OR

SHELL COMPANY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission file number 001-15002

ICICI BANK LIMITED

(Exact name of registrant as specified in its charter)

Vadodara, Gujarat, India

(Jurisdiction of incorporation or organization)

ICICI Bank Towers

Bandra-Kurla Complex

Mumbai 400051, India

(Address of principal executive offices)

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class

Equity Shares of ICICI Bank Limited(1)

Name of Each Exchange

on Which Registered

New York Stock

American Depositary Shares, each representing two Equity Shares of ICICI Bank Limited, par value Rs. 10 per share

Exchange
New York Stock
Exchange

(1) Not for trading, but only in connection with the registration of American Depositary Shares representing such Equity Shares pursuant to the requirements of the Securities and Exchange Commission.

Securities registered or to be registered pursuant to Section 12(g) of the Act:

None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:

None

The number of outstanding Equity Shares of ICICI Bank Limited as of March 31, 2012 was 1,152,714,442.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes No

Note – Checking the box above will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 from their obligations under those Sections.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of “accelerated filer and large accelerated filer” in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP

International Financial Reporting Standards as issued by the International Accounting Standards Board

Other

Indicate by check mark which financial statement item the registrant has elected to follow.

Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

CERTAIN DEFINITIONS

In this annual report, all references to “we”, “our”, and “us” are to ICICI Bank Limited and its consolidated subsidiaries and other consolidated entities under generally accepted accounting principles in India (“Indian GAAP”). In the financial statements contained in this annual report and the notes thereto, all references to “the Company” are to ICICI Bank Limited and its consolidated subsidiaries and other consolidated entities under Indian GAAP.

References to specific data applicable to particular subsidiaries or other consolidated entities are made by reference to the name of that particular entity. References to the “amalgamation” are to the amalgamation of ICICI, ICICI Personal Financial Services and ICICI Capital Services with ICICI Bank. References to “the Scheme of Amalgamation” are to the Scheme of Amalgamation of ICICI, ICICI Personal Financial Services and ICICI Capital Services with ICICI Bank approved by the High Court of Gujarat at Ahmedabad on March 7, 2002 and by the High Court of Judicature at Bombay on April 11, 2002 and approved by the Reserve Bank of India on April 26, 2002. References to “Sangli Bank” are to The Sangli Bank Limited prior to its amalgamation with ICICI Bank, effective April 19, 2007. References to “Bank of Rajasthan” are to the Bank of Rajasthan Limited prior to its amalgamation with ICICI Bank, effective from the close of business at August 12, 2010.

References to “ICICI Bank” and “the Bank” are to ICICI Bank Limited on an unconsolidated basis. References to “ICICI” are to ICICI Limited and its consolidated subsidiaries and other consolidated entities under Indian GAAP prior to the amalgamation of ICICI Limited, ICICI Personal Financial Services Limited and ICICI Capital Services Limited with ICICI Bank Limited which was effective March 30, 2002 under Indian GAAP. References to a particular “fiscal” year are to the year ended on March 31 of such a year. Unless otherwise indicated, all references to the “Board of Directors” and the “Board” are to the board of directors of ICICI Bank.

All references to the “Companies Act”, the “Banking Regulation Act” and the “Reserve Bank of India Act” are to the Companies Act, 1956, the Banking Regulation Act, 1949 and the Reserve Bank of India Act, 1934 as passed by the Indian Parliament and as amended from time to time. All references to “RBI” and the “Reserve Bank of India” are to the central banking and monetary authority of India.

Pursuant to the issuance and listing of our securities in the United States under registration statements filed with the United States Securities and Exchange Commission, we file annual reports on Form 20-F which must include financial statements prepared under generally accepted accounting principles in the United States (U.S. GAAP), or financial statements prepared according to a comprehensive body of accounting principles with a reconciliation of net income and stockholders’ equity to U.S. GAAP. When we first listed our securities in the United States, Indian GAAP was not considered a comprehensive body of accounting principles under the United States securities laws and regulations. Accordingly, our annual reports on Form 20-F for fiscal years 2000 through 2005 included U.S. GAAP financial statements. However, pursuant to a significant expansion of Indian accounting standards, Indian GAAP constitutes a comprehensive body of accounting principles. Accordingly, we have included in this annual report, as in the annual reports for fiscal years 2006 through 2011, consolidated financial statements prepared according to Indian GAAP, with a reconciliation of net income and stockholders’ equity to U.S. GAAP and a description of significant differences between Indian GAAP and U.S. GAAP.

Our annual report prepared and distributed to our shareholders under Indian law and regulations include unconsolidated Indian GAAP financial statements, management’s discussion and analysis of the Bank’s results of operations and financial condition based on the Bank’s unconsolidated Indian GAAP financial statements and our consolidated Indian GAAP financial statements.

FORWARD-LOOKING STATEMENTS

We have included statements in this annual report which contain words or phrases such as “will”, “would”, “aim”, “aimed”, “will likely result”, “is likely”, “are likely”, “believe”, “expect”, “expected to”, “will continue”, “will achieve”, “anticipate”, “estimate”, “estimating”, “intend”, “plan”, “contemplate”, “seek to”, “seeking to”, “trying to”, “target”, “propose to”, “future”, “objective”, “should”, “can”, “could”, “may”, “will pursue” and similar expressions or variations of such expressions that may constitute “forward-looking statements”. These forward-looking statements involve a number of risks, uncertainties and other factors that could cause actual results, opportunities and growth potential to differ materially from those suggested by the forward-looking statements. These risks and uncertainties include, but are not limited to, the actual growth in demand for banking and other financial products and services in the countries in which we operate or where a material number of our customers reside, our ability to successfully implement our strategy, including our retail deposit growth strategy, our use of the internet and other technology, our rural expansion, our exploration of merger and acquisition opportunities, our ability to integrate recent or future mergers or acquisitions into our operations and manage the risks associated with such acquisitions to achieve our strategic and financial objectives, our ability to manage the increased complexity of the risks that we face following our international growth, future levels of non-performing and restructured loans, our growth and expansion in domestic and overseas markets, the adequacy of our allowance for credit and investment losses, technological changes, investment income, our ability to market new products, cash flow projections, the outcome of any legal, tax or regulatory proceedings in India and in other jurisdictions in which we are or become a party to, the future impact of new accounting standards, our ability to implement our dividend payment practice, the impact of changes in banking and insurance regulations and other regulatory changes in India and other jurisdictions on us, including with respect to the assets and liabilities of ICICI, a former financial institution not subject to Indian banking regulations, the state of the global financial system and systemic risks, the bond and loan market conditions and availability of liquidity amongst the investor community in these markets, the nature of credit spreads and interest spreads from time to time, including the possibility of increasing credit spreads or interest rates, our ability to roll over our short-term funding sources and our exposure to credit, market and liquidity risks. We undertake no obligation to update forward-looking statements to reflect events or circumstances after the date thereof.

In addition, other factors that could cause actual results to differ materially from those estimated by the forward-looking statements contained in this annual report include, but are not limited to, the monetary and interest rate policies of India and the other markets in which we operate, natural calamities and environmental issues, general economic and political conditions in India, southeast Asia, and the other countries which have an impact on our business activities or investments, political or financial instability in India or any other country caused by any factor including any terrorist attacks in India, the United States or elsewhere or any other acts of terrorism worldwide, any anti-terrorist or other attacks by the United States, a United States-led coalition or any other country, the monetary and interest rate policies of India, tensions between India and Pakistan related to the Kashmir region or military armament or social unrest in any part of India, inflation, deflation, unanticipated turbulence in interest rates, changes or volatility in the value of the rupee, foreign exchange rates, equity prices or other rates or prices, the performance of the financial markets in general, changes in domestic and foreign laws, regulations and taxes, changes in competition and the pricing environment in India and regional or general changes in asset valuations. For a further discussion of the factors that could cause actual results to differ, see the discussion under “Risk Factors” contained in this annual report.

EXCHANGE RATES

Fluctuations in the exchange rate between the Indian rupee and the U.S. dollar will affect the U.S. dollar equivalent of the Indian rupee price of equity shares on the Indian stock exchanges and, as a result, will affect the market price of our American Depositary Shares, or ADSs, in the United States. These fluctuations will also affect the conversion into U.S. dollars by the depositary of any cash dividends paid in Indian rupees on our equity shares represented by ADSs.

During fiscal 2008, the Indian rupee appreciated against the U.S. dollar by 7.1%, moving from Rs. 43.10 per U.S.\$ 1.00 at March 30, 2007 to Rs. 40.02 per U.S.\$ 1.00 at March 31, 2008, led largely by increased capital flows following strong economic growth. During fiscal 2009, following the onset of the global financial crisis and decline in capital flows, the rupee depreciated against the U.S. dollar by 27.1%, moving from Rs. 40.02 per U.S.\$ 1.00 at March 31, 2008 to Rs. 50.87 per U.S.\$ 1.00 at March 31, 2009. Given improved domestic economic conditions, during fiscal 2010, the rupee appreciated against the U.S. dollar by 11.6% moving from Rs. 50.87 per U.S.\$ 1.00 at March 31, 2009 to Rs. 44.95 at March 31, 2010. During fiscal 2011, the rupee appreciated against the U.S.\$ 1.00 by 0.9%, moving from Rs. 44.95 per U.S.\$ 1.00 at March 31, 2010 to Rs. 44.54 at March 31, 2011. During fiscal 2012, the rupee depreciated against the U.S. dollar by 14.3%, moving from Rs. 44.54 per U.S. \$ 1.00 at March 31, 2011 to Rs. 50.89 at March 31, 2012 due to volatility in capital flows on account of increased risk aversion following the European sovereign debt crisis as well as moderation in India's economic growth. During fiscal 2013 (through June 30, 2012), the rupee depreciated further against the U.S. dollar from Rs. 50.89 per US\$1.00 at March 31, 2012 to Rs. 55.57 per US\$1.00 at June 30, 2012 due to concern about current account deficit and fiscal deficit and increased risk aversion following the European sovereign debt crisis. See "Risk Factors—Risks Relating to India and Other Economic and Market Risks—Any volatility in the exchange rate and increased intervention by the Reserve Bank of India in the foreign exchange market may lead to a decline in India's foreign exchange reserves and may affect liquidity and interest rates in the Indian economy, which could adversely impact us".

The following table sets forth, for the periods indicated, certain information concerning the exchange rates between Indian rupees and U.S. dollars. For periods prior to January 1, 2009, the exchange rates reflect the noon buying rates as reported by the Federal Reserve Bank of New York. For periods after January 1, 2009, the exchange rates reflect the exchange rates as set forth in the H.10 statistical release of the Federal Reserve Board.

Fiscal Year	Period End(1)	Average(1)(2)
2008	40.02	40.13
2009	50.87	46.32
2010	44.95	47.18
2011	44.54	45.46
2012	50.89	48.01
2013 (through June 30, 2012)	55.57	55.94
Month	High	Low

May 2012	56.38	52.50
June 2012	57.13	54.91

(1) The exchange rate at each period end and the average rate for each period differed from the exchange rates used in the preparation of our financial statements.

(2) Represents the average of the exchange rate on the last day of each month during the period.

Although certain rupee amounts in this annual report have been translated into U.S. dollars for convenience, this does not mean that the rupee amounts referred to could have been, or could be, converted into U.S. dollars at any particular rate, the rates stated below, or at all. Except as otherwise stated in this annual report, all translations from rupees to U.S. dollars are based on the exchange rate as set forth in the H.10 statistical release of the Federal Reserve Board at March 31, 2012. The Federal Reserve Bank of New York certifies this rate for customs purposes in a weekly version of the H.10 release. The exchange rate as set forth in the H.10 statistical release of the Federal Reserve Board at March 31, 2012 was Rs. 50.89 per U.S.\$ 1.00 and at June 29, 2012 was Rs. 55.57 per U.S.\$ 1.00.

MARKET PRICE INFORMATION

Equity Shares

Our outstanding equity shares are currently listed and traded on the Bombay Stock Exchange, or the BSE, and on the National Stock Exchange of India Limited, or the NSE.

At June 30, 2012, 1,152,874,294 equity shares were outstanding. The prices for equity shares as quoted in the official list of each of the Indian stock exchanges are in Indian rupees.

The following table shows:

- The reported high and low closing prices quoted in rupees for our equity shares on the NSE; and
- The reported high and low closing prices for our equity shares, translated into U.S. dollars, based on (i) the noon buying rates as reported by the Federal Reserve Bank of New York for periods prior to January 1, 2009 and (ii) the exchange rate as set forth in the H.10 statistical release of the Federal Reserve Board for periods after January 1, 2009, on the last business day of each period presented.

(1) Data from the NSE. The prices quoted on the BSE may be different.

5

At June 29, 2012, the closing price of equity shares on the NSE was Rs. 899.5 equivalent to U.S.\$ 16.19 per equity share (U.S.\$ 32.38 per ADS on an imputed basis) translated at the exchange rate of Rs. 55.57 per U.S.\$ 1.00 as set forth in the H.10 statistical release of the Federal Reserve Board on June 29, 2012.

At year-end fiscal 2012, there were approximately 709,083 holders of record of our equity shares, of which 334 had registered addresses in the United States and held an aggregate of approximately 85,680 equity shares.

ADSs

Our ADSs, each representing two equity shares, were originally issued in March 2000 in a public offering and are listed and traded on the New York Stock Exchange under the symbol IBN. The equity shares underlying the ADSs are listed on the BSE and the NSE.

At year-end fiscal 2012, ICICI Bank had approximately 153 million ADSs, equivalent to about 306 million equity shares, outstanding. At June 30, 2012, there were approximately 54,000 record holders of ICICI Bank's ADSs, out of which 135 have registered addresses in the United States.

The following table sets forth, for the periods indicated, the reported high and low closing prices on the New York Stock Exchange for our outstanding ADSs traded under the symbol IBN.

	Price per ADS	
	High	Low
Annual prices:		
Fiscal 2008	US\$72.88	US\$35.16

June 2012	32.41	27.99

See also “Risk Factors—Risks relating to the ADSs and Equity Shares—Conditions in the Indian securities market may adversely affect the price or liquidity of our equity shares and ADSs”.

RISK FACTORS

You should carefully consider the following risk factors as well as other information contained in this annual report in evaluating us and our business.

Risks Relating to India and Other Economic and Market Risks

A prolonged slowdown in economic growth or rise in interest rates in India could cause our business to suffer.

A slowdown in the Indian economy could adversely affect our business and our borrowers and contractual counterparties, especially if such a slowdown were to be continued and prolonged. India's gross domestic product growth slowed from 8.4% during fiscal 2010 and fiscal 2011 to 6.5% in fiscal 2012, primarily driven by a slowdown in the industrial sector, which grew by 2.6% in fiscal 2012 from 6.8% in fiscal 2011.

Inflation remained high at above 9.5% during April-November 2011, but subsequently moderated from December 2011 onwards to around 7.7% at March 2012. Average inflation for fiscal 2012 was 8.9%. In response to inflationary trends, the Reserve Bank of India progressively tightened the repo rate until October 2011. The repo rate was increased by 175 basis points from 6.75% to 8.50% during April 2011 to October 2011. As economic growth and the inflation moderated during the latter part of fiscal 2012, the Reserve Bank of India reduced the cash reserve ratio by 125 basis points from 6.0% to 4.75% in the fourth quarter of fiscal 2012. In April 2012, in its annual policy review, the Reserve Bank of India reduced the repo rate by 50 basis points to 8.0%. Any further increase in inflation due to increases in prices of commodities such as crude oil, or otherwise, may result in a continuation of tight monetary policy or lead to further tightening of monetary policy.

The Indian economy in general and the agricultural sector in particular are impacted by the level and timing of monsoon rainfall. In addition, investments by the corporate sector in India are impacted by government policies and decisions including policies and decisions regarding awards of licenses, access to land, access to natural resources and the protection of the environment.

Further, in light of the increasing linkage of the Indian economy to other economies, the Indian economy is increasingly influenced by economic and market conditions in other countries. As a result, unfavorable developments in the United States and other countries in the developed world and a slowdown in economic growth in major emerging markets like China could have an adverse impact on economic growth in India.

A slowdown in the rate of growth in the Indian economy could result in lower demand for credit and other financial products and services and higher defaults among corporate, retail and rural borrowers, which could adversely impact our business, our financial performance, our stockholders' equity, our ability to implement our strategy and the price of our equity shares and ADSs.

Financial instability in other countries, particularly emerging market countries and countries where we have established operations, could adversely affect our business and the price of our equity shares and ADSs.

Although the proximate cause of the 2008 – 2009 financial crisis, which was deeper than other recent financial crises, was the U.S. residential mortgage market, investors should be aware that there is a recent history of financial crises and boom-bust cycles in multiple markets in both the emerging and developed economies which leads to risks for all financial institutions, including us. Developments in the Eurozone, including concerns regarding sovereign debt and recessionary economic conditions have further led to increased risk aversion and volatility in global capital markets. A loss of investor confidence in the financial systems of India or other markets and countries or any financial instability in India or any other market may cause increased volatility in the Indian financial markets and, directly or indirectly,

adversely affect the Indian economy and financial sector, our business and our future financial performance. See also “—Risks Relating to Our Business—We experienced rapid international growth in earlier years which has increased the complexity of the risks that we face”. We remain subject to the risks posed by the indirect impact of adverse developments in the global economy, some of which cannot be anticipated and the vast majority of which are not under our control. We also remain subject to counterparty risk to financial institutions that fail or are otherwise unable to meet their obligations to us.

Any downgrading of India's debt rating by an international rating agency could adversely affect our business, our liquidity and the price of our equity shares and ADSs.

Standard & Poor's, an international rating agency, revised its outlook for India's debt rating from 'Stable' to 'Negative' in April 2012 and stated that there was a one in three probability of a downgrade in the next two years. Subsequently in June 2012, Fitch, another international rating agency, also revised its outlook for India's debt from 'Stable' to 'Negative'. In May 2012, Moody's revised downwards its baseline credit assessment of certain Indian banks, including ICICI Bank, to reflect the banks' significant exposure to domestic credit and domestic sovereign debt and their linkage to the sovereign credit strength. Moody's action did not impact the ratings of the Bank's senior unsecured debt. Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our business and limit our access to capital markets and adversely impact our liquidity position. See also "—Risks Relating to Our Business—Our inability to effectively manage credit, market and liquidity risk and inaccuracy of our valuation models and accounting estimates may have an adverse effect on our earnings, capitalization, credit ratings and cost of funds".

The Bank has certain borrowings that would be affected by a one or two notch downgrade from its current credit rating. These borrowings amount to less than 2% of the total borrowings of the Bank at year-end fiscal 2012. If an international credit rating agency downgrades the Bank's credit rating by one or two notches, the Bank would be required to pay an increased interest rate on certain borrowings, and for certain borrowings, the Bank would be required to renegotiate a new interest rate with its lenders. If the Bank is not able to reach an agreement for an interest rate with a lender, the lender could require the Bank to prepay the outstanding principal amount of the loan.

A significant increase in the price of crude oil could adversely affect the Indian economy, which could adversely affect our business.

India imports a majority of its requirements of crude oil, which comprised over 30% of total imports in fiscal 2012. Following the recovery in the global economic environment in fiscal 2011 and tensions in the Middle East and North Africa, global oil prices increased sharply in fiscal 2012. However, oil prices have declined to some extent due to concerns over a slowdown in global growth. Increases or volatility in oil prices and the pass-through of such increases to Indian consumers could have a material negative impact on the Indian economy and the Indian banking and financial system in particular, including through a rise in inflation and market interest rates and higher trade and fiscal deficits. This could adversely affect our business including our liquidity, the quality of our assets, our financial performance, our stockholders' equity, our ability to implement our strategy and the price of our equity shares and ADSs.

Current account deficits, including trade deficits could adversely affect our business and the price of our equity shares and ADSs.

India's trade relationships with other countries and its trade deficit, driven to a major extent by global crude oil prices, may adversely affect Indian economic conditions. If current account and trade deficits increase, or are no longer manageable because of the rise in global crude oil prices or otherwise, the Indian economy, and therefore our business, our financial performance, our stockholders' equity and the price of our equity shares and ADSs could be adversely affected.

Any volatility in the exchange rate and increased intervention by the Reserve Bank of India in the foreign exchange market may lead to a decline in India's foreign exchange reserves and may affect liquidity and interest rates in the Indian economy, which could adversely impact us.

During fiscal 2012, India suffered a reversal of capital inflows as a result of the domestic economic slowdown and volatility in global capital markets, leading to pressures on the balance of payments and a sharp depreciation of the Indian rupee compared to the U.S. dollar. Any increased intervention by the Reserve Bank of India in the foreign exchange market to control the volatility of the exchange rate may result in a decline in India's foreign exchange reserves and reduced liquidity and higher interest rates in the Indian economy, which could adversely affect our business, our future financial performance and the price of our equity shares and ADSs. Further, increased volatility

in capital flows may also increase the complexity in monetary policy decisions, leading to volatility in inflation and interest rates in India, which could adversely impact our business.

Natural calamities, climate change and health epidemics could adversely affect the Indian economy, or the economy of other countries where we operate, our business and the price of our equity shares and ADSs.

India has experienced natural calamities such as earthquakes, floods and droughts in the past few years. The extent and severity of these natural disasters determine their impact on the Indian economy. In particular, climatic and weather conditions, such as the level and timing of monsoon rainfall, impact the agricultural sector, which constitutes approximately 14% of India's gross domestic product. The Indian Meteorological Department has indicated a deficit in monsoon rainfall in fiscal 2013 with monsoon rainfall about 22% below the long-term average until July 18, 2012. Prolonged spells of below or above normal rainfall or other natural calamities, or global or regional climate change, could adversely affect the Indian economy and our business, especially our rural portfolio. Similarly, global or regional climate change or natural calamities in other countries where we operate could affect the economies of those countries and our operations in those countries.

Financial difficulty and other problems in certain financial institutions in India could adversely affect our business and the price of our equity shares and ADSs.

As an Indian bank, we are exposed to the risks of the Indian financial system which may be affected by the financial difficulties faced by certain Indian financial institutions because the commercial soundness of many financial institutions may be closely related as a result of credit, trading, clearing or other relationships. This risk, which is sometimes referred to as "systemic risk", may adversely affect financial intermediaries, such as clearing agencies, banks, securities firms and exchanges with which we interact on a daily basis. Any such difficulties or instability of the Indian financial system in general could create an adverse market perception about Indian financial institutions and banks and adversely affect our business. Our transactions with these financial institutions expose us to credit risk in the event of default by the counterparty, which can be exacerbated during periods of market illiquidity. See also "Overview of the Indian Financial Sector". As the Indian financial system operates within an emerging market, we face risks of a nature and extent not typically faced in more developed economies, including the risk of deposit runs notwithstanding the existence of a national deposit insurance scheme. For example, in April 2003, unsubstantiated rumors, believed to have originated in Gujarat, a state in India, alleged that we were facing liquidity problems. Although our liquidity position was sound, we witnessed higher than normal deposit withdrawals on account of these unsubstantiated rumors for several days in April 2003. During September-October 2008, following the disclosure of our exposure to Lehman Brothers and other U.S. and European financial institutions, rumors were circulated about our financial position which resulted in concerns being expressed by depositors and higher than normal transaction levels on a few days. We controlled the situation in these instances, but any failure to control such situations in the future could result in high volumes of deposit withdrawals, which would adversely impact our liquidity position, disrupt our business and, in times of market stress, undermine our financial strength. In fiscal 2011, Indian government agencies initiated proceedings against certain financial institutions alleging bribery in the loans and investment approval process, which impacted market sentiment. Similar developments in the future could adversely impact the financing of proposed investments by the corporate sector and negatively impact confidence in the financial sector.

A significant change in the Indian government's policies could adversely affect our business and the price of our equity shares and ADSs.

Our business and customers are predominantly located in India or are related to and influenced by the Indian economy. The Indian government has traditionally exercised, and continues to exercise, a dominant influence over many aspects of the economy. Government policies could adversely affect business and economic conditions in India, our ability to implement our strategy, and our future financial performance. Since 1991, successive Indian

governments have pursued policies of economic liberalization, including significantly relaxing restrictions on the private sector and encouraging the development of the Indian financial sector. India has been governed by coalition governments for the past several years. The leadership of India and the composition of the coalition in power are subject to change, and election results are sometimes not along expected lines. It is therefore difficult to predict the economic policies that will be pursued by governments in the future. In addition, investments by the corporate sector

in India may be impacted by government policies and decisions, including with respect to awards of licenses and resources, access to land and natural resources and policies with respect to protection of the environment. These may result in delays in execution of projects including those financed by us, and also limit fresh project investments, impacting economic growth. The pace of economic liberalization could change, and specific laws and policies affecting banking and finance companies, foreign investment, currency exchange and other matters affecting investment in our securities could change as well. For instance, the government of India has proposed a new direct tax code that could impact our taxation in the future, as well as the investment decisions of individuals, thereby impacting our business. The government of India has also proposed adopting a uniform goods and service tax structure in India, which may also have an impact on the way in which we are taxed in the future. Any significant change in India's economic policies or any market volatility as a result of uncertainty surrounding India's macroeconomic policies or the future elections of its government could adversely affect business and economic conditions in India generally and our business in particular.

If regional hostilities, terrorist attacks or social unrest in some parts of the country increase, our business and the price of our equity shares and ADSs could be adversely affected.

India has from time to time experienced social and civil unrest and hostilities both internally and with neighboring countries. In the past, there have been military confrontations between India and Pakistan. India has also experienced terrorist attacks in some parts of the country, including in Mumbai, where our headquarters are located, most recently in July 2011. These hostilities and tensions could lead to political or economic instability in India and adversely affect our business, our future financial performance, our stockholders' equity and the price of our equity shares and ADSs.

Risks Relating to Our Business

Our banking and trading activities are particularly vulnerable to interest rate risk and volatility in interest rates could adversely affect our net interest margin, the value of our fixed income portfolio, our income from treasury operations, the quality of our loan portfolio and our financial performance.

As a result of certain reserve requirements of the Reserve Bank of India, we are more structurally exposed to interest rate risk than banks in many other countries. See also "Supervision and Regulation—Legal Reserve Requirements". These requirements result in our maintaining a large portfolio of fixed income government of India securities, and we could be materially adversely impacted by a rise in interest rates, especially if the rise were sudden or sharp. Realized and marked-to-market gains or losses on investments in fixed income securities, including government of India securities, are an important element of our profitability and are impacted by movements in market yields. A rise in yields on government securities, as has taken place since fiscal 2010, reduces our profits from this activity and the value of our fixed income portfolio. These requirements also have a negative impact on our net interest income and net interest margin because we earn interest on a portion of our assets at rates that are generally less favorable than those typically received on our other interest-earning assets. We are also exposed to interest rate risk through our treasury operations and our subsidiary, ICICI Securities Primary Dealership, which is a primary dealer in government of India securities. In our asset management business, we manage money market mutual funds whose performance is impacted by a rise in interest rates, which adversely impacts our revenues and profits from this business.

If the yield on our interest-earning assets does not increase at the same time or to the same extent as our cost of funds, or if our cost of funds does not decline at the same time or to the same extent as the decrease in yield on our interest-earning assets, our net interest income and net interest margin would be adversely impacted. Any systemic decline in low cost funding available to banks in the form of current and savings account deposits would adversely impact our net interest margin. In its second quarter review of monetary policy in October 2011, the Reserve Bank of India deregulated the interest rate on savings deposits, following which some of the smaller banks in India increased their savings deposit rates by 200-300 basis points. If other banks with whom we compete similarly raise their deposit

rates, we may also have to do so to remain competitive, which would adversely impact our cost of funds. In December 2011, the Reserve Bank of India deregulated interest rates on non-resident (external) rupee deposits and ordinary non-resident accounts. If there are increases in our cost of funds and if we are not able to pass on the increases fully into our lending rates, our net interest margins and profitability would be adversely impacted.

Further, any tightening of liquidity and volatility in international markets, may limit our access to international bond markets and result in an increase in our cost of funding for our international business. Continued volatility in international markets could constrain and increase the cost of our international market borrowings and our ability to replace maturing borrowings and fund new assets. The recent concerns on sovereign debt in Europe and the downgrade of the credit rating of the United States have resulted in a widening of spreads for financial institutions, including ICICI Bank. Our overseas banking subsidiaries are also exposed to similar risks.

High and increasing interest rates or greater interest rate volatility would adversely affect our ability to grow, our net interest margins, our net interest income, our income from treasury operations and the value of our fixed income securities portfolio.

If we are not able to control the level of non-performing assets in our portfolio, our business will suffer.

Increases in the level of non-performing loans increase the risk of investing in our ADS. Various factors, including a rise in unemployment, prolonged recessionary conditions, our regulators' assessment and review of our loan portfolio, a sharp and sustained rise in interest rates, developments in the Indian economy, movements in global commodity markets and exchange rates and global competition could cause an increase in the level of our non-performing assets and have a material adverse impact on the quality of our loan portfolio. From fiscal 2009 through fiscal 2011, due to seasoning of the loan portfolio, an adverse macroeconomic environment and challenges in loan recovery, we experienced an increase in non-performing loans, especially in the non-collateralized retail loan portfolio. As a consequence, since fiscal 2009, we have substantially reduced origination of such loans.

As a result of a slowdown in economic activity, rising interest rates and the limited ability of corporations to access capital in view of the volatility in global markets, there has been an increase in restructured loans in the banking system in fiscal 2012, including for us. Further economic and project implementation challenges in India and overseas could result in some of our borrowers not being able to meet their debts or restructured debt obligations, resulting in loans to such borrowers being classified as non-performing. See also “—The level of restructured loans in our portfolio may increase and the failure of our restructured loans to perform as expected could affect our business”. The loan portfolio of our international branches and subsidiaries includes foreign currency loans to Indian companies for their Indian operations (as permitted by regulation) as well as for their overseas ventures, including cross-border acquisitions. This exposes us to specific additional risks including the failure of the acquired entities to perform as expected, and our inexperience in various aspects of the economic and legal framework in overseas markets. See also “—We experienced rapid international growth in earlier years which has increased the complexity of the risks that we face”. Further, we expect long-term project finance to be a significant area of growth in our business going forward, and the quality of this portfolio could be adversely impacted by several factors. See also “—Our loan portfolio includes long-term project finance loans, which are particularly vulnerable to completion and other risks”. In certain cases, we have extended loan facilities to clients based on collateral consisting of equity shares and any volatility in the capital markets may impact the value of such collateral. We may not be able to control or reduce the level of non-performing assets in our project and corporate finance portfolio.

We also have investments in security receipts arising from the sale of non-performing assets by us to Asset Reconstruction Company (India) Limited, a reconstruction company registered with the Reserve Bank of India and other reconstruction companies. See also “Business—Classification of Loans”. There can be no assurance that Asset Reconstruction Company (India) Limited and other reconstruction companies will be able to recover these assets and redeem our investments in the security receipts and that there will be no reduction in the value of these investments.

If we are not able to control or reduce the level of non-performing assets, the overall quality of our loan portfolio would deteriorate, we may become subject to enhanced regulatory oversight and scrutiny, our reputation may be adversely impacted and our profitability and the price of our equity shares and ADSs could be adversely affected.

We are subject to the directed lending requirements of the Reserve Bank of India, and any shortfall in achieving these requirements may be required to be invested in government schemes that yield low returns, thereby impacting our profitability. We may also experience a higher level of non-performing assets in our

directed lending portfolio, which could adversely impact the quality of our loan portfolio, our business and the price of our equity shares and ADSs.

Under the directed lending norms of the Reserve Bank of India, banks in India are required to lend 40.0% of their adjusted net bank credit to certain eligible sectors, categorized as priority sectors. Of this, 18.0% of adjusted net bank credit is required to be lent to the agricultural sector, including direct agricultural advances of at least 13.5% and indirect agricultural advances of not more than 4.5%. Direct agricultural advances include loans made directly to individual farmers or groups of individual farmers for agriculture and related activities. Indirect agricultural advances include loans for purposes linked to agriculture, such as loans to food and agri-processing units, finance for hire-purchase schemes for distribution of agricultural machinery and implements, financing farmers indirectly through the co-operative system and loans for the construction and operation of storage facilities. Other than the 18.0% of adjusted net bank credit that is required to be lent to the agricultural sector, the balance of the priority sector lending requirement can be met by lending to a range of sectors, including small businesses and residential mortgages satisfying certain criteria. Loans to identified weaker sections of society must comprise 10.0% of adjusted net bank credit. Some categories of loans may qualify as both weaker section lending and priority sector lending. These requirements are to be met as of the last reporting Friday of the fiscal year with reference to the adjusted net bank credit of the previous fiscal year. These requirements apply to ICICI Bank on a standalone basis. The Bank did not meet its priority sector lending requirements at year-end fiscal 2012.

Until fiscal 2011, the Bank was required to extend 50.0% of its residual adjusted net bank credit to priority sectors, after excluding the advances of ICICI at year-end fiscal 2002. The Reserve Bank of India stipulated that the Bank was required to extend 38.5% of its adjusted net bank credit (including the advances of ICICI) to priority sectors in fiscal 2012 and extend 40.0% of adjusted net bank credit to priority sectors from fiscal 2013. As a result of this, the Bank's priority sector lending requirements increased in fiscal 2012 as compared to fiscal 2011 and will further increase in fiscal 2013 as compared to fiscal 2012.

Any shortfall in meeting these requirements may be required to be invested in government schemes that yield low returns, ranging from 4% to 8% depending on the level of shortfall, thereby impacting our profitability. The aggregate amount of funding required by such schemes is drawn from banks that have shortfalls in achievement of their directed lending targets, with the amounts drawn from each bank determined by the Reserve Bank of India. At year-end fiscal 2012, our total mandated investments in such schemes on account of past shortfalls in achieving the required level of priority sector lending were Rs. 181.0 billion and such investments are expected to increase in future years in view of the shortfall in fiscal 2012 and the possible shortfall in future years.

We may experience a higher level of non-performing assets in our directed lending portfolio, particularly in loans to the agricultural sector and small enterprises, where we are less able to control the portfolio quality and where economic difficulties are likely to affect our borrowers more severely. The Bank's gross non-performing assets in the priority sector loan portfolio were 3.3% in fiscal 2011 and 2.6% in fiscal 2012, respectively. In its budget for fiscal 2009, the government announced a one-time debt waiver scheme for small and marginal farmers. While the government has borne the cost of this scheme, any similar schemes in the future may have an adverse impact on future debt servicing behavior regarding farm loans and may lead to an increase in non-performing loans in the agricultural sector.

Through recent guidelines and directions, the Reserve Bank of India has restricted the ability of banks to meet the directed lending obligations through lending to specialized financial intermediaries. In July 2012, the Reserve Bank of India issued revised guidelines on priority sector lending requirements. While keeping the lending targets unchanged, the revised guidelines specify certain categories of lending that would be eligible for classification as priority sector lending and its sub-segments. The guidelines also aim to increase direct agricultural lending by banks to individuals and reduce lending activity through intermediaries like non-banking finance companies and housing finance

companies. The guidelines also stipulate that investments by banks in securitized assets, outright purchases of loans and assignments would be eligible for classification under priority sector if the underlying assets themselves qualified for such treatment. Further, the interest rates charged to ultimate borrowers by the originating entities in such transactions have also been capped, in order for such transactions to be classified as priority sector lending. The guidelines also increased the priority sector lending requirements of foreign banks in India that have 20 or more branches, in order to bring them on par with domestic banks. Any future changes by the Reserve Bank of India in

the directed lending norms may result in our continued inability to meet the priority sector lending requirements as well as require us to increase our lending to relatively more risky segments and may result in an increase in non-performing loans.

The level of restructured loans in our portfolio may increase and the failure of our restructured loans to perform as expected could affect our business.

Our standard assets include restructured standard loans. See also “Business—Classification of Loans—Restructured Loans”. As a result of a slowdown in economic activity, rising interest rates and volatility in global markets limiting the ability of corporations to access capital, we have seen an increase in our restructured loans during fiscal 2012. In fiscal 2012, we also restructured a portion of our loans to microfinance institutions. In January 2012, the Reserve Bank of India constituted a working group to review the existing prudential guidelines on restructuring of advances by banks /financial institutions and suggest revisions taking into account international best practices and accounting standards. In July 2012, the Reserve Bank of India released the report of the working group, which recommended that over a period of time, restructured loans (other than in the infrastructure sector) should be classified as non-performing and the provisioning and capital adequacy requirements applicable to non-performing assets should be applied to such loans. The report also recommends a phased increase in the general provisioning requirement on restructured standard assets from the present level of 2.0% to 5.0%, prescribing a ceiling on the conversion of debt into preference/equity shares, increasing the amount of owner haircuts required in restructurings of large exposures and requiring enhanced restructuring disclosure requirements for banks. The combination of any change in regulations regarding the classification of loans as restructured loans or the upgrading of loans and any substantial increase in the level of restructured assets and the failure of these borrowers to perform as expected could adversely affect our business, our future financial performance, our stockholders’ equity and the price of our equity shares and ADSs.

Our loan portfolio includes long-term project finance loans, which are particularly vulnerable to completion and other risks.

Project financing provided to the industrial and manufacturing sectors constituted a significant portion of the ICICI loan portfolio. In the past, we have experienced a high level of default and restructuring in our industrial and manufacturing project finance loan portfolio as a result of the downturn in certain global commodity markets and increased competition in India.

In recent years, the infrastructure project finance market in India has been growing. We expect long-term project finance to be a significant area of growth in our business going forward, and the quality of this portfolio could be adversely impacted by several factors. The viability of these projects depends upon a number of factors, including market demand, government policies, the processes for awarding government licenses and access to natural resources and their subsequent judicial or other review, the financial condition of the government or other entities that are the primary customers for the output of such projects and the overall economic environment in India and the international markets. These projects are particularly vulnerable to a variety of risks, including risks of delays in regulatory approvals, environmental and social issues, completion risk and counterparty risk, which could adversely impact their ability to generate revenues. Our loans to the power sector, in particular, increased substantially from 3.5% of our total gross loans at year-end fiscal 2010 to 4.2% of our total gross loans at year-end fiscal 2011 and further to 5.1% of our total gross loans at year-end fiscal 2012. Concerns have emerged on the availability of coal for upcoming power projects in India, primarily due to environmental concerns around coal mining in some areas. In addition, power projects inherently have high leverage levels and the current volatility in capital markets and concerns about the implementation of these projects and their future cash flows may constrain the availability of equity funding for such projects. We cannot be sure that these projects will begin operations as scheduled or perform as anticipated. While a large portion of these projects are under implementation and the commercial dates of operations are yet to be reached, we may see an increase in our non-performing assets or restructured assets portfolio in case of delays of more than

two years from the scheduled commercial date of operations of such projects, in line with Reserve Bank of India guidelines. A slowdown in the Indian and global economy may exacerbate the risks for the projects that we have financed. Future project finance losses or high levels of loan restructuring could have a materially adverse effect on our profitability and the quality of our loan portfolio and the price of our equity shares and ADSs.

Further deterioration of our non-performing asset portfolio combined with Reserve Bank of India requirements that all Indian banks increase their provisioning coverage as a percentage of gross non-performing assets could adversely affect our business.

There can be no assurance that the percentage of non-performing assets that we will be able to recover will be similar to our past experience of recoveries of non-performing assets. During fiscal years 2008, 2009 and 2010, we saw an increase in non-performing assets, mainly in our non-collateralized retail loan portfolio. Further, the economic slowdown and the impact of global and Indian economic conditions on equity and debt markets also led to an increase in the volume of restructured corporate loans, and the failure of these borrowers to perform as per the restructured terms would lead to their classification as non-performing loans. See also “—If we are not able to control the level of non-performing assets in our portfolio, our business will suffer”.

Indian banks were required by a Reserve Bank of India policy to increase their total provisioning coverage ratio, including floating provisions and prudential/technical write-offs, to 70% by September 30, 2010. ICICI Bank was permitted by the Reserve Bank of India to achieve the stipulated level of provisioning coverage of 70% in a phased manner by March 31, 2011 and complied with the provisioning coverage requirement within this stipulated period. In April 2011, the Reserve Bank of India stipulated that banks would be required to maintain their provisioning coverage ratios with reference to their gross non-performing assets position at September 30, 2010 and not on an ongoing basis. In its annual policy statement for fiscal 2012, the Reserve Bank of India increased the specific provisioning requirements on sub-standard and doubtful assets by 5%-10% of the gross outstanding from their existing levels. In addition, the Reserve Bank of India increased the general provisioning requirements on restructured standard assets. In March 2012, with the objective of limiting the volatility in loan loss provisioning requirements witnessed during an economic cycle, the Reserve Bank of India released a discussion paper on the dynamic loan loss provisioning framework. The framework proposes to replace existing general provisioning norms, and recommends that banks make provisions on their loan books every year based on the historical loss experience in various categories of loans. In years where the specific provision is higher than the computed dynamic provision requirement, the existing dynamic provision balance can be drawn down to the extent of the difference, subject to a minimum specified level of dynamic provision balance being retained. The combination of any mandated increase in provisions, regulators’ assessment of our provisions, any change in the definition of non-performing assets by the regulator and any further deterioration or increase in our non-performing asset portfolio could lead to an adverse impact on our business, our future financial performance and the price of our equity shares and ADSs.

We have seen a significant increase in our branch network over the last few years and any inability to use these branches productively or substantial delays in achieving desired levels of productivity may have an adverse impact on our growth and profitability and the price of our equity shares and ADSs.

Our branch network has increased from 1,419 branches at year-end fiscal 2009 to 2,752 branches at year-end fiscal 2012. See also “—We may seek opportunities for growth through acquisitions or be required to undertake mergers by the Reserve Bank of India and could face integration and other acquisition risks”. Our new branches typically operate at lower efficiency levels, compared to our existing branches, and although we intend to increase their efficiency over time, any inability to use these branches productively, or substantial delays in achieving desired levels of productivity, would have an adverse impact on our growth and profitability and the price of our equity shares and ADSs.

We are subject to capital adequacy requirements as stipulated by the Reserve Bank of India and any inability to maintain adequate capital due to changes in regulations, a lack of access to capital markets, or otherwise may impact our ability to grow and support our businesses.

Banks in India are required by the Reserve Bank of India to maintain a minimum capital adequacy ratio of 9.0% and a minimum Tier-1 ratio of 6.0% of their risk weighted assets. See also “Supervision and Regulation—Capital Adequacy

Requirements". ICICI Bank had a capital adequacy ratio of 18.5% with a Tier-1 ratio of 12.7% at year-end fiscal 2012. The Reserve Bank of India has issued guidelines on the implementation of the Basel III framework in India. These guidelines require, among other things, higher levels of Tier 1 capital and common equity, capital conservation buffers, higher deductions from common equity and Tier 1 capital for investments in subsidiaries and changes in the structure of non-equity instruments eligible for inclusion in Tier 1 capital. The guidelines are to be

fully implemented by March 2018, with the implementation commencing from January 2013. The Reserve Bank of India may require additional capital to be held by banks as a systemic buffer. Globally, capital regulations continue to evolve, including with respect to additional capital requirements for domestic systemically important banks. In addition, banks in India may migrate to advanced approaches under Basel II in the medium term, with the approval of the Reserve Bank of India. These evolving regulations may impact the amount of capital that we are required to hold. Our ability to grow our business and execute our strategy is dependent on our level of capitalization and we typically raise resources from the capital markets to meet our capital requirements.

In February 2012, the Reserve Bank of India released draft guidelines on liquidity risk management and the Basel III framework on liquidity standards. The Reserve Bank of India has proposed the monitoring and reporting of liquidity coverage ratio, designed to ensure that a bank maintains an adequate level of liquid assets to survive an acute liquidity stress scenario lasting one month. It has also proposed a net stable funding ratio designed to ensure a minimum amount of funding that is expected to be stable over a one-year time horizon.

Any reduction in our capital adequacy ratio or an increase in our liquidity requirements, on account of regulatory changes or otherwise and any inability to access capital markets may limit our ability to grow our business and our future performance and strategy.

Our risk profile is linked to the Indian economy and the banking and financial markets in India which are still evolving.

Our credit risk may be higher than the credit risk of banks in some developed economies. Unlike several developed economies, a nation-wide credit bureau has been operational in India only since 2001. This may affect the quality of information available to us about the credit history of our borrowers, especially individuals and small businesses. In addition, the credit risk of our borrowers, particularly small and middle market companies, is higher than borrowers in more developed economies due to the evolving Indian regulatory, political, economic and industrial environment. The directed lending norms of the Reserve Bank of India require us to lend a certain proportion of our loans to “priority sectors”, including agriculture and small enterprises, where we are less able to control the portfolio quality and where economic difficulties are likely to affect our borrowers more severely. Any shortfall may be required to be allocated to investments yielding sub-market returns. See also “—We are subject to the directed lending requirements of the Reserve Bank of India, and any shortfall in achieving these requirements may be required to be invested in government schemes that yield low returns, thereby impacting our profitability. We may also experience a higher level of non-performing assets in our directed lending portfolio, which could adversely impact the quality of our loan portfolio, our business and the price of our equity shares and ADSs” and “Business—Loan Portfolio—Directed Lending”. Also, several of our corporate borrowers in the past suffered from low profitability because of increased competition from economic liberalization, a sharp decline in commodity prices, a high debt burden and high interest rates in the Indian economy at the time of their financing, and other factors. An economic slowdown and a general decline in business activity in India could impose further stress on these borrowers’ financial soundness and profitability and thus expose us to increased credit risk. This may lead to an increase in the level of our non-performing assets and there could be an adverse impact on our business, our future financial performance, our stockholders’ equity and the price of our equity shares and ADSs.

In addition to credit risks, we also face additional risks as compared with banks in developed economies. We pursue our banking, insurance and other activities in India in a developing economy with all of the risks that come with such an economy. Our activities in India are spread across a large and diverse terrain and involve employees, contractors, counterparties and customers with widely varying levels of education, financial sophistication and wealth. Although we seek to implement policies and procedures to reduce and manage marketplace risks as well as risks within our own organization, some risks remain inherent in doing business in a large, developing country. We cannot eliminate these marketplace and operational risks, which may lead to legal or regulatory actions, negative publicity or other

developments that could reduce our profitability. In the aftermath of the financial crisis, regulatory scrutiny of these risks is increasing.

The enhanced supervisory and compliance environment in the financial sector increases the risk of regulatory action, whether formal or informal. Following the financial crisis, regulators are increasingly viewing us, as well as other financial institutions, as presenting a higher risk profile than in the past.

We are subject to a wide variety of banking, insurance and financial services laws, regulations and regulatory policies and a large number of regulatory and enforcement authorities in each of the jurisdictions in which we operate. Since the global financial crisis, regulators in India and in the other jurisdictions in which we operate have intensified their review and scrutiny of many financial institutions, including us. In the aftermath of the financial crisis, regulators are increasingly viewing us, as well as other financial institutions, as presenting a higher risk profile than in the past, in a range of areas. This increased review and scrutiny increases the possibility that we will face adverse legal or regulatory actions. The Reserve Bank of India and other regulators regularly review our operations, and there can be no guarantee that any regulator will agree with our internal assessments of asset quality, provisions, risk management, capital adequacy and management functioning, other measures of the safety and soundness of our operations or compliance with applicable laws, regulations or regulatory policies. Regulators may find that we are not in compliance with applicable laws, regulations or regulatory policies, or with the regulators' revised interpretations of such laws, regulations or regulatory policies, and may take formal or informal actions against us. Such formal or informal actions might force us to make additional provision for our non-performing assets, divest our assets, adopt new compliance programs or policies, remove personnel, reduce dividend or executive compensation or undertake other changes to our business operations. Any of these changes, if required, could reduce our profitability by restricting our operations, imposing new costs or harming our reputation. See also “—The regulatory environment for financial institutions is facing unprecedented change in the post-financial crisis environment” and “Supervision and Regulation”.

Our banking subsidiaries in the United Kingdom and Canada have in the past focused primarily on leveraging their deposit franchises in these markets to extend financing to Indian companies for their operations in India and globally, including the financing of overseas acquisitions by Indian companies through structured transactions. In view of regulatory limitations on cross-border financing of this nature, these subsidiaries have experienced a reduction in business volumes, impacting their profitability.

In addition to oversight by the Reserve Bank of India, our insurance subsidiaries are also subject to extensive regulation and supervision by India's insurance regulators. The Insurance Regulatory and Development Authority has the authority to modify and interpret regulations regarding the insurance industry, including regulations governing products, selling commissions, solvency margins and reserving, which can lead to additional costs or restrictions on our insurance subsidiaries' activities. Similarly, our asset management subsidiary is subject to supervision and regulation by the Securities and Exchange Board of India.

Failure to comply with applicable regulations in various jurisdictions, including unauthorized actions by employees, representatives, agents and third parties, suspected or perceived failures and media reports, and ensuing inquiries or investigations by regulatory and enforcement authorities, has resulted, and may result in the future, in regulatory actions, including financial penalties and restrictions on or suspension of the related business operations.

In addition, a failure to comply with the applicable regulations in various jurisdictions by our employees, representatives, agents and third-party service providers either in or outside the course of their services, or suspected or perceived failures by them, may result in inquiries or investigations by regulatory and enforcement authorities and in regulatory or enforcement action against either us, or such employees, representatives, agents and third-party service providers. Such actions may impact our reputation, result in adverse media reports, lead to increased or enhanced regulatory or supervisory concerns, cause us to incur additional costs, penalties, claims and expenses or impact adversely our ability to conduct business.

If we fail to manage our legal and regulatory risk in the many jurisdictions in which we operate, our business could suffer, our reputation could be harmed and we would be subject to additional legal and regulatory risks. This could, in turn, increase the size and number of claims and damages asserted against us and or subject us to regulatory investigations, enforcement actions or other proceedings, or lead to increased supervisory concerns. We may also be required to spend additional time and resources on remedial measures, which could have an adverse effect on our business.

Despite our best efforts to comply with all applicable regulations, there are a number of risks that cannot be completely controlled. Our international expansion has led to increased legal and regulatory risks. Regulators in every jurisdiction in which we operate or have listed our securities have the power to bring administrative or judicial proceedings against us (or our employees, representatives, agents and third-party service providers), which could result, among other things, in suspension or revocation of one or more of our licenses, cease and desist orders, fines, civil penalties, criminal penalties or other disciplinary action which could materially harm our reputation, results of operations and financial condition.

We cannot predict the timing or form of any current or future regulatory or law enforcement initiatives, which are increasingly common for international banks and financial institutions, but we would expect to cooperate with any such regulatory investigation or proceeding.

The value of our collateral may decrease or we may experience delays in enforcing our collateral when borrowers default on their obligations to us which may result in failure to recover the expected value of collateral security exposing us to a potential loss.

A substantial portion of our loans to corporate and retail customers is secured by collateral. See also “Business—Classification of Loans—Non-Performing Asset Strategy”. Changes in asset prices may cause the value of our collateral to decline, and we may not be able to realize the full value of our collateral as a result of delays in bankruptcy and foreclosure proceedings, delays in the creation of security interests, defects or deficiencies in the perfection of collateral (including due to inability to obtain approvals that may be required from various persons, agencies or authorities), fraudulent transfers by borrowers and other factors, including depreciation in the value of the collateral and illiquid market for disposal of and volatility in the market prices for the collateral, current legislative provisions or changes thereto and past or future judicial pronouncements.

In India, foreclosure on collateral consisting of property can be undertaken directly by lenders by fulfilling certain procedures and requirements (unless challenged in courts of law) or otherwise by a written petition to an Indian court or tribunal. An application, when made (or a legal challenge to the foreclosure undertaken directly), may be subject to delays or administrative requirements that may result in, or be accompanied by, a decrease in the value of collateral. These delays can last for several years and might lead to deterioration in the physical condition or market value of the collateral. In the event a corporate borrower is in financial difficulty and unable to sustain itself, it may opt for the process of voluntary winding up. If a company becomes a “sick unit” (as defined under Indian law, which provides for a unit to be so categorized based on the extent of its accumulated losses relative to its stockholders’ equity), foreclosure and enforceability of collateral is stayed.

In addition, for collateral we hold in jurisdictions outside India, the applicable laws and regulations in such jurisdictions may impact our ability to foreclose on collateral and realize its value. Failure to recover the expected value of collateral could expose us to potential losses, which could adversely affect our future financial performance, our stockholders’ equity and the price of our equity shares and ADSs.

We have a high concentration of loans to certain customers, borrower groups and sectors and if a substantial portion of these loans become non-performing, the overall quality of our loan portfolio, our business and the price of our equity shares and ADSs could be adversely affected.

Our loan portfolio and non-performing asset portfolio have a high concentration in certain types of customers. ICICI Bank’s policy is to limit its loan exposure to any particular industry (other than retail loans) to 15.0% of its total exposure. Our loans and advances to the retail finance segment constituted 37.7% of our gross loans and advances at year-end fiscal 2012. Our loans and advances to (i) the non-finance service sector, (ii) roads, port, telecom, urban development and other infrastructure projects,(excluding power) (iii) finance and (iv) power constituted, 7.8%, 6.6%,

5.2% and 5.1% respectively of our gross loans and advances at year-end fiscal 2012. At year-end fiscal 2012, our largest non-bank borrower accounted for approximately 12.2% of our capital funds. The largest group of companies under the same management control accounted for approximately 30.3% of our capital funds. See also “Business—Loan Portfolio—Loan Concentration”.

We depend on the accuracy and completeness of information about customers and counterparties.

In deciding whether to extend credit or enter into other transactions with customers and counterparties, we may rely on information furnished to us by or on behalf of customers and counterparties, including financial statements and other financial information. We may also rely on certain representations as to the accuracy and completeness of that information and, with respect to financial statements, on reports of independent auditors. For example, in deciding whether to extend credit, we may assume that a customer's audited financial statements conform to generally accepted accounting principles and present fairly, in all material respects, the financial condition, results of operations and cash flows of the customer. Our financial condition and results of operations could be negatively affected by relying on financial statements that do not comply with generally accepted accounting principles or other information that is materially misleading. In addition, unlike several developed economies, a nationwide credit bureau has only recently become operational in India. This may affect the quality of information available to us about the credit history of our borrowers, especially individuals and small businesses. As a result, our ability to effectively manage our credit risk may be adversely affected.

Commission, exchange and brokerage income and profit on foreign exchange transactions have become important elements of our profitability and regulatory changes and market conditions could cause these income streams to decline and adversely impact our financial performance.

We earn commission, exchange and brokerage income from a variety of activities, including loan processing, syndication and advisory services for corporate clients with respect to their acquisition and project financing, distribution of retail investment and insurance products, transaction banking and retail credit products. Our commission, exchange and brokerage income is therefore impacted by the level of corporate activity including new financing proposals, the demand for retail financial products and the overall level of economic and trade activity. We also earn commission from the distribution of mutual fund and insurance products. Our commission, exchange and brokerage income is also impacted by applicable regulations governing various products and segments of financial services and changes in these regulations may adversely impact our ability to grow in this area. Similarly, the profit on foreign exchange transactions is dependent on foreign exchange market conditions and the risk management strategies of corporate clients. Volatile market conditions may also have an adverse impact on mergers and acquisitions activity by Indian companies, affecting our fee and other incomes related to such activity. In fiscal 2012, we witnessed a moderation in growth in our commission, exchange and brokerage income relative to fiscal 2011, primarily due to the decline in corporate investment activity and new financing proposals. The continuation of such factors could cause these income streams to decline in the future and adversely impact our financial performance.

We experienced rapid international growth in earlier years which has increased the complexity of the risks that we face.

Beginning in fiscal 2004, we began a rapid international expansion, opening banking subsidiaries in the United Kingdom, Canada and Russia and branches and representative offices in several countries. This rapid international expansion into banking in multiple jurisdictions exposes us to a variety of regulatory and business challenges and risks, including cross-cultural risk and has increased the complexity of our risks in a number of areas including price risks, currency risks, interest rate risks, compliance risk, regulatory and reputational risk and operational risk. In the aftermath of the financial crisis and in light of enhanced regulations in many countries, we expect to face additional scrutiny in all of these areas and in the management of our international operations. We also face risks arising from our ability to manage inconsistent legal and regulatory requirements in the multiple jurisdictions in which we operate.

Our international banking subsidiaries and overseas branches are subject to regulations imposed by their respective overseas regulators, including regulations on capital and liquidity, country exposure and type of business. In March 2010, the United States enacted the Foreign Account Tax Compliance Act requiring foreign financial institutions to

provide information about financial accounts held by U.S. taxpayers or by foreign entities in which U.S. taxpayers hold substantial ownership interest. While the rules implementing the Foreign Account Tax Compliance Act have not yet been issued, it is expected that such implementation would require foreign financial institutions to develop system capabilities and processes to effect such identification and reporting. Developing these capabilities is likely to be a

complex process and any failure to meet the requirements of the Foreign Account Tax Compliance Act on this account or otherwise may result in legal and regulatory actions against us. The loan portfolio of our international branches and subsidiaries includes foreign currency loans to Indian companies for their Indian operations (as permitted by regulation) as well as for their overseas ventures, including cross-border acquisitions. This exposes us to specific additional risks including the failure of the acquired entities to perform as expected, and our inexperience in various aspects of the economic and legal framework in overseas markets. Regulatory changes globally and in specific markets, including increased regulatory oversight following the global financial crisis, may impact our ability to execute our strategy and deliver returns on capital invested in our international subsidiaries. Our banking subsidiaries in the United Kingdom and Canada have in the past focused primarily on leveraging their deposit franchises in these markets to extend financing to Indian companies for their operations in India and globally, including the financing of overseas acquisitions by Indian companies through structured transactions. In view of the position taken by these subsidiaries' respective regulators in connection with cross border risk and exposure concentration, these subsidiaries have experienced a reduction in business volumes, impacting their profitability. See also "—The enhanced supervisory and compliance environment in the financial sector increases the risk of regulatory action, whether formal or informal. Following the financial crisis, regulators are increasingly viewing us, as well as other financial institutions, as presenting a higher risk profile than in the past." and "—The regulatory environment for financial institutions is facing unprecedented change in the post-financial crisis environment". Our overseas branches and banking subsidiaries have made investments in bonds, certificates of deposits, mortgage backed securities, treasury bills, credit derivatives and asset backed commercial paper. The global financial and economic crisis resulted in mark-to-market and realized losses on our overseas and other subsidiaries' investment and derivative portfolios, increased the regulatory scrutiny of our international operations, constrained our international debt capital market borrowings and increased our cost of funding. If we are unable to manage these risks, our business would be adversely affected.

Our funding is primarily short-term and if depositors do not roll over deposited funds upon maturity, our business could be adversely affected.

Most of our incremental funding requirements are met through short-term funding sources, primarily in the form of deposits including deposits from corporate customers and inter-bank deposits. Our customer deposits generally have a maturity of less than one year. However, a large portion of our assets have medium-or long-term maturities, creating the potential for funding mismatches. In addition, we have seen significant growth in project financing in recent years, where the assets would typically be of longer-term maturities, relative to our funding profile. Our ability to raise fresh deposits and grow our deposit base depends in part on our ability to expand our network of branches, which requires the approval of the Reserve Bank of India. While we have recently significantly expanded our branch network pursuant to the Reserve Bank of India's authorizations for establishing new branches, there can be no assurance that these authorizations or future authorizations granted by the Reserve Bank of India will meet our requirements for branch expansion to achieve the desired growth in our deposit base. During September — October 2008, following the disclosure of our exposure to Lehman Brothers and other U.S. and European financial institutions, rumors were circulated about our financial position which resulted in concerns being expressed by depositors and higher than normal transaction levels on a few days. The deregulation of savings account interest rates in October 2011 may also increase the volatility of this component of our funding. High volumes of deposit withdrawals or failure of a substantial number of our depositors to roll over deposited funds upon maturity or to replace deposited funds with fresh deposits as well as our inability to grow our deposit base, would have an adverse effect on our liquidity position, our business, our future financial performance, our stockholders' equity and the price of our equity shares and ADSs.

Furthermore, a part of our loan and investment portfolio, consisting primarily of the loan and investment portfolios of our international branches and subsidiaries is denominated in foreign currencies, including the U.S. dollar. Our international branches are primarily funded by debt capital market issuances and syndicated/bilateral loans, while our international subsidiaries generally raise deposits in their local markets. Volatility in the international debt markets may constrain our international capital market borrowings. There can be no assurance that our international branches

and subsidiaries will be able to obtain funding from the international debt markets or other sources in a timely manner on terms acceptable to them or at all. This may adversely impact our ability to replace maturing borrowings and fund new assets. In addition, borrowers who have taken foreign currency loans from us may face challenges in meeting their repayment obligations on account of market conditions and currency

movements. See also “—Risks Relating to India and Other Economic and Market Risks—Financial instability in other countries, particularly emerging market countries and countries where we have established operations, could adversely affect our business and the price of our equity shares and ADSs”, “—Risks Relating to India and Other Economic and Market Risks—Financial difficulty and other problems in certain financial institutions in India could adversely affect our business and the price of our equity shares and ADSs” and “—We experienced rapid international growth in earlier years which has increased the complexity of the risks that we face”.

The regulatory environment for financial institutions is facing unprecedented change in the post-financial crisis environment.

The global financial crisis has led to significant and unprecedented changes in the laws, regulations and regulatory policies of India and the other jurisdictions in which we operate. Changes in laws, regulations or regulatory policies, including changes in the interpretation or application of such laws, regulations and regulatory policies, may adversely affect the products and services we offer, the value of our assets or the collateral available for our loans or our business in general. Recent regulatory changes as well as changes currently under discussion, such as changes with respect to capital requirements, leverage and liquidity ratios under Basel III; restrictions on cross-border capital flows; enhanced emphasis on local lending obligations in overseas jurisdictions; changes in directed lending regulations in India; and discussions on management compensation, consumer protection and risk management, among other areas, are expected to have an impact on our business and our future strategy. These changes could require us to reduce or increase our business in specific segments, impact our overall growth and impact our return on capital. For instance, our wholly-owned banking subsidiaries in the United Kingdom and Canada have significantly reduced their business volumes in response to the regulatory environment, which has impacted their growth and profitability.

Changes in laws, regulations and regulatory policies, or the interpretation or application thereof, have and we expect will continue to lead to enhanced regulatory oversight and scrutiny and increased compliance costs. In the aftermath of the financial crisis, regulators are increasingly viewing us, as well as other financial institutions, as presenting a higher risk profile than in the past. This increased scrutiny increases the possibility that we will face adverse legal or regulatory actions. The Reserve Bank of India and other regulators regularly review our operations, and there can be no guarantee that any regulator will agree with our internal assessments of asset quality, provisions, risk management, capital adequacy, management functioning or other measures of the safety and soundness of our operations. In addition, regulators may find that we are not in compliance with applicable laws, regulations or regulatory policies, or with the regulators’ revised interpretations of such laws, regulations or regulatory policies, and may take formal or informal actions against us. Our ability to predict future legal or regulatory changes is limited and we may face enhanced legal or regulatory burdens without advance notice. Any such changes may result in increased expenses, operational restrictions or revisions to our business operations, which may reduce our profitability or force us to forego potentially profitable business opportunities. See also “—The enhanced supervisory and compliance environment in the financial sector increases the risk of regulatory action, whether formal or informal. Following the financial crisis, regulators are increasingly viewing us, as well as other financial institutions, as presenting a higher risk profile than in the past.”

Our inability to effectively manage credit, market and liquidity risk and inaccuracy of our valuation models and accounting estimates may have an adverse effect on our earnings, capitalization, credit ratings and cost of funds.

Our risk management strategies may not be effective because in a difficult or less liquid market environment other market participants may be attempting to use the same or similar strategies to deal with the difficult market conditions. In such circumstances, it may be difficult for us to reduce our risk positions due to the activity of such other market participants. Our derivatives businesses may expose us to unexpected market, credit and operational risks that could cause us to suffer unexpected losses or enhanced regulatory scrutiny. Severe declines in asset values, unanticipated credit events, or unforeseen circumstances that may cause previously uncorrelated factors to become correlated may

create losses resulting from risks not appropriately taken into account in the development, structuring or pricing of a derivative instrument. In addition, many derivative transactions are not cleared and settled through a central clearing house or exchange, and they may not always be confirmed or settled by counterparties on a timely basis. In these situations, we are subject to heightened credit and operational risk, and in the event of a default, we

may find the contract more difficult to enforce. Further, as new and more complex derivative products are created, disputes regarding the terms or the settlement procedures of the contracts could arise, which could force us to incur unexpected costs, including transaction and legal costs, and impair our ability to manage effectively our risk exposure to these products. Many of our hedging strategies and other risk management techniques have a basis in historic market behavior, and all such strategies and techniques are based to some degree on management's subjective judgment. To the extent any of the instruments and strategies we use to hedge or otherwise manage our exposure to market or credit risk are not effective, we may not be able to mitigate effectively our risk exposures in particular market environments or against particular types of risk. Our balance sheet growth is dependent upon economic conditions, as well as upon our ability to securitize, sell, purchase or syndicate particular loans or loan portfolios. Our trading revenues and interest rate risk are dependent upon our ability to properly identify, and mark-to-market, changes in the value of financial instruments caused by changes in market prices or rates. Our earnings are dependent upon the effectiveness of our management of migrations in credit quality and risk concentrations, the accuracy of our valuation models and our critical accounting estimates and the adequacy of our allowances for loan losses.

To the extent our assessments, assumptions or estimates prove inaccurate or not predictive of actual results, we could suffer higher than anticipated losses and enhanced regulatory scrutiny. See also “—Further deterioration of our non-performing asset portfolio combined with recent Reserve Bank of India requirements that all Indian banks increase their provisioning coverage as a percentage of gross non-performing assets could adversely affect our business”. The successful management of credit, market and operational risk is an important consideration in managing our liquidity risk because it affects the evaluation of our credit ratings by rating agencies. Rating agencies may reduce or indicate their intention to reduce the ratings at any time. See also “Risks Relating to India and Other Economic and Market Risks—Any downgrading of India's debt rating by an international rating agency could adversely affect our business, our liquidity and the price of our equity shares and ADSs”. The rating agencies can also decide to withdraw their ratings altogether, which may have the same effect as a reduction in our ratings. Any reduction in our ratings (or withdrawal of ratings) may increase our borrowing costs, limit our access to capital markets and adversely affect our ability to sell or market our products, engage in business transactions particularly longer-term, and derivatives transactions, or retain our customers. Conditions in the international and Indian debt markets may adversely impact our access to financing and liquidity. This, in turn, could reduce our liquidity and negatively impact our operating results and financial condition. For more information relating to our ratings, see also “Business—Risk Management—Quantitative and Qualitative Disclosures about Market Risk—Liquidity Risk”.

Negative publicity could damage our reputation and adversely impact our business and financial results and the prices of our equity shares and ADSs.

Reputation risk, or the risk to our business, earnings and capital from negative publicity, is inherent in our business. The reputation of the financial services industry in general has been closely monitored as a result of the financial crisis and other matters affecting the financial services industry. Negative public opinion about the financial services industry generally or us specifically could adversely affect our ability to keep and attract customers, and expose us to litigation and regulatory action. Negative publicity can result from our actual or alleged conduct in any number of activities, including lending practices and specific credit exposures, corporate governance, regulatory compliance, mergers and acquisitions, and related disclosure, sharing or inadequate protection of customer information, and actions taken by government, regulators and community organizations in response to that conduct. Although we take steps to minimize reputation risk in dealing with customers and other constituencies, we, as a large financial services organization with a high industry profile, are inherently exposed to this risk.

We may seek opportunities for growth through acquisitions or be required to undertake mergers by the Reserve Bank of India and could face integration and other acquisition risks.

We may seek opportunities for growth through acquisitions or be required to undertake mergers mandated by the Reserve Bank of India under its statutory powers. In the past, the Reserve Bank of India has ordered mergers of weak banks with other banks primarily in the interest of depositors of the weak banks. While we do not currently expect to expand our international business, other than continuing to focus on our deposit franchise in select geographies and seeking India-linked business opportunities, we may in the future examine and seek opportunities for acquisitions in countries where we currently operate and in other countries.

The Bank of Rajasthan, a private sector bank, merged with us effective from the close of business on August 12, 2010. This acquisition and any future acquisitions or mergers, both Indian or international, may involve a number of risks, including the possibility of a deterioration of asset quality, financial impact of employee related liabilities, diversion of our management's attention required to integrate the acquired business and the failure to retain key acquired personnel and clients, leverage synergies or rationalize operations, or develop the skills required for new businesses and markets, or unknown and known liabilities including any ongoing litigation, claims or disputes concerning such acquisition, merger, its shareholders, share capital or its legal and regulatory compliance obligations or practices, some or all of which could have an adverse effect on our business.

We and our customers are exposed to fluctuations in foreign exchange rates.

Several of our borrowers enter into derivative contracts to manage their foreign exchange risk exposures. Volatility in exchange rates may result in increased mark-to-market losses in derivative transactions for our clients.

Upon the maturity or premature termination of the derivative contracts, these mark-to-market losses become receivables owed to us.

In fiscal 2012, following the volatility in the global capital markets and the economic slowdown in India, the rupee depreciated sharply against the US dollar. The failure of our borrowers to manage their exposures to foreign exchange, derivative risk, adverse movements and volatility in foreign exchange rates may adversely affect our borrowers and consequently the quality of our exposure to our borrowers and our business volumes and profitability. An increase in non-performing assets on account of our borrowers' inability to manage exchange rate risk may have an adverse impact on our profitability, our business and the price of our equity shares and ADSs.

Entry into new businesses or expansions of existing businesses may expose us to increased risks that may adversely affect our business.

We experienced rapid growth in our retail loan portfolio between fiscal 2002 and fiscal 2007. See also "Business—Loan Portfolio". In addition, we undertook a rural initiative designed to introduce our products and services into many rural areas. The rapid growth of our retail loan business and the rural initiative exposed us to increased risks within India including higher levels of non-performing loans in our unsecured retail credit portfolio, increased operational risk, increased fraud risk and increased regulatory and legal risk. For example, during fiscal 2007, we made a provision of Rs. 0.9 billion for losses from frauds pertaining to the warehouse receipt-based financing product for agricultural credit. See also "—Our risk profile is linked to the Indian economy and the banking and financial markets in India which are still evolving".

During fiscal 2011 and fiscal 2012, we have seen a significant increase in our project finance loans to the power sector. We cannot be sure that these projects will begin operations as scheduled or perform as anticipated. Any delays in operations or the inability of these projects to perform in accordance with our expectations may have an adverse impact on our asset quality and profitability. See also "—Our loan portfolio includes long-term project finance loans, which are particularly vulnerable to completion and other risks".

Our business is very competitive and our strategy depends on our ability to compete effectively.

Within the Indian market, we face intense competition from other commercial banks, investment banks, insurance companies and non-bank finance companies. Some Indian public and private sector banks have recently experienced higher growth, achieved better profitability and increased their market shares relative to us. Recent changes in the Indian banking sector include deregulation of interest rates on savings bank deposits, following which some smaller banks have significantly increased interest rates paid on savings deposits to compete with larger banks including us, and removal of penalties payable by borrowers for floating rate home loans, which may lead to a higher proportion of higher yielding loans being prepaid as borrowers seek to refinance their existing loans. Further liberalization of the Indian financial sector could lead to a greater presence or new entries of Indian and foreign banks offering a wider range of products and services, which could adversely impact our competitive environment. In August 2011, the Reserve Bank of India issued draft guidelines for public comment on the entry of new banks in the private sector including proposals on the eligibility criteria, structure, capital requirements, shareholding structure and corporate governance practices. During fiscal 2011, the Reserve Bank of India also issued a discussion paper on the presence of foreign banks in India envisioning, among other things, subsidiarization and near equivalent treatment to national banks, including more liberal branch licensing, for foreign banks operating in India. The Indian financial sector may also experience further consolidation, resulting in fewer banks and financial institutions, some of which may have greater resources than us. See also "Business—Competition" and "Overview of the Indian Financial Sector—Commercial Banks—Foreign Banks". Due to competitive pressures, we may be unable to successfully execute our growth strategy and offer products and services at reasonable returns and this may adversely impact our business.

In our international operations we also face intense competition from the full range of competitors in the financial services industry, both banks and non-banks and both Indian and foreign banks. We remain a small to mid-size player in the international markets and many of our competitors have resources much greater than our own.

Changes in the regulation and structure of the financial markets in India may adversely impact our business.

The Indian financial markets have in recent years experienced, and continue to experience, changes and developments aimed at reducing the cost and improving the quality of service delivery to users of financial services. In 2005, the Reserve Bank of India introduced the Real Time Gross Settlement System, an inter-bank settlement system which facilitates real time settlements primarily between banks. We may experience an adverse impact on the cash float and fees from our cash management business resulting from the development and increased usage of such payment systems, as well as other similar structural changes. Recent examples of some other structural changes in banking transactions in India include free access for a customer of any bank to ATMs of all other banks with restrictions on the amount and number of transactions. Further, the Reserve Bank of India, from time to time also imposes limits on transaction charges levied by banks on customers, including on cash and card transactions, and has recently directed banks to remove foreclosure charges on home loans. Such developments may adversely impact the profitability of banks, including us, by reducing float balances and fee incomes, and increasing costs. See also “—The regulatory environment for financial institutions is facing unprecedented change in the post-financial crisis environment”.

The additional capital required by our insurance subsidiaries may adversely impact our business and the price of our equity shares and ADSs.

While our life insurance business recorded accounting profits in fiscal 2011 and fiscal 2012 and the growth of our life insurance subsidiary has moderated, additional capital may be required to support the insurance business. In accordance with the Insurance Regulatory and Development Authority’s order dated March 12, 2011, all general insurance companies in India, including our general insurance subsidiary, are required to provide for losses on the third party motor pool (a multilateral arrangement for insurance in respect of third party claims against commercial vehicles, the results of which are shared by all general insurance companies in proportion to their overall market share) at a provisional rate of 153.0% for the fiscal 2008 to fiscal 2011 period, compared to the earlier loss rate of 122%-127%. Since the losses are allocated to general insurance companies based on their overall market shares, the profitability and solvency ratio of our general insurance subsidiary were adversely impacted. Accordingly, we injected Rs. 2.5 billion of capital into our general insurance subsidiary during the quarter ended March 31, 2011. In fiscal 2012, the Insurance Regulatory and Development Authority ordered the dismantling of the motor pool and advised that motor pool liabilities be recognized as per the loss rates estimated by the General Actuaries Department of the United Kingdom, for all underwriting years from fiscal 2008 to fiscal 2012. The guidelines also provided an option to recognize the losses over a three year period. Our general insurance subsidiary recognized the additional liabilities of the motor pool in fiscal 2012 and the impact of the additional pool losses amounted to Rs. 6.9 billion.

Our ability to invest additional capital in these businesses is subject to the Reserve Bank of India’s regulations on capital adequacy and its para-banking guidelines that prescribe limits for our aggregate investment in financial sector enterprises. All such investments require prior approval of the Reserve Bank of India. See also “—Loss reserves for our general insurance business are based on estimates as to future claims liabilities and adverse developments relating to claims could lead to further reserve additions and materially adversely affect the operation of our general insurance subsidiary”, “Business—Insurance” and “Supervision and Regulation—Reserve Bank of India Regulation—Holding Companies”. The capital requirements of our insurance subsidiaries and restrictions on our ability to capitalize them could adversely impact their growth, our future capital adequacy, our financial performance and the price of our equity shares and ADSs.

While our insurance businesses are becoming an increasingly important part of our business, there can be no assurance of their future rates of growth or level of profitability.

Our life insurance and general insurance joint ventures are becoming an increasingly important part of our business. See also “Business—Overview of Our Products and Services—Insurance”. These businesses have seen sharp moderation in

growth since fiscal 2009. There can be no assurance of their future rates of growth. Our life insurance business primarily comprises unit-linked life insurance and pension products. Reduction in capital market valuations and volatility in capital markets have had an adverse impact on the demand for these products. Our life insurance subsidiary has been impacted by the substantial changes in regulations specified by the Insurance Regulatory and Development Authority regarding unit-linked products that became effective September 1, 2010.

The changes include a cap on surrender charges, a cap on charges applicable from the sixth year of policy, an increase in minimum premium paying term and the introduction of minimum guaranteed returns on pension products. The growth of our general insurance business has been adversely impacted by the deregulation of pricing on certain products, which has resulted in a reduction in premiums for those products. Further, our general insurance subsidiary has also been adversely impacted by mandated higher losses on the third party motor insurance pool, which resulted in a loss of Rs. 0.8 billion in fiscal 2011 and a loss of Rs. 4.16 billion in fiscal 2012 for the subsidiary. See also “—The additional capital required by our insurance subsidiaries may adversely impact our business and the price of our equity shares and ADSs” and “Supervision and Regulation—Regulations Governing Insurance Companies”. A slowdown in the Indian economy, further regulatory changes or customer dissatisfaction with our insurance products could adversely impact the future growth of these businesses. See also “—The regulatory environment for financial institutions is facing unprecedented change in the post-financial crisis environment”. Any slowdown in these businesses and in particular in the life insurance business could have an adverse impact on our business and the price of our equity shares and ADSs.

Actuarial experience and other factors could differ from assumptions made in the calculation of life actuarial reserves.

The assumptions our life insurance subsidiary makes in assessing its life insurance reserves may differ from what it experiences in the future. Our life insurance subsidiary derives its life insurance reserves using “best estimate” actuarial policies and assumptions. These assumptions include the assessment of the long-term development of interest rates, investment returns, the allocation of investments between equity, fixed income and other categories, mortality and morbidity rates, policyholder lapses, policy discontinuation and future expense levels. Our life insurance subsidiary monitors its actual experience of these assumptions and to the extent that it considers that this experience will continue in the longer term, it refines its long-term assumptions. Changes in any such assumptions may lead to changes in the estimates of life and health insurance reserves.

Loss reserves for our general insurance business are based on estimates as to future claims liabilities and adverse developments relating to claims could lead to further reserve additions and materially adversely affect the operation of our general insurance subsidiary.

In accordance with the general insurance industry practice and accounting and regulatory requirements, our general insurance subsidiary establishes reserves for loss and loss adjustment expenses related to its general insurance business. Reserves are based on estimates of future payments that will be made in respect of claims, including expenses relating to such claims. Such estimates are made on both a case-by-case basis, based on the facts and circumstances available at the time the reserves are established, as well as in respect of losses that have been incurred but not reported. These reserves represent the estimated ultimate cost necessary to bring all pending claims to final settlement.

