap risk technique more accurately reflects the Corporation's gap position.

Capital

The Federal Reserve Board has guidelines for capital to total assets (leverage) and capital standards for bank holding companies. The Comptroller of the Currency also has similar guidelines for national banks. These guidelines require a minimum level of Tier I capital to total assets of 3 percent. A banking organization operating at or near these levels is expected to have well-diversified risk, excellent asset quality, high liquidity, good earnings and in general be considered a strong banking organization. Organizations not meeting these characteristics are expected to operate well above these minimum capital standards. Thus, for all but the most highly rated organizations, the minimum Tier I leverage ratio is to be 3 percent plus minimum additional cushions of at least 100 to 200 basis points. At the discretion of the regulatory authorities, additional capital may be required.

The Federal Reserve Board and Comptroller of the Currency also have risk-adjusted capital adequacy guidelines. Capital under these new guidelines is defined as Tier I and Tier II. At Summit Bancshares, Inc. the only components of Tier I and Tier II capital are shareholders' equity and a portion of the allowance for loan losses, respectively. The guidelines also stipulate that four

Edgar Filing: SUMMIT BANCSHARES INC /TX/ - Form 10-Q

categories of risk weights (0, 20, 50 and 100 percent), primarily based on the relative credit risk of the counterparty, be applied to the different types of balance sheet assets. Risk weights for all off-balance sheet exposures are determined by a two-step process whereby the face value of the off-balance sheet item is converted to a "credit equivalent amount" and that amount is assigned to the appropriate risk category.

The regulatory minimum ratio for total qualifying capital is 8.00% of which 4.00% must be Tier I capital. At June 30, 2001, the Corporation's Tier I capital represented 13.8% of risk weighted assets and total qualifying capital (Tier I and Tier II) represented 15.0% of risk weighted assets. Both ratios are well above current regulatory guidelines.

Also, as of June 30, 2001, the Corporation and its Subsidiary Bank met the criteria for classification as a "well-capitalized" institution under the rules of the Federal Deposit Insurance Corporation Improvement Act of 1991 ("FDICIA").

The Corporation and Subsidiary Bank's regulatory capital positions as of June 30, 2001, were as follows (dollars in thousands):
