Our Opportunities

9

Assets Lighter Strategy

- o Sustainable 5% to about 7% capex-to-sales ratio in a cycle
- o Targeting ~20% increase in capacity (internal & external)
Q409 vs. Q410

CapEx to Sales Ratio

Depreciation by Wafer

*Based on assumed (euro)/\$ rate of about 1.30.

Continuous Focus on Cost Reduction

10

Continuous Focus on Cost Reduction

- o Manufacturing focused to reduce wafer costs, after return to full loading
- o Currency, cash costs efficiency and roll-over depreciation expected to contribute to about 10% wafer cost reduction from Q110 thru Q410*
- o Further cost reduction after the final phase-out of Phoenix fab, from Q210
- o Assembly cost reductions driven by volume, shift to Asia and Gold-Copper conversion

Wafer Cost Index (Base 100 Q110*)

*Based on assumed (euro)/\$ rate of about 1.30.

Appendix

- o Net operating cash flow is defined as net cash from operating activities minus net cash used in investing activities, excluding payment for purchases of and proceeds from the sale of marketable securities (both current and non-current), short-term deposits and restricted cash. We believe net operating cash flow provides useful information for investors and management because it measures our capacity to generate cash from our operating and investing activities to sustain our operating activities. Net operating cash flow is not a U.S. GAAP measure and does not represent total cash flow since it does not include the cash flows generated by or used in financing activities. In addition, our definition of net operating cash flow may differ from definitions used by other companies.
- o Net financial position: resources (debt), represents the balance between our total financial resources and our total financial debt. Our total financial resources include cash and cash equivalents, current and non-current marketable securities, short-term deposits and restricted cash, and our total financial debt include bank overdrafts, the current portion of long-term debt and long-term debt, all as represented in our consolidated balance sheet. We believe our net financial position provides useful information for investors because it gives evidence of our global position either in terms of net indebtedness or net cash by measuring our capital resources based on cash, cash equivalents and marketable securities and the total level of our financial indebtedness. Net financial position is not a U.S. GAAP measure.
- o Adjusted Net Earnings is a non-GAAP measure and is used by the Company's management to help enhance an understanding of ongoing operations and to communicate the impact of the excluded items. Non-GAAP earnings excludes impairment, restructuring charges and other related closure costs attributable to Parent Company's shareholders, the impact of purchase accounting (such as in-process R&D costs and inventory step-up charges), other-than-temporary impairment charges on financial assets and impairment related to equity investments, net of the relevant tax impact.
- o Financial Model: Presented at May 2009 Analyst Day
- o Key Information on Consolidation / Deconsolidation:
- o ST completed the deconsolidation of its Flash Memory Group (FMG) segment and took an equity interest in Numonyx on March 30, 2008, which is reported under the equity method of valuation with a one quarter lag in reporting.

Edgar Filing: STMICROELECTRONICS NV - Form 6-K

- o ST-NXP Wireless, a joint venture initially owned 80% by ST, began operations on August 2, 2008 and was fully consolidated into ST's operating results. On February 1, 2009 and prior to the closing of the merger of ST-NXP Wireless and Ericsson Mobile Platforms to create ST-Ericsson, ST exercised its option to buy out NXP's 20% ownership stake of ST-NXP Wireless.
- o ST-Ericsson, a joint venture owned 50% by ST, began operations on February 3, 2009 and is consolidated into ST's operating results as of that date. ST-Ericsson is led by a development and marketing company and is consolidated by ST. A separate platform design company providing platform designs mostly to the development and marketing company is accounted for by ST using the equity method.
- o Wireless Segment: As of February 3, 2009, "Wireless" includes the portion of sales and operating results of the 50/50 ST-Ericsson joint venture as consolidated in the Company's revenues and operating results, as well as other items affecting operating results related to the wireless business.
- o Sales recorded by ST-Ericsson and consolidated by ST are included in Telecom and Distribution