Reserves are subject to change due to a number of variables which affect the ultimate cost of claims, such as changes in the legal environment, results of litigation, costs of repairs and other factors such as inflation and exchange rates and our general insurance subsidiary’s reserves for environmental and other latent claims are particularly subject to such variables. The results of operations of our general insurance subsidiary depend significantly upon the extent to which its actual claims experience is consistent with the assumptions it uses in setting the prices for products and establishing the liabilities for obligations for technical provisions and claims. To the extent that its actual claims experience is less favorable than the underlying assumptions used in establishing such liabilities, it may be required to increase its reserves, which may materially adversely affect its results of operations.

Established loss reserves estimates are periodically adjusted in the ordinary course of settlement, using the most current information available to management, and any adjustments resulting from changes in reserve estimates are reflected in current results of operations. Our general insurance subsidiary also conducts reviews of various lines of business to consider the adequacy of reserve levels. Based on current information available and on the basis of internal

procedures, the management of our general insurance subsidiary considers that these reserves are adequate. However, because the establishment of reserves for loss and loss adjustment expenses is an inherently uncertain process, there can be no assurance that ultimate losses will not materially exceed the established reserves for loss

and loss adjustment expenses and have a material adverse effect on the results of operations of our general insurance subsidiary.

In accordance with the Insurance Regulatory and Development Authority's order dated March 12, 2011, all general insurance companies in India, including our insurance subsidiary, are required to provide for losses on the third party motor pool (a multilateral arrangement for insurance with respect to third party claims against commercial vehicles, the results of which are shared by all general insurance companies in proportion to their overall market share) at a provisional rate of 153.0% over fiscal 2008 to fiscal 2011 compared to the earlier loss rate of 122%-127%. Since the losses are allocated to general insurance companies based on their overall market shares, the profitability and solvency ratio of our general insurance subsidiary were adversely impacted. We injected Rs. 2.5 billion of capital in our general insurance subsidiary during the quarter ended March 31, 2011. Further, in fiscal 2012, the Insurance Regulatory and Development Authority ordered the dismantling of the motor pool and advised that the Pool liabilities be recognized as per the loss rates estimated by the General Actuaries Department of the United Kingdom, for all underwriting years commencing from fiscal 2008 to fiscal 2012. The guidelines also provided an option to recognize the losses over a three year period. Our general insurance subsidiary has recognized the additional liabilities of the Pool in fiscal 2012. The net loss of our general insurance subsidiary in fiscal 2012 includes the impact of the additional motor pool losses amounting to Rs. 6.90 billion.

The financial results of our general insurance business could be materially adversely affected by the occurrence of catastrophe.

Portions of our general insurance subsidiary's business may cover losses from unpredictable events such as hurricanes, windstorms, monsoons, earthquakes, fires, industrial explosions, floods, riots and other man-made or natural disasters, including acts of terrorism. The incidence and severity of these catastrophes in any given period are inherently unpredictable.

Although the subsidiary monitors its overall exposure to catastrophes and other unpredictable events in each geographic region and determines its underwriting limits related to insurance coverage for losses from catastrophic events, the subsidiary generally seeks to reduce its exposure through the purchase of reinsurance, selective underwriting practices and by monitoring risk accumulation. Claims relating to catastrophes may result in unusually high levels of losses and may require additional capital to maintain solvency margins and could have a material adverse effect on our financial position or results of operations.

There is operational risk associated with the financial industry which, when realized, may have an adverse impact on our business.

We, like all financial institutions, are exposed to many types of operational risk, including the risk of fraud or other misconduct by employees or outsiders, unauthorized transactions by employees and third parties (including violation of regulations for prevention of corrupt practices, and other regulations governing our business activities), misreporting or non-reporting with respect to statutory, legal or regulatory reporting and disclosure obligations, or operational errors, including clerical or record keeping and reconciliation errors or errors resulting from faulty computer or telecommunications systems. We have experienced significant growth in a fast changing environment, and management, as well as our regulators, are aware that this may pose significant challenges to our control framework. As a result of our internal evaluations, we and our regulators have noted certain areas where our processes and controls could be improved. Our growth, particularly in retail lending, our rural initiative, our international business and our insurance businesses exposes us to additional operational and control risks. Regulatory scrutiny of areas related to operational risk, including internal audit information, systems and data processing is increasing. The large size of our treasury and retail operations, which use automated control and recording systems as well as manual checks and record keeping, exposes us to the risk of errors in control, record keeping and reconciliation. The

increasing size of our insurance business and the complexities of the products expose us to the risk that the models set up on actuarial software to compute the actuarial liabilities and deferred acquisition cost may contain errors or may require continuous improvement over a period of time. We also outsource some functions, like collections, to other agencies. Given our high volume of transactions, certain errors may be repeated or compounded before they are discovered and successfully rectified. In addition, our dependence upon automated systems to record and process transactions may further increase the risk that technical system flaws

or employee tampering or manipulation of those systems will result in losses that are difficult to detect. We may also be subject to disruptions of our operating systems, arising from events that are wholly or partially beyond our control (including, for example, computer viruses or electrical or telecommunication outages), which may give rise to deterioration in customer service and to loss or liability to us. We are further exposed to the risk that external vendors may be unable to fulfill their contractual obligations to us (or will be subject to the same risk of fraud or operational errors by their respective employees as we are), and to the risk that our (or our vendors') business continuity and data security systems prove not to be sufficiently adequate. We also face the risk that the design of our controls and procedures prove inadequate, or are circumvented, thereby causing delays in detection or errors in information. Although we maintain a system of controls designed to keep operational risk at appropriate levels, like all banks and insurance companies we have suffered losses from operational risk and there can be no assurance that we will not suffer losses from operational risks in the future that may be material in amount, and our reputation could be adversely affected by the occurrence of any such events involving our employees, customers or third parties. There are inherent limitations to the effectiveness of any system especially of controls and procedures, including the possibility of human error, circumvention or overriding of the controls and procedures, in a fast changing environment or when entering new areas of business or expanding geographic reach. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. We are committed to continuing to implement and improve internal controls and our risk management processes, and this remains a key priority for us. If, however, we are unable to manage operational risk in India and in the other jurisdictions in which we operate, or if we are perceived as being unable to manage such risk, we may be subject to enhanced regulatory oversight and scrutiny. For a discussion of how operational risk is managed, see also "Business—Risk Management—Operational Risk".

Fraud and significant security breaches in our computer system and network infrastructure could adversely impact our business.

Our business operations are based on a high volume of transactions. Although we take adequate measures to safeguard against system-related and other fraud, there can be no assurance that we would be able to prevent fraud. Our reputation could be adversely affected by fraud committed by employees, customers or outsiders, or by our perceived inability to properly manage fraud-related risks. Our inability or perceived inability to manage these risks could lead to enhanced regulatory oversight and scrutiny. Our rural initiative, our international growth and our expansion to new product lines such as insurance may create additional challenges with respect to managing the risk of frauds due to the increased geographical dispersion and use of intermediaries. See also "Operating and Financial Review and Prospects—Provisions for Non-performing Assets and Restructured Loans" and "Business—Risk Management—Operational Risk". Physical or electronic break-ins, security breaches, other disruptive problems caused by our increased use of the internet or power disruptions could also affect the security of information stored in and transmitted through our computer systems and network infrastructure. Cyber threats, such as phishing and trojans, could intrude into our network to steal data or to seek sensitive information, which could cause damage to our reputation and adversely impact our business and financial results. Although we have implemented security technology and operational procedures to prevent such occurrences, there can be no assurance that these security measures will be successful. A significant failure in security measures could have a material adverse effect on our business, our future financial performance, our stockholders' equity and the price of our equity shares and ADSs.

System failures could adversely impact our business.

Given the large share of retail products and services and transaction banking services in our total business, the importance of systems technology to our business has increased significantly. We have also launched delivery of banking services through mobile telephones. Our principal delivery channels include ATMs, call centers and the Internet. While we have procedures to monitor for and prevent system failures, and to recover from system failures in the event they occur, there is no guarantee that these procedures will successfully prevent a system failure or allow us to recover quickly from a system failure. Any failure in our systems, particularly for retail products and services and

transaction banking, could significantly affect our operations and the quality of our customer service and could result in enhanced regulatory scrutiny and business and financial losses that would adversely affect the price of our equity shares and ADSs. Regulatory scrutiny in this area is increasing. See also “—The enhanced supervisory and compliance environment in the financial sector increases the risk of regulatory action, whether formal or informal. Following the financial crisis, regulators are increasingly viewing us, as well as other financial institutions, as presenting a higher risk profile than in the past.”

A determination against us in respect of disputed tax assessments may adversely impact our financial performance.

We have been assessed by the government of India's tax authorities, and have included in contingent liabilities, Rs. 31.6 billion in additional taxes in excess of our provisions at year-end fiscal 2012. These additional tax demands mainly relate to issues disputed by us, such as the disallowance of depreciation on leased assets, expenditure incurred towards exempt income, withdrawal of a special reserve, indirect tax matters and appeals filed by the tax authorities against decisions in our favor. The Rs. 31.6 billion included in our contingent liabilities does not include further disputed tax assessments amounting to Rs. 22.2 billion relating to bad debts written off and penalties levied, which has been considered remote based on favorable Apex Court decisions in other similar cases. See also "Business—Legal and Regulatory Proceedings". We have appealed all of these demands. While we expect that no additional liability will arise out of these disputed demands based on our consultations with tax counsel and favorable decisions in our own and other cases, there can be no assurance that these matters will be settled in our favor or that no further liability will arise out of these demands. Any additional tax liability may adversely impact our financial performance and the price of our equity shares and ADSs.

We are involved in various litigations. Any final judgment awarding material damages against us could have a material adverse impact on our future financial performance, our stockholders' equity and the price of our equity shares and ADSs.

We and our group companies, or our or their directors or officers, are often involved in litigations (including civil or criminal) in India and in the other jurisdictions in which we operate for a variety of reasons, which generally arise because we seek to recover our dues from borrowers or because customers seek claims against us. The majority of these cases arise in the normal course of business and we believe, based on the facts of the cases and consultation with counsel, that these cases generally do not involve the risk of a material adverse impact on our financial performance or stockholders' equity. We estimate the probability of losses that may be incurred in connection with legal and regulatory proceedings as of the date on which our consolidated financial statements are prepared. We recognize a provision when we have a present obligation as a result of a past event, it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate of the amount of the obligation can be made. We determine the amount of provision based on our estimate of the amount required to settle the obligation at the balance sheet date, supplemented by our experience in similar situations. We review provisions at each balance sheet date and adjust them to reflect current estimates. In cases where the available information indicates that a loss is reasonably possible but the amount of such loss cannot be reasonably estimated, we make a disclosure to this effect in the consolidated financial statements. In certain instances, present and former employees have instituted legal and other proceedings against us alleging irregularities. When there is only a remote risk of loss, we do not recognize a provision nor do we include a disclosure in the consolidated financial statements. See also "Business—Legal and Regulatory Proceedings". We cannot guarantee that the judgments in any of the litigation in which we are involved would be favorable to us and if our assessment of the risk changes, our view on provisions will also change.

Any inability to attract and retain talented professionals may adversely impact our business.

Our business is growing more complex with both product line expansion into the insurance area and geographic expansion internationally and via the rural initiatives. Our continued success depends in part on the continued service of key members of our management team and our ability to continue to attract, train, motivate and retain highly qualified professionals is a key element of our strategy and we believe it to be a significant source of competitive advantage. The successful implementation of our strategy depends on the availability of skilled management, both at our head office and at each of our business units and international locations and on our ability to attract and train young professionals. A substantial portion of our compensation structure for middle and senior management is in the form of employee stock options, and dependent on the market price of our equity shares. Depending on market and business conditions, we may decide to reduce our employee strength in certain of our businesses. The combination of

these factors could adversely affect our ability to hire and retain qualified employees. If we or one of our business units or other functions fail to staff operations appropriately, or lose one or more key senior executives or qualified young professionals and fail to replace them in a satisfactory and timely manner, our business, financial condition and results of operations, including our control and operational risks, may

be adversely affected. Likewise, if we fail to attract and appropriately train, motivate and retain young professionals or other talent, our business may likewise be affected. See also “Business—Employees”.

Adoption of a different basis of accounting or new accounting standards may result in changes in our reported financial position and results of operations for future and prior periods.

The financial statements and other financial information included in this annual report are based on our consolidated financial statements under Indian GAAP. It is expected that Indian accounting standards will converge with International Financial Reporting Standards and we may be required to prepare financial statements under International Financial Reporting Standards, as adopted in India, according to a schedule to be determined by regulators for Indian companies in the future. However, the ongoing project undertaken by International Accounting Standards Board, which will replace the current International Financial Reporting Standards on financial instruments, particularly IAS 39, in a phased manner, may impact the schedule for the adoption of International Financial Reporting Standards by Indian companies. We may issue financial statements under International Financial Reporting Standards prior to the schedule that may be announced by Indian regulators, for compliance with regulations in certain jurisdictions where we have operations or where our securities are listed. Financial statements prepared under standards different from Indian GAAP, as presently in existence, may diverge significantly from the financial statements and other financial information included in this annual report

Risks Relating to ADSs and Equity Shares

You will not be able to vote your ADSs and your ability to withdraw equity shares from the depository facility is uncertain and may be subject to delays.

Our ADS holders have no voting rights unlike holders of our equity shares who have voting rights. For certain information regarding the voting rights of the equity shares underlying our ADSs, see also “Business—Shareholding Structure and Relationship with the Government of India”. If you wish, you may withdraw the equity shares underlying your ADSs and seek to exercise your voting rights under the equity shares you obtain from the withdrawal. However, for foreign investors, this withdrawal process may be subject to delays and is subject to a cap of 49.0% in the total shares foreign institutional investors and non-resident Indians may hold in us. For a discussion of the legal restrictions triggered by a withdrawal of the equity shares from the depository facility upon surrender of ADSs, see also “Restriction on Foreign Ownership of Indian Securities”.

Your holdings may be diluted by additional issuances of equity and any dilution may adversely affect the market price of our equity shares and ADSs.

In fiscal 2008, we concluded a capital raising exercise comprising a public offering in India and an ADS offering aggregating Rs. 199.7 billion. We may conduct additional equity offerings to fund the growth of our business, including our international operations, our insurance business or our other subsidiaries. In addition, up to 5.0% of our issued equity shares from time to time, may be granted in accordance with our Employee Stock Option Scheme. Any future issuance of equity shares or ADSs or exercise of employee stock options would dilute the positions of investors in equity shares and ADSs and could adversely affect the market price of our equity shares and ADSs.

You may be unable to exercise preemptive rights available to other shareholders.

A company incorporated in India must offer its holders of equity shares preemptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless these rights have been waived by at least 75.0% of the company’s shareholders present and voting at a shareholders’ general meeting. United States investors in ADSs may be unable to exercise these preemptive rights

for equity shares underlying ADSs unless a registration statement under the Securities Act of 1933, as amended (the “Securities Act”) is effective with respect to such rights or an exemption from the registration requirements of the Securities Act is available. Our decision to file a registration statement will depend on the costs and potential liabilities associated with any such registration as well as the perceived benefits of enabling investors in ADSs to exercise their preemptive rights and any other factors we consider appropriate at such time. To the extent

that investors in ADSs are unable to exercise preemptive rights, their proportional ownership interests in us would be reduced.

Your ability to sell in India any equity shares withdrawn from the depositary facility, the conversion of rupee proceeds from such sale into a foreign currency and the repatriation of such foreign currency may be subject to delays if specific approval of the Reserve Bank of India is required.

ADS holders seeking to sell in India any equity shares withdrawn upon surrender of ADSs, convert the rupee proceeds from such sale into a foreign currency or repatriate such foreign currency may need the Reserve Bank of India's approval for each such transaction. See also "Restriction on Foreign Ownership of Indian Securities". We cannot guarantee that any such approval will be obtained in a timely manner or at terms favorable to the investor. Because of possible delays in obtaining the requisite approvals, investors in equity shares may be prevented from realizing gains during periods of price increases or limiting losses during periods of price declines.

Restrictions on deposit of equity shares in the depositary facility could adversely affect the price of our ADSs.

Under current Indian regulations, an ADS holder who surrenders ADSs and withdraws equity shares may deposit those equity shares again in the depositary facility in exchange for ADSs. An investor who has purchased equity shares in the Indian market may also deposit those equity shares in the ADS program. However, the deposit of equity shares may be subject to securities law restrictions and the restriction that the cumulative aggregate number of equity shares that can be deposited as of any time cannot exceed the cumulative aggregate number represented by ADSs converted into underlying equity shares as of such time. These restrictions increase the risk that the market price of our ADSs will be below that of the equity shares.

Certain shareholders own a large percentage of our equity shares and their actions could adversely affect the price of our equity shares and ADSs.

The Life Insurance Corporation of India, the General Insurance Corporation of India and other government-owned general insurance companies, all of which are directly controlled by the Indian government, are among our principal shareholders. At July 6, 2012, the Life Insurance Corporation of India held 9.3% and the General Insurance Corporation of India and other government-owned general insurance companies held 2.2% of our outstanding equity shares. See also "Business—Shareholding Structure and Relationship with the Government of India". Any substantial sale of our equity shares by these or other large shareholders could adversely affect the price of our equity shares and ADSs. Under the Indian Banking Regulation Act, no person holding shares in a banking company can exercise more than 10.0% of the total voting power. Deutsche Bank Trust Company Americas held approximately 27.4% of our equity shares at July 6, 2012 as depositary for ADS holders and votes on these shares in accordance with the directions of our board of directors. Pursuant to the provisions of the Indian Banking Regulation Act, Deutsche Bank Trust Company Americas can only vote 10.0% of our equity shares. After taking into consideration the restriction of 10.0%, the effective outstanding voting rights at July 6, 2012 for Deutsche Bank Trust Company Americas were 10.0%, for the Life Insurance Corporation of India were 9.3% and for the General Insurance Corporation of India and other government-owned general insurance companies were 2.2%.

Conditions in the Indian securities market may adversely affect the price or liquidity of our equity shares and ADSs.

The Indian securities markets are smaller and more volatile than securities markets in developed economies. In the past, the Indian stock exchanges have experienced high volatility and other problems that have affected the market price and liquidity of the listed securities, including temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In April 2003, the decline in the price of the equity shares of a leading Indian software company created volatility in the Indian stock markets and created temporary concerns regarding our exposure to the

equity markets. On May 17, 2004, the Bombay Stock Exchange Sensex fell by 565 points from 5,070 to 4,505, creating temporary concerns regarding our exposure to the equity markets. Both the BSE and the NSE halted trading on the exchanges on May 17, 2004 in view of the sharp fall in prices of securities. The Indian securities markets experienced rapid appreciation during fiscal 2006 but underwent a sharp correction in May 2006. The markets experienced a recovery thereafter and the BSE Sensex reached an all time high of 20,873 on January 8, 2008 but

subsequently experienced a sharp correction, with the BSE Sensex declining to 8,160 on March 9, 2009. In the 24 months since then, the equity markets had recovered with the BSE Sensex at 19,445 at March 31, 2011. However, the European debt crisis, volatile crude oil prices and concerns on growth in India have caused a decline in the domestic equity markets with the BSE Sensex at 17,404 at March 30, 2012. In recent years, there have been changes in laws and regulations regulating the taxation of dividend income, which have impacted the Indian equity capital markets. See also “Dividends”. Similar problems or changes in the future could adversely affect the market price and liquidity of our equity shares and ADSs.

Settlement of trades of equity shares on Indian stock exchanges may be subject to delays.

The equity shares represented by ADSs are currently listed on the BSE and the NSE. Settlement on those stock exchanges may be subject to delays and an investor in equity shares withdrawn from the depository facility upon surrender of ADSs may not be able to settle trades on such stock exchanges in a timely manner. See also “—Conditions in the Indian securities market may adversely affect the price or liquidity of our equity shares and ADSs”.

Changes in Indian regulations on foreign ownership, a change in investor preferences or an increase in the number of ADSs outstanding could adversely affect the price of our equity shares and ADSs.

ADSs issued by companies in certain emerging markets, including India, may trade at a discount or a premium to the underlying equity shares, in part because of the restrictions on foreign ownership of the underlying equity shares. See also “Restriction on Foreign Ownership of Indian Securities”. Historically, our ADSs have generally traded at a small premium to the trading price of our underlying equity shares on the Indian stock exchanges. See also “Market Price Information”. We believe that this price premium resulted from the limited portion of our market capitalization represented by ADSs, restrictions imposed by Indian law on the conversion of equity shares into ADSs and an apparent preference among some investors to trade dollar-denominated securities. In fiscal 2006 and fiscal 2008, we conducted offerings of ADSs which increased the number of outstanding ADSs and we may conduct similar offerings in the future. Also, over time, some of the restrictions on the issuance of ADSs imposed by Indian law have been relaxed. As a result, any premium enjoyed by ADSs as compared to the equity shares may be reduced or eliminated as a result of offerings made or sponsored by us, changes in Indian law permitting further conversion of equity shares into ADSs or a change in investor preferences.

Because the equity shares underlying ADSs are quoted in rupees in India, you may be subject to potential losses arising out of exchange rate risk on the Indian rupee.

Investors who purchase ADSs are required to pay for ADSs in U.S. dollars and are subject to currency fluctuation risk and convertibility risks since the equity shares underlying ADSs are quoted in rupees on the Indian stock exchanges on which they are listed. Dividends on the equity shares will also be paid in rupees and then converted into U.S. dollars for distribution to ADS investors. Investors who seek to convert the rupee proceeds of a sale of equity shares withdrawn upon surrender of ADSs into foreign currency and repatriate the foreign currency may need to obtain the approval of the Reserve Bank of India for each such transaction. See also “—Your ability to sell in India any equity shares withdrawn from the depository facility, the conversion of rupee proceeds from such sale into a foreign currency and the repatriation of such foreign currency may be subject to delays if specific approval of the Reserve Bank of India is required” and “Exchange Rates”.

You may be subject to Indian taxes arising out of capital gains.

Generally, capital gains, whether short-term or long-term, arising on the sale of the underlying equity shares in India are subject to Indian capital gains tax. Investors are advised to consult their own tax advisers and to carefully consider the potential tax consequences of an investment in ADSs. See also “Taxation—Indian Tax”.

There may be less company information available in Indian securities markets than in securities markets in the United States.

There is a difference between India and the United States in the level of regulation and monitoring of the securities markets and the activities of investors, brokers and other market participants. The Securities and Exchange Board of India is responsible for improving disclosure and regulating insider trading and other matters for the Indian securities markets. There may, however, be less publicly available information about Indian companies than is regularly made available by public companies in the United States.

BUSINESS

Overview

We are a diversified financial services group offering a wide range of banking and financial services to corporate and retail customers through a variety of delivery channels. We are the largest private sector bank in India and the second largest bank in India, in terms of total assets as of year-end fiscal 2012. Apart from banking products and services, we offer life and general insurance, asset management, securities brokering and private equity products and services through our specialized subsidiaries. Our total assets at year-end fiscal 2012 were Rs. 6,041.9 billion. Our consolidated capital and reserves at year-end fiscal 2012 was Rs. 612.8 billion. During fiscal 2012, we earned a net profit of Rs. 76.4 billion compared to Rs. 60.9 billion during fiscal 2011.

Our primary business consists of commercial banking operations for corporate and retail customers. We provide a range of commercial banking and project finance products and services, including loan products, fee and commission-based products and services, deposit products and foreign exchange and derivatives products to India's leading corporations, middle market companies and small and medium enterprises. Our commercial banking operations for retail customers consist of retail lending and deposit taking and distribution of third party investment products. We deliver our products and services through a variety of channels, including bank branches, ATMs, call centers, the internet and mobile phones. We had a network of 2,752 branches and 9,006 ATMs in India at March 31, 2012. We also offer agricultural and rural banking products.

In our international banking operations, our primary focus is on offering products and services to persons of Indian origin and Indian businesses as well as offering deposit products to the larger community. Our overseas branches and banking subsidiaries take deposits, raise borrowings and make loans primarily to Indian companies for their overseas operations as well as for their foreign currency requirements in India. They also engage in advisory and syndication activities for fund-raising by Indian companies and their overseas operations. We currently have subsidiaries in the United Kingdom, Canada and Russia, branches in Bahrain, Dubai International Financial Center, Hong Kong, Singapore, Sri Lanka, Qatar Financial Centre and the United States and representative offices in Bangladesh, China, Indonesia, Malaysia, South Africa, Thailand and the United Arab Emirates. Our subsidiary in the United Kingdom has established a branch in Antwerp, Belgium and a branch in Frankfurt, Germany. Our subsidiaries in the United Kingdom and Canada and our branches in Bahrain, Singapore and Hong Kong have the largest share of our international assets and liabilities.

Our treasury operations include the maintenance and management of regulatory reserves, proprietary trading in equity and fixed income and a range of foreign exchange and derivatives products and services for corporate customers, such as forward contracts and interest rate and currency swaps. We take advantage of movements in markets to earn treasury income. Our overseas branches and subsidiaries also have investments in credit derivatives, bonds of non-India financial institutions and asset backed securities.

We are also engaged in insurance, asset management, securities business and private equity fund management through specialized subsidiaries. Our subsidiaries ICICI Prudential Life Insurance Company, ICICI Lombard General Insurance Company and ICICI Prudential Asset Management Company provide a wide range of life and general insurance and asset management products and services to retail and corporate customers. ICICI Prudential Life Insurance Company was the largest private sector life insurance company in India during fiscal 2012, with a market share of 5.9% based on new business written (on retail weighted received premium basis). ICICI Prudential Pension Funds Management Company Limited, a 100% subsidiary of ICICI Prudential Life Insurance Company, manages the pension assets of Indian citizens (other than the mandated pension funds of government employees) under the National Pension System. This pension scheme was launched by the Indian government in 2004 for all citizens on a voluntary basis, and has allowed professional fund managers to invest the scheme's funds since 2008. ICICI Lombard

General Insurance Company was the largest private sector general insurance company in India

during fiscal 2012, with a market share of 9.4% in gross written premium (excluding premium on the motor third party insurance pool). ICICI Prudential Asset Management Company manages the ICICI Prudential Mutual Fund Limited, which was among the top three mutual funds in India in terms of average funds under management during fiscal 2012. We cross-sell the products of our insurance and asset management subsidiaries and of other asset management companies to our retail and corporate customers. Our subsidiaries ICICI Securities Limited and ICICI Securities Primary Dealership Limited are engaged in equity underwriting and brokerage and primary dealership in government securities respectively. ICICI Securities owns icicidirect.com, a leading online brokerage platform. ICICI Securities Limited has a subsidiary in the United States, ICICI Securities Holdings Inc. that in turn has an operating subsidiary in the United States, ICICI Securities Inc., which is engaged in brokerage services. Our private equity fund management subsidiary, ICICI Venture Funds Management Company, manages funds that make private equity investments.

Our legal name is ICICI Bank Limited but we are known commercially as ICICI Bank. We were incorporated on January 5, 1994 under the laws of India as a limited liability corporation. The duration of ICICI Bank is unlimited. Our principal corporate office is located at ICICI Bank Towers, Bandra-Kurla Complex, Mumbai 400 051, India, our telephone number is +91 22 2653 1414 and our web site address is www.icicibank.com. None of the contents of our and our subsidiaries' websites are incorporated in this annual report. Our agent for service of process in the United States is Mr. G.V.S. Ramesh, Joint General Manager, ICICI Bank Limited, New York Branch, 500 Fifth Avenue, Suite 2830, New York, New York 10110.

History

ICICI was formed in 1955 at the initiative of the World Bank, the government of India and Indian industry representatives. The principal objective was to create a development financial institution for providing medium-term and long-term project financing to Indian businesses. Until the late 1980s, ICICI primarily focused its activities on project finance, providing long-term funds to a variety of industrial projects. With the liberalization of the financial sector in India in the 1990s, ICICI transformed its business from a development financial institution offering only project finance to a diversified financial services provider that, along with its subsidiaries and other group companies, offered a wide variety of products and services. As India's economy became more market-oriented and integrated with the world economy, ICICI capitalized on the new opportunities to provide a wider range of financial products and services to a broader spectrum of clients.

ICICI Bank was incorporated in 1994 as a part of the ICICI group. ICICI Bank's initial equity capital was contributed 75.0% by ICICI and 25.0% by SCICI Limited, a diversified finance and shipping finance lender of which ICICI owned 19.9% at December 1996. Pursuant to the merger of SCICI into ICICI, ICICI Bank became a wholly-owned subsidiary of ICICI. Effective March 10, 2001, ICICI Bank acquired Bank of Madura, a private sector bank, in an all-stock merger.

The issue of universal banking, which in the Indian context means conversion of long-term lending institutions such as ICICI into commercial banks, had been discussed at length in the late 1990s. Conversion into a bank offered ICICI the ability to accept low-cost demand deposits and offer a wider range of products and services, and greater opportunities for earning non-fund based income in the form of banking fees and commissions. ICICI Bank also considered various strategic alternatives in the context of the emerging competitive scenario in the Indian banking industry. ICICI Bank identified a large capital base and size and scale of operations as key success factors in the Indian banking industry. In view of the benefits of transformation into a bank and the Reserve Bank of India's pronouncements on universal banking, ICICI and ICICI Bank decided to merge.

At the time of the merger, both ICICI Bank and ICICI were publicly listed in India and on the New York Stock Exchange. The amalgamation was approved by each of the boards of directors of ICICI, ICICI Personal Financial

Services, ICICI Capital Services and ICICI Bank at their respective board meetings held on October 25, 2001. The amalgamation was approved by ICICI Bank's and ICICI's shareholders at their extraordinary general meetings held on January 25, 2002 and January 30, 2002, respectively. The amalgamation was approved by the High Court of Gujarat at Ahmedabad on March 7, 2002 and by the High Court of Judicature at Bombay on April 11, 2002. The amalgamation was approved by the Reserve Bank of India on April 26, 2002. The amalgamation became effective on May 3, 2002. The date of the amalgamation for accounting purposes under Indian GAAP was March 30, 2002.

The Sangli Bank Limited, an unlisted private sector bank, merged with ICICI Bank with effect from April 19, 2007. On the date of acquisition, the Sangli Bank had over 190 branches and extension counters, total assets of Rs. 17.6 billion, total deposits of Rs. 13.2 billion and total loans of Rs. 2.0 billion.

The Bank of Rajasthan, a listed Indian private sector bank, merged with ICICI Bank with effect from the close of business on August 12, 2010. At August 12, 2010, the Bank of Rajasthan had total assets of Rs. 156.0 billion, deposits of Rs. 134.8 billion, loans of Rs. 65.3 billion and investments of Rs. 71.0 billion. During fiscal 2010, it incurred a loss of Rs. 1.0 billion. The Bank of Rajasthan was also a sponsoring entity of a regional rural bank called the Mewar Anchalik Gramin Bank, with a holding of 35%. The Mewar Anchalik Gramin Bank had 58 branches with total deposits of Rs. 4.3 billion and total loans of Rs. 1.5 billion at year-end fiscal 2010. It made a profit of Rs. 21 million in fiscal 2010 but due to prior years losses had accumulated losses of Rs. 0.1 billion at year-end fiscal 2010.

Shareholding Structure and Relationship with the Government of India

The following table sets forth, at June 30, 2012, certain information regarding the ownership of our equity shares.

	Percentage of Total Equity Shares Outstanding	Number of Equity Shares Held
Government Controlled Shareholders:		
Life Insurance Corporation of India	9.3	% 107,085,699
General Insurance Corporation of India and government-owned general insurance companies	2.2	25,555,251
UTI and UTI Mutual Fund	1.2	13,833,591
Other government-controlled institutions, mutual funds, corporations and banks	0.2	2,527,370
Total government-controlled shareholders	12.9	149,001,911
Other Indian investors:		
Individual domestic investors(1)(2)	5.8	67,269,415
Mutual funds and banks (other than government-controlled mutual funds and banks)	8.5	97,373,199
Bajaj Allianz Life Insurance Company Ltd.	1.3	15,182,926
SBI Life Insurance	1.2	14,033,470
Bajaj Holdings and Investment Ltd	1.1	12,176,817

Total	100.0	1,152,874,294

(1) Executive officers and directors (including non-executive directors) as a group held about 0.08% of ICICI Bank's equity shares at June 30, 2012.

(2) No single shareholder in this group owned 5.0% or more of ICICI Bank's equity shares as of this date.

(3) A subsidiary of Temasek Holdings Private Limited, Singapore.

The holding of government-controlled shareholders was 12.9% at June 30, 2012 against 12.4% at June 30, 2011 and 14.2% at June 30, 2010. The holding of Life Insurance Corporation of India was 9.3% at June 30, 2012 against 9.2% at June 30, 2011, and 10.5% at June 30, 2010.

We operate as an autonomous and commercial enterprise and the Indian government has never directly held any of our shares. We are not aware of or a party to any shareholders' agreement or voting trust relating to the ownership of the shares held by the government-controlled shareholders. We do not have any agreement with our government-controlled shareholders regarding management control, voting rights, anti-dilution or any other matter. Our Articles of Association provide that the government of India is entitled, pursuant to the provisions of guarantee agreements between the government of India and ICICI, to appoint a representative to our Board. The government of India has appointed one representative to our Board. We have traditionally invited a representative of each of the government-controlled insurance companies that are among our principal institutional shareholders, Life Insurance Corporation of India and General Insurance Corporation of India to join our Board. There is currently no representative of either Life Insurance Corporation of India or General Insurance Corporation of India on our Board. See "Management—Directors and Executive Officers" for a discussion of the composition of our Board of Directors.

The holding of other Indian investors was 24.4% at June 30, 2012 against 22.1% at June 30, 2011 and 18.2% at June 30, 2010. The total holding of Indian investors was 37.3% at June 30, 2012 against 34.5% at June 30, 2011 and 32.4% at June 30, 2010. The holding of foreign investors was 62.7% at June 30, 2012 against 65.5% at June 30, 2011 and 67.6% at June 30, 2010. See "Supervision and Regulation—Reserve Bank of India Regulations—Ownership Restrictions". Deutsche Bank Trust Company Americas holds the equity shares represented by 158 million American Depositary Receipts outstanding as depository on behalf of the holders of the American Depositary Shares. The American Depositary Shares are listed on the New York Stock Exchange. Under the Indian Banking Regulation Act, no person holding shares in a banking company can exercise more than 10.0% of the total voting power. This means that Deutsche Bank Trust Company Americas (as depository), which held approximately 27.4% of our equity shares at June 30, 2012 against 26.1% at June 30, 2011 and 28.9% at June 30, 2010 could only vote 10.0% of our equity shares, in accordance with the directions of our Board of Directors. See "Overview of the Indian Financial Sector—Recent Structural Reforms—Proposed Amendments to the Banking Regulation Act". Except as stated above, no shareholder has differential voting rights.

Strategy

The key elements of our business strategy are to:

- focus on opportunities for sustainable profitable growth by:
 - enhancing our retail and corporate franchise
- maintaining the proportion of current and savings account and retail term deposits in our domestic deposit base;
 - building a rural banking franchise;
- strengthening our insurance, asset management and securities businesses;
- emphasize conservative risk management practices and enhance asset quality;

- use technology for competitive advantage; and
- attract and retain talented professionals.

Given the volatile economic environment in fiscal 2009, we focused on capital conservation, liquidity management and risk containment. We tightened our lending norms, especially in the unsecured retail segment and

moderated our credit growth. We expanded our branch network with a focus on increasing our low cost and retail deposit base. At the same time, we maintained a strict control on operating expenses.

In fiscal 2010, we focused on repositioning our balance sheet for the next phase of growth. We increased the proportion of current and savings account deposits; reduced the rate of growth of non-performing loans; continued to keep stringent control on operating expenses; and maintained a high level of capital adequacy, relative to the regulatory requirement. From fiscal 2011, we have focused on growing our loan book by capitalizing on selected credit segments such as mortgages, secured retail loans and project finance, mobilizing low cost current account and savings deposits, reducing credit costs, optimizing operating expenses and improving our customer service capabilities. We seek to adopt a balanced approach to growth, risk management and profitability.

Our objective going forward will be to leverage our capital base for profitable growth, while sustaining the improvements in our deposit profile, cost ratios and credit quality. As we grow our businesses, meeting customer expectation on service quality will be a critical element of our strategy.

Overview of Our Products and Services

We offer products and services in the commercial banking area to corporate and retail customers, both domestic and international. We also undertake treasury operations and offer treasury-related products and services to our customers. We are also engaged in insurance, asset management, securities business venture capital and private equity fund management through specialized subsidiaries.

Commercial Banking for Retail Customers

Our commercial banking operations for retail customers consist of retail lending and deposits, credit cards, depositary share accounts, distribution of third-party investment and insurance products, other fee-based products and services and the issuance of unsecured redeemable bonds.

Retail Lending Activities

Given India's favorable demographics and the under-penetration of retail credit, we identified retail credit as a key opportunity over a decade ago. We capitalized on the retail opportunity by offering home loans, automobile loans, commercial business loans (including primarily commercial vehicle loans), personal loans, credit cards, loans against time deposits and loans against securities. We also funded dealers who sell automobiles, consumer durables and commercial vehicles. Our retail portfolio was Rs. 1,259.9 billion, constituting 46.4% of gross loans at year-end fiscal 2009. Due to the increase in interest rates, the tightening of liquidity, the increase in asset prices and challenges in collections, we reduced our disbursements of retail loans, especially unsecured loans, from fiscal 2009 and, as a result, the retail portfolio declined to Rs. 976.5 billion, constituting 42.1% of gross loans at year-end fiscal 2010, and thereafter increased marginally to Rs. 996.1 billion, constituting 37.7% of gross loans at year-end fiscal 2011. The retail portfolio increased to Rs. 1,114.0 billion constituting 37.0% of gross loans at year-end fiscal 2012, driven by growth in secured retail lending categories like automobile loans, commercial vehicle loans and mortgage loans. We believe that retail credit has a robust long-term growth potential due to rising income levels and the expansion of the middle class. We will continue to focus on secured retail products such as home loans, automobile loans and the commercial vehicle loans. We will selectively offer unsecured products such as personal loans and credit cards to our customers.

Our retail asset products are generally fixed rate products repayable in equated monthly installments other than our floating rate home loan portfolio, where any change in the benchmark rate to which the rate of interest on the loan is referenced is passed on to the borrower on the first day of the succeeding quarter or succeeding month, as applicable.

Any decrease in the rate of interest payable on floating rate home loans is generally implemented by an acceleration of the repayment schedule, keeping the monthly installment amount unchanged. Any increase in the rate of interest payable on floating rate home loans is generally effected in the first instance by an extension of the repayment schedule, keeping the monthly installment amount unchanged, and based on certain criteria, by changing the monthly installment amount. See also “Risk Factors—Risks Relating to Our Business—Our banking and trading activities are particularly vulnerable to interest rate risk and volatility in interest rates could adversely affect our

net interest margin, the value of our fixed income portfolio, our income from treasury operations, the quality of our loan portfolio and our financial performance”.

The following table sets forth, at the dates indicated, the breakdown of our gross (net of write-offs) retail finance portfolio.

	2010	2011	At March 31,		2012	2012
			2012	(% share)		(US\$ in millions)
		(Rs. in billions)				
Home loans(1)	Rs. 619.8	Rs. 644.0	Rs. 733.5	65.9	% US\$	14,414
Automobile loans	85.2	85.8	94.7	8.5		1,861
Commercial business loans	136.8	152.9	180.7	16.2		3,551
Others(2)	15.0	15.1	20.5	1.8		402
Total secured retail finance portfolio	856.8	897.8	1,029.4	92.4	%	20,228
Personal loans	57.2	42.8	29.6	2.7		581
Credit card receivables	59.4	48.5	46.0	4.1		904
Others(3)	3.1	7.0	9.0	0.8		177
Total unsecured retail finance portfolio	119.7	98.3	84.6	7.6	%	1,662
Total retail finance portfolio	Rs. 976.5	Rs. 996.1	Rs. 1,114.0	100.0	% US\$	21,890

(1) Includes developer financing of Rs. 95.2 billion at year-end fiscal 2012, Rs. 90.9 billion at year-end fiscal 2011 and Rs. 40.7 billion at year-end fiscal 2010.

(2) Includes dealer financing of Rs. 7.5 billion at year-end fiscal 2012, Rs. 5.8 billion at year-end fiscal 2011 and Rs. 4.6 billion at year-end fiscal 2010.

(3) Represents dealer financing portfolio.

Our unsecured retail portfolio primarily includes personal loans and loans against credit card receivables. Until fiscal 2009, we also offered small value unsecured loans to low income urban customers. These loans are uncollateralized and the recovery process of any outstanding amounts due is typically conducted through direct visits or calls to the borrowers, and the recovery experience in such cases is generally inferior to that in the secured products. Following the increase in interest rates, tightening liquidity, challenging macroeconomic environment and changes in regulations pertaining to the use of recovery agents by banks, we witnessed higher than anticipated losses in the unsecured retail portfolio. In fiscal 2009, we discontinued our small value personal loans product, which was composed of unsecured loans to low income customers. We also reduced incremental lending in personal loans and credit card issuances, resulting in a decline in the overall unsecured retail lending portfolio. Our personal loans typically range from Rs. 100,000 to Rs. 1,000,000 in size with tenors of 1-4 years and yields ranging from 14-18%. During fiscal 2012, ICICI Bank's personal loans disbursements were about 2% of its total retail loan disbursements at Rs. 5.2 billion and its number of outstanding credit cards declined from approximately 3.4 million at year-end fiscal 2011 to about 2.8 million at year-end fiscal 2012. At year-end fiscal 2012, our personal loans portfolio was Rs. 29.6 billion compared to Rs. 42.8 billion at year-end fiscal 2011. The credit card receivables portfolio at year-end fiscal 2012 was Rs. 46.0 billion compared to Rs. 48.5 billion at year-end fiscal 2011. The proportion of unsecured retail loans in the total retail portfolio decreased from 12.3% at year-end fiscal 2010 to 9.9% at year-end fiscal 2011 and further to 7.6% at year-end fiscal 2012.

We offer retail lending products primarily in India through ICICI Bank and our wholly owned subsidiary, ICICI Home Finance Company Limited. Our home loan portfolio includes both loans for the purchase and construction of homes as well as loans against property. Our policies for such loans are based on certain stipulated ratios such as the loan-to-value ratio and the ratio of fixed debt obligations to a borrower's income. The initial repayment term of such loans is 15 to 20 years with payments in the form of equated monthly installments. We conduct a part of our housing loan business through ICICI Home Finance Company.

Our banking subsidiary in Canada offers residential mortgages in the local market. The mortgages are insured and primarily have federal-backed insurance. At year-end fiscal 2012, ICICI Bank Canada held residential mortgages amounting to CAD 1,675 million as compared to CAD 1,171 million at year-end fiscal 2011. This

includes mortgages of CAD 1,231 million at year-end fiscal 2012 and CAD 811 million at year-end fiscal 2011 securitized under the Canadian National Housing Act –Mortgage Backed Securities program. We also undertake retail lending activities to a very limited extent in certain of our other overseas branches and subsidiaries.

Lending to Small and Medium Enterprises

We have segmented offerings for the small and medium enterprise sector while adopting a cluster based financing approach to fund small enterprises that have a homogeneous profile such as engineering, information technology, transportation and logistics and pharmaceuticals. We also offer supply chain financing solutions to the channel partners of corporate clients and business loans (in the form of cash credit/overdraft/term loans) to meet the working capital needs of small businesses. We are also proactively reaching out to small and medium enterprises through various initiatives such as the small and medium enterprises toolkit — an online business and advisory resource for small and medium enterprises; and the “Emerging India Awards” — a small and medium enterprises recognition platform.

Retail Deposits

Our retail deposit products include time deposits and savings accounts deposits. We also offer targeted products to specific customer segments such as high net worth individuals, defense personnel, trusts and businessmen, and have corporate salary account products. We offer current account (i.e., checking accounts for businesses) products to our small enterprises customers, who maintain balances with us. Further, we offer an international debit card in association with VISA International. At year-end fiscal 2012, we had a debit card base in excess of 16 million cards.

We are currently placing enhanced emphasis on increasing our current and savings account deposit base and improving the proportion of current and savings accounts in our total deposits. Expansion of our branch network in India is a critical element of this strategy.

For a description of the Reserve Bank of India’s regulations applicable to deposits in India and required deposit insurance, see “Supervision and Regulation—Reserve Bank of India Regulations—Regulations Relating to Deposits” and “Supervision and Regulation—Deposit Insurance”. For more information on the type, cost and maturity profile of our deposits, see “—Funding”.

Fee-Based Products and Services

Through our distribution network, we offer government of India savings bonds, insurance policies from ICICI Prudential Life Insurance Company and ICICI Lombard General Insurance Company, bullion and public offerings of equity shares and debt securities by Indian companies. We offer several card-based products such as credit cards, debit cards, prepaid cards, travel cards and commercial cards. We also offer a variety of mutual fund products from ICICI Prudential Asset Management Company and other select mutual funds. We levy services charges on deposit accounts.

We also offer fee-based products and services including transaction banking services, documentary credits and guarantees to small and medium enterprises.

As a depository participant of the National Securities Depository Limited and Central Depository Services (India) Limited, we offer depository share accounts to settle securities transactions in a dematerialized mode. Further, we are one of the banks designated by the Reserve Bank of India for issuing approvals to non-resident Indians and overseas corporate bodies to trade in shares and convertible debentures on the Indian stock exchanges.

Commercial Banking for Corporate Customers

We provide a range of commercial and investment banking products and services to India's leading corporations and middle market companies. Our product suite includes working capital and term loan products, fee and commission-based products and services, deposits and foreign exchange and derivatives products. The Corporate Banking Group focuses on origination and coverage of all corporate clients. The Corporate Banking

Group comprises relationship and credit teams. The Commercial Banking Group is responsible for growing the trade services and transaction banking business through identified branches, while working closely with the corporate relationship teams. The Markets Group provides foreign exchange and other treasury products to corporations. The Project Finance Group focuses on origination of large project finance mandates. We seek to syndicate corporate and project financing among domestic and international banks and institutions.

Corporate Loan Portfolio

Our corporate loan portfolio consists of project and corporate finance (including structured finance and cross-border acquisition financing) and working capital financing. For further details on our loan portfolio, see “—Loan Portfolio—Loan Concentration”. For a description of our credit rating and approval system, see “—Risk Management—Credit Risk”.

Our project finance business consists principally of extending medium-term and long-term rupee and foreign currency loans to the manufacturing and infrastructure sectors. We also provide financing by way of investment in marketable instruments such as fixed rate and floating rate debentures. We generally have a security interest and first charge on the fixed assets of the borrower.

Our working capital financing consists mainly of cash credit facilities and non-fund based facilities including letters of credit and guarantees. For more details on our credit risk procedures, see “—Risk Management—Credit Risk”.

Fee and Commission-Based Activities

We generate fee income from our syndication, structured financing and project financing activities. We seek to leverage our project financing and structuring skills and our relationships with companies and financial institutions and banks to earn fee incomes from structuring and syndication.

We offer our corporate customers a wide variety of fee and commission-based products and services including documentary credits and standby letters of credit (called guarantees in India).

We also offer commercial banking services such as cash management services (such as collection, payment and remittance services), escrow, trust and retention account facilities, online payment facilities, custodial services and tax collection services on behalf of the government of India and the governments of Indian states. At year-end fiscal 2012, total assets held in custody on behalf of our clients (mainly foreign institutional investors, offshore funds, overseas corporate bodies and depository banks for GDR investors) were Rs. 1,450.2 billion. As a registered depository participant of National Securities Depository Limited and Central Depository Services (India) Limited, the two securities depositories operating in India, we also provide electronic depository facilities to investors.

Corporate Deposits

We offer a variety of deposit products to our corporate customers including current accounts, time deposits and certificates of deposits. For more information on the type, cost and maturity profile of our deposits, see “—Funding”.

Foreign Exchange and Derivatives

We provide customer specific products and services, which cater to risk hedging needs of corporations at domestic and international locations, arising out of currency and interest rate fluctuations. The products and services include:

Foreign Exchange Products

Products include cash, spot and forwards transactions. We offer customized hedging and trading solutions to clients, on the basis of their business needs. These products are offered in India and across our international locations covering a number of time zones.

Retail Foreign Exchange Products

Products for retail customers include sale of currency notes, traveler's checks and travel cards. These mainly cater to the segments of outbound tourism and education. We also facilitate retail inward remittances from foreign geographies.

Bullion

We deal in bullion and sell gold coins to retail customers.

Derivatives

We offer derivative products including interest rate swaps, currency swaps, options and currency futures. We provide market making in interest rate and currency derivatives in all G7 currencies.

Commercial Banking for Rural and Agricultural Customers

We believe that rural India is key to sustaining India's current growth momentum and our rural banking strategy seeks to match the growing demand for financial services in rural areas. The Reserve Bank of India's directed lending norms also require us to lend a portion of advances to the rural and agricultural sector. See also "—Loan Portfolio—Directed Lending". We provide corporate banking products and services to corporate clients engaged in agriculture-linked businesses. We finance suppliers and vendors of corporations and medium enterprises engaged in agriculture-linked businesses. We have also strengthened our relationships with co-operatives that are constituted by farmers. We offer financial solutions to farmers, commodity traders and processors and to micro-finance institutions. As per the Reserve Bank of India requirements, we have formulated a Board-approved financial inclusion plan to facilitate the opening of basic deposit accounts in rural and unbanked areas. Rural banking presents significant challenges in terms of geographical coverage and high unit transaction costs. See also "Risk Factors—Risks Relating to Our Business—Entry into new businesses or expansions of existing businesses may expose us to increased risks that may adversely affect our business".

Commercial Banking for International Customers

Our strategy for growth in international markets is based on leveraging home country links and technology for international expansion in selected international markets. Our international strategy is focused on building a retail deposit franchise in geographies where we have such licenses, meeting the foreign currency needs of our Indian corporate clients, taking select non-India trade finance exposures linked to imports to India, carrying out select local lending and achieving the status of the preferred non-resident Indian community bank in key markets. We also seek to build stable wholesale funding sources and strong syndication capabilities to support our corporate and investment banking business, and to expand private banking operations for India-centric asset classes.

We currently have subsidiaries in the United Kingdom, Canada and Russia, branches in Bahrain, Dubai International Finance Center, Hong Kong, Singapore, Sri Lanka, Qatar Financial Centre and the United States and representative offices in Bangladesh, China, Indonesia, Malaysia, South Africa, Thailand and the United Arab Emirates. Our subsidiary in the United Kingdom has established a branch in Antwerp, Belgium and a branch in Frankfurt, Germany.

Many of the commercial banking products that we offer through our overseas branches and subsidiaries, as well as to international customers from our domestic network, such as debt financing, trade finance and letters of credit, are similar to the products offered to our customers in India. Some of the products and services that are unique to international customers are:

- Remittance services: Remittances into India have increased from U.S.\$ 13.0 billion in fiscal 2001 to U.S.\$ 66.0 billion in fiscal 2012, with India being the largest remittance receiving country in the world. We recognized the remittance opportunity early on in the decade and started offering a host of remittance services tailored to meet the needs of diverse customer segments. We have a market share of over 21% of the migrant remittances into India. To facilitate easy transfer of funds to India, we offer a suite of online as well as offline

money transfer products. These products enable non-resident Indians to send money to any beneficiary in India with a wide choice of delivery channels like electronic transfers to accounts with over 80,000 bank branches.

- TradeWay: An Internet-based document collection product to provide correspondent banks access to real-time online information on the status of their export bills collections routed through us.
- Remittance Tracker: An Internet-based application that allows a correspondent bank to check on the status of its payment instructions and to get various information reports online.
- Offshore banking deposits: Multi-currency deposit products in U.S. dollar, pound sterling and euro.
- Foreign currency non-resident deposits: Foreign currency deposits offered in six main currencies — U.S. dollar, pound sterling, euro, yen, Canadian dollar and Australian dollar.
- Non-resident external fixed deposits: Deposits maintained in Indian rupees.
- Non-resident external savings account: Savings accounts maintained in Indian rupees.
- Non-resident ordinary savings accounts and non-resident ordinary fixed deposits.

Total assets (net of inter-office balances) of ICICI Bank's overseas branches at year-end fiscal 2012 were Rs. 848.0 billion and total advances were Rs. 694.0 billion compared to total assets of Rs. 697.4 billion and total advances of Rs. 551.0 billion at year-end fiscal 2011. The increase in assets and advances of ICICI Bank's overseas branches at year-end fiscal 2012 compared to year-end fiscal 2011 also reflects the depreciation of the rupee against the U.S. dollar by 14.3% during fiscal 2012. Our overseas branches are primarily funded by debt capital market borrowings and syndicated/bilateral loans. See also "Risk Factors—Risks Relating to Our Business—Our funding is primarily short-term and if depositors do not roll over deposited funds upon maturity, our business could be adversely affected".

Our subsidiaries in the United Kingdom and Canada are full service banks offering retail and corporate banking services. In the United Kingdom and Canada, our subsidiaries offer direct banking using the internet as the access channel.

At year-end fiscal 2012, ICICI Bank UK PLC had 13 branches, including one in Belgium and one in Germany, and assets including cash and liquid securities, loans and advances, bonds and notes of financial institutions, India-linked investments and asset backed securities. ICICI Bank UK made a net profit of U.S.\$ 25 million during fiscal 2012, compared to U.S.\$ 37 million during fiscal 2011. ICICI Bank UK PLC had total assets of U.S.\$ 4.1 billion at year-end fiscal 2012, as compared to U.S.\$ 6.4 billion at year-end fiscal 2011.

At year-end fiscal 2012, ICICI Bank Canada had nine branches and assets including cash and liquid securities, loans and advances, insured residential mortgages, asset backed securities and India-linked investments. ICICI Bank Canada made a net profit of CAD 34 million in fiscal 2012 as compared to CAD 32 million in fiscal 2011. ICICI Bank Canada had total assets of CAD 5.2 billion at year-end fiscal 2012, as compared to CAD 4.5 billion at year-end fiscal 2011.

At year-end fiscal 2012, ICICI Bank Eurasia Limited Liability Company had one branch and total assets of U.S.\$ 300 million as compared to total assets of U.S.\$ 324 million at year-end fiscal 2011. ICICI Bank Eurasia Limited Liability Company made a net profit of U.S.\$ 4 million in fiscal 2012 as compared to U.S.\$ 6 million in fiscal 2011. See also "Risk Factors—Risks Relating to India and Other Economic and Market Risks—Financial instability in other countries, particularly emerging market countries and countries where we have established operations, could adversely affect our business and the price of our equity shares and ADSs" and "Risk Factors—Risks Relating to Our Business—We have

experienced rapid international growth in earlier years, which has increased the complexity of the risks that we face”.

Delivery Channels

We deliver our products and services through a variety of channels, ranging from traditional bank branches to ATMs, call centers and the Internet. At year-end fiscal 2012, we had a network of 2,752 branches across several Indian states.

As a part of its branch licensing conditions, the Reserve Bank of India has stipulated that at least 25.0% of our branches must be located in semi-urban and rural areas. See also “Supervision and Regulation—Regulation Relating to the opening of Branches and Automated Teller Machines”. The following table sets forth the number of branches broken down by area at year-end fiscal 2012.

	At March 31, 2012		
	Number of branches and extension counters	% of total	
Metropolitan/urban	1,536	55.8	%
Semi-urban/rural	1,216	44.2	%
Total branches and extension counters	2,752	100.0	%

At year-end fiscal 2012, we had 9,006 ATMs, of which 3,032 were located at our branches. We expect our branch network to become key points of customer acquisition and service. Accordingly, during fiscal 2011, we changed our organization structure to provide greater empowerment to our branches. The branch network is expected to serve as an integrated channel for deposit mobilization and selected retail asset origination. Through our website, www.icicibank.com, we offer our customers online access to account information, payment and fund transfer facilities and internet banking business for our corporate clients. We provide telephone banking services through our call centers. We also provide mobile banking services and plan to focus on further strengthening these delivery channels.

Investment Banking

Our investment banking operations principally consist of ICICI Bank’s treasury operations and the operations of ICICI Securities Primary Dealership Limited and ICICI Securities Limited.

Treasury

Through our treasury operations, we seek to manage our balance sheet, including the maintenance of required regulatory reserves, and to optimize profits from our trading portfolio by taking advantage of market opportunities. Our domestic trading and securities portfolio includes our regulatory reserve portfolio, as there is no restriction on active management of our regulatory reserve portfolio. Our treasury operations include a range of products and services for corporate and small enterprise customers, such as forward contracts and interest rate and currency swaps, and foreign exchange products and services. See also “—Commercial Banking for Corporate Customers—Foreign Exchange and Derivatives”.

Our treasury undertakes liquidity management by seeking to maintain an optimum level of liquidity and complying with the cash reserve ratio requirement and ensuring the smooth functioning of all our branches. We maintain a balance between interest-earning liquid assets and cash to optimize earnings and undertake reserve management by maintaining statutory reserves, including the cash reserve ratio and the statutory liquidity ratio. Under the Reserve Bank of India’s statutory liquidity ratio requirement, ICICI Bank is required to maintain a minimum of 24.0% of its

domestic net demand and time liabilities by way of approved securities such as government of India securities and state government securities. ICICI Bank maintains the statutory liquidity ratio through a portfolio of government of India securities that it actively manages to optimize the yield and benefit from price movements. Further, as a prudent liquidity management strategy, ICICI Bank generally maintains excess investments in securities eligible for classification under the statutory liquidity ratio requirement. See also “Supervision and Regulation—Legal Reserve Requirements”.

ICICI Bank engages in domestic investments and foreign exchange operations from a centralized trading floor in Mumbai. As part of our treasury activities, we also maintain proprietary trading portfolios in domestic debt and equity securities and in foreign currency assets. Our treasury manages our foreign currency exposures and the foreign exchange and risk hedging derivative products offered to our customers and engages in proprietary trading in currencies. Our investment and market risk policies are approved by the Board of Directors.

ICICI Bank's domestic investment portfolio is classified into three categories — held to maturity, available-for-sale and held for trading. Investments are classified as held to maturity subject to the current regulation issued by the Reserve Bank of India. Investments acquired by us with the intention to trade by taking advantage of the short-term price/interest rate movements are classified as held for trading. The investments which do not fall in the above two categories are classified as available-for-sale. Investments under the held for trading category should be sold within 90 days; in the event of inability to sell due to adverse factors including tight liquidity, extreme volatility or a uni-directional movement in the market, the unsold securities should be shifted to the available-for-sale category. Under each category the investments are classified under (a) government securities (b) other approved securities (c) shares (d) bonds and debentures (e) subsidiaries and joint ventures and (f) others. Investments classified under the held to maturity category are not marked to market and are carried at acquisition cost, unless the acquisition cost is more than the face value, in which case the premium is amortized over the period until maturity of such securities. At year-end fiscal 2012, 81% of ICICI Bank's government securities portfolio was in the held to maturity category. The individual securities in the available-for-sale category are marked to market. Investments under this category are valued security-wise and depreciation/appreciation is aggregated for each classification. Net depreciation, if any, is provided for. Net appreciation, if any, is ignored. The individual securities in the held for trading category are accounted for in a similar manner as those in the available-for-sale category.

The following tables set forth, at the dates indicated, certain information related to our available-for-sale investments portfolio.

	Amortized cost	At March 31, 2010		Fair value
		Gross unrealized gain	Gross unrealized loss	
(in millions)				
Corporate debt securities	Rs. 113,191	Rs. 1,917	Rs. (2,219)	Rs. 112,889

The investments in corporate debt securities increased from Rs. 219.4 billion at year-end fiscal 2011 to Rs. 242.3 billion at year-end fiscal 2012, primarily due to the purchase of corporate securities by ICICI Bank and ICICI Bank Canada, offset, in part, by a decrease in corporate debt securities held by ICICI Bank UK. The investments in “other securities” decreased from Rs. 60.7 billion at year-end fiscal 2011 to Rs. 11.2 billion at year-end fiscal 2012, primarily due to the decrease in investment in funded credit derivatives, pass through certificate securities, commercial papers and certificates of deposit.

Net unrealized gain on debt investments was Rs. 0.8 billion at year-end fiscal 2012 as compared to a net unrealized loss of Rs. 1.6 billion at year-end fiscal 2011, primarily due to net unrealized gain on corporate debt securities of Rs. 0.5 billion at year-end fiscal 2012 compared to net unrealized loss of Rs. 0.6 billion at year-end fiscal 2011. Net unrealized losses on government securities decreased from Rs. 0.9 billion at year-end fiscal 2011 to Rs. 0.1 billion at year-end fiscal 2012. Net unrealized losses decreased due to reduction in residual maturity of government securities. Net unrealized loss on equity securities decreased from Rs. 3.2 billion at year-end fiscal 2011 to Rs. 1.0 billion at year-end fiscal 2012. Net unrealized losses on other investments decreased from Rs. 7.4 billion at year-end fiscal 2011 to Rs. 6.7 billion at year-end fiscal 2012.

The following table sets forth, for the periods indicated, income from available-for-sale securities.

	Year ended March 31,			
	2010	2011	2012	2012
	(in millions)			
Interest	Rs. 20,048	Rs. 26,695	Rs. 30,688	US\$ 603
Dividend	2,160	960	5,866	115
Total	Rs. 22,208	Rs. 27,655	Rs. 36,554	US\$ 718
Gross realized gain	Rs. 10,343	Rs. 8,037	Rs. 8,199	US\$ 161

Gross realized loss	(5,552)	(3,178)	(4,379)	(86)
Total	Rs. 4,791	Rs. 4,859	Rs. 3,820	US\$ 75

Interest and dividend income from our available-for-sale securities increased from Rs. 27.7 billion in fiscal 2011 to Rs. 36.6 billion in fiscal 2012 primarily due to an increase in yield on investments and higher dividends received on investments in mutual funds.

The following table sets forth, at the date indicated, an analysis of the maturity profile of our investments in debt securities classified as available-for-sale investments, and yields thereon. This maturity profile is based on repayment dates and does not reflect repricing dates of floating rate investments.

	At March 31, 2012		One to five years		Five to ten years		More than ten years	
	Up to one year Amount	Yield	Amount	Yield	Amount	Yield	Amount	Yield
	(in millions, except percentages)							
Corporate debt securities	Rs. 35,020	9.6 %	Rs. 88,390	9.4 %	Rs. 51,159	10.2 %	Rs. 67,715	9.2 %
Government securities	176,377	5.3	19,895	8.0	30,427	8.6	1,191	8.5
Other securities	4,350	11.2	1,357	4.0	3,326	5.7	2,153	12.9
Total amortized cost of interest-earning securities(1)	Rs. 215,747	6.1 %	Rs. 109,642	9.1 %	Rs. 84,912	9.5 %	Rs. 71,059	9.3 %
Total fair value	Rs. 215,871		Rs. 109,441		Rs. 85,465		Rs. 71,364	

(1) Includes securities denominated in different currencies.

The amortized cost of our held to maturity portfolio amounted to Rs. 1,042.7 billion at year-end fiscal 2012, Rs. 690.4 billion at year-end fiscal 2011 and Rs. 643.7 billion at year-end fiscal 2010. The transactions of ICICI Bank with the Reserve Bank of India under the Liquidity Adjustment Facility were accounted for as borrowing and lending transactions at year-end fiscal 2012, while they were previously accounted for as purchase and sale transactions, resulting in an increase in the held to maturity portfolio by Rs. 168.0 billion at year-end fiscal 2012. The gross unrealized gain on the held to maturity portfolio was Rs. 0.7 billion at year-end fiscal 2012, Rs. 1.6 billion at year-end fiscal 2011 and Rs. 2.6 billion at year-end fiscal 2010. The gross unrealized loss on this portfolio was Rs. 27.1 billion at year-end fiscal 2012, Rs. 19.5 billion at year-end fiscal 2011 and Rs. 13.7 billion at year-end fiscal 2010. During these periods, unrealized gains decreased and unrealized losses increased as the yield on government securities increased. The yield on 10 year government of India securities increased from 7.82% at year-end fiscal 2010 to 7.99% at year-end fiscal 2011 and further to 8.57% at March 31, 2012.

The carrying value of investments in held-for-trading securities was Rs. 206.5 billion at year-end fiscal 2012, Rs. 252.4 billion at year-end fiscal 2011 and Rs. 192.4 billion at year-end fiscal 2010. Other debt securities primarily consist of bonds and debentures, certificates of deposit and commercial papers. Interest and dividend income on

held-for-trading securities decreased from Rs. 17.5 billion in fiscal 2011 to Rs. 11.2 billion in fiscal 2012. Net realized and unrealized gain increased from Rs. 0.6 billion in fiscal 2011 to Rs. 1.5 billion in fiscal 2012.

We have limited investment in equity shares of Rs. 29.5 billion because the Reserve Bank of India restricts investments in equity securities by banks. See also “Supervision and Regulation—Reserve Bank of India Regulations—Regulations Relating to Investments and Capital Market Exposure Limits”.

In general, we pursue a strategy of active management of our long-term equity portfolio to maximize our return on investment. To ensure compliance with the Securities and Exchange Board of India’s insider trading regulations, all dealings in our equity and debt investments in listed companies are undertaken by our treasury’s equity and corporate bonds dealing desks, which are segregated from both the other groups and desks in the treasury and from our other business groups, and which do not have access to unpublished price sensitive information about these companies that may be available to us as a lender.

We deal in several major foreign currencies and take deposits from non-resident Indians in major foreign currencies. We also manage onshore accounts in foreign currencies. The foreign exchange treasury manages our portfolio through money market and foreign exchange instruments to optimize yield and liquidity.

See “Risk Management—Quantitative and Qualitative Disclosures About Market Risk—Exchange Rate Risk”.

Through our branches and banking subsidiaries outside India and our offshore banking unit in Mumbai, we have made investments in corporate and financial sector bonds and debt securities and mortgage and asset-backed securities outside India.

The following table sets forth, at the date indicated, investments in corporate and financial sector debt securities and mortgage and asset backed securities by our overseas branches and banking subsidiaries by region and the mark-to-market and realized losses thereon.

(1)

Edgar Filing: ICICI BANK LTD - Form 20-F

Includes residential mortgage backed securities, commercial mortgage backed securities, other asset backed securities and collateralized loan obligations. Excludes unfunded credit derivative exposure of Rs. 11.0 billion.

- (2) Includes asset backed securities and bonds classified under loans and receivable by our UK subsidiary including those transferred in fiscal 2009 from investment to loans and receivables pursuant to Accounting Standard Board issuing amendments to “FRS 26 – ‘Financial Instruments: Recognition and Measurement’ which permitted reclassification of financial assets in certain circumstances from ‘held for trading’ and ‘available-for-sale categories’ to the ‘loans and receivables’ category.

Investments in corporate and financial sector debt securities and mortgage and asset backed securities by our overseas branches and banking subsidiaries decreased from Rs. 110.3 billion at year-end fiscal 2011 to Rs. 78.3 billion at year-end fiscal 2012. Investment in asset backed securities and funded credit derivatives portfolio decreased from Rs. 33.0 billion at year-end fiscal 2011 to Rs. 15.0 billion at year-end fiscal 2012, primarily due to redemption of funded credit derivatives. Our bond portfolio decreased from Rs. 75.0 billion at year-end fiscal 2011 to Rs. 60.7 billion at year-end fiscal 2012 primarily due to sales and the redemption of securities of our UK subsidiary, offset, in part, by an increase in the bond portfolio of ICICI Bank Canada. Our investments in Europe decreased from Rs. 20.0 billion at year-end fiscal 2011 to Rs. 16.5 billion at year-end fiscal 2012.

The mark-to-market loss on our investment portfolio were Rs. 4.6 billion at year-end fiscal 2012 as compared to Rs. 5.5 billion at year-end fiscal 2011. The mark-to-market impact was a gain of Rs. 1.2 billion during fiscal 2012 as compared to a gain of Rs. 1.7 billion during fiscal 2011. The realized gain/loss and impairment loss was a net loss of Rs. 0.6 billion during fiscal 2012 as compared to a net gain of Rs. 0.6 billion during fiscal 2011.

The following table sets forth, a summary of the investment portfolio of our overseas branches and banking subsidiaries based on the category of investments.

Category	At March 31	
	2011	2012
	(in millions)	
Bonds		
Banks and financial institutions	Rs. 35,202	Rs. 16,548
Corporate	39,825	44,143
Total bonds	75,027	60,691
Asset backed securities and funded credit derivatives	33,025	15,016
Others(1)	2,274	2,543
Total	Rs. 110,326	Rs. 78,250

(1) Includes investments in certificates of deposits.

Our investment in securities of banks and financial institutions is spread over a number of banks and of this the investment in the top ten banks accounts for approximately 66.5% of the total investment in banks and financial institutions at year-end fiscal 2012 as compared to approximately 58.0% at year-end fiscal 2011. Approximately 41.4% of our investment in securities of corporate entities is India-linked at year-end fiscal 2012 as compared to approximately 52.1% at year-end fiscal 2011.

Our total investment in asset backed securities represents less than 0.5% of our total assets at year-end fiscal 2012. The portfolio size of such securities was Rs. 15.0 billion and primarily comprised retail mortgage backed securities of Rs. 10.0 billion, collateralized loan obligations of small and medium enterprises of Rs. 1.6 billion, commercial mortgage backed securities of Rs. 0.4 billion, asset backed commercial paper of Rs. 0.7 billion and other asset backed securities of Rs. 0.8 billion. The retail mortgage backed securities portfolio consists primarily of UK residential mortgage backed securities backed by prime and buy-to-let mortgages. The asset backed commercial paper portfolio consists of investments made by ICICI Bank Canada in securities issued by securitization trusts. These trusts have in turn invested in various Canadian and United States assets. During the previous year, some of the asset backed commercial papers have been restructured into master asset vehicles. The size of the master asset vehicles portfolio on our books at year-end fiscal 2012 was Rs. 2.2 billion and these are classified as a part of the banks and financial institutions portfolio. No additions were made to the master asset vehicles portfolio during fiscal 2012.

At year-end fiscal 2012, the fair value of investments in the government securities held by our overseas branches and banking subsidiaries was Rs. 67.1 billion primarily in the United Kingdom and Canada.

The investments in these securities are governed by the respective investment policies of ICICI Bank and its banking subsidiaries. To mitigate significant concentrations in credit risk, the investment policy lays down a number

of limits that need to be adhered to before investments can be made. The investment policy lays down rating and issuer wise investment limits at each of these units. Further, there are counterparty limits for individual banks and financial institutions. Country exposure limits have also been established for various countries. In addition, ICICI Bank monitors the credit spread risk arising out of such investments while ICICI Bank UK has instituted credit spread sensitivity limits on its portfolio. Any exceptions to the above limits are made with due approvals from the appropriate forums. ICICI Bank has not bought credit protection against any of its international investments.

ICICI Securities Limited

ICICI Securities Limited is engaged in equity underwriting and brokerage. ICICI Securities Limited has an online share trading portal called icicidirect.com. The primary objective of icicidirect.com is to enable individuals to make investments and offer a wide range of investment options by providing a seamless structure that integrates a customer's bank account, demat account and trading account. The portal offers seamless access to the United States markets by tying up with a leading United States based broker. ICICI Securities Limited has a subsidiary in the United States, ICICI Securities Holdings Inc., which in turn has a subsidiary in the United States, ICICI Securities Inc., which is engaged in brokerage services. ICICI Securities Limited made a net profit of Rs. 0.8 billion in fiscal 2012 compared to Rs. 1.1 billion in fiscal 2011.

ICICI Securities Primary Dealership

ICICI Securities Primary Dealership is engaged in the primary dealership of Indian government securities. It also deals in other fixed income securities. In addition to this, it has underwriting, portfolio management services and placement of debt and money market operations. ICICI Securities Primary Dealership made a net profit of Rs. 0.9 billion in fiscal 2012 compared to a net profit of Rs. 0.5 billion in fiscal 2011. The revenues of the business are directly linked to conditions in the fixed income market.

Venture Capital and Private Equity

Our subsidiary ICICI Venture Funds Management Company Limited manages funds that provide venture capital funding to start-up companies and private equity to a range of companies. At year-end fiscal 2012, ICICI Venture managed or advised funds of approximately Rs. 104.4 billion. ICICI Venture made a net profit of Rs. 0.7 billion in both fiscal 2011 and fiscal 2012.

Asset Management

We provide asset management services through our subsidiary, ICICI Prudential Asset Management. ICICI Prudential Asset Management is a joint venture with Prudential PLC of UK. We have approximately 51.0% interest in the entity. ICICI Prudential Asset Management also provides portfolio management services and advisory services to clients. ICICI Prudential Asset Management Company had quarterly average mutual fund assets under management of Rs. 687.2 billion at the end of fiscal 2012. ICICI Prudential Asset Management made a net profit of Rs. 0.9 billion during fiscal 2012 compared to a net profit of Rs. 0.7 billion in fiscal 2011.

Insurance

We provide a wide range of insurance products and services through our subsidiaries ICICI Prudential Life Insurance Company and ICICI Lombard General Insurance Company. ICICI Prudential Life Insurance Company and ICICI Lombard General Insurance Company are joint ventures with Prudential PLC of UK and Fairfax Financial Holdings Limited of Canada, respectively. We have approximately 74.0% interest in both of these entities. Subject to the amendment of foreign ownership regulations, Prudential PLC has the right to increase its shareholding in ICICI

Prudential Life Insurance Company to 49.0% at the market value of the shares to be determined as mutually agreed. Laws and regulations governing insurance companies currently provide that each promoter should eventually reduce its stake to 26.0% following the completion of 10 years from the commencement of business by the concerned insurance company. The Insurance Laws (Amendment) Bill introduced in the Indian Parliament in 2008, would remove the requirement that promoters dilute their stake to 26.0%. See also “Supervision and Regulation—Recent Structural Reforms—Insurance Laws (Amendment) Bill 2008”. We and Prudential PLC have agreed that if a higher level of promoter shareholding is permitted, then this would be in the proportion of 51%

being held by us and 49.0% being held by Prudential PLC. See also “Supervision and Regulation—Taxation—Regulations Governing Insurance Companies”. Further, we and each of our joint venture partners have a right of first refusal in case the other partner proposes to sell its shareholding in the joint venture (other than transfer to a permitted affiliate of the transferor).

ICICI Prudential Life Insurance Company made a net profit of Rs. 13.8 billion in fiscal 2012, compared to Rs. 8.1 billion in fiscal 2011, primarily on account of lower upfront expenses associated with lower new business as well as the continued income stream from business sold in prior years. On account of regulatory changes issued by the Insurance Regulatory and Development Authority with respect to unit-linked products, the Indian life insurance industry witnessed a significant shift in product mix towards conventional products in fiscal 2011 and fiscal 2012. Accordingly, the business mix of ICICI Prudential Life Insurance Company also changed with an increase in the proportion of retail non-linked conventional products in fiscal 2012 on an annualized premium equivalent basis. See also “Operating and Financial Review and Prospects—Segment Revenues and Assets—Life Insurance”.

The new business annualized premium equivalent of ICICI Prudential Life Insurance Company decreased by 21.6% to Rs. 31.2 billion in fiscal 2012. Total premium decreased by 21.6% to Rs. 140.2 billion due to a decrease in premium on single premium product from Rs. 21.7 billion in fiscal 2011 to Rs. 8.0 billion in fiscal 2012 and decrease in first year premium on regular premium products from Rs. 52.7 billion in fiscal 2011 to Rs 36.4 billion in fiscal 2012. ICICI Prudential Life

Insurance Company maintained its market leadership in the private sector with an overall market share of 5.9% based on retail weighted new business received premium in fiscal 2012.

ICICI Lombard General Insurance Company made a net loss of Rs. 4.2 billion in fiscal 2012 compared to net loss of Rs. 0.8 billion in fiscal 2011. In accordance with the Insurance Regulatory and Development Authority guidelines, from April 1, 2007 to March 3, 2012, ICICI Lombard General Insurance Company, together with all other general insurance companies, participated in the Indian Motor Third Party Insurance Pool (the “Pool”), administered by the General Insurance Corporation of India. The Pool is a multilateral arrangement for insurance with respect to third party claims against commercial vehicles, the costs of which are shared by all general insurance companies in proportion to their overall market share. Based on an analysis of Pool performance, the Insurance Regulatory and Development Authority instructed all general insurance companies to provide for losses on the Pool at a provisional loss ratio of 153.0% from fiscal 2008 through fiscal 2011 in the financial results for fiscal 2011 compared to the earlier loss ratio of 122.0-127.0%. Accordingly, ICICI Lombard General Insurance Company made an additional provision of Rs. 2.7 billion during fiscal 2011. Further, in fiscal 2011, the Insurance Regulatory and Development Authority announced an increase in the rates of premium applicable to the motor third party insurance business by 68.5% effective from April 25, 2011.

In fiscal 2012, the Insurance Regulatory and Development Authority directed the dismantling of the Pool and advised the general insurance companies to recognize the Pool liabilities using the loss ratios estimated by the General Actuaries Department of the United Kingdom; i.e., 159.0%, 188.0%, 200.0%, 213.0% and 145.0% respectively for underwriting years fiscal 2008 to fiscal 2012. Further, the Insurance Regulatory and Development Authority directed all insurers that liability related to the Pool for fiscal 2008 and fiscal 2009 be accounted for and recognized in full in fiscal 2012. With respect to liabilities pertaining to fiscal 2010 to fiscal 2012, the liabilities could be recognized in fiscal 2012, although general insurance companies were also provided with the option to recognize the liability over a three year period. ICICI Lombard General Insurance Company recognized the additional liabilities of the Pool from fiscal 2008 to fiscal 2012 in fiscal 2012, and therefore, the loss after tax of ICICI Lombard General Insurance Company for fiscal 2012 includes the impact of additional Pool losses of Rs. 6.9 billion.

The Insurance Regulatory and Development Authority ordered the dismantling of the Pool with effect from March 31, 2012 and set up a framework for the Indian Motor Third Party Declined Risk Insurance Pool (the “Declined Risk Pool”) for commercial vehicles. The Declined Risk Pool is effective from April 1, 2012. Under Declined Risk Pool approach,

insurers will cede to the Declined Risk Pool only the policies that they would not consider underwriting themselves. Insurers have been instructed to underwrite motor pool policies to the minimum extent of the sum of 50% of their share in total gross premium and 50% share in total motor premium. Any shortfall against this requirement will be allocated to the insurers from the Declined Risk Pool. Additionally, as compared to the earlier Pool approach of ceding all third party premiums (including those related to

comprehensive policies), under the Declined Risk Pool framework, only specific third party insurance premiums will be pooled. Accordingly, under this approach, the size of the Pool is expected to decline substantially and the allocation of losses to individual insurers will be based on their ability to meet the mandated targets. The Insurance Regulatory and Development Authority increased the premium of motor third party liability coverage paid by customers effective April 1, 2012 in order to give effect to the higher loss ratios.

ICICI Lombard General Insurance Company's gross written premium (excluding its share of the motor third party insurance pool) increased by 21.5% from Rs. 44.1 billion in fiscal 2011 to Rs. 53.6 billion in fiscal 2012 primarily due to the growth in the motor insurance business and health insurance business. ICICI Lombard General Insurance Company was the largest private general insurer with a market share of about 9.4% in gross written premium (excluding premium on the motor third party insurance pool) among all general insurance companies in fiscal 2012.

ICICI Bank earns commissions and fees from these subsidiaries as their distributor for sales of life and general insurance products.

Funding

Our funding operations are designed to ensure stability of funding, minimize funding costs and effectively manage liquidity. Since the amalgamation of ICICI with ICICI Bank, the primary source of domestic funding has been deposits raised from both retail and corporate customers. We also raise funds through short-term rupee borrowings and domestic or overseas bond offerings pursuant to specific regulatory approvals. Because ICICI was not allowed to raise banking deposits as a financial institution, its primary sources of funding prior to the amalgamation were retail bonds and rupee borrowings from a wide range of institutional investors. ICICI also raised funds through foreign currency borrowings from commercial banks and other multilateral institutions like the Asian Development Bank and the World Bank, which were guaranteed by the government of India. With regard to these guarantees by the government of India for purposes of obtaining foreign currency borrowings, the government of India has, in its letter dated May 31, 2007, instructed us to take steps to either repay or prepay such foreign currency borrowings for which a guarantee has been provided by the government of India or to substitute the guarantees provided by the government of India with other acceptable guarantees. At year-end fiscal 2012, the total outstanding loans/bonds of ICICI Bank that are guaranteed by the government of India were Rs. 16.4 billion, constituting approximately 1.2% of the total borrowings of ICICI Bank at that date.

Our overseas branches are primarily funded by debt capital market borrowings and syndicated/bilateral loans. See also "Risk Factors—Risks Relating to Our Business—Our funding is primarily short-term and if depositors do not roll over deposited funds upon maturity, our business could be adversely affected". Our subsidiaries in the United Kingdom and Canada fund themselves primarily through retail deposits.

Our deposits were 46.7% of our total liabilities at year-end fiscal 2012 compared to 48.5% of our total liabilities at year-end fiscal 2011. Our borrowings, including preference shares issued by us, were 26.7% of our total liabilities at year-end fiscal 2012 compared to 23.6% of our total liabilities at year-end fiscal 2011. Our deposits increased by 8.8% from Rs. 2,591.1 billion at year-end fiscal 2011 to Rs. 2,819.5 billion at year-end fiscal 2012. Our borrowings (including redeemable non-cumulative preference shares and subordinated debt) increased from Rs. 1,258.4 billion at year-end fiscal 2011 to Rs. 1,613.0 billion at year-end fiscal 2012 primarily due to increase in overseas borrowings of ICICI Bank and borrowings under Liquidity Adjustment Facility with the Reserve Bank of India. The transactions with the Reserve Bank of India under Liquidity Adjustment Facility were accounted for as borrowings and lending transactions at March 31, 2012, while these transactions were earlier accounted for as sale and purchase transactions.

The following table sets forth, at the dates indicated, the composition of deposits by type of deposit.

Edgar Filing: ICICI BANK LTD - Form 20-F

	2010		At March 31,				2012	
	Amount	% of total	Amount	% of total	Amount	% of total	Amount	% of total
	(in billions, except percentages)							
Current account deposits	Rs.315.5	13.0	% Rs.354.7	13.7	% Rs.358.7	12.7	%	
Savings deposits	622.2	25.8	732.7	28.3	829.1	29.4		
Time deposits	1,478.0	61.2	1,503.7	58.0	1,631.7	57.9		
Total deposits	Rs.2,415.7	100.0	% Rs.2,591.1	100.0	% Rs.2,819.5	100.0	%	

The following table sets forth, for the periods indicated, the average volume and average cost of deposits by type of deposit.

	2010		Year ended March 31, (1)			2012		
	Amount	Cost(2)	Amount	Cost(2)	Amount	Amount	Cost(2)	
	(in billions, except percentages)							
Interest-bearing deposits:								
Savings deposits	Rs.554.4	2.8	% Rs.648.0	3.2	% Rs.732.1	US\$14	3.7	%
Time deposits	1,656.6	7.3	1,531.8	6.1	1,647.8	33	7.6	
Non-interest-bearing deposits:								
Other demand deposits	194.6	—	234.4	—	254.3	5	—	
Total deposits	Rs.2,404.6	5.6	% Rs.2,414.2	4.7	% Rs.2,634.2	US\$52	5.8	%

(1) For fiscal 2010 and fiscal 2011, the average balances are based on daily average balances outstanding for ICICI Bank, except for the averages of foreign branches which were calculated on a monthly basis until October 31, 2010 and on a fortnightly basis thereafter and the average of quarterly balances outstanding at the end of March of the previous fiscal year and June, September, December and March of that fiscal year for subsidiaries. For fiscal 2012, the average balances are based on daily average balances outstanding, except for the averages of foreign branches of ICICI Bank which are calculated on a fortnightly basis.

(2) Represents interest expense divided by the average balances.

Our average deposits in fiscal 2012 were Rs. 2,634.2 billion at an average cost of 5.8% compared to average deposits of Rs. 2,414.2 billion at an average cost of 4.7% in fiscal 2011. Our average time deposits in fiscal 2012 were Rs. 1,647.8 billion at an average cost of 7.6% compared to average time deposits of Rs. 1,531.8 billion at an average cost of 6.1% in fiscal 2011. The cost of new time deposits began increasing from the second half of fiscal 2011 and the full impact of this increase was reflected in fiscal 2012. The average cost of savings deposits increased from 3.2% in fiscal 2011 to 3.7% in fiscal 2012, primarily due to an increase in the savings deposits rate from 3.5% to 4.0% effective May 3, 2011 as per the Reserve Bank of India guidelines. Our savings deposits include Hi-Save retail savings deposits accepted by ICICI Bank UK. See also “Operating and Financial Review and Prospects—Financial Condition—Deposits”.

The following table sets forth, at the date indicated, the contractual maturity profile of deposits by type of deposit.

	At March 31, 2012			
	Up to one year	After one year and within three years	After three years	Total
	(in millions)			
Interest-bearing deposits:				
Savings deposits	Rs. 829,071	Rs. —	Rs. —	Rs. 829,071
Time deposits	1,279,276	282,886	69,577	1,631,739
Non-interest-bearing deposits:				
Other demand deposits	358,695	—	—	358,695
Total deposits	Rs. 2,467,042	Rs. 282,886	Rs. 69,577	Rs. 2,819,505

1.Savings and other demand deposits are payable on demand and classified in 'Up to one year' bucket.

The following table sets forth, for the periods indicated, average outstanding rupee borrowings and the percentage composition by category of borrowing. The average cost (interest expense divided by average balances) for each category of borrowings is provided in the footnotes.

	2010		At March 31,(1)				2012	
	Amount	% of total	Amount	% of total	Amount	Amount	% of total	
(in millions, except percentages)								
Statutory liquidity ratio bonds(2)	Rs. 10,311	1.6 %	Rs. 6,343	1.0 %	Rs. 2,810	US\$ 55	0.5 %	
Borrowings from Indian government(3)	909	0.1	527	0.1	162	3	0.0

Total	Rs. 626,428	100.0 %	Rs. 625,176	100 %	Rs. 583,542	US\$ 11,467	100.0 %	

(1) For fiscal 2010 and 2011, the average balances are based on daily average balances outstanding for ICICI Bank, except for the averages of foreign branches which were calculated on a monthly basis until October 31, 2010 and on a fortnightly basis thereafter and the average of quarterly balances outstanding at the end of March of the previous fiscal year and June, September, December and March of that fiscal year for subsidiaries. For fiscal 2012, the average balances are based on daily average balances outstanding, except for the averages of foreign branches of ICICI Bank which are calculated on a fortnightly basis.

(2) With an average cost of 11.6% in fiscal 2010, 11.7% in fiscal 2011 and 11.6% in fiscal 2012.

(3) With an average cost of 12.3% in fiscal 2010, 12.2% in fiscal 2011 and 12.6% in fiscal 2012.

(4) With an average cost of 7.1% in fiscal 2010, 8.7% in fiscal 2011 and 11.0% in fiscal 2012.

(5) Includes publicly and privately placed bonds, borrowings from institutions, inter-bank overnight borrowings and inter-corporate deposits.

The following table sets forth, at the date indicated, the maturity profile of our rupee term deposits of Rs. 10 million or more.

	At March 31,			% of total deposits	
	2011	2012			
(in millions, except percentages)					
Less than three months	Rs. 255,801	Rs. 256,751	US\$ 5,045	9.1	%
Above three months and less than six months	126,847	192,366	3,780	6.8	
Above six months and less than 12 months	268,092	331,092	6,506	11.7	
More than 12 months	94,459	46,994	923	1.7	
Total deposits of Rs. 10 million and more	Rs. 745,199	Rs. 827,203	US\$ 16,254	29.3	%

Rupee term deposits of Rs. 10 million or more increased from Rs. 745.2 billion at year-end fiscal 2011 to Rs. 827.2 billion at year-end fiscal 2012.

The following table sets forth, at the dates indicated, certain information related to short-term rupee borrowings, which consist of borrowings from government-owned companies and inter-bank borrowings.

	At March 31, (1)					
	2010		2011		2012	
	(in millions, except percentages)					
Year-end balance	Rs. 103,302		Rs. 88,015		Rs. 277,587	
Average balance during the year (2)	132,352		144,882		194,147	
Maximum quarter-end balance	217,208		103,693		277,587	
Average interest rate during the year (3)	6.7	%	8.6	%	9.1	%
Average interest rate at year-end (4)	5.8	%	8.6	%	9.5	%

(1) For fiscal 2010 and 2011, short-term borrowings include borrowings in the call market and repurchase agreements. For fiscal 2012, short-term borrowings include borrowings in the call market, repurchase agreements and transactions by ICICI Bank with the Reserve Bank of India under the Liquidity Adjustment Facility.

(2) For fiscal 2010, the average balance is the average of quarterly balances at the end of March of the previous fiscal year and June, September, December and March of that fiscal year. For fiscal 2011, the average balances are the sum of the daily average balances outstanding for ICICI Bank and the average of quarterly balances outstanding at the end of March of the previous fiscal year and June, September, December and March of that fiscal year for subsidiaries and other consolidated entities. For fiscal 2012, the average balances are based on daily average balances outstanding, except for the averages of foreign branches of ICICI Bank which are calculated on a fortnightly basis.

(3) Represents the ratio of interest expense on short-term borrowings to the average of quarterly balances of short-term borrowings.

(4) Represents the weighted average rate of the short-term borrowings outstanding at fiscal year-end.

Our short term rupee borrowings increased from Rs. 88.0 billion at year-end fiscal 2011 to Rs. 277.6 billion at year-end fiscal 2012 primarily due to short-term borrowings from the Reserve Bank of India under Liquidity Adjustment Facility. The transactions with the Reserve Bank of India under Liquidity Adjustment Facility were accounted for as borrowings and lending transactions at March 31, 2012, while these transactions were earlier accounted as sales and purchase transactions.

The following table sets forth, for the periods indicated, the average outstanding volume of foreign currency borrowings based on average balances by source and the percentage composition by source. The average cost (interest expense divided by average balances) for each source of borrowings is provided in the footnotes.

	For year ended March 31, (1)							
	2010		2011		2012			
	Amount	% of total	Amount	% of total	Amount	Amount	% of total	
	(in millions, except percentages)							
Bond borrowings (2)	Rs. 361,470	53.0 %	Rs. 321,199	47.0 %	Rs. 398,613	US\$ 7,833	45.2 %	
Other borrowings (3)	320,924	47.0 %	356,901	53.0 %	483,515	9,501	54.8 %	
Total	Rs. 682,394	100.0 %	Rs. 678,100	100.0 %	Rs. 882,128	US\$ 17,334	100 %	

(1)

For fiscal 2010 and 2011, the average balances are based on daily average balances outstanding for ICICI Bank, except for the averages of foreign branches which were calculated on a monthly basis until October 31, 2010 and on a fortnightly basis thereafter and the average of quarterly balances outstanding at the end of March of the previous fiscal year and June, September, December and March that fiscal year for subsidiaries. For fiscal 2012, the average balances are based on daily average balances outstanding, except for the averages of foreign branches of ICICI Bank, which are calculated on a fortnightly basis.

(2) With an average cost of 5.2% in fiscal 2010, 5.7% in fiscal 2011 and 5.6% in fiscal 2012.

(3) With an average cost of 2.7% in fiscal 2010, 2.0% in fiscal 2011 and 2.3% in fiscal 2012.

At year-end fiscal 2012, the outstanding capital instruments raised by us were Rs. 397.1 billion. The outstanding capital instruments include debt that is classified either as Tier I or Tier II capital in calculating the capital adequacy ratio in accordance with the Reserve Bank of India's regulations on capital adequacy. See also "Supervision and Regulation—Reserve Bank of India Regulations".

Risk Management

As a financial intermediary, we are exposed to risks that are particular to our lending, transaction banking and trading businesses and the environment within which we operate. Our goal in risk management is to ensure that we understand, measure, monitor and manage the various risks that arise and that the organization adheres to the policies and procedures, which are established to address these risks.

The key principles underlying the risk management framework at ICICI Bank are as follows:

- The Board of Directors has oversight of all the risks assumed by the Bank.
- Specific committees of the Board have been constituted to facilitate focused oversight of various risks. For a discussion of these and other committees, see “Management”.
- The Risk Committee reviews risk management policies in relation to various risks (including portfolio, liquidity, interest rate, operational, investment policies and strategy and regulatory and compliance issues in relation thereto), key risk indicators and risk profile templates (covering areas including credit risk, interest rate risk, liquidity risk, foreign exchange risk and operational risk) and the limits framework, including stress test limits for various risks. The Risk Committee also assesses our capital adequacy position, based on the risk profile of our balance sheet and reviews the implementation status of capital regulations.
- The Credit Committee reviews the credit quality of the major portfolios developments in key industrial sectors and exposure to these sectors and exposures to large borrower accounts in addition to approving certain exposures as per the credit approval authorization policy approved by the Board of Directors.
- The Audit Committee provides direction to and monitors the quality of the compliance and internal audit function.
- The Fraud Monitoring Committee reviews frauds above certain values, suggests corrective measures to mitigate fraud risks and monitors the efficacy of remedial actions.
- Policies approved from time to time by the Board of Directors form the governing framework for each type of risk. The business activities are undertaken within this policy framework.
- Independent groups and sub-groups have been constituted across the Bank to facilitate independent evaluation, monitoring and reporting of various risks. These groups function independently of the business groups/sub-groups.

The risk management framework forms the basis for developing consistent risk principles across the Bank, and its overseas banking subsidiaries.

We are primarily exposed to credit risk, market risk, liquidity risk, operational risk and reputation risk. ICICI Bank has centralized groups, the Risk Management Group, the Compliance Group, the Corporate Legal Group, the Financial Crime Prevention and Reputation Risk Management Group and the Internal Audit Group with a mandate to identify, assess and monitor all of our principal risks in accordance with well-defined policies and procedures. In addition, the Credit and Treasury Middle Office Groups and the Operations Group monitor operational adherence to regulations, policies and internal approvals. The Risk Management Group is further organized into the Credit Risk Management Group, Market Risk Management Group and the Operational Risk Management Group. The Risk Management Group reports to the Executive Director and Chief Financial Officer. The Credit and Treasury Middle Office Groups and Operations Group report to an Executive Director. The Compliance Group and the Internal Audit Group report to the Audit Committee of the Board of Directors and the Managing Director and Chief Executive

Officer. The Compliance and Internal Audit Groups have administrative reporting to the Executive Director and Chief Financial Officer. These groups are independent of the business units and coordinate with representatives of the business units to implement our risk management methodologies.

Credit Risk

Credit risk is the risk of loss that may occur from the failure of any party to abide by the terms and conditions of any financial contract, principally the failure to make required payments of loans due to us. In its lending operations, ICICI Bank is principally exposed to credit risk.

The credit risk is governed by the Credit and Recovery Policy or credit policy approved by the Board of Directors. The Credit and Recovery Policy outlines the type of products that can be offered, customer categories, the targeted customer profile and the credit approval process and limits. ICICI Bank measures, monitors and manages credit risk at an individual borrower level and at the portfolio level, for non-retail borrowers. It has a structured and standardized credit approval process, which includes a well-established procedure of comprehensive credit appraisal. The Country Risk Management Policy addresses the recognition, measurement, monitoring and reporting of country risk.

Credit Approval Authorities

The Board of Directors of ICICI Bank has delegated credit approval authority to various committees, forums and individual officers under the credit approval authorization policy. The credit approval authorization policy is based on the level of risk and the quantum of exposure, and is designed to ensure that transactions with higher exposure and higher levels of risk are sent to a correspondingly higher forum/committee for approval.

The Bank has established several levels of credit approval authorities for its corporate banking activities - the Credit Committee, the Committee of Executive Directors, the Committee of Senior Management, the Committee of Executives and Regional Committees. For certain exposures to small and medium enterprises and rural and agricultural loans under programs, separate forums have been established for approval. These forums sanction programs formulated through a cluster-based approach wherein a lending program is implemented for a homogeneous group of individuals or business entities that comply with certain norms. To be eligible for funding under the programs, borrowers need to meet the stipulated credit norms and obtain a minimum score on the scoring model. ICICI Bank has incorporated control norms, borrower approval norms and review triggers in all such programs.

Retail credit facilities are required to comply with approved product policies. All products policies are approved by the Committee of Executive Directors. The individual credit proposals are evaluated and approved by individual officers/forums on the basis of the product policies.

Credit Risk Assessment for Corporate and Project Finance Exposures

All credit proposals other than retail products, program lending, score card-based lending to small and medium enterprises and agri-businesses and certain other specified products are rated internally by Credit Risk Management Group, prior to approval by the appropriate forum.

The Credit Risk Management Group rates proposals, carries out industry analysis, tracks the quality of the credit portfolio and reports periodically to the Credit Committee and the Risk Committee. For non-retail exposures, the Credit Middle Office Group verifies adherence to the terms of the approval prior to the commitment and disbursement of credit facilities. The Bank also manages credit risk through various limit structures, which are in line with the Reserve Bank of India's prudential guidelines. The Bank has set up various exposure limits, including the single borrower exposure limit, the group borrower exposure limit, the industry exposure limit, the unsecured exposure limit, the long tenor exposure limit and limits on exposure to sensitive sectors such as capital markets, non-banking finance companies and real estate. Rating based limits on incremental sanctions have also been put in place.

ICICI Bank has an established credit analysis procedure leading to appropriate identification of credit risk both at the individual borrower and the portfolio level. Appropriate appraisal and credit rating methodologies have been established for various types of products and businesses. Internal credit rating practices have been internalized in the Bank and are actively used for decision making over the entire credit process in the corporate portfolio. The methodology involves assessment of quantitative and qualitative parameters. For example, for any large corporate,

the rating methodology entails a comprehensive evaluation of the industry, borrower's business position in the industry (benchmarking), financial position and projections, quality of management, impact of projects being undertaken by the borrower and structure of the transaction. The credit rating process has been certified as being compliant with ISO 9001:2008 quality management system requirements.

Borrower risk is evaluated by considering:

- the risks and prospects associated with the industry in which the borrower is operating (industry risk);
- the financial position of the borrower by analyzing the quality of its financial statements, its past financial performance, its financial flexibility in terms of ability to raise capital and its cash flow adequacy (financial risk);
 - the borrower's relative market position and operating efficiency (business risk);
- the quality of management by analyzing their track record, payment record and financial conservatism (management risk); and
- the risks with respect to specific projects, both pre-implementation, such as construction risk and funding risk, as well as post-implementation risks such as industry, business, financial and management risks related to the project (project risk).

After conducting an analysis of a specific borrower's risk, the Credit Risk Management Group assigns a credit rating to the borrower. ICICI Bank has a scale of twelve ratings ranging from AAA to B and short-term ratings from S1 to S8. A borrower's credit rating is a critical input for the credit approval process. The borrower's credit rating and the default pattern corresponding to that credit rating, forms an important input in the risk-based pricing framework of the Bank. Every proposal for a financing facility is prepared by the relevant business unit and reviewed by the Credit Risk Management Group before being submitted for approval to the appropriate approval authority. The approval process for non-fund facilities is similar to that for fund-based facilities. The credit rating for every borrower is reviewed periodically. The Bank also reviews the ratings of all its borrowers in a particular industry upon the occurrence of any significant event impacting that industry.

On the Bank's current rating scale, ratings of below BBB- (i.e., BB, B, 5 and 6 ratings) are considered to be relatively high-risk categories. The current credit policy of the Bank does not expressly provide a minimum rating required for a borrower to be considered for a loan. All corporate loan proposals with an internal rating of below BBB- are sent to our Credit Committee for its approval, which is constituted with a majority of non-executive directors.

The following table sets forth a description of our internal rating grades linked to the likelihood of loss:

	Grade	Definition
(I)	Investment grade	Entities/obligations are judged to offer moderate to high safety with regard to timely payment of financial obligations.
	AAA, AA+, AA, AA-, S1-S4, 1, 2A-C	Entities/obligations are judged to offer high safety with regard to timely payment of financial obligations.
	A+, A, A-, S5-S7, 3A-C	Entities/obligations are judged to offer an adequate degree of safety with regard to timely payment of financial obligations.
	BBB+, BBB and BBB-, S8, 4A-C	Entities/obligations are judged to offer moderate safety with regard to timely payment of financial obligations.
(II)	Below investment grade (BB and B, 5, 6)	Entities/obligations are judged to carry inadequate safety with regard to timely payment of financial obligations.

At year-end fiscal 2012, our net non-investment grade loans constituted about 10% of our total net loans.

Working capital loans are generally approved for a period of 12 months. At the end of the 12 month validity period, ICICI Bank reviews the loan arrangement and the credit rating of the borrower. On completion of this review, a decision is made whether to renew the working capital loan arrangement.

Assessment of Project Finance Exposures

ICICI Bank has a framework for the appraisal and execution of project finance transactions. ICICI Bank believes that this framework creates optimal risk identification, allocation and mitigation and helps minimize residual risk.

The project finance approval process begins with a detailed evaluation of technical, commercial, financial, marketing and management factors and the sponsor's financial strength and experience. Once this review is completed, an appraisal memorandum is prepared for credit approval purposes. As part of the appraisal process, a risk matrix is generated, which identifies each of the project risks, mitigating factors and residual risks associated with the project. The appraisal memorandum analyzes the risk matrix and establishes the viability of the project. Typical risk mitigating factors include the commitment of stand-by funds from the sponsors to meet any cost over-runs and a conservative collateral position. After credit approval, a letter of intent is issued to the borrower, which outlines the principal financial terms of the proposed facility, sponsor obligations, conditions precedent to disbursement, undertakings from and covenants on the borrower. After completion of all formalities by the borrower, a loan agreement is entered into with the borrower.

In addition to the above, in the case of structured project finance in areas such as infrastructure, oil, gas and petrochemicals, as a part of the due diligence process, ICICI Bank appoints consultants, wherever considered necessary, to advise the lenders, including technical advisors, business analysts, legal counsel and insurance consultants. These consultants are typically internationally recognized and experienced in their respective fields. Risk mitigating factors in these financings include creation of debt service reserves and channeling project revenues through a trust and retention account.

ICICI Bank's project finance loans are generally fully secured and have full recourse to the borrower. In most cases, ICICI Bank has a security interest and first lien on all the fixed assets. Security interests typically include property, plant and equipment as well as other tangible assets of the borrower, both present and future. ICICI Bank's borrowers are required to maintain comprehensive insurance on their assets where ICICI Bank is recognized as payee in the event of loss. In some cases, ICICI Bank also takes additional credit comforts such as corporate or personal guarantees from one or more sponsors of the project or a pledge of the sponsors' equity holding in the project company. In certain industry segments, ICICI Bank also takes security interest in relevant project contracts such as concession agreements, off-take agreements and construction contracts as part of the security package.

ICICI Bank normally disburses funds after the entire project funding is committed and all necessary contractual arrangements have been entered into. Funds are disbursed in tranches to pay for approved project costs as the project progresses. When ICICI Bank appoints technical and market consultants, they are required to monitor the project's progress and certify all disbursements. ICICI Bank also requires the borrower to submit periodic reports on project implementation, including orders for machinery and equipment as well as expenses incurred. Project completion is contingent upon satisfactory operation of the project for a certain minimum period and, in certain cases, the establishment of debt service reserves. ICICI Bank continues to monitor the credit exposure until its loans are fully repaid.

Assessment of Corporate Finance Exposures

As part of the corporate loan approval procedures, ICICI Bank carries out a detailed analysis of funding requirements, including normal capital expenses, long-term working capital requirements and temporary imbalances in liquidity. ICICI Bank's funding of long-term core working capital requirements is assessed on the basis, among other things, of the borrower's present and proposed level of inventory and receivables. In case of corporate loans

for other funding requirements, ICICI Bank undertakes a detailed review of those requirements and an analysis of cash flows. A substantial portion of ICICI Bank's corporate finance loans are secured by a lien over appropriate assets of the borrower. Corporate finance loans are typically secured by a first charge on fixed assets, which normally consist of property, plant and equipment. We may also take as security a pledge of financial assets, such as marketable securities, and obtain corporate guarantees and personal guarantees wherever appropriate. In certain cases, the terms of financing include covenants relating to sponsors' shareholding in the borrower and restrictions on the sponsors' ability to sell all or part of their shareholding.

The focus of ICICI Bank's structured corporate finance products is on cash flow based financing. We have a set of distinct approval procedures to evaluate and mitigate the risks associated with such products. These procedures include:

- carrying out a detailed analysis of cash flows to forecast the amounts that will be paid and the timing of the payments based on an exhaustive analysis of historical data;
- conducting due diligence on the underlying business systems, including a detailed evaluation of the servicing and collection procedures and the underlying contractual arrangements; and
 - paying particular attention to the legal, accounting and tax issues that may impact the structure.

ICICI Bank's analysis enables it to identify risks in these transactions. To mitigate risks, ICICI Bank uses various credit enhancement techniques, such as over-collateralization, cash collateralization, creation of escrow accounts and debt service reserves. ICICI Bank also has a monitoring framework to enable continuous review of the performance of such transactions.

With respect to financing for corporate mergers and acquisitions, ICICI Bank carries out detailed due diligence on the acquirer as well as the target's business profile. The key areas covered in the appraisal process include:

- assessment of the industry structure in the target's host country and the complexity of the business operations of the target;
 - financial, legal, tax, technical due diligence (as applicable) of the target;
 - appraisal of potential synergies and likelihood of their being achieved;
- assessment of the target company's valuation by comparison with its peer group and other transactions in the industry;
- analysis of regulatory and legal framework of the overseas geographies with regard to security creation, enforcement and other aspects;
 - assessment of country risk aspects and the need for political insurance; and
- the proposed management structure of the target post takeover and the ability and past experience of the acquirer in completing post merger integration.

Assessment of Working Capital Finance Exposures

ICICI Bank carries out a detailed analysis of borrowers' working capital requirements. Credit limits are established in accordance with the credit approval authorization approved by the Bank's board of directors. Once credit limits are approved, ICICI Bank calculates the amounts that can be lent on the basis of monthly statements provided by the borrower and the margins stipulated. Quarterly information statements are also obtained from borrowers to monitor the performance on a regular basis. Monthly cash flow statements are obtained where considered necessary. Any irregularity in the conduct of the account is reported to the appropriate authority on a monthly basis. Credit limits are reviewed on a periodic basis.

Working capital facilities are primarily secured by inventories, receivables and other current assets. Additionally, in certain cases, these credit facilities are secured by personal guarantees of directors, or subordinated security interests in the tangible assets of the borrower including plant and machinery and covered by personal guarantees of the promoters.

Risk Monitoring of Corporate and Project Finance Exposures

We ensure effective monitoring of credit facilities through a risk-based asset review framework under which the frequency of asset review is higher for cases with higher outstanding balances and/or lower credit ratings. For corporate, small enterprises and agri-business related borrowers, the Credit Middle Office Group verifies adherence to the terms of the credit approval prior to the commitment and disbursement of credit facilities.

The Credit Middle Office Group monitors compliance with the terms and conditions for credit facilities prior to disbursement. It also reviews the completeness of documentation, creation of security and insurance policies for assets financed.

Borrower accounts are generally reviewed at least once a year.

Credit Risk Assessment Procedures for Retail Loans

Independent groups and sub-groups have been constituted across ICICI Bank to facilitate the independent evaluation, monitoring and reporting of risks. These control groups function independently of the business groups. The sourcing and approval of retail credit exposures are segregated to achieve this independence. The Credit Risk Management Group, Retail Strategy and Policy Group and credit teams are assigned complementary roles to facilitate effective credit risk management.

The Credit Risk Management Group oversees the credit risk issues for retail assets including the vetting of all credit policies/operating notes proposed for approval by the board or forums authorized by the board. The Credit Risk Management Group is involved in portfolio monitoring of all retail assets and in suggesting and implementing policy changes. Independent units within retail banking, focus on customer-segment specific strategies, policy formulation, portfolio tracking and monitoring, analytics, score card development and database management. The credit team, which is independent from the business unit, oversees the underwriting function and is organized geographically to support the retail sales and service structure.

The Bank's credit officers evaluate credit proposals on the basis of operating notes approved by the Committee of Executive Directors and risk assessment criteria defined by the Credit Risk Management Group.

ICICI Bank's customers for retail loans are typically middle and high-income, salaried or self-employed individuals, and, in some cases, partnerships and corporations. Except for personal loans and credit cards, ICICI Bank requires a contribution from the borrower and its loans are secured by the asset financed.

In respect of retail loans, the Bank's credit officers evaluate credit proposals on the basis of the operating notes approved by the Committee of Executive Directors and the risk assessment criteria defined by the Credit Risk Management Group. These criteria vary across product segments but typically include factors such as the borrower's income, the loan-to-value ratio and demographic parameters. External agencies such as field investigation agencies facilitate a comprehensive due diligence process including visits to offices and homes in the case of loans made to individual borrowers. In making its credit decisions, ICICI Bank draws upon a centralized delinquent database and reports from the Credit Information Bureau (India) Limited to review the borrower's profile. For mortgage loans, a valuation agency or an in-house technical team carries out the technical valuations. In the case of credit cards, in order

to limit the scope of individual discretion, ICICI Bank has implemented a credit-scoring program that is an automated credit approval system that assigns a credit score to each applicant based on certain demographic attributes like income, educational background and age. The credit score then forms one of the criteria for loan evaluation.

ICICI Bank has established centralized operations to manage operating risk in the various back office processes of its retail loan business except for a few operations, which are decentralized to improve turnaround time for customers. A separate team under the Retail Strategy and Policy Group undertakes review and audits of credit quality and processes across different products. The Bank also has a debt services management group structured along various product lines and geographical locations, to manage debt recovery. The group operates under the guidelines of a standardized recovery process. A fraud prevention and control group has been set up to manage fraud-related risks, through fraud prevention and through the recovery of fraud losses. The fraud control group evaluates various external agencies involved in retail finance operations, including direct marketing associates, external verification associates and collection agencies.

Credit Risk Assessment Procedures for Small Enterprises Loans

ICICI Bank finances small enterprises, which include individual cases and financing dealers and vendors of companies by implementing structures to enhance the base credit quality of the vendor/dealer. Small enterprise credit also includes financing extended directly to small enterprises as well as financing extended on a cluster-based approach in which credit is extended to a group of small enterprises that have a homogeneous profile, such as apparel manufacturers and manufacturers of pharmaceuticals. The risk assessment of such a cluster involves the identification of appropriate credit norms for target market, the use of scoring models for enterprises that satisfy these norms and a comprehensive appraisal of those enterprises which are awarded a minimum required score in the scoring model. A detailed appraisal is performed based on the financial as well as non-financial parameters to identify the funding needs of the enterprise in all the cases. There are appropriate credit structures built in based on the assessment of each case. The group also finances small businesses based on analysis of the business and financials. The assessment includes a scoring model with minimum score requirement before appraisal of these enterprises are conducted.

ICICI Bank's small enterprise portfolio also finances small and medium enterprises, dealers and vendors linked to these entities by implementing structures to enhance the base credit quality of the vendor/dealer. The process involves an analysis of the base credit quality of the vendor/dealer pool and an analysis of the linkages that exist between the vendor/dealer and the company.

The risk management policy also includes setting up of portfolio control norms, continuous monitoring renewal norms as well as stringent review and exit triggers to be followed while financing such clusters or communities.

Credit Risk Assessment procedures for Rural and Agricultural Loans

The rural and agricultural loan portfolio is composed of corporations in the rural sector, small and medium enterprises in the rural sector, dealers and vendors linked to these entities and loans to farmers. ICICI Bank seeks to adopt appropriate risk assessment methodologies for each of the segments. For corporations, borrower risk is evaluated by analyzing the industry risk, the borrower's market position, financial performance, cash flow adequacy and the quality of management. The credit risk of dealers, vendors and farmers is evaluated by analyzing the base credit quality of the borrowers or the pool and also the linkages between the borrowers and the companies to which the dealers, vendors or farmers are supplying their produce. We attempt to enhance the credit quality of the pool of dealers, vendors and farmers by strengthening the structure of the transaction.

For some segments, ICICI Bank uses a cluster-based approach wherein a lending program is implemented for a homogeneous group of individuals or business entities that comply with certain laid down parameterized norms. To be eligible for funding under the programs, the borrowers need to meet the stipulated credit norms and obtain a minimum score on the scoring model. ICICI Bank has incorporated control norms, borrower approval norms and review triggers in all the programs.

ICICI Bank's rural initiative may create additional challenges with respect to managing the risk of frauds and credit monitoring due to the increased geographical dispersion and use of intermediaries. ICICI Bank has put in place control structure and risk management framework to mitigate the related risk. See also "Risk Factors—Risks Relating to Our Business—Entry into new businesses or expansions of existing businesses may expose us to increased risks that may adversely affect our business".

Portfolio Review

An analysis of our portfolio composition based on our internal rating is carried out and is submitted to the Risk Committee of the Board on a quarterly basis. This facilitates the identification and analysis of trends in the portfolio credit risk.

The Credit Committee of the Bank, apart from approving proposals, regularly reviews the credit quality of the portfolio and various sub-portfolios, cases that need special attention and movement in the non-performing assets portfolio. A detailed calendar of reviews is formulated by the Credit Committee. The review calendar is comprehensive covering ICICI Bank's exposure to particular industries and the outlook for those industries, analysis of non-performing loans, accounts under watch, overdue loans, incremental approvals and specific review of each portfolio. A summary of the reviews carried out by the Credit Committee is submitted to the Board for its information.

Quantitative and Qualitative Disclosures About Market Risk

Market risk is the possibility of loss arising from changes in the value of a financial instrument as a result of changes in market variables such as interest rates, exchange rates, credit spreads and other asset prices. Our exposure to market risk is a function of our trading and asset-liability management activities and our role as a financial intermediary in customer-related transactions. These risks are mitigated by the limits stipulated in the Investment Policy and Asset Liability Management Policy, which are approved and reviewed by the board of directors.

Market Risk Management Procedures

Market risk policies include the Investment Policy, the Asset Liability Management Policy and the Derivative Policy. The policies are approved by the Board of Directors. The Asset Liability Management Committee stipulates liquidity and interest rate risk limits, monitors adherence to limits and determines the strategy in light of the current and expected environment. The framework for implementing strategy is articulated in the Asset Liability Management Policy. The Investment Policy addresses issues related to investments in various trading products. The policies are designed to ensure that operations in the securities and foreign exchange and derivatives areas are conducted in accordance with sound and acceptable business practices and are as per current regulatory guidelines, laws governing transactions in financial securities and the financial environment. The policies contain the limit structures that govern transactions in financial instruments. The Board has authorized the Asset Liability Management Committee and Committee of Executive Directors (Borrowing, Treasury and Investment Operations) to grant certain approvals related to treasury activities, within the broad parameters laid down by policies approved by the Board.

The Asset Liability Management Committee meets periodically and reviews the positions in domestic trading groups, overseas branches and banking subsidiaries, interest rate and liquidity gap positions on the banking book, sets deposit and benchmark lending rates, reviews the business profile and its impact on asset liability management and determines the asset liability management strategy, as deemed fit, in light of the current and expected business environment.

The Market Risk Management Group is responsible for the identification, assessment and mitigation of risk. Risk limits including position limits and stop loss limits are monitored on a daily basis by the Treasury Middle Office Group and reviewed periodically. Foreign exchange risk is monitored through the net overnight open foreign exchange limit. Interest rate risk is measured through the use of repricing gap analysis and duration analysis. Interest rate risk is further monitored through interest rate risk limits approved by the Asset Liability Management Committee.

Interest Rate Risk

Our core business is deposit taking, borrowing and lending in both Indian rupees and foreign currencies as permitted by the Reserve Bank of India. These activities expose us to interest rate risk.

Our balance sheet consists of Indian rupee and foreign currency assets and liabilities, with a predominantly higher proportion of rupee-denominated assets and liabilities. Thus, movements in Indian interest rates are our main source of interest rate risk.

Exposure to fluctuations in interest rates is measured primarily by way of gap analysis, providing a static view of the maturity and repricing characteristics of balance sheet positions. An interest rate gap report is prepared by classifying all assets and liabilities into various time period categories according to contracted maturities or anticipated repricing date. The difference in the amount of assets and liabilities maturing or being repriced in any time period category, gives an indication of the extent of exposure to the risk of potential changes in the margins on new or repriced assets and liabilities. ICICI Bank prepares interest rate risk reports on a fortnightly basis. These reports are submitted to the Reserve Bank of India on a monthly basis. Interest rate risk is further monitored through interest rate risk limits approved by the Asset Liability Management Committee.

Our primary source of funding is deposits and, to a smaller extent, borrowings. In the rupee market, most of our deposit taking is at fixed rates of interest for fixed periods, except for savings account deposits and current account deposits, which do not have any specified maturity and can be withdrawn on demand. We usually borrow for a fixed period with a one-time repayment on maturity, with some borrowings having European call/put options, exercisable only on specified dates, attached to them. However, we have a mix of floating and fixed interest rate assets. Our loans are generally repaid gradually, with principal repayments being made over the life of the loan. Our housing loans at year-end fiscal 2012 were primarily floating rate loans where any change in the benchmark rate with reference to which these loans are priced, is generally passed on to the borrower on the first day of the succeeding quarter or succeeding month, as applicable. Since January 1, 2004, we have used a single benchmark prime lending rate structure for all loans other than specific categories of loans advised by the Indian Banks' Association. Effective July 1, 2010, as required by the Reserve Bank of India, our new loans are priced with reference to a base rate, called the ICICI Bank Base Rate. The Asset Liability Management Committee sets the ICICI Bank Base Rate based on the cost of funds, cost of operations, credit charge and likely changes in the Bank's cost of funds, market rates, interest rate outlook and other systemic factors. Pricing for fresh approvals and renewal of rupee facilities is linked to the ICICI Bank Base Rate. The lending rates comprise the ICICI Bank Base Rate, term premium and transaction-specific credit and other charges. As specified by the Reserve Bank of India, the lending rates for loans and advances are not permitted to be lower than the ICICI Bank Base Rate with the exception of certain categories of loans specified by the Reserve Bank of India from time to time. As prescribed in the guidelines an option has been given to the existing borrowers for migration to the base rate mechanism. Existing loans, other than cases where the borrower migrates to base rate, continue to be linked to a benchmark as stipulated in the existing loan agreements. We generally seek to eliminate interest rate risk on undisbursed commitments by fixing interest rates on rupee loans at the time of loan disbursement. Pursuant to regulatory reserve requirements, we maintain a large part of our assets in government of India securities and in interest-free balances with the Reserve Bank of India, which are funded mainly by wholesale deposits and borrowings. This exposes us to the risk of differential movement in the yield earned on statutory reserves and the related funding cost.

Almost all our foreign currency loans are floating rate loans. These loans are generally funded with floating rate foreign currency funds in the case of our overseas branches. We generally convert all our foreign currency borrowings into floating rate dollar liabilities through the use of interest rate and currency swaps with leading international banks. Our overseas subsidiaries in the UK and Canada have fixed rate retail term deposits as their funding sources, which reprice slowly, compared to their assets.

We use the duration of our government securities portfolio as a key variable for interest rate risk management. We increase or decrease the duration of our government securities portfolio to increase or decrease our interest rate risk exposure. In addition, we also use interest rate derivatives to manage asset and liability positions. We are an active participant in the interest rate swap market and are one of the largest counterparties in India.

For a discussion of our vulnerability to interest rate risk, see “Risk Factors—Risks Relating to Our Business—Our banking and trading activities are particularly vulnerable to interest rate risk and volatility in interest rates could adversely affect our net interest margin, the value of our fixed income portfolio, our income from treasury operations, the quality of our loan portfolio and our financial performance” and “Risk Factors—Risks Relating to Our Business—Our inability to effectively manage credit, market and liquidity risk and inaccuracy of our valuation

models and accounting estimates may have an adverse effect on our earnings, capitalization, credit ratings and cost of funds”.

The following table sets forth, at the date indicated, our asset-liability gap position.

	At March 31, 2012(1)			Total
	Less than or equal to one year	Greater than one year and up to five years	Greater than five years	
	(in millions)			
Loans, net	Rs. 2,344,646	Rs. 423,906	Rs. 152,702	Rs. 2,921,254
Investments	608,783	442,305	1,347,553	2,398,641
Other assets(2)	171,010	7,178	491,906	670,094
Total assets	3,124,439	873,389	1,992,161	5,989,989
Stockholders' equity and preference share capital	-	-	612,765	612,765
Borrowings	960,555	317,541	334,870	1,612,966
Deposits	2,185,384	469,400	164,721	2,819,505
Other liabilities	-	-	996,678	996,678
Total liabilities	3,145,939	786,941	2,109,034	6,041,914
Total gap before risk management positions	(21,500)	86,448	(116,873)	(51,925)
Off-balance sheet positions(3)	(202,199)	295,561	(70,979)	22,383
Total gap after risk management positions	Rs. (223,699)	Rs. 382,009	Rs. (187,852)	Rs. (29,542)

(1) Assets and liabilities are classified into the applicable categories based on residual maturity or re-pricing whichever is earlier. Classification methodologies are generally based on Asset Liability Management Guidelines, including behavioral studies, as per local policy/regulatory norms of the entities. Items that neither re-price nor have a defined maturity are included in the 'greater than five years' category. This includes investments in the nature of equity, cash and cash equivalents and miscellaneous assets and liabilities. Fixed assets (other than leased assets) have been excluded from the above table.

(2) The categorization for these items is different from that reported in the financial statements.

(3) Off- balance sheet positions comprise derivatives, including foreign exchange forward contracts.

The following table sets forth, at the date indicated, the amount of our loans with residual maturities greater than one year that had fixed and variable interest rates.

	At March 31, 2012		Total
	Fixed rate loans	Variable rate loans	
	(in millions)		
Loans	Rs. 535,188	Rs. 1,548,471	Rs. 2,083,659

The following table sets forth, using the balance sheet at year-end fiscal 2012 as the base, one possible prediction of the impact of adverse changes in interest rates on net interest income for fiscal 2013, assuming a parallel shift in the yield curve at year-end fiscal 2012.

	At March 31, 2012			
	Change in interest rates (in basis points)			
	(100)	(50)	50	100
	(in millions)			
Rupee portfolio	Rs. (2,538)	Rs. (1,269)	Rs. 1,269	Rs. 2,538
Foreign currency portfolio	(1,180)	(590)	590	1,180
Total	Rs. (3,718)	Rs. (1,859)	Rs. 1,859	Rs. 3,718

Based on our asset and liability position at year-end fiscal 2012, the sensitivity model shows that net interest income from the banking book for fiscal 2013 would rise by Rs. 3.7 billion if interest rates increased by 100 basis points during fiscal 2013. Conversely, the sensitivity model shows that if interest rates decreased by 100 basis points during fiscal 2013, net interest income for fiscal 2013 would fall by an equivalent amount of Rs. 3.7 billion. Based on our asset and liability position at year-end fiscal 2011, the sensitivity model showed that net interest income from the banking book for fiscal 2012 would rise by Rs. 1.7 billion if interest rates increased by 100 basis points during fiscal 2012. Conversely, the sensitivity model showed that if interest rates decreased by 100 basis points during fiscal 2012, net interest income for fiscal 2011 would fall by an equivalent amount of Rs. 1.7 billion.

Sensitivity analysis, which is based upon static interest rate risk profile of assets and liabilities, is used for risk management purposes only and the model above assumes that during the course of the year no other changes are made in the respective portfolios. Actual changes in net interest income will vary from the model.

Price Risk (Trading book)

We undertake trading activities to enhance earnings through trading for our own account. ICICI Securities Primary Dealership is a primary dealer in government of India securities.

The following table sets forth, using the fixed income portfolio at year-end fiscal 2012 as the base, one possible prediction of the impact of changes in interest rates on the value of our rupee fixed income held for trading portfolio for fiscal 2012, assuming a parallel shift in yield curve.

	Portfolio Size	At March 31, 2012 Change in interest rates (in basis points)			
		(100)	(50)	50	100
		(in millions)			
Government of India securities	Rs.47,193	Rs. 308	Rs. 154	Rs. (154)	Rs.(308)
Corporate debt securities	153,121	961	481	(481)	(961)
Total	Rs.200,314	Rs.1,269	Rs.635	Rs.(635)	Rs.(1,269)

At year-end fiscal 2012, the total value of our rupee fixed income trading portfolio was Rs. 200.3 billion. The sensitivity model shows that if interest rates increase by 100 basis points during fiscal 2013, the value of this portfolio would fall by Rs. 1.3 billion. Conversely, if interest rates fall by 100 basis points during fiscal 2013, the value of this portfolio would rise by Rs. 1.3 billion. At year-end fiscal 2011, the total value of our rupee fixed income trading portfolio was Rs. 148.3 billion. The sensitivity model showed that if interest rates increased by 100 basis points during fiscal 2012, the value of this portfolio would fall by Rs. 1.6 billion. Conversely, if interest rates fell by 100 basis points during fiscal 2012, the value of this portfolio would rise by Rs. 1.6 billion.

At year-end fiscal 2012, the total outstanding notional principal amount of our trading interest rate derivatives portfolio was Rs. 3,500.9 billion compared to Rs. 4,575.0 billion at year-end fiscal 2011. The sensitivity model shows that if interest rates increase by 100 basis points, the value of this portfolio would rise by Rs. 3.1 billion. At year-end fiscal 2012, the total outstanding notional principal amount of our trading currency derivatives (options and cross currency interest rate swaps) portfolio was Rs. 1,207.2 billion compared to Rs. 1,284.8 billion at year-end fiscal 2011. The sensitivity model shows that if interest rates increase by 100 basis points, the value of this cross currency interest rate swaps portfolio would fall by Rs. 1.0 billion.

Equity Risk

We assume equity risk both as part of our investment book and our trading book. At year-end fiscal 2012, we had a total equity investment portfolio of Rs. 29.5 billion, primarily comprising Rs. 10.9 billion of investments by the Bank and Rs. 15.3 billion of investments by our insurance subsidiaries. The equity investments by the Bank include the equity portfolio of our proprietary trading group amounting to Rs. 1.5 billion and other equity investments amounting to Rs. 9.4 billion. These other equity investments are primarily unlisted and long-term in nature. We also invest in private equity and venture capital funds, primarily those managed by our subsidiary ICICI Venture Funds Management Company. These funds invest in equity and equity linked instruments. Our investments through these funds are similar in nature to our other equity investments and are subject to the same risks. In addition, they are also subject to risks in the form of changes in regulation and taxation policies applicable to such equity funds. For further information on our trading and available-for-sale investments, see “—Overview of Our Products and Services—Investment Banking—Treasury”.

The risk in the equity portfolio of the proprietary trading group, which manages the equity trading book of the Bank, is controlled through a Value-at-Risk (VaR) approach and stop loss limits, as stipulated in the investment policy. VaR measures the statistical risk of loss from a trading position, given a specified confidence level and a defined time horizon. The VaR is calculated using a 99% confidence level and a holding period of one day.

We compute VaR based on factor sensitivities and volatility multipliers. The following table sets forth the high, low, average and period-end VaR and hypothetical daily profit/loss, computed on the assumption of no intra-day trading, and using this VaR model for the equity portfolio of the proprietary trading group of the Bank for fiscal 2012:

	High	Low	Average	Rs. in million At March 30, 2012
Value-at-Risk	291.3	26.6	101.3	49.7
Hypothetical daily profit/(loss)	304.6	(219.5)	(7.9)	33.2

We monitor the effectiveness of this VaR model by regularly back-testing its performance. Statistically, we would expect to see losses in excess of VaR only 1% of the time over a one-year period. In fiscal 2012, we experienced hypothetical losses (assuming no intra-day trading) exceeding the VaR estimates on 21 days. The hypothetical losses exceeding the VaR estimates were a result of the assumptions we made in estimating the volatility multipliers.

To improve the accuracy of our VaR measure, we began to additionally monitor VaR using a Historical Simulation model beginning on February 10, 2012. The Bank tested the performance of the Historical Simulation model for the proprietary trading group’s equity portfolio for various dates between September 19, 2011 and February 9, 2012. On all the dates the Historical Simulation model was tested, the VaR calculated using the Historical Simulation model was higher than the VaR computed using the previous model. During this period, hypothetical losses exceeded the VaR computed using the previous model on 15 days but exceeded the VaR calculated using the Historical Simulation model on 3 days.

The Bank decided to start using the Historical Simulation model to measure the VaR for the equity portfolio of the equity trading group because of its superior performance. However, to ensure a gradual transition to the new model, the Bank currently monitors VaR using both VaR models and takes the higher of the two numbers for VaR limit monitoring purposes.

Edgar Filing: ICICI BANK LTD - Form 20-F

The following table sets forth a comparison of the VaR calculated using the previous model and the new Historical Simulation model for the period between February 10, 2012 and March 30, 2012:

	High	Low	Average	Rs. in million At March 30, 2012
VaR (previous model)	77.6	42.5	58.7	49.7
VaR (Historical Simulation model)	158.1	100.1	130.2	121.9

While VaR is an important tool for measuring market risk under normal market conditions, it has inherent limitations that should be taken into account, including its inability to accurately predict future losses when extreme events are affecting the markets, because it is based on the assumption that historical market data is indicative of future market performance. Moreover, different VaR calculation methods use different assumptions and hence may produce different results, and computing VaR at the close of the business day would exclude intra-day risk. There is also a general possibility that the VaR model may not fully capture all the risks present in the portfolio.

Exchange Rate Risk

The Bank offers foreign currency hedge instruments like swaps, forwards, and currency options to clients, which are primarily banks and corporate customers. The Bank actively uses cross currency swaps, forwards, and options to hedge against exchange risks arising out of these transactions and for foreign currency loans that are originated in currencies different from the currencies of borrowings supporting them. Some of these transactions may not meet the hedge accounting requirements and are subject to mark to market. Trading activities in the foreign currency markets expose us to exchange rate risks. This risk is mitigated by setting counterparty limits, stipulating daily and cumulative stop-loss limits, and engaging in exception reporting.

The Reserve Bank of India has permitted banks to offer foreign currency-rupee options by banks for hedging foreign currency exposures including hedging of balance sheet exposures to the users. The Bank has been offering such products primarily to corporate clients and other inter-bank counterparties and is one of the largest participants in the currency options market accounting for a significant share of daily trading volume in India. All the options are maintained within the limits specified in the Investment Policy. The foreign exchange rate risk is monitored through the net overnight open position limit approved by the Reserve Bank of India.

Derivative Instruments Risk

The Bank enters into interest rate and currency derivative transactions for the purpose of hedging interest rate and foreign exchange mismatches and also engage in trading of derivative instruments on its own account.

The Bank offers various derivative products, including options and swaps, to clients for their risk management purposes. The Bank generally does not carry market risk on client derivative positions as the Bank covers its positions in the inter-bank market. Profits or losses on account of currency movements on these transactions are borne by the clients. The derivative transactions are subject to counterparty risk to the extent particular obligors are unable to make payment on contracts when due. During fiscal 2009, due to high exchange rate volatility as a result of the financial crisis, a number of clients experienced significant mark-to-market losses in derivative transactions. On maturity or premature termination of the derivative contracts, these mark-to-market losses became receivables owed to the Bank. Some clients did not pay their derivatives contract obligations to the Bank in a timely manner and, in some instances, clients filed lawsuits to avoid payment of derivatives contract obligations entirely. In other instances, at the request of clients, the Bank converted overdue amounts owed to the Bank into loans and advances.

In October 2008, the Reserve Bank of India issued guidelines requiring banks to classify derivative contract receivables overdue for 90 days or more as non-performing assets. Pursuant to these guidelines, the Bank reverses derivative contracts receivables in its income statement when they are overdue for 90 days or more. After reversal, any expected recovery is accounted for only on actual receipt of payment.

As per Reserve Bank of India guidelines issued in August 2011, for a derivative contract where a crystallized receivable is overdue for more than 90 days, in addition to reversing crystallized receivable through the profit and loss account, any other positive mark-to-market on derivative contracts for such customer is also required to be reversed

through the profit and loss account. Further, if any credit facility is overdue for more than 90 days, any crystallized receivable and positive mark-to-market on derivative contracts for such customer is also required to be

reversed through the profit and loss account. The guidelines also disallow netting of receivables and payables from/to the same counterparty.

The Bank pursues a variety of recovery strategies to collect receivables owed in connection with derivative contracts. These strategies include, among other approaches, set-offs against any other payables to the same client, negotiated settlements, rescheduling of obligations, the exercise of rights against collateral (if available) and legal redress. The Bank selects collection strategies and makes assessments of collectability based on all available financial information about a client account as well as economic and legal factors that may affect its recovery efforts.

At year-end fiscal 2012, The Bank had exposure to credit derivatives at its domestic operations, overseas branches and banking subsidiaries.

Credit Spread Risk

Credit spread risk arises out of investments in fixed income securities and credit derivatives. Hence, volatility in the level of credit spreads would impact the value of these portfolios held by the Bank. The Bank closely monitors its portfolio and risk is monitored by setting investment limits, reference entity exposure limits, rating-wise limits, single issuer limit, maturity limits and stipulating daily and cumulative stop-loss limits.

Liquidity Risk

Liquidity risk is the current and prospective risk arising out of an inability to meet financial commitments as they fall due, through available cash flows or through the sale of assets at fair market value. It includes both, the risk of unexpected increases in the cost of funding an asset portfolio at appropriate maturities and the risk of being unable to liquidate a position in a timely manner at a reasonable price.

The goal of liquidity risk management is to be able, even under adverse conditions, to meet all liability repayments on time and to fund all investment opportunities by raising sufficient funds either by increasing liabilities or by converting assets into cash expeditiously and at reasonable cost.

The Bank manages liquidity risk in accordance with its Asset Liability Management Policy. This policy is framed as per the current regulatory guidelines and is approved by the Board of Directors. The Asset Liability Management Policy is reviewed periodically to incorporate changes as required by regulatory stipulation or to realign the policy with changes in the economic landscape. The Asset Liability Management Committee of the Bank formulates and reviews strategies and provides guidance for management of liquidity risk within the framework laid out in the Asset Liability Management Policy. The Asset Liability Management Committee comprises whole-time directors (including Chief Financial Officer), Presidents, Senior General Managers in charge of Risk and Treasury and Deputy Chief Financial Officer and heads of business groups. The Risk Committee of the Board, a Board Committee, has oversight of the Asset Liability Management Committee.

The Bank uses various tools for the measurement of liquidity risk including the statement of structural liquidity, dynamic liquidity gap statements, liquidity ratios and stress testing through scenario analysis. The statement of structural liquidity is used as a standard tool for measuring and managing net funding requirements and the assessment of a surplus or shortfall of funds in various maturity buckets in the future. The cash flows pertaining to various assets, liabilities and off-balance sheet items are placed in different time buckets based on their contractual or behavioral maturity. The statement of structural liquidity is prepared periodically for the domestic and international operations of the Bank and the utilization against gap limits for various time buckets laid down for each bucket are reviewed by the Asset Liability Management Committee.

The Bank also prepares dynamic liquidity statements, which in addition to scheduled cash flows, also consider the liquidity requirements pertaining to incremental business and the funding thereof. The dynamic liquidity statements are prepared in close coordination with the business groups, and cash flow projections based on the statements are periodically presented to the Asset Liability Management Committee. As a part of the stock and flow

approach, the Bank also monitors various liquidity ratios, and limits are laid down for these ratios in the Asset Liability Management Policy.

The Bank has diverse sources of liquidity to allow for flexibility in meeting funding requirements. For the domestic operations, current accounts and savings deposits payable on demand form a significant part of the Bank's funding and the Bank is implementing its strategy to sustain and grow this segment of deposits along with retail term deposits. These deposits are augmented by wholesale deposits, borrowings and through the issuance of bonds and subordinated debt from time to time. Loan maturities and sale of investments also provide liquidity. The Bank holds unencumbered, high quality liquid assets and has certain mitigating measures to protect against stress conditions.

For domestic operations, the Bank also has the option of managing liquidity by borrowing in the inter-bank market on a short-term basis. The overnight market, which is a significant part of the inter-bank market, is susceptible to volatile interest rates. To limit the reliance on such volatile funding, the Asset Liability Management Policy stipulates limits for borrowing and lending in the inter-bank market. The Bank also has access to refinancing facilities extended by the Reserve Bank of India and other financial institutions against refinance eligible assets.

For its overseas branches, the Bank also has a well-defined borrowing program. In order to maximize borrowings at a reasonable cost through its branches, liquidity in different markets and currencies is targeted. The wholesale borrowings are in the form of bond issuances, syndicated loans from banks, money market borrowings, inter-bank bilateral loans and deposits, including structured deposits. The Bank also raises refinance from other banks against the buyers credit and other trade assets. Those loans that meet the Export Credit Agencies' criteria are refinanced as per the agreements entered into with these agencies. The Bank also mobilizes retail deposit liabilities, in accordance with the regulatory framework in place in the respective host country.

We maintain prudential levels of liquid assets in the form of cash, balances with the central bank and government securities, money market and other fixed income securities. At year-end fiscal 2012, as stipulated by the regulator, banks in India are required to maintain their statutory liquidity ratio at a level of 24% of net demand and time liabilities in India and their cash reserve ratio at a level of 4.75% of net demand and time liabilities in India. The Bank generally holds additional securities over and above the stipulated level.

Further, the Bank has a board approved liquidity stress testing framework, under which the Bank estimates its liquidity position under a range of stress scenarios, considering possible measures that the Bank could take to mitigate the outflows under each scenario. These scenarios cover bank specific and market-wide stress situations and have been separately designed for the domestic and international operations of the Bank. Each scenario included in the stress-testing framework covers a time horizon of 28 days. The stress-testing framework measures the impact on profit due to liquidity outflows for each scenario, considering possible measures that the Bank could take to mitigate the stress. The impact on profits is subject to a stress tolerance limit specified by the Board of Directors. The results of liquidity stress testing are reported to the Asset Liability Management Committee on a monthly basis. During fiscal 2012, the results of each of the stress scenarios were within the Board-prescribed limits.

The Risk Committee of the Board has further approved a Liquidity Contingency Plan, which lays down a framework for ongoing monitoring of potential liquidity contingencies and an action plan to meet such contingencies. The Liquidity Contingency Plan lays down several liquidity indicators, which are monitored on a weekly basis and defines the protocol and responsibilities of various teams in the event of a liquidity contingency.

Similar frameworks to manage liquidity risk have been established at each of the overseas banking subsidiaries of the Bank addressing the risks they run and host country regulatory requirements as applicable. Our subsidiaries in United Kingdom and Canada continue to be funded primarily out of term deposits, which are of tenors of one year and above and raised from their respective local markets. Our subsidiary in the United Kingdom offers an Internet-based online

savings deposit product to depositors. The total amount of such deposits at year-end fiscal 2012 was U.S.\$ 598 million. These deposits are payable on demand. At March 31, 2012, these deposits were classified as outflow in the less than eight days liquidity bucket. We deploy these funds in a portfolio of short-term money market placements and marketable securities. We may face liquidity risk in case of high volumes of deposit withdrawals.

See also “Operating and Financial Review and Prospects—Liquidity Risk”.

Operational Risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Operational risk includes legal risk but excludes strategic and reputational risks. Legal risk includes, but is not limited to, exposure to fines, penalties or punitive damages resulting from supervisory actions, as well as private settlements. For a discussion on our vulnerability to operational risk, see “Risk Factors—Risks Relating to Our Business—There is operational risk associated with financial industries which, when realized, may have an adverse impact on our business”.

The management of operational risk is governed by the Operational Risk Management Policy approved by the Board of Directors. The policy is applicable across the Bank including overseas branches, ensuring a clear accountability and responsibility for management and mitigation of operational risk, developing a common understanding of operational risk and helping the business and operation groups units to improve internal controls. Operational risk can result from a variety of factors, including failure to obtain proper internal authorizations, improperly documented transactions, failure of operational and information security procedures, computer systems, software or equipment, fraud, inadequate training and employee errors. Operational risk is sought to be mitigated by maintaining a comprehensive system of internal controls, establishing systems and procedures to monitor transactions, maintaining key back-up procedures and undertaking regular contingency planning.

In each of the banking subsidiaries, local management is responsible for implementing operational risk management framework through the operational risk management policy approved by their respective boards.

Operational Controls and Procedures in Branches

The Bank has put in place comprehensive operating manuals detailing procedures for the processing of various banking transactions. Amendments to these manuals are implemented through circulars, which are accessible to our branch employees on the intranet of the Bank. In addition, our branches are supported by product, marketing, audit and compliance teams. Our core banking application software has multiple security features to protect the integrity of applications and data.

Transactions relating to customer accounts are processed based on built-in system checks and authorization procedures. Cash transactions over a specified limit are subjected to enhanced scrutiny to avoid potential money laundering.

Operational Controls and Procedures for Internet Banking

The Bank has put in place controls for transactions through internet banking including two levels of passwords. In addition to this, grid level authentication (a grid is a unique set of numbers printed on the debit card) is also required. Additionally, a one time password is sent to the customer’s registered mobile number for addition of payee for fund transfers. Internet transactions using credit cards require additional password-based authentication besides other authentications present on the card. Text message alerts are also sent to the customer for internet-based transactions beyond a threshold level. To prevent phishing and internet related fraud, the Bank also regularly communicates with customers. The internet banking infrastructure is secured through the multi layer information security controls, including firewalls, intrusion prevention systems and network level access controls. These are supplemented by periodic penetration tests, vulnerability assessments and continuous security incident monitoring of internet banking servers.

Operational Controls and Procedures in Regional Processing Centers and Central Processing Center

The Bank has 49 regional processing centers located at various cities across the country. These regional processing centers engage in activities like processing clearing checks and inter-branch transactions, outstation check collections, and engage in back-office activities for account opening, renewal of deposits and salary

transaction processing of corporations. There are currency chests located at 35 locations in various cities across India, which cater to the cash requirements of branches and ATMs.

Our central processing centers, two located in Mumbai and one in Hyderabad, process the transactions on a nation-wide basis for the issuance of debit cards, mailing of personal identification numbers, reconciliation of ATM transactions, issuance of passwords to internet banking customers and internet banking bill payments and processing of credit card transactions. Centralized processing has also been extended to activities like issuance of personalized check books and activation of new account opened.

Operational Controls and Procedures in Treasury

The Bank has put in place a comprehensive internal control structure with respect to its treasury operations. The control measures include the segregation of duties between treasury front-office and treasury middle office, automated control procedures, continuous monitoring procedures through detailed reporting statements, and a well defined code of conduct for dealers. The Bank has also set up limits in respect of treasury operations including deal-wise limits and product-wise limits. In order to mitigate the potential mis-selling risks, if any, a labeling policy has been implemented. Similarly in order to mitigate potential contractual risks, if any, negotiations for deals are recorded on a voice recording system. All key processes in treasury operations are documented and approved by the Bank's Product and Process Approval Committee. Some of the control measures include deal validation, independent confirmation, documentation, limits monitoring, treasury accounting, settlement, reconciliation and regulatory compliance. Middle office group reviews the unconfirmed, unsettled deals if any, on a regular basis and follows up for timely confirmation or settlement. There is a mechanism of escalation to senior management in case of delays in settlement or confirmation beyond a time period. In addition to the above, concurrent and internal audits are also there in respect of treasury operations. The control structure in our treasury operations is designed to minimize errors, prevent potential frauds and provide early-warning signals.

Operational Controls and Procedures in Retail Asset Operations

Retail asset operations comprise, decentralized retail asset operations and central asset operations. Activities of decentralized operations include disbursement and regular banking activities. Decentralized retail asset operations support operations relating to retail asset products across the country. Disbursements are done through automated processes like fund transfers through the National Electronic Funds Transfer system, Real Time Gross Settlement system with sufficient internal checks and controls. An independent team conducts regular banking activity, reconciliation and publishes management reports to the senior management.

The central asset operations unit is located in Mumbai while regional operations units are located at Delhi, Hyderabad and Chennai. These central and regional units support operations relating to retail asset products across the country. The central asset operations unit carries out activities like loan accounts maintenance, accounting and reconciliation, payouts and repayment management activities for all retail asset products.

Operational Controls and Procedures for Corporate Banking

Corporate banking is organized into a zonal structure. The front office is responsible for sourcing clients and performing a credit analysis of the proposal. The credit risk is independently evaluated by the Risk Management Group. Operations regarding corporate banking products and services are supported by middle office and back office with well defined process ownership. The key processes and their ownership are documented through process notes which are reviewed periodically. The middle office conducts verification and scrutiny of the documents and memos to ensure mitigation of post-approval risks. It also monitors adherence to the terms of approval by periodically publishing compliance monitoring reports. The back office in corporate operations is comprised of units responsible

for the execution of trade finance, cash management and general banking transactions based on the requests and instructions initiated through channels including branches.

Operational Controls and Procedures for Commercial Banking

Commercial banking products and services are offered through identified commercial and retail branches, which are spread across all major business centers throughout the country. The commercial branches are led by senior branch heads, who are experienced commercial bankers. The transactions initiated at the mega branches are processed by independent and centralized operation units responsible for the execution of trade finance, cash management and general banking transactions.

Operational Controls and Procedures in Rural Loan Operations

Operational controls and procedures for corporate customers in rural and agricultural banking are similar to those of other corporate customers. For other loans, duly approved disbursement requests are submitted to local operations teams where they are checked for completeness and tallied with the terms of approval, before loans are disbursed. Account reconciliation and other monitoring activities are conducted centrally by an independent team.

Anti-Money Laundering Controls

The Bank has implemented the Know Your Customer /Anti Money Laundering /Combating of Financing of Terrorism guidelines issued under the rules promulgated under Prevention of Money Laundering Act, 2002 and guidelines issued by the Reserve Bank of India from time to time.

The Bank's implementation of these guidelines includes formulation of an Anti-money Laundering Policy with the approval of the board of directors of the Bank which also covers the overseas branches/subsidiaries; oversight by the Audit Committee on the implementation of the Anti-Money Laundering framework; appointment of a senior level officer as Money Laundering Reporting Officer who has the day-to-day responsibility for implementation of the anti-money laundering framework; implementation of adequate Know Your Customer procedures based on risk categorization of customer segments, screening of names of customers with negative lists issued by the regulators and customer risk categorization for classifying the customers into high, medium and low risk segments; risk-based transaction monitoring and regulatory reporting procedures through automated applications; and appropriate mechanisms to train employees and to create customer awareness on this subject.

The Know Your Customer procedures are based on basic due diligence for low risk customers, enhanced due diligence for high risk customers and simplified due diligence for small deposit accounts in terms of the Reserve Bank of India guidelines.

The Bank also adheres to the anti-money laundering requirements as specified by the regulators of respective geographies. The Bank's anti-money laundering framework is subject to audit by the Internal Audit Department and their observations are periodically reported to the Audit Committee.

Audit

The Internal Audit Group provides independent, objective assurance on the effectiveness of internal controls, risk management and corporate governance and suggests improvements. It helps us accomplish our objectives by evaluating and improving the effectiveness of risk management, internal controls and governance processes, through a systematic and disciplined approach. The Internal Audit Group acts as an independent entity and reports to the Audit Committee of the Board.

The Internal Audit Group maintains staff with sufficient knowledge, skills, experience and professional certifications. It deploys audit resources with expertise in audit execution and adequate understanding of business activities. The

processes within Internal Audit Group are certified under ISO 9001-2008. Further, an assessment of the quality of assurance provided by the Internal Audit Group is conducted through an independent external firm once in five years.

The Internal Audit Group has adopted a risk based audit methodology in accordance with the Reserve Bank of India guidelines. The risk based audit methodology is outlined in the Internal Audit Policy approved by the Board of

Directors. An annual risk based audit plan is drawn up based on the risk based audit methodology and is approved by the Audit Committee of the Board. Accordingly, the Internal Audit Group undertakes a comprehensive audit of all branches, business groups and other functions in accordance with the risk based audit plan.

The Internal Audit Group also has a dedicated team responsible for information technology security audits. The annual audit plan covers various components of information technology including applications, databases, networks and operating systems.

The Reserve Bank of India requires banks to have a process of concurrent audits at business groups dealing with treasury functions and branches handling large volumes, to cover a minimum of 50.0% of credit, deposits and other risk exposures of the bank. Accordingly, the Internal Audit Group has formulated a strategy for concurrent audits at treasury related functions and branches. Concurrent audits are also carried out at centralized and regional processing centers and at centralized operations with a focus on areas that are identified as needing transaction testing and also to ensure existence of and adherence to internal controls.

The audit of overseas banking subsidiaries and domestic non-banking subsidiaries is carried out by a dedicated team of resident auditors attached to the respective subsidiaries. These audit teams functionally report to the Internal Audit Group. The audit of overseas branches and representative offices is carried out by audit teams consisting of auditors from India as well as a resident auditor based at the Singapore branch. International operations outsourced to India are audited by a team of auditors in India.

Legal and Regulatory Risk

We are involved in various litigations and are subject to a wide variety of banking and financial services laws and regulations in each of the jurisdictions in which we operate. We are also subject to a large number of regulatory and enforcement authorities in each of these jurisdictions. The uncertainty of the enforceability of the obligations of our customers and counter-parties, including the foreclosure on collateral, creates legal risk. Changes in laws and regulations could adversely affect us. Legal risk is higher in new areas of business where the law is often untested by the courts. We seek to minimize legal risk by using stringent legal documentation, employing procedures designed to ensure that transactions are properly authorized and consulting internal and external legal advisors. See also “Risk Factors—Risks Relating to Our Business—We are involved in various litigations. Any final judgment awarding material damages against us could have a material adverse impact on our future financial performance, our stockholders’ equity and the price of our equity shares and ADSs” and “Risk Factors—Risks relating to Our Business—The regulatory environment for financial institutions is facing unprecedented change in the post-financial crisis environment”.

Risk Management Framework for International Operations

ICICI Bank has adopted a risk management framework for its international banking operations, including overseas branches and offshore banking unit. Under the framework, the Bank’s credit, investment, asset liability management and anti-money laundering policies apply to all the overseas branches and offshore banking units, with modifications to meet local regulatory or business requirements. These modifications may be made with the approval of our Board of Directors or the committees designated by the Board of Directors. The Board of Directors/designated committee of the Board approve their respective risk management policies, based on applicable laws and regulations as well as the Bank corporate governance and risk management framework. Policies at the overseas banking subsidiaries are approved by Board of Directors of the respective subsidiaries and are framed in consultation with the related groups in the Bank. The Compliance Group plays an oversight role in respect of regulatory compliance at the overseas branches and offshore banking units. Compliance risk assessment along with the key risk indicators pertaining to our domestic and international banking operations are presented to the Risk Committee of our Board of Directors on a periodic basis. Management of regulatory compliance risk is considered as an integral component of the governance

framework at the Bank and its subsidiaries along with the internal control and enterprise-wide risk management frameworks. We have therefore adopted an appropriate framework for compliance, by formulating the Group Compliance Policy, which is approved by the Board of Directors and is reviewed from time to time. The Group Compliance Policy outlines a framework for identification and evaluation of

the significant compliance risks, on a consolidated basis, in order to assess how these risks might affect our safety and soundness.

Risk Management in Key Subsidiaries

ICICI Bank UK

ICICI Bank UK is primarily exposed to credit risk, market risk (including interest and liquidity risks), operational risk, and compliance and reputation risk. ICICI Bank UK has developed a risk management framework to ensure that the key risks are identified, understood, measured and monitored and that the policies and procedures established to measure and monitor these risks are adhered to.

The board of directors of ICICI Bank UK is responsible for oversight and control of the functioning of ICICI Bank UK and approves all major policies and procedures. The board is assisted by its sub-committees, the Audit Committee, Governance Committee, Risk Committee, and Credit Committee which have been constituted to facilitate focused oversight on various risks. Policies approved from time to time by the board/or the board's committees form the governing framework for each type of risk. Business activities are undertaken within this policy framework.

All credit-risk related issues are governed by ICICI Bank UK's Credit Risk Management Policy. ICICI Bank UK takes a two tier approach to assessment of credit risk – first review by the commercial officer proposing the transaction followed by a credit officer's independent assessment of the same. Credit risk is also managed at the portfolio level by monitoring the key parameters of risk concentration such as industry, exposures, country exposures, rating category based exposures, product specific exposures and large exposures. ICICI Bank UK has board approved policies for managing market risk such as its treasury policy manual, trading book policy statement, valuation and model validation policy. For monitoring and managing market risk, it uses various risk metrics, including the duration of equity, price value basis of one basis point, change in interest rate, price value of one basis point change in credit spread and stop loss limits. Based on the risk appetite of ICICI Bank UK, limits are placed on the risk metrics which are monitored on a periodic basis. The management of operational risk is governed by the Operational Risk Management Policy approved by the Risk Committee. Operational risk elements covered in the Operational Risk Management Policy include operational incident management, techniques for risk identification and measurement, monitoring through key risk indicators and risk mitigation techniques.

ICICI Bank Canada

ICICI Bank Canada is primarily exposed to credit risk, market risk (including interest and liquidity risks), operational risk, and compliance and reputation risk. ICICI Bank Canada has developed a risk management framework to ensure that the risks are identified, measured and monitored effectively. The framework also requires the establishment of policies and procedures to monitor and mitigate the risks.

The board of directors of ICICI Bank Canada has oversight on all risks assumed by ICICI Bank Canada. The board has established committees and assigned specific mandates to the committees for providing oversight for the various risks facing it. The policies approved by the board create the governing framework for managing various risks facing it. Business activities are undertaken within this policy framework.

The Risk Committee of the board has delegated the responsibility for credit risk management to the Management Credit Committee within the broad parameters and limits laid down in the Credit and Recovery Policy. The Management Credit Committee approves credit proposals before recommending them to Risk Committee, manages the credit risk on a portfolio basis and reviews asset quality and portfolio quality on a monthly basis.

The Risk Committee has delegated responsibility for market-risk management to the Asset Liability Committee within the broad parameters and limits laid down in the Market Risk Management Policy. The Asset Liability Committee reviews matters pertaining to Investment and Treasury operations and the implementation of risk mitigation measures and recommends major policy changes governing treasury activities to Risk Committee. Asset

Liability Committee reviews adherence to market-risk requirements of Office of the Superintendent of Financial Institutions (Canada's banking regulator), internal control guidelines and limits.

The Management Committee is responsible for managing operational risks in the day-to-day operations of ICICI Bank Canada. The Management Committee reviews the Operational Risk Management implementation and operational risk profiles on a monthly basis.

ICICI Securities Primary Dealership

ICICI Securities Primary Dealership is a primary dealer and has government of India securities as a significant proportion of its portfolio. The Corporate Risk Management Group at ICICI Securities Primary Dealership has developed comprehensive risk management policies which seek to minimize risks generated by the activities of the organization. The Corporate Risk Management Group develops and maintains models to assess market risks which are constantly updated to capture the dynamic nature of the markets and in this capacity, participates in the evaluation and introduction of new products and business activities.

ICICI Securities Primary Dealership has constituted an internal Risk Management Committee comprising its Managing Director and Chief Executive Officer and senior executives from cross-functional areas. The Committee debates various aspects of risk management and among other things decides risk and investment policies for its various businesses and ensures compliance with regulatory guidelines on risk management as well as with all the prudential and exposure limits set by the board of directors.

ICICI Prudential Life Insurance Company

The risk governance structure of ICICI Prudential Life Insurance Company consists of the Board, Board Risk Management Committee, Executive Risk Committee and its sub committees. The Board Risk Management Committee comprises non-executive directors. The board, on recommendation of Board Risk Management Committee, has approved various risk policies such as board market risk policy, board credit risk policy, board liquidity risk policy, board insurance risk policy, board operational risk policy, board reinsurance risk policy, board underwriting risk policy and board outsourcing risk policy.

The risk policies set out the governance structure for risk management in ICICI Prudential Life Insurance Company. The Executive Risk Committee, chaired by the Chief Actuary of ICICI Prudential Life Insurance Company, is responsible for assisting the board and the Board Risk Management Committee in their risk management duties and, in particular, is responsible for the approval of all new products launched by ICICI Prudential Life Insurance Company.

The Investment Risk Committee assists the Executive Risk Committee in identification, measurement, monitoring and control of market, liquidity and credit risks. This includes asset liability management through regular monitoring of the equity backing ratios and asset liability duration mismatch. ICICI Prudential Life Insurance Company has a liquidity contingency plan in place. The Insurance Risk Committee assists the Executive Risk Committee in identification, measurement, monitoring and control of insurance risks such as persistency, mortality, morbidity and expense risks.

The Operational Risk Committee assists the Executive Risk Committee in identification, measurement, monitoring and control of operational risks such as risk of loss resulting from inadequate or failed internal processes, people and systems, or from external events. The Outsourcing Committee reports to the Executive Risk Committee on management of outsourcing risk such as risk due to using the services of a third party to perform activities on a continuous basis that would have been normally undertaken by ICICI Prudential Life Insurance Company.

The risk management model of ICICI Prudential Life Insurance Company comprises a four stage continuous cycle, namely identification and assessment, measurement, monitoring and control of risks. ICICI Prudential Life Insurance Company's risk policies detail the strategy and procedures adopted to follow the risk management cycle at the enterprise level. A risk report detailing the key risk exposures faced by ICICI Prudential Life Insurance Company and mitigation measures is placed before the Board Risk Management Committee on a periodic basis.

ICICI Lombard General Insurance Company

ICICI Lombard General Insurance Company is principally exposed to risks arising out of the nature of business underwritten and credit risk on its investment portfolio as well as the credit risk it carries on its reinsurers. In respect of business risk, ICICI Lombard General Insurance seeks to diversify its insurance portfolio across product classes, industry sectors and geographical regions. ICICI Lombard General Insurance focuses on achieving a balance between the corporate and retail portfolio mix to achieve favorable claim ratio and risk diversification. ICICI Lombard General Insurance has a risk retention and reinsurance policy whereby tolerance levels are set on as per risk and on a per event basis. ICICI Lombard General Insurance also has the ability to limit its risk exposure by way of re-insurance arrangements. Investments of the company are governed by the investment policy approved by its board of directors within the norms stipulated by the Insurance Regulatory and Development Authority. The Investment Committee oversees the implementation of this policy and reviews it periodically. Exposure to any single entity is restricted to 5.0% of the portfolio and to any industry to 10.0% of the portfolio. Investments in debt instruments are restricted to instruments with a domestic credit rating of AA or higher.

Controls and Procedures

We have carried out an evaluation under the supervision and with the participation of management, including the Managing Director and Chief Executive Officer and the Executive Director and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures as defined in Rule 13a-15(e) of the Securities Exchange Act as of March 31, 2012.

As a result, it has been concluded that, as of the end of the period covered by this report, the disclosure controls and procedures were effective to provide reasonable assurance that the information required to be disclosed in the reports we file and submit under the Securities Exchange Act is recorded, processed, summarized and reported as and when required.

However, as a result of our evaluation, we noted certain areas where our processes and controls could be improved. The Audit Committee monitors the resolution of any identified significant process and control improvement opportunities through to a satisfactory conclusion. Like all financial institutions, we nevertheless believe there is room for further improvement. We are committed to continuing to implement and improve internal controls and our risk management processes, and this remains a key priority for us. We also have a process whereby business and financial officers throughout the Bank attest to the accuracy of reported financial information as well as the effectiveness of disclosure controls, procedures and processes.

There are inherent limitations to the effectiveness of any system, especially of disclosure controls and procedures, including the possibility of human error, circumvention or overriding of the controls and procedures, in a fast changing environment or when entering new areas of business or expanding geographic reach. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives.

We have experienced significant growth in a fast changing environment, and management is aware that this may pose significant challenges to the control framework. See also “Risk Factors—Risks Relating to Our Business—There is operational risk associated with financial industries which, when realized, may have an adverse impact on our business”.

Management’s Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) of the Securities Exchange Act). Our internal control system has been designed to provide reasonable assurance regarding the reliability of financial reporting and preparation and fair presentation of published financial statements and net income and stockholders' equity reconciliation statements, in accordance with respective applicable Generally Accepted Accounting Principles.

Management maintains an internal control system intended to ensure that financial reporting provides reasonable assurance that transactions are executed in accordance with the authorizations of management and directors, assets are safeguarded and financial records are reliable.

Our internal controls include policies and procedures that:

- pertain to the maintenance of records that accurately and fairly reflect in reasonable detail the transactions and dispositions of our assets;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are made only in accordance with authorizations of management and the executive directors; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements.

All internal control systems, no matter how well designed, have inherent limitations, and may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies and procedures may deteriorate.

Management assessed the effectiveness of internal control over financial reporting as of March 31, 2012 based on criteria set by the Committee of Sponsoring Organizations of the Treadway Commission in Internal Control-Integrated Framework. Based on the assessment, management concluded that our internal control over financial reporting was effective as of March 31, 2012. Effectiveness of our internal control over financial reporting as of March 31, 2012 has been audited by KPMG, an independent registered public accounting firm, as stated in their attestation report, which is included herein.

Change in Internal Control Over Financial Reporting

No change in our internal control over financial reporting occurred during the period covered by this annual report that has materially affected or is reasonably likely to materially affect our internal control over financial reporting.

Loan Portfolio

Our gross loan portfolio was Rs. 3,008.2 billion at year-end fiscal 2012, an increase of 13.8% over the gross loan portfolio of Rs. 2,643.6 billion at year-end fiscal 2011. In fiscal 2011, the gross loan portfolio increased by 13.9% to Rs. 2,643.6 billion at year-end fiscal 2011 from Rs. 2,321.4 billion at year-end fiscal 2010. At year-end fiscal 2012, approximately 64.9% of our gross loans were rupee loans.

Loan Portfolio by Categories

The following table sets forth, at the dates indicated, our gross (net of write off) rupee and foreign currency loans by business category.

At March 31,						
2008	2009	2010	2011	2012	2012	
(in millions)

(1) Includes home loans, automobile loans, commercial business loans, two-wheeler loans, personal loans, credit card receivables and farm equipment loans.

(2) Includes builder financing and dealer financing.

(3) Leasing and related activities includes leasing and hire purchase.

Our gross consumer loans and credit card receivables increased to Rs. 1,041.0 billion, constituting 34.6% of our gross loans at year-end fiscal 2012 from Rs. 911.0 billion, constituting 34.5% of our gross loans at year-end fiscal 2011. Our gross foreign currency loans increased from Rs. 900.8 billion, constituting 34.1% of our total gross loans at year-end fiscal 2011 to Rs. 1,054.5 billion, constituting 35.1% of our total gross loans at year-end fiscal 2012. Our gross foreign currency loans, in rupee terms, increased by 17.1% at year-end fiscal 2012 compared to year-end fiscal 2011. Net advances of the overseas branches of ICICI Bank (including our offshore banking unit) increased in U.S. dollar terms by 9.7% from U.S.\$ 12.4 billion at year-end fiscal 2011 to U.S.\$ 13.6 billion at year-end fiscal 2012. In rupee terms, net advances of overseas branches (including our offshore banking unit) increased by 26.0% from Rs. 551.0 billion at year-end fiscal 2011 to Rs. 694.0 billion at year-end fiscal 2012. Net advances of overseas banking subsidiaries decreased in U.S. dollar terms by 12.0% from U.S.\$ 7.5 billion at year-end fiscal 2011 to U.S.\$ 6.6 billion at year-end fiscal 2012. However, in rupee terms, net advances increased marginally by 1.5% from Rs. 332.8 billion at year-end fiscal 2011 to Rs. 337.7 billion at year-end fiscal 2012 due to rupee depreciation. See also “Operating and Financial Review and Prospects—Financial Condition—Advances”.

Consumer loans and credit card receivables in foreign currency increased from Rs. 22.0 billion at year-end fiscal 2011 to Rs. 94.2 billion at year-end fiscal 2012 primarily due to recognition of securitized insured mortgage portfolio of earlier years on adoption of International Financial Reporting Standards by ICICI Bank Canada in April 2011.

At year-end fiscal 2012, we did not have outstanding cross-border loans (defined as loans made to borrowers outside of India) exceeding 1.0% of our assets in any country except Canada, which were between approximately 2.0% and 2.5% of our assets. We had outstanding cross-border loans to U.S. borrowers amounting to between 0.25% and 0.50% of our assets.

Collateral — Completion, Perfection and Enforcement

Our loan portfolio largely consists of loans to retail customers, including home loans, automobile loans, commercial business loans, personal loans and credit card receivables, project and corporate finance and working capital loans to corporate borrowers and agricultural financing. In general, other than personal loans, credit card receivables and some forms of corporate and agricultural financing, which are unsecured, we stipulate that the loans should be over-collateralized at the time of Loan Origination. However, it should be noted that obstacles within the Indian legal system can create delays in enforcing collateral—see “Risk Factors—Risks Relating to Our Business—If we are not

able to control the level of non-performing assets in our portfolio, our business will suffer". In India, there are no regulations stipulating loan-to-collateral limits, except in the case of home loans. The Reserve Bank of India has capped the loan-to-value ratio at 90% for home loans up to Rs. 2.5 million and at 80% for home loans above Rs. 2.5 million.

Secured consumer loan portfolio

Secured consumer loans for the purchase of assets, such as mortgage loans and automobile loans are secured by the assets being financed (predominantly property and vehicles).

Depending on the type of borrower and the asset being financed, the borrower may also be required to contribute towards the cost of the asset. Accordingly, the security value is generally higher than the loan amount at the date of loan origination.

For other secured consumer loans, such as loans against property and property overdrafts, we generally require collateral of 125% of the loan amount at origination.

Commercial loans

We generally require collateral valued at 125%-150% of the loan amount at origination for commercial loans. Our commercial loans mainly consist of project and other corporate loans. The collateral are immovable assets, which are typically mortgaged in the Bank's favor, or movable assets, which are typically hypothecated in the Bank's favor. These security interests are perfected by the registration of these interests within time limits stipulated under the Companies Act with the Registrar of Companies pursuant to the provisions of the Companies Act when borrowers are constituted as companies. This registration amounts to a constructive public notice to other business entities of the security interests created by such companies. Prior to creation of security interests on all assets, which are not stock-in-trade for the company, a no-objection certificate from the income tax authorities is required to create a charge on the asset. We may also take security of a pledge of financial assets like marketable securities (for which perfection of security interests by registration with the Registrar of Companies is not mandatory for companies under the Companies Act), and obtain corporate guarantees and personal guarantees wherever appropriate. In certain cases, the terms of financing include covenants relating to sponsor shareholding in the borrower and restrictions on the sponsors' ability to sell all or part of their shareholding. Covenants involving equity shares have top-up mechanism based on price triggers. For all immovable property and shares, which are secured in favor of offshore lenders, approval from the Reserve Bank of India is obtained prior to creation.

We generally require collateral valued at 150% of the loan amounts at origination for mortgage loans to non-retail customers such as real estate companies and customers of our lease rental discounting facility. Our lease rental discounting facility is a loan facility offered to borrowers where the loans are granted against confirmed future lease rental payments to be received by the borrowers.

For working capital facilities, the current assets of borrowers are taken as collateral. Each borrower is required to declare the value of current assets periodically. The borrower's credit limit is subject to an internally approved ceiling that applies to all borrowers. We calculate a borrower's credit limits as a certain percentage of the value of the collateral, which provides the Bank with an adequate margin, should the borrower default.

Additionally, in some cases, we may take further security of a first or second charge on fixed assets, a pledge of financial assets like marketable securities, or obtain corporate guarantees and personal guarantees wherever appropriate. We also accept post dated checks and cash as additional comfort for the facilities provided to various entities.

The Bank has an internal framework for updating the collateral values of commercial loans on a periodic basis. Generally, for commercial loans, the value of moveable property held as collateral is updated annually and the value of immovable property held as collateral is updated every three years.

We have a mechanism by which we track the creation of security and follow up in case of any delay in creation of any security interest. The delays could be due to time taken for acquisition of the asset on which security interest is to be created (or completion of formalities related thereto), obtaining of requisite consents including legal, statutory or contractual obligations to obtain such consents, obtaining of legal opinions as to title and completion of necessary procedure for perfection of security in the respective jurisdictions.

We are entitled in terms of our security documents to enforce security and appropriate the proceeds towards the borrower's loan obligations without reference to the courts or tribunals unless a client makes a reference to such courts or tribunals to challenge such enforcement.

Separately, in India, foreclosure on collateral of property can be undertaken directly by lenders by fulfilling certain procedures and requirements (unless challenged in courts of law) or otherwise by a written petition to an Indian court or tribunal. An application, when made, may be subject to delays and administrative requirements that may result, or be accompanied by, a decrease in the value of the collateral. These delays can last for several years and therefore might lead to deterioration in the physical condition and market value of the collateral. In the event a corporate borrower is in financial difficulty and unable to sustain itself, it may opt for the process of voluntary winding up. In case a company becomes a sick unit, foreclosure and enforceability of collateral is stayed. In fiscal 2003, the Indian Parliament passed the Securitization and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002, as amended, which strengthened the ability of lenders to resolve non-performing assets by granting them greater rights as to enforcement of security including over immovable property and recovery of dues, without reference to the courts or tribunals. See also "Overview of the Indian Financial Sector—Recent Structural Reforms—Legislative Framework for Recovery of Debts due to Banks".

In case of consumer installment loans, we obtain direct debit mandates or post-dated checks towards repayment on pre-specified dates. Post dated checks, if dishonored entitle us on occurrence of certain events to initiate criminal proceedings against the issuer of the checks.

We recognize that our ability to realize the full value of the collateral in respect of current assets is difficult due to, among other things, delays on our part in taking immediate action, delays in bankruptcy foreclosure proceedings, defects in the perfection of collateral (including due to inability to obtain approvals that may be required from various persons, agencies or authorities) and fraudulent transfers by borrowers and other factors, including current legislative provisions or changes thereto and past or future judicial pronouncements. However, cash credit facilities are so structured that we are generally able to capture the cash flows of our customers for recovery of past due amounts. In addition, we generally have a right of set-off for amounts due to us on these facilities. Also, we regularly monitor the cash flows of our working capital loan customers so that we can take any actions required before the loan becomes impaired. On a case-by-case basis, we may also stop or limit the borrower from drawing further credit from its facility.

Loan Concentration

We follow a policy of portfolio diversification and evaluate our total financing exposure in a particular industry in light of our forecasts of growth and profitability for that industry. Our Credit Risk Management Group monitors all major sectors of the economy and specifically tracks industries in which we have credit exposures. We seek to respond to any economic weakness in an industrial segment by restricting new credits to that industry segment and any growth in an industrial segment by increasing new credits to that industry segment, resulting in active portfolio management. ICICI Bank's policy is to limit its loan portfolio to any particular industry (other than retail loans) to 15.0% of its total exposure. Between 2003 and 2006, the banking system as a whole saw significant expansion of retail credit, with retail loans accounting for a major part of overall systemic credit growth. Accordingly, during these years, we increased our financing to the retail finance segment. In view of high asset prices and the increase in interest

rates since the second half of fiscal 2008, we followed a conscious strategy of moderation of retail disbursements, especially in the unsecured retail loans segment. At the same time, there has been an increase in demand for credit from the corporate sector. Following this trend, our loans and advances to the retail finance segment constituted 37.0% of our gross loans and advances at year-end fiscal 2012 compared to 37.7% at year-end fiscal 2011 and 42.1% at year-end fiscal 2010.

Pursuant to the guidelines of the Reserve Bank of India, credit exposure of banks to an individual borrower generally must not exceed 15.0% of our capital funds, unless the exposure is in respect of an infrastructure project. Capital funds comprise Tier 1 and Tier 2 capital calculated pursuant to the guidelines of the Reserve Bank of India, under Indian GAAP. Credit exposure to individual borrowers may exceed the exposure norm of 15.0% of our capital funds by an additional 5.0% (i.e. the aggregate exposure can be 20.0%) provided the additional credit exposure is on account of infrastructure financing. Our exposure to a group of companies under the same management control generally must not exceed 40.0% of our capital funds unless the exposure is in respect of an infrastructure project. The exposure to a group of companies under the same management control, including exposure to infrastructure projects, may be up to 50.0% of our capital funds. Banks may, in exceptional circumstances, with the approval of their boards, enhance the exposure by 5.0% of capital funds (i.e., the aggregate exposure can be 20.0% of capital funds for an individual borrower and the aggregate exposure can be 45.0% of capital funds for a group of companies under the same management), making appropriate disclosures in their annual reports. Exposure for funded and non-funded credit facilities is calculated as the total committed amount or the outstanding amount whichever is higher (for term loans, as the sum of undisbursed commitments and the outstanding amount). Investment exposure is considered at book value. At year-end fiscal 2012, we were in compliance with these guidelines.

At year-end fiscal 2012, our largest non-bank borrower accounted for approximately 12.2% of our capital funds. The largest group of companies under the same management control accounted for approximately 30.3% of our capital funds.

The following table sets forth, at the dates indicated, the composition of our gross advances (net of write-offs).

	At March 31, 2008		2009		2010		2011		2012
	Amount	As a %	Amount	As a %	Amount	As a %	Amount	As a %	Amount

Net loans	Rs. 2,514,017		Rs. 2,661,305		Rs. 2,257,781		Rs. 2,560,193	

(1) Includes home loans, automobile loans, commercial business loans, two wheeler loans, personal loans, credit cards receivables, dealer funding, developer financing and overdraft products loans.

(2) Primarily includes automobiles, agriculture and allied activities, fast-moving consumer goods, gems and jewelry, manufacturing products excluding metal, textiles.

Our gross loan portfolio at year-end fiscal 2012 increased by 13.8% compared to the gross loan portfolio at year-end fiscal 2011. Retail finance was 37.0% of gross loans at year-end fiscal 2012 compared to 37.7% at year-end fiscal 2011 and 42.1% at year-end fiscal 2010. Our gross loans to the services – non-finance sector as a percentage of gross loans were 7.8% at year-end fiscal 2012 compared to 8.8% at year-end fiscal 2011. Our gross loans to the road, port, telecom, urban development & other infrastructure sector as a percentage of gross loans were 6.6% at year-end fiscal 2012 compared to 5.8% at year-end fiscal 2011, primarily due to increase in loans to road sector. Our gross loans to the power sector as a percentage of gross loans was 5.1% at year-end fiscal 2012 compared to 4.2% at year-end fiscal 2011.

At year-end fiscal 2012, our twenty largest borrowers accounted for approximately 14.3% of our gross loan portfolio, with the largest borrower accounting for approximately 1.6% of our gross loan portfolio. The largest group of companies under the same management control accounted for approximately 4.9% of our gross loan portfolio.

Geographic Diversity

Our portfolios are geographically diversified. The state of Maharashtra accounted for the largest proportion of our domestic gross loans outstanding at year-end fiscal 2012.

Directed Lending

The Reserve Bank of India requires banks to lend to certain sectors of the economy. Such directed lending comprises priority sector lending and export credit.

Priority Sector Lending

The Reserve Bank of India guidelines on priority sector lending require banks to lend 40.0% of their adjusted net bank credit, or the credit equivalent amount of off-balance sheet exposure, whichever is higher, to fund certain types of activities carried out by specified borrowers. The definition of adjusted net bank credit includes certain investments and is computed with reference to the outstanding amount at March 31 of the previous year. The priority sector includes the agricultural sector, food and agri-based industries, small enterprises/businesses, housing finance up to certain limits and borrowers belonging to weaker sections of society. Out of the 40.0%, banks are required to lend a minimum of 18.0% of their adjusted net bank credit to the agriculture sector and the balance to certain specified sectors. Banks are also required to lend 10.0% of their adjusted net bank credit, or the credit equivalent amount of off-balance sheet exposure, whichever is higher, to the weaker sections of society as defined by Reserve Bank of India guidelines.

When granting its approval for the amalgamation of ICICI Limited and ICICI Bank Limited, the Reserve Bank of India stipulated specific requirements for the Bank since the loans of the former ICICI Limited transferred to us were not subject to the priority sector lending requirement. Starting in fiscal 2013, the targets for ICICI Bank will be on par with other banks.

ICICI Bank is required to comply with the priority sector lending requirements at the last 'reporting Friday' of each fiscal year. At March 23, 2012, the last reporting Friday for fiscal 2012, ICICI Bank's priority sector lending was Rs. 614.1 billion, constituting about 95.0% of the target. At that date, the qualifying agriculture loans were Rs. 175.6 billion constituting about 75.0% of the target. ICICI Bank's loans to the weaker sections of society were Rs. 42.2 billion constituting about 39.0% of the target. The shortfall in the amount required to be lent to the priority sectors and weaker sections may be required to be deposited with government sponsored Indian development banks like the National Bank for Agriculture and Rural Development, the Small Industries Development Bank of India and the National Housing Bank. These deposits have a maturity of up to seven years and carry interest rates lower than

market rates. At year-end fiscal 2012, our total investment in such bonds was Rs. 181.0 billion. See also “Supervision and Regulation—Directed Lending—Priority Sector Lending”.

The following table sets forth ICICI Bank’s priority sector loans, classified by the type of borrower, at the last reporting Friday of fiscal 2012.

			At March 23, 2012			
	Amount		% of total		%	
	(in billion, except percentages)		priority		of adjusted	
			sector		net bank	
			lending		credit	
Agricultural sector(1)	Rs. 175.6	US\$3.5	28.6	%	10.4	%
Small enterprises(2)	203.4	4.0	33.1		12.1	
Others including residential mortgage less than Rs. 2 million	235.1	4.6	38.3		14.0	
Total	Rs. 614.1	US\$ 12.1	100.0	%	36.5	%

(1) Includes direct agriculture lending of Rs. 126.4 billion constituting 7.5% of our adjusted net bank credit against the requirement of 10.5%.

(2) Small enterprises include enterprises engaged in manufacturing/processing and whose investment in plant and machinery does not exceed Rs. 50 million and enterprises engaged in providing/rendering of services and whose investment in equipment does not exceed Rs. 20 million.

Export Credit

As part of directed lending, the Reserve Bank of India also requires banks to make loans to exporters at concessional rates of interest. Export credit is provided for pre-shipment and post-shipment requirements of exporter borrowers in rupees and foreign currencies. At least 12.0% of a bank’s adjusted net bank credit is required to be in the form of export credit. This requirement is in addition to the priority sector lending requirement but credits extended to exporters that are small scale industries or small businesses may also meet part of the priority sector lending requirement. The Reserve Bank of India provides export refinancing to banks for an eligible portion of total outstanding export loans in rupee in line with the prevalent Reserve Bank of India guidelines in India as amended from time to time. The interest income earned on export credits is supplemented through fees and commissions earned from these exporter customers from other fee-based products and services taken by them from us, such as foreign exchange products and bill handling. At March 30, 2012 (the last Friday of March 2012), ICICI Bank’s export credit was Rs. 24.5 billion, which amounted to 1.5% of our adjusted net bank credit.

Loan Pricing

As required by the Reserve Bank of India guidelines effective July 1, 2010, ICICI Bank prices its loans with reference to a base rate, called the ICICI Bank Base Rate. The Asset Liability Management Committee sets the ICICI Bank Base Rate based on ICICI Bank’s current cost of funds, likely changes in the Bank’s cost of funds, market rates, interest rate outlook and other systemic factors. Pricing for floating rate fresh approvals and renewal of rupee facilities are linked to the ICICI Bank Base Rate and comprise the ICICI Bank Base Rate, transaction-specific credit and other charges. The Reserve Bank of India has also stipulated that a bank’s lending rates for rupee loans cannot be lower than its base rate, except for certain categories of loans as may be specified by the Reserve Bank of India from time to time.

ICICI Bank has set its base rate at 9.75% per annum payable monthly, effective April 23, 2012. As prescribed in the guidelines of the Reserve Bank of India, existing borrowers have an option to migrate to the base rate mechanism. All loans approved before July 1, 2010, and where the borrowers choose not to migrate to the base rate mechanism, would continue to be based on the earlier benchmark rate regimes.

Classification of Loans

We classify our assets, including those in our overseas branches, as performing and non-performing in accordance with the Reserve Bank of India's guidelines except in the case of ICICI Home Finance Company and our overseas banking subsidiaries. ICICI Home Finance Company classifies its loans and other credit facilities as

per the guidelines of its regulator, the National Housing Bank. A loan made by any of our overseas banking subsidiaries is classified as impaired only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition on the loan (a loss event) and that loss event has an impact on the estimated future cash flows of the loan that can be reliably estimated. Under the Reserve Bank of India guidelines, an asset is classified as non-performing if any amount of interest or principal remains overdue for more than 90 days in respect of term loans. In respect of overdraft or cash credit, an asset is classified as non-performing if the account remains out of order for a period of 90 days and, in respect of bills, if the account remains overdue for more than 90 days. Further, non-performing assets are classified into sub-standard, doubtful and loss assets based on the criteria stipulated by the Reserve Bank of India. The Reserve Bank of India has separate guidelines for restructured loans. See below “—Restructured Loans”.

The classification of assets in accordance with the Reserve Bank of India guidelines is detailed below.

Standard assets:	Assets that do not disclose any problems or which do not carry more than normal risk attached to the business are classified as standard assets.
Sub-standard assets:	Sub-standard assets comprise assets that are non-performing for a period not exceeding 12 months.
Doubtful assets:	Doubtful assets comprise assets that are non-performing for more than 12 months.
Loss assets:	Loss assets comprise assets (i) the losses on which are identified or (ii) that are considered uncollectible.

Our non-performing assets include loans and advances as well as credit substitutes, which are funded credit exposures. In compliance with regulations governing the presentation of financial information by banks, we report only non-performing loans and advances in our financial statements.

See also “Supervision and Regulation—Reserve Bank of India Regulations—Loan Loss Provisions and Non-Performing Assets—Asset Classification”.

Restructured Loans

The Reserve Bank of India has separate guidelines for restructured loans. A fully secured standard loan (other than to the real estate sector) can be restructured by the rescheduling of principal repayments and/or the interest element, but must be separately disclosed as a restructured loan in the year of restructuring. We continue to classify these loans as restructured until they complete one year of payment in accordance with the restructured terms. The diminution in the fair value of the loan, if any, measured in present value terms, is either written off or provision is made to the extent of the diminution involved. For restructured loans, provisions are made in accordance with the guidelines issued by the Reserve Bank of India, which require that the difference between the fair value of the loan before and after restructuring be provided at the time of restructuring. There are certain conditions stipulated by the Reserve Bank of India for continuing to classify a restructured standard loan as a standard asset.

Similar guidelines apply to sub-standard and doubtful loans. The sub-standard and doubtful loans which have been subjected to restructuring, whether in respect of principal installment or interest amount, are eligible to be upgraded to the standard category only after the specified period, i.e., a period of one year after the date when first payment of interest or of principal, whichever is earlier, falls due, subject to satisfactory performance during the period.

From December 2008, the Reserve Bank of India permitted banks to restructure loans classified as real estate exposures, up to June 30, 2009 while maintaining these loans as standard loans. Similarly, banks were also permitted

to undertake, for loans that were previously restructured, a second restructuring without downgrading the loan to the non-performing category, up to June 30, 2009. The Reserve Bank of India also permitted banks to restructure as standard loans all eligible loans which meet the basic criteria for restructuring, and which were

classified as standard at September 1, 2008, irrespective of their subsequent asset classification. This was subject to the receipt by banks of an application from the borrower for restructuring the advance on or before March 31, 2009 and implementing the restructuring package within 120 days from the date of receipt of the application.

Provisioning and Write-Offs

We make provisions in accordance with the Reserve Bank of India's guidelines. The Reserve Bank of India guidelines do not specify the conditions under which assets may be written-off. The Bank has internal policies for writing-off non performing loans against loan loss allowances. See also "Supervision and Regulation—Reserve Bank of India Regulations—Loan Loss Provisions and Non-Performing Assets—Provisioning and Write-offs". The Reserve Bank of India guidelines on provisioning are as described below.

Standard assets: The allowances on the performing portfolios are based on guidelines issued by the Reserve Bank of India. Until November 2008, a general provision ranging from 0.25% to 2.0% was required across various portfolios of standard loans. In November 2008, the Reserve Bank of India changed the provisioning requirement for standard assets to a uniform rate of 0.4% for all standard assets except direct advances to agricultural and the small and medium enterprise sectors, which continued to attract a provisioning requirement of 0.25%. The revised standards were effective prospectively, but the existing provisions held by banks could not be reversed. In November 2009, the Reserve Bank of India increased the provisioning requirement for standard assets in the commercial real estate sector to 1.0%. In March 2010, the Reserve Bank of India increased the standard asset provisioning requirement to 1.0% on (i) loans for infrastructure projects where the date of commencement of commercial operation has been extended beyond two years, for the extended period beyond the two years; and (ii) for non-infrastructure loans where the date of commencement of commercial operations has been extended beyond six months from the original date of commencement of commercial operation, for the extended period beyond the six months. In July 2010, the Reserve Bank of India clarified that standard advances to medium-sized enterprises would attract a provisioning requirement of 0.40%. From December 2010, the Reserve Bank of India increased the standard asset provisioning requirement to 2.0% on housing loans, where such loans are made at comparatively lower interest rates for the first years of the loan, after which the rates are reset at higher rates.

In May 2011, the Reserve Bank of India increased the provisioning requirement for restructured accounts classified as standard advances from 0.4% to 2.0% in the first two years from the date of restructuring. In accounts where there is a moratorium on payment of interest/principal after restructuring, the provisioning requirement for standard assets has been increased to 2.0% for the period covering the moratorium and two years thereafter. Similarly, restructured accounts classified as non-performing advances when upgraded to the standard category have a provisioning requirement of 2.0% in the first year from the date of upgradation.

Sub-standard assets: Effective May 2011 a provision of 15.0% is required for all sub-standard assets as compared to the previous requirement of 10.0%. An additional provision of 10.0% is required for accounts that are unsecured. Unsecured infrastructure loan accounts classified as sub-standard require provisioning of 20.0%.

Doubtful assets:	A 100.0% provision/write-off is required against the unsecured portion of a doubtful asset and is charged against income. With effect from fiscal 2012, for the secured portion of assets classified as doubtful, a 25.0% provision is required for assets that have been classified as doubtful for a year (compared to 20.0% through fiscal 2011), a 40.0% provision is required for assets that have been classified as doubtful for one to three years (compared to a 30.0% provision was required through fiscal 2011) and a 100.0% provision is required for assets classified as doubtful for more than three years. The value assigned to the collateral securing a loan is the amount reflected on the borrower's books or the realizable value determined by third party appraisers.
Loss assets:	The entire asset is required to be written off or provided for.
Restructured loans:	<p>Until August 27, 2008, a provision equal to the difference between the present value of the future interest as per the original loan agreement and the present value of future interest on the basis of rescheduled terms at the time of restructuring, was required to be made.</p> <p>For loans restructured after August 27, 2008, a provision equal to the difference between the fair value of the loan before and after restructuring is required to be made. The fair value of the loan before restructuring is computed as the present value of cash flows representing the interest at the existing rate charged on the loan before restructuring and the principal. The fair value of the loan after restructuring is computed as the present value of cash flows representing the interest at the rate charged on the loan on restructuring and the principal. Both sets of cash flows are discounted by the bank's Benchmark Prime Lending Rate as on the date of restructuring plus the appropriate term premium and credit risk premium for the borrower category on the date of restructuring. From June 30, 2010 the discount rate is computed as the sum of the ICICI Base Rate, the appropriate term premium and the credit risk premium for the borrower category on the date of restructuring.</p>

In its mid-term review of policy statement for fiscal 2009, the Reserve Bank of India required banks to increase the total provisioning coverage ratio, including floating provisions, to 70.0% in a phased manner. In its clarification on the same, the Reserve Bank of India allowed banks' prudential/technical write-off to be added to both the gross non-performing assets and the provisions held in the calculation of provisioning coverage ratio. In April 2011, the Reserve Bank of India stipulated that banks would be required to maintain their provisioning coverage ratios with reference to their gross non-performing assets position as of September 30, 2010 and not on an ongoing basis with reference to their gross non-performing assets at subsequent dates.

Our Policy

ICICI Bank provides for non-performing corporate loans in line with the Reserve Bank of India guidelines. ICICI Bank provides for non-performing consumer loan at the borrower levels in accordance with provisioning policy of ICICI Bank, subject to minimum provision requirements set by the Reserve Bank of India. Loss assets and the unsecured portion of doubtful assets are fully provided for or written off. The Bank holds specific provisions against non-performing loans, general provision against performing loans and floating provision taken over from the former the Bank of Rajasthan upon amalgamation.

For restructured loans, provisions are made in accordance with the guidelines issued by the Reserve Bank of India. The Bank's provisioning coverage ratio at March 31, 2012 computed as per the Reserve Bank of India guidelines

mentioned above was 80.4%.

84

Impact of Economic Environment on Commercial and Consumer Loan Borrowers

In the late 1990s, increased domestic competition due to the opening up of the Indian economy, high levels of debt relative to equity and a downturn in the commodities markets globally led to stress on the operating performance of Indian businesses, impairment of a significant amount of assets in the financial system and approval of restructuring programs for a large number of companies. This led to an increase in the level of restructured and non-performing loans in the Indian financial system, including our loans, from fiscal 2001 to fiscal 2004. While restructured and non-performing loans subsequently declined, the deterioration in the global economic environment during fiscal 2009, in particular following the bankruptcy of Lehman Brothers in September 2008, adversely impacted the operations of several Indian companies. Indian businesses were impacted by the lack of access to financing/refinancing from global debt capital markets, losses on existing inventories due to the sharp decline in commodity prices, reduction in demand for and prices of output and reduction in cash accruals and profitability. This led to additional restructuring of loans in the Indian banking system, including us in fiscal 2009 and fiscal 2010.

From fiscal 2002, we rapidly grew our consumer loans and credit card receivables portfolio based on the untapped potential in residential mortgages and other retail credit products in the Indian market. These included credit cards and unsecured personal loans. The Indian retail credit market expanded rapidly from fiscal 2002 to fiscal 2007 driven by growth in household incomes, decline in interest rates and increased availability of retail credit. Since fiscal 2007, the retail credit market has slowed down significantly following increases in systemic interest rates and home prices, which reduced affordability for borrowers. During fiscal 2008 and fiscal 2009, we experienced an increase in non-performing loans in our consumer loans and credit card receivables portfolio. The primary reasons for this increase were the seasoning of the overall portfolio and the increase in defaults on the unsecured personal loans and credit card receivables due to challenges in collections and deterioration in the macroeconomic environment. While additions to gross non-performing assets in our retail portfolio remained at a high level in fiscal 2010, we experienced a sharp decline in net additions to gross retail non-performing loans in fiscal 2011 and fiscal 2012, due to the measures initiated by the Bank to curb delinquencies and improve collection practices from the second half of fiscal 2009. These measures include strengthening loan eligibility requirements for retail loans, reducing emphasis on unsecured lending and realigning credit limits for certain credit card holders. The Bank improved its collection practices by integrating collections across products and using technology more efficiently. In addition, the Bank increased its customer-facing call center operations, its interactions through local dialects and regional languages and its use of early reminders of the amounts due by the borrowers. The Bank resolves disputed claims of certain delinquent borrowers through alternative dispute resolution techniques such as mediation and through centralization of certain legal processes.

During fiscal 2012, there was a moderation in economic activity in India and an increase in interest rates following continued inflation concerns. Further, volatility in capital markets due to global and domestic concerns limited the ability of corporations to access capital markets. In addition, banks, including us, restructured a portion of their loans to micro-finance institution. As a result of the above, there has been an increase in restructured loans for the banking system in fiscal 2012, including for us. See also “Risk Factors—Risks Relating to Our Business—If we are not able to control the level of non-performing assets in our portfolio, our business will suffer” and “Business—Strategy”.

Various factors, including a rise in unemployment, prolonged recessionary conditions, our regulators’ assessment and review of our loan portfolio, a sharp and sustained rise in interest rates, developments in the global and Indian economy, movements in global commodity markets and exchange rates and global competition could cause a further increase in the level of non-performing assets on account of retail and other loans and have a material adverse impact on the quality of our loan portfolio. See also “Risk Factors—Risks Relating to Our Business—If we are not able to control the level of non-performing assets in our portfolio, our business will suffer” and “Business—Strategy”.

Restructured Loans

The following table sets forth, at the dates indicated, our gross standard restructured rupee and foreign currency loan portfolio by business category.

(1) Others primarily include construction and real estate.

A fully secured standard loan can be restructured by rescheduling principal repayments and/or the interest on the loan, but must then be separately disclosed as a restructured loan in the year of restructuring. There are certain conditions stipulated by the Reserve Bank of India in order to continue to classify a restructured standard loan as a standard asset. The restructured loans continue to be classified as such until they complete one year of payment in accordance with the restructured terms.

During fiscal 2012, loans amounting to Rs. 35.1 billion were restructured as compared to Rs. 12.2 billion in fiscal 2011, primarily due to restructuring of loans to microfinance institutions and certain corporations during fiscal 2012.

During fiscal 2012, there was a moderation in economic activity in India and an increase in interest rates following continued inflation concerns. Further, volatility in capital markets due to global and domestic concerns limited the ability of corporations to access capital markets. In addition, banks including us, restructured a portion of their loans to micro-finance institution. As a result of the above, there has been an increase in restructured loans for the banking system in fiscal 2012, including for us. No loans were restructured second time during fiscal 2012. After restructuring, based on the satisfactory performance of the borrower over a period of time, the restructured account is upgraded and removed from this category. During fiscal 2012, based on payment performance the Bank upgraded certain borrower accounts totaling Rs. 4.1 billion, as compared to Rs. 42.3 billion during fiscal 2011. The gross restructured loans increased by 125.8% from Rs. 20.5 billion at year-end fiscal 2011 to Rs. 46.4 billion at year-end fiscal 2012, while the net restructured loans increased by 113.9% from 19.6 billion at year-end 2011 to Rs. 41.9 billion at year-end fiscal 2012. The net restructured loans were 1.2% as a percentage of net customer assets at year-end fiscal 2012, compared to 0.6% at year-end fiscal 2011. At year-end fiscal 2012, the diminution in fair value of restructured loans (including the provision for funded interest) was Rs. 4.4 billion as against Rs. 0.9 billion at year-end fiscal 2011. See also “Risk Factors—Risks Relating to Our Business—The level of restructured loans in our portfolio may increase and the failure of our restructured loans to perform as expected could affect our business”.

- (1) Includes loans identified as impaired in accordance with guidelines issued by regulators of the respective subsidiaries.
- (2) For “Consumer loans” in fiscal 2008 and 2009, the difference between the opening and closing balances of non-performing assets is included in addition to gross non-performing assets on a net basis, except with respect to accounts written-off during the year, which are included in the “Write-offs” row. From fiscal year-end 2010 onwards, for “Consumer loans”, the difference between the opening and closing balances has been further bifurcated into additions, upgradations and recoveries made during the year. For “Credit card receivables” in all years displayed, the difference between the opening and closing balances of non-performing assets is included in additions to gross non-performing assets on a net basis, except with respect to accounts written-off during the year, which are included in the “Write-offs” row.
- (3) Includes home loans, automobile loans, commercial business loans, two-wheeler loans, personal loans, credit card receivables and farm equipment loans.
- (4) Represents accounts that were previously classified as non-performing but have been upgraded to performing.
- (5) Includes working capital finance.

Gross additions to non-performing assets in fiscal 2012 were marginally higher at Rs. 35.8 billion as compared to Rs. 33.1 billion in fiscal 2011. During fiscal 2012, we upgraded non-performing assets amounting to Rs. 8.4 billion and made recoveries against non-performing assets amounting to Rs. 19.5 billion. During fiscal 2012, loans amounting to Rs. 12.3 billion were written-off as compared to Rs. 1.9 billion in fiscal 2011. As a result, gross non-performing assets decreased by 4.0% from Rs. 111.6 billion at year-end fiscal 2011 to Rs. 107.1 billion at year-end fiscal 2012.

We experienced an increase in non-performing assets in our consumer loans portfolio in fiscal 2009 due to the seasoning of the portfolio and a higher level of defaults in unsecured personal loans and credit card receivables due to challenges in collections and the impact of the adverse macroeconomic environments. While additions to gross non-performing assets in our consumer loans remained high in fiscal 2010, we experienced a sharp decline in additions to gross non-performing consumer loans in fiscal 2011 and fiscal 2012, due to the measures initiated by the Bank to curb delinquencies and improved collection practices. See also “Business—Classification of Loans— Impact of Economic Environment on Commercial and Consumer Loan Borrowers—Non-performing Assets”. Gross additions to non-performing consumer loans, which were Rs. 55.8 billion in fiscal 2010, declined sharply to Rs. 18.5 during fiscal 2011 and remained at similar level of Rs. 18.6 billion in fiscal 2012. Gross additions to non-performing commercial loans increased from Rs. 14.6 billion in fiscal 2011 to Rs. 17.2 billion in fiscal 2012. See also “Business—Classification of Loans— Impact of Economic Environment on Commercial and Consumer Loan Borrowers—Non-Performing Assets”.

As a percentage of net customer assets, net non-performing assets were 0.8% at year-end fiscal 2012, compared to 1.1% at year-end fiscal 2011.

The following table sets forth, at the dates indicated, gross (net of write-offs) non-performing assets by borrowers’ industry or economic activity and as a percentage of total non-performing assets.

	At March 31, 2008		2009		2010		2011		2012		As a percentage of non- performing Amount assets

(1) Includes home loans, automobile loans, commercial business loans, two-wheeler loans, personal loans, credit card receivables, retail overdraft loans, dealer funding and developer financing.

(2) Other industries primarily include construction, manufacturing products excluding metal, crude petroleum, drugs and pharmaceuticals, gems & jewelry, fast-moving consumer goods, mining, and other agriculture and allied activities.

Non-Performing Asset Strategy

In respect of unviable non-performing assets, where companies have lost financial viability, we adopt an aggressive approach aimed at out-of-court settlements, enforcing collateral and driving consolidation. Our focus is on time value of recovery and a pragmatic approach towards settlements. The collateral against our loan assets is the critical factor towards the success of our recovery efforts. In addition, we continually focus on proactive management of accounts under supervision. Our strategy constitutes a proactive approach towards identification, aimed at early stage solutions to incipient problems.

Our strategy for resolution of non-performing assets includes sales of financial assets to asset reconstruction companies in exchange for receipt of securities in the form of pass-through instruments issued by asset reconstruction companies, wherein payments to holders of the securities are based on the actual realized cash flows from the transferred assets. Under Indian GAAP, these instruments are valued at the net asset values as declared by the asset reconstruction companies in accordance with the Reserve Bank of India guidelines. Under U.S. GAAP, the assets we

sell in exchange for security receipts are not accounted for as sales either because transfers do not qualify for sale accounting under FASB ASC Topic 860, “Transfers and servicing” or transfers qualify for sale accounting but were impacted by FASB ASC Subtopic 810-10, “Consolidation – overall” whereby, because the Bank is the ‘primary beneficiary’ of certain of these funds/trusts, it is required under U.S. GAAP to consolidate these entities. These assets are considered restructured assets under U.S. GAAP. See also “Supervision and Regulation—Reserve Bank of India Regulations—Regulations relating to Sale of Assets to Asset Reconstruction Companies”. In fiscal 2010, we sold Rs. 7.6 billion of net non-performing assets to asset reconstruction companies which primarily included mortgage loans and small value personal loans and vehicle loans and in fiscal 2011, we sold fully written off credit card receivables. During fiscal 2012, we sold Rs. 0.04 billion of our net non-performing assets to asset reconstruction companies. At year-end fiscal 2012, we had an outstanding net investment of Rs. 18.3 billion in security receipts issued by asset reconstruction companies in relation to sales of our non-performing assets.

We monitor migration of the credit ratings of our borrowers to enable us to take proactive remedial measures to prevent loans from becoming non-performing. We review the industry outlook and analyze the impact of changes in the regulatory and fiscal environment. Our periodic review system helps us to monitor the health of accounts and to take prompt remedial measures.

Secured loans to retail customers are secured by first and exclusive liens on the assets financed (predominantly property and vehicles). We are entitled in terms of our security documents to repossess security comprising assets such as plant, equipment and vehicles without reference to the courts or tribunals unless a client makes a reference to such courts or tribunals to stay our actions. In respect of our retail loans, we adopt a standardized collection process to ensure prompt action for follow-up on overdue loans and recovery of defaulted amounts.

We generally stipulate that corporate loans should be over-collateralized at the date of the loan's origination. However, recoveries may be subject to delays of up to several years, due to the long legal process in India. This leads to delay in enforcement and realization of collateral. We may also take as security a pledge of financial assets, including marketable securities, and obtain corporate guarantees and personal guarantees wherever appropriate. In certain cases, the terms of financing include covenants relating to sponsors' shareholding in the borrower and restrictions on the sponsors' ability to sell all or part of their shareholding. Covenants involving equity shares have top-up mechanism based on price triggers. We maintain the non-performing assets on our books for as long as the enforcement process is ongoing. Accordingly, a non-performing asset may continue for a long time in our portfolio until the settlement of loan account or realization of collateral, which may be longer than that for U.S. banks under similar circumstances. See also "—Loan portfolio—Collateral—Completion, Perfection and Enforcement".

Provision for Loan Losses

The following table sets forth, at the periods indicated, the provisions for our non-performing asset portfolio.(1)

	2008	2009	At March 31, 2010	2011	2012
	Rs. in million				
A. Consumer loans & credit card receivables(2),(3)					
Aggregate provision for loan losses at the beginning of the year	Rs. 15,964	Rs. 31,003	Rs. 40,674	Rs. 42,087	Rs. 56,507
Add: Provision made during the year	15,039	30,924	36,028	19,696	13,839
Less: Provision utilized for write-off	–	(21,253)	(33,470)	(617)	(6,638)
Less: Write-back of excess provision	–	–	(1,145)	(4,659)	(6,780)
Aggregate provision for loan losses at the end of the year	Rs. 31,003	Rs. 40,674	Rs. 42,087	Rs. 56,507	Rs. 56,928
B. Commercial, (4)					
Aggregate provision for loan losses at the beginning of the year	Rs. 5,677	Rs. 9,373	Rs. 11,654	Rs. 16,834	Rs. 22,838
Add: Provision made during the year	4,615	5,155	8,617	9,466	8,548
Less: Provision utilized for write-off	(412)	(1,965)	(636)	(759)	(4,930)
Less: Write-back of excess provision	(507)	(909)	(2,801)	(2,703)	(3,604)
Aggregate provision for loan losses at the end of the year	Rs. 9,373	Rs. 11,654	Rs. 16,834	Rs. 22,838	Rs. 22,852
C. Leasing and related activities					
Aggregate provision for loan losses at the beginning of the year	Rs. 103	Rs. 198	Rs. 252	Rs. 162	Rs. 156
Add: Provision made during the year	96	54	–	80	–
Less: Provision utilized for write-off	–	–	–	–	–
Less: Write-back of excess provision	(1)	(0)	(90)	(86)	(61)

Aggregate provision for loan losses at the end of the year	Rs. 198	Rs. 252	Rs. 162	Rs. 156	Rs. 95
D. Total provision (A+B+C)					
Aggregate provision for loan losses at the beginning of the year	Rs. 21,744	Rs. 40,574	Rs. 52,580	Rs. 59,083	Rs. 79,501
Add: Provision made during the year	19,750	36,133	44,645	29,242	22,387
Less: Provision utilized for write-off	(412)	(23,218)	(34,106)	(1,376)	(11,568)
Less: Write-back of excess provision	(508)	(909)	(4,036)	(7,448)	(10,445)
Aggregate provision for loan losses at the end of the year	Rs. 40,574	Rs. 52,580	Rs. 59,083	Rs. 79,501	Rs. 79,875

- (1) Includes loans identified as impaired in line with the guidelines issued by regulators of the respective subsidiaries.
- (2) For “Consumer loans” in fiscal 2008 and 2009, the difference between the opening and closing balances of aggregate provision for loan losses is included in “Add: Provision made during the year” on a net basis, except with respect to accounts written-off during the year, which are included in the “Less: Provision utilized for write-off” row. From fiscal year-end 2010 onwards, for “Consumer loans”, the difference between the opening and closing balances has been further bifurcated into additions, write-offs and writeback of excess provision made during the year. For “Credit card receivables” in all years displayed, the difference between the opening and closing balances of aggregate provision for loan losses is included in “Add: Provision made during the year” on a net basis, except with respect to accounts written-off during the year, which are included in the “Less: Provision utilized for write-off” row.
- (3) Includes home loans, automobile loans, commercial business loans, two-wheeler loans, personal loans, credit card receivables and farm equipment loans.
- (4) Includes working capital finance.

During fiscal 2012, provision for non-performing assets, net of write-back of excess provision, decreased from Rs. 21.8 billion in fiscal 2011 to Rs. 11.9 billion in fiscal 2012. We experienced an increase in non-performing consumer loans since fiscal 2008 due to the seasoning of the portfolio and a higher level of defaults in unsecured personal loans and credit card receivables due to challenges in collections and the impact of the adverse macroeconomic environments. While additions to gross non-performing consumer loans remained high in fiscal 2010, we experienced a sharp decline in additions to gross non-performing consumer loans in fiscal 2011 and fiscal 2012, due to the measures initiated by the Bank to curb delinquencies and improved collection practices. See also “Business—Classification of Loans— Impact of Economic Environment on Commercial and Consumer Loan Borrowers—Non-performing Assets”. This resulted in a decline in provisions, net of write-back of excess provision, against non-performing consumer loans from Rs. 15.0 billion in fiscal 2011 to Rs. 7.1 billion in fiscal 2012. Provision for non-performing commercial assets, net of write-back of excess provision, decreased from Rs. 6.8 billion in fiscal 2011 to Rs. 4.9 billion in fiscal 2012.

Potential problem loans

When management has doubts as to a borrower’s ability to comply with loans’ repayment terms, the Bank considers these loans as potential problem loans. At March 31, 2012, the Bank had Rs. 16,981.0 million in potential problem loans, which were not classified as non-performing or restructured assets. We closely monitor these loans and the borrowers of these loans for compliance with the loan repayment terms. We also similarly monitor past-due loans and below-investment grade loans, as discussed in Schedule 18B of the consolidated financial statements.

Subsidiaries, Associates and Joint Ventures

The following table sets forth certain information relating to our subsidiaries, associates and joint ventures at March 31, 2012.

Name	Year of formation	Activity	Ownership interest	Total income(1) (in millions, except percentages)	Net worth(2)	Total Assets(3)

-
- (1) Total income represents gross income from operations and other income.
- (2) Net worth represents share capital, share application money and reserves and surplus.
- (3) Total assets represent fixed assets, advances, investments and gross current assets (including cash and bank balances).
- (4) The financial statements of these jointly controlled entities have been consolidated as per AS 21 on “Consolidated Financial Statements” consequent to the limited revision to AS 27 on “Financial Reporting of Interests in Joint Ventures”.
- (5) The entity has been consolidated as per the proportionate consolidation method as prescribed by AS 27 on “Financial Reporting of Interests in Joint Ventures”.
- (6) ICICI Prudential Pension Funds Management Company Limited is a wholly owned subsidiary of ICICI Prudential Life Insurance Company Limited.

The following table sets forth certain information on other significant entities whose results were included in the consolidated financial statements under Indian GAAP at March 31, 2012. During fiscal 2012, I-Solutions Providers (India) Private Limited was amalgamated with I-Process Services (India) Private Limited and accordingly ceased to

be a consolidating entity. During fiscal 2012, Prize Petroleum Company Limited ceased to be a consolidating entity as our stake in this entity has been divested. Accordingly, these entities are not included in the table.

Name	Year of formation	Activity	Ownership interest	Total income(1) (in millions, except percentages)	Net worth(2)	Total Assets(3)

- (1) Total income represents gross income from operations and other income.
- (2) Net worth represents share capital/unit capital (in case of venture capital funds) and reserves and surplus.
- (3) Total assets represent fixed assets, advances, and investments and gross current assets (including cash and bank balances).
- (4) These entities have been accounted in accordance with the equity method as prescribed by AS 23 on 'accounting for investments in associates in consolidated financial statements'.

At year-end fiscal 2012, all of our subsidiaries and joint ventures were incorporated in India, except the following seven companies:

- ICICI Securities Holdings Inc., incorporated in the United States;
- ICICI Securities Inc., incorporated in the United States;
- ICICI Bank UK PLC (formerly ICICI Bank UK Limited), incorporated in the United Kingdom;
 - ICICI Bank Canada, incorporated in Canada;

- ICICI Bank Eurasia Limited Liability Company, incorporated in Russia;
- ICICI International Limited, incorporated in Mauritius; and
- TCW/ICICI Investment Partners Limited, incorporated in Mauritius.

ICICI Securities Holdings Inc. is a wholly owned subsidiary of ICICI Securities Limited and ICICI Securities Inc. is a wholly owned subsidiary of ICICI Securities Holdings Inc. ICICI Securities Holdings Inc. and ICICI Securities Inc. are consolidated in ICICI Securities Limited's financial statements. ICICI International Limited holds a 50.0% stake in TCW/ICICI Investment Partners Limited.

Technology

We continue to endeavor to be at the forefront of usage of technology in the financial services sector. We strive to use information technology as a strategic tool for our business operations, to gain a competitive advantage and to improve our overall productivity and efficiency. Our technology initiatives are aimed at enhancing value, offering customers greater convenience and improved service levels while optimizing costs. Our focus on technology emphasizes:

- Electronic and online channels to:
 - offer easy access to our products and services;
 - reduce distribution and transaction costs;
 - new customer acquisition;
 - enhance existing customer relationships; and
 - reduce time to market.
- The application of information systems for:
 - operational efficiency;
 - effective marketing;
 - monitoring and controlling risks;
- identifying, assessing and capitalizing on market opportunities; and
- assisting in offering improved products and services to customers.

We also seek to leverage our domestic technology capabilities in our international operations.

Technology Organization

We have dedicated technology groups for our products and services for retail, corporate, international and rural customers. Our Technology Management Group coordinates our enterprise-wide technology initiatives. Our Technology Infrastructure Group provides the technology infrastructure platform across all business technology

groups to gain synergies in operation. The business technology groups review the individual requirements of the various business groups and the Information Security Group ensures that the customer information is secure.

Banking Application Software

We use banking applications like a core banking system, loan management system, and credit card management system, all of which are flexible and scalable and allow us to serve our growing customer base. A central stand-in server ensures services all days of the week, throughout the year, to the various delivery channels even if the

primary systems are unavailable. In addition to our data center in Mumbai, we have built a new state-of-the-art data center in Hyderabad for centralized data base management, data storage and retrieval and a new disaster recovery center. We are currently migrating to this data center.

Electronic and Online Channels

We use a combination of physical and electronic delivery channels to maximize customer choice and convenience, which has helped to differentiate our products in the marketplace. Our branch banking software is flexible and scalable and integrates seamlessly with our electronic delivery channels. At March 2012, we had 9,006 automated teller machines across India. Our automated teller machines have additional features such as instant fund transfer, bill payment and insurance premium payment. We offer a number of online banking services to our customers for both corporate and retail products and services. Our call centers across locations at Thane and Hyderabad are operational around the clock and are equipped with multiple leading edge systems such as interactive voice response systems, automatic call distribution, computer telephony integration and voice recorders. We seek to use the latest technology in these call centers to provide an integrated customer view to the call center agents to get a complete overview of the customer's relationship with us. The database enables customer segmentation and assists the call agent in identifying and executing cross-selling opportunities. In fiscal 2012, we launched a banking application on Facebook allowing customers to access their account details, view account statements and place service requests.

We offer mobile banking services in India in line with our strategy to offer multi-channel access to our customers. This service has now been extended to all mobile telephone service providers across India and non-resident Indian customers in certain other countries where we have a presence.

High-Speed Electronic Communications Infrastructure

We have a nationwide data communications backbone linking all our channels and offices. The network is designed for extensive reach and redundancy, which are imperative in a vast country like India. The communications network is monitored 24 hours a day using advanced network management software.

Operations Relating to Commercial Banking for Corporate Customers

Our corporate banking back office operations are centralized and we have a business process management solution to automate our activities in the areas of trade services and general banking operations. Through integration of the workflow system with the imaging and document management system, we have achieved substantial savings and practically eliminated the use of paper for these processes.

We have centralized the systems of treasuries of all our overseas branches and banking subsidiaries. As a result, the processing of transactions as well as the applications used for deal entry are now centrally located and maintained in India. This provides easier manageability and greater control.

Customer Relationship Management

We have implemented a customer relationship management solution for the automation of customer handling in all key retail products. The solution helps in tracking and timely resolution of various customer queries and issues. The solution has been deployed at the telephone banking call centers as well as at a large number of branches.

Data Warehousing and Data Mining

We have a data warehouse for customer data aggregation and data mining initiatives. We have implemented an enterprise application integration initiative across our retail and corporate products and services, to link various products, delivery and channel systems. This initiative follows from our multi-channel customer service strategy and seeks to deliver customer related information consistently across access points. It also aims to provide us with valuable information to compile a unified customer view and creates various opportunities associated with cross-selling and upselling other financial products.

Data Center and Disaster Recovery System

We have commissioned and built a new data center at Hyderabad, which is designed to optimize energy efficiency and accommodate high server densities. We are currently in the process of relocating our data center to Hyderabad from our existing facility in Mumbai.

We have also completed the design for a new disaster recovery data center at Jaipur and construction is in progress. Our current disaster recovery data center at Hyderabad can host all critical banking applications in the event of a disaster at the primary site.

We have developed business continuity plans, which would help facilitate continuity of critical businesses in the event of a disaster. These plans are tested periodically under live or simulated scenarios. These plans have been prepared in line with the guidelines issued by the Reserve Bank of India and have been approved by our Board of Directors.

Competition

We face competition in all our principal areas of business from Indian and foreign commercial banks, housing finance companies, mutual funds and investment banks. We are the largest private sector bank in India and the second largest bank among all banks in the country, in terms of total assets. We seek to gain competitive advantage over our competitors by offering innovative products and services, using technology, building customer relationships and developing a team of highly motivated and skilled employees. We evaluate our competitive position separately in respect of our products and services for retail and corporate customers.

Commercial Banking Products and Services for Retail Customers

In the retail markets, competition is primarily from foreign and Indian commercial banks and housing finance companies. Foreign banks have product and delivery capabilities but are likely to focus on limited customer segments and geographical locations since they have a smaller branch network than Indian commercial banks. Foreign banks in aggregate had only 302 branches in India at December 31, 2011. Indian public sector banks have wide distribution networks but generally relatively less strong technology and marketing capabilities while private sector banks have a relatively smaller branch network but stronger technology capabilities. With the implementation of technology-based core banking solutions, public sector banks have become more competitive in selling products and services to retail customers. In addition some specialized non-bank finance companies have increased market share in certain segments of retail banking products. We seek to compete in this market through a full product portfolio and effective distribution channels, which include branches, agents, robust credit processes and collection mechanisms, experienced professionals and superior technology.

Commercial banks attract the majority of retail bank deposits, historically the preferred retail savings product in India. We have sought to capitalize on our corporate relationships to gain individual customer accounts through payroll management products and will continue to pursue a multi-channel distribution strategy utilizing physical branches, ATMs, telephone banking call centers and the internet to reach customers. Further, following a strategy focused on customer profiles and product segmentation, we offer differentiated liability products to customers of various ages and income profiles. Mutual funds are another source of competition to us. Mutual funds offer tax advantages and have the capacity to earn competitive returns and hence present a competitive alternative to bank deposits.

Commercial Banking Products and Services for Corporate Customers

In products and services for corporate customers, we face strong competition primarily from public sector banks, foreign banks and other new private sector banks. Our principal competition in these products and services comes

from public sector banks, which have built extensive branch networks that have enabled them to raise low-cost deposits and, as a result, price their loans and fee-based services very competitively. Their wide geographical reach facilitates the delivery of banking products to their corporate customers located in most parts of the country. We seek to compete based on our service and prompt turnaround times that we believe are significantly faster than

public sector banks. We seek to compete with the large branch networks of the public sector banks through our multi-channel distribution approach and technology-driven delivery capabilities. Traditionally, foreign banks have been active in providing treasury-related products and services, trade finance, fee-based services and other short-term financing products to top tier Indian corporations. We compete with foreign banks in cross-border trade finance based on our wider geographical reach relative to foreign banks and our customized trade financing solutions. We have established strong fee-based cash management services and leverage our balance sheet size, wider branch network, technology and our international presence to compete in treasury-related products and services.

Other new private sector banks also compete in the corporate banking market on the basis of efficiency, service delivery and technology. However, we believe that our size, capital base, strong corporate relationships, wider geographical reach and ability to use technology to provide innovative, value-added products and services provide us with a competitive edge.

In project finance, ICICI's primary competitors were established long-term lending institutions. In recent years, Indian and foreign commercial banks have sought to expand their presence in this market. We believe that we have a competitive advantage due to our strong market reputation and expertise in risk evaluation and mitigation. We believe that our in-depth sector specific knowledge and capabilities in understanding risks and policy related issues as well as our advisory, structuring and syndication services have allowed us to gain credibility with project sponsors, overseas lenders and policy makers.

Commercial Banking Products and Services for International Customers

Our international strategy is focused on India-linked opportunities. In our international operations, we face competition from Indian public sector banks with overseas operations, foreign banks with products and services targeted at non-resident Indians and Indian businesses and other service providers such as remittance services. Foreign banks have become more competitive in providing financing to Indian businesses leveraging their strength of access to lower cost foreign currency funds. We are seeking to position ourselves as an Indian bank offering globally-benchmarked products and services with an extensive distribution network in India to gain competitive advantage. We seek to leverage our technology capabilities developed in our domestic businesses to offer convenience and efficient services to our international customers. We also seek to leverage our strong relationships with Indian corporations in our international business.

Commercial Banking Products and Services for Agricultural and Rural Customers

In our commercial banking operations for agricultural and rural customers, we face competition from public sector banks that have large branch networks in rural India. Other private sector banks and non-banking finance companies also provide products and services in rural India. We also face competition from specialized players such as rural finance institutions and non banking finance companies. We seek to compete in this business based on our product strategy and multiple channels.

Insurance and Asset Management

Our insurance and asset management joint ventures face competition from existing dominant public sector players as well as new private sector players. We believe that the key competitive strength of our insurance joint ventures is the combination of our experience in the Indian financial services industry with the global experience and skills of our joint venture partners. We believe that ICICI Prudential Life Insurance Company, ICICI Lombard General Insurance Company and ICICI Prudential Asset Management Company have built strong product, distribution and risk management capabilities, achieving market leadership positions in their respective businesses. According to data published by the Insurance Regulatory and Development Authority of India, ICICI Prudential Life Insurance

Company had a retail market share of about 5.9% in new business written (on a retail weighted received premium basis) during fiscal 2012. ICICI Lombard General Insurance Company had a market share of about 9.4% in gross written premiums during fiscal 2012 (excluding premium on the motor third party insurance pool). See also “Business—Insurance”. ICICI Prudential Asset Management Company manages the ICICI Prudential Mutual Fund, which was among the top three mutual funds in India in terms of average funds under management.

Employees

At year-end fiscal 2012, we had 81,254 employees, including sales executives, employees on fixed term contracts and interns, compared to 79,978 employees at year-end fiscal 2011 and 74,056 employees at year-end fiscal 2010. Of these, 58,276 employees were employed by ICICI Bank in fiscal 2012, an increase from 56,969 at year-end fiscal 2011. Of our 81,254 employees at year-end fiscal 2012, approximately 31,591 were professionally qualified, holding degrees in management, accountancy, engineering, law, computer science, economics or banking.

We dedicate a significant amount of senior management time to ensuring that employees remain highly motivated and perceive the organization as a satisfactory working environment. Employee compensation is linked to performance and we encourage the involvement of our employees in the overall performance and profitability of the Bank. A performance appraisal system has been implemented to assist management in career development and succession planning. Management believes that it has good relationships with its employees.

ICICI Bank has an employee stock option scheme to encourage and retain high-performing employees. Pursuant to the employee stock option scheme up to 10.0% (5.0% up to fiscal 2012) of the aggregate of our issued equity shares at the time of grant of the stock options can be allocated under the employee stock option scheme. The stock options entitle eligible employees to apply for equity shares. The grant of stock options is approved by ICICI Bank's board of directors on the recommendation of the Board Governance, Remuneration and Nomination Committee. The eligibility of each employee is determined based on an evaluation including the employee's work performance, technical knowledge and leadership qualities. See also "Management—Compensation and Benefits to Directors and Officers—Employee Stock Option Scheme".

ICICI Bank has training centers, where various training programs designed to meet the changing skill requirements of its employees are conducted. These training programs include orientation sessions for new employees and management development programs for mid-level and senior executives. The training centers regularly offer courses conducted by faculty, both national and international, drawn from industry, academia and ICICI Bank's own organization. Training programs are also conducted for developing functional as well as managerial skills. Products and operations training are also conducted through web-based training modules.

In addition to basic compensation, employees of ICICI Bank are eligible to receive loans from ICICI Bank at subsidized rates and to participate in its provident fund and other employee benefit plans. The provident fund, to which both ICICI Bank and its employees contribute a defined amount, is a savings scheme, required by government regulation, under which ICICI Bank at present is required to pay to employees a minimum annual return as specified from time to time, which was specified at 8.25% for fiscal 2012. If such return is not generated internally by the fund, ICICI Bank is liable for the difference. ICICI Bank has also set up a superannuation fund to which it contributes defined amounts. The employees have been given an option to opt out of the superannuation fund and in such cases the defined amounts are paid as part of monthly salary. In addition, ICICI Bank contributes specified amounts to a gratuity fund set up pursuant to Indian statutory requirements.

The following table sets forth, at the dates indicated, the number of employees in ICICI Bank and its consolidated subsidiaries and other consolidated entities.

	2010		At March 31, 2011		2012	
	Number	% of total	Number	% of total	Number	% of total

(4) All employees are deputed from ICICI Bank.

Properties

Our registered office is located at Landmark, Race Course Circle, Vadodara 390 007, Gujarat, India. Our corporate headquarters is located at ICICI Bank Towers, Bandra-Kurla Complex, Mumbai 400 051, Maharashtra, India.

ICICI Bank had a principal network consisting of 2,752 branches and 9,006 ATMs at year-end fiscal 2012 in India. At June 30, 2012, ICICI Bank had a network of 2,755 branches in India. These facilities are located throughout India. In addition to the branches, extension counters and ATMs, ICICI Bank has 39 controlling/administrative offices including the registered office at Vadodara and the corporate headquarters at Mumbai, and 49 regional processing centers and three central processing centers, two located in Mumbai and one in Hyderabad. We have branches in Bahrain, Dubai International Financial Centre, Hong Kong, Qatar financial centre, Singapore, Sri Lanka and the United States and representative offices in the United Arab Emirates, Bangladesh, China, Indonesia, Malaysia, South Africa and Thailand. ICICI Bank also provides residential facilities to employees. At March 31, 2012, ICICI Bank had 841 apartments for its employees.

Legal and Regulatory Proceedings

We are involved in various litigations and are subject to a wide variety of banking and financial services laws and regulations in each of the jurisdictions in which we operate. We are also subject to a large number of regulatory and enforcement authorities in each of these jurisdictions. We are involved in a number of legal proceedings and regulatory relationships in the ordinary course of our business. However, we are not a party to any proceedings and no proceedings are known by us to be contemplated by governmental authorities or third parties, which, if adversely determined, may have a material adverse effect on our financial condition or results of operations.

The following penalties were imposed and paid by us in the past:

- The Securities and Futures Commission, Hong Kong charged us and other banks with carrying on the business of dealing in securities in Hong Kong between June 15, 2004 and March 8, 2006, without having the requisite

license. The Eastern Magistrate's Court, Hong Kong, on April 10, 2007 fined us a sum of HK\$ 40,000 and ordered us to reimburse prosecution costs of HK\$ 54,860.

- In fiscal 2011, the Reserve Bank of India imposed a penalty of Rs. 0.5 million on us in connection with Know Your Customer guidelines.

- In May 2012, the Insurance Regulatory and Development Authority of India imposed a penalty of Rs. 11.8 million on ICICI Prudential Life Insurance Company because of non-compliance with certain provisions of the Insurance Act, 1938 and regulations/guidelines issued by the Insurance Regulatory and Development Authority in respect of intermediaries and group insurance.
- In fiscal 2012, the Reserve Bank of India imposed a penalty of Rs. 1.5 million on us in connection with non-compliance of certain instructions issued by the Reserve Bank of India with respect to our derivatives business.
- In May 2012, the Reserve Bank of India imposed a penalty of Rs. 0.07 million on the Bank in connection with an operational error regarding the sale of government securities on behalf of a customer.
- In May 2012, the Reserve Bank of India imposed a penalty of Rs. 0.5 million on ICICI Securities Primary Dealership in connection with an operational error regarding the sale of government securities.

See also “Risk Factors—Risks Relating to Our Business—We experienced rapid international growth in earlier years which has increased the complexity of the risks that we face”, “—There is operational risk associated with the financial industry which, when realized, may have an adverse impact on our business”, “—We are involved in various litigations. Any final judgment awarding material damages against us could have a material adverse impact on our future financial performance, our stockholders’ equity and the price of our equity shares and ADSs” and “—The regulatory environment for financial institutions is facing unprecedented change in the post-financial crisis environment”.

At year-end fiscal 2012, our contingent tax liability was assessed at an aggregate of Rs. 31.6 billion, mainly pertaining to income tax and sales tax/value added tax demands by the government of India’s tax authorities for past years. We have appealed each of these tax demands. The consequence of inquiries initiated by the tax authorities cannot be quantified, as we believe that such proceedings are likely to be dropped by the tax authorities or will not be upheld by judicial authorities. Based on consultation with counsel and favorable decisions in our own and other cases as set out below, management believes that the tax authorities are not likely to be able to substantiate their tax assessments and, accordingly, we have not provided for these tax demands at year-end fiscal 2012. Disputed tax issues that are classified as remote are not disclosed as contingent liabilities by us. Of the overall contingent tax liability of Rs. 31.6 billion:

- Rs. 2.0 billion relates to sales tax/value added tax assessments where we are relying on favorable decisions in our own and other precedent cases and opinions from counsel. The disputed issues mainly pertain to taxes on interstate/import leases by various state government authorities with respect to lease transactions entered into by the Bank, value added tax imposed on the sale of repossessed assets and bullion-related procedural issues such as the submission of statutory forms.
- Rs. 29.6 billion relates to appeals filed by us or the tax authorities with respect to assessments mainly pertaining to income tax, where we are relying on favorable precedent decisions of the appellate court and expert opinions. The key disputed liabilities are detailed below:
 - Rs. 9.5 billion relates to whether interest expenses can be attributed to earning tax-exempt dividend income. We believe that no interest can be allocated thereto as there are no borrowings earmarked for investment in shares and our interest free funds are sufficient to cover investments in the underlying shares. The Bank relies on the favorable opinion from counsel and favorable appellate decisions in similar cases.
 - Rs. 5.0 billion relates to the disallowance of marked-to-market losses on derivative transactions treated by the tax authorities as notional losses. The Bank relies on the favorable opinion from counsel and favorable appellate

decisions in similar cases, which had allowed the deduction of marked-to-market losses from business income.

- Rs. 3.7 billion relates to the disallowance of depreciation claims on leased assets by the tax authorities, who believe the lease transactions should be treated as loan transactions. There was a recent unfavorable court judgment in a similar case, which could have an impact on the Bank's case. The Bank has obtained a favorable opinion from counsel that based on the merits of the Bank's case, the Bank has a high probability of obtaining a favorable judgment from higher appellate authorities.
- Rs. 2.7 billion relates to taxability of amounts withdrawn from the Special Reserve. ICICI had maintained two special reserve accounts, including the Special Reserve created up to assessment year 1997-98. Withdrawals from this account were assessed as taxable by the tax authorities for the assessment years 1998-99 to 2000-01. We have received a favorable order in respect of the assessment year 1998-1999 and 1999-2000 but the income tax department has appealed the favorable order.
- Rs. 1.7 billion relates to double taxation of income of our venture fund, ICICI Emerging Sectors Fund. The assessing officer has taxed the income received by ICICI Emerging Sectors Fund by treating the venture fund as an "association of persons" resulting in double taxation of income both in the hands of Emerging Sector Fund and beneficiaries. ICICI Emerging Sectors Fund has obtained relief from the Commissioner of Income Tax (Appeals) but the tax authorities have challenged the relief order before the higher appellate authority.

Based on judicial precedents of our own and other cases, and upon consultation with tax counsel, management believes that it is more likely than not that our tax position will be sustained. Accordingly, no provision has been made in the accounts.

The above mentioned contingent liability of Rs. 31.6 billion does not include Rs. 22.2 billion pertaining to the deduction of bad debts and levy of penalties which are pending before appellate authorities, as these liabilities are considered remote, since they are covered by Supreme Court (the highest court in India) decisions in other cases and therefore not required to be disclosed as contingent liability.

A number of litigations and claims against ICICI Bank and its directors are pending in various forums. The claims on ICICI Bank mainly arise in connection with civil cases involving allegations of service deficiencies, property or labor disputes, fraudulent transactions, economic offences and other cases filed in the normal course of business. The Bank is also subject to counterclaims arising in connection with its enforcement of contracts and loans. A provision is created where an unfavorable outcome is deemed probable and in respect of which a reliable estimate can be made. In view of the inherent unpredictability of litigation and for cases where the claim amount sought are substantial, the actual cost of resolving litigations may be substantially different from the provision held.

ICICI Bank held a total provision of Rs. 379 million at year-end fiscal 2012 for 629 cases with claims totaling approximately Rs. 1,025 million, where an unfavorable outcome was deemed probable and in respect of which a reliable estimate could be made. Of the total provision made, Rs. 347 million related to 625 cases with claims of Rs. 944 million and Rs. 32 million related to four cases with claim of Rs. 81 million which is the claims of sale proceeds received from the court against an undertaking.

For cases where an unfavorable outcome is deemed to be reasonably possible but not probable, the amount of claims is included in contingent liabilities. At year-end fiscal 2012, such claims amounted to a total of Rs. 1,878 million relating to 84 cases. It is not possible to estimate the possible loss or range of possible losses for these cases due to the nature of the cases.

For cases where the possibility of an unfavorable outcome is deemed remote, we have not made a provision, nor did it include the amount of the claims in these cases in contingent liabilities.

In some instances, civil litigants have named our directors as co-defendants in lawsuits against ICICI Bank. There were 226 such cases at year-end fiscal 2012.

Management believes, based on consultation with counsel, that the claims and counterclaims filed against us in the above legal proceedings are frivolous and untenable and their ultimate resolution will not have a material

adverse effect on our results of operations, financial condition or liquidity. Based on a review of other litigations with legal counsel, management also believes that the outcome of such other matters will also not have a material adverse effect on our financial position, results of operations or cash flows.

At year-end fiscal 2012, there were 55 ongoing litigations (including those where the likelihood of our incurring liability is assessed as “probable”, “possible” and “remote”), each involving a claim of Rs. 10 million or more, with an aggregate amount of approximately Rs. 8.25 billion (to the extent quantifiable and including amounts claimed jointly and severally from us and other parties). The following are litigations where the amounts claimed are Rs. 1.0 billion or higher:

- On October 4, 2011, the New York Branch of ICICI Bank was served with a restraining notice and information subpoena by a New York District Court seeking information about Indiabulls Financial Services Limited with instructions to freeze and surrender their assets pursuant to a dispute between Amaprop Limited and Indiabulls Financial Services Limited. While ICICI Bank fully responded to the information subpoena, it indicated that it would not be able to freeze and surrender any assets of a client located in India in the absence of a court order from an Indian Court, as such actions would conflict with the requirements of applicable Indian laws. Thereafter, ICICI Bank was served a show cause notice requesting that ICICI Bank pay Amaprop the amount of funds transferred by Indiabulls Financial Services Limited and damages up to U.S.\$49 million. In its response submitted in January 2012, ICICI Bank, inter alia, submitted that its actions were in compliance with applicable laws of India and New York at all times. The matter was heard by the United States District Court, Southern District of New York and an order dated February 16, 2012 held the show cause notice to be valid and enforceable in respect of all funds and assets of Indiabulls Financial Services Limited held in India or elsewhere. The court order further directed ICICI Bank to freeze all accounts and deposits of Indiabulls Financial Services Limited held by ICICI Bank and remit these funds to Amaprop Limited. Accordingly, ICICI Bank remitted an amount of Rs. 2 million, equivalent to US\$ 41,529 to Amaprop Limited. ICICI Bank has filed an appeal.
- In 1999, we filed a suit in the Debt Recovery Tribunal, Delhi against Esslon Synthetics Limited and its Managing Director (in his capacity as guarantor) for the recovery of amounts totaling Rs. 169 million due from Esslon Synthetics Limited. In May 2001, the guarantor filed a counterclaim for an amount of Rs. 1.00 billion against us and other lenders who had extended financial assistance to Esslon Synthetics on the grounds that he had been coerced by officers of the lenders into signing an agreement between LML Limited, Esslon Synthetics and the lenders on account of which he suffered, among other things, loss of business. Esslon Synthetics Limited filed an application to amend the counterclaim in January 2004. We have filed our reply to the application for amendment. The guarantor has also filed an interim application on the grounds that certain documents have not been exhibited, to which we have filed our reply stating that the required documents are neither relevant nor necessary for adjudicating the dispute between the parties. In the meantime, the Industrial Development Bank of India has challenged the order of the Debt Recovery Tribunal, Delhi, whereby the Debt Recovery Tribunal allowed LML Limited to be included in the list of parties. The Debt Recovery Appellate Tribunal, Delhi has passed an interim stay order against the Debt Recovery Tribunal proceedings. In the liquidation proceeding before the High Court at Allahabad, the official liquidator attached to the Allahabad High Court sold the assets of Esslon Synthetics for Rs. 61 million in November 2002. The sales proceeds are in the process of being distributed to various parties including us.
- In addition, we have experienced rapid international expansion into banking in multiple jurisdictions which exposes us to a new variety of regulatory and business challenges and risks, including cross-cultural risk, and which increased the complexity of our risks in a number of areas including currency risks, interest rate risks, compliance risk, regulatory risk, reputational risk and operational risk. As a result of this rapid growth and increased complexity, we or our employees may be subject to regulatory investigations or enforcement proceedings in multiple jurisdictions in a variety of contexts. Despite our best efforts at regulatory compliance and

internal controls, we, or our employees, may from time to time, and as is common in the financial services industry, be the subject of confidential examinations or investigations that might, or might not, lead to proceedings against us or our employees. In any such situation it would be our

policy to conduct an internal investigation, co-operate with the regulatory authorities and, where appropriate, suspend or discipline employees, including terminating their services.

We cannot predict the timing or form of any future regulatory or law enforcement initiatives, which we note are increasingly common for international banks, but we would expect to co-operate with any such regulatory investigation or proceeding.

American Depositary Receipt Fees and Payments

Fees and Charges Payable by Holders of our ADSs

The fees and charges payable by holders of our ADSs include the following:

- (i) a fee not in excess of U.S.\$ 0.05 per ADS is charged for each issuance of ADSs including issuances resulting from distributions of shares, share dividends, share splits, bonuses and rights distributions ;
- (ii) a fee not in excess of U.S.\$ 0.05 per ADS is charged for each surrender of ADSs in exchange for the underlying deposited securities;
- (iii) a fee for the distribution of the deposited securities pursuant to the deposit agreement, such fee being an amount equal to the fee for the execution and delivery of ADSs referred to in item (i) above which would have been charged as a result of the deposit of such securities, but which securities were instead distributed by the depositary to ADR holders.

Additionally, under the terms of our deposit agreement, the depositary is entitled to charge each registered holder the following:

- (i) taxes and other governmental charges incurred by the depositary or the custodian on any ADS or an equity share underlying an ADS including any applicable penalties thereon;
- (ii) transfer or registration fees for the registration or transfer of deposited securities on any applicable register in connection with the deposit or withdrawal of deposited securities, including those of a central depository for securities (where applicable);
- (iii) any cable, telex, facsimile transmission and delivery expenses incurred by the depositary; and
- (iv) customary expenses incurred by the depositary in the conversion of foreign currency, including, without limitation, expenses incurred on behalf of registered holders in connection with compliance with foreign exchange control restrictions and other applicable regulatory requirements, together with all expenses, transfer and registration fees, taxes, duties, governmental or other charges payable by the Depositary.

In the case of cash distributions, fees, if applicable, are generally deducted from the cash being distributed. Other fees may be collected from holders of ADSs in a manner determined by the depositary with respect to ADSs registered in the name of investors (whether certificated or in book-entry form) and ADSs held in brokerage and custodian accounts (via DTC). In the case of distributions other than cash (i.e., stock dividends, etc.), the depositary charges the applicable ADS record date holder concurrently with the distribution. In the case of ADSs registered in the name of the investor (whether certificated or in book-entry form), the depositary sends invoices to the applicable record date ADS holders.

If any tax or other governmental charge is payable by the holders and/or beneficial owners of ADSs to the depositary, the depositary, the custodian or the Bank may withhold or deduct from any distributions made in respect of deposited securities and may sell for the account of the holder and/or beneficial owner any or all of the deposited securities and apply such distributions and sale proceeds in payment of such taxes (including applicable interest and penalties) or charges, with the holder and the beneficial owner thereof remaining fully liable for any deficiency.

Fees and Other Payments Made by the Depository

In fiscal 2012, the Bank entered into an agreement with the Depository, Deutsche Bank Trust Company Americas, under which the Depository shall reimburse the Bank for annual expenses incurred by the Bank towards investor relations or other expenses directly related to the ongoing maintenance of the American Depository Receipt program. There are limits on the amount of expenses for which the depository will reimburse the Bank, but the amount of reimbursement available to the Bank is not necessarily tied to the amount of fees the depository collects from investors. Under certain circumstances, including the removal of Deutsche Bank Trust Company Americas as Depository or termination of the American Depository Receipt program, we are required to repay to Deutsche Bank Trust Company Americas amounts reimbursed in prior periods. The reimbursement will begin in fiscal 2013. Accordingly, the Bank did not receive any reimbursement from the Depository during the fiscal 2012.

SELECTED CONSOLIDATED FINANCIAL AND OPERATING DATA

The following discussion and tables are based on our audited consolidated financial statements and accompanying notes prepared in accordance with Indian GAAP. For a reconciliation of net income and stockholders' equity to U.S. GAAP, a description of significant differences between Indian GAAP and U.S. GAAP and certain additional information required under U.S. GAAP, see notes 20 and 21 to our consolidated financial statements included in this annual report. For selected financial data in accordance with U.S. GAAP, see "Selected U.S. GAAP Financial Data".

Certain reclassifications have been made in the financial statements for prior years to conform to classifications used in the current year. These changes have no impact on previously reported results of operations or stockholders' equity. The accounting and reporting policies used in the preparation of our financial statements reflect general industry practices and conform with Indian GAAP, including the Accounting Standards issued by the Institute of Chartered Accountants of India and guidelines issued by the Reserve Bank of India and the Insurance Regulatory and Development Authority and the National Housing Bank as applicable to ICICI Bank and specific subsidiaries and joint ventures.

The consolidated financial statements for fiscal 2008, 2009 and 2010 were audited by B S R & Co., Chartered Accountants, and for fiscal 2011 and 2012 by S.R. Batliboi & Co., Chartered Accountants, under auditing standards issued by the Institute of Chartered Accountants of India. The consolidated financial statements for fiscal 2008, through 2012 have also been audited by KPMG, an independent registered public accounting firm in India, in accordance with the auditing standards of the United States Public Company Accounting Oversight Board. Our Indian GAAP financial statements, along with the reconciliation of net profit and stockholders' equity to U.S. GAAP, including the notes to these financial statements, audited by KPMG are set forth at the end of this annual report.

Our annual report, prepared and distributed to our shareholders under Indian law and regulations, includes consolidated as well as unconsolidated Indian GAAP financial statements and analysis of our results of operations and financial condition based on unconsolidated Indian GAAP financial statements.

You should read the following data with the more detailed information contained in "Operating and Financial Review and Prospects" and our consolidated financial statements. Historical results do not necessarily predict our results in the future.

Operating Results Data

The following table sets forth, for the periods indicated, our operating results data.

(1) Rupee amounts for fiscal 2012 have been translated into U.S. dollars using the exchange rate of Rs. 50.89 = U.S.\$ 1.00 as set forth in the H.10 statistical release of the Federal Reserve Board at year-end fiscal 2012.

(2)

Interest income includes interest on rupee and foreign currency loans and advances (including bills) and hire purchase receivables and gains/(losses) on sell-down of loans of ICICI Bank. Interest income also includes interest on income tax refunds of Rs. 880 million, Rs. 3.4 billion, Rs. 1.2 billion, Rs. 1.7 billion and Rs. 846 million for fiscal 2008, 2009, 2010, 2011 and 2012 respectively.

- (3) Includes commissions paid to direct marketing agents or associates in connection with sourcing our retail assets. These commissions are expensed upfront and not amortized over the life of the loan.
- (4) Includes employee expenses, establishment expenses, depreciation on fixed assets, amortization of expenses related to early retirement option scheme and other general office expenses. Non-interest expenses include Rs. 384 million for fiscal 2008, Rs. 118 million for fiscal 2009 and nil for fiscal 2010, 2011 and 2012 on account of the amortization of expenses related to our early retirement option scheme over a period of five years as approved by the Reserve Bank of India.
- (5) Includes income tax (net of deferred tax), wealth tax and fringe benefit tax. The levy of fringe benefit tax is not applicable as Finance (No. 2) Act, 2009 has abolished fringe benefit tax with effect from fiscal 2010.
- (6) Earnings per share is computed based on the weighted average number of shares and represents net profit/(loss) per share before dilutive impact.
- (7) Earnings per share is computed based on the weighted average number of shares and represents net profit/(loss) per share adjusted for full dilution. Options to purchase 40,000, 5,098,000, 9,238,020, 13,503,150 and 12,870,600 equity shares granted to employees at a weighted average exercise price of Rs. 1,135.3, Rs. 914.4, Rs. 926.3, Rs. 944.7 and Rs. 1,003.4 were outstanding at year-end fiscal 2008, 2009, 2010, 2011 and 2012 respectively, but were not included in the computation of diluted earnings per share because the exercise price of the options was greater than the average market price of the equity shares during the period.
- (8) In India, dividends for a fiscal year are normally declared and paid in the following year. We declared a dividend of Rs. 11.00 per equity share for each of fiscal years 2008 and 2009, which were paid in fiscal 2009 and fiscal 2010 respectively. We declared a dividend of Rs. 12.00 per equity share for fiscal 2010, which was paid in fiscal 2011. We declared a dividend of Rs. 14.00 per equity share for fiscal 2011, which was paid in fiscal 2012. We declared a dividend of Rs. 16.50 per equity share for fiscal 2012, which was paid in fiscal 2013. The dividend per equity share shown above is based on the total amount of dividends declared for the year, exclusive of dividend tax.
- (9) Represents equity share capital, employees' stock options outstanding and reserves and surplus reduced by deferred tax assets, goodwill and early retirement option expenses, not written off.

The following table sets forth, for the periods indicated, selected income statement data expressed as a percentage of average total assets for the respective period. For fiscal 2008, the average balances for a fiscal year are the average of quarterly balances outstanding at the end of March of the previous fiscal year and June, September, December and March of that year. For fiscal 2009, 2010 and 2011, the average balances are the sum of the daily average balances outstanding for ICICI Bank, except for the averages of overseas branches which were calculated on a monthly basis until October 31, 2010 and on a fortnightly basis thereafter and the average of quarterly balances outstanding at the end of March of the previous fiscal year and June, September, December and March of that year for subsidiaries and other consolidated entities. For fiscal 2012, the average balances are the sum of the daily average balances outstanding except for the averages of overseas branches of ICICI Bank which were calculated on a fortnightly basis.

(1) Rupee amounts at year-end fiscal 2012 have been translated into US dollars using the exchange rate of Rs. 50.89 = U.S.\$ 1.00 as set forth in the H.10 statistical release of the Federal Reserve Board on March 31, 2012.

(2) Until March 31, 2008, this figure includes suspended interest on working capital loans and claims received from Export Credit Guarantee Corporation of India/Deposit Insurance Credit Guarantee Corporation.

(3)

Includes balance in employees stock options outstanding which will be transferred to “Equity share capital” or “Reserves and surplus” on exercise/lapse of options.

- (4) For fiscal 2008, the average balances for a fiscal year are the average of quarterly balances outstanding at the end of March of the previous fiscal year and June, September, December and March of that year. For fiscal 2009, 2010 and 2011, the average balances are the sum of daily average balances outstanding for ICICI Bank, except for the averages of overseas branches which were calculated on a monthly basis until October 31, 2010 and on a fortnightly basis thereafter and the average of quarterly balances outstanding at the end of March of the previous fiscal year and June, September, December and March of that year for subsidiaries and other consolidated entities. For fiscal 2012, the average balances are the sum of the daily average balances outstanding, except for the averages of overseas branches of ICICI Bank which were calculated on a fortnightly basis.
- (5) Includes preference share capital and minority interest, but does not include stockholders' equity.
- (6) Represents the ratio of total dividends paid on equity share capital, exclusive of dividend tax, as a percentage of net profit.

- (7) Represents the difference between yield on average interest-earning assets and cost of average interest-bearing liabilities. Yield on average interest-earning assets is the ratio of interest income to average interest-earning assets. Cost of average interest-bearing liabilities is the ratio of interest expense to average interest-bearing liabilities.
- (8) Represents the ratio of net interest income to average interest-earning assets. The difference in net interest margin and spread arises due to the difference in the amount of average interest-earning assets and average interest-bearing liabilities. If average interest-earning assets exceed average interest-bearing liabilities, net interest margin is greater than spread, and if average interest-bearing liabilities exceed average interest-earning assets, net interest margin is less than spread.
- (9) Represents the ratio of non-interest expenses to total income. Total income represents the sum of net interest income and non-interest income.
- (10) Represents the ratio of non-interest expenses to average total assets.
- (11) ICICI Bank's capital adequacy is computed in accordance with the Basel II norms stipulated by the Reserve Bank of India and is based on unconsolidated financial statements prepared in accordance with Indian GAAP and based on consolidated financial statements as per the Reserve Bank of India guidelines on consolidated prudential report. At year-end fiscal 2012, ICICI Bank's total capital adequacy ratio at the unconsolidated level was 18.5% with a tier I capital adequacy ratio of 12.7% and a tier II capital adequacy ratio of 5.8%. At year-end fiscal 2012, the total capital adequacy ratio of the Bank at the consolidated level was 19.6% with a tier I capital adequacy ratio of 12.8% and a tier II capital adequacy ratio of 6.8%.
- (12) Includes loans identified as non-performing/impaired in line with the guidelines issued by regulators of the respective subsidiary.
- (13) Includes general provision on standard assets.

Selected U.S. GAAP Financial Data

The following table sets forth, certain selected financial data under generally accepted accounting principles adopted in the United States.

	2008	2009	At or for the year ended March 31,				2012(1)

-
- (1) Rupee amounts for fiscal 2012 have been translated into U.S. dollars using the exchange rate of Rs. 50.89 = U.S.\$ 1.00 as set forth in the H.10 statistical release of the Federal Reserve Board on March 31, 2012.
 - (2) Represents net interest income plus non-interest income.
 - (3) Represents net income/(loss) before dilutive impact.
 - (4) Represents net profit/(loss) adjusted for full dilution. Options to purchase 40,000, 5,098,000, 9,238,020, 13,503,150 and 12,870,600 equity shares granted to employees at a weighted average exercise price of Rs. 1,135.3, Rs. 914.4, Rs. 926.3, Rs. 944.7 and Rs. 1,003.4 were outstanding at year-end fiscal 2008, 2009, 2010, 2011 and 2012 respectively, but were not included in the computation of diluted earnings per share because the exercise price of the options was greater than the average market price of the equity shares during the period.
 - (5) In India, dividends for a fiscal year are normally declared and paid in the following year. We declared a dividend of Rs. 11.00 per equity share for each of fiscal years 2008 and 2009, which were paid in fiscal 2009 and fiscal 2010 respectively. We declared a dividend of Rs. 12.00 per equity share for fiscal 2010 which was paid in fiscal 2011. We declared a dividend of Rs. 14.00 per equity share for fiscal 2011 which was paid in fiscal 2012. We declared a dividend of Rs. 16.50 per equity share for fiscal 2012 which was paid in fiscal 2013. The dividend per equity share shown above is based on the total amount of dividends declared for the year, exclusive of dividend tax.

OPERATING AND FINANCIAL REVIEW AND PROSPECTS

You should read the following discussion and analysis of our financial condition and results of operations together with our audited consolidated financial statements. The following discussion is based on our audited consolidated financial statements and accompanying notes prepared in accordance with Indian GAAP, which varies in certain significant respects from U.S. GAAP. For a reconciliation of net income and stockholders' equity to U.S. GAAP, a description of significant differences between Indian GAAP and U.S. GAAP and certain additional U.S. GAAP information, see notes 20 and 21 to our consolidated financial statements included herein.

Executive Summary

Introduction

We are a diversified financial services group offering a wide range of banking and financial services to corporate and retail customers through a variety of delivery channels. We are the largest private sector bank in India and the second largest bank in India, in terms of total assets. Apart from banking products and services, we offer life and general insurance, asset management, securities brokering and private equity products and services through specialized subsidiaries. Our total assets at year-end fiscal 2012 were Rs. 6,041.9 billion. Our consolidated capital and reserves at year-end fiscal 2012 was Rs. 612.8 billion. During fiscal 2012, our net profit was Rs. 76.4 billion compared to Rs. 60.9 billion during fiscal 2011.

Our primary business consists of commercial banking operations for retail and corporate customers. Our commercial banking operations for retail customers consist of retail lending and deposit taking and distribution of third party investment products. We deliver our products and services through a variety of channels, including bank branches, ATMs, call centers, internet and mobile phones. We had a network of 2,752 branches and 9,006 ATMs in India at year-end fiscal 2012. We provide a range of commercial banking and project finance products and services, including loan products, fee and commission-based products and services, deposit products and foreign exchange and derivatives products to India's leading corporations, middle market companies and small and medium enterprises. We also offer agricultural and rural banking products. We earn interest and fee income from our commercial banking operations.

In our international banking operations, our primary focus is on offering products and services to persons of Indian origin, Indian businesses, India-linked opportunities and select local businesses such as insured mortgaged products in our Canada subsidiary as well as offering deposit products to the larger community. ICICI Bank's overseas branches take deposits, raise borrowings and make loans primarily to Indian companies for their overseas operations as well as for their foreign currency requirements in India. They also engage in advisory and syndication activities for fund-raising by Indian companies and their overseas operations. We currently have banking subsidiaries in the United Kingdom, Canada and Russia, branches in Singapore, Dubai, Sri Lanka, Hong Kong, Qatar, the United States and Bahrain and representative offices in China, the United Arab Emirates, Bangladesh, South Africa, Malaysia, Thailand and Indonesia. Our subsidiary in the United Kingdom has established a branch in Antwerp, Belgium and a branch in Frankfurt, Germany.

Our treasury operations include the maintenance and management of regulatory reserves, proprietary trading in equity and fixed income and a range of foreign exchange and derivatives products and services for corporate customers, such as forward contracts, swaps and options. We take advantage of movements in markets to earn treasury income. We also earn fees from treasury products that we offer to our customers. Our overseas branches and subsidiaries also have investments in bonds of non-India financial institutions and in asset backed securities.

We are also engaged in insurance, asset management, securities business and private equity fund management through specialized subsidiaries. Our subsidiaries ICICI Prudential Life Insurance Company, ICICI Lombard General Insurance Company and ICICI Prudential Asset Management Company provide a wide range of life and general insurance and asset management products and services to retail and corporate customers. ICICI Prudential Life Insurance Company was the largest private sector life insurance company in India during fiscal 2012, with a market share of 5.9% based on new business written (on a retail weighted received premium basis). ICICI Lombard General Insurance Company was the largest private sector general insurance company in India during fiscal 2012,

with a market share of 9.4% in gross written premium (excluding premium on the motor third party insurance pool). ICICI Prudential Asset Management Company manages the ICICI Prudential Mutual Fund, which was among the top three mutual funds in India in terms of average funds under management. We cross-sell the products of our insurance and asset management subsidiaries and other asset management companies to our retail and corporate customers. Our subsidiaries ICICI Securities Limited and ICICI Securities Primary Dealership Limited are engaged in equity underwriting and brokerage and primary dealership in government securities respectively. ICICI Securities owns icicidirect.com, a leading online brokerage platform. ICICI Securities Limited has a subsidiary in the United States, ICICI Securities Holdings Inc., which in turn has an operating subsidiary in the United States, ICICI Securities Inc., engaged in brokerage services. Our private equity fund management subsidiary ICICI Venture Funds Management Company manages funds that make private equity investments.

Business environment

Our loan portfolio, financial condition and results of operations have been and, in the future, are expected to be influenced by economic conditions in India, global economic developments affecting the business activities of our corporate customers, such as changes in commodity prices, and conditions in global financial markets and economic conditions in the United States and in foreign countries where we have a significant presence. For ease of understanding the following discussion of our results of operations, you should consider these macroeconomic factors and other key factors.

Trends in fiscal 2012

India's gross domestic product grew by 6.5% during fiscal 2012, compared to a growth of 8.4% in fiscal 2011. The agriculture sector grew by 2.8% during fiscal 2012 compared to a growth of 7.0% during fiscal 2011, and growth in the services sector was 8.5% during fiscal 2012 compared to a growth of 9.2% during fiscal 2011. The industrial sector grew by 2.6% during fiscal 2012 compared to a growth of 6.8% during fiscal 2011. Among the sub-sectors within the industrial sector, the mining sector recorded a negative growth of 0.9%, the manufacturing sector grew by 2.5% and electricity sector grew by 7.9% during the year.

Inflation, as measured by the Wholesale Price Index, remained high at above 9.0% till November 2011. Inflation began to moderate thereafter to 7.7% in March 2012. Average inflation for fiscal 2012 was 8.9% compared to 9.6% in fiscal 2011. Food articles inflation declined from an average of 15.6% in fiscal 2011 to 7.3% in fiscal 2012. Taking into account the inflationary trends during fiscal 2012, the Reserve Bank of India calibrated its policy stance in line with macroeconomic conditions. During fiscal 2012, the repo rate was increased by 175 basis points from 6.75% to 8.50%, with the last increase of 25 basis points announced on October 25, 2011. The Reserve Bank of India in its mid-quarter monetary policy review in December 2011 paused further tightening of policy rates. Further, the Reserve Bank of India reduced the cash reserve ratio by 125 basis points from 6.0% to 4.75% during the fourth quarter of fiscal 2012. Liquidity in the system remained in deficit during fiscal 2012. Average borrowing by banks under the liquidity adjustment facility window of the Reserve Bank of India increased from Rs. 470.8 billion during fiscal 2011 to Rs. 798.8 billion during fiscal 2012, with average daily borrowing reaching a peak of about Rs. 2.0 trillion at the end of March 2012. In view of the tight liquidity conditions, apart from the reduction in the cash reserve ratio, the Reserve Bank of India also injected liquidity through open market operations. The yields on the benchmark 10-year government securities increased by about 58 basis points to 8.57% at year-end fiscal 2012 from 7.99% at year-end fiscal 2011. In response to tight liquidity conditions and a rising interest rate environment, scheduled commercial banks increased their deposit and lending rates, particularly in the first half of fiscal 2012.

Non-food credit growth slowed during the year, from 21.3% at March 25, 2011 to 16.8% at March 23, 2012, before increasing to 19.3% at March 30, 2012. Based on sector-specific credit data at March 23, 2012, growth in credit to industry was 21.3% and to the services sector was 14.7% on a year-on-year basis. Credit to the infrastructure sector

moderated significantly recording a growth of 17.6% year-on-year at March 23, 2012 compared to 38.6% at March 25, 2011 mainly due to a slowdown in credit to the power and telecommunication sectors. Retail loan growth also slowed down to 12.1% year-on-year at March 23, 2012 compared to 17.0% at March 25, 2011. Similarly, deposit growth moderated during fiscal 2012 from 15.9% at March 25, 2011 to 13.5% at March 23, 2012, driven mainly by the decline in demand deposits. Deposit growth picked up at the year-end, with year-on-year growth in demand deposits at 15.3% and term deposits at 17.7% at March 30, 2012.

Equity markets remained volatile during fiscal 2012 due to global and domestic concerns. The benchmark equity index, the BSE Sensex, declined by 10.5% from 19,445 at year-end fiscal 2011 to 17,404 at year-end fiscal 2012. Foreign institutional investment flows into India during fiscal 2012 were lower compared to fiscal 2011, with net inflows of around U.S.\$ 16.8 billion during fiscal 2012, compared to U.S.\$ 29.4 billion in fiscal 2011.

While portfolio equity investment flows into India declined, foreign direct investment flows into India increased from US\$ 25.9 billion in fiscal 2011 to US\$ 33.0 billion in fiscal 2012. The current account deficit widened from US\$ 46.0 billion (2.5% of gross domestic product) to US\$ 78.2 billion (4.2% of gross domestic product) in fiscal 2012, reflecting a slowdown in exports relative to imports. India's balance of payments recorded a deficit of US\$ 12.8 billion in fiscal 2012 compared to a surplus of US\$ 13.1 billion in fiscal 2011. The rupee depreciated by 14.6% against the US dollar from Rs. 44.65 per US dollar at year-end fiscal 2011 to Rs. 51.16 per US dollar at year-end fiscal 2012.

First year retail premium underwritten in the life insurance sector decreased by 4.8% (on a weighted received premium basis) to Rs. 479.4 billion in fiscal 2012 from Rs. 503.7 billion in fiscal 2011 reflecting primarily the changes in product and distribution trends following the regulatory changes in respect of unit linked insurance products during fiscal 2011. The average assets under management of mutual funds decreased by 5.1% from Rs. 7,005.4 billion in March 2011 to Rs. 6,647.9 billion in March 2012. The gross premium of the non-life insurance sector (excluding specialized insurance institutions) grew by 23.0% to Rs. 547.6 billion in fiscal 2012 from Rs. 445.3 billion in fiscal 2011.

There were a number of key regulatory developments in the Indian financial sector during fiscal 2012:

- In May 2011, the Reserve Bank of India increased the interest rate on savings deposits by 50 basis points from 3.5% to 4.0%. Further, in October 2011, interest rates on savings accounts were deregulated with a uniform interest rate to be paid on deposits up to Rs. 100,000, and differential rates permitted for deposits of over Rs. 100,000 depending on the amount.
- The Reserve Bank of India increased the rates of provisioning required for non-performing loans in May 2011. For the secured portion of assets classified as doubtful, 25.0% provision was required for assets that were classified as doubtful for a year (relative to the previous provision requirement of 20%), 40.0% for assets that were classified as doubtful for one to three years (relative to the previous provision requirement of 30%) and 100.0% for assets classified as doubtful for more than three years. Further, for sub-standard assets, a provision of 15.0% of the total outstanding loan amount was required with effect from May 2011 (relative to the previous provision requirement of 10%). Unsecured exposures identified as sub-standard require an additional provision of 10.0%, i.e., a total of 25.0% on the outstanding balance.
- In May 2011, the report of the working group proposing a roadmap for the introduction of a financial holding company structure was released with key recommendations favoring the establishment of a financial holding company structure for the financial sector, particularly large financial groups, with a separate regulatory framework for these holding companies.
- In August 2011, the Reserve Bank of India released draft guidelines for the licensing of new banks in the private sector.
- In October 2011, the Reserve Bank of India permitted banks to open branches in tier 2 centers (centers with population of 50,000 to 99,999 as per census 2001) without prior approval.
- In November 2011, the all-in-cost ceiling on external commercial borrowings of three years to five years maturity was raised from 300 basis points to 350 basis points. The all-in-cost ceiling for borrowings of five years and above

maturity was kept unchanged at 500 basis points. Further, the all-in-cost ceiling for trade credits was increased from 200 basis points to 350 basis points.

- In November 2011, the Reserve Bank of India issued prudential guidelines for single name credit default swaps on corporate bonds. Banks are now allowed to undertake such transactions, both as market makers and users.

- In November 2011, the Reserve Bank of India announced guidelines permitting the establishment of infrastructure debt funds structured as non-banking finance companies. Guidelines for banks sponsoring such funds include a cap of 49% on equity holding.
- In December 2011, the Reserve Bank of India announced the deregulation of interest rates on non-resident (external) rupee deposits and ordinary non-resident accounts, thus permitting banks to determine the interest rate on savings and term deposits of maturity one year and above.
- In December 2011, the Reserve Bank of India issued guidelines on investments in subsidiaries and other companies, including investments in non-financial services companies. Equity investment by banks in non-financial services companies cannot exceed 10.0% of the investee company's paid-up share capital. Equity investments in non-financial services companies at the group level, including investments by the bank's subsidiaries, cannot exceed 20.0% of the investee company's paid-up share capital. Also, equity investments by a bank, including investments in its subsidiaries and other companies, cannot exceed 20.0% of the bank's paid-up share capital and reserves.
- In December 2011, the Reserve Bank of India announced draft guidelines for implementing the Basel III capital regulations. In May 2012, the Reserve Bank of India announced the final guidelines in this regard under which Indian banks would have to maintain a minimum common equity tier I capital of 5.5%, a minimum tier 1 capital ratio of 7.0% of risk weighted assets, a capital conservation buffer of 2.5% comprising only common equity capital and a minimum overall capital adequacy ratio of 9.0%. These regulations will be implemented beginning from January 2013 and will be fully implemented by March 31, 2018.
- In December 2011, the Reserve Bank of India issued guidelines on the internal ratings based approach for the calculation of capital charge for credit risks. Banks intending to migrate to the advanced measurement approach for operational risk and internal ratings based approaches for credit risk were required to apply to the Reserve Bank of India after April 1, 2012.
- In fiscal 2012, the Reserve Bank of India began regulating microfinance institutions. The Reserve Bank of India also decided to give priority sector status to bank credit extended to microfinance institutions on or after April 1, 2011, where such funds are to be lent onwards for certain specified purposes. In other related announcements, in December 2011, the Reserve Bank of India decided to provide non-banking finance company status to microfinance institutions having a minimum networth of Rs. 50 million, a minimum capital adequacy ratio of 15.0% of risk weighted assets and with interest on individual loans capped at 25.0% per annum with an aggregate margin cap of 12.0%.
- In March 2012, the Reserve Bank of India released a discussion paper on the dynamic loan loss provisioning framework, which proposes to replace the existing general provisioning norms. The objective is to limit the volatility in loan loss provisioning requirements witnessed during an economic cycle.
- In July 2012, the Reserve Bank of India issued revised guidelines on priority sector lending requirements. While keeping the lending targets unchanged, the revised guidelines specify certain categories of lending that would be eligible for classification as priority sector lending and its sub-segments. The guidelines also aim to increase direct agricultural lending by banks to individuals and reduce lending activity through intermediaries like non-banking finance companies and housing finance companies. The guidelines also stipulate that investments by banks in securitized assets, outright purchases of loans and assignments would be eligible for classification under priority sector if the underlying assets themselves qualified for such treatment. Further, the interest rates charged to ultimate borrowers by the originating entities in such transactions have also been capped in order for such transactions to be classified as priority sector lending. The guidelines also increased the priority sector lending

requirements of foreign banks in India that have 20 or more branches in order to bring them on par with domestic banks. Any future changes by the Reserve Bank of India in the directed lending norms may result in our continued inability to meet the priority sector lending requirements as well as require us to increase our lending to relatively more risky segments and may result in an increase in non-performing loans.

- In July 2012, the Reserve Bank of India released the report of the working group, which recommended that over a period of time, restructured loans (other than in the infrastructure sector) should be classified as non-performing and the provisioning and capital adequacy requirements applicable to non-performing assets should be applied to such loans. The report also recommends a phased increase in the general provisioning requirement on restructured standard assets from the present level of 2.0% to 5.0%, prescribing a ceiling on the conversion of debt into preference/equity shares, increasing the amount of owner haircuts required in restructurings of large exposures and requiring enhanced restructuring disclosure requirements for banks.
- With regard to the general insurance sector, the Insurance Regulatory and Development Authority announced several guidelines relating to the third party motor pool. In March 2011, the regulator decided that all general insurance companies would require to provide for losses on the third party motor pool at a provisional rate of 153.0% over fiscal 2008 to fiscal 2011 compared to the earlier loss rate of 122.0%-127.0%. Further, based on the results of an evaluation instituted to determine the loss rates of the third party motor pool, the loss rates were further revised upwards to 159% for fiscal 2008, 188% for fiscal 2009, 200% for fiscal 2010 and 213% for fiscal 2011. Further, pursuant to the decision to dismantle the third party motor pool by the Insurance Regulatory and Development Authority, effective April 1, 2012, the above loss rates were made applicable till March 31, 2012 and a Declined Risk Pool was created in its place. Under this approach, insurers would cede only those policies to the pool that they would not consider underwriting themselves. Insurers have been mandated to underwrite motor pool policies to the extent of the sum of 50% of their share in total gross premium and 50% share in total motor premium. Any shortfall against this requirement would be allocated to the insurers from the Declined Risk Pool. Additionally, as against the earlier approach of ceding all third party premiums including those related to comprehensive policies, under the Declined Risk Pool framework, only specific third party insurance premiums would be pooled.
- In November 2011, the Insurance Regulatory and Development Authority released draft guidelines on bancassurance, under which banks cannot align with more than one life, one non-life and one standalone health insurance company in any of the zones in the country, as defined by the regulator. Correspondingly, no insurer can align with a bancassurance agent in more than a specified number of zones.

Business overview

While assessing our performance, we monitor key financial variables such as movement in yield on assets, cost of funds and net interest margin, movement in fee income, cost ratios, loan loss provisions and return on assets and equity. We also monitor key business indicators such as deposit growth, funding mix, loan disbursements and loan delinquency trends. We also analyze changes in economic indicators such as interest rates, liquidity and exchange rates. In addition to these financial indicators, we monitor other non-financial indicators such as quality of customer service and the extent and nature of customer complaints and estimates of market share in key product lines.

Following the merger of ICICI with ICICI Bank in 2002, we experienced rapid growth in our business. The growth of our rupee loan portfolio was driven primarily by retail loans, including home loans, vehicle loans and unsecured personal loans and credit card receivables. We also commenced our strategy of international expansion and established subsidiaries and branches in several foreign countries. The growth of our international loan portfolio was driven primarily by foreign currency financing to Indian companies and their international operations, including financing for their overseas acquisitions. We also experienced robust growth in our insurance subsidiaries. These activities led to a rapid growth in our fee incomes from both retail and corporate customers. During this period, our branch network in India continued to be limited relative to the size of our balance sheet, and while deposits were our primary source of domestic funding, we had a high share of term deposits in our total deposits, including term deposits from companies and financial intermediaries. Our overseas branches were funded primarily by international bond issuances and other wholesale funding sources. Our principal international subsidiaries in the United Kingdom and

Canada were funded primarily by deposits. Our subsidiary in the United Kingdom had a sizeable proportion of demand deposits in its deposit base, and had also made investments in bonds of banks and financial institutions as a liquidity management strategy. During this period, we raised capital to support our growth. In fiscal 2008, we issued

equity shares in India and American Depository Shares in the United States, aggregating approximately Rs. 200.0 billion.

Following the onset of the global financial crisis in fiscal 2008, although we did not have any material direct exposure to U.S. sub-prime assets, we were adversely impacted by mark-to-market and realized losses on our international investments and credit derivatives portfolios on account of the widening of credit spreads in general. More generally, the global financial crisis impacted the Indian markets and led to reduced demand for retail savings and investment products and lower levels of corporate investment and merger and acquisition activity during the second half of fiscal 2009. This had a negative impact on our fee and other non-interest income (including dividends from subsidiaries). While we capitalized on opportunities in the fixed income markets due to a reduction in interest rates during the third quarter of fiscal 2009, our equity, fixed income and credit derivatives portfolios were negatively impacted due to weaker equity markets, volatile interest rates and a widening of credit spreads during fiscal 2009. The global and Indian economic slowdown and its impact on equity and debt markets also adversely impacted the profitability of some of our borrowers and their ability to access equity and debt financing. We experienced an increase in the level of restructured loans in fiscal 2009 and fiscal 2010. We experienced an increase in the non-performing loans in our retail portfolio in fiscal 2009 due to the seasoning of the portfolio and a higher level of defaults in unsecured personal loans and credit card receivables due to challenges in collections and the impact of the adverse macroeconomic environment in fiscal 2009.

Given the volatile economic environment in fiscal 2009, we focused on capital conservation, liquidity management and risk containment. We tightened our lending norms, especially in the unsecured retail segment and moderated our credit growth. We expanded our branch network with a focus on increasing our low cost and retail deposit base. At the same time, we maintained a rigorous control on operating expenses. In fiscal 2010, we focused on repositioning our balance sheet for the next phase of growth. We increased the proportion of low cost current and savings account deposits; reduced the level of net non-performing loans; continued to keep a rigorous control on operating expenses; reduced the level of unsecured retail loans and maintained a high level of capital adequacy. In fiscal 2011, we focused on growing our loan book by capitalizing on selected credit segments such as mortgages, secured retail loans and project finance, mobilizing low cost current account and savings deposits, improving credit costs, optimizing operating expenses and improving our customer service capabilities. The Reserve Bank of India approved our scheme of amalgamation with the Bank of Rajasthan, a private sector bank, with effect from the close of business on August 12, 2010. Our results for fiscal 2011 include the results of the Bank of Rajasthan for the period from August 13, 2010 to year-end fiscal 2011. In view of the uncertain macroeconomic environment, we sought to a balanced approach to growth, risk management and continued improvement in key profitability metrics in fiscal 2012. A discussion of our financial performance in fiscal 2012 is given below:

Our net profit increased by 25.5% from Rs. 60.9 billion in fiscal 2011 to Rs. 76.4 billion in fiscal 2012.

The increase in net profit was primarily due to an increase in net interest income by 20.9%, a decrease in provisions (excluding provisions for tax) by 45.1% and a decrease in non-interest expense by 5.6%, offset, in part, by a decrease in non-interest income by 9.0%.

The increase in net interest income was mainly due to a 13.0% increase in average interest-earning assets and an increase in net interest margin by 16 basis points.

Provisions and contingencies (excluding provisions for tax) decreased by 45.1% from Rs. 25.6 billion in fiscal 2011 to Rs. 14.1 billion in fiscal 2012, primarily due to a reduction in provisions for non-performing and other assets. The provision for non-performing and other assets decreased primarily due to a decrease in provisioning for non-performing consumer loans due to a sharp reduction in accretion to non-performing consumer loans from fiscal 2011.

Non-interest income decreased by 9.0% from Rs. 315.1 billion in fiscal 2011 to Rs. 286.6 billion in fiscal 2012 primarily due to a decrease in income from our insurance business. Income from treasury-related activities increased from Rs. 11.8 billion in fiscal 2011 to Rs. 16.9 billion in fiscal 2012 primarily due to gains on government securities and fixed income positions compared to a loss during fiscal 2011. Commission, exchange and brokerage income decreased by 4.3% from Rs. 66.0 billion in fiscal 2011 to Rs. 63.2 billion in fiscal 2012 primarily due to decrease in

fees relating to new corporate financing proposals, reflecting a slowdown in corporate sector activity, especially new corporate investment plans. Non-interest expense decreased by 5.6% from Rs. 313.0 billion in fiscal 2011 to Rs. 295.5 billion in fiscal 2012 primarily due to a decrease of 14.2% in expenses relating to our insurance business offset, in part, by an increase of 16.1% in employee expenses.

Net non-performing assets decreased by 15.0% from Rs. 32.1 billion at year-end fiscal 2011 to Rs. 27.2 billion at year-end fiscal 2012, reflecting primarily the lower net additions to non-performing retail assets. Net restructured assets increased from Rs. 19.6 billion at year-end fiscal 2011 to Rs. 41.9 billion at year-end fiscal 2012, primarily due to the restructuring of loans to microfinance institutions and certain corporate clients during fiscal 2012. After restructuring, based on the satisfactory performance of the borrower over a period of time, the restructured account is upgraded, and removed from this category.

Loans increased by 14.1% from Rs. 2,560.2 billion at year-end fiscal 2011 to Rs. 2,921.3 billion at year-end fiscal 2012 primarily due to an increase in domestic and overseas corporate loans. Deposits increased by 8.8% from Rs. 2,591.1 billion at year-end fiscal 2011 to Rs. 2,819.5 billion at year-end fiscal 2012, primarily due to an increase in savings and term deposits. We continued to expand our branch network in India during the year. ICICI Bank's branch and extension counters network in India increased from 2,529 at year-end fiscal 2011 to 2,752 at year-end fiscal 2012. ICICI Bank also increased its ATM network from 6,104 ATMs at year-end fiscal 2011 to 9,006 ATMs at year-end fiscal 2012.

The total capital adequacy ratio of ICICI Bank on an unconsolidated basis at year-end fiscal 2012, in accordance with the Reserve Bank of India guidelines on Basel II, was at 18.5% with tier-I capital adequacy ratio of 12.7% compared to total capital adequacy of 19.5% and tier-I capital adequacy of 13.2% at year-end fiscal 2011. Our total capital adequacy ratio on a consolidated basis at year-end fiscal 2012, in accordance with the Reserve Bank of India guidelines on Basel II and guidelines on consolidated prudential return, was at 19.6% with tier-I capital adequacy of 12.8% compared to total capital adequacy of 19.9% and tier-I capital adequacy of 12.7% at year-end fiscal 2011.

Business outlook

Growth in India's gross domestic product moderated to 6.5% in fiscal 2012 primarily driven by a slowdown in industrial sector growth to 2.6% during fiscal 2012 compared to 6.8% in fiscal 2011. The moderation in growth has occurred against the backdrop of a challenging global environment, including the sovereign debt crisis in Europe, slow growth in the United States and moderation in growth in several emerging markets including China. Further, domestic factors including inflation, high interest rates, an increase in the fiscal deficit and moderation in capital investment plans have impacted economic growth. Global and domestic factors have impacted foreign capital flows, which together with the widening of the current account deficit in fiscal 2012, resulted in a deficit in the balance of payments and a depreciation of the rupee vis-à-vis the US dollar. See also "Risk Factors—Risk Relating to India and other Economic and Market Risks—A prolonged slowdown in economic growth or rise in interest rates in India could cause our business to suffer".

During fiscal 2012, there was a moderation in loan growth and deposit growth in the Indian banking system, and an increase in the level of non-performing and restructured loans. There was also a decline in weighted new business premiums in the life insurance sector, reflecting the process of adjustment of product and distribution structures to comply with the revised unit linked insurance product regulations that came into effect during fiscal 2011. While the general insurance sector continued to grow, the profitability of general insurance companies was impacted by the additional provisions for losses on the third party motor pool. See also "Business—Overview of Our Products and Services—Insurance".

In the near term, there continue to be risks to economic growth in India and to growth, asset quality and profitability in the banking sector. Trends in systemic liquidity, interest rates and inflation would influence deposit growth, especially with respect to low cost savings and current account deposits. Our ability to grow our low cost deposit base may be impacted by increasing competition for such deposits. The slowdown in fresh corporate investments and new infrastructure projects has adversely impacted our related fee income revenue streams. Achieving directed lending targets is expected to be challenging. Regulations governing the financial sector in India,

including banking, insurance and asset management, continue to evolve, with a potential impact on the growth and profitability of financial services groups like us. Additional provisions with respect to third party motor insurance risks may impact the results of our general insurance subsidiary. Our overseas branches are primarily funded from wholesale sources and global financial market conditions may impact our ability to raise funds and grow the business of our overseas branches. Our banking subsidiaries in the United Kingdom and Canada have in the past focused primarily on leveraging their deposit franchises in these markets to extend financing to Indian companies for their operations in India and globally, including the financing of overseas acquisitions by Indian companies through structured transactions. In view of expectations of regulatory restrictions on cross-border financing of this nature, we are currently not pursuing significant growth in these subsidiaries, which would adversely impact their business volumes and profitability. See also “—Risks Relating to Our Business—We experienced rapid international growth in earlier years which has increased the complexity of the risks that we face”.

Over the longer-term, we see favorable prospects for the Indian economy. India’s strong domestic consumption and investment drivers are expected to continue to support healthy rates of growth. Against this backdrop, we expect increasing household incomes and consumption to lead to opportunities in retail savings, investment and loan products, significant industrial and infrastructure investment potential leading to opportunities in project and corporate finance, and increasing global linkages leading to opportunities in international banking for Indian corporations and non-resident Indians.

Over the last few years, we have rebalanced our deposit profile, reduced costs, reduced net non-performing assets and maintained high capital adequacy ratios. Our objective going forward is to leverage our capital base for profitable growth, while sustaining the improvements in our deposit profile, cost ratios and credit quality that we have achieved since fiscal 2010. As we grow our businesses, meeting customer expectations on service quality will be a critical element of our strategy.

The success of our strategy depends on several factors, including our ability to grow our low cost deposit base, grow our loan book profitably, contain non-performing and restructured loans, maintain regulatory compliance in an evolving regulatory environment and address regulators’ assessments of and observations on our operations, and compete effectively in the Indian corporate and retail financial services market. The success of our strategy is also subject to the overall regulatory and policy environment in which we operate including the direction of monetary policy. Our ability to execute our strategy will also depend on the liquidity and interest rate environment. See also “Risks Relating to Our Business—Our banking and trading activities are particularly vulnerable to interest rate risk and volatility in interest rates could adversely affect our net interest margin, the value of our fixed income portfolio, our income from treasury operations, the quality of our loan portfolio and our financial performance”.

For a detailed discussion of risks that we face in our business please refer to “Risk Factors”.

Other Key Factors

Under Indian GAAP, we have not consolidated certain entities (primarily 3i Infotech Limited) in which investments are intended to be temporary. However under U.S. GAAP, these entities have been consolidated in accordance with FASB ASC Subtopic 810-10, “Consolidation – Overall” or have been accounted for as equity affiliates in accordance with FASB ASC Subtopic 323-10, “Investments – Equity Method and Joint Ventures”. Under Indian GAAP, until fiscal 2011, 3i Infotech Limited was not consolidated as the investment is intended to be temporary. During fiscal 2012, loans to 3i Infotech Limited were restructured and as per the restructuring scheme, a certain portion of the loans provided by ICICI Bank to 3i Infotech Limited will be converted to equity shares. Based on the continued intention to reduce the stake below 20% in the near future and severe long term restrictions on 3i Infotech Limited under the debt restructuring scheme which impair the ability of 3i Infotech Limited to transfer funds to its investee, the results of 3i Infotech Limited were not consolidated in fiscal 2012 in Indian GAAP. However, under U.S. GAAP, this entity has

been accounted for as an equity affiliate in accordance with FASB ASC Subtopic 323-10 “Investments – Equity Method and Joint Ventures”.

Effect of Other Acquisitions

During fiscal 2011, ICICI Bank entered into an all-stock amalgamation of the Bank of Rajasthan at a share exchange ratio of 25 shares of ICICI Bank for 118 shares of the Bank of Rajasthan. Our financial statements for fiscal 2011 include the results of the operations of Bank of Rajasthan for the period from August 13, 2010 to year-end fiscal 2011. The amalgamation of the Bank of Rajasthan was not material to our overall operations.

During fiscal 2007, ICICI Bank entered into an all-stock merger with Sangli Bank at a share exchange ratio of 100 shares of ICICI Bank for 925 shares of Sangli Bank. Our financial statements for fiscal 2008 include the results of the operations of Sangli Bank from April 19, 2007. The value of this transaction was not material to our overall operations.

Average Balance Sheet

For fiscal 2010 and 2011, the average balances are the sum of the daily average balances outstanding for ICICI Bank, except for the averages of overseas branches which were calculated on a monthly basis until October 31, 2010 and on a fortnightly basis thereafter and the average of quarterly balances outstanding at the end of March of the previous fiscal year and June, September, December and March of that year for subsidiaries and other consolidated entities. For fiscal 2012, the average balances are the sum of daily average balances outstanding, except for the averages of overseas branches of ICICI Bank which were calculated on a fortnightly basis. The yield on average interest-earning assets is the ratio of interest income to average interest-earning assets. The cost of average interest-bearing liabilities is the ratio of interest expense to average interest-bearing liabilities. The average balances of advances include non-performing advances and are net of allowance for loan losses. We have recalculated tax-exempt income on a tax-equivalent basis. Tax exempt income primarily consists of dividend income and interest income on tax free bonds. We have applied an effective marginal tax rate of 29%. Other interest income has been bifurcated into rupee and foreign currency amounts in order to facilitate the explanation of movements of rupee and foreign currency spreads and margins. The rupee portion of other interest income primarily includes interest on income tax refunds and income from interest rate swaps. The foreign currency portion of other interest income primarily includes income from interest rate swaps in foreign currencies. The swaps considered in other interest income are part of the non-trading portfolio and are undertaken by us to manage the market risk arising from our assets and liabilities. Prior period figures have been regrouped to conform to the current year presentation.

The following table sets forth, for the periods indicated, the average balances of the assets and liabilities outstanding, which contribute to the major components of interest income, interest expense and net interest income.

Analysis of Changes in Interest Income and Interest Expense: Volume and Rate Analysis

The following table sets forth, for the periods indicated, the changes in the components of net interest income. The changes in net interest income between periods have been reflected as attributed either to volume or rate changes. For the purpose of this table, changes which are due to both volume and rate, have been allocated solely to volume.

	Fiscal 2011 vs. Fiscal 2010			Fiscal 2012 vs. Fiscal 2011		
	Increase (decrease) due to			Increase (decrease) due to

Average interest-bearing liabilities as a percentage of average total assets	80.32	79.18	75.31	72.11	72.63
Average interest-earning assets as a percentage of average interest-bearing liabilities	103.55	107.84	109.36	111.83	114.57
Yield	9.40	8.76	7.53	7.32	8.16
Rupee	10.33	10.05	8.78	8.28	9.32
Foreign currency	6.57	5.60	4.52	4.66	4.78

	2008	Year ended March 31,				2012
		2009	2010	2011	(in millions, except percentages)	
Cost of funds	7.36	6.83	5.58	5.20	6.10	
Rupee	8.00	7.86	6.44	5.97	7.36	
Foreign currency	5.59	4.76	3.90	3.53	3.50	
Spread(2)	2.04	1.93	1.95	2.12	2.06	
Rupee	2.33	2.19	2.34	2.31	1.96	
Foreign currency	0.98	0.84	0.62	1.13	1.28	
Net interest margin(3)	2.30	2.43	2.42	2.67	2.83	
Rupee	2.81	3.19	3.25	3.31	3.50	
Foreign currency	0.71	0.57	0.44	0.90	0.89	

(1) For fiscal 2009, 2010, 2011 and 2012, we have recalculated tax-exempt income on a tax-equivalent basis. The impact of re-calculation of tax-exempt income on tax equivalent basis was Rs. 3.9 billion for fiscal 2009, Rs. 4.1 billion for fiscal 2010, Rs. 3.6 billion for fiscal 2011, and Rs. 3.3 billion for fiscal 2012.

(2) Spread is the difference between yield on average interest-earning assets and cost of average interest-bearing liabilities. Yield on average interest-earning assets is the ratio of interest income to average interest-earning assets. Cost of average interest-bearing liabilities is the ratio of interest expense to average interest-bearing liabilities.

(3) Net interest margin is the ratio of net interest income to average interest-earning assets. The difference in net interest margin and spread arises due to the difference in amount of average interest-earning assets and average interest-bearing liabilities. If average interest-earning assets exceed average interest-bearing liabilities, net interest margin is greater than the spread and if average interest-bearing liabilities exceed average interest-earning assets, net interest margin is less than the spread.

Net Interest Income

The following table sets forth, for the periods indicated, the principal components of net interest income.

	Year ended March 31,			2012/2011 % change
	2011	2012	2012	
	(in millions, except percentages)			
Interest income(1)	Rs.300,814	Rs.379,948	US\$7,466	26.3 %
Interest expense	(193,426)	(250,132)	(4,915)	29.3 %
Net interest income	Rs.107,388	Rs.129,816	US\$2,551	20.9 %

(1) Tax exempt income has not been recalculated on a tax-equivalent basis.

Net interest income increased by 20.9% from Rs. 107.4 billion in fiscal 2011 to Rs. 129.8 billion in fiscal 2012 reflecting an increase of 13.0% in the average volume of interest-earning assets and an increase in net interest margin by 16 basis points from 2.67% in fiscal 2011 to 2.83% in fiscal 2012.

Net interest margin

Net interest margin increased by 16 basis points from 2.67% in fiscal 2011 to 2.83% in fiscal 2012. There was an increase of 19 basis points in the net interest margin on the rupee portfolio and a marginal decrease of one basis point in the net interest margin on the foreign currency portfolio.

The yield on the rupee portfolio increased by 104 basis points from 8.28% in fiscal 2011 to 9.32% in fiscal 2012, due to the following factors:

- The Reserve Bank of India increased the repo rate by 175 basis points from 5.00% to 6.75% during fiscal 2011, particularly during the latter part of the fiscal year. The full impact of this increase was reflected in

fiscal 2012. Moreover, the repo rate was increased by a further 175 basis points to 8.50% during fiscal 2012 in response to inflationary pressures. In response to tight liquidity conditions and a rising interest rate environment, scheduled commercial banks increased their lending and deposit rates. The Bank increased its base rate by 125 basis points, in three phases, during fiscal 2012 from 8.75% at the end of March 2011 to 10.00% with effect from August 13, 2011, with corresponding increases in the prime lending rate and floating reference rate. See also “—Business—Loan pricing”.

- The yield on rupee advances increased from 10.33% in fiscal 2011 to 11.72% in fiscal 2012 primarily due to an increase in yield on domestic corporate loans. The yield on domestic corporate loans increased as a result of incremental disbursements at higher lending rates, reflecting the rising interest rate environment during fiscal 2012. The Bank increased its base rate during fiscal 2012 from 8.75% at year-end fiscal 2011 to 10.00% at year-end fiscal 2012.
- The yield on interest-earning rupee investments increased from 6.84% in fiscal 2011 to 7.50% in fiscal 2012, primarily due to an increase in yield on government securities and corporate bonds and debentures in line with the rising interest rate environment.
- We include losses from the securitization of assets (including credit losses on existing securitized pools) from our interest income. The amount of such losses declined to Rs. 2.0 billion in fiscal 2012 from Rs. 5.5 billion in fiscal 2011.
- The Reserve Bank of India reduced the cash reserve ratio by 50 basis points from 6.0% to 5.5% with effect from January 28, 2012 and by a further 75 basis points to 4.75% with effect from March 10, 2012. As cash reserve ratio balances do not earn any interest income, these reductions had a positive impact on overall yield in fiscal 2012.

However, the above increase in yield on the rupee portfolio was offset, in part, by lower interest of Rs. 0.8 billion on income tax refunds in fiscal 2012, compared to Rs. 1.7 billion in fiscal 2011. The receipt, amount and timing of such income depend on the nature and timing of determinations by tax authorities and are not consistent or predictable.

The cost of funds for the rupee portfolio increased by 139 basis points from 5.97% in fiscal 2011 to 7.36% in fiscal 2012 primarily due to the following factors:

- The increase in the cost of funds for the rupee portfolio was due to an increase in the cost of deposits, reflecting the impact of an increase in deposit rates from the second half of fiscal 2011. The interest rate of 390-day retail term deposit was 6.50% at year-end fiscal 2010, 8.50% at year-end fiscal 2011 and 9.25% at year-end fiscal 2012. The interest rate of one year certificates of deposit was 6.05% at year-end fiscal 2010, 9.50% at year-end fiscal 2011 and 10.15% at year-end fiscal 2012.
- Further, the Reserve Bank of India increased the rate on savings account deposits to 4.0% on daily average balances with effect from May 3, 2011 resulting in an increase in the cost of average savings account deposits in fiscal 2012 compared to fiscal 2011. In its second quarter review of the monetary policy for fiscal 2012, the Reserve Bank of India deregulated the savings bank deposit rate with immediate effect and banks are now free to set their savings bank deposit interest rate. While the Bank has not changed its savings account deposit rate, any future increase in the savings account interest rate by the Bank will result in an increase in the cost of deposits.
- The cost of refinancing borrowings and call and term borrowings increased in fiscal 2012, in line with the upward movement in market rates. The cost of rupee borrowings increased from 8.74% in fiscal 2011 to 10.97% in fiscal 2012.

The yield on our foreign currency portfolio increased by 12 basis points from 4.66% in fiscal 2011 to 4.78% in fiscal 2012 primarily due to the following factors:

- The yield on overseas advances of ICICI Bank increased primarily due to new advances made at higher rates and the repayment and prepayment of low yielding loans. Further, such advances are benchmarked to LIBOR and the six month

LIBOR increased from 0.46% at year-end fiscal 2011 to 0.74% at year-end fiscal 2012.

However, the above increase in yield on the foreign currency portfolio was offset, in part, by the following factors:

- The yield on assets of ICICI Bank UK decreased primarily due to a decrease in the yield on loans on account of a decrease in higher yielding loans during fiscal 2012. The decrease in yield on loans was offset, in part, by increase in yield on investments.
- The yield on assets of ICICI Bank Canada decreased primarily due to a decline in the yield on loans on account of prepayments/repayments of higher yielding loans, offset, in part, by an increase in yield on investments on account of increase in investment in higher yielding corporate bonds.

The cost of funds for the foreign currency portfolio decreased marginally by three basis points from 3.53% in fiscal 2011 to 3.50% in fiscal 2012, due to the following factors:

- The cost of funds of ICICI Bank's foreign currency portfolio decreased primarily on account of a decrease in the cost of term deposits.
- The cost of funds of ICICI Bank Canada decreased primarily due to a decrease in the cost of deposits on account of a higher proportion of low cost savings account deposits and a reduction in term deposits during fiscal 2012.

• However, the above decrease in cost of fund was, offset, in part, by:

- The cost of funds of ICICI Bank UK increased primarily due to an increase in the cost of borrowings on account of the maturity of low cost borrowings, offset, in part, by a decline in the cost of term deposits and saving account deposits on account of a reduction in high cost deposits.

Spread decreased by six basis points from 2.12% in fiscal 2011 to 2.06% in fiscal 2012. The interest-earning assets increased by 13.0% in fiscal 2012 compared to an increase of 10.3% interest-bearing liabilities in fiscal 2012. As a result, net interest margin increased by 16 basis points from 2.67% in fiscal 2011 to 2.83% in fiscal 2012.

In April 2012, the Reserve Bank of India reduced the repo rate by 50 basis points to 8.0%. The extent and timing of any decline in interest rates and the consequent impact on the yields and net interest margin will depend on systemic liquidity, the inflation trajectory and the fiscal situation.

Interest-earning assets

The average volume of interest-earning assets increased by 13.0% from Rs. 4,157.2 billion in fiscal 2011 to Rs. 4,697.2 billion in fiscal 2012. The increase in interest-earning assets was primarily due to an increase in average loans by Rs. 370.7 billion and an increase in average interest-earning investments by Rs. 148.8 billion.

Average loans increased by 15.8% from Rs. 2,350.2 billion in fiscal 2011 to Rs. 2,720.9 billion in fiscal 2012 mainly due to an increase in average domestic and overseas corporate loans. Average rupee loans increased from Rs. 1,502.5 billion in fiscal 2011 to Rs. 1,743.0 billion in fiscal 2012. Average foreign currency loans increased by 15.4% from Rs. 847.7 billion in fiscal 2011 to Rs. 977.9 billion in fiscal 2012, primarily due to the impact of the depreciation of the rupee against the U.S. dollar and due to the recognition of securitized insured mortgage portfolio of ICICI Bank Canada of earlier years in loans. This recognition is due to the adoption of International Financial Reporting Standards by our Canadian subsidiary effective April 2011. This increase was offset, in part, by a decrease in average loans of our UK subsidiary in accordance with the strategy of reducing and rebalancing its loan book.

Average interest-earning investments increased by 9.9% from Rs. 1,498.0 billion in fiscal 2011 to Rs. 1,646.8 billion in fiscal 2012, primarily due to an increase in average interest-earning investments other than investments in government and other approved securities by 17.6% from Rs. 715.9 billion in fiscal 2011 to Rs. 842.2 billion in

fiscal 2012. Interest-earning investments, other than government and other approved securities include investments in corporate bonds and debentures, certificates of deposits, commercial paper, the Rural Infrastructure Development Fund and other related investments and investments in liquid mutual funds.

Interest-bearing liabilities

Average interest-bearing liabilities increased from Rs. 3,717.5 billion in fiscal 2011 to Rs. 4,099.8 billion in fiscal 2012 on account of an increase in average deposits and average borrowings. The average term deposits increased from Rs. 1,531.8 billion in fiscal 2011 to Rs. 1,647.8 billion in fiscal 2012. The average current and savings account deposits increased from Rs. 882.4 billion in fiscal 2011 to Rs. 986.4 billion in fiscal 2012. The average borrowings increased from Rs. 1,303.3 billion in fiscal 2011 to Rs. 1,465.7 billion in fiscal 2012 due to an increase in overseas borrowings and call and short term borrowings. The overseas borrowings of ICICI Bank increased primarily due to the impact of rupee depreciation.

Average deposits of our Canadian and UK subsidiaries decreased primarily due to a decline in term deposits. Average borrowings of our UK Subsidiary decreased due to redemption of Tier 2 bonds and maturity of other long term borrowings during fiscal 2012. Average borrowings of our Canadian subsidiary increased due to the balance sheet recognition of a corresponding borrowing liability for securitized insured mortgages, which were earlier qualified for true sale under Canadian GAAP, because of the adoption of International Financial Reporting Standards effective April 2011.

See also “Risk Factors—Risks Relating to Our Business—Our banking and trading activities are particularly vulnerable to interest rate risk and volatility in interest rates could adversely affect our net interest margin, the value of our fixed income portfolio, our income from treasury operations, the quality of our loan portfolio and our financial performance”.

Non-Interest Income

The following table sets forth, for the periods indicated, the principal components of non-interest income.

	Year ended March 31,			2012/2011 % change
	2011	2012	2012	
	(in millions, except percentages)			
Commission, exchange and brokerage	Rs. 65,978	Rs. 63,155	US\$ 1,241	(4.3)%
Profit/(loss) on treasury-related activities (net)(1)	11,808	16,908	332	43.2
Profit/(loss) on sale of land, buildings and other assets (net)	300	(37)	(1)	-
Premium and other operating income from insurance business	236,030	204,878	4,026	(13.2)
Miscellaneous income	1,017	1,730	34	70.1
Total non-interest income	Rs. 315,133	Rs. 286,634	US\$ 5,632	(9.0)%

(1) Includes profit/(loss) on the sale/revaluation of investments and exchange transactions.

Non-interest income primarily includes income pertaining to our insurance business, fee and commission income, income from treasury-related activities and other miscellaneous income. This analysis of non-interest income should be read against the backdrop of global and Indian economic developments, financial market activities, the competitive environment, client activity levels and our strategy, as detailed in earlier sections.

Non-interest income decreased by 9.0% from Rs. 315.1 billion in fiscal 2011 to Rs. 286.6 billion in fiscal 2012. The decrease in non-interest income was primarily due to a decrease in income relating to our insurance business and commission, exchange and brokerage income, offset, in part, by an increase in income relating to our treasury activities.

Commission, exchange and brokerage

Commission, exchange and brokerage income primarily includes fees from our banking business and fee and brokerage income of our securities brokering, asset management and venture capital fund management subsidiaries. The fee income of our banking business mainly comprises of fees from corporate clients such as loan processing fees, transaction banking fees and structuring fees and fees from retail customers such as loan processing fees, credit card fees, service charges on retail deposit accounts and third-party referral fees. Commission, exchange and brokerage income decreased by 4.3% from Rs. 66.0 billion in fiscal 2011 to Rs. 63.2 billion in fiscal 2012 primarily due to decrease in corporate fees. Commission, exchange and brokerage income of ICICI Bank decreased by 1.3% from Rs. 55.1 billion in fiscal 2011 to Rs. 54.4 billion in fiscal 2012 and that of our banking subsidiaries decreased by 23.5% from Rs. 1.7 billion in fiscal 2011 to Rs. 1.3 billion in fiscal 2012. There was also a marginal decrease in management fee income of our venture capital fund management subsidiary in fiscal 2012.

The commission, exchange and brokerage income of ICICI Bank decreased marginally on account of a decrease in loan processing fees due to a slowdown in new project and investment plans for the corporate sector. This was offset, in part, by an increase in third party referral fees, fees from credit cards and transaction banking fees.

Our banking subsidiaries' fee income decreased primarily due to a decrease in corporate fees of ICICI Bank UK resulting from lower business volumes.

The management fees of our venture capital fund management subsidiary decreased due to the termination of certain funds and a reduction in outstanding capital of certain funds on account of distribution of capital to investors.

Profit/(loss) on treasury-related activities (net)

Income from treasury-related activities includes income from the sale of investments and the revaluation of investments on account of changes in unrealized profit/(loss) in the fixed income, equity and preference share portfolio, units of venture capital and private equity funds, units of mutual funds and security receipts issued by asset reconstruction companies. It also includes income from foreign exchange transactions, consisting of various foreign exchange and derivatives transactions with clients, including options and swaps, and from credit derivatives instruments including credit default swaps, credit-linked notes and collateralized debt obligations. Profit from treasury-related activities increased from Rs. 11.8 billion in fiscal 2011 to Rs. 16.9 billion in fiscal 2012. The increase in income from treasury-related activities in fiscal 2012 was primarily due to gains on government securities and other fixed income positions compared to a loss in fiscal 2011, higher income from foreign exchange and derivatives transactions with our clients and higher mark-to-market/realized profits on credit derivatives. This increase was offset, in part, by lower profits from our equity portfolio and higher losses on security receipts.

During fiscal 2012, there was a profit on our government securities portfolio and other fixed income positions of Rs. 3.6 billion compared to a loss of Rs. 1.7 billion in fiscal 2011. During fiscal 2012, we capitalized on certain market opportunities to realize gains from the sale of our government and other domestic fixed income positions while in fiscal 2011, the loss was due to monetary tightening and negative systemic liquidity for most of the year which resulted in increase in yields on short-term government securities.

Our profit from the equity portfolio decreased from Rs. 4.3 billion in fiscal 2011 to Rs. 0.7 billion in fiscal 2012. The benchmark equity index, the BSE Sensex, decreased by 10.5% from 19,445 at year-end fiscal 2011 to 17,404 at year-end fiscal 2012, compared to an increase of 10.9% during fiscal 2011. The equity markets remained volatile during fiscal 2012 due to global and domestic events. The Eurozone sovereign debt crisis, sovereign downgrades by rating agencies along with a slowdown in global growth impacted investor sentiment. On the domestic front, persistent high inflation for most of the year, high interest rates and a slowdown in investments had an impact on

market sentiment.

At year-end fiscal 2012, the Bank had an outstanding net investment of Rs. 18.3 billion in security receipts issued by asset reconstruction companies for the sale of non-performing assets. During fiscal 2012, the Bank recorded realized/unrealized loss on these security receipts of Rs. 4.1 billion compared to a loss of Rs. 2.3 billion in fiscal 2011 due to a decline in net asset value of the security receipts.

127

We have credit derivatives instruments including both funded and non-funded instruments. The notional principal amount of funded instruments at year-end fiscal 2012 was Rs. 1.5 billion compared to Rs. 18.2 billion at year-end fiscal 2011. The notional principal amount of non-funded instruments at year-end fiscal 2012 was Rs. 11.1 billion (which includes Rs. 0.1 billion protection bought by the Bank) compared to Rs. 29.4 billion at year-end fiscal 2011. During fiscal 2012, softening of credit spreads and maturity of the portfolio resulted in a reduction in provision held against the credit derivatives portfolio and we had realized/unrealized gains of Rs. 0.7 billion on these credit derivatives instruments. During fiscal 2011, the softening of credit spreads resulted in a reversal of provisions held against the credit derivatives portfolio and we had realized/unrealized gains of Rs. 0.2 billion.

We offer various derivatives products, including options and swaps, to our clients primarily for their risk management purposes. We generally do not carry market risk on client derivatives positions as we manage our own risk in the inter-bank market. Profits or losses on account of currency movements on these transactions are borne by the clients. During fiscal 2009, due to high exchange rate volatility as a result of the global financial crisis, a number of clients experienced significant mark-to-market losses in derivatives transactions. On maturity or premature termination of the derivatives contracts, these mark-to-market losses became receivables owed to us. Some clients did not pay their derivatives contract obligations to us in a timely manner and, in some instances, clients filed lawsuits to avoid payment of derivatives contract obligations entirely. In other instances, at the request of clients, we converted overdue amounts owed to us into loans and advances. In October 2008, the Reserve Bank of India issued guidelines requiring banks to classify derivatives contract receivables overdue for 90 days or more as non-performing assets. Pursuant to these guidelines, the Bank reverses derivatives contract receivables in our income statement when they are overdue for 90 days or more. Further, mark-to-market gains on other derivative contracts with the same counterparties mentioned above are reversed through the profit and loss account. After reversal, any subsequent recovery is accounted for only on actual receipt of payment. In fiscal 2012, we made a reversal of derivative income of Rs. 0.4 billion relating to receivables under derivatives contracts that were overdue for more than 90 days and related mark-to-market receivables from such counterparties compared to a reversal of income of Rs. 0.3 billion in fiscal 2011.

The treatment of receivables owed in connection with derivatives contracts differs under U.S. GAAP from under Indian GAAP. Under U.S. GAAP, these receivables are analyzed to identify the required provisions in the same manner as provisions for loan losses. Accordingly, under U.S. GAAP, the amount receivable by us when a derivatives contract obligation arises is charged to the client's account and treated like a loan. We periodically conduct a comprehensive analysis of our corporate loan portfolio, including overdue derivatives receivables to determine appropriate allowances for loan losses. This analysis takes into account both qualitative and quantitative criteria including, among other considerations, the account conduct, future prospects, repayment history and financial performance. This comprehensive analysis includes an account-by-account review of a substantial portion of our corporate loan portfolio and an allowance is made for probable loss, if any, on each account. In addition to the detailed review of large balance loans, we also classify our portfolio based on the overdue status of each account and classify loans as impaired if principal or interest has remained overdue for more than 90 days.

Our income from foreign exchange transactions with clients and from margins on derivatives transactions with clients increased from Rs. 8.3 billion in fiscal 2011 to Rs. 12.0 billion in fiscal 2012, primarily on account of an enhanced focus on large corporate customers, acquisition of new small and medium corporate clients and higher remittance fees/commissions during the year due to the depreciation in the rupee.

Our subsidiary, ICICI Bank UK had an investment portfolio comprised of bonds, credit-linked notes, asset backed securities, treasury bills and equity of Rs. 70.3 billion at year-end fiscal 2011 and Rs. 59.7 billion at year-end fiscal 2012. The investment portfolio of ICICI Bank UK includes investments of Rs. 64.7 billion at year-end fiscal 2011 and Rs. 57.7 billion at year-end fiscal 2012 classified as "available-for-sale" investments. In the "available-for-sale" investments category, the mark-to-market post-tax loss reflected in the shareholders' equity decreased from Rs. 3.3 billion at year-end fiscal 2011 to Rs. 2.0 billion at year-end fiscal 2012 on account of a reduction in the investment

portfolio due to sales and redemptions.

128

Income relating to our insurance business

Income from our insurance business decreased by 13.2% from Rs. 236.0 billion in fiscal 2011 to Rs. 204.9 billion in fiscal 2012, primarily due to decrease in income from our life insurance business from Rs. 206.3 billion in fiscal 2011 to Rs. 167.5 billion in fiscal 2012, offset, in part by increase in income from our general insurance business from Rs. 29.7 billion in fiscal 2011 to Rs. 37.4 billion in fiscal 2012. Income from our insurance business includes net premium income, fee and commission income and release of certain actuarial reserves on lapsed policies created in earlier years by our life insurance business.

Income from our life insurance business includes net premium income of Rs. 139.1 billion and fee and other life insurance related income of Rs. 28.4 billion in fiscal 2012, compared to net premium income of Rs. 178.0 billion and fee and other life insurance income of Rs. 28.3 billion in fiscal 2011.

The Insurance Regulatory and Development Authority issued various regulations regarding unit-linked products, effective from September 1, 2010, which required insurers to maintain an interim reduction in yield, a cap on charges and make structural changes to the pension products. Almost all the unit-linked products operational in the market were withdrawn on August 31, 2010 as required by the revised unit-linked products guidelines, effective from September 1, 2010. The scarcity value created for these products before withdrawal resulted in a high growth during July and August 2010 with the industry registering a year-on-year growth of 32.0% from April to August 2010 on retail weighted received premium. After September 2010, insurers experienced a slowdown in new business primarily due to non-availability of the desired product suite and lead time required for distributors to become accustomed to new products. The limited availability of the regular premium unit-linked products in the second half of fiscal 2011 resulted in the decline in the premium from regular premium unit-linked policies and an increase in the premium from single premium policies and non-linked conventional products. As a result of this change, while the retail received premium (i.e., excluding group premium) earned by ICICI Prudential Life Insurance Company grew by 4.0% in fiscal 2011, the retail weighted received premium declined by 27.8% compared to fiscal 2010. Retail weighted received premium represents 100% of first year premium plus 10% of single premium (excluding group).

Continuing the trend from fiscal 2011, the industry retail weighted received premium decreased by 28.0% year-on-year for the first half of fiscal 2012 and ICICI Prudential Life Insurance Company's retail weighted received premium decreased by 57.0% for the same period. The relatively higher decline for ICICI Prudential Life Insurance Company was primarily due to the higher base for April to August 2010 when ICICI Prudential Life Insurance Company grew by 54.0% against the industry growth of 32.0% for the period. However, after September 2011, ICICI Prudential Life Insurance Company's retail weighted received premium grew 36.0% year-on-year in the second half of fiscal 2012, against industry growth of 16.0% for the same period. For fiscal 2012, the retail weighted received premium decline for the industry was 5.0% and for ICICI Prudential Life Insurance Company was 24.0%.

The premium income (gross of premium on reinsurance ceded) of ICICI Prudential Life Insurance Company decreased by 21.6% from Rs. 178.8 billion in fiscal 2011 to Rs. 140.2 billion in fiscal 2012. Single premium business decreased from Rs. 21.7 billion in fiscal 2011 to Rs. 8.0 billion in fiscal 2012. The new business premium from regular premium business decreased by 30.9% from Rs. 52.7 billion in fiscal 2011 to Rs. 36.4 billion in fiscal 2012 and renewal premium decreased by 8.2% from Rs. 104.4 billion in fiscal 2011 to Rs. 95.8 billion in fiscal 2012. ICICI Prudential Life Insurance Company's fee and other life insurance related income increased marginally from Rs. 28.3 billion in fiscal 2011 to Rs. 28.4 billion in fiscal 2012. There was an increase in policy fees, offset, in part, by a decrease in fund management fees and surrender charges and lower release of certain actuarial reserves on lapsed policies created in earlier years.

Income from our general insurance business includes net premium income amounting to Rs. 34.6 billion and commission income amounting to Rs. 2.8 billion in fiscal 2012, compared to net premium income of Rs. 26.9 billion

and commission income of Rs. 2.8 billion in fiscal 2011.

The gross written premium (including its share of the motor third party insurance pool) of ICICI Lombard General Insurance Company increased by 27.0% from Rs. 47.3 billion in fiscal 2011 to Rs. 60.1 billion in fiscal 2012 primarily due to the growth in motor insurance business and health insurance business. Commission income of

ICICI Lombard General Insurance Company remained at similar level of Rs. 2.8 billion in fiscal 2011 and fiscal 2012.

Miscellaneous income

Miscellaneous income increased from Rs. 1.0 billion in fiscal 2011 to Rs. 1.7 billion in fiscal 2012.

Non-Interest Expense

The following table sets forth, for the periods indicated, the principal components of non-interest expense.

	Year ended March 31,			2012/2011	
	2011	2012	2012	% change	
	(in millions, except percentages)				
Payments to and provisions for employees	Rs.43,926	Rs.51,013	US\$1,002	16.1	%
Depreciation on own property	6,608	6,292	124	(4.8))
Auditor's fees and expenses	161	160	3	(0.6))
Direct marketing agency expenses	2,579	2,574	51	(0.2))
Depreciation on leased assets	789	423	8	(46.4))
Expenses pertaining to insurance business	209,029	179,254	3,522	(14.2))
Other administrative expenses	49,932	55,805	1,097	11.8)
Total non-interest expenses	Rs.313,024	Rs.295,521	US\$5,807	(5.6))

Non-interest expense primarily includes expenses relating to our insurance business, payment to and provision for employees, direct marketing agency expenses and other administrative expenses. Operating expenses decreased from Rs. 313.0 billion in fiscal 2011 to Rs. 295.5 billion in fiscal 2012 primarily due to a decrease in expenses related to our insurance business.

Payments to and provisions for employees

Employee expenses increased by 16.1% from Rs. 43.9 billion in fiscal 2011 to Rs. 51.0 billion in fiscal 2012, primarily due to an increase in employee expenses of ICICI Bank, offset, in part, by a decrease in employee expenses of the life insurance subsidiary. Our employee base, including sales executives, employees on fixed term contracts and interns, increased from 79,978 at year-end fiscal 2011 to 81,254 at year-end fiscal 2012.

The employee expenses of ICICI Bank increased by 24.8% from Rs. 28.2 billion in fiscal 2011 to Rs. 35.2 billion in fiscal 2012. Employee expenses increased primarily due to an annual increase in salaries and performance bonuses and an increase in the employee base, including sales executives, employees on fixed term contracts and interns, from 56,969 employees at year-end fiscal 2011 to 58,276 employees at year-end fiscal 2012. The average number of employees of ICICI Bank, computed on a monthly basis, increased by around 18.0% in fiscal 2012 compared to fiscal 2011. Pension costs increased from Rs. 1,053.4 million in fiscal 2011 to Rs. 2,729.5 million in fiscal 2012, primarily due to the full year impact of the Bank of Rajasthan's pension cost of employees in fiscal 2012, on account of amalgamation of the Bank of Rajasthan from August 13, 2010 and actuarial loss primarily due to higher increase in cost of living adjustment (also known as "dearness relief") linked to inflation.

Employee expenses for ICICI Prudential Life Insurance Company decreased by 11.8% from Rs. 8.5 billion in fiscal 2011 to Rs. 7.5 billion in fiscal 2012, due to a decrease in average number of employees in fiscal 2012.

Depreciation

Depreciation on owned property decreased from Rs. 6.6 billion in fiscal 2011 to Rs. 6.3 billion in fiscal 2012. Depreciation on leased assets decreased from Rs. 0.8 billion in fiscal 2011 to Rs. 0.4 billion in fiscal 2012 due to a reduction in leased assets.

Other administrative expenses

Other administrative expenses increased from Rs. 49.9 billion in fiscal 2011 to Rs. 55.8 billion in fiscal 2012, primarily due to an increase in our branch and ATM network. The number of branches and extension counters (excluding foreign branches and offshore banking units) of ICICI Bank increased from 2,529 at year-end fiscal 2011 to 2,752 at year-end fiscal 2012. ICICI Bank also increased its ATM network from 6,104 ATMs at year-end fiscal 2011 to 9,006 ATMs at year-end fiscal 2012. The number of branches and offices of our insurance subsidiaries decreased from 1,714 at year-end fiscal 2011 to 1,302 at year-end fiscal 2012. Advertisement and publicity expenses increased in fiscal 2012 primarily due to the increase in expenses of our insurance subsidiaries.

Direct marketing agency expenses

Direct marketing agency expenses remained at Rs. 2.6 billion in fiscal 2011 and fiscal 2012. We use marketing agents, called direct marketing agents or associates, to source our retail assets. We include commissions paid to these direct marketing agents in non-interest expenses. In line with the Reserve Bank of India guidelines, these commissions are expensed upfront and not amortized over the life of the loan.

Expenses related to our insurance business

Expenses related to our insurance business include claims and benefit payouts, commission expenses and reserves for actuarial liability (including the investible portion of the premium on unit-linked policies of our life insurance business). Expenses relating to our insurance business decreased by 14.2% from Rs. 209.0 billion in fiscal 2011 to Rs. 179.3 billion in fiscal 2012, primarily due to a decrease in the business volume of our life insurance subsidiary, offset, in part, by an increase in claims and benefit payouts of our life insurance subsidiary and our general insurance business. The expenses related to our insurance business include expenses of our life insurance subsidiary amounting to Rs. 141.4 billion and of our general insurance subsidiary amounting to Rs. 37.9 billion in fiscal 2012, compared to expenses of Rs. 179.8 billion for our life insurance subsidiary and Rs. 29.2 billion for our general insurance subsidiary in fiscal 2011.

The expenses of our life insurance business include reserves for actuarial liability (including the investible portion of the premium on unit-linked policies) of Rs. 132.5 billion, claims and benefit payouts and commission expenses of Rs. 8.9 billion in fiscal 2012, compared to Rs. 172.9 billion of reserves for actuarial liability (including the investible portion of the premium on unit-linked policies), claims and benefit payouts and commission expenses of Rs. 6.9 billion in fiscal 2011.

During fiscal 2012, the reserves for the actuarial liability of the life insurance business (including the investible portion of the premium on unit-linked policies) decreased from Rs. 172.9 billion in fiscal 2011 to Rs. 132.5 billion in fiscal 2012 primarily due to a decrease in the volume of our unit-linked insurance business (including renewal) and our single premium business. The investible portion of the premium on linked policies of our life insurance business represents the amount of premium, including renewal premium received on linked policies of life insurance business invested, after deducting charges and the premium for risk coverage, in the underlying asset or index chosen by the policy holder. The claims and benefit payouts and commission expenses increased from Rs. 6.9 billion in fiscal 2011 to Rs. 8.9 billion in fiscal 2012 primarily due to higher claims on account of higher maturities and annuity payouts. In line with Indian accounting norms for insurance companies, we do not amortize the customer acquisition cost, but account for the expenses upfront.

The expenses of our general insurance business increased from Rs. 29.2 billion in fiscal 2011 to Rs. 37.9 billion in fiscal 2012. Claims and benefit payouts increased from Rs. 27.3 billion in fiscal 2011 to Rs. 36.0 billion in fiscal 2012 primarily due to additional provisions made to the Pool, mandated by the Insurance Regulatory and Development

Authority, and also due to an increase in claims/benefits paid in line with the increase in business volume. The commission expenses were Rs. 1.9 billion in fiscal 2011 and fiscal 2012.

In accordance with the Insurance Regulatory and Development Authority guidelines, from April 1, 2007 to March 31, 2012, ICICI Lombard General Insurance Company, together with all other general insurance companies, participated in the Indian Motor Third Party Insurance Pool (the "Pool"), administered by the General Insurance

Corporation of India. The Pool is a multilateral arrangement for insurance with respect to third party claims against commercial vehicles, the costs of which are shared by all general insurance companies in proportion to their overall market share. Based on an analysis of Pool performance, the Insurance Regulatory and Development Authority instructed all general insurance companies to provide for losses on the Pool at a provisional loss ratio of 153.0% from fiscal 2008 through fiscal 2011 in the financial results for fiscal 2011, compared to the earlier loss ratio of 122.0-127.0%. Accordingly, ICICI Lombard General Insurance Company made an additional provision of Rs. 2.7 billion during fiscal 2011. Further, in fiscal 2011, the Insurance Regulatory and Development Authority announced an increase in the rates of premium applicable to the motor third party insurance business by 68.5%, effective from April 25, 2011.

In fiscal 2012, the Insurance Regulatory and Development Authority directed the dismantling of the Pool and advised the general insurance companies to recognize the Pool liabilities using the loss ratios estimated by the General Actuaries Department of the United Kingdom; i.e., 159.0%, 188.0%, 200.0%, 213.0% and 145.0% respectively for underwriting years from fiscal 2008 to fiscal 2012. Further, the Insurance Regulatory and Development Authority directed all insurers that liability related to the Pool for fiscal 2008 and fiscal 2009 be accounted for and recognized in full in fiscal 2012. With respect to liabilities pertaining to fiscal 2010 to fiscal 2012, the liabilities could be recognized in fiscal 2012, although general insurance companies were also provided with the option to recognize the liability over a three year period. ICICI Lombard General Insurance Company recognized the additional liabilities of the Pool from fiscal 2008 to fiscal 2012 in fiscal 2012, and therefore, the loss after tax of ICICI Lombard General Insurance Company for fiscal 2012 includes the impact of additional Pool losses of Rs. 6.9 billion. See also “Business—Overview of Our Products and Services—Insurance”.

Provisions and contingencies (excluding tax provisions)

The following table sets forth, for the periods indicated, the composition of provisions and contingencies, excluding provisions for tax.

	2011	Year ended March 31,		2012/2011 % change
		2012	2012	
	(in millions, except percentages)			
Provision for investments (net)	Rs. 3,163	Rs. 1,174	US\$ 23	(62.9)%
Provision for non-performing and other assets	20,515	10,501	206	(48.8)
Provision for standard assets	40	288	6	-
Others	1,882	2,100	41	11.6
Total provisions and contingencies (excluding tax)	Rs. 25,600	Rs. 14,063	US\$ 276	(45.1)%

Provisions are made by ICICI Bank on standard, substandard and doubtful assets at rates prescribed by the Reserve Bank of India. Loss assets and unsecured portions of doubtful assets are provided/written off to the extent required by Reserve Bank of India guidelines. Subject to the minimum provisioning levels prescribed by the Reserve Bank of India, provisions on non-performing retail loans are made at the borrower level in accordance with the provisioning policy of ICICI Bank. The specific provisions on retail loans held by ICICI Bank are higher than the minimum regulatory requirement. During fiscal 2012, Reserve Bank of India revised its provisioning rates for non-performing assets. Accordingly, ICICI Bank made an additional provision of 5% to 10% on its non-performing advances. See also “Business—Loan portfolio—Classification of Loans”.

Provisions and contingencies (excluding provisions for tax) decreased by 45.1% from Rs. 25.6 billion in fiscal 2011 to Rs. 14.1 billion in fiscal 2012, primarily due to a reduction in provisions for non-performing and other assets. The provision for non-performing assets decreased from Rs. 20.5 billion in fiscal 2011 to Rs. 10.5 billion in fiscal 2012,

primarily on account of a reduction in the provision for non-performing consumer loans due to a sharp reduction in additions to non-performing consumer loans since fiscal 2011. We experienced an increase in non-performing consumer loans since fiscal 2008 due to the seasoning of the portfolio and a higher level of defaults in unsecured personal loans and credit card receivables due to challenges in collections and the impact of the adverse macroeconomic environments. While additions to gross non-performing consumer loans remained high in fiscal 2010, we experienced a sharp decline in additions to gross non-performing consumer loans in fiscal 2011 and fiscal

2012, due to the measures initiated by the Bank to curb delinquencies and improved collection practices. See also “Business—Classification of Loans—Impact of Economic Environment on Commercial and Consumer Loan Borrowers—Non-performing Assets”. This resulted in a decline in provisions, net of write-back of excess provision, against non-performing consumer loans from Rs. 15.0 billion in fiscal 2011 to Rs. 7.1 billion in fiscal 2012. The diminution in fair value of restructured loans (including the provision for funded interest) increased from Rs. 0.2 billion in fiscal 2011 to Rs. 3.5 billion in fiscal 2012.

ICICI Bank’s provisioning coverage ratio at year-end fiscal 2012, computed in accordance with the Reserve Bank of India guidelines, was 80.4%.

Provisions, including general provisions on performing assets, as a percentage of gross customer assets were 3.0% at year-end fiscal 2012 compared to 3.3% at year-end fiscal 2011.

Provision for investments decreased from Rs. 3.2 billion in fiscal 2011 to Rs. 1.2 billion in fiscal 2012. During fiscal 2011, provision for investments was higher primarily due to the impairment provision for investments held by the Bank, our consolidated venture capital funds and the provision on equity investments held by ICICI Bank UK.

Provisions for Restructured Loans and Non-performing Assets

We classify our assets, including those in our overseas branches, as performing and non-performing in accordance with the Reserve Bank of India guidelines, except in the case of ICICI Home Finance Company and our overseas banking subsidiaries. ICICI Home Finance Company classifies its loans and other credit facilities in accordance with the guidelines of its regulator, the National Housing Bank. A loan made by any of our overseas banking subsidiaries is classified as impaired, only if, there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition on the loan (a loss event) and the loss event has an impact on the estimated future cash flows of the loans that can be reliably estimated. Under Reserve Bank of India guidelines, for term loans, such assets are classified as non-performing if any amount of interest or principal remains overdue for more than 90 days. For overdrafts or cash credits, assets are classified as non-performing if the account remains out of order for a period of 90 days and, for bills, if the account remains overdue for more than 90 days. Further, non-performing assets are also classified into sub-standard, doubtful and loss assets based on the criteria stipulated by the Reserve Bank of India. See also “Business—Classification of Loans”.

Our non-performing assets include loans and advances as well as credit substitutes, which are funded credit exposures. In compliance with regulations governing the presentation of financial information by banks, we report only non-performing loans and advances in our financial statements.

The following table sets forth, at the dates indicated, information regarding roll-forward and average balances of restructured loans.

	At March 31,			2012/2011
	2011	2012	2012	%
	(in millions, except percentages)			Change
Opening balance (gross loans)	Rs. 62,662	Rs. 20,533	US\$ 403	(67.2)%
Add: Loans restructured during the year	12,223	35,055	689	186.8
Add: Increase in loans outstanding to previously restructured loans	46	465	9	910.9
Less: Loans upgraded to standard category during the year	(42,341)	(4,079)	(80)	(90.4)

Edgar Filing: ICICI BANK LTD - Form 20-F

Less: Loans downgraded to non-performing category during the year	(2,123)	(930)	(18)	(56.2)
Less: Recoveries during the year	(9,934)	(4,681)	(92)	(52.9)
Gross restructured loans	Rs. 20,533	Rs. 46,363	US\$911	125.8
Provisions for restructured loans	(940)	(4,447)	(87)	373.1

133

	At March 31,			2012/2011 % Change
	2011	2012	2012	
	(in millions, except percentages)			
Net restructured loans	Rs. 19,593	Rs. 41,916	US\$ 824	113.9
Average balance of net restructured loans(1)	36,265	28,141	553	(22.4)
Gross customer assets	Rs. 3,108,740	Rs. 3,531,625	US\$ 69,397	13.6
Net customer assets	3,024,694	3,443,817	67,672	13.9 %
Gross restructured loans as a percentage of gross customer assets	0.66 %	1.31 %		
Net restructured loans as a percentage of net customer assets	0.65 %	1.22 %		

(1) The average balance is the average of quarterly balances outstanding at the end of March of the previous year and June, September, December and March of the year.

A fully secured standard loan can be restructured by rescheduling principal repayments and/or the interest on the loan, but it must then be separately disclosed as a restructured loan in the year of restructuring. The Reserve Bank of India stipulates certain conditions in order to continue to classify a restructured standard loan as a standard asset. The restructured loans continue to be classified as such until they complete one year of payment in accordance with the restructured terms.

During fiscal 2012, loans amounting to Rs. 35.1 billion were restructured as compared to Rs. 12.2 billion in fiscal 2011, primarily due to restructuring of loans to microfinance institutions and certain corporations during fiscal 2012. During fiscal 2012, there was a moderation in economic activity in India and an increase in interest rates following continued inflation concerns. Further, volatility in capital markets due to global and domestic concerns limited the ability of corporations to access capital markets. In addition, banks including us, restructured a portion of their loans to micro-finance institution. As a result of the above, there has been an increase in restructured loans for the banking system in fiscal 2012, including for us. No loans were restructured second time during fiscal 2012. After restructuring, based on the satisfactory performance of the borrower over a period of time, the restructured account is upgraded and removed from this category. During fiscal 2012, based on payment performance the Bank upgraded certain borrower accounts totaling Rs. 4.1 billion, as compared to Rs. 42.3 billion during fiscal 2011. The gross restructured loans increased by 125.8% from Rs. 20.5 billion at year-end fiscal 2011 to Rs. 46.4 billion at year-end fiscal 2012, while the net restructured loans increased by 113.9% from 19.6 billion at year-end 2011 to Rs. 41.9 billion at year-end fiscal 2012. The net restructured loans were 1.2% as a percentage of net customer assets at year-end fiscal 2012, compared to 0.6% at year-end fiscal 2011. At year-end fiscal 2012, the diminution in fair value of restructured loans (including the provision for funded interest) was Rs. 4.4 billion as against Rs. 0.9 billion at year-end fiscal 2011.

The following table sets forth, at the dates indicated, certain information regarding non-performing assets.

	At March 31,			2012/2011 % change
	2011	2012	2012	
	(in millions, except percentages)			
Gross non-performing assets(1)	Rs. 111,575	Rs. 107,124	US\$ 2,105	(4.0)%
Provisions for non-performing assets(1)	(79,501)	(79,875)	(1,570)	0.5
Net non-performing assets(1)	Rs. 32,074	Rs. 27,249	US\$ 535	(15.0)%

Gross customer assets	Rs. 3,108,740	Rs. 3,531,625	US\$69,397	13.6	%
Net customer assets	3,024,694	3,443,817	67,672	13.9	
Gross non-performing assets as a percentage of gross customer assets	3.59	%	3.03	%	
Net non-performing assets as a percentage of net customer assets	1.06	%	0.79	%	

(1) Includes loans identified as non-performing/impaired in line with the guidelines issued by regulators of the respective subsidiary.

Gross additions to non-performing assets in fiscal 2012 were marginally higher at Rs. 35.8 billion as compared to Rs. 33.1 billion in fiscal 2011. During fiscal 2012, we upgraded non-performing assets amounting to Rs. 8.4 billion and made recoveries against non-performing assets amounting to Rs. 19.5 billion. During fiscal 2012, loans amounting to Rs. 12.3 billion were written-off as compared to Rs. 1.9 billion in fiscal 2011. As a result, gross non-performing assets decreased by 4.0% from Rs. 111.6 billion at year-end fiscal 2011 to Rs. 107.1 billion at year-end fiscal 2012.

We experienced an increase in non-performing assets in our consumer loans portfolio in fiscal 2009 due to the seasoning of the portfolio and a higher level of defaults in unsecured personal loans and credit card receivables due to challenges in collections and the impact of the adverse macroeconomic environments. While additions to gross non-performing assets in our consumer loans remained high in fiscal 2010, we experienced a sharp decline in additions to gross non-performing consumer loans in fiscal 2011 and fiscal 2012, due to the measures initiated by the Bank to curb delinquencies and improved collection practices. See also “Business—Classification of Loans— Impact of Economic Environment on Commercial and Consumer Loan Borrowers—Non-performing Assets”. Gross additions to non-performing consumer loans, which were Rs. 55.8 billion in fiscal 2010, declined sharply to Rs. 18.5 during fiscal 2011 and remained at similar level of Rs. 18.6 billion in fiscal 2012. Gross additions to non-performing commercial loans increased from Rs. 14.6 billion in fiscal 2011 to Rs. 17.2 billion in fiscal 2012.

In fiscal 2011, the Bank sold credit card receivables to an asset reconstruction company, which were fully written-off. In fiscal 2012, the Bank sold two commercial loans with aggregate book value (net of provision) of Rs. 44 million to an asset reconstruction company. See also “Business—Classification of Loans—Non-Performing Asset Strategy”.

As a percentage of net customer assets, net non-performing assets were 0.8% at year-end fiscal 2012, compared to 1.1% at year-end fiscal 2011.

Tax Expense

Income tax expense increased by 32.9% from Rs. 20.7 billion in fiscal 2011 to Rs. 27.5 billion in fiscal 2012 due to an increase in profit before tax and a higher effective tax rate of 25.7% in fiscal 2012 as compared to the effective tax rate of 24.7% in fiscal 2011.

Financial Condition

Assets

The following table sets forth, at the dates indicated, the principal components of assets.

	At March 31,			2012/2011 % change
	2011	2012	2012	
	(in millions, except percentages)			
Cash and cash equivalents	Rs. 393,853	Rs. 411,563	US\$ 8,087	4.5 %
Investments	2,096,528	2,398,641	47,134	14.4
Advances (net of provisions)	2,560,193	2,921,254	57,403	14.1
Fixed assets	54,895	54,320	1,068	(1.0)
Other assets	232,210	256,136	5,033	10.3
Total assets	Rs. 5,337,679	Rs. 6,041,914	US\$ 118,725	13.2 %

Our total assets increased by 13.2% from Rs. 5,337.7 billion at year-end fiscal 2011 to Rs. 6,041.9 billion at year-end fiscal 2012, primarily due to an increase in net advances and investments. Net advances increased by

14.1% from Rs. 2,560.2 billion at year-end fiscal 2011 to Rs. 2,921.3 billion at year-end fiscal 2012. Investments increased by 14.4% from Rs. 2,096.5 billion at year-end fiscal 2011 to Rs. 2,398.6 billion at year-end fiscal 2012.

Cash and cash equivalents

Cash and cash equivalents include cash in hand, and balances with the Reserve Bank of India and other banks, including money at call and money callable on short notice. Cash and cash equivalents increased from Rs. 393.9 billion at year-end fiscal 2011 to Rs. 411.6 billion at year-end fiscal 2012. The increase was primarily due to an increase in term money lending and call money lending by overseas branches. The balances with the Reserve Bank of India decreased from Rs. 171.2 billion at year-end fiscal 2011 to Rs. 157.9 billion at year-end fiscal 2012 primarily due to reduction in cash reserve ratio requirement by 125 basis points from 6.00% at year-end fiscal 2011 to 4.75% at year-end fiscal 2012.

Investments

Total investments increased by 14.4% from Rs. 2,096.5 billion at year-end fiscal 2011 to Rs. 2,398.6 billion at year-end fiscal 2012, primarily due to an increase in investments in government securities, corporate bonds and debentures, investments in the Rural Infrastructure Development Fund and in other related investments in lieu of a shortfall in meeting directed lending requirements and certificates of deposit by ICICI Bank. This was offset, in part, by a decrease in investments in mutual funds, funded credit derivatives and pass-through-certificates. Further, the transactions of ICICI Bank with Reserve Bank of India under the Liquidity Adjustment Facility, previously accounted for as purchase and sale transactions, were accounted for as borrowing and lending transactions at year-end fiscal 2012, as a result of which investments were higher by Rs. 168.0 billion at year-end fiscal 2012. The investment of ICICI Bank in government securities increased from Rs. 650.1 billion in fiscal 2011 to Rs. 873.9 billion in fiscal 2012. Further, there was a decrease in investments held to cover linked liabilities of ICICI Prudential Life Insurance Company. Investments held to cover the liabilities on unit-linked insurance policies of ICICI Prudential Life Insurance Company decreased by 1.7% from Rs. 588.3 billion at year-end fiscal 2011 to Rs. 578.2 billion at year-end fiscal 2012. The decrease in linked assets under management is primarily attributable to lower new business premium and mark-to-market losses on investments held for unit-linked business (the risks and rewards on unit-linked business lie to a large extent with the policy holders).

Investments of our overseas banking subsidiaries decreased primarily due to a decline in the investment portfolio of ICICI Bank UK offset, in part, by an increase in the investment portfolio of ICICI Bank Canada. ICICI Bank UK's investment portfolio declined from Rs. 70.3 billion at year-end fiscal 2011 to Rs. 59.7 billion at year-end fiscal 2012 primarily due to a decline in investment in bonds, offset, in part, by an increase in investment in treasury bills. ICICI Bank Canada's investment portfolio increased by 12.6% from Rs. 47.6 billion at year-end fiscal 2011 to Rs. 53.6 billion at year-end fiscal 2012 primarily due to increase in investments in corporate bonds.

At year-end fiscal 2012, we had outstanding net investment of Rs. 1.5 billion in funded credit derivatives as compared to Rs. 18.2 billion at year-end fiscal 2011. At year-end fiscal 2012, the Bank had an outstanding net investment of Rs. 18.3 billion in security receipts issued by asset reconstruction companies in relation to sales of non-performing assets, compared to Rs. 28.3 billion at year-end fiscal 2011. See also "Business—Overview of Our Products and Services—Treasury".

Advances

Net advances increased by 14.1% from Rs. 2,560.2 billion at year-end fiscal 2011 to Rs. 2,921.3 billion at year-end fiscal 2012 primarily due to an increase in domestic and overseas corporate loans and an increase in ICICI Bank Canada's loans due the recognition of securitized insured mortgage portfolio of earlier years in loans. This recognition

is due to the adoption of International Financial Reporting Standards by our Canadian subsidiary effective April 2011.

The increase was offset, in part, by a decrease in net advances of our other subsidiaries namely, ICICI Bank UK and ICICI Home Finance Company.

Net retail advances of ICICI Bank increased by 7.7% from Rs. 836.8 billion at year-end fiscal 2011 to Rs. 901.3 billion at year-end fiscal 2012. Net advances of the overseas branches (including the offshore banking unit) of ICICI Bank increased in U.S. dollar terms by 9.7% from U.S.\$ 12.4 billion at year-end fiscal 2011 to U.S.\$ 13.6 billion at year-end fiscal 2012. In rupee terms, net advances of overseas branches (including offshore banking unit) increased by 26.0% from Rs. 551.0 billion at year-end fiscal 2011 to Rs. 694.0 billion at year-end fiscal 2012. Net advances of overseas banking subsidiaries decreased in U.S. dollar terms by 12.0% from U.S.\$ 7.5 billion at year-end fiscal 2011 to U.S.\$ 6.6 billion at year-end fiscal 2012, however in rupee terms, the net advances increased marginally by 1.5% from Rs. 332.8 billion at year-end fiscal 2011 to Rs. 337.7 billion at year-end fiscal 2012 due to rupee depreciation.

ICICI Bank UK's net advances decreased in line with its strategy of consolidation with respect to its corporate loan book. ICICI Bank UK has in the past focused primarily on extending financing to Indian companies for their operations in India and globally (including the financing of overseas acquisitions by Indian companies). In view of the evolving economic and regulatory environment globally and in the UK, and regulatory limitations on cross-border financing of the nature undertaken by our international banking subsidiaries in earlier years, ICICI Bank UK had adopted a strategy of reducing and rebalancing its loan portfolio.

Fixed and other assets

Fixed assets include premises, furniture and fixtures, assets given on lease and other fixed assets. Fixed assets decreased marginally by 1.0% from Rs. 54.9 billion at year-end fiscal 2011 to Rs. 54.3 billion at year-end fiscal 2012. Other assets increased by 10.3% from Rs. 232.2 billion at year-end fiscal 2011 to Rs. 256.1 billion at year-end fiscal 2012.

Liabilities and Stockholders' Equity

The following table sets forth, at the dates indicated, the principal components of liabilities and stockholders' equity.

	At March 31,			2012/2011 % change
	2011	2012	2012	
	(in millions, except percentages)			
Deposits	Rs. 2,591,060	Rs. 2,819,505	US\$ 55,404	8.8 %
Borrowings(1)	1,258,389	1,612,966	31,695	28.2
Other liabilities(2)	921,623	982,401	19,304	6.6
Minority interest	13,582	14,277	281	5.1
Total liabilities	4,784,654	5,429,149	106,684	13.5
Equity share capital	11,518	11,528	227	0.1
Reserves and surplus(3)	541,507	601,237	11,814	11.0
Total liabilities (including capital and reserves)	Rs. 5,337,679	Rs. 6,041,914	US\$ 118,725	13.2 %

(1) Includes subordinated debt and redeemable non-cumulative preference shares.

(2) Includes proposed dividend (including corporate dividend tax) of Rs. 21.5 billion for fiscal 2012 (fiscal 2011: Rs. 18.4 billion).

(3) Includes Employees Stock Options Outstanding.

Our total liabilities (including capital and reserves) increased by 13.2% from Rs. 5,337.7 billion at year-end fiscal 2011 to Rs. 6,041.9 billion at year-end fiscal 2012, primarily due to an increase in deposits and borrowings.

Deposits

Deposits increased by 8.8% from Rs. 2,591.1 billion at year-end fiscal 2011 to Rs. 2,819.5 billion at year-end fiscal 2012. Term deposits of ICICI Bank increased from Rs. 1,239.6 billion at year-end fiscal 2011 to Rs. 1,444.8 billion at year-end fiscal 2012, while savings deposits increased from Rs. 668.7 billion at year-end fiscal 2011 to Rs. 760.5 billion at year-end fiscal 2012 and current deposits increased from Rs. 347.8 billion at year-end fiscal 2011 to Rs. 349.7 billion at year-end fiscal 2012. The current and savings account deposits of ICICI Bank increased from

Rs. 1,016.5 billion at year-end fiscal 2011 to Rs. 1,110.2 billion at year-end fiscal 2012. The increase in deposits reflected our continued focus on retail deposits.

The deposits of ICICI Bank UK decreased from Rs. 187.8 billion at year-end fiscal 2011 to Rs. 122.7 billion at year-end fiscal 2012 primarily due to a decline in term deposits, which was in line with the reduction in assets. The deposits of ICICI Bank Canada decreased from Rs. 154.4 billion at year-end fiscal 2011 to Rs. 147.0 billion at year-end fiscal 2012, primarily due to a decrease in term deposits from Rs. 122.5 billion at year-end fiscal 2011 to Rs. 104.3 billion at year-end fiscal 2012.

Our total term deposits increased from Rs. 1,503.7 billion at year-end fiscal 2011 to Rs. 1,631.7 billion at year-end fiscal 2012, while savings deposits increased from Rs. 732.6 billion at year-end fiscal 2011 to Rs. 829.1 billion at year-end fiscal 2012. Total deposits at year-end fiscal 2012 formed 63.6% of our funding (i.e., deposits and borrowings, including subordinated debt and redeemable non-cumulative preference shares). See also “Business—Funding”.

Borrowings

Borrowings (including redeemable non-cumulative preference shares and subordinated debt) increased by 28.2% from Rs. 1,258.4 billion at year-end fiscal 2011 to Rs. 1,613.0 billion at year-end fiscal 2012. The transactions of ICICI Bank with the Reserve Bank of India under the Liquidity Adjustment Facility, previously accounted for as purchase and sale transactions, were accounted for as borrowing and lending transactions at year-end fiscal 2012. At year-end fiscal 2012, Rs. 168.0 billion was recorded as borrowings under the Liquidity Adjustment Facility. Further, the increase in borrowings of ICICI Bank was on account of overseas borrowings, bond borrowings and short-term borrowings. The borrowings of overseas branches of ICICI Bank (including our offshore banking unit) increased in USD terms by 5.7% from U.S.\$ 12.3 billion at year-end fiscal 2011 to U.S.\$ 13.0 billion at year-end fiscal 2012. In rupee terms, borrowings of overseas branches (including our offshore banking unit) increased by 20.2% from Rs. 550.5 billion at year-end fiscal 2011 to Rs. 661.9 billion at year-end fiscal 2012.

Further, there was an increase in borrowings of the Canadian subsidiary due to the recognition of a corresponding borrowing liability for securitized insured mortgages on account of adoption of International Financial Reporting Standards during fiscal 2012. The increase was offset, in part, by the repayment of domestic term money borrowings and a decrease in borrowings of our UK subsidiary and home finance subsidiary. See also “Business—Funding”.

Other liabilities

Other liabilities primarily consist of liabilities on insurance policies in force, pertaining to our insurance subsidiaries and proposed dividend, including corporate dividend tax. Other liabilities increased by 6.6% from Rs. 921.6 billion at year-end fiscal 2011 to Rs. 982.4 billion at year-end fiscal 2012 primarily due to an increase in liabilities on policies in force of our life insurance business from Rs. 644.8 billion at year-end fiscal 2011 to Rs. 662.3 billion at year-end fiscal 2012. This increase in liabilities on insurance policies in force was in line with the increase in non-linked business during fiscal 2012.

In India, dividends declared for a fiscal year are normally paid in the following year. We declared a dividend of Rs. 14.00 per equity share for fiscal 2011, which was paid in fiscal 2012. We declared a dividend of Rs. 16.50 per equity share for fiscal 2012, which was paid in fiscal 2013.

Equity share capital and reserves

Stockholders' equity increased from Rs. 553.0 billion at year-end fiscal 2011 to Rs. 612.8 billion at year-end fiscal 2012 primarily due to the annual accretion to reserves out of profit for fiscal 2012.

Fiscal 2011 to Fiscal 2010

Summary

Our net profit increased by 30.4% from Rs. 46.7 billion in fiscal 2010 to Rs. 60.9 billion in fiscal 2011.

During fiscal 2011, the increase in net interest income by 13.9% and in non-interest income by 7.0% and the decrease in provisions by 43.8% (excluding provisions for tax) were partly offset by an increase of 12.9% in non-interest expense. The increase in net interest income was mainly due to a 2.4% increase in average interest-earning assets and an increase in net interest margin by 25 basis points.

Provision and contingencies (excluding provisions for tax) decreased by 43.8% from Rs. 45.6 billion in fiscal 2010 to Rs. 25.6 billion in fiscal 2011, primarily due to a reduction in provisions for non-performing assets. The provisions on non-performing assets decreased primarily due to a decrease in provisioning for retail non-performing loans due to a sharp reduction in accretion to retail non-performing loan portfolio in fiscal 2011. This was partly offset by an increase in impairment provisions for investments.

Non-interest income increased by 7.0%, driven by an increase in income from our insurance business from Rs. 204.8 billion in fiscal 2010 to Rs. 236.0 billion in fiscal 2011. Income from treasury-related activities decreased from Rs. 26.2 billion in fiscal 2010 to Rs. 11.8 billion in fiscal 2011. Income from treasury-related activities in fiscal 2010 primarily reflected higher profits from our equity portfolio and a reduction of mark-to-market losses on our credit derivatives portfolio. Non-interest expense increased by 12.9%, primarily due to an increase of 19.4% in employee expenses, an increase of 16.7% in expenses relating to our insurance business and an increase of 6.9% in direct marketing agency expenses due to higher volumes of retail loan origination volumes.

Net non-performing assets decreased from Rs. 46.7 billion at year-end fiscal 2010 to Rs. 32.1 billion at year-end fiscal 2011, reflecting a decline in net additions to gross non-performing assets and higher provisioning. Net restructured assets decreased from Rs. 59.9 billion at year-end fiscal 2010 to Rs. 19.6 billion at year-end fiscal 2011, primarily due to upgrades of certain borrowers in the power, services, food and beverage, and automobile sectors. After restructuring, based on the satisfactory performance of the borrower over a period of time, the restructured account is upgraded, and removed from this category.

Loans increased by 13.4% from Rs. 2,257.8 billion at year-end fiscal 2010 to Rs. 2,560.2 billion at year-end fiscal 2011 primarily due to an increase in domestic and overseas corporate loans on account of higher credit demand and increased business activity in the corporate sector due to the economic recovery and loans taken over from the Bank of Rajasthan amounting to Rs. 65.3 billion at August 12, 2010. Deposits increased by 7.3% from Rs. 2,415.7 billion at year-end fiscal 2010 to Rs. 2,591.1 billion at year-end fiscal 2011, primarily due to an increase in current and savings account deposits. ICICI Bank's current and savings account deposits as a percentage of total deposits increased from 41.7% at year-end fiscal 2010 to 45.1% at year-end fiscal 2011. We continued to expand our branch network in India during the year. Our branch and extension counters network in India increased from 1,707 at year-end fiscal 2010 to 2,529 at year-end fiscal 2011. We also increased our ATM network from 5,219 ATMs at year-end fiscal 2010 to 6,104 ATMs at year-end fiscal 2011. Our network in India increased to 2,534 branches and extension counters network and 6,583 ATMs in India at July 31, 2011. This includes branches and ATMs of the Bank of Rajasthan.

The total capital adequacy ratio of ICICI Bank on an unconsolidated basis at year-end fiscal 2011, in accordance with the Reserve Bank of India guidelines on Basel II, increased to 19.5% with a tier-I capital adequacy ratio of 13.2% from a total capital adequacy ratio of 19.4% and tier-I capital adequacy ratio of 14.0% at year-end fiscal 2010. Our total capital adequacy ratio on a consolidated basis at year-end fiscal 2011, in accordance with the Reserve Bank of India guidelines on Basel II and guidelines on consolidated prudential return, increased to 19.9% with a tier-I capital

adequacy ratio of 12.7% from a total capital adequacy ratio of 19.2% and tier-I capital adequacy ratio of 12.9% at year-end fiscal 2010.

Net Interest Income

The following table sets forth, for the periods indicated, the principal components of net interest income.

	Year ended March 31,			2011/2010 % change
	2010	2011	2011	
	(in millions, except percentages)			
Interest income(1)	Rs. 301,537	Rs. 300,814	US\$ 5,911	(0.2)%
Interest expense	(207,292)	(193,426)	(3,801)	(6.7)
Net interest income	Rs. 94,245	Rs. 107,388	US\$ 2,110	13.9 %

(1) Tax exempt income has not been recalculated on a tax-equivalent basis.

Net interest income increased by 13.9% from Rs. 94.2 billion in fiscal 2010 to Rs. 107.4 billion in fiscal 2011 reflecting an increase of 2.4% in the average volume of interest-earning assets and an increase in net interest margin by 25 basis points from 2.42% in fiscal 2010 to 2.67% in fiscal 2011.

Net interest margin

Net interest margin increased by 25 basis points from 2.42% in fiscal 2010 to 2.67% in fiscal 2011. There was an increase of six basis points in the net interest margin on the rupee portfolio and an increase of 46 basis points in the net interest margin on the foreign currency portfolio.

The yield on the rupee portfolio decreased by 50 basis points from 8.8% in fiscal 2010 to 8.3% in fiscal 2011, due to the following factors:

- In fiscal 2010, due to abundant systemic liquidity and a low interest rate environment, banks reduced their deposit rates for various maturities by 25-250 basis points between March 2009 and December 2009. The decrease in deposit rates also resulted in a decline in lending rates in the system. The full impact of this reduction was reflected in fiscal 2011. Interest rates increased significantly during fiscal 2011, especially in the second half of the year. In response to tight systemic liquidity and the rising interest rate environment, scheduled commercial banks increased their lending and deposit rates for various maturities. The Bank increased its base rate from 7.50% at July 1, 2010 to 8.75% at year-end fiscal 2011 with corresponding increases to the prime lending rate and floating reference rate. The full impact of these increases will be reflected in fiscal 2012.
- The yield on rupee advances decreased from 11.2% in fiscal 2010 to 10.3% in fiscal 2011. The decrease in yield on advances was primarily due to a decrease in the proportion of the high-yielding unsecured retail portfolio, a decrease in yield on domestic non-retail advances reflecting the declining interest rate scenario during fiscal 2010 and the introduction of new products by ICICI Bank such as dual-rate home loans with lower rates of interest in the initial years, after which rates are reset at higher rates. The proportion of higher yielding unsecured retail loans in our loan portfolio declined as a result of our strategy to reduce our exposure to this asset class.
- The Reserve Bank of India increased the cash reserve ratio by 75 basis points to 5.75% at year-end fiscal 2010 and further to 6.0% in April 2010. As cash reserve ratio balances do not earn any interest income, the increase in this requirement resulted in a negative impact on the yield on interest-earning assets. The full impact of increases in the cash reserve ratio requirement during fiscal 2010 and the initial part of fiscal 2011 was reflected in the yield on interest-earning assets in fiscal 2011.

- We deduct losses from the securitization of assets (including credit losses on existing securitized pools) from our interest income. The amount of such losses was Rs. 5.5 billion in fiscal 2011 compared to Rs. 5.1 billion in fiscal 2010. See also “Critical Accounting Policies—Transfer and Servicing of Assets”.

However, the above decrease in yield on rupee portfolio was offset, in part, by the following factors:

140

- The yield on interest-earning investments increased marginally to 6.8% in fiscal 2011, primarily due to an increase in yield on average interest-earning investments other than the investment in government and other approved securities, and was offset, in part, by a marginal decrease in the yield on average investments in government and other approved securities. The yield on average interest-earning investments other than the investment in government and other approved securities increased, primarily due to an increase in investment in higher-yielding securities like corporate bonds and debentures, certificates of deposit and commercial paper.
- We earned interest of Rs. 1.7 billion, on income tax refunds, in fiscal 2011 compared to Rs. 1.2 billion in fiscal 2010. The receipt, amount and timing of such income depends on the nature and timing of determinations by tax authorities and is not consistent or predictable.

The cost of funds for the rupee portfolio decreased by 47 basis points from 6.4% in fiscal 2010 to 6.0% in fiscal 2011. The decrease in the cost of funds for the rupee portfolio was due to a decrease in the cost of deposits on account of a higher proportion of low cost current and savings deposits in our deposit base and a reduction in our wholesale term deposits. The average current and savings account deposits increased from Rs. 747.9 billion in fiscal 2010 to Rs. 882.4 billion in fiscal 2011. The proportion of current and savings accounts deposits to the total deposits of ICICI Bank increased from 41.7% at year-end fiscal 2010 to 45.1% at year-end fiscal 2011.

The Reserve Bank of India had prescribed a rate of 3.5% on savings deposits and until March 31, 2010, banks were required to pay interest on the minimum outstanding balance in a savings deposit account between the tenth day and the end of the month. Effective April 1, 2010, the Reserve Bank of India changed the interest payable computation methodology and banks were required to pay interest on the daily average balance maintained in a savings deposit account. The change in methodology resulted in an increase in the cost of savings account deposits for banks. Based on the average balances of fiscal 2011, this impacted our net interest margin by approximately 9 basis points. Despite an increase in systemic interest rates during the second half of fiscal 2011, the deposit cost during fiscal 2011 was lower compared to fiscal 2010 primarily due to the benefit of deposits raised in fiscal 2010 at lower rates and an increase in the proportion of low cost current and savings account deposits to the overall deposit mix. As a result, the cost of rupee deposits decreased from 6.2% in fiscal 2010 to 5.1% in fiscal 2011.

The cost of rupee borrowings increased from 7.2% in fiscal 2010 to 8.7% in fiscal 2011 primarily on account of an increase in the cost of call and term borrowings and bond borrowings.

The full impact of the increase in deposit rates in fiscal 2011 will be reflected in fiscal 2012. Further, the Reserve Bank of India increased the interest rate on savings account deposits to 4.0% with effect from May 3, 2011.

The yield on our foreign currency portfolio increased by 14 basis points from 4.5% in fiscal 2010 to 4.7% in fiscal 2011, primarily due to a higher average yield on assets realized at our UK and Canadian subsidiaries. The average yield on assets of ICICI Bank UK increased primarily due to the deployment of higher proportion of assets in corporate loans and advances and a decline in the relatively lower yielding investment portfolio due to sales and maturities. The benefit was partially offset by investments in low yield short-term UK government treasury bills. The average yield of ICICI Bank Canada increased primarily due to investments in higher yielding corporate bonds.

The cost of funds for the foreign currency portfolio decreased by 37 basis points from 3.9% in fiscal 2010 to 3.5% in fiscal 2011 primarily due to a decline in the average cost of term deposits and savings account deposits. The benefit was partially offset by an increase in the proportion of term deposit liabilities of our UK subsidiary and overseas branches during fiscal 2011. Further, the average cost of deposits of our Canadian subsidiary was lower during fiscal 2011 on account of a higher proportion of low cost saving deposits and a reduction in term deposits.

As a result, our spread increased by 17 basis points from 1.95% in fiscal 2010 to 2.12% in fiscal 2011 and net interest margin increased by 25 basis points from 2.42% in fiscal 2010 to 2.67% in fiscal 2011.

Going forward, systemic deposit and borrowing rates will be influenced by monetary policy responses to inflationary trends, deposit growth in the system relative to credit growth and systemic liquidity conditions. While

we expect increases in the lending rates to keep pace with increases in the cost of deposits or borrowings, the time-lag between such increases and re-pricing on the asset side could impact margins in fiscal 2012.

Interest-earning assets

The average volume of interest-earning assets increased by 2.4% from Rs. 4,060.9 billion in fiscal 2010 to Rs. 4,157.2 billion in fiscal 2011. The increase in interest-earning assets was primarily due to an increase in average interest-earning investments by Rs. 178.8 billion, offset, in part, by a decrease in average loans by Rs. 45.1 billion.

Average loans decreased by 1.9% from Rs. 2,395.3 billion in fiscal 2010 to Rs. 2,350.2 billion in fiscal 2011 mainly due to a decrease in average foreign currency loans by 5.6% from Rs. 898.3 billion in fiscal 2010 to Rs. 847.7 billion in fiscal 2011. This was primarily due to the securitization of insured mortgages by our Canadian subsidiary and the impact of appreciation of the rupee against the U.S. dollar. Average rupee loans increased from Rs. 1,497.0 billion in fiscal 2010 to Rs. 1,502.5 billion in fiscal 2011 primarily on account of advances taken over from the Bank of Rajasthan, which merged with us effective the close of business August 12, 2010.

Average interest-earning investments increased by 13.6% from Rs. 1,319.2 billion in fiscal 2010 to Rs. 1,498.0 billion in fiscal 2011, primarily due to an increase in average interest-earning investments other than the investment in government and other approved securities by 22.1% from Rs. 586.3 billion at year-end fiscal 2010 to Rs. 715.9 billion at year-end fiscal 2011. Average interest-earning investments, other than government and other approved securities increased due to investments in corporate bonds and debentures, Rural Infrastructure Development Fund and other related investments, certificates of deposits, commercial paper, offset, in part, by a decrease in investments in liquid mutual funds to deploy excess liquidity.

Interest-bearing liabilities

Average interest-bearing liabilities increased marginally from Rs. 3,713.3 billion in fiscal 2010 to Rs. 3,717.5 billion in fiscal 2011 on account of an increase in average deposits. We focused on our strategy of increasing current and savings account deposits in total deposits and rebalancing our funding mix. The average current and savings account deposits increased from Rs. 747.9 billion in fiscal 2010 to Rs. 882.4 billion in fiscal 2011. The average term deposits decreased from Rs. 1,656.6 billion in fiscal 2010 to Rs. 1,531.8 billion in fiscal 2011. The ratio of average current and savings account deposits to average deposits of ICICI Bank increased from about 32.5% in fiscal 2010 to about 39.1% in fiscal 2011. The average borrowings decreased marginally from Rs. 1,308.8 billion in fiscal 2010 to Rs. 1,303.3 billion in fiscal 2011.

See also “Risk Factors—Risks Relating to Our Business—Our banking and trading activities are particularly vulnerable to interest rate risk and volatility in interest rates could adversely affect our net interest margin, the value of our fixed income portfolio, our income from treasury operations, the quality of our loan portfolio and our financial performance”.

Non-Interest Income

The following table sets forth, for the periods indicated, the principal components of non-interest income.

	Year ended March 31,			2011/2010	
	2010	2011	2011	% change	
	(in millions, except percentages)				
Commission, exchange and brokerage	Rs. 60,039	Rs. 65,978	US\$ 1,296	9.9	%
Profit/(loss) on treasury-related activities (net)(1)	26,194	11,808	232	(54.9)

Edgar Filing: ICICI BANK LTD - Form 20-F

Profit/(loss) on sale of land, buildings and other assets (net)	822	300	6	(63.5)
Income pertaining to insurance business	204,758	236,030	4,638	15.3
Miscellaneous income	2,648	1,017	20	(61.6)
Total non-interest income	Rs.294,461	Rs.315,133	US\$6,192	7.0 %

(1) Includes profit/(loss) on the sale/revaluation of investments and exchange transactions.

Non-interest income primarily includes income pertaining to our insurance business, fee and commission income, income from treasury-related activities and other miscellaneous income. This analysis of non-interest income should be read against the backdrop of global and Indian economic developments, financial market activities, the competitive environment, client activity levels and our strategy, as detailed in earlier sections.

Non-interest income increased by 7.0% from Rs. 294.5 billion in fiscal 2010 to Rs. 315.1 billion in fiscal 2011. The increase in non-interest income was primarily due to an increase in income relating to our insurance business and commission, exchange and brokerage income. During fiscal 2011, there was a decrease in income relating to our treasury activities and miscellaneous income.

Commission, exchange and brokerage

Commission, exchange and brokerage income primarily includes fees from our banking business, and fee and brokerage income of our securities brokering and asset management subsidiaries. The fee income of our banking business is mainly comprised of fees from corporate clients such as loan processing fees, transaction banking fees and structuring fees and fees from retail customers such as loan processing fees, credit card fees, service charges on retail liability-related accounts and third-party referral fees. Commission, exchange and brokerage income increased by 9.9% from Rs. 60.0 billion in fiscal 2010 to Rs. 66.0 billion in fiscal 2011 primarily due to an increase in corporate fees. Commission, exchange and brokerage income of ICICI Bank increased by 14.1% from Rs. 48.3 billion in fiscal 2010 to Rs. 55.1 billion in fiscal 2011. This increase was partly offset by a decrease in fee income of our banking subsidiaries, management fees of our asset management subsidiary and fees and brokering income of our securities brokering subsidiaries.

Higher credit demand and increased business activity in the corporate sector due to the economic recovery resulted in an increase in loan processing fees and transaction banking related fees from corporate clients. There was a decrease in retail fees such as foreclosure charges, credit card fees and third-party referral fees. Following the reduction in our credit card portfolio, specifically products like equated monthly installments/personal loan on credit cards and lower issuance of new credit cards, the fees related to our credit card business declined in fiscal 2011 compared to fiscal 2010. Fee income from our credit card business was Rs. 5.4 billion in fiscal 2011, a decline of 20.8% from Rs. 6.9 billion in fiscal 2010. The fees from distribution of third-party products in fiscal 2011 were impacted by regulatory changes in the life insurance sector, which led to a decline in market volumes and changes in the product mix.

Our banking subsidiaries' fee income decreased due to a decrease in corporate fees resulting from lower business volume. Commission, exchange and brokerage income of our banking subsidiaries decreased by 41.4% from Rs. 2.9 billion in fiscal 2010 to Rs. 1.7 billion in fiscal 2011, primarily due to the lower business volume of ICICI Bank UK during fiscal 2011 and the lower investment banking fees of ICICI Bank Canada.

The management fees of our asset management subsidiary decreased by 17.4% from Rs. 4.6 billion in fiscal 2010 to Rs. 3.8 billion in fiscal 2011, primarily due to a decrease in average assets under management for our mutual funds from Rs. 769.9 billion in fiscal 2010 to Rs. 728.3 billion in fiscal 2011. The major decrease pertained to the money market funds under management, which decreased from Rs. 522.4 billion in fiscal 2010 to Rs. 427.9 billion in fiscal 2011.

Fee and brokerage income of our securities brokering subsidiary also decreased due to a change in the trading patterns from the high margin cash and futures segment to lower margin options segment.

Profit/(loss) on treasury-related activities (net)

Income from treasury-related activities includes income from the sale of investments and the revaluation of investments on account of changes in unrealized profit/(loss) in the fixed income, equity and preference share portfolio, units of venture capital and private equity funds, and security receipts issued by asset reconstruction

companies. It also includes income from foreign exchange transactions, consisting of various foreign exchange and derivatives transactions with clients, including options and swaps, and on credit derivatives instruments including credit default swaps, credit-linked notes and collateralized debt obligations. Profit from treasury-related activities decreased from Rs. 26.2 billion in fiscal 2010 to Rs. 11.8 billion in fiscal 2011. The decrease in income from treasury-related activities in fiscal 2011 was primarily due to a loss on government securities and other fixed income positions compared to gains in fiscal 2010, lower profits from our equity portfolio and lower mark-to-market/realized profits on credit derivatives. This was offset by higher income from foreign exchange and derivatives transactions with our clients.

During fiscal 2011, there was a loss on our government securities portfolio and other fixed income positions of Rs. 1.7 billion compared to a profit of Rs. 8.2 billion in fiscal 2010. During fiscal 2010, we capitalized on certain market opportunities to realize gains from sale of our government securities portfolio and other fixed income positions, while in fiscal 2011, the loss was due to monetary tightening and negative systemic liquidity for most of the year which resulted in an increase in yields on short-term government securities.

The benchmark equity index, the BSE Sensex, increased by 10.9% from 17,528 at year-end fiscal 2010 to 19,445 at year-end fiscal 2011, compared to an increase of 80.5% during fiscal 2010. However, the equity markets remained volatile in fiscal 2011, particularly in the second half of the year, due to global and domestic developments including the political unrest in the Middle East and concerns about global recovery due to the possible impact on crude oil prices, and continued high levels of inflation in India and resultant monetary tightening. These factors impacted market sentiment resulting in a decline in realized/unrealized profit on equity investments for fiscal 2011. Our profit from our equity portfolio decreased from Rs. 6.9 billion in fiscal 2010 to Rs. 4.3 billion in fiscal 2011.

We have credit derivatives instruments including credit default swaps, credit-linked notes and collateralized debt obligations. These include both funded and non-funded instruments. The notional principal amount of funded instruments at year-end fiscal 2011 was Rs. 18.2 billion compared to Rs. 28.0 billion at year-end fiscal 2010. The notional principal amount of non-funded instruments at year-end fiscal 2011 was Rs. 29.4 billion compared to Rs. 32.9 billion at year-end fiscal 2010. During fiscal 2011, there was a profit of Rs. 0.2 billion on these credit derivatives instruments. During fiscal 2010, the softening of credit spreads resulted in a reversal of provisions held against the credit derivatives portfolio and we realized gains of Rs. 5.1 billion.

At year-end fiscal 2011, we had an outstanding net investment of Rs. 28.3 billion in security receipts issued by asset reconstruction companies with respect to the sale of non-performing assets. During fiscal 2011, the impact on these security receipts was a loss of Rs. 2.3 billion compared to a loss of Rs. 2.1 billion in fiscal 2010.

We offer various derivatives products, including options and swaps, to our clients primarily for their risk management purposes. We generally do not carry market risk on client derivatives positions as we cover ourselves in the inter-bank market. Profits or losses on account of currency movements on these transactions are borne by the clients. During fiscal 2009, due to high exchange rate volatility as a result of the global financial crisis, a number of clients experienced significant mark-to-market losses in derivatives transactions. On maturity or premature termination of the derivatives contracts, these mark-to-market losses became receivables owed to us. Some clients did not pay their derivatives contract obligations to us in a timely manner and, in some instances, clients filed lawsuits to avoid payment of derivatives contract obligations entirely. In other instances, at the request of clients, we converted overdue amounts owed to us into loans and advances. In October 2008, the Reserve Bank of India issued guidelines requiring banks to classify derivatives contract receivables overdue for 90 days or more as non-performing assets. Pursuant to these guidelines, we reverse derivatives contract receivables in our income statement when they are overdue for 90 days or more. Further, mark-to-market gains on other derivative contracts with the same counterparties mentioned above are reversed through our profit and loss account. The Reserve Bank of India has recently issued guidelines to this effect. After reversal, any recovery is accounted for only on actual receipt of payment. In fiscal 2011, we made a

provision of Rs. 0.3 billion relating to receivables under derivatives contracts that were overdue for more than 90 days and the related mark-to-market receivables from such counterparties, in accordance with the Reserve Bank of India guidelines compared to a write-back of Rs. 0.2 billion in fiscal 2010.

The treatment of receivables owed in connection with derivatives contracts differs under U.S. GAAP from under Indian GAAP. Under U.S. GAAP, these receivables are analyzed to identify the required provisions in the

same manner as provisions for loan losses. Accordingly, under U.S. GAAP, the amount receivable by us when a derivatives contract obligation arises is charged to the client's account and treated like a loan. We periodically conduct a comprehensive analysis of our corporate loan portfolio, including overdue derivatives receivables, to determine appropriate allowances for loan losses. This analysis takes into account both qualitative and quantitative criteria, including among other considerations, the account conduct, future prospects, repayment history and financial performance. This comprehensive analysis includes an account-by-account review of a substantial portion of our corporate loan portfolio, and an allowance is made for probable loss, if any, on each account. In addition to the detailed review of large balance loans, we also classify our portfolio based on the overdue status of each account and classify loans as impaired if principal or interest has remained overdue for more than 90 days.

Our income from foreign exchange transactions with clients and from margins on derivatives transactions with clients increased from Rs. 7.3 billion in fiscal 2010 to Rs. 8.3 billion in fiscal 2011, primarily on account of concerted efforts to increase margins, enhance focus on large corporate customers and acquire new small and medium corporate as well as retail customers.

Our subsidiary, ICICI Bank UK had an investment portfolio comprised of bonds, credit-linked notes, asset backed securities and equity of Rs. 89.8 billion at year-end fiscal 2010 and Rs. 70.3 billion at year-end fiscal 2011. The investment portfolio of ICICI Bank UK also included treasury bills of Rs. 23.1 billion at year-end fiscal 2011. The investment portfolio of ICICI Bank UK included investments of Rs. 81.3 billion at year-end fiscal 2010 and Rs. 64.7 billion at year-end fiscal 2011 classified as "available-for-sale" investments. In the "available-for-sale" investments category, the mark-to-market post-tax loss reflected in the shareholders' equity decreased from Rs. 4.3 billion at year-end fiscal 2010 to Rs. 3.3 billion at year-end fiscal 2011, due to a reduction in the investment portfolio and also due to a tightening of credit spreads, primarily on the bond portfolio. During fiscal 2010, the mark-to-market post-tax loss reflected in the shareholders' equity decreased from Rs. 12.4 billion at year-end fiscal 2009 to Rs. 4.3 billion at year-end fiscal 2010.

Income relating to our insurance business

Income from our insurance business increased by 15.3% from Rs. 204.8 billion in fiscal 2010 to Rs. 236.0 billion in fiscal 2011. Income from our insurance business includes net premium income, fee and commission income and the release of certain actuarial reserves on lapsed policies created in earlier years of our life insurance subsidiary amounting to Rs. 206.3 billion and of our general insurance subsidiary amounting to Rs. 29.7 billion in fiscal 2011 compared to income of Rs. 182.0 billion from our life insurance subsidiary and Rs. 22.8 billion from our general insurance subsidiary in fiscal 2010. The increase in income from our insurance business was from the life insurance business primarily due to an increase in net premium, increase in fees on account of higher fund management and policy fees and higher release of certain actuarial reserves on lapsed policies created in earlier years.

Income from our life insurance business includes net premium income of Rs. 178.0 billion and fee and other income of Rs. 28.3 billion in fiscal 2011 compared to net premium income of Rs. 164.7 billion and fee and other income of Rs. 17.3 billion from our life insurance business in fiscal 2010.

The Insurance Regulatory and Development Authority issued various regulations regarding unit-linked products, effective from September 1, 2010, which required insurers to maintain an interim reduction in yield and a cap on charges and to make structural changes to the pension products. Almost all unit-linked products operational in the market were withdrawn on August 31, 2010 as per the revised unit-linked guidelines. The scarcity value created for the old products resulted in high growth during July and August 2010. After September 1, 2010, with the new set of products which had lower distributor payouts, the industry witnessed a slowdown in new business. ICICI Prudential Life Insurance's new business premium, in line with the market trend, grew year-on-year in the first half of fiscal 2011, while the year-on-year growth declined in the second half of fiscal 2011.

The premium income (gross of premium on reinsurance ceded) of ICICI Prudential Life Insurance Company increased by 8.2% from Rs. 165.3 billion in fiscal 2010 to Rs. 178.8 billion in fiscal 2011, primarily due to an increase in single premium business from Rs. 2.8 billion in fiscal 2010 to Rs. 21.7 billion in fiscal 2011. In fiscal 2011, the new business premium from our regular premium business decreased by 6.1% from Rs. 60.6 billion in

fiscal 2010 to Rs. 56.9 billion in fiscal 2011 and the renewal premium decreased by 1.8% from Rs. 102.0 billion in fiscal 2010 to Rs. 100.2 billion in fiscal 2011. ICICI Prudential Life Insurance Company's other income increased from Rs. 17.3 billion in fiscal 2010 to Rs. 28.3 billion in fiscal 2011, primarily due to an increase in fees on account of higher fund management and policy fees and higher release of certain actuarial reserves on lapsed policies created in earlier years.

Income from our general insurance business includes net premium income amounting to Rs. 26.9 billion and commission income amounting to Rs. 2.8 billion in fiscal 2011, compared to net premium income of Rs. 20.7 billion and commission income of Rs. 2.1 billion from our general insurance subsidiary in fiscal 2010.

Gross written premiums of ICICI Lombard General Insurance Company increased by 27.8% from Rs. 36.9 billion in fiscal 2010 to Rs. 47.3 billion in fiscal 2011 primarily due to growth in its health and weather insurance businesses. Commission income of ICICI Lombard General Insurance Company increased by 33.3% from Rs. 2.1 billion in fiscal 2010 to Rs. 2.8 billion in fiscal 2011 primarily due to an increase in reinsurance commission income on weather insurance business.

Miscellaneous income

Miscellaneous income decreased from Rs. 2.6 billion in fiscal 2010 to Rs. 1.0 billion in fiscal 2011.

During the third quarter of fiscal 2010, ICICI Bank and First Data, a global company engaged in electronic commerce and payment services, formed a merchant acquiring alliance and a new entity, ICICI Merchant Services Private Limited, which is 81.0% owned by First Data and 19.0% owned by ICICI Bank. ICICI Merchant Services Private Limited acquired ICICI Bank's merchant acquiring operations through a transfer of assets, primarily comprising fixed assets, receivables and payables, and assumption of liabilities for a total consideration of Rs. 3.7 billion. The Bank realized a profit of Rs. 2.0 billion from this transaction in fiscal 2010, which was included in miscellaneous income.

Lease income of the Bank decreased by 42.7% from Rs. 1.6 billion in fiscal 2010 to Rs. 0.9 billion in fiscal 2011, primarily due to a reduction in leased assets from Rs. 3.5 billion at year-end fiscal 2010 to Rs. 2.6 billion at year-end fiscal 2011.

Non-Interest Expense

The following table sets forth, for the periods indicated, the principal components of non-interest expense.

	Year ended March 31,			2011/2010 % change
	2010	2011	2011	
	(in millions, except percentages)			
Payments to and provisions for employees	Rs.36,784	Rs.43,926	US\$863	19.4 %
Depreciation on own property	6,212	6,608	130	6.4
Auditor's fees and expenses	148	161	3	8.8
Other administrative expenses	51,199	49,932	981	(2.5)
Direct marketing agency expenses	2,413	2,579	51	6.9
Depreciation on leased assets	1,417	789	16	(44.3)
Expenses pertaining to insurance business	179,160	209,029	4,107	16.7
Total non-interest expenses	Rs.277,333	Rs.313,024	US\$6,151	12.9 %

Non-interest expense primarily includes expenses relating to our insurance business, payment to and provision for employees, direct marketing agency expenses and other administrative expenses. The operating expenses increased from Rs. 277.3 billion in fiscal 2010 to Rs. 313.0 billion in fiscal 2011 primarily due to increase in expenses related to our insurance business and payments to and provisions for employees.

Payments to and provisions for employees

Employee expenses increased by 19.4% from Rs. 36.8 billion in fiscal 2010 to Rs. 43.9 billion in fiscal 2011, primarily due to an increase in employee expenses of ICICI Bank offset in part by a decrease in employee expenses of insurance subsidiaries and home finance subsidiary. The employee base, including sales executives, employees on fixed term contracts and interns, increased from 74,056 at year-end fiscal 2010 to 79,978 at year-end fiscal 2011. The increase in the employee base was due to the addition of employees of the Bank of Rajasthan and the conversion of sales executives to full time employees of ICICI Bank. We expect an increase in the number of employees of ICICI Bank in view of the anticipated growth in our business.

The employee expenses of ICICI Bank increased by 46.1% from Rs. 19.3 billion in fiscal 2010 to Rs. 28.2 billion in fiscal 2011. Employee expenses increased primarily due to the addition of employees of the Bank of Rajasthan, the annual increase in salaries and provision for payment of performance bonuses and performance-linked retention pay during the period and an increase in the employee base, including sales executives, employees on fixed term contracts and interns, from 41,068 employees at year-end fiscal 2010 to 56,969 employees at year-end fiscal 2011. Pension costs increased from Rs. 106 million in fiscal 2010 to Rs. 1,053 million in fiscal 2011, primarily due to the addition of employees of the Bank of Rajasthan. Pension benefits are available to employees who were formerly employed by the Bank of Rajasthan, Sangli Bank and the Bank of Madura. Pension benefits are determined based on salary scales which are fixed in periodically negotiated agreements between the Indian Banking Association (representing bank management) and employee unions. Based on the Bank's updated estimate of pension benefits arising from these agreements, the Bank has revised the salary escalation rate on basic salary from 7.0% in fiscal 2010 to 1.5% in fiscal 2011. This change in assumption has resulted in a lowering of the pension cost increase by Rs. 111.1 million in fiscal 2011.

This increase in ICICI Bank's employee expenses was partly offset by a decrease in employee expenses in certain of our subsidiaries. The employee expenses for ICICI Prudential Life Insurance Company decreased by 6.6% from Rs. 9.1 billion in fiscal 2010 to Rs. 8.5 billion in fiscal 2011, due to a decrease in the employee base from 20,295 at year-end fiscal 2010 to 13,393 at year-end fiscal 2011. The employee expenses for ICICI Lombard General Insurance Company decreased by 6.9% from Rs. 2.9 billion in fiscal 2010 to Rs. 2.7 billion in fiscal 2011, due to a decrease in employee base from 4,650 at year-end fiscal 2010 to 4,264 at year-end fiscal 2011.

Depreciation

Depreciation on owned property increased from Rs. 6.2 billion in fiscal 2010 to Rs. 6.6 billion in fiscal 2011, primarily due to an expansion in the branch and ATM network and capitalization of ICICI Bank's new building in Hyderabad, offset, in part, by the sale of assets of merchant acquiring operations and other assets. During fiscal 2011, ICICI Lombard General Insurance Company revised its estimate of the useful life of its fixed assets. This change in estimate resulted in an additional depreciation of Rs. 0.2 billion in fiscal 2011. Depreciation on leased assets decreased from Rs. 1.4 billion in fiscal 2010 to Rs. 0.8 billion in fiscal 2011 due to a reduction in leased assets.

Other administrative expenses

Other administrative expenses decreased from Rs. 51.2 billion in fiscal 2010 to Rs. 49.9 billion in fiscal 2011, primarily due to our overall cost reduction initiatives. There was a reduction in retail asset business expenses, legal charges and expenses on account of postage and communication expenses in fiscal 2011 of ICICI Bank and the home finance subsidiary. This was partly offset by an increase in rent, taxes and related expenses due to an increase in our branch and ATM network. The number of branches and extension counters (excluding foreign branches and offshore banking units) of ICICI Bank increased from 1,707 at year-end fiscal 2010 to 2,529 at year-end fiscal 2011. ICICI Bank also increased its ATM network from 5,219 ATMs at year-end fiscal 2010 to 6,104 ATMs at year-end fiscal

2011. These figures include branches and ATMs of the Bank of Rajasthan. The number of branches and offices of our insurance subsidiaries decreased from 2,277 at year-end fiscal 2010 to 1,714 at year-end fiscal 2011.

Direct marketing agency expenses

Direct marketing agency expenses increased from Rs. 2.4 billion in fiscal 2010 to Rs. 2.6 billion in fiscal 2011. The increase in direct marketing expenses was primarily due to higher retail loan disbursements. We use marketing agents, called direct marketing agents or associates, for sourcing our retail assets. We include commissions paid to these direct marketing agents in non-interest expense. In line with the Reserve Bank of India guidelines, these commissions are expensed upfront and not amortized over the life of the loan.

Expenses related to our insurance business

Expenses related to our insurance business include claims and benefit payouts, commission expenses and reserves for actuarial liability (including the investible portion of the premium on unit-linked policies of our life insurance business). The expenses relating to our insurance business increased by 16.7% from Rs. 179.2 billion in fiscal 2010 to Rs. 209.0 billion in fiscal 2011, primarily due to an increase in life insurance business volume and claims and benefit payouts in our general insurance business. The impact of such increases in expenses was reduced to a certain extent by a decline in the commission expenses of our life insurance subsidiary. The expenses related to our insurance business include expenses of our life insurance subsidiary amounting to Rs. 179.8 billion and of our general insurance subsidiary amounting to Rs. 29.2 billion in fiscal 2011, compared to expenses of Rs. 158.3 billion for our life insurance subsidiary and Rs. 20.9 billion for our general insurance subsidiary in fiscal 2010.

The expenses of our life insurance business include reserves for actuarial liability of Rs. 172.9 billion, claims and benefit payouts of Rs. 2.8 billion and commission expenses of Rs. 4.1 billion in fiscal 2011 compared to Rs. 150.9 billion of reserves for actuarial liability, Rs. 2.9 billion of claims and benefit payouts and Rs. 4.5 billion of commission expenses in fiscal 2010.

During fiscal 2011, the reserves for the actuarial liability of the life insurance business (including the investible portion of the premium on unit-linked policies) increased from Rs. 150.9 billion in fiscal 2010 to Rs. 172.9 billion in fiscal 2011 primarily due to an increase in the volume of our unit-linked insurance business (including renewal) and our single premium business. The investible portion of the premium on linked policies of our life insurance business represents the amount of premium including renewal premium received on linked policies of life insurance business invested, after deducting charges and the premium for risk coverage, in the underlying asset or index chosen by the policy holder. The claims and benefit payouts decreased from Rs. 2.9 billion in fiscal 2010 to Rs. 2.8 billion in fiscal 2011. Commission expenses decreased by 8.9% from Rs. 4.5 billion in fiscal 2010 to Rs. 4.1 billion in fiscal 2011 despite the increase in total premium, primarily due to higher single premium business where the commissions are lower as compared to our regular premium business. In line with Indian accounting norms for insurance companies, we do not amortize the customer acquisition cost, but account for the expenses upfront.

The expenses of general insurance business include claims and benefit payouts of Rs. 27.3 billion and Rs. 1.9 billion of commission expenses in fiscal 2011 compared to Rs. 18.9 billion of claims and benefit payouts and Rs. 2.0 billion of commission expenses in fiscal 2010. The claims and benefit payouts of ICICI Lombard General Insurance Company increased from Rs. 18.9 billion in fiscal 2010 to Rs. 27.3 billion in fiscal 2011, primarily due to an increase in the impact of the Indian Motor Third Party Insurance Pool (the Pool) on account of additional provisions made as per Insurance Regulatory and Development Authority order and due to an increase in claims/benefits paid in line with the increase in business.

In accordance with Insurance Regulatory and Development Authority guidelines, ICICI Lombard General Insurance Company, together with all other Indian general insurance companies, participates in the Pool, which has been administered by the General Insurance Corporation of India from April 1, 2007. The Pool covers the reinsurance of third party risks of commercial vehicles. Based on an analysis of the performance of the Pool by an independent

consultant, the Insurance Regulatory and Development Authority instructed all general insurance companies to provide for losses on the Pool at the provisional rate of 153.0% for fiscal 2008 through fiscal 2011 in the financial results for fiscal 2011 compared to the earlier loss rate of 122-127%. Accordingly, an additional provision of Rs. 2.7 billion was created during the current fiscal year by ICICI Lombard General Insurance Company. In view of the above developments, the Insurance Regulatory and Development Authority has allowed an

increase in the rate of premium applicable to the motor third party liability insurance business by 68.5% with effect from April 25, 2011.

Provisions and contingencies (excluding tax provisions)

The following table sets forth, for the periods indicated, the composition of provisions and contingencies, excluding provisions for tax.

	Year ended March 31,			2011/2010 % change
	2010	2011	2011	
	(in millions, except percentages)			
Provision for investments (net)	Rs. 328	Rs. 3,163	US\$ 62	-
Provision for non-performing and other assets	44,898	20,515	403	(54.3)
Provision for standard assets	(153)	40	1	-
Others	514	1,882	37	-
Total provisions and contingencies (excluding tax)	Rs. 45,587	Rs. 25,600	US\$ 503	(43.8)%

Provisions are made by ICICI Bank on standard, substandard and doubtful assets at rates prescribed by the Reserve Bank of India. Loss assets and unsecured portions of doubtful assets are provided/written off to the extent required by the Reserve Bank of India guidelines. Subject to the minimum provisioning levels prescribed by the Reserve Bank of India, provisions on retail non-performing loans are made at the borrower level in accordance with the provisioning policy of ICICI Bank. The specific provisions on retail loans held by ICICI Bank are higher than the minimum regulatory requirement. See also “Business—Classification of Loans”.

Provisions and contingencies (excluding provisions for tax) decreased by 43.8% from Rs. 45.6 billion in fiscal 2010 to Rs. 25.6 billion in fiscal 2011, primarily due to a reduction in provisions for non-performing assets. The provision for non-performing assets decreased primarily on account of a reduction in provision for retail non-performing loans due to a sharp reduction in accretion to retail non-performing loans in fiscal 2011. The net additions (gross of write-off) to our retail gross non-performing loans during fiscal 2011 amounted to Rs. 1.7 billion compared to Rs. 34.2 billion in fiscal 2010.

In the second quarter review of monetary policy for fiscal 2011, the Reserve Bank of India directed banks to ensure that their total provisioning coverage ratio against non-performing loans is not less than 70.0%. ICICI Bank’s provisioning coverage ratio at year-end fiscal 2011 computed in accordance with the Reserve Bank of India guidelines was 76.0%.

Provision for investments increased from Rs. 0.3 billion in fiscal 2010 to Rs. 3.2 billion in fiscal 2011, primarily due to the impairment provision for investments held by the Bank, our consolidated venture capital funds and the provision on equity investments held by ICICI Bank UK.

There was a net addition to the general provision on standard assets primarily due to the standard asset provision held by the Bank of Rajasthan. During fiscal 2011, ICICI Bank did not make additional general provisions on standard assets. In November 2008, the Reserve Bank of India issued guidelines reducing the general provision requirement. However, these guidelines did not permit a write-back of excess provisions already made and ICICI Bank therefore held a cumulative general provision of Rs. 14.8 billion at year-end fiscal 2011 compared to the general provision requirement of Rs. 10.9 billion in accordance with the revised guidelines. The Reserve Bank of India has recently revised rates of provisioning for standard restructured advances from 0.25%-1% (depending upon the category of advance) to 2%.

Provisions, including general provisions on performing assets, as a percentage of gross customer assets were 3.3% at year-end fiscal 2011 compared to 3.0% at year-end fiscal 2010.

Provisions for Restructured Loans and Non-performing Assets

We classify our assets, including those in our overseas branches, as performing and non-performing in accordance with the Reserve Bank of India guidelines except in the case of ICICI Home Finance Company and our overseas banking subsidiaries. ICICI Home Finance Company classifies its loans and other credit facilities as per the guidelines of its regulator, namely, the National Housing Bank. Loans made by our overseas banking subsidiaries are classified as impaired when there is no longer a reasonable assurance of the timely collection of the full amount of principal or interest. Under the Reserve Bank of India guidelines, an asset is classified as non-performing if any amount of interest or principal remains overdue for more than 90 days in respect of term loans. In respect of overdraft or cash credit, an asset is classified as non-performing if the account remains out of order for a period of 90 days and, in respect of bills, if the account remains overdue for more than 90 days. Further, non-performing assets are classified into sub-standard, doubtful and loss assets based on the criteria stipulated by the Reserve Bank of India. See also “Business—Classification of Loans”.

The following table sets forth, at the dates indicated, information regarding roll-forward and average balances of restructured loans.

	At March 31,			2011/2010	
	2010	2011	2011	% Change	
	(in millions, except percentages)				
Opening balance (gross loans)	Rs. 61,368	Rs. 62,662	US\$ 1,231	2.1	%
Add: Loans restructured during the year	37,833	12,223	240	(67.7))
Add: Increase in loans outstanding to previously restructured loans	349	46	1	(86.8))
Less: Loans upgraded to standard category during the year	(33,471)	(42,341)	(832)	26.5	
Less: Loans downgraded to non-performing category during the year	(1,297)	(2,123)	(42)	63.7	
Less: Recoveries during the year	(2,120)	(9,934)	(195)	-	
Gross restructured loans	Rs. 62,662	Rs. 20,533	US\$ 403	(67.2))
Provisions for restructured loans	(2,758)	(940)	(18)	(65.9))
Net restructured loans	Rs. 59,904	Rs. 19,593	US\$ 385	(67.3))
Average balance of net restructured loans(1)	54,914	36,265	713	(34.0))
Gross customer assets	Rs. 2,601,135	Rs. 3,108,740	US\$ 61,087	19.5	
Net customer assets	2,536,941	3,024,694	59,436	19.2	%
Gross restructured loans as a percentage of gross customer assets	2.41	%	0.66	%	
Net restructured loans as a percentage of net customer assets	2.36	%	0.65	%	

(1) The average balances are the average of quarterly balances outstanding at the end of March of the previous year and June, September, December and March of the year.

Gross restructured loans decreased by 67.2% from Rs. 62.7 billion at year-end fiscal 2010 to Rs. 20.5 billion at year-end fiscal 2011 primarily due to upgrades of certain borrowers in the power, services, food and beverages, automobile and other sectors. After restructuring, based on the satisfactory performance of the borrower over a period

of time, the restructured account is upgraded, and removed from this category. During fiscal 2011, the Bank upgraded certain borrower accounts aggregating Rs. 42.3 billion based on payment performance. During fiscal 2010, there were upgrades amounting to Rs. 33.5 billion primarily of borrower accounts in the oil and petrochemical sector. As a percentage of net customer assets, net restructured loans were 0.6% at year-end fiscal 2011 compared to 2.4% at year-end fiscal 2010. During fiscal 2011, the diminution in fair value of restructured loans (including the provision for funded interest) amounted to Rs. 0.2 billion, compared to Rs. 2.6 billion in fiscal 2010. The decline was mainly due to recoveries of funded interest of previous years as well as a lower quantum of loans restructured during fiscal 2011. A fully secured standard loan can be restructured by a rescheduling of principal repayments and/or the interest element, but must be separately disclosed as a restructured loan in the year of restructuring. There are certain conditions stipulated by the Reserve Bank of India for continuing to classify a restructured standard loan as a standard asset. The restructured loans continue to be classified as such until they complete one year of payment

in accordance with the restructured terms. In December 2008, the Reserve Bank of India permitted banks to undertake a one-time restructuring of loans classified as real estate exposures and to undertake a second restructuring for accounts that were previously restructured, without downgrading such accounts to the non-performing category, up to June 30, 2009. The Reserve Bank of India also permitted banks to classify all eligible accounts that met the basic criteria for restructuring and which were classified as standard at September 1, 2008, as standard accounts irrespective of their subsequent asset classification. This treatment was subject to banks receiving an application from the borrower for restructuring the loan at or before fiscal 2009 and to the implementation of the restructuring package within 120 days from the date of receipt of the application. See also “Business—Classification of Loans”.

The following table sets forth, at the dates indicated, certain information regarding non-performing assets.

	At March 31,			2011/2010 % change
	2010	2011	2011	
	(in millions, except percentages)			
Gross non-performing assets(1)	Rs. 105,821	Rs. 111,575	US\$ 2,192	5.4 %
Provisions for non-performing assets(1)	(59,083)	(79,501)	(1,562)	34.6
Net non-performing assets(1)	Rs. 46,738	Rs. 32,074	US\$ 630	(31.4)%
Gross customer assets	Rs. 2,601,135	Rs. 3,108,740	US\$ 61,087	19.5 %
Net customer assets	2,536,941	3,024,694	59,436	19.2
Gross non-performing assets as a percentage of gross customer assets	4.07 %	3.59 %		
Net non-performing assets as a percentage of net customer assets	1.84 %	1.06 %		

(1) Includes loans identified as non-performing/impaired in line with the guidelines issued by regulators of the respective subsidiary.

Gross non-performing assets increased by 5.4% from Rs. 105.8 billion at year-end fiscal 2010 to Rs. 111.6 billion at year-end fiscal 2011. During fiscal 2011, we wrote-off corporate and retail loans aggregating Rs. 2.3 billion (consisting of corporate loans of Rs. 1.7 billion and retail loans of Rs. 0.6 billion) compared to Rs. 24.2 billion (consisting of corporate loans of Rs. 5.9 billion and retail loans of Rs. 18.3 billion) written off during fiscal 2010. The net additions (gross of write-offs) to our retail gross non-performing loans declined from Rs. 42.1 billion in fiscal 2009 to Rs. 34.2 billion in fiscal 2010 and declined sharply to Rs. 1.7 billion in fiscal 2011. We experienced an increase in non-performing loans in our retail portfolio in fiscal 2009 due to the seasoning of the portfolio and a higher level of defaults in unsecured personal loans and credit card receivables due to challenges in collections and the impact of the adverse macroeconomic environments. While additions to gross non-performing assets in our retail portfolio remained at a high level in fiscal 2010, we experienced a sharp decline in net additions to gross retail non-performing loans in fiscal 2011 due to the measures initiated by the Bank to curb delinquencies and improved collection practices from second half of fiscal 2009. Retail gross non-performing loans constituted 61.5% of total gross non-performing assets at year-end fiscal 2011 compared to 63.3% at year-end fiscal 2010.

We sold Rs. 7.6 billion of net non-performing assets to an asset reconstruction company in fiscal 2010 which primarily included mortgage loans, small value personal loans and vehicle loans and in fiscal 2011, we sold fully written off credit card receivables. See also “Business—Classification of Loans—Non-Performing Asset Strategy”.

As a percentage of net customer assets, net non-performing assets were 1.1% at year-end fiscal 2011, compared to 1.8% at year-end fiscal 2010. The net non-performing loans in the retail portfolio declined from 2.8% of net retail loans at year-end fiscal 2010 to 1.5% of net retail loans at year-end fiscal 2011.

Tax Expense

Income tax expense increased by 19.0% from Rs. 17.4 billion in fiscal 2010 to Rs. 20.7 billion in fiscal 2011. The effective tax rate of 24.7% in fiscal 2011 was lower compared to the effective tax rate of 26.4% in fiscal 2010,

primarily due to tax benefits from the amalgamation of the Bank of Rajasthan, offset, in part, by changes in the mix of taxable profits (the proportion of tax free/exempt income relative to taxable income with different tax rates).

Financial Condition

Assets

The following table sets forth, at the dates indicated, the principal components of assets.

	At March 31,			2011/2010 % change
	2010	2011	2011	
	(in millions, except percentages)			
Cash and cash equivalents	Rs. 471,441	Rs. 393,853	US\$ 7,739	(16.5)%
Investments	1,863,198	2,096,528	41,197	12.5
Advances (net of provisions)	2,257,781	2,560,193	50,308	13.4
Fixed assets	38,623	54,895	1,079	42.1
Other assets	262,430	232,210	4,563	(11.5)
Total assets	Rs. 4,893,473	Rs. 5,337,679	US\$ 104,887	9.1 %

Our total assets increased by 9.1% from Rs. 4,893.5 billion at year-end fiscal 2010 to Rs. 5,337.7 billion at year-end fiscal 2011, primarily due to an increase in net advances and investments. Net advances increased by 13.4% from Rs. 2,257.8 billion at year-end fiscal 2010 to Rs. 2,560.2 billion at year-end fiscal 2011. Investments increased by 12.5% from Rs. 1,863.2 billion at year-end fiscal 2010 to Rs. 2,096.5 billion at year-end fiscal 2011.

Cash and cash equivalents

Cash and cash equivalents include cash in hand, and balances with the Reserve Bank of India and other banks, including money at call and money callable on short notice. Cash and cash equivalents decreased from Rs. 471.4 billion at year-end fiscal 2010 to Rs. 393.9 billion at year-end fiscal 2011. The decrease was primarily due to a decrease in balances with the Reserve Bank of India by ICICI Bank from Rs. 241.7 billion at year-end fiscal 2010 to Rs. 171.2 billion at year-end fiscal 2011 due to a higher than stipulated cash reserve ratio maintained at year-end fiscal 2010.

Investments

Total investments increased by 12.5% from Rs. 1,863.2 billion at year-end fiscal 2010 to Rs. 2,096.5 billion at year-end fiscal 2011, primarily due to an increase in investments in corporate bonds and debentures, investments in the Rural Infrastructure Development Fund and in other related investments in lieu of a shortfall in meeting directed lending requirements, commercial paper and certificates of deposit by ICICI Bank and investments held to cover linked liabilities of ICICI Prudential Life Insurance Company. Investments held to cover the liabilities on unit-linked insurance policies of ICICI Prudential Life Insurance Company increased by 14.3% from Rs. 514.7 billion at year-end fiscal 2010 to Rs. 588.3 billion at year-end fiscal 2011. The increase in linked assets under management is primarily attributable to the improvement in the financial markets (as the investments held for our unit-linked business are valued on a mark-to-market basis) and an increase in business volume during the year.

At year-end fiscal 2011, we had an outstanding net investment of Rs. 28.3 billion in security receipts issued by asset reconstruction companies in relation to sales of non-performing assets compared to Rs. 33.9 billion at year-end fiscal 2010. See also “Business—Overview of Our Products and Services—Treasury”.

Advances

Net advances increased by 13.4% from Rs. 2,257.8 billion at year-end fiscal 2010 to Rs. 2,560.2 billion at year-end fiscal 2011, primarily due to an increase in domestic and overseas corporate loans on account of higher credit demand and increased business activity in the corporate sector due to the economic recovery and loans taken over from the Bank of Rajasthan. The increase was offset, in part, by a decrease in net advances of our subsidiaries, namely, ICICI Home Finance Company and ICICI Bank Canada. Net retail advances of ICICI Bank increased by

5.8% from Rs. 790.6 billion at year-end fiscal 2010 to Rs. 836.8 billion at year-end fiscal 2011. Net advances of overseas branches (including our offshore banking unit) of ICICI Bank increased in U.S. dollar terms by 24.0% from U.S.\$ 10.0 billion at year-end fiscal 2010 to U.S.\$ 12.4 billion at year-end fiscal 2011, and in rupee terms by 22.1% from Rs. 451.4 billion at year-end fiscal 2010 to Rs. 551.0 billion at year-end fiscal 2011. Net advances of overseas subsidiaries decreased marginally in U.S. dollar terms by 3.8% from U.S.\$ 7.8 billion at year-end fiscal 2010 to U.S.\$ 7.5 billion at year-end fiscal 2011, and in rupee terms, decreased by 4.3% from Rs. 347.9 billion at year-end fiscal 2010 to Rs. 332.8 billion at year-end fiscal 2011, primarily due to a decrease in net advances of ICICI Bank Canada on account of the securitization of insured mortgages in fiscal 2011. See also “Business—Loan Portfolio”.

Fixed and other assets

Fixed assets include premises, furniture and fixtures, assets given on lease and other fixed assets. Fixed assets increased by 42.1% from Rs. 38.6 billion at year-end fiscal 2010 to Rs. 54.9 billion at year-end fiscal 2011 due to partial capitalization of ICICI Bank’s new building in Hyderabad and an increase in the branch network and assets taken over from the Bank of Rajasthan. Other assets decreased by 11.5% from Rs. 262.4 billion at year-end fiscal 2010 to Rs. 232.2 billion at year-end fiscal 2011.

Liabilities and Stockholders’ Equity

The following table sets forth, at the dates indicated, the principal components of liabilities and stockholders’ equity.

	At March 31,			2011/2010	
	2010	2011	2011	%	
	(in millions, except percentages)			change	
Deposits	Rs. 2,415,723	Rs. 2,591,060	US\$ 50,915	7.3	%
Borrowings(1)	1,156,983	1,258,389	24,728	8.8	
Proposed dividend (including corporate dividend tax)	15,136	18,380	361	21.4	
Other liabilities	779,962	903,243	17,749	15.8	
Minority interest	12,704	13,582	267	6.9	
Total liabilities	4,380,508	4,784,654	94,020	9.2	
Equity share capital	11,149	11,518	226	3.3	
Reserves and surplus	501,816	541,507 (2)	10,641	7.9	
Total liabilities (including capital and reserves)	Rs. 4,893,473	Rs. 5,337,679	US\$ 104,887	9.1	%

(1) Includes subordinated debt and redeemable non-cumulative preference shares.

(2) Includes Employees Stock Options Outstanding.

Our total liabilities (including capital and reserves) increased by 9.1% from Rs. 4,893.5 billion at year-end fiscal 2010 to Rs. 5,337.7 billion at year-end fiscal 2011, primarily due to an increase in deposits, borrowings, other liabilities (including liabilities on insurance policies in force) and retained earnings.

Deposits

Deposits increased by 7.3% from Rs. 2,415.7 billion at year-end fiscal 2010 to Rs. 2,591.1 billion at year-end fiscal 2011 including deposits taken over from the Bank of Rajasthan. During fiscal 2011, ICICI Bank continued to focus on

rebalancing its funding mix by increasing the share of current and savings account deposits in total deposits. Current and savings account deposits are demand deposits and these deposits carry low interest rates. The Bank's current and savings account deposits increased from Rs. 842.2 billion at year-end fiscal 2010 to Rs. 1,016.5 billion at year-end fiscal 2011 and the ratio of current and savings account deposits to the Bank's total deposits increased from 41.7% to 45.1%. ICICI Bank's savings account deposits increased from Rs. 532.2 billion at year-end fiscal 2010 to Rs. 668.7 billion at year-end fiscal 2011.

ICICI Bank UK's primary source of funds has been retail deposits accepted through its internet banking platform. Until July 2008, demand and saving deposits formed a significant proportion of ICICI Bank UK's total deposits. Since the instant access demand and savings accounts could be subjected to high withdrawals in times of stress, ICICI Bank UK has focused from July 2008 onwards on rebalancing its deposit base towards term deposits. Accordingly, term deposits of ICICI Bank UK increased from Rs. 138.4 billion at year-end fiscal 2010 to Rs. 144.6 billion at year-end fiscal 2011. ICICI Bank UK's demand and savings account deposits declined from Rs. 66.0 billion at year-end fiscal 2010 to Rs. 43.2 billion at year-end fiscal 2011. The deposits of ICICI Bank Canada decreased from Rs. 200.7 billion at year-end fiscal 2010 to Rs. 154.4 billion at year-end fiscal 2011, primarily due to a decrease in term deposits from Rs. 166.0 billion at year-end fiscal 2010 to Rs. 122.5 billion at year-end fiscal 2011.

Our total term deposits increased from Rs. 1,478.0 billion at year-end fiscal 2010 to Rs. 1,503.7 billion at year-end fiscal 2011, while savings deposits increased from Rs. 622.2 billion at year-end fiscal 2010 to Rs. 732.6 billion at year-end fiscal 2011. Total deposits at year-end fiscal 2011 formed 67.3% of our funding (i.e., deposits and borrowings, including subordinated debt and redeemable non-cumulative preference shares). See also "Business—Funding".

Borrowings

Borrowings (including redeemable non-cumulative preference shares and subordinated debt) increased by 8.8% from Rs. 1,157.0 billion at year-end fiscal 2010 to Rs. 1,258.4 billion at year-end fiscal 2011, primarily due to an increase in call and term borrowings and an increase in capital-eligible borrowings in the nature of subordinated debt. This was partially offset by a decrease in borrowings of our UK subsidiary and home finance subsidiary. The Reserve Bank of India has issued guidelines effective April 1, 2010, which require market repurchase transactions (previously accounted for as sale and repurchase) to be accounted for as borrowing and lending. However, the transactions with the Reserve Bank of India by ICICI Bank under Liquidity Adjustment Facility continued to be accounted for as sale and purchase transactions. See also "Business—Funding".

Proposed dividend

In India, dividends declared for a fiscal year are normally paid in the following year. We declared a dividend of Rs. 12.00 per equity share for fiscal 2010, which was paid in fiscal 2011. We declared a dividend of Rs. 14.00 per equity share for fiscal 2011, which was paid in fiscal 2012.

Other liabilities

Other liabilities primarily consist of liabilities on insurance policies in force, pertaining to our insurance subsidiaries. Other liabilities increased by 15.8% from Rs. 780.0 billion at year-end fiscal 2010 to Rs. 903.2 billion at year-end fiscal 2011 primarily due to an increase in liabilities on policies in force of our life insurance business from Rs. 539.7 billion at year-end fiscal 2010 to Rs. 644.8 billion at year-end fiscal 2011. This was in line with an increase in linked assets under management primarily attributable to favorable financial markets (as the investments held for our unit-linked business are valued on a mark-to-market basis) and an increase in business volume during the year.

Equity share capital and reserves

Stockholders' equity increased from Rs. 513.0 billion at year-end fiscal 2010 to Rs. 553.0 billion at year-end fiscal 2011 (including a statutory reserve of Rs. 2.0 billion taken over from the Bank of Rajasthan at August 12, 2010) primarily due to the allotment of shares to the shareholders of the Bank of Rajasthan and the annual accretion to reserves out of profit for fiscal 2011. Excess of paid-up value of equity shares issued over the fair value of the net assets acquired in the amalgamation of the Bank of Rajasthan with ICICI Bank and amalgamation expenses,

amounting to Rs. 2.1 billion, have been adjusted against the securities premium account.

Off Balance Sheet Items, Commitments and Contingencies

Foreign Exchange and Derivatives Contracts

We enter into foreign exchange forwards, options, swaps and other derivatives products to enable customers to transfer, modify or reduce their foreign exchange and interest rate risks and to manage our own interest rate and foreign exchange positions. These instruments are used to manage foreign exchange and interest rate risk relating to specific groups of on-balance sheet assets and liabilities.

The following table sets forth, at the dates indicated, the notional amount of foreign exchange and interest rate derivatives contracts.

	Notional principal amounts At March 31,				Balance sheet fair value(1) At March 31,			
	2010	2011	2012	2012 (in millions)	2010	2011	2012	2012
Interest rate products:								
Swap agreements	Rs. 3,960,258	Rs. 4,786,591	Rs. 3,611,341	US\$ 70,964	Rs. 20,120	Rs. 15,044	Rs. 27,017	US\$ 531
Others	253,973	256,027	214,565	4,216	222	188	53	1
Total interest rate products	Rs. 4,214,231	Rs. 5,042,618	Rs. 3,825,906	US\$ 75,180	Rs. 20,342	Rs. 15,232	Rs. 27,070	US\$ 532
Foreign exchange products:								
Forward contracts	Rs. 1,644,474	Rs. 2,441,593	Rs. 3,552,805	US\$ 69,813	Rs. –	Rs. (3,218)	Rs. 13,428	US\$ 264
Swap agreements	582,155	637,482	703,775	13,829	12,656	13,968	19,615	385
Others	634,665	758,897	603,254	11,854	(873)	(2,411)	(2,945)	(58)
Total foreign exchange products	Rs. 2,861,294	Rs. 3,837,972	Rs. 4,859,834	US\$ 95,496	Rs. 11,783	Rs. 8,339	Rs. 30,098	US\$ 591

(1) Denotes the net mark-to-market impact of the derivatives and foreign exchange products on the reporting date.

The notional principal amount of interest rate products decreased to Rs. 3,825.9 billion at year-end fiscal 2012 compared to Rs. 5,042.6 billion at year-end fiscal 2011. The notional principal amount of foreign exchange products increased to Rs. 4,859.8 billion at year-end fiscal 2012 compared to Rs. 3,838.0 billion at year-end fiscal 2011. The credit exposure on interest rate derivatives was Rs. 92.2 billion at year-end fiscal 2012, compared to Rs. 108.0 billion at year-end fiscal 2011. The credit exposure on foreign exchange derivatives was Rs. 301.1 billion at year-end fiscal 2012, compared to Rs. 227.1 billion at year-end fiscal 2011.

An interest rate swap does not entail the exchange of notional principal, and the cash flow arises because of the difference between the interest rate pay and receive portions of the swap, which is generally much lower than the notional principal of the swap. A large proportion of interest rate swaps, currency swaps and forward exchange contracts are on account of market making, which involves providing regular two-way prices to customers or inter-bank counter-parties. This results in the generation of a higher number of outstanding transactions, and hence a large value of gross notional principal of the portfolio. For example, if a transaction entered into with a customer is covered by an exactly opposite transaction entered into with another counterparty, the net market risk of the two transactions will be zero whereas the notional principal amount of the portfolio will be the sum of both transactions. We also deal in credit derivatives instruments including credit default swaps, credit-linked notes, collateralized debt obligations and principal protected structures. The notional principal amount of these credit derivatives outstanding at year-end fiscal 2012, excluding accrued interest, was Rs. 1.5 billion in funded instruments and Rs. 11.1 billion in non-funded instruments which includes Rs. 50 million of protection we have bought. The notional principal amount of these credit derivatives outstanding at year-end fiscal 2011, excluding accrued interest, was Rs. 18.2 billion in

funded instruments and Rs. 29.4 billion in non-funded instruments which included Rs. 223 million of protection we have bought.

Securitization

We primarily securitize retail and corporate loans through “pass-through” securitization transactions involving special purpose entities, usually constituted as trusts. After securitization, we generally continue to maintain customer account relationships and service loans transferred to the securitization trusts. Our securitization transactions are made either with or without credit enhancement. In accordance with the Reserve Bank of India guidelines for securitization of standard assets, in effect from February 1, 2006, the Bank accounts for any loss arising from securitization immediately at the time of sale, and the profit/premium arising from securitization is amortized over the life of the securities issued or to be issued by the special purpose vehicle to which the assets are sold. Prior to February 1, 2006, any profit/loss arising out of a securitization transaction was recorded at the time of sale.

The Bank acts in different capacities and under different contracts for consideration including as originator, liquidity or credit enhancement provider, underwriter and senior contributor.

Excess interest spreads from the underlying assets in securitization transactions are generally subordinated to provide credit enhancement

In addition to the subordination of excess interest spreads, the Bank in a separate capacity provides external credit enhancement facilities to mitigate cash flow shortfalls that may arise from the underlying asset delinquencies. These facilities include first loss credit enhancement representing the first or primary level of protection provided to bring the ratings accorded to the beneficial interests of senior contributors to investment grade. The Bank also provides second loss credit enhancement representing a subsequent level of protection provided to protect the beneficiaries against further cash flow shortfalls. The first loss and second loss credit enhancements are provided either in the form of undertakings or cash collateral in a current account operated by the trust. The total outstanding first loss credit enhancements at year-end fiscal 2012 were Rs. 8.0 billion and second loss credit enhancements were Rs. 9.1 billion. Of the above, the outstanding credit enhancements in the form of guarantees amounted to Rs. 11.8 billion.

The Bank, in a separate capacity, provides liquidity facilities to help smoothen the timing differences faced by the special purpose vehicles between the receipt of cash flows from the underlying assets and the payments to be made to the investors. The liquidity facility enjoys a priority of claim over the future cash flows from the underlying assets, which is senior to the claims of the senior contributors.

Loan Commitments

We have outstanding undrawn commitments to provide loans and financing to customers. These loan commitments aggregated to Rs. 1,054.2 billion (including fund-based commitments fungible with non-fund-based facilities) at year-end fiscal 2012, compared to Rs. 956.8 billion at year-end fiscal 2011. The interest rate on a significant portion of these commitments is dependent on the lending rates prevailing on the date of the loan disbursement. Further, the commitments have fixed expiration dates and are contingent upon the borrower’s ability to maintain specific credit standards.

Capital Commitments

We are obligated under a number of capital project contracts which have been committed. The estimated amounts of contracts remaining to be executed on capital projects increased from Rs. 3.9 billion at year-end fiscal 2011 to Rs. 4.7 billion at year-end fiscal 2012.

The following table sets forth certain contractual obligations at year-end fiscal 2012.

156

Contractual Obligations	Total	Payments due by period			More than 5 years
		Less than 1 year	1-3 years	3-5 years	
		(in millions, except percentages)			
Long-term debt obligations	Rs. 1,086,200	Rs. 235,736	Rs. 207,417	Rs. 260,492	Rs. 382,555
Time deposits	1,631,739	1,279,276	282,886	55,556	14,021
Life-insurance obligations(1)	1,060,898	(15,698)	(147,848)	(56,507)	1,280,951
Gratuity obligations(2)	9,284	1,009	1,786	2,046	4,443 (3)
Pension obligations(2)	7,492	699	1,458	1,647	3,688 (3)
Operating lease obligations	3,763	917	1,500	859	487
Guarantees					
Financial guarantees	338,207	270,189	48,042	17,447	2,529
Performance guarantees	659,121	303,977	224,381	102,184	28,579
Total	Rs. 4,796,704	Rs. 2,076,105	Rs. 619,622	Rs. 383,724	Rs. 1,717,253

(1) The amounts shown represent an estimate of undiscounted cash flows under life insurance contracts. The cash flows shown consist of expected benefit payments net of premiums receivable as per the contractual terms. Cash flows associated with benefit payments are projected based on assumptions for factors like mortality and investment returns. The cash flows included in the above table are different from the liabilities on policies in effect on March 31, 2012 that are disclosed in the balance sheet because the liabilities are disclosed at discounted values and include an allowance for other non-contractual cash flows, such as expenses.

(2) Based on actuarial assumptions.

(3) Based on outflow estimates between five and ten years.

Long-term debt obligations

Long-term debt represents debt with an original contractual maturity greater than one year. Maturity distribution is based on contractual maturity or the date at which the debt is callable at the option of the holder, whichever is earlier. For a detailed discussion on long-term debt, see note 3 to our “Consolidated Financial Statements—Additional Notes” included herein.

Time deposits

Time deposits represent deposits with fixed maturity terms. Generally, time deposits can be withdrawn by the depositors any time before maturity subject to certain prepayment charges.

Life insurance obligations

Life insurance obligations primarily include liabilities for life insurance policies, including both unit-linked and non-linked policies.

A unit-linked life insurance policy is a policy in which the cash value of the policy varies according to the net asset value of units (i.e., shares) in investment assets chosen by the policyholder. The liability for unit-linked life insurance policies is equal to the net asset value of the units in each policy as of the valuation date. Certain of our unit-linked life insurance policies carry financial payout guarantees, and the liability for these policies takes into account both the net asset values of the units and these guarantees.

The liability for non-linked life insurance policies is calculated using the gross premium method using assumptions for interest, mortality, expense and inflation. This method is used for both participating and non-participating policies; however, for participating policies, the method also uses assumptions for future bonuses, together with allowances for taxation and allocation of profits to shareholders. These assumptions are determined as prudent estimates at the date of valuation with allowances for adverse deviations.

Gratuity obligations

We provide gratuity, a defined benefit retirement plan covering all employees who retire or resign after a minimum prescribed period of continuous service. The plan provides a lump sum payment to eligible employees at

retirement or termination of employment based on the respective employee's salary and years of employment with us.

The gratuity benefit is provided to employees through either an in-house fund or separate funds managed by Life Insurance Corporation of India Limited and ICICI Prudential Life Insurance Company Limited. We are responsible for settling the gratuity obligation through contribution to these funds.

Pension obligations

The Bank provides pensions—deferred retirement plans—covering certain employees of the former Bank of Madura, Sangli Bank and Bank of Rajasthan. The plans provide for monthly pension payments to these employees when they retire. These payments are based on the respective employee's years of service with the Bank and applicable salary and also include a cost of living adjustment. Pension funds for employees in service who previously worked at the former Bank of Madura, Sangli Bank or Bank of Rajasthan are managed in an in-house trust and the liability is funded as per actuarial valuation.

Pursuant to a master policy, the Bank purchases annuities from LIC and ICICI Prudential Life Insurance Company Limited for the benefit of employees upon their retirement. These annuities provide the pension payments to retired employees of the former Bank of Madura, Sangli Bank and Bank of Rajasthan.

Operating lease obligations

We have commitments under long-term operating leases principally for premises. The following table sets forth a summary of future minimum lease rental commitments at year-end fiscal 2012.

	Lease rental commitments for fiscal	(in millions)
2013		Rs. 917
2014		824
2015		676
2016		516
2017		343
Thereafter		487
Total minimum lease commitments		Rs. 3,763

Guarantees

As a part of our project financing and commercial banking activities, we have issued guarantees to support the regular business activities of our clients. These generally represent irrevocable assurances that we will make payments in the event that the customer fails to fulfill its financial or performance obligations. Financial guarantees are obligations to pay a third party beneficiary, where a customer fails to make payment towards a specified financial obligation. Performance guarantees are obligations to pay a third party beneficiary, where a customer fails to perform a non-financial contractual obligation. The guarantees are generally for a period not exceeding ten years. The credit risks associated with these products, as well as the operating risks, are similar to those relating to other types of unfunded facilities. We enter into guarantee arrangements after conducting appropriate due diligence on our clients. We generally review these facilities on an annual basis. If a client's risk profile deteriorates to an unacceptable level, we may decline to renew the guarantee at expiration or may require additional security sufficient to protect our exposure. Guarantees increased by 16.7% from Rs. 854.9 billion at year-end fiscal 2011 to Rs. 997.3 billion at year-end fiscal 2012.

The following table sets forth, at the dates indicated, guarantees outstanding.

	2010	2011	At year-end fiscal 2011/2010		2012	2012	2012/2011	
			change	%			change	%
			(in millions, except percentages)					
Financial guarantees	Rs. 168,487	Rs. 244,250	45.0	%	Rs. 338,207	US\$ 6,646	38.5	%
Performance guarantees	468,598	610,610	30.3		659,121	12,952	7.9	
Total guarantees	Rs. 637,085	Rs. 854,860	34.2	%	Rs. 997,328	US\$ 19,597	16.7	%

Financial guarantees constituted approximately 34% of our guarantee exposure at year-end fiscal 2012. Of these financial guarantees, approximately 28% were issued towards risk participation, syndication and favoring other lenders as beneficiaries to allow our clients to receive credit assistance or credit enhancement from such lender-beneficiaries. The balance of financial guarantees was issued to support other business activities of our clients, such as guarantees for the procurement of goods or guarantees in lieu of security/cash deposits. Performance guarantees constituted 66% of our guarantee exposure at year-end fiscal 2012.

Illustrative examples of client business activities requiring guarantees include: contracts to procure goods from suppliers, where guarantees are obtained by clients to provide suppliers with assurance of payment in case the clients fail to pay upon receipt of goods, submission of bids for projects where guarantees are obtained by clients to provide assurance of performance of contract obligations in case the bid is awarded to them, advances against goods or services to be supplied by clients to their own customers where guarantees are obtained by clients to assure their customers of a refund of the advance in case the clients are unable to supply goods or services, guarantees provided in lieu of security deposits or cash deposits that clients would otherwise be required to maintain with stock exchanges, commodity exchanges, regulatory authorities or other bodies, or for participating in tenders or in other business contracts, and guarantees obtained by clients in favor of lenders that enable the clients to receive credit assistance or credit enhancement from lenders by providing such lenders with assurance of payment.

If our clients default under the terms of the guarantees, the beneficiaries may exercise their rights under the guarantees and we are obligated to honor payments to the beneficiaries. Banks and financial institutions are the beneficiaries of some of our financial guarantees, to enable clients to receive financial assistance from these banks and financial institutions. If our clients default on these loans, the banks and financial institutions exercise their rights under the guarantees and we are obligated to honor payments to them. Amounts that we pay to the other banks and financial institutions and do not recover from clients are subject to the Reserve Bank of India's prudential norms on income recognition, asset classification and provisioning pertaining to advances.

We also issue guarantees for clients to whom we have provided other funded facilities in the form of loans. The outstanding amount of such guarantees related to non-performing or restructured loans was Rs. 2.9 billion at year-end fiscal 2012. The guarantees we issue are not unilaterally changed or revised when a related loan is restructured. Guarantees are valid for a specified amount and a specified period. Any change in expiry date or amount requires the consent of both the beneficiary and the guarantor. We generally provide guarantee facilities to our customers for a validity period of 12-18 months.

We have collateral available to reimburse potential losses on our guarantees. Margins in the form of cash and fixed deposit available to us to reimburse losses realized under guarantees amounted to Rs. 32,554 million at year-end fiscal 2012, compared to Rs. 25,319 million at year-end fiscal 2011. Other property or security may also be available to us to cover losses under these guarantees.

Our related party guarantees amounted to Rs. 0.1 million at year-end fiscal 2012.

The following table sets forth the roll-forward of activity for guarantees at year-end fiscal 2012.

Particulars	Performance Guarantees	Financial Guarantees
	(in millions)	
Opening balance at April 1, 2011	Rs. 610,610	Rs. 244,250
Additions: Issued during the year	312,242	347,827
Deletions: Closed due to expiry/termination during the year	(262,476)	(248,044)
Invoked and paid during the year	(1,255)	(5,826)

Closing balance at year-end fiscal 2012	Rs. 659,121	Rs. 338,207
---	-------------	-------------

Capital Resources

ICICI Bank actively manages its capital to meet regulatory norms and current and future business needs, considering the risks in its businesses, expectations of rating agencies, shareholders and investors, and the available options of raising capital. Its capital management framework is administered by the Finance Group and the Risk Management Group under the supervision of the Board and the Risk Committee. The capital adequacy position and assessment is reported to the Board and the Risk Committee periodically.

Regulatory capital

ICICI Bank is subject to the Basel II capital adequacy guidelines stipulated by the Reserve Bank of India in effect from year-end fiscal 2008. The Reserve Bank of India guidelines on Basel II require ICICI Bank to maintain a minimum capital to risk-weighted assets ratio of 9.0% and a minimum tier I capital adequacy ratio of 6.0% on an ongoing basis. At year-end fiscal 2012, the capital adequacy ratio of the Bank (unconsolidated) was 18.5% with tier I ratio of 12.7%.

Under Pillar 1 of the Reserve Bank of India guidelines on Basel II, the Bank follows the standardized approach for measurement of credit and market risks and the basic indicator approach for measurement of operational risk.

The Reserve Bank of India has also stipulated that banks shall maintain capital at the higher of the minimum capital required as per Basel II or 80% of the minimum capital required as per Basel I. In accordance with these norms, at year-end fiscal 2012, the prudential floor at 80% of the minimum capital requirement under Basel I was Rs. 332.5 billion and was lower than the minimum capital requirement of Rs. 358.7 billion under Basel II. Therefore, we have maintained the capital adequacy at year-end fiscal 2012 required by Basel II norms.

Unconsolidated capital adequacy position

The following table sets forth, at the dates indicated, risk-based capital, risk-weighted assets and risk-based capital adequacy ratios computed in accordance with the Reserve Bank of India guidelines on Basel I and Basel II and based on ICICI Bank's unconsolidated financial statements prepared in accordance with Indian GAAP.

	As per the Reserve Bank of India guidelines on Basel I		As per the Reserve Bank of India guidelines on Basel II			
	2011	2012	At year-end fiscal		2012	2012
			2012	2011		
			(in millions, except percentages)			
Tier I capital	Rs.463,988	Rs.512,159	US\$ 10,064	Rs.449,749	Rs.505,183	US\$9,927
Tier II capital	231,007	238,564	4,688	217,502	232,946	4,577
Total capital	Rs.694,995	Rs.750,723	US\$ 14,752	Rs.667,251	Rs.738,129	US\$ 14,504

Movement in ICICI Bank's capital funds and risk weighted assets from year-end fiscal 2011 to year-end fiscal 2012 (as per the Reserve Bank of India guidelines on Basel II):

During fiscal 2012, capital funds increased by Rs. 70.9 billion primarily due to accretion to retained earnings, issuance of lower tier II debt capital of Rs. 16.0 billion and a decrease of Rs. 20.6 billion in deductions for securitization exposures.

Risk-weighted assets relating to credit risk increased by Rs. 559.0 billion from Rs. 2,909.8 billion at year-end fiscal 2011 to Rs. 3,468.7 billion at year-end fiscal 2012, primarily due to an increase of Rs. 409.5 billion in risk-weighted assets of on-balance sheet credit exposures and an increase of Rs. 149.5 billion in risk-weighted assets for off-balance sheet credit exposures (including an increase of Rs. 156.5 billion in risk-weighted assets for non-fund based facilities partly offset by a decrease of Rs. 23.2 billion in risk-weighted assets for undrawn commitments).

Risk-weighted assets relating to market risk increased by Rs. 13.1 billion from Rs. 255.5 billion at year-end fiscal 2011 to Rs. 268.7 billion at year-end fiscal 2012. The general market risk risk-weighted assets increased by Rs. 15.4 billion (reflecting a capital charge of Rs. 1.4 billion) primarily due to an increase in the investment book and in the duration of interest rate related instruments.

Risk-weighted assets relating to operational risk at year-end fiscal 2012 were Rs. 248.5 billion (reflecting a capital charge of Rs. 22.4 billion). The operational risk capital charge is computed based on 15% of the average of the previous three financial years' gross income.

Consolidated capital adequacy position

Consolidation for capital adequacy calculation is based on the consolidated financial statements of ICICI Bank and its subsidiaries in line with the norms on consolidated prudential reporting issued by the Reserve Bank of India. The entities considered for consolidation for capital adequacy calculation include subsidiaries, associates and joint ventures of the Bank, which carry on activities of a banking or of a financial nature as stated in the reporting guidelines prescribed by the Reserve Bank of India. Entities engaged in the insurance business and businesses not pertaining to financial services are excluded from consolidation for capital adequacy calculation. Investment above 30% in the paid-up equity capital of financial entities which are not consolidated for capital adequacy (including insurance entities) and investments in other instruments eligible for regulatory capital status in those entities are deducted to the extent of 50% from tier I and 50% from tier II capital of the Bank.

At year-end fiscal 2012, our capital adequacy ratio at the consolidated level was 19.6% with tier I ratio of 12.8%.

Movement in our capital funds and risk weighted assets at the consolidated level from year-end fiscal 2011 to year-end fiscal 2012:

During fiscal 2012, capital funds increased by Rs. 75.6 billion primarily due to an increase in retained earnings, the issuance of tier II debt capital of Rs. 16.7 billion and a decrease of Rs. 20.0 billion in deduction on account of securitization exposures.

Total risk-weighted assets increased by Rs. 450.1 billion primarily due to an increase in the risk-weighted assets for on-balance sheet exposures by Rs. 317.0 billion. Risk-weighted assets relating to off-balance sheet items including derivatives, other contingent liabilities and undrawn commitments increased by Rs. 163.2 billion. Risk-weighted assets relating to market risk decreased by Rs. 22.8 billion, and risk-weighted assets relating to operational risk decreased by Rs. 0.6 billion.

Internal assessment of capital

ICICI Bank's capital management framework includes a comprehensive internal capital adequacy assessment process conducted annually, which determines the adequate level of capitalization necessary to meet regulatory norms and current and future business needs, including under stress scenarios. The internal capital adequacy

assessment process is formulated at both the standalone bank level and the consolidated group level. The process encompasses capital planning for a certain time horizon, identification and measurement of material risks and the relationship between risk and capital.

The capital management framework is complemented by its risk management framework, which includes a comprehensive assessment of material risks. Stress testing, which is a key aspect of the capital assessment process and the risk management framework, provides an insight into the impact of extreme but plausible scenarios on the risk profile and capital position. Based on our Board-approved stress testing framework, we conduct stress tests on our various portfolios and assess the impact on our capital ratios and the adequacy of our capital buffers for current and future periods. We periodically assess and refine our stress tests in an effort to ensure that the stress scenarios capture material risks as well as reflect possible extreme market moves that could arise as a result of market conditions. The internal capital adequacy assessment process at the consolidated level integrates the business and capital plans and the stress testing results of the group entities.

Based on the internal capital adequacy assessment process, we determine our capital needs and the optimum level of capital by considering the following in an integrated manner:

- strategic focus, business plan and growth objectives;
 - regulatory capital requirements as per the Reserve Bank of India guidelines;
 - assessment of material risks and impact of stress testing;
 - perception of credit rating agencies, shareholders and investors;
 - future strategy with regard to investments or divestments in subsidiaries; and
- evaluation of options to raise capital from domestic and overseas markets, as permitted by the Reserve Bank of India from time to time.

We formulate our internal capital level targets based on the internal capital adequacy assessment process and endeavor to maintain the capital adequacy level in accordance with the targeted levels at all times.

Impending regulatory developments associated with capital adequacy

Basel III

In order to strengthen the resilience of the banking sector to potential future shocks, as well as to ensure adequate liquidity in the banking system, the Basel Committee on Banking Supervision issued the Basel III proposals on December 17, 2009. Following a consultation phase on these proposals, the final set of Basel III rules was issued on December 16, 2010. The Basel III rules on capital consist of measures aimed at improving the quality, consistency and transparency of capital, enhancing risk coverage, introducing a supplementary leverage ratio, reducing procyclicality and promoting countercyclical buffers, and addressing systemic risk and interconnectedness. Under the Basel III rules on capital, the minimum common equity requirement has been increased from 2.0% to 4.5% with an additional capital conservation buffer requirement of 2.5%, thereby bringing the total common equity requirement to 7.0%. The capital conservation buffer is a buffer established above the regulatory minimum capital requirement, and capital distribution constraints will be imposed on the bank when capital levels fall below the buffer limit. Further, the minimum tier I capital requirement has been increased from 4.0% to 6.0% and with the above-mentioned capital conservation buffer, the total tier I capital requirement will be 8.5%. The total capital adequacy requirement (tier I and tier II) remains at

the existing 8.0% level and with the above-mentioned capital conservation buffer, the total capital adequacy requirement will be 10.5%. The Basel III framework also stipulates a minimum tier I leverage ratio requirement of 3.0%. Further, on July 19, 2011, the Basel Committee on Banking Supervision also stipulated the range of capital surcharges for Global Systemically Important Banks. The Basel III rules on liquidity consist of a measure of short-term liquidity coverage ratio aimed at building liquidity buffers to meet stress situations and a measure of long-term net stable funding ratio aimed at promoting longer term structural

funding. The Basel Committee on Banking Supervision has stipulated a phased implementation of the Basel III framework between January 1, 2013 and January 1, 2019.

On May 2, 2012, the Reserve Bank of India issued the final guidelines on the Basel III capital regulations. As per the guidelines, Indian banks will have to maintain a minimum common equity tier I capital ratio of 5.5% of risk-weighted assets, a minimum tier I capital ratio of 7.0% of risk-weighted assets and a minimum total capital adequacy ratio of 9.0%. The guidelines stipulate a capital conservation buffer of 2.5% of risk-weighted assets comprised of common equity to be implemented between March 2015 and March 2018. The guidelines also stipulate a minimum tier I leverage ratio requirement of 4.5%. The implementation of the guidelines is proposed to begin from January 1, 2013 and to be fully implemented by March 31, 2018. Certain capital instruments that no longer qualify as non-common equity tier I or tier II capital will be phased out beginning January 1, 2013, with their recognition capped at 90% from January 1, 2013, reducing by 10 percentage points in subsequent years. We continue to monitor developments on the Basel III framework, and we believe that our current robust capital adequacy position and demonstrated track record of access to domestic and overseas markets for capital raising will enable us to adapt to the Basel III framework. On February 21, 2012, the Reserve Bank of India issued draft guidelines on the Basel III liquidity standards and solicited feedback from the industry.

Liquidity Risk

Liquidity risk is the current and prospective risk arising out of an inability to meet financial commitments as they fall due, through available cash flows or through the sale of assets at fair market value. It includes both, the risk of unexpected increases in the cost of funding an asset portfolio at appropriate maturities and the risk of being unable to liquidate a position in a timely manner at a reasonable price.

The goal of liquidity risk management is to be able, even under adverse conditions, to meet all liability repayments on time and to fund all investment opportunities by raising sufficient funds either by increasing liabilities or by converting assets into cash expeditiously and at reasonable cost.

Most of the Bank's incremental funding requirements are met through short-term funding sources, primarily in the form of deposits including inter-bank deposits. However, a large portion of the Bank's assets, primarily the corporate and project finance and home loan portfolio, have medium or long-term maturities, creating a potential for funding mismatches. The Bank actively monitors its liquidity position and attempts to maintain adequate liquidity at all times to meet all the requirements of its depositors and bondholders, while also meeting the credit demand of its customers.

The Bank seeks to establish a continuous information flow and an active dialogue between the funding and borrowing divisions of the organization to enable optimal liquidity management. A separate group is responsible for liquidity management. The Bank is required to submit gap analysis on a fortnightly basis to the Reserve Bank of India. Pursuant to the Reserve Bank of India guidelines, the liquidity gap (if negative) must not exceed 5.0%, 10.0%, 15.0% and 20.0% of cumulative outflows in the 1 day, up to 7 days, up to 14 days and up to 28 day time categories respectively. The Bank prepares a daily maturity gap analysis for the rupee book to review its liquidity position. The Bank's static gap analysis is also supplemented by a short-term dynamic analysis, in order to provide the liability raising units with a fair estimate of its short-term funding requirements. In addition, the Bank also monitors certain liquidity ratios on a fortnightly basis. The Bank has a liquidity contingency plan in place, through which it monitors key indicators that could signal potential liquidity challenges, to enable it to take necessary measures to ensure sufficient liquidity.

The Bank maintains diverse sources of liquidity to facilitate flexibility in meeting funding requirements. Incremental operations are principally funded by accepting deposits from retail and corporate depositors. The deposits are augmented by borrowings in the short-term inter-bank market and through the issuance of bonds. The Bank also has

recourse to the liquidity adjustment facility, marginal standing facility and the refinance window, which are short-term funding arrangements provided by the Reserve Bank of India. The Bank generally maintains a substantial portfolio of high quality liquid securities that may be sold on an immediate basis to meet our liquidity needs. The Bank also has the option of managing liquidity by borrowing in the inter-bank market on a short-term basis. The overnight market, which is a significant part of the inter-bank market, is susceptible to volatile interest

rates. These interest rates on certain occasions have touched highs of 100.0% and above. To curtail reliance on such volatile funding, the Bank's liquidity management policy has stipulated daily limits for borrowing and lending in this market. The Bank's limit on daily borrowing is more conservative than the limit set by the Reserve Bank of India. ICICI Securities Primary Dealership, like us, relies for a certain proportion of its funding on the inter-bank market for overnight money and is therefore also exposed to similar risk of volatile interest rates.

The Bank's gross liquid assets consist of cash, nostro balances, overnight and other short-term money market placements, government bonds and treasury bills (including investments eligible for reserve requirements and net of borrowings on account of repurchase agreements and the liquidity adjustment facility), corporate bonds (rated AA and above), other money market investments such as commercial paper and certificates of deposits and mutual fund investments. We deduct our short-term borrowings (borrowings with maturity up to 28 days) from the aggregate of these assets to determine our net liquid assets. In addition to aforementioned liquid assets, the Bank has access to other reliable sources of liquidity such as unutilized refinance lines from the Reserve Bank of India.

The Bank maintains a significant portion of its demand and time liabilities in forms required pursuant to regulatory reserve requirements imposed by the Reserve Bank of India. The Reserve Bank of India stipulates a cash reserve ratio applicable to Indian banks, which requires the Bank to maintain an average percentage of its demand and time liabilities as a cash balance deposited with the Reserve Bank of India over 14-day periods. At year-end fiscal 2012, the cash reserve ratio requirement percentage was 4.75%. In addition, cash reserves may not fall below 70% of the required cash reserve ratio on any day during any 14-day reporting period.

The Reserve Bank of India also stipulates a statutory liquidity ratio applicable to Indian banks, which requires the Bank to maintain a certain percentage of demand and time liabilities in certain prescribed investments. At year-end fiscal 2012, the statutory liquidity ratio requirement percentage was 24%. The Bank generally holds more statutory liquidity ratio eligible securities than the statutory liquidity ratio requirement. Statutory liquidity ratio eligible instruments include cash, gold or approved unencumbered securities.

At various overseas branches of the Bank, certain reserves are maintained pursuant to local regulations. The Bank has complied with these local reserve requirements during fiscal 2012.

The Bank maintains liquid assets in excess of what is required by Statutory Liquidity Ratio and Cash Reserve Ratio. Throughout fiscal 2012, the Bank maintained adequate reserves as per the regulatory requirements mentioned above.

The following table indicates the details of the components of average and balance sheet date liquid assets of the Bank.

	At March 31, 2011	Fortnightly average for fiscal 2012 (in billions)	At March 31, 2012
Statutory liquidity ratio eligible investments and other government securities, net of borrowings on account of repurchase agreement and liquidity adjustment facility (1)	Rs. 650.5	Rs. 719.0	Rs. 704.2
Balance with central banks and current accounts with other banks	196.6	170.8	184.2
Other liquid assets	337.1	307.9	355.0
Gross liquid assets	1,184.2	1,197.7	1,243.4
(Less) Short-term borrowings	0.7	7.3	0.2
Net liquid assets	Rs. 1,183.5	Rs. 1,190.4	Rs. 1,243.2

(1) For the purposes of above table, borrowings on account of repurchase agreements and the liquidity adjustment facility are netted-off from the statutory liquidity ratio eligible investments and other government securities. From April 1, 2010, repurchase and reverse repurchase transactions (other than transactions made by the Bank under the Liquidity Adjustment Facility with the Reserve Bank of India) are accounted as borrowing and lending transactions in financial accounting. From the last three months of fiscal 2012 (i.e., through March 31, 2012) the repurchase and reverse repurchase transactions with the Reserve Bank of India under the Liquidity Adjustment Facility are also accounted for as borrowings and lendings in financial accounting. Accordingly, statutory liquidity ratio eligible investments and other government securities reflected in financial statements are gross of such borrowings.

The Bank held net liquid assets totaling about Rs. 1,243.2 billion at year-end fiscal 2012, compared to Rs. 1,183.5 billion at year-end fiscal 2011. During fiscal 2012, the Bank held fortnightly average net liquid assets of about Rs. 1,190.4 billion. In addition to the amounts included in net liquid assets above, at year-end fiscal 2012, the Bank also held other fixed-income non-government securities totaling about Rs. 113.4 billion, compared to Rs. 95.3 billion at year-end fiscal 2011.

The Bank also has access to other reliable sources of liquidity. The Reserve Bank of India conducts repurchase and reverse repurchase transactions with banks through its liquidity adjustment facility to carry out monetary policy and manage liquidity for the Indian banking system. The Reserve Bank of India stipulates an interest rate applicable to such repurchase and reverse repurchase agreements, known as the repo rate and reverse repo rate, respectively. The liquidity adjustment facility is available throughout the year. Further, there is a liquid market for repurchase transactions with other market counterparties. Banks may enter into repurchase transactions with the Reserve Bank of India or other market counterparties against the statutory liquidity ratio eligible securities it holds in excess of statutory requirement.

In addition to the liquidity adjustment facility, the Reserve Bank of India has a marginal standing facility, available to certain eligible banks, including ICICI Bank. Under the facility, eligible banks can borrow overnight up to 2% of their respective net demand and time liabilities outstanding at the end of the second preceding 14-day period. In April 2012, the Reserve Bank of India increased the amount that eligible banks, including the Bank, could borrow, from 1% to 2% of net demand and time liabilities. The rate of interest on amounts accessed through this facility is 100 basis points above the liquidity adjustment facility repo rate mentioned above.

The Reserve Bank of India also gives Indian banks, including the Bank, access to certain refinance facilities that allow banks to borrow at the repo rate from the Reserve Bank of India when those banks have made loans to borrowers for specified activities.

At year-end fiscal 2012, the Bank was eligible to borrow Rs. 68.9 billion through the liquidity adjustment facility, the marginal standing facility and the Reserve Bank of India refinance facilities, in addition to amounts that were already borrowed from these facilities. In April 2012, the Reserve Bank of India increased the amount that eligible banks, including the Bank, could borrow, from 1% to 2% of net demand and time liabilities, as discussed above. Accordingly, at June 30, 2012, the Bank was eligible to borrow Rs. 122.2 billion through the liquidity adjustment facility, the marginal standing facility and the Reserve Bank of India refinance facilities, in addition to amounts that were already borrowed from these facilities.

The Reserve Bank of India uses the liquidity adjustment facility, the marginal standing facility and its refinance facilities to implement monetary policy. Similarly, the Reserve Bank of India has the right to suspend the liquidity adjustment facility or reduce the amounts that Indian banks can access via the liquidity adjustment facility on any day on a proportionate basis for all banks. Such policy changes could affect the operations of these facilities and could inhibit Indian banks', including the Bank's, access to these facilities.

Our domestic operations in India and our overseas banking subsidiaries are funded primarily by deposits. Our overseas branches are funded primarily by bond issuances, syndicated loans, inter-bank funding and commercial paper, in addition to deposit taking subject to local regulation, and have longer maturity assets relative to liabilities. Uncertain conditions in the international markets in recent times, growth concerns due to the economic slowdown, together with new liquidity regimes being imposed by regulators, have resulted in continued challenges in the funding market. We have, therefore, planned our debt raisings through bond issuances and bilateral loans at appropriate times and in alignment with expected loan disbursements and refinancing requirements from our overseas branches. Additionally, we continue to focus on inter-bank borrowings and deposit roll-overs.

Additionally, we have continued to successfully raise funds through banker's acceptance and access refinance from export credit agencies. We have the ability to use our rupee liquidity in India to meet refinancing needs at our

overseas branches, although this may be at a relatively high cost based on swap and exchange rates prevailing at the time of such refinancing. ICICI Bank raised U.S.\$ 2.5 billion through bonds denominated in U.S. dollars through three issuances in July 2010, November 2010 and May 2011. These bonds have original maturities of 5.5 years, 10 years and 5.5 years respectively.

The terms of our bond issuances and loans from other financial institutions and export credit agencies contain cross-default clauses, restrictions on our ability to merge or amalgamate with another entity and restrictions on our ability to prematurely redeem or repay such bonds or loans. The terms of our subordinated debt issuances eligible for inclusion in tier I or tier II capital include the suspension of interest payments in the event of losses or capital deficiencies, and a prohibition on redemption, even at maturity or on specified call option dates, without the prior approval of the Reserve Bank of India. We are currently not, and do not expect to be, in breach of any material covenants of our borrowings that would be construed as events of default under the terms of such borrowings.

There are restrictions on the use of liquidity maintained by our UK and Canada subsidiaries to meet our overall liquidity needs. The Office of the Superintendent of Financial Institutions of Canada has prescribed a limit of 100% of tier I and tier II capital (as defined under Canadian regulations) on the credit exposure to any single entity or a group of connected entities. ICICI Bank Canada, our Canadian subsidiary, has internally capped this credit exposure at 50% of the limit specified by the Office of the Superintendent of Financial Institutions, except with respect to exposure to the ICICI Bank and its consolidated subsidiaries. The Financial Services Authority of the United Kingdom has prescribed a limit of 25% of the large exposure capital base on the exposure to an individual counterparty (or a group of connected counterparties). The large exposure capital base is calculated as the sum of allowable tier I and tier II capital, less any deductions required by the Financial Services Authority. ICICI Bank UK has a large exposure capital base of U.S.\$ 1.1 billion at year-end fiscal 2012, resulting in a limit of U.S.\$ 278 million.

During fiscal 2012, ICICI Bank Canada and ICICI Bank UK have complied with both regulatory and their internal limits on exposures to any single entity, including to ICICI Bank and other consolidated entities.

The Financial Services Authority classifies ICICI Bank UK as an individual liquidity adequacy standards firm, which means it is required to meet certain quantitative requirements set out in the Prudential sourcebook for Banks, Building Societies and Investment Firms. In addition, the Financial Services Authority has issued liquidity guidelines that ICICI Bank UK is complying with, effective June 27, 2012. The liquidity guidelines specify the quantity of liquid assets (in any currency that the Financial Services Authority deems material with respect to ICICI Bank UK and also on an all currency combined basis) that the Financial Services Authority believes is appropriate for ICICI Bank UK to hold.

Canadian regulations impose no liquidity pool requirements or liquidity buffer requirements on regulated Canadian banks, including ICICI Bank Canada. However, the Office of the Superintendent of Financial Institutions expects each such bank to have an internal liquidity policy articulating and defining the role of liquid assets within the bank's overall liquidity management system and establishing minimum targets for liquid asset holdings. ICICI Bank Canada has a liquidity management policy and market risk management policy that are approved by its board of directors. These policies require ICICI Bank Canada to maintain a certain percentage of its customer liabilities in liquid assets and to maintain sufficient liquidity to cover net outflows in the "Up to 30 days" maturity bucket. These limits are monitored monthly. ICICI Bank Canada has complied with these requirements throughout fiscal 2012.

The Central Bank of Russia requires banks in Russia to maintain a reserve that is deposited with the Central Bank of Russia based on a certain percentage of the banks' liabilities. The Central Bank of Russia also requires banks in Russia to comply with certain limits on regulatory ratios relating to liquidity mismatches, especially to liquidity mismatches that may occur due to net outflows in the "next day," "up to 30 days," and "more than 1 year" maturity buckets. ICICI Bank Eurasia Limited Liability Company, the Bank's wholly owned subsidiary in Russia, has complied with these

requirements throughout fiscal 2012.

The successful management of credit, market and operational risk is an important consideration in managing our liquidity because it affects the evaluation of our credit ratings by rating agencies. Rating agencies may reduce or indicate their intention to reduce the ratings at any time.

166

Rating agencies can also decide to withdraw their ratings of the Bank, which may have the same effect as a reduction in our ratings. Any reduction in our ratings (or withdrawal of ratings) may increase our borrowing costs, limit our access to capital markets and adversely affect our ability to sell or market our products, engage in business transactions (particularly longer-term transactions) and derivatives transactions, or retain our customers. See also “Risk Factors—Any downgrading of India’s debt rating by an international rating agency could adversely affect our business, our liquidity and the price of our equity shares and ADSs”.

Changes in or withdrawal of the Bank’s credit rating will not increase the amount of collateral that the Bank is required to post with counterparties. When Indian banks, including the Bank, engage in collateralized borrowing, they borrow from the Reserve Bank of India and through the Clearing Corporation of India Limited, a centralized clearing counterparty. When Indian banks borrow from the Reserve Bank of India, collateral is typically statutory liquidity ratio-eligible investments, such as central or state government securities. In general, the face value of collateral given for any such loan is higher than the value of the loan. This difference is referred to as a haircut. The haircut for all such securities borrowed from the Reserve Bank of India is stipulated by the Reserve Bank of India and is not based on the credit rating of the borrower. Similarly, the Clearing Corporation of India Limited’s margin requirement is based on maturity and certain other factors, but not on the credit ratings of the borrower. In addition, the Bank generally does not engage in derivative or swap transactions that require the Bank to increase its collateral if the Bank’s credit rating is downgraded. As such, any reduction in or withdrawal of the Bank’s credit ratings will not impact the Bank’s collateralized borrowing operations.

The Bank has certain borrowings that would be affected by a one or two notch downgrade from its current credit rating. These borrowings amount to less than 2% of the total borrowings of the Bank at year-end fiscal 2012. If an international credit rating agency downgrades the Bank’s credit rating by one or two notches, the Bank would be required to pay an increased interest rate on certain borrowings, and for certain borrowings, the Bank would be required to renegotiate a new interest rate with its lenders. If the Bank is not able to reach an agreement for an interest rate with a lender, the lender could require the Bank to prepay the outstanding principal amount of the loan.

Capital Expenditure

The following tables set forth, for the periods indicated, certain information related to capital expenditure by category of fixed assets.

	Cost at year-end fiscal 2009	Additions/ transfers	Fiscal 2010		Net assets at year-end fiscal 2010	
			Deletions/ transfers	Depreciation		
(in millions)						
Premises	Rs. 29,563	Rs. 1,369	Rs. (2,251)	Rs. (6,472)	Rs. 22,209	US\$ 436
Other fixed assets (including furniture and fixes)	38,139	2,298	(4,205)	(23,352)	12,880	253
Assets given on lease	17,961	-	(201)	(14,226)	3,534	69
Total	Rs. 85,663	Rs. 3,667	Rs. (6,657)	Rs. (44,050)	Rs. 38,623	US\$ 758

	Cost at year-end fiscal 2010	Additions/ transfers	Fiscal 2011		Net assets at year-end fiscal 2011	
			Deletions/ transfers	Depreciation		
(in millions)						
Premises	Rs. 28,681	Rs. 18,438	Rs. (1,216)	Rs. (8,156)	Rs. 37,747	US\$ 742

Edgar Filing: ICICI BANK LTD - Form 20-F

Other fixed assets (including furniture and fixes)	36,232	6,665	(1,456)	(26,863)	14,578	286
Assets given on lease	17,760	-	(250)	(14,940)	2,570	51
Total	Rs. 82,673	Rs. 25,103	Rs. (2,922)	Rs. (49,959)	Rs. 54,895	US\$ 1,079

167

	Cost at year-end fiscal 2011	Additions/ transfers	Fiscal 2012		Net assets at year-end fiscal 2012	
			Deletions/ transfers	Depreciation (in millions)	Rs.	US\$
Premises	Rs. 45,903	Rs. 1,656	Rs. (592)	Rs. (9,383)	Rs. 37,584	US\$ 739
Other fixed assets (including furniture and fixes)	41,441	4,442	(747)	(30,794)	14,342	282
Assets given on lease	17,510	-	(1)	(15,115)	2,394	47
Total	Rs. 104,854	Rs. 6,098	Rs. (1,340)	Rs. (55,292)	Rs. 54,320	US\$ 1,068

The additions to our premises and other assets were Rs. 6.1 billion in fiscal 2012, compared to Rs. 25.1 billion in fiscal 2011. Our capital expenditure on premises decreased from Rs. 18.4 billion in fiscal 2011 to Rs. 1.7 billion in fiscal 2012. The addition of fixed assets during fiscal 2011 was primarily due to the partial capitalization of ICICI Bank's new building in Hyderabad, the increase in the Bank's branch network and premises and the addition of the Bank of Rajasthan's fixed assets pursuant to amalgamation. Capital expenditure of Rs. 4.4 billion on other fixed assets in fiscal 2012 included Rs. 1.2 billion on software.

Collateral Management

Overview

The Bank defines collateral as the assets or rights provided to the Bank by the borrower or a third party in order to secure a credit facility. The Bank would have the rights of a secured creditor in respect of the assets/contracts offered as security for the obligations of the borrower/obligor. The Bank ensures that the underlying documentation for the collateral provides the Bank with appropriate rights over the collateral or other forms of credit enhancement including the right to liquidate, retain or take legal possession of it in a timely manner in the event of default by the counterparty. The Bank also endeavors to keep the assets provided as security to the Bank under adequate insurance during the tenor of the Bank's exposure. The collateral value is monitored periodically.

Collateral valuation

As stipulated by the Reserve Bank of India guidelines, the Bank uses the comprehensive approach for collateral valuation. Under this approach, the Bank reduces its credit exposure to the counterparty when calculating its capital requirements to the extent that risk mitigation is provided by the eligible collateral as specified in the Basel II guidelines.

The Bank adjusts the value of any collateral received to adjust for possible future fluctuations in the value of the collateral in line with the requirements specified by the Reserve Bank of India guidelines for calculating its capital requirements. These adjustments, also referred to as "haircuts", in order to produce volatility-adjusted amounts for collateral, are reduced from the exposure to compute the capital charge based on the applicable risk weights. We apply these hair cuts in the value of collateral only for capital adequacy computations and not for computing loan loss allowances under either Indian GAAP or U.S. GAAP.

Types of collateral taken by the Bank

In calculating its capital requirements, the Bank determines the appropriate collateral for each facility based on the type of product and risk profile of the counterparty. In the case of commercial loans, mainly consisting of project and

other corporate loans, the collateral is immovable assets, which are typically mortgaged in the Bank's favor, or movable assets, which are typically hypothecated in the Bank's favor. For working capital facilities, the current assets of borrowers are taken as collateral. Additionally, in some cases, we may take further security of a first or second charge on fixed assets, a pledge of financial assets such as marketable securities, or obtain corporate guarantees and personal guarantees wherever appropriate.

Secured consumer loans for the purchase of assets, such as home loans, automobile loans and office premises loans, are secured by the assets being financed (predominantly property and vehicles). The valuation of the properties is carried out by an approved valuation agency at the time the loan is approved.

The Bank also offers products that are primarily based on collateral, such as shares, specified securities, warehoused commodities and gold jewelry. These products are offered in line with the approved product policies which include types of collateral, valuation and margining.

The Bank extends unsecured facilities to clients for certain products such as derivatives, credit cards and personal loans. The limits with respect to unsecured facilities have been approved by our Board of Directors.

The decision on the type and quantum of collateral for each transaction is made by the credit approving authority as per the credit approval authorization approved by the Board of Directors. For facilities provided as per approved product policies (retail products and loan against shares, etc.), collateral is taken in line with the policy.

Significant Changes

Except as otherwise stated in this annual report, we have experienced no significant changes since the date of the fiscal 2012 consolidated financial statements contained in this annual report.

Segment Revenues and Assets

The Reserve Bank of India in its guidelines on “segmental reporting” has stipulated specified business segments and their definitions, for the purposes of public disclosures on business information for banks in India.

The consolidated segmental report for fiscal 2012, based on the segments identified and defined by the Reserve Bank of India, has been presented as follows:

- Retail Banking includes exposures of the Bank, which satisfy the four qualifying criteria of “regulatory retail portfolio” as stipulated by the Reserve Bank of India guidelines on the Basel II framework. These criteria are as follows:
 - (i) Orientation criterion: Exposure to an individual person or persons (not to be restricted to an individual, Hindu Undivided Family, trust, partnership firm, private limited companies, public limited companies, co-operative societies, etc.) or to a small business are classified as retail. A small business is defined as one where the three year average annual turnover is less than Rs. 500 million.
 - (ii) Product criterion: All exposure should take the form of any of the following:
 - revolving credits and lines of credit (including overdrafts);
 - term loans and leases (e.g. installment loans and leases, student and educational loans); and
 - small business facilities and commitments.
 - (iii) Low value of individual exposures: The maximum aggregate retail exposure to one counterparty should not exceed the absolute threshold limit of Rs. 50 million.

(iv) Granularity criterion: The regulatory retail portfolio should be sufficiently diversified to a degree that reduces the risks in the portfolio. The aggregate exposure to one counterparty should not exceed 0.2% of the overall retail portfolio.

- Wholesale Banking includes all advances to trusts, partnership firms, companies and statutory bodies, by the Bank which are not included in the Retail Banking segment, as per the Reserve Bank of India guidelines for the Bank.

- Treasury includes the entire investment portfolio of the Bank, ICICI Eco-net Internet and Technology Fund, ICICI Equity Fund, ICICI Emerging Sectors Fund, ICICI Strategic Investments Fund and ICICI Venture Value Fund.
- Other Banking includes hire purchase and leasing operations and other items not attributable to any particular business segment of the Bank. It also includes the Bank's banking subsidiaries, i.e., ICICI Bank UK PLC, ICICI Bank Canada and ICICI Bank Eurasia Limited Liability Company.
 - Life Insurance represents results of ICICI Prudential Life Insurance Company Limited.
 - General Insurance represents results of ICICI Lombard General Insurance Company Limited.
 - Venture fund management represents results of ICICI Venture Funds Management Company Limited.
- Others include ICICI Home Finance Company Limited, ICICI International Limited, ICICI Securities Primary Dealership Limited, ICICI Securities Limited, ICICI Securities Holdings Inc., ICICI Securities Inc., ICICI Prudential Asset Management Company Limited, ICICI Prudential Trust Limited, ICICI Investment Management Company Limited, ICICI Trusteeship Services Limited, TCW/ICICI Investment Partners Limited, ICICI Kinfra Limited, I-Ven Biotech Limited and ICICI Prudential Pension Funds Management Company Limited.

Framework for transfer pricing

Liabilities of retail banking and wholesale banking segments are transfer priced to a central treasury unit, which pools all funds and lends to the business units at appropriate rates based on the relevant maturity of assets being funded after adjusting for regulatory reserve requirements and specific charge on account of directed lending to certain sectors categorized as priority sector. Current and savings account deposits are transfer priced at a fixed rate. For term deposits and borrowings the transfer pricing is primarily based on the categories specified in the Transfer Pricing Policy. Transfer pricing to our asset creation units is based on the incremental cost of deposits (blended for current and savings account deposits) and borrowings adjusted for the maturity of the asset (term premium) and regulatory reserve requirements. The allocated capital is also considered as a source of funding for this purpose.

Fiscal 2012 Compared with Fiscal 2011

The following table sets forth, for the periods indicated, profit before tax of various segments.

	Year ended March 31,			2012/2011	
	2011	2012	2012	% change	
	(in millions, except percentages)				
Retail Banking	Rs. (5,142)	Rs. 5,500	US\$ 108	–	%
Wholesale Banking	48,997	62,077	1,220	26.7	
Treasury	22,010	22,441	441	2.0	
Other Banking	5,891	3,928	77	(33.3)	
Life Insurance	9,247	14,137	278	52.9	
General Insurance	(823)	(3,952)	(77)	–	
Venture fund management	937	916	18	(2.2)	
Others	6,796	7,193	141	5.8	
Profit before tax	Rs. 87,913	Rs. 112,240	US\$ 2,206	27.7	%

Retail Banking

The following table sets forth, for the periods indicated, the principal components of profit before tax.

170

	Year ended March 31,			2012/2011	
	2011	2012	2012	% change	
	(in millions, except percentages)				
Net interest income	Rs. 33,197	Rs. 38,147	US\$ 750	14.9	%
Non-interest income	21,161	25,757	506	21.7	
Total income	54,358	63,904	1,256	17.6	
Non-interest expenses	45,694	56,520	1,111	23.7	
Profit before provisions	8,664	7,384	145	(14.8))
Provisions	13,806	1,884	37	(86.4))
Loss before tax	Rs. (5,142)	Rs. 5,500	US\$ 108	-	

The following table sets forth, for the periods indicated, the outstanding balances of key assets and liabilities.

	Outstanding balance at March 31,			2012/2011	
	2011	2012	2012	% change	
	(in millions, except percentages)				
Advances	Rs. 599,623	Rs. 620,630	US\$ 12,196	3.5	%
Deposits	1,482,780	1,711,353	33,628	15.4	

Loans in the retail banking segment increased by 3.5% from Rs. 599.6 billion at year-end fiscal 2011 to Rs. 620.6 billion at year-end fiscal 2012. The challenges of the rising interest rate environment limited the growth of the retail banking segment loan portfolio. The retail banking segment maintained its focus on strengthening its deposit franchise, reflecting the increase in retail deposit base. Despite continued tightness in liquidity, high interest rates and de-regulation of savings deposit rates, the savings account deposits of the segment increased by 13.8% from Rs. 667.8 billion at year-end fiscal 2011 to Rs. 759.9 billion at year-end fiscal 2012. Retail current account deposits increased by 8.3% from Rs. 152.7 billion at year-end fiscal 2011 to Rs. 165.3 billion at year-end fiscal 2012.

The profit before tax of the retail banking segment was Rs. 5.5 billion in fiscal 2012, compared to a loss of Rs. 5.1 billion in fiscal 2011, primarily due to a decline in provisions for loan losses in the unsecured loan portfolio, an increase in net interest income and non-interest income. This was offset, in part, by an increase in non-interest expense.

Net interest income increased by 14.9% from Rs. 33.2 billion in fiscal 2011 to Rs. 38.1 billion in fiscal 2012, primarily due to an increase in average current account and savings account deposits, offset, in part, by the increased cost of savings account deposits effective May 3, 2011.

Non-interest income increased by 21.7% from Rs. 21.2 billion in fiscal 2011 to Rs. 25.8 billion in fiscal 2012, primarily due to the higher level of foreign exchange and third party referral fees and fees from the credit card portfolio. The foreign exchange fees increased primarily on account of opportunities coming from volatile markets and a weakening rupee, leading to increased retail inward remittance flow.

Non-interest expenses increased by 23.7% from Rs. 45.7 billion in fiscal 2011 to Rs. 56.5 billion in fiscal 2012, primarily due to an increase in employee expenses, the expansion of the branch network and the impact of Bank of Rajasthan's expenses for a full period as against a partial period in fiscal 2011.

Provisions decreased by 86.4% from Rs. 13.8 billion in fiscal 2011 to Rs. 1.9 billion in fiscal 2012, primarily due to a decline in provisions for loan losses in the unsecured retail portfolio. The credit losses in the retail asset portfolio

continued to decline on account of a sharp reduction in the accretion of retail non-performing loans since fiscal 2011.

Wholesale Banking

The following table sets forth, for the periods indicated, the principal components of profit before tax.

171

	Year ended March 31,			2012/2011	
	2011	2012	2012	% change	
	(in millions, except percentages)				
Net interest income	Rs. 33,715	Rs. 49,367	US\$ 970	46.4	%
Non-interest income	39,853	41,014	806	2.9	
Total income	73,568	90,381	1,776	22.9	
Non-interest expenses	18,231	19,965	392	9.5	
Profit before provisions	55,337	70,416	1,384	27.2	
Provisions	6,340	8,339	164	31.5	
Profit before tax	Rs. 48,997	Rs. 62,077	US\$ 1,220	26.7	%

The following table sets forth, for the periods indicated, the outstanding balances of key assets and liabilities.

	Outstanding balance at March 31,			2012/2011	
	2011	2012	2012	% change	
	(in millions, except percentages)				
Advances	Rs. 1,555,794	Rs. 1,899,350	US\$ 37,323	22.1	%
Deposits	764,356	838,726	16,481	9.7	%

The wholesale banking loan book increased by 22.1% from Rs. 1,555.8 billion at year-end fiscal 2011 to Rs. 1,899.4 billion at year-end fiscal 2012. The increase was driven by the continued focus on growing our domestic corporate loan book and by opportunities for lending through our overseas branches. The domestic term deposits in the segment increased by 14.3% from Rs. 532.4 billion at year-end fiscal 2011 to Rs. 608.3 billion at year-end fiscal 2012. Wholesale current account deposits decreased by 7.5% from Rs. 181.0 billion at year-end fiscal 2011 to Rs. 167.5 billion at year-end fiscal 2012.

Profit before tax of the wholesale banking segment increased from Rs. 49.0 billion in fiscal 2011 to Rs. 62.1 billion in fiscal 2012, primarily due to an increase in net interest income and fee income offset, in part, by an increase in provisions.

Net interest income increased by 46.4% from Rs. 33.7 billion in fiscal 2011 to Rs. 49.4 billion in fiscal 2012, primarily due to higher net interest income on assets.

Non-interest income increased by 2.9% from Rs. 39.9 billion in fiscal 2011 to Rs. 41.0 billion in fiscal 2012. Fee income increased primarily due to the continued traction in granular fee income streams like foreign exchange and transaction banking related fees from corporate clients, offset, in part, by moderation in loan processing fees.

Non-interest expenses increased by 9.5% from Rs. 18.2 billion in fiscal 2011 to Rs. 20.0 billion in fiscal 2012, primarily due to an increase in employee expenses and the impact of the Bank of Rajasthan's expenses for a full period as against a partial period in fiscal 2011.

Provisions increased from Rs. 6.3 billion in fiscal 2011 to Rs. 8.3 billion in fiscal 2012 primarily due to the provisions made on loans restructured during the year and an increase in provisioning requirements by the Reserve Bank of India on non-performing assets.

Treasury

The following table sets forth, for the periods indicated, the principal components of profit before tax.

	Year ended March 31,			2012/2011 % change
	2011	2012	2012	
	(in millions, except percentages)			
Net interest income	Rs. 21,521	Rs. 18,833	US\$ 370	(12.5)%
Non-interest income	4,862	8,145	160	67.5
Total income	26,383	26,978	530	2.3
Non-interest expenses	1,544	1,690	33	9.5
Profit before provisions	24,839	25,288	497	1.8
Provisions	2,829	2,847	56	0.6
Profit before tax	Rs. 22,010	Rs. 22,441	US\$ 441	2.0 %

The following table sets forth, for the periods indicated, the closing balances of key assets and liabilities.

	Closing balance at March 31,			2012/2011 % change
	2011	2012	2012	
	(in millions, except percentages)			
Investments	Rs. 1,344,612	Rs. 1,595,230	US\$ 31,347	18.6 %
Borrowings	1,095,543	1,401,649	27,543	27.9 %

Our treasury operations include the maintenance and management of regulatory reserves, proprietary trading in equity and fixed income and a range of foreign exchange and derivatives products and services, such as forward contracts, swaps and options. It also includes investments made by ICICI Eco-net Internet and Technology Fund, ICICI Equity Fund, ICICI Emerging Sectors Fund, ICICI Strategic Investments Fund and ICICI Venture Value Fund.

Profit before tax of the treasury segment marginally increased from Rs. 22.0 billion in fiscal 2011 to Rs. 22.4 billion in fiscal 2012, primarily due to an increase in non-interest income offset, in part, by a decrease in net interest income.

Net interest income decreased by Rs. 2.7 billion from Rs. 21.5 billion in fiscal 2011 to Rs. 18.8 billion in fiscal 2012, primarily due to the impact of the repricing of funding swaps at higher rates during the first half of fiscal 2012, offset, in part, by benefits due to the re-pricing of government securities at higher levels in line with higher systemic rates.

Non-interest income increased from Rs. 4.9 billion in fiscal 2011 to Rs. 8.1 billion in fiscal 2012, primarily due to increased dividend income from subsidiaries and the reversal of mark-to-market loss/realized gain on the Treasury segment's government securities portfolio and other fixed income positions, offset, in part, by the higher level of losses on security receipts and the mark-to-market/realized loss on the equity portfolio as equity markets remained volatile in fiscal 2012.

Other Banking

The following table sets forth, for the periods indicated, the principal components of profit before tax.

	Year ended March 31,			2012/2011 % change
	2011	2012	2012	
	(in millions, except percentages)			
Net interest income	Rs. 7,903	Rs. 7,430	US\$ 146	(6.0)%
Non-interest income	4,741	2,989	59	(37.0)
Total income	12,644	10,419	205	(17.6)
Non-interest expenses	4,640	4,110	81	(11.4)
Profit before provisions	8,004	6,309	124	(21.2)
Provisions	2,113	2,381	47	12.7
Profit before tax	Rs. 5,891	Rs. 3,928	US\$ 77	(33.3)%

The following table sets forth, for the periods indicated, the outstanding balances of the key assets and liabilities.

	Outstanding balance on March 31,			2012/2011	
	2011	2012	2012	% change	
	(in millions, except percentages)				
Advances	Rs. 344,349	Rs. 354,985	US\$6,976	3.1	%
Investments	118,093	114,136	2,243	(3.4))
Deposits	343,979	272,705	5,359	(20.7))
Borrowings	69,923	114,736	2,255	64.1	%

Other banking business includes our hire purchase and leasing operations, our overseas banking subsidiaries, ICICI Bank UK, ICICI Bank Canada and ICICI Bank Eurasia Limited Liability Company, and other items not attributable to any particular business segment of the Bank.

Profit before tax of our other banking segment decreased from Rs. 5.9 billion in fiscal 2011 to Rs. 3.9 billion in fiscal 2012, primarily due to a decline in non-interest income and net interest income. These negative impacts were offset, in part, by a decrease in non-interest expenses.

Net interest income decreased by 6.0% from Rs. 7.9 billion in fiscal 2011 to Rs. 7.4 billion in fiscal 2012, primarily due to a decrease in net interest income of ICICI Bank UK and due to the lower interest received on income tax refunds due upon the completion of pending income tax assessments of Rs. 0.8 billion in fiscal 2012 compared to Rs. 1.7 billion in fiscal 2011. This decrease was offset, in part, by an increase in net interest income of ICICI Bank Canada. The net interest income of ICICI Bank UK decreased on account of a decline in average interest earning assets. Average interest earning assets declined primarily due to a decrease in loans and advances and investments in accordance with the strategy of consolidating the corporate loan book and investments. The net interest income of ICICI Bank Canada increased primarily due to an increase in average interest-earning assets and net interest margin in fiscal 2012 as compared to fiscal 2011.

Non-interest income decreased by 37.0% from Rs. 4.7 billion in fiscal 2011 to Rs. 3.0 billion in fiscal 2012, primarily due to ICICI Bank UK's lower fee income, mark-to-market losses on the derivatives portfolio in fiscal 2012 as compared to mark-to-market gains in fiscal 2011, and realized loss on investments in fiscal 2012 as compared to gains in fiscal 2011.

Non-interest expenses decreased by 11.4% from Rs. 4.6 billion in fiscal 2011 to Rs. 4.1 billion in fiscal 2012, primarily due to a decrease in depreciation expenses on leased assets.

Loans increased by 3.1% from Rs. 344.3 billion at year-end fiscal 2011 to Rs. 355.0 billion at year-end fiscal 2012 primarily due to an increase in loans and advances of ICICI Bank Canada offset, in part, by a decrease in loans and advances of ICICI Bank UK. Loans of ICICI Bank Canada increased due to the recognition of securitized insured mortgage portfolio of earlier years in loans on account of adoption of International Financial Reporting Standards effective April 2011. Loans of ICICI Bank UK decreased in accordance with the strategy of reducing and rebalancing its loan portfolio.

Investments decreased by 3.4% from Rs. 118.1 billion at year-end fiscal 2011 to Rs. 114.1 billion at year-end fiscal 2012, primarily due to a decline in ICICI Bank UK's investment book that was offset, in part, by an increase in ICICI Bank Canada's investment book.

ICICI Bank UK's net advances decreased in line with its strategy of consolidation of its corporate loan book. ICICI Bank UK has in the past focused primarily on extending financing to Indian companies for their operations in India and globally (including the financing of overseas acquisitions by Indian companies). In view of the evolving economic and regulatory environment globally and in the UK, and regulatory limitations on cross-border financing of the nature undertaken by our international banking subsidiaries in earlier years, ICICI Bank UK had adopted a strategy of reducing and rebalancing its loan portfolio.

ICICI Bank Canada's investment portfolio increased by 12.6% from Rs. 47.6 billion at year-end fiscal 2011 to Rs. 53.6 billion at year-end fiscal 2012 primarily due to increase in investments in corporate bonds.

Deposits decreased by 20.7% from Rs. 344.0 billion at year-end fiscal 2011 to Rs. 272.7 billion at year-end fiscal 2012 due to a decline in term deposits of ICICI Bank UK and ICICI Bank Canada.

Borrowings increased by 64.1% from Rs. 69.9 billion at year-end fiscal 2011 to Rs. 114.7 billion at year-end fiscal 2012 primarily due to an increase in the borrowings of ICICI Bank Canada on account of the recognition of a corresponding borrowing liability for securitized insured mortgages on adoption of International Financial Reporting Standards effective April 2011. The above increase was offset, in part, by a decrease in the borrowings of ICICI Bank UK due to the redemption of Tier II bonds and the maturity of other long term borrowings during fiscal 2012.

Life Insurance

The following table sets forth, for the periods indicated, the principal components of profit before tax.

	Year ended March 31,			2012/2011 % change
	2011	2012	2012	
	(in millions, except percentages)			
Premium earned	Rs. 178,806	Rs. 140,216	US\$ 2,755	(21.6)%
Premium on reinsurance ceded	(636)	(937)	(18)	47.3
Net premium earned	178,170	139,279	2,737	(21.8)
Other income	28,347	28,541	561	0.7
Investment income	5,536	8,383	164	51.4
Total income	212,053	176,203	3,462	(16.9)
Commission paid	5,607	6,069	119	8.2
Claims/benefits paid	2,806	5,419	106	93.1
Operating expenses	20,185	18,951	372	(6.1)

Transfer to linked funds	148,832	106,639	2,095	(28.3)
Provisions for policy holder liabilities (non-linked)	25,376	24,988	492	(1.5)
Profit/(loss) before tax	Rs. 9,247	Rs. 14,137	US\$ 278	52.9 %

The following table sets forth, for the periods indicated, the outstanding balance of key assets and liabilities.

	Outstanding balance at March 31,			2012/2011 % change
	2011	2012	2012	
	(in millions, except percentages)			
Investments	Rs. 81,947	Rs. 107,703	US\$ 2,116	31.4 %
Assets held to cover linked liabilities	588,265	578,174	11,361	(1.7)
Liabilities on life policies in force	644,821	662,295	13,014	2.7 %

ICICI Prudential Life Insurance Company maintained its market leadership in the private sector with an overall market share of 5.9% in fiscal 2012 based on the retail weighted received premium basis. Retail weighted received premium represents 100% of first year premium plus 10% of single premium (excluding group). Assets under management increased by 3.8% from Rs. 681.5 billion at fiscal 2011 to Rs. 707.7 billion at fiscal 2012.

The Insurance Regulatory and Development Authority issued various regulations regarding unit-linked products, effective from September 1, 2010, which require insurers to maintain an interim reduction in yield and a cap on charges and to make structural changes to pension products.

Almost all the unit-linked products operational in the market were withdrawn on August 31, 2010 as per the revised unit-linked products guidelines effective from September 1, 2010. The scarcity value created for these products before withdrawal resulted in a high growth during July and August 2010 with the industry registering a year-on-year growth of 32.0% from April to August 2010 on retail weighted received premium. After September

2010, insurers experienced a slowdown in new business primarily due to the non-availability of the desired product suite and lead time for distributors to get used to new products. The limited availability of regular premium unit-linked products in the second half of fiscal 2011 resulted in the decline in premiums from regular premium unit-linked policies and an increase in premiums from single premium policies and non-linked conventional products. As a result of this change, while the retail received premium (i.e., excluding group premium) earned by ICICI Prudential Life Insurance Company grew by 4.0% in fiscal 2011, the retail weighted received premium declined by 27.8% compared to fiscal 2010. Retail received premium represents 100% of first year premium plus 10% of single premium (excluding group).

In continuation of the trend from fiscal 2011, the industry retail weighted received premium decreased by 28.0% year-on-year for first half of fiscal 2012 and ICICI Prudential Life Insurance Company's retail weighted received premium decreased by 57.0% for the same period. The relatively higher decline for ICICI Prudential Life Insurance Company was primarily due to the higher base for April to August 2010 when ICICI Prudential Life Insurance Company grew by 54.0% against the industry growth of 32.0% for the same period. However, after September 2011, ICICI Prudential Life Insurance Company's retail weighted received premium grew 36.0% year-on-year in the second half of fiscal 2012 against the industry growth of 16.0% for the same period. For fiscal 2012, the retail weighted received premium decline for the industry was 5.0% and for ICICI Prudential Life Insurance Company was 24.0%.

The changes in the regulations have also resulted in a change of the new business mix for ICICI Prudential Life Insurance Company, and the proportion of non-linked conventional products increased from 26.6% at year-end fiscal 2011 to 41.1% at year-end fiscal 2012.

Profit before tax of ICICI Prudential Life Insurance Company increased from Rs. 9.2 billion in fiscal 2011 to Rs. 14.1 billion in fiscal 2012. This is primarily on account of lower upfront expenses associated with lower new business as well as the continued income stream from business sold in prior years.

The total premium income of ICICI Prudential Life Insurance Company decreased by 21.6% from Rs. 178.8 billion in fiscal 2011 to Rs. 140.2 billion in fiscal 2012. Single premium decreased from Rs. 21.7 billion in fiscal 2011 to Rs. 8.0 billion in fiscal 2012. The new business premium (regular premium business) decreased by 30.9% from Rs. 52.7 billion in fiscal 2011 to Rs. 36.4 billion in fiscal 2012, and renewal premium decreased by 8.2% from Rs. 104.4 billion in fiscal 2011 to Rs. 95.8 billion in fiscal 2012.

Other income of ICICI Prudential Life Insurance Company increased marginally from Rs. 28.3 billion in fiscal 2011 to Rs. 28.5 billion in fiscal 2012. There was an increase in policy fees, offset, in part, by a decrease in fund management fees and surrender charges and the lower release of certain actuarial reserves on lapsed policies created in earlier years.

Investment income of ICICI Prudential Life Insurance Company increased by 51.4% from Rs. 5.5 billion in fiscal 2011 to Rs. 8.4 billion in fiscal 2012 primarily due to an increase in average non-linked assets under management and higher yields on the debt portfolio.

Commission expenses of ICICI Prudential Life Insurance Company increased by 8.2% from Rs. 5.6 billion in fiscal 2011 to Rs. 6.1 billion in fiscal 2012 primarily due to an increase in the proportion of conventional products, as the commission rates on conventional products are higher than on unit-linked products.

Claims and benefit payouts of ICICI Prudential Life Insurance Company increased from Rs. 2.8 billion in fiscal 2011 to Rs. 5.4 billion in fiscal 2012 due to higher maturities and annuity payouts.

The operating expenses of ICICI Prudential Life Insurance Company decreased by 6.1% from Rs. 20.2 billion in fiscal 2011 to Rs. 19.0 billion in fiscal 2012, mainly due to a decrease in branch-related expenses in fiscal 2012 as compared to fiscal 2011. The number of branches decreased from 1,404 at year-end fiscal 2011 to 992 at year-end fiscal 2012.

Transfer to linked funds represents the transfer of premium received, including the renewal premium on linked policies of ICICI Prudential Life Insurance Company to investments, which has decreased by 28.3% from Rs. 148.8 billion in fiscal 2011 to Rs. 106.6 billion in fiscal 2012 due to a decrease in the volume of our unit-linked insurance business (including renewal) during fiscal 2012. In the linked business, the premium amount paid by the policy holder after the deduction of charges and the premium for risk cover is invested in the underlying asset or index as chosen by the policy holder.

Assets held to cover the linked liabilities of ICICI Prudential Life Insurance Company decreased by 1.7% from Rs. 588.3 billion at year-end fiscal 2011 to Rs. 578.2 billion at year-end fiscal 2012. The decrease in linked assets under management is primarily attributable to mark-to-market losses on investments held for unit-linked business. In the linked business, the premium amount paid by the policy holder, after the deduction of charges and the premium for risk cover, is invested in the underlying asset or index as chosen by the policy holder. The risks and rewards on the investments of linked policies therefore lie to a large extent with the policy holders.

Liability under existing life insurance policies to be paid by ICICI Prudential Life Insurance Company increased by 2.7% from Rs. 644.8 billion at year-end fiscal 2011 to Rs. 662.3 billion at year-end fiscal 2012, in line with the increase in non-linked assets during fiscal 2012.

General Insurance

The following table sets forth, for the periods indicated, the principal components of profit before tax.

	Year ended March 31,			2012/2011 % change
	2011	2012	2012	
	(in millions, except percentages)			
Gross written premium (including premium on reinsurance accepted)	Rs. 47,349	Rs. 60,144	US\$ 1,182	27.0 %

(1) Investment income from pool represents our share of income from the terrorism pool and the Indian Motor Third Party Insurance Pool for Commercial Vehicles. The pools represent a multilateral reinsurance arrangement entered into by ICICI Lombard General Insurance Company together with other Indian insurance companies and the General Insurance Corporation. The funds belonging to the terrorism pool are administered by the General Insurance Corporation, and funds belonging to Indian Motor Third Party Insurance Pool are administered by the individual member companies.

The following table sets forth, for the periods indicated, the outstanding balances of key assets and liabilities.

	Outstanding balance at March 31,			2012/2011	
	2011	2012	2012	% change	
	(in millions, except percentages)				
Investments	Rs. 46,653	Rs. 60,336	US\$ 1,186	29.3	%
Current liabilities including claims outstanding	48,416	70,130	1,378	44.8	
Provisions	Rs. 14,431	Rs. 20,044	US\$ 394	38.9	%

In accordance with the Insurance Regulatory and Development Authority guidelines, from April 1, 2007 to March 31, 2012, ICICI Lombard General Insurance Company, together with all other general insurance companies participated in the Indian Motor Third Party Insurance Pool (the "Pool"), administered by the General Insurance Corporation of India. The Pool is a multilateral arrangement for insurance with respect to third party claims against commercial vehicles, the costs of which are shared by all general insurance companies in proportion to their overall market share. Based on an analysis of Pool performance, the Insurance Regulatory and Development Authority instructed all general insurance companies to provide for losses on the Pool at a provisional loss ratio of 153.0% from fiscal 2008 through fiscal 2011 in the financial results for fiscal 2011 compared to the earlier loss ratio of 122.0-127.0%. Accordingly, ICICI Lombard General Insurance Company made an additional provision of Rs. 2.7 billion during fiscal 2011. Further, in fiscal 2011, the Insurance Regulatory and Development Authority increased in the rates of premium applicable to the motor third party insurance business by 68.5% effective from April 25, 2011.

In fiscal 2012, the Insurance Regulatory and Development Authority directed the dismantling of the Pool and advised the general insurance companies to recognize the Pool liabilities using the loss ratios estimated by the General Actuaries Department of the United Kingdom; i.e., 159.0%, 188.0%, 200.0%, 213.0% and 145.0% respectively for underwriting years from fiscal 2008 to fiscal 2012. Further, the Insurance Regulatory and Development Authority directed all insurers that liability related to the Pool for fiscal 2008 and fiscal 2009 be accounted for and recognized in full in fiscal 2012. With respect to liabilities pertaining to fiscal 2010 to fiscal 2012, the liabilities could be recognized in fiscal 2012, although general insurance companies were also provided with the option to recognize the liability over a three year period. ICICI Lombard General Insurance Company recognized the additional liabilities of the Pool from fiscal 2008 to fiscal 2012 in fiscal 2012, and therefore, the loss after tax of ICICI Lombard General Insurance Company for fiscal 2012 includes the impact of additional Pool losses of Rs. 6.9 billion.

The Insurance Regulatory and Development Authority ordered the dismantling of the Pool with effect from March 31, 2012 and set up a framework for the Indian Motor Third Party Declined Risk Insurance Pool (the "Declined Risk Pool") for commercial vehicles. The Declined Risk Pool is effective from April 1, 2012. Under Declined Risk Pool approach, insurers will cede to the Declined Risk Pool only the policies that they would not consider underwriting themselves. Insurers have been instructed to underwrite motor pool policies to the extent of the sum of 50% of their share in total gross premium and 50% share in total motor premium. Any shortfall against this requirement will be allocated to the insurers from the Declined Risk Pool. Additionally, as compared to the earlier Pool approach of ceding all third party premiums (including those related to comprehensive policies), under the Declined Risk Pool framework, only specific third party insurance premiums will be pooled. Accordingly, under this approach, the size of the Pool is expected to decline substantially and the allocation of losses to individual insurers will be based on their ability to meet the mandated targets. The Insurance Regulatory and Development Authority increased the premium of motor third party liability coverage paid by customers effective April 1, 2012 in order to give effect to the higher loss ratios.

ICICI Lombard General Insurance Company's loss before tax increased from Rs. 0.8 billion in fiscal 2011 to Rs. 4.0 billion in fiscal 2012 primarily due to an increase in the negative impact of the Pool from Rs. 3.0 billion in fiscal 2011 to Rs. 7.1 billion in fiscal 2012, as a result of additional provisions of Rs. 6.9 billion in fiscal 2012 as compared to Rs. 2.7 billion in fiscal 2011 made as per the Insurance Regulatory and Development Authority's order.

The gross written premium (including its share of the motor third party insurance pool) increased by 27.0% from Rs. 47.3 billion in fiscal 2011 to Rs. 60.1 billion in fiscal 2012 primarily due to the growth in motor insurance business and health insurance business. Premium on motor insurance business also increased due to increase in the rates of premium applicable to the motor third party liability insurance business by 68.5% from April 25, 2011. Net commission income increased by 13.0% from Rs. 0.5 billion in fiscal 2011 to Rs. 0.6 billion in fiscal 2012 primarily due to an increase in overall business volumes. Operating expenses increased from Rs. 6.8 billion in fiscal 2011 to Rs. 8.7 billion in fiscal 2012, primarily due to higher business support expenses on account of an increase in business. Claims/benefits paid increased by 31.8% from Rs. 27.3 billion in fiscal 2011 to Rs. 36.0 billion in fiscal 2012,

primarily due to an increase in the impact of the Pool on account of additional provisions made as per the

178

Insurance Regulatory and Development Authority order and due to an increase in claims/benefits paid in line with the increase in business.

Investments increased by 29.3% from Rs. 46.7 billion at year-end fiscal 2011 to Rs. 60.3 billion at year-end fiscal 2012 primarily due to net inflow from business in investments and the re-investment of income from investments in fiscal 2012. Current liabilities, including claims outstanding, increased by 44.8% from Rs. 48.4 billion at year-end fiscal 2011 to Rs. 70.1 billion at year-end fiscal 2012, primarily due to an increase in third party motor claims liability.

Venture fund management

The following table sets forth, for the periods indicated, the principal components of profit before tax.

	Year ended March 31,			2012/2011 % change
	2011	2012	2012	
	(in millions, except percentages)			
Net interest income	Rs.(33)	Rs.(41)	US\$(1)	24.2 %
Non-interest income	1,916	1,984	39	3.5
Total income	1,883	1,943	38	3.2
Non-interest expenses	946	1,027	20	8.6
Profit before provisions	937	916	18	(2.2)
Provisions	-	-	-	-
Profit before tax	Rs.937	Rs.916	US\$18	(2.2)%

Profit before tax of our venture fund management segment remained at the same level of Rs. 0.9 billion in fiscal 2011 and fiscal 2012. Management fees decreased from Rs. 1.3 billion in fiscal 2011 to Rs. 1.2 billion in fiscal 2012 primarily due to the termination of certain funds and the reduction in outstanding capital of certain funds on account of distribution of capital to investors. This decrease was offset, in part, by an increase in carry income from Rs. 0.5 billion in fiscal 2011 to Rs. 0.6 billion in fiscal 2012.

Others

The “others” segment mainly includes ICICI Prudential Asset Management Company Limited, ICICI Securities Limited, ICICI Securities Primary Dealership Limited and ICICI Home Finance Company Limited.

ICICI Prudential Asset Management Company Limited manages the investment schemes of ICICI Prudential Mutual Fund, which was among the top three mutual funds in India in terms of average funds under management in March 2012, with a market share of 10.3%. The average assets under management for ICICI Prudential Mutual Fund increased from Rs. 728.3 billion in fiscal 2011 to Rs. 733.6 billion in fiscal 2012, primarily on account of an increase in average assets under management of Fixed Maturity Plan products in fiscal 2012.

ICICI Securities Limited and ICICI Securities Primary Dealership Limited are engaged in equity underwriting and brokerage and primary dealership in government securities respectively. ICICI Securities Limited owns icicidirect.com, a leading online brokerage platform.

Profit before tax of the “others” segment increased from Rs. 6.8 billion in fiscal 2011 to Rs. 7.2 billion in fiscal 2012 mainly due to an increase in profit before tax of ICICI Home Finance Company Limited, ICICI Securities Primary Dealership Limited and ICICI Prudential Asset Management Company Limited offset, in part, by a decline in profit of ICICI Securities Limited.

The following table sets forth, for the periods indicated, the principal components of profit before tax.

179

	Year ended March 31,			2012/2011 % change
	2011	2012	2012	
	(in millions, except percentages)			
Net interest income	Rs. 4,397	Rs. 4,409	US\$ 87	0.3 %
Non-interest income	12,195	12,770	251	4.7
Total income	16,592	17,179	338	3.5
Non-interest expenses	9,556	9,653	190	1.0
Operating profit before provisions and tax	7,036	7,526	148	7.0
Provisions	240	333	7	38.8
Profit before tax	Rs. 6,796	Rs. 7,193	US\$ 141	5.8 %

Net interest income remained at the same level of Rs. 4.4 billion in fiscal 2011 and fiscal 2012.

Non-interest income increased by 4.7%, from Rs. 12.2 billion in fiscal 2011 to Rs. 12.8 billion in fiscal 2012, primarily due to an increase in trading gains.

Non-interest expenses increased marginally by 1.0%, from Rs. 9.6 billion in fiscal 2011 to Rs. 9.7 billion in fiscal 2012.

ICICI Prudential Asset Management Company made a profit before tax of Rs. 1.3 billion in fiscal 2012 compared to Rs. 1.0 billion in fiscal 2011, primarily due to a decrease in operating and administrative expenses.

ICICI Securities Limited made a profit before tax of Rs. 1.2 billion in fiscal 2012 compared to Rs. 1.7 billion in fiscal 2011 due to a decrease in brokerage income and an increase in staff cost and other administrative expenses, offset, in part, by an increase in investment banking and distribution revenue. Brokerage income of ICICI Securities Limited decreased by 14.3% from Rs. 5.2 billion in fiscal 2011 to Rs. 4.5 billion in fiscal 2012 on account of lower business volume.

ICICI Securities Primary Dealership made a profit before tax of Rs. 1.3 billion in fiscal 2012 compared to Rs. 0.8 billion in fiscal 2011, primarily due to an increase in trading gains, offset, in part, by a decrease in net interest income on account of higher funding costs. ICICI Securities Primary Dealership capitalized on market opportunities during the year and made trading gains of Rs. 1.4 billion in fiscal 2012 compared to trading gains of Rs. 0.4 billion during fiscal 2011.

ICICI Home Finance Company Limited made a profit before tax of Rs. 3.5 billion in fiscal 2012 compared to Rs. 3.3 billion in fiscal 2011 primarily due to an increase in net interest income, offset, in part, by an increase in provisions. Net interest income increased primarily due to an increase in net interest margin on account of an increase in interest rates on loans and advances by 125 basis points during fiscal 2012. Provisions on loans and advances increased in fiscal 2012 primarily due to higher provisions on standard and sub-standard loans due to a change in regulatory guidelines requiring higher provisions.

Fiscal 2011 Compared with Fiscal 2010

The following table sets forth, for the periods indicated, profit before tax of various segments.

	Year ended March 31,			2011/2010 % change
	2010	2011	2011

180

Retail Banking

The following table sets forth, for the periods indicated, the principal components of profit before tax.

	Year ended March 31,			2011/2010 % change
	2010	2011	2011	
	(in millions, except percentages)			
Net interest income	Rs. 37,594	Rs. 33,197	US\$ 652	(11.7)%
Non-interest income	26,192	21,161	416	(19.2)
Total income	63,786	54,358	1,068	(14.8)
Non-interest expenses	43,565	45,694	898	4.9
Profit before provisions	20,221	8,664	170	(57.2)
Provisions	33,556	13,806	271	(58.9)
Loss before tax	Rs. (13,335)	Rs. (5,142)	US\$ (101)	(61.4)%

The following table sets forth, for the periods indicated, the outstanding balances of key assets and liabilities.

	Outstanding balance at March 31,			2011/2010 % change
	2010	2011	2011	
	(in millions, except percentages)			
Advances	Rs. 665,364	Rs. 599,623	US\$ 11,783	(9.9)%
Deposits	1,129,894	1,482,780	29,137	31.2

Loans in the retail banking segment declined by 9.9% from Rs. 665.4 billion at year-end fiscal 2010 to Rs. 599.6 billion at year-end fiscal 2011, primarily due to higher repayments and prepayments in the portfolio relative to new loan disbursements until December 31, 2010. During the last quarter of fiscal 2011, as a result of an increase in the retail disbursements and a reduction in the level of prepayments, the retail asset portfolio grew marginally over the December 31, 2010 level. The retail banking segment maintained its focus on strengthening its deposit franchise, reflecting the increase in retail deposit base. Retail savings deposits increased by 25.8% from Rs. 530.8 billion at year-end fiscal 2010 to Rs. 667.8 billion at year-end fiscal 2011. Retail current account deposits increased by 21.4% from Rs. 125.8 billion at year-end fiscal 2010 to Rs. 152.7 billion at year-end fiscal 2011.

The loss before tax in the retail banking segment decreased from Rs. 13.3 billion in fiscal 2010 to Rs. 5.1 billion in fiscal 2011, primarily due to a decline in provisions for loan losses in the unsecured portfolio, partly offset by a decline in net interest income and fee income.

Net interest income decreased by 11.7% from Rs. 37.6 billion in fiscal 2010 to Rs. 33.2 billion in fiscal 2011, primarily due to reductions in the retail loan portfolio and the impact of the increased cost of savings account deposits in fiscal 2011. Effective April 1, 2010, the Reserve Bank of India changed the methodology of computing the interest payable and banks were required to pay interest on the daily average balance maintained in a savings deposit account. The change in methodology resulted in an increase in cost of savings account deposits for banks.

Non-interest income decreased by 19.2% from Rs. 26.2 billion in fiscal 2010 to Rs. 21.2 billion in fiscal 2011, primarily due to a reduction in credit card related fees due to the Bank's conscious strategy of reducing the credit card portfolio. Following the reduction in our credit card portfolio, specifically in products such as equated monthly installments/personal loan on credit cards and the lower issuance of new credit cards, fees related to credit card business declined in fiscal 2011 compared to fiscal 2010. The fees from the distribution of third-party products in

fiscal 2011 were impacted by regulatory changes in the life insurance sector which led to a decline in market volumes, changes in product mix and lower distributor payouts. Further, during fiscal 2010 the Bank sold its

merchant acquiring operations through a transfer of assets, primarily comprising fixed assets, receivables and payables, and the assumption of liabilities to ICICI Merchant Services resulting in a profit of Rs. 2.0 billion to the Bank's Retail Banking segment.

Non-interest expenses increased by 4.9% from Rs. 43.6 billion in fiscal 2010 to Rs. 45.7 billion in fiscal 2011 primarily due to a higher provision for performance bonuses and an increase in the cost base on account of the amalgamation of the Bank of Rajasthan, offset, in part, by a reduction in collection expenses.

Provisions decreased by 58.9% from Rs. 33.6 billion in fiscal 2010 to Rs. 13.8 billion in fiscal 2011, primarily due to a decline in provisions for loan losses in the unsecured retail portfolio. The Bank has been taking various measures to curtail an increase in non-performing assets in its retail portfolio over the last two years. This has resulted in a sharp reduction in provisioning requirements.

Wholesale Banking

The following table sets forth, for the periods indicated, the principal components of profit before tax.

	Year ended March 31,			2011/2010 % change
	2010	2011	2011	
	(in millions, except percentages)			
Net interest income	Rs.31,072	Rs.33,715	US\$663	8.5 %
Non-interest income	28,075	39,853	783	42.0
Total income	59,147	73,568	1,446	24.4
Non-interest expenses	12,353	18,231	358	47.6
Profit before provisions	46,794	55,337	1,087	18.3
Provisions	10,343	6,340	125	(38.7)
Profit before tax	Rs.36,451	Rs.48,997	US\$963	34.4 %

The following table sets forth, for the periods indicated, the outstanding balances of key assets and liabilities.

	Outstanding balance at March 31,			2011/2010 % change
	2010	2011	2011	
	(in millions, except percentages)			
Advances	Rs.1,144,172	Rs.1,555,794	US\$30,572	36.0 %
Deposits	888,942	764,356	15,020	(14.0)%

The wholesale banking loan book increased by 36.0% from Rs. 1,144.2 billion at year-end fiscal 2010 to Rs. 1,555.8 billion at year-end fiscal 2011. The increase was driven by the continued robust expansion of our domestic corporate loan book and by opportunities for lending through our overseas branches. In line with the Bank's strategy of reducing its dependence on wholesale deposits, the domestic term deposits in the segment decreased by 19.7% from Rs. 663.2 billion at year-end fiscal 2010 to Rs. 532.4 billion at year-end fiscal 2011. Wholesale current account deposits decreased marginally by 0.4% from Rs. 181.7 billion at year-end fiscal 2010 to Rs. 181.0 billion at year-end fiscal 2011.

Profit before tax of the wholesale banking segment increased from Rs. 36.5 billion in fiscal 2010 to Rs. 49.0 billion in fiscal 2011, primarily due to an increase in fee income and a decline in provisions partly offset by an increase in non-interest expenses.

Net interest income increased by 8.5% from Rs. 31.1 billion in fiscal 2010 to Rs. 33.7 billion in fiscal 2011, primarily due to higher net interest income on assets.

Non-interest income increased by 42.0% from Rs. 28.1 billion in fiscal 2010 to Rs. 39.9 billion in fiscal 2011. Fee income increased due to the Bank's increased participation in financing to corporations for their term loans, working capital and project financing requirements. Accordingly, during the year, there was an increase in loan processing related fees and transaction banking related fees from corporate clients.

Non-interest expenses increased by 47.6% from Rs. 12.4 billion in fiscal 2010 to Rs. 18.2 billion in fiscal 2011, primarily due to annual increase in salaries and provisions for performance-linked retention pay/performance bonuses during the period and an increase in the cost base on account of the amalgamation of the Bank of Rajasthan.

Provisions decreased from Rs. 10.3 billion in fiscal 2010 to Rs. 6.3 billion in fiscal 2011. Provisions were higher in fiscal 2010 on account of the significantly higher restructuring of corporate loans done during the period.

Treasury

The following table sets forth, for the periods indicated, the principal components of profit before tax.

	Year ended March 31,			2011/2010 % change
	2010	2011	2011	
	(in millions, except percentages)			
Net interest income	Rs. 11,507	Rs. 21,521	US\$423	87.0 %
Non-interest income	17,874	4,862	96	(72.8)
Total income	29,381	26,383	518	(10.2)
Non-interest expenses	1,615	1,544	30	(4.4)
Profit before provisions	27,766	24,839	448	(10.5)
Provisions	322	2,829	56	-
Profit before tax	Rs. 27,444	Rs. 22,010	US\$433	(19.8)%

The following table sets forth, for the periods indicated, the closing balances of key assets and liabilities.

	Closing balance at March 31,			2011/2010 % change
	2010	2011	2011	
	(in millions, except percentages)			
Investments	Rs. 1,208,507	Rs. 1,344,612	US\$26,422	11.3 %
Deposits	1,330	-	-	-
Borrowings	942,636	1,095,543	21,528	16.2 %

Our treasury operations include the maintenance and management of regulatory reserves, proprietary trading in equity and fixed income and a range of foreign exchange and derivatives products and services, such as, forward contracts, swaps and options. It also includes investments made by ICICI Eco-net Internet and Technology Fund, ICICI Equity Fund, ICICI Emerging Sectors Fund, ICICI Strategic Investments Fund and ICICI Venture Value Fund.

Profit before tax of the treasury segment decreased from Rs. 27.4 billion in fiscal 2010 to Rs. 22.0 billion in fiscal 2011, primarily due to losses on the government securities portfolio and other fixed income positions.

Net interest income increased by Rs. 10.0 billion from Rs. 11.5 billion in fiscal 2010 to Rs. 21.5 billion in fiscal 2011, primarily due to a reduction in the average cost of term deposits from 7.7% in fiscal 2010 to 6.5% in fiscal 2011 and also due to an increase in the average current and saving account deposits in the overall deposit from Rs. 640.6 billion during fiscal 2010 to Rs. 800.4 billion during fiscal 2011, resulting in higher net positive income derived from the transfer pricing of assets and liabilities.

Non-interest income decreased from Rs. 17.9 billion in fiscal 2010 to Rs. 4.9 billion in fiscal 2011, primarily due to losses on government securities and domestic fixed income positions. The hardening of short-term government bond

yields in response to monetary tightening and negative systemic liquidity for most of the year resulted in a loss of Rs. 1.7 billion on the government securities as well as our other fixed income positions in fiscal 2011 as compared to a profit of Rs. 8.2 billion in fiscal 2010. Further, the equity markets remained volatile particularly in the second half of fiscal 2011. This adversely impacted the Bank's profits from the equity portfolio and the mark-to-market valuations of its listed equity investments. The profit from equity portfolio decreased from Rs. 6.9 billion in fiscal 2010 to Rs. 4.3 billion in fiscal 2011. The higher income in fiscal 2010 included the reversal

of mark-to-market provisions on the credit derivatives portfolio due to a softening in credit spreads resulting in gain of Rs. 5.1 billion and a higher realized profit on government securities and other fixed income securities.

Provisions increased from Rs. 0.3 billion in fiscal 2010 to Rs. 2.8 billion in fiscal 2011, primarily due to an impairment provision for investments held by ICICI Bank, our consolidated venture capital funds and the provision on equity investments by ICICI Bank UK.

Other Banking

The following table sets forth, for the periods indicated, the principal components of profit before tax.

	Year ended March 31,			2011/2010	
	2010	2011	2011	% change	
	(in millions, except percentages)

Other banking business includes our hire purchase and leasing operations, our overseas banking subsidiaries, ICICI Bank UK, ICICI Bank Canada and its subsidiary ICICI Wealth Management Inc. (up to December 31, 2009) and ICICI Bank Eurasia Limited Liability Company, and other items not attributable to any particular business segment of the Bank.

Profit before tax of our other banking segment decreased from Rs. 7.7 billion in fiscal 2010 to Rs. 5.9 billion in fiscal 2011, primarily due to a decline in non-interest income and an increase in provisions. These negative impacts were partly offset by an increase in the net interest income of ICICI Bank UK and ICICI Bank Canada as their net interest margins increased and by a decrease in non-interest expenses.

Net interest income increased by 55.0% from Rs. 5.1 billion in fiscal 2010 to Rs. 7.9 billion in fiscal 2011, primarily due to an increase in the net interest income of ICICI Bank UK and ICICI Bank Canada and due to interest received on income tax refunds due upon the completion of pending income tax assessments of Rs. 1.6 billion in fiscal 2011 compared to Rs. 1.2 billion in fiscal 2010. The net interest margin of ICICI Bank UK increased primarily due to lower cost of funds and a higher average yield on assets. The cost of funds were lower during fiscal 2011 as the average term

deposits and average saving account deposits costs were lower. The benefit was partially offset by an increase in the proportion of term deposit liabilities during fiscal 2011. The higher average yield on assets was due to the deployment of a higher proportion of assets in corporate loans and advances and a decline in the investment book due to sales and maturities. The benefit was partially offset by investments in low yield short-term UK government treasury bills. The net interest margin of ICICI Bank Canada increased primarily due to a lower cost

of deposits and investments in higher yielding corporate bonds. The cost of deposits was lower during fiscal 2011 on account of a higher proportion of low cost saving deposits and a reduction in term deposits.

Non-interest income decreased by 49.5% from Rs. 9.4 billion in fiscal 2010 to Rs. 4.7 billion in fiscal 2011, primarily due to ICICI Bank UK and ICICI Bank Canada's lower fee income, mark-to-market losses on the investment and derivatives portfolio of ICICI Bank Canada in fiscal 2011 compared to mark-to-market gains in fiscal 2010, lower realized gains on investments and buy-back of bonds by ICICI Bank UK, lower mark-to-market gains on the derivatives portfolio of ICICI Bank UK and profit on the sale of fixed assets during fiscal 2010. The Bank realized a profit on the sale of fixed assets of Rs. 0.4 billion in fiscal 2010, compared to Rs. 1.3 billion in fiscal 2011.

Non-interest expenses decreased by 16.9% from Rs. 5.6 billion in fiscal 2010 to Rs. 4.6 billion in fiscal 2011, primarily due to a decrease in marketing and administrative expenses of overseas banking subsidiaries.

Advances decreased by 3.3% from Rs. 356.0 billion at year-end fiscal 2010 to Rs. 344.3 billion at year-end fiscal 2011 primarily due to a decline in the volume loans of ICICI Bank Canada resulting from the securitization of insured mortgages.

Investments decreased by 17.8% from Rs. 143.7 billion at year-end fiscal 2010 to Rs. 118.1 billion at year-end fiscal 2011, primarily due to a decline in the investment book of ICICI Bank UK and ICICI Bank Canada.

ICICI Bank UK reduced its investment portfolio by 21.7% from Rs. 89.8 billion at year-end fiscal 2010 to Rs. 70.3 billion at year-end fiscal 2011. Until fiscal 2008, ICICI Bank UK's retail deposits were primarily in the nature of demand deposits received through the internet channel. As a prudent asset liability management strategy, ICICI Bank UK mainly invested these deposits in the bonds of financial institutions with generally strong credit ratings. ICICI Bank UK's primary source of funds has been retail deposits accepted through its internet banking platform. Until July 2008, demand and saving deposits formed a significant proportion of ICICI Bank UK's total deposits. Since the instant access demand and savings accounts could be subjected to high withdrawals in times of stress, ICICI Bank UK has focused from July 2008 onwards on rebalancing its deposit base towards term deposits. Accordingly, term deposits of ICICI Bank UK increased from Rs. 138.4 billion at year-end fiscal 2010 to Rs. 144.6 billion at year-end fiscal 2011. ICICI Bank UK's demand and savings account deposits declined from Rs. 66.0 billion at year-end fiscal 2010 to Rs. 43.2 billion at year-end fiscal 2011. In accordance with the decline in demand deposits, the investments held against such deposits have also been reduced. In fiscal 2011, ICICI Bank UK has also reduced its bond portfolio and increased its investment in short-term UK government treasury bills, which qualify as liquid assets for the purposes of the Liquidity Asset Buffer requirements recently issued by our UK regulator, the Financial Services Authority. At year-end fiscal 2011, ICICI Bank UK had Rs. 23.1 billion invested in UK Government treasury bills.

On the "available-for-sale" investments of ICICI Bank UK, the mark-to-market post-tax loss reflected in shareholders' equity decreased from Rs. 4.3 billion at year-end fiscal 2010 to Rs. 3.3 billion at year-end fiscal 2011 due to a reduction in the investment portfolio and also due to the impact of tightening credit spreads primarily on the bond portfolio. The mark-to-market post-tax loss reflected in the shareholders' equity decreased from Rs. 12.4 billion at year-end fiscal 2009 to Rs. 4.3 billion at year-end fiscal 2010.

ICICI Bank Canada's investment portfolio decreased by 8.8% from Rs. 52.2 billion at year-end fiscal 2010 to Rs. 47.6 billion at year-end fiscal 2011. The decline in investments was in line with the decline in deposits, as liquid investments such as treasury bills and government bonds held against such deposits were also reduced. ICICI Bank Canada held certain asset backed commercial paper that was subject to a court approved restructuring plan, which was completed on January 21, 2009. Under the terms of the plan, ICICI Bank Canada received restructured 'Master Asset Vehicle' notes in lieu of the asset backed commercial paper held. These 'Master Asset Vehicle' notes have been marked-to-market similar to the asset backed commercial paper held prior to restructuring. In fiscal 2011, an

additional mark-to-market loss of Rs. 0.1 billion on the 'Master Asset Vehicle' notes was recorded.

Deposits decreased by 15.3% from Rs. 406.1 billion at year-end fiscal 2010 to Rs. 344.0 billion at year-end fiscal 2011 due to a decline in demand deposits of ICICI Bank UK and a decline in term deposits of ICICI Bank

Canada. Until fiscal 2008, ICICI Bank UK's retail deposits were primarily in the nature of demand deposits received through the internet channel. As a prudent asset liability management strategy, ICICI Bank UK invested these deposits mainly into the bonds of financial institutions with generally strong credit ratings. Since fiscal 2009, ICICI Bank UK has focused on rebalancing its deposit base towards retail term deposits and the proportion of retail term deposits in total deposits has increased significantly from 16.0% at year-end fiscal 2008 to 77.0% at year-end fiscal 2011.

Borrowings decreased by 31.8% from Rs. 102.5 billion at year-end fiscal 2010 to Rs. 69.9 billion at year-end fiscal 2011 primarily due to repayments or maturity of bonds and other bank borrowings of ICICI Bank UK. Additional borrowing raised by ICICI Bank UK during fiscal 2011 was substantially lower than the reduction, as the proceeds from maturity of corporate loans were used to repay the borrowings.

Life Insurance

The following table sets forth, for the periods indicated, the principal components of profit before tax.

	Year ended March 31,			2011/2010	
	2010	2011	2011	% change

The following table sets forth, for the periods indicated, the outstanding balance of key assets and liabilities.

	Outstanding balance at March 31,			2011/2010	
	2010	2011	2011	% change	
(in millions, except percentages)					
Investments	Rs. 56,865	Rs. 81,947	US\$ 1,610	44.1	%
Assets held to cover linked liabilities	514,693	588,265	11,560	14.3	
Liabilities on life policies in force	539,654	644,821	12,671	19.5	%

ICICI Prudential Life Insurance Company maintained its market leadership in the private sector with an overall market share of 7.3% in fiscal 2011 based on the retail weighted received premium basis. Retail weighted received premium represents 100% of first year premium plus 10% of single premium (excluding group). Assets under management increased by 18.9% from Rs. 573.2 billion at fiscal 2010 to Rs. 681.5 billion at fiscal 2011.

The Insurance Regulatory and Development Authority issued various regulations in fiscal 2011 with respect to unit-linked products. These new regulations require insurers to maintain an interim reduction in yield at 4.0% from the sixth year of the policy issued and gradually decreasing to 3.0% by the tenth year. Further, a cap on surrender charges (Rs. 6,000 for first year and decreasing thereafter with no surrender charges after five years) has been introduced. Structural changes have been made such as guaranteed return and mandatory annuitization in pension products. Unit linked products now have a minimum lock in period and a minimum premium paying term of five years. Insurers are now required to maintain uniform charges over the lock in period. The minimum sum assured has been increased from five times to ten times of annual premium. The minimum sum assured is the minimum amount

payable to the beneficiary in case of death of the insured. The new regulations require a periodic audit of corporate agents to be conducted by the insurer. The regulations also define the eligibility criteria for referral partners.

Almost all the unit linked products operational in the market were withdrawn on August 31, 2010 as per the revised unit linked products guidelines effective from September 1, 2010. The scarcity value created for these products before withdrawal resulted in a high growth during July and August 2010 with the industry registering a year-on-year growth of 32.0% from April to August 2010. Retail weighted received premium of ICICI Prudential Life Insurance Company grew by 54.0% during the same period. However, after September 1, 2010, with the new set of products which had lower distributor payouts, the industry witnessed a slowdown in new business and retail weighted received premium declined by 26.3% between September 1, 2010 to year-end fiscal 2011. Accordingly, for the period from April 2010 to March 2011, the industry retail weighted received premium declined by 8.5%. The retail weighted received premium of ICICI Prudential Life Insurance Company declined after September 1, 2010 in line with this trend and as a result of the time taken to approve new products. Although new business was adversely impacted during the third quarter of fiscal 2011, ICICI Prudential Life Insurance Company has achieved quarter-on-quarter sequential growth from the fourth quarter.

The changes in the regulations have also resulted in a change of the new business mix for ICICI Prudential Life Insurance Company. The new business retail premium from April 1, 2010 to August 31, 2010 (prior to the change of the regulations) comprised 97.2% regular premium (linked) products, 0.2% single premium (linked) products and 2.6% conventional products. After the changes in regulations effective from September 1, 2010, the mix of products changed to 28.9% regular premium (linked) products, 56.5% single premium (linked) products and 14.6% conventional products for the period from September 1, 2010 to year-end fiscal 2011.

Profit before tax of ICICI Prudential Life Insurance Company increased from Rs. 2.8 billion in fiscal 2010 to Rs. 9.2 billion in fiscal 2011 primarily due to an increase in fees on account of higher fund management and policy fees, higher release of certain actuarial reserves on lapsed policies created in earlier years, higher investment income and lower operating expenses.

The total premium income of ICICI Prudential Life Insurance Company increased by 8.2% from Rs. 165.3 billion in fiscal 2010 to Rs. 178.8 billion in fiscal 2011 primarily due to an increase in single premiums from Rs. 2.8 billion in fiscal 2010 to Rs. 21.7 billion in fiscal 2011 contributing to 12.1% of total premium in fiscal 2011 compared to 1.7% in fiscal 2010. The new business premium (regular premium business) of ICICI Prudential Life Insurance Company decreased by 6.1% from Rs. 60.6 billion in fiscal 2010 to Rs. 56.9 billion in fiscal 2011 and renewal premium decreased by 1.8% from Rs. 102.0 billion in fiscal 2010 to Rs. 100.2 billion in fiscal 2011.

Other income of ICICI Prudential Life Insurance Company increased by 67.5% from Rs. 17.0 billion in fiscal 2010 to Rs. 28.3 billion in fiscal 2011 primarily due to an increase in the release of certain actuarial reserves on lapsed policies created in earlier years, fees related to unit-linked insurance business including fund management fees, policy fees (including mortality charges) and surrender charges.

Commission expenses of ICICI Prudential Life Insurance Company decreased by 7.0% from Rs. 6.0 billion in fiscal 2010 to Rs. 5.6 billion in fiscal 2011 despite an increase in premium income primarily due to higher single premium business where the commissions are lower as compared to regular premium business.

Claims and benefit payouts of ICICI Prudential Life Insurance Company decreased by 2.5% from Rs. 2.9 billion in fiscal 2010 to Rs. 2.8 billion in fiscal 2011.

The operating expenses of ICICI Prudential Life Insurance Company decreased 14.2% from Rs. 23.5 billion in fiscal 2010 to Rs. 20.2 billion in fiscal 2011, mainly due to significant focus on cost efficiencies that led to a decrease in

new policy-related expenses, space rationalization initiatives and other branch related expenses in fiscal 2011 compared to fiscal 2010. The number of branches decreased from 1,918 at year-end fiscal 2010 to 1,399 at year-end fiscal 2011.

Transfer to linked funds represents the transfer of premium received, including the renewal premium on linked policies of ICICI Prudential Life Insurance Company, to investments, which increased by 3.2% from Rs. 144.2

billion in fiscal 2010 to Rs. 148.8 billion in fiscal 2011, as a result of the increase in linked business in fiscal 2011. In the linked business, the premium amount paid by the policy holder after the deduction of charges and the premium for risk cover, are invested in the underlying asset or index as chosen by the policy holder.

Assets held to cover the linked liabilities of ICICI Prudential Life Insurance Company increased by 14.3% from Rs. 514.7 billion at year-end fiscal 2010 to Rs. 588.3 billion at year-end fiscal 2011. The increase in linked assets under management is primarily attributable to the favorable financial markets (as the investments held for unit linked business are valued on a mark-to-market basis) and an increase in business volume during the year. In the linked business, the premium amount paid by the policy holder after the deduction of charges and the premium for risk cover, are invested in the underlying asset or index as chosen by the policy holder. The risks and rewards on the investments of linked policies therefore lie to a large extent with the policy holders.

Liability under existing life insurance policies to be paid by ICICI Prudential Life Insurance Company increased by 19.5% from Rs. 539.7 billion at year-end fiscal 2010 to Rs. 644.8 billion at year-end fiscal 2011, primarily as a result of the increase in linked assets.

General Insurance

The following table sets forth, for the periods indicated, the principal components of profit before tax.

	Year ended March 31,			2011/2010 % change
	2010	2011	2011	
	(in millions, except percentages)			
Gross written premium (include premium on reinsurance accepted)	Rs. 36,948	Rs. 47,349	US\$ 930	28.2 %

(1) Prior period figures have been reclassified to conform to the current classification.

(2) Investment income from pool represents our share of income from the terrorism pool and the Indian Motor Third Party Insurance Pool for Commercial Vehicles. The pools represent a multilateral reinsurance arrangement entered into by ICICI Lombard General Insurance Company together with other insurance companies. The funds belonging to the terrorism pool are administered by the General Insurance Corporation and funds belonging to Indian Motor Third Party Insurance Pool are administered by the contributing companies.

The following table sets forth, for the periods indicated, the outstanding balances of key assets and liabilities.

	Outstanding balance at March 31,			2011/2010 % change
	2010	2011	2011	
	(in millions, except percentages)			
Investments	Rs. 35,231	Rs. 46,653	US\$917	32.4 %
Current liabilities including claims outstanding	36,277	48,416	951	33.5
Provisions	Rs. 12,659	Rs. 14,431	US\$284	14.0 %

ICICI Lombard General Insurance Company, together with all other general insurance companies participates in Indian Motor Third Party Insurance Pool (“the Pool”), administered by the General Insurance Corporation of India from April 1, 2007. The Pool covers the reinsurance of third party risks of commercial vehicles. Based on an analysis of the performance of the Pool by an independent consultant, Insurance Regulatory and Development Authority instructed all general insurance companies to provide for losses on the Pool at the provisional rate of 153.0% over fiscal 2008 to fiscal 2011 in the financial results for fiscal 2011 compared to the earlier loss rate of 122-127%. Accordingly, the loss before tax of ICICI Lombard General Insurance Company for fiscal 2011 includes the impact of additional pool losses of Rs. 2.7 billion. In view of the above developments and representations of the general insurers, the Insurance Regulatory and Development Authority has provided notification on an increase in the rates of premium applicable to the Motor Third Party Liability insurance business by 68.5% with effect from April 25, 2011.

ICICI Lombard General Insurance Company maintained its leadership in the private sector with an overall market share of 9.6% of gross written premium in fiscal 2011. ICICI Lombard General Insurance Company had a loss before tax of Rs. 0.8 billion in fiscal 2011 compared to a profit before tax of Rs. 1.6 billion in fiscal 2010, primarily due to an increase in the negative impact of the Pool from Rs. 0.6 billion in fiscal 2010 to Rs. 3.0 billion in fiscal 2011, as a result of additional provisions of Rs. 2.7 billion made as per the Insurance Regulatory and Development Authority’s order.

The gross written premium increased by 28.2% from Rs. 36.9 billion in fiscal 2010 to Rs. 47.3 billion in fiscal 2011 primarily due to growth in the health and weather insurance business. Against a net commission expense of Rs. 210 million in fiscal 2010, there was a net commission income of Rs. 543 million in fiscal 2011, primarily due to an increase in reinsurance commission income on weather insurance business. Operating expenses increased from Rs. 5.6 billion in fiscal 2010 to Rs. 6.8 billion in fiscal 2011, primarily due to higher depreciation expenses and an increase in sales and distribution expenses on account of an increase in business. ICICI Lombard General Insurance Company has taken an additional depreciation charge of Rs. 224 million in fiscal 2011 on account of a change in the estimated life of certain fixed assets. Other expenses increased from Rs. 115 million in fiscal 2010 to Rs. 364 million in fiscal 2011, primarily due to provisions of Rs. 270 million made towards bad debts in fiscal 2011. Claims/benefits paid increased by 41.0% from Rs. 19.4 billion in fiscal 2010 to Rs. 27.3 billion in fiscal 2011, in line with an increase in net premium earned and the impact of additional provisions made on account of the Pool.

During fiscal 2011, the Insurance Regulatory and Development Authority has notified all insurance companies that they are now required to manage the investments of the Pool on an institutional basis, and the Pool administrator has accordingly transferred the existing amount of investments of the Pool to the respective insurance companies. Investments increased by 32.4% from Rs. 35.2 billion at year-fiscal 2010 to Rs. 46.7 billion at year-end fiscal 2011 primarily due to investments transferred on account of the Pool amounting to Rs. 7.2 billion at year-end fiscal 2011 as against Rs. nil at year-end fiscal 2010 and the re-investment of income from investments in fiscal 2011. Current liabilities, including claims outstanding, increased by 33.5% from Rs. 36.3 billion at year-end fiscal 2010 to Rs. 48.4 billion at year-end fiscal 2011, primarily due to an increase in third party motor claims liability.

Venture fund management

The following table sets forth, for the periods indicated, the principal components of profit before tax.

	Year ended March 31,			2011/2010 % change
	2010	2011	2011	
	(in millions, except percentages)			
Net interest income	Rs.(106)	Rs.(33)	US\$(1)	68.9 %

Edgar Filing: ICICI BANK LTD - Form 20-F

Total income	1,684	1,883	37	11.8
Non-interest expenses	1,066	946	19	(11.3)
Profit before provisions	618	937	18	51.6
Provisions	(126)	-	-	-
Profit before tax	Rs.744	Rs.937	US\$18	25.9 %

189

Profits before tax of our venture fund management segment increased from Rs. 0.7 billion in fiscal 2010 to Rs. 0.9 billion in fiscal 2011. This was primarily due to an increase in management fees on account of increase in carry income and a decrease in administrative cost. Management fees other than carry income decreased from Rs. 1.6 billion in fiscal 2010 to Rs. 1.3 billion in fiscal 2011 primarily due to a change in the fee levy structure from commitment amount to net asset basis on certain funds.

Others

The “others” segment mainly includes ICICI Prudential Asset Management Company Limited, ICICI Securities Limited, ICICI Securities Primary Dealership Limited and ICICI Home Finance Company Limited.

ICICI Prudential Asset Management Company Limited manages the ICICI Prudential Mutual Fund, which was among the top three mutual funds in India in terms of average funds under management in March 2011, with a market share of 10.5%. The average assets under management for ICICI Prudential Mutual Fund decreased from Rs. 769.9 billion in fiscal 2010 to Rs. 728.3 billion in fiscal 2011, primarily on account of a decrease in money market mutual funds due to tight liquidity in the market.

ICICI Securities Limited and ICICI Securities Primary Dealership Limited are engaged in equity underwriting and brokerage and primary dealership in government securities respectively. ICICI Securities Limited owns icicidirect.com, a leading online brokerage platform.

Profit before tax of the “others” segment remained at the same level of Rs. 6.8 billion in fiscal 2010 and fiscal 2011. Profit before tax of ICICI Home Finance Company Limited increased from Rs. 2.1 billion in fiscal 2010 to Rs. 3.3 billion in fiscal 2011; however, profit before tax of ICICI Securities Primary Dealership Limited decreased from Rs. 1.2 billion in fiscal 2010 to Rs. 0.8 billion in fiscal 2011 and of ICICI Prudential Asset Management Company Limited decreased from Rs. 1.9 billion in fiscal 2010 to Rs. 1.0 billion in fiscal 2011.

The following table sets forth, for the periods indicated, the principal components of profit before tax.

	Year ended March 31,			2011/2010	
	2010	2011	2011	% change	
	(in millions, except percentages)				
Net interest income	Rs.4,131	Rs.4,397	US\$86	6.4	%
Non-interest income	14,886	12,195	240	(18.1))
Total income	19,017	16,592	326	(12.8))
Non-interest expenses	11,919	9,556	188	(19.8))
Operating profit before provisions and tax	7,098	7,036	138	(0.9))
Provisions	284	240	5	(15.5))
Profit before tax	Rs.6,814	Rs.6,796	US\$134	(0.3))%

Net interest income increased by 6.4%, from Rs. 4.1 billion in fiscal 2010 to Rs. 4.4 billion in fiscal 2011, primarily due to a lower cost of funds.

Non-interest income decreased by 18.1%, from Rs. 14.9 billion in fiscal 2010 to Rs. 12.2 billion in fiscal 2011, primarily due to a decrease in fund management fees as a result of a decrease in average assets under management, a decrease in brokerage fees and a decrease in loan processing fees.

Non-interest expenses decreased by 19.8%, from Rs. 11.9 billion in fiscal 2010 to Rs. 9.6 billion in fiscal 2011, primarily due to lower new business expenses and a decrease in staff and establishment expenses.

ICICI Prudential Asset Management Company made a profit before tax of Rs. 1.0 billion in fiscal 2011 compared to Rs. 1.9 billion in fiscal 2010, primarily due to a decrease in management fees on account of a decrease in average assets under management.

ICICI Securities Limited made a profit before tax of Rs. 1.7 billion in fiscal 2011 compared to Rs. 1.6 billion in fiscal 2010 due to a decrease in administrative expenses. However, brokerage income of ICICI Securities Limited decreased by 7.1% from Rs. 5.6 billion in fiscal 2010 to Rs. 5.2 billion in fiscal 2011 on account of a change in trading patterns (that is, a shift from the higher margin cash and futures segment to the lower margin options segment).

ICICI Securities Primary Dealership made a profit before tax of Rs. 0.8 billion in fiscal 2011 compared to Rs. 1.2 billion in fiscal 2010 primarily due to a decrease in trading profits, as fixed income markets offered limited opportunities for trading profits during fiscal 2011 and higher funding costs reduced net interest income in fiscal 2011.

ICICI Home Finance Company Limited made a profit before tax of Rs. 3.3 billion in fiscal 2011 compared to Rs. 2.1 billion in fiscal 2010 primarily due to an increase in net interest income. Net interest income increased primarily due to an increase in net interest margin on account of the repayment of high cost borrowings during the period and an increase in interest rates on loans and advances by 100 basis points during fiscal 2011.

Related Party Transactions

During fiscal 2012, we entered into transactions with related parties consisting of (i) associates/other related entities and (ii) key management personnel and their close family members.

Related Parties

Associates/Other Related Entities

During fiscal 2012, the following parties were identified as our associates/other related entities: Financial Inclusion Network & Operations Limited; I-Process Services (India) Private Limited; I-Solutions Providers (India) Private Limited (up to September 30, 2011) (I-Solutions Providers (India) Private Limited was amalgamated with I-Process Services (India) Private Limited during the quarter ending December 31, 2011); Comm Trade Services Limited; NIIT Institute of Finance Banking and Insurance Training Limited; Prize Petroleum Company Limited (up to September 30, 2011); ICICI Foundation for Inclusive Growth; Rainbow Fund; ICICI Merchant Services Private Limited and Mewar Aanchalik Gramin Bank.

Key Management Personnel and their Close Family Members

Our key management personnel include our executive directors. The following individuals were our key management personnel during fiscal 2012: Ms. Chanda Kochhar; Mr. N. S. Kannan; Mr. K. Ramkumar and Mr. Rajiv Sabharwal. The close family members of the above key management personnel are also our related parties. Close family members in relation to the executive directors means their spouses, children, siblings and parents. We have applied the Indian GAAP standard in determining the close family members of the executive directors.

Related Party Transactions

The following are the material transactions between us and our associates/other related entities or our key management personnel or their close family members. A related party transaction is disclosed as a material related party transaction whenever it exceeds 10% of all related party transactions in that category.

For additional details, see also “Management—Compensation and Benefits to Directors and Officers—Loans” and paragraph A(2) “Related Party Transactions” of Schedule 18 to the consolidated financial statements included herein.

Insurance Services

During fiscal 2012, we received insurance premiums from our associates/other related entities amounting to Rs. 18 million, from key management personnel of the Bank amounting to Rs. 1 million and from the close family members of key management personnel amounting to Rs. 0.1 million. Our material transaction in this regard during

191

fiscal 2012 amounted to Rs. 15 million of premiums received from Financial Inclusion Network & Operations Limited. The premiums received were towards cover for health insurance, personal accident, motor and miscellaneous items.

During fiscal 2012, we paid claims to I-Process Services (India) Private Limited amounting to Rs. 0.4 million.

Fees, Commission and Other Income

During fiscal 2012, we received fees, commission and other income from our associates/other related entities amounting to Rs. 22 million and from key management personnel of the Bank amounting to Rs. 0.3 million. Our material transactions during fiscal 2012 amounted to Rs. 19 million of fees, commission and other income received from ICICI Merchant Services Private Limited. These transactions primarily generated bank charges for us.

Lease of Premises, Shared Corporate and Facilities Expenses

During fiscal 2012, we received Rs. 38 million for the lease of premises, facilities and other administrative costs from ICICI Merchant Services Private Limited. The amount was paid to the Bank towards its share of the shared corporate expenses, infrastructure and technology sharing charges as specified by the operations agreement between the Bank and ICICI Merchant Services Private Limited.

Secondment of Employees

During fiscal 2012, we received compensation from I-Process Services (India) Private Limited amounting to Rs. 7 million for the secondment of our employees.

Brokerage Fees and Other Expenses

During fiscal 2012, we paid brokerage fees and other expenses to our associates/other related entities amounting to Rs. 2.6 billion. Our material transactions during fiscal 2012 amounted to Rs. 978 million in brokerage fees and other expenses paid to Financial Inclusion Network & Operations Limited, Rs. 954 million in brokerage fees and other expenses paid to ICICI Merchant Services Private Limited and Rs. 607 million in brokerage fees and other expenses paid to I-Process Services (India) Private Limited. These transactions primarily pertain to customer support related services such as sales, marketing and promotional activities, back-end operations, merchant servicing fees and expenses towards providing basic banking services/health insurance products to the rural segment of the country including enrollment activities, issuance of cards, authentication devices and other incidental technology related services.

Purchase of Investments

During fiscal 2012, we invested in equity warrants of Financial Inclusion Network & Operations Limited amounting to Rs. 40 million.

Sale of Investments

During fiscal 2012, we sold government securities to Mewar Aanchalik Gramin Bank amounting to Rs. 49 million.

Interest Expenses

During fiscal 2012, we paid interest to our associates/other related entities amounting to Rs. 157 million, to our key management personnel amounting to Rs. 2 million and to the close family members of key management personnel amounting to Rs. 1 million, for their deposits with us. Our material transactions during fiscal 2012 amounted to Rs. 129 million of interest paid to Mewar Aanchalik Gramin Bank and Rs. 17 million of interest paid to ICICI Merchant Services Private Limited.

Interest Income

During fiscal 2012, we received interest from our associates/other related entities amounting to Rs. 52 million, from our key management personnel amounting to Rs. 0.5 million and from the close family members of key management personnel amounting to Rs. 0.7 million. Our material transactions during fiscal 2012 amounted to Rs. 48 million of interest received from ICICI Merchant Services Private Limited. The transaction mainly pertains to interest received on bonds.

Dividends Paid

During fiscal 2012, the Bank paid dividends to its key management personnel amounting to Rs. 5 million. The dividend paid during fiscal 2012 to Ms. Chanda Kochhar was Rs. 4 million and to Mr. N. S. Kannan was Rs. 1 million.

Donations Given

During fiscal 2012, we gave donations to the ICICI Foundation for Inclusive Growth amounting to Rs. 259 million.

Related Party Balances

The following table sets forth, at the date indicated, our balance payable to/receivable from our associates/other related entities:

Items	At year-end fiscal 2012 (in millions)
Deposits from related parties held by us	Rs.2,011
Loans and advances to related parties(1)	1,005
Our investments in related parties	955
Investments in our shares held by related parties	15
Payables to related parties	265
Guarantees issued by us for related parties	0.1

The following table sets forth, at the date indicated, the balance payable to/receivable from the key management personnel:

Items	At year-end fiscal 2012 (in millions, except number of shares)
Deposits from key management personnel	Rs. 41
Loans and advances to key management personnel(2)	Rs. 9
Investments in our shares held by key management personnel	Rs. 4
Employee stock options outstanding (numbers)	2,701,500
Employee stock options exercised(3)	Rs. 0.9

The following table sets forth, at the date indicated, the balance payable to/receivable from the close family members of key management personnel:

Items	At year-end fiscal 2012 (in millions)
Deposits from close family members of key management personnel	Rs.20
Loans and advances to close family members of key management personnel(1)	7

The following table sets forth, for the period indicated, the maximum balance payable to/receivable from the key management personnel:

Items	Year ended March 31, 2012 (in millions)
Deposits from key management personnel	Rs. 64
Loans and advances to key management personnel(2)	11
Investments in our shares held by key management personnel	4

The following table sets forth, for the period indicated, the maximum balance payable to/receivable from the close family members of key management personnel:

Items	Year ended March 31, 2012 (in millions)
Deposits from close family members of key management personnel	Rs. 29
Loans and advances to close family members of key management personnel(1)	9

-
- (1) The loans and advances (a) were made in the ordinary course of business, (b) were made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons, and (c) did not involve more than the normal risk of collectability or present other unfavorable features.
- (2) The loans and advances (a) were made in the ordinary course of business and were made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons or (b) were made on the same terms, including interest rates and collateral, as those prevailing at the time for other employees as part of employee loan scheme, and (c) did not involve more than the normal risk of collectability or present other unfavorable features.
- (3) During fiscal 2012, 86,500 employee stock options were exercised by the key management personnel of the Bank, which have been reported at face value.

Joint Ventures and Associates

In fiscal 2008, ICICI Bank consolidated TSI Ventures as a joint venture as per AS 27 on “Financial Reporting of Interests in Joint Ventures”. From fiscal 2009, in view of the sale of investment in the equity share capital of TSI Ventures (India) Private Limited by ICICI Venture Funds Management Company Limited, the entity ceased to be a joint venture on the date of sale and accordingly, this entity has not been consolidated from fiscal 2009 onwards.

Since fiscal 2006, TCW/ICICI Investment Partners LLC has been classified as a Joint Venture as per AS 27 on “Financial Reporting of Interests in Joint Ventures”.

From fiscal 2008, ICICI Bank started applying equity method accounting for investment in Financial Inclusion Network & Operations Limited (earlier known as Financial Information Network & Operations Limited), I-Process Services (India) Private Limited, I-Solutions Providers (India) Private Limited, NIIT Institute of Finance, Banking and Insurance Training Limited and ICICI Venture Value Fund as associates, as required by AS 23 on “Accounting for

Investments in Associates in Consolidated Financial Statements”. However, due to an increase in the equity stake in the ICICI Venture Value Fund from 48.0% to 54.8% during fiscal 2010 by ICICI Ventures Fund Management Company Limited, a wholly owned subsidiary of the Bank, ICICI Venture Value Fund has been consolidated as required by AS 21 on “Consolidated Financial Statements”. During fiscal 2012, I-Solutions Providers (India) Private Limited was amalgamated with I-Process Services (India) Private Limited and therefore ceased to be an associate. Accordingly, it has not been accounted for under the equity method prescribed by AS 23 on “Accounting for Investments in Associates in Consolidated Financial Statements”.

From fiscal 2009, ICICI Bank started applying equity method accounting for investment in Crossdomain Solutions Private Limited, Contests2win.com India Private Limited, Transafe Services Limited, Prize Petroleum Company Limited as per the equity method prescribed by AS 23 on “Accounting for Investments in Associates in Consolidated Financial Statements”. However, from fiscal 2010, in view of the sale of investments in the equity share capital of Crossdomain Solutions Private Limited, Contests2win.com India Private Limited, and Transafe Services Limited, these entities ceased to be associates from the respective date of the sale and accordingly, these entities have not been consolidated. From fiscal 2012, in view of the sale of investments in the equity share capital

of Prize Petroleum Company Limited, this entity ceased to be an associate from its date of the sale and, accordingly, has not been consolidated.

From fiscal 2010, ICICI Bank started applying equity method accounting for investment in Rainbow Fund and ICICI Merchant Services Private Limited as per the equity method prescribed by AS 23 on “Accounting for Investments in Associates in Consolidated Financial Statements”.

From fiscal 2011, ICICI Bank started applying equity method accounting for investment in Mewar Aanchalik Gramin Bank as per the equity method prescribed by AS 23 on “Accounting for Investments in Associates in Consolidated Financial Statements”.

Under Indian GAAP, we have not consolidated certain entities in which investments are intended to be temporary. However under U.S. GAAP, these entities have been consolidated in accordance with FASB ASC Subtopic 810-10, “Consolidation – Overall” or have been accounted for as equity affiliates in accordance with FASB ASC Subtopic 323-10, “Investments – Equity Method and Joint Ventures”. Under Indian GAAP, till fiscal 2011, 3i Infotech Limited was not consolidated in which the investment is intended to be temporary. During fiscal 2012, loans to 3i Infotech Limited were restructured and as per the restructuring scheme a certain portion of the loans to provided by ICICI Bank to 3i Infotech Limited will be converted into equity shares. Based on the continued intention to reduce the stake below 20% and severe long term restrictions on 3i Infotech Limited under the debt restructuring scheme which impairs the ability of 3i Infotech Limited to transfer funds to its investee, the results of 3i Infotech Limited were not consolidated in fiscal 2012 in Indian GAAP. However, under U.S. GAAP, this entity has been accounted for as an equity affiliate in accordance with FASB ASC Subtopic 323-10 “Investments – Equity Method and Joint Ventures”.

Reconciliation of Net Profit between Indian GAAP and U.S. GAAP

Our consolidated financial statements are prepared in accordance with Indian GAAP, which differs in certain significant aspects from U.S. GAAP. The following discussion explains the significant adjustments to our consolidated profit after tax under Indian GAAP in fiscal 2012, fiscal 2011 and fiscal 2010 that would result from the application of U.S. GAAP instead of Indian GAAP.

Consolidated net income attributable to the shareholders of ICICI Bank of Rs. 70.0 billion in fiscal 2012 under U.S. GAAP was lower than the profit after tax attributable to the shareholders of ICICI Bank of Rs. 76.4 billion under Indian GAAP. During fiscal 2012, the net income under U.S. GAAP was lower primarily due to the impact of other-than-temporary impairment of securities of Rs. 5.0 billion as compared to Indian GAAP, the impact of difference in accounting for business combinations of Rs. 2.0 billion, a lower benefit on deferred tax of Rs. 3.7 billion as compared to Indian GAAP, lower profits attributable to the shareholders’ of ICICI Bank from insurance subsidiaries of Rs. 1.2 billion as compared to Indian GAAP and impact of amortization of loan origination fees and costs of Rs. 1.9 billion under U.S. GAAP. During fiscal 2012, as compared to Indian GAAP, net income under U.S. GAAP was impacted positively by the lower loan loss provisioning amounting to Rs. 3.1 billion, the impact of consolidation of certain qualified special purpose entities under U.S. GAAP amounting to Rs. 3.1 billion, the impact of the currency revaluation of foreign currency-denominated available-for-sale debt securities amounting to Rs. 1.1 billion and the mark-to-market impact on held-for-trading and available-for-sale securities by Rs. 1.1 billion. See also note 20 to our “consolidated financial statements - schedules forming part of the consolidated financial statements - additional notes” under U.S. GAAP included herein.

The difference in accounting for the provision for loan losses resulted in a higher income under U.S. GAAP by Rs. 2.0 billion in fiscal 2012 and Rs. 10.5 billion in fiscal 2011, as compared to Indian GAAP. This was primarily due to differences in the methodology of computing loan loss allowances between Indian GAAP and U.S. GAAP, resulting in timing differences in the recognition of such losses. The favorable impact on allowances under U.S. GAAP is

primarily due to these timing differences. The primary reason for differences in provisions on other impaired loans in fiscal 2011 was the provision on our smaller balance, homogenous loans. During fiscal 2008 and fiscal 2009, the Bank experienced high additions in its non-performing smaller balance, homogenous loans. This resulted in higher loan loss allowances under U.S. GAAP in those years as compared to Indian GAAP due to differences in provisioning methodology. During fiscal 2011, the additions to non-performing loans in our small

balance, homogenous loans were lower in comparison to fiscal 2010. Due to the ageing of previously classified non-performing loans, the provision requirement under Indian GAAP increased from fiscal 2009 till fiscal 2011; however, the allowances under U.S. GAAP had already been made in previous periods based on estimated probable losses and those estimates of probable losses did not increase as significantly during these years. Accordingly, the allowance for loan losses under U.S. GAAP was lower resulting in a favorable impact on net income under U.S. GAAP in fiscal 2011. During fiscal 2012, there was a sharp reduction in the provisions for our smaller balance homogenous loans under Indian GAAP primarily due to a sharp reduction in additions to non-performing loans in our small balance, homogenous loans since fiscal 2011. Therefore, unlike in fiscal 2011 when there was a significant favorable impact on allowance under U.S. GAAP, there was no such significant impact in fiscal 2012. The cumulative provisions under U.S. GAAP at year-end fiscal 2012 continue to be higher than the cumulative provisions held under Indian GAAP, as shown in the statement of stockholders' equity reconciliation. See also note 20(a) to our "consolidated financial statements—schedules forming part of the consolidated financial statements—additional notes" under U.S. GAAP included herein.

The difference in accounting for business combinations resulted in lower income under U.S. GAAP by Rs. 2.0 billion in fiscal 2012 and by Rs. 1.7 billion in fiscal 2011 as compared to Indian GAAP, primarily because of the amortization of intangible assets. According to Indian GAAP, no intangible assets are created in a business combination. However, under U.S. GAAP, intangible assets are created as required by FASB ASC Topic 805, "Business Combinations". These intangibles are amortized over the estimated useful life of the intangible assets. The amortization of intangible assets increased from Rs. 1.3 billion in fiscal 2011 to Rs. 1.7 billion in fiscal 2012, primarily due to the full-year impact of the amortization of intangible assets acquired in the amalgamation of Bank of Rajasthan in August 2010.

The difference in accounting for consolidation resulted in higher income under U.S. GAAP by Rs. 0.3 billion in fiscal 2012 and by Rs. 3.4 billion in fiscal 2011 as compared to Indian GAAP. During fiscal 2012, the Bank recorded a gain of Rs. 3.1 billion on the consolidation of certain qualified special purpose entities used for securitization transactions under U.S. GAAP. These qualified special purpose entities were consolidated on the adoption of FAS 167 effective April 1, 2010 under U.S. GAAP, which are not consolidated under Indian GAAP. The share of profits from our insurance subsidiaries was lower by Rs. 1.2 billion in fiscal 2012 as compared to Indian GAAP. In the case of our life insurance subsidiary, certain actuarial reserves on lapsed policies created in earlier years are released through the profit and loss account under U.S. GAAP. The release of such actuarial reserves has been accounted for as funds for future appropriations as a balance sheet item under Indian GAAP and the same is recognized in the profit and loss account upon the expiration of the reinstatement period. This creates timing differences in the recognition of the release of the actuarial reserves in the income statement under Indian GAAP and U.S. GAAP. Actuarial reserves on lapsed policies created a negative impact of Rs. 1.5 billion in fiscal 2012. The net income under U.S. GAAP due to the consolidation of our subsidiaries and affiliates was higher by Rs. 3.4 billion in fiscal 2011 as compared to Indian GAAP, primarily due to profits of Rs. 4.5 billion on the consolidation of certain qualified special purpose entities used for securitization transactions, but not consolidated under Indian GAAP. The share of profits from our life insurance subsidiary, accounted for by the equity method of accounting under U.S. GAAP, resulted in a lower income by Rs. 1.6 billion in fiscal 2011. See also note 20(c) to our "consolidated financial statements—schedules forming part of the consolidated financial statements—additional notes" under U.S. GAAP included herein.

The difference in accounting for the valuation of debt and equity securities resulted in lower income under U.S. GAAP by Rs. 0.4 billion in fiscal 2012 and by Rs. 3.8 billion in fiscal 2011 as compared to Indian GAAP. Of this, the impact of other-than-temporary impairment resulted in lower income by Rs. 5.0 billion in fiscal 2012 as compared to Rs. 4.0 billion in fiscal 2011 under U.S. GAAP as compared to Indian GAAP. The higher impact in fiscal 2012 was primarily due to higher other-than-temporary impairment on equity securities. During fiscal 2012, the revaluation, resulting from changes in foreign currency exchange rates, of mainly Euro- and British pound-denominated available-for-sale debt securities under U.S. GAAP resulted in a gain of Rs. 1.1 billion as compared to a loss of Rs.

2.8 billion in fiscal 2011. Under U.S. GAAP, the changes in the fair value of available-for-sale securities, including currency revaluation gains/losses, are reflected in other comprehensive income, while under Indian GAAP these changes are reflected in the profit and loss account. Such foreign currency denominated available-for-sale securities are either funded in the same currency or the exchange rate risk on these investments is covered by foreign currency forwards/swaps. The impact of currency revaluation on such funding liabilities and the

derivatives is taken through the income statement under both Indian GAAP and U.S. GAAP. Therefore, while the exchange rate movement risk on foreign currency denominated available-for-sale securities is economically covered, the difference in accounting treatment of the assets under U.S. GAAP as compared to Indian GAAP results in a difference in net profit between Indian GAAP and U.S. GAAP. Also, the mark-to-market impact on held-for-trading and available-for-sale securities resulted in higher income by Rs. 1.1 billion during fiscal 2012 and Rs. 2.8 billion in fiscal 2011 under U.S. GAAP as compared to Indian GAAP. See also note 20(d) to our “consolidated financial statements — schedules forming part of the consolidated financial statements — additional notes” under U.S. GAAP included herein.

We earn fees and incur costs on the origination of loans which are recognized upfront in Indian GAAP but are amortized in U.S. GAAP. The amortization of loan origination fees and costs resulted in lower income under U.S. GAAP as compared to Indian GAAP by Rs. 1.9 billion in fiscal 2012 and Rs. 12.4 billion in fiscal 2011. Under U.S. GAAP, the net impact of fees and costs amortization was higher in fiscal 2011 primarily due to higher loan origination fees booked during fiscal 2011. The net impact of fees and costs amortization was lower in fiscal 2012 primarily due to lower loan origination fees booked during fiscal 2012 as compared to fiscal 2011. The income under U.S. GAAP was also positively impacted due to higher amortization of previous years’ cumulative unamortized fees during fiscal 2012. See also note 20(e) to our “consolidated financial statements—schedules forming part of the consolidated financial statements—additional notes” under U.S. GAAP included herein.

The net income under U.S. GAAP due to the impact of deferred tax was lower by Rs. 3.7 billion in fiscal 2012 and Rs. 2.0 billion in fiscal 2011 as compared to Indian GAAP. The difference arises primarily because of the tax impact of U.S. GAAP adjustments over Indian GAAP and because deferred tax assets or liabilities are created based on substantively enacted tax rates under Indian GAAP, whereas they are created on enacted tax rates in force at the balance sheet date under U.S. GAAP. Further, deferred tax is created on undistributed earnings of subsidiaries and affiliates under U.S. GAAP, but is not created under Indian GAAP.

Consolidated profit after tax attributable to the shareholders of ICICI Bank of Rs. 60.9 billion in fiscal 2011 under Indian GAAP was higher than the net income attributable to the shareholders of ICICI Bank of Rs. 54.0 billion under U.S. GAAP. During fiscal 2011, the net income under U.S. GAAP was lower primarily due to the net impact of the higher amortization of fees and costs of Rs. 12.4 billion, the impact of the currency revaluation of foreign currency-denominated available-for-sale debt securities amounting to Rs. 2.8 billion, the impact of the amortization of intangibles of Rs. 1.3 billion, a lower benefit on deferred tax by Rs. 2.0 billion as compared to Indian GAAP and lower profits in our life insurance subsidiary by Rs. 1.6 billion as compared to Indian GAAP. During fiscal 2011, income under U.S. GAAP was impacted positively by the lower loan loss provisioning amounting to Rs. 10.5 billion and income of Rs. 4.4 billion due to the consolidation of certain qualified special purpose entities under U.S. GAAP. See also note 20 to our “consolidated financial statements - schedules forming part of the consolidated financial statements - additional notes” under U.S. GAAP included herein.

Consolidated profit after tax of Rs. 46.7 billion in fiscal 2010 under Indian GAAP was higher than the net income of Rs. 45.3 billion under US GAAP. During fiscal 2010, the net income under US GAAP was lower primarily due to the net impact of the higher amortization of fees and costs of Rs. 8.7 billion and the impact of the currency revaluation of foreign currency denominated available for sale debt securities amounting to Rs. 4.3 billion. During fiscal 2010, income under US GAAP was impacted positively by the lower loan loss provisioning amounting to Rs. 5.3 billion and higher profits in our life insurance subsidiary of Rs. 5.8 billion as compared to Indian GAAP. See note 22 to our “consolidated financial statements - schedules forming part of the Consolidated Financial Statements - additional notes” under US GAAP included herein.

For a further description of significant differences between Indian GAAP and U.S. GAAP, a reconciliation of net income and stockholders’ equity to U.S. GAAP and certain additional information required under U.S. GAAP, see

notes 20 and 21 to our consolidated financial statements included herein.

Critical Accounting Policies

In order to understand our financial condition and the results of operations, it is important to understand our significant accounting policies and the extent to which we use judgments and estimates in applying those policies.

197

Our accounting and reporting policies are in accordance with Indian GAAP and conform to standard accounting practices relevant to our products and services and the businesses in which we operate. Indian GAAP requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the financial statements and the reported income and expenses during the reported period. Accordingly, we use a significant amount of judgment and estimates based on assumptions for which the actual results are uncertain when we make the estimation. See also Schedule 17 —Significant Accounting Policies to our “Consolidated Financial Statements” included herein.

ICICI Bank Limited

Accounting for Investments

ICICI Bank accounts for its investments in accordance with the guidelines on investment classification and valuation issued by the Reserve Bank of India. We classify all our investments into the following categories of investments: (a) held to maturity, (b) available-for-sale and (c) held for trading. Under each classification, we further categorize investments into (a) government securities, (b) other approved securities, (c) shares, (d) bonds and debentures, (e) subsidiaries and joint ventures and (f) others.

Held to maturity securities are carried at their acquisition cost or at the amortized cost, if acquired at a premium over the face value. Any premium over the face value of the fixed rate and floating rate securities acquired is amortized over the remaining period to maturity on a constant effective yield basis and straight line basis respectively. Equity investments in joint ventures/associates are categorized as held-to-maturity in accordance with the Reserve Bank of India guidelines. These instruments are assessed for any permanent diminution in value and appropriate provisions are made.

The Bank computes the market value of its securities classified as available-for-sale and held for trading in accordance with the guidelines issued by the Reserve Bank of India. The Bank amortizes the premium, if any, over the face value of its fixed and floating rate investments in government securities classified as available-for-sale over the remaining period to maturity on a constant effective yield basis and straight line basis respectively. The Bank computes the market value of quoted investments based on the trades/quotes on recognized stock exchanges, subsidiary general ledger account transactions, and price list of the Reserve Bank of India or prices declared by the Primary Dealers Association of India jointly with Fixed Income Money Market and Derivatives Association, periodically.

The Bank computes the market value of its unquoted government securities which are in the nature of Statutory Liquidity Ratio securities included in the available-for-sale and held for trading categories in accordance with rates published by the Fixed Income Money Market and Derivatives Association.

The Bank computes the market value of non-government securities, under the available-for-sale and held for trading category other than those quoted on the stock exchanges, wherever linked to the yield-to-maturity rates, with a mark-up (reflecting associated credit risk) over the yield to maturity rates for government securities published by the Fixed Income Money Market and Derivatives Association.

The Bank marks-to-market its funded credit derivatives based on counter-party valuation quotes, or internal models using inputs from market sources such as Bloomberg/Reuters, counter-parties and the Fixed Income Money Market and Derivatives Association.

The Bank computes the market value of its unquoted equity shares at the break up value, if the latest balance sheet is available. If such a balance sheet is not available, the unquoted equity shares are valued at Re. 1 in accordance with the Reserve Bank of India guidelines.

The Bank computes the market value of its securities, under the available-for-sale and held for trading categories, scrip-wise (that is, by individual securities) and the depreciation/appreciation is aggregated for each category. Net appreciation in each category, if any, is ignored, as it is unrealized while net depreciation is provided for.

The Bank accounts for repurchase and reverse repurchase transactions with banks and financial institutions as borrowing and lending transactions in accordance with the current guidelines of the Reserve Bank of India. It accounts for transactions with the Reserve Bank of India under the liquidity adjustment facility as borrowing and lending transactions from the quarter ended March 31, 2012.

As per the Reserve Bank of India guidelines, the Bank follows the trade date method of accounting for the purchase and sale of investments, except for government of India and state government securities, for which the settlement date method of accounting is followed.

Provisions/Write-offs on Loans and Other Credit Facilities

ICICI Bank classifies its loans into standard, substandard and doubtful assets based on the number of days an account is overdue. The Bank classifies non-performing loans as loss assets when it believes that the loans are no longer collectible or the security available is below 10% of the balance outstanding. The Bank creates specific provisions on its secured and unsecured corporate loans classified as substandard and doubtful assets at rates prescribed by the Reserve Bank of India. Loans in the retail asset portfolio classified as substandard and doubtful are provided for at rates prescribed by our internal policy subject to minimum provisioning requirements set by the Reserve Bank of India. Loss assets are fully provided for or written off. The Bank held specific provisions for retail loans that are higher than the minimum regulatory requirements. The Bank held specific provisions against non-performing loans and a general provision against standard loans and floating provision taken over from the Bank of Rajasthan upon amalgamation.

The Bank determines provision for its restructured/rescheduled loans based on the diminution in the fair value of the loan under the methodology prescribed by the Reserve Bank of India. For loans classified as substandard and doubtful assets that are restructured, the Bank computes the diminution in fair value of the loan in addition to the loan loss provisions.

The Bank upgrades a restructured loan to a standard account if there has been satisfactory payment performance for one year following the date on which the first payment of principal, or interest was due. The Bank upgrades all other non-performing loans to a standard account if arrears of interest and principal are fully paid by the borrower.

The Reserve Bank of India has issued separate guidelines governing the off-balance sheet exposures of banks. The guidelines require banks to treat only unpaid amounts due for more than 90 days under derivatives contracts as non-performing assets. Further, mark-to-market gains on other derivative contracts with same counter-parties are reversed through profit and loss account. The Bank also creates general provisions on its standard loans based on the guidelines issued by the Reserve Bank of India. The general provisioning requirements applicable to the loan assets in the standard asset category are applicable to banks' derivative and gold exposures, using the current exposure method according to the guidelines of the Reserve Bank of India.

Additionally, the Bank creates provisions on individual country exposures (other than for home country exposures). The countries are categorized into seven risk categories: insignificant, low, moderate, high, very high, restricted and off-credit, and provisioning is made for those exposures exceeding 180 days on a graded scale ranging from 0.25% to 100%. For exposures with a contractual maturity of less than 180 days, provision is required to be held at 25% of the rates applicable to exposures exceeding 180 days. If the country exposure (net) of the Bank with respect to each country does not exceed 1% of the total funded assets, no provision is required for such country exposure.

Transfer and Servicing of Assets

ICICI Bank transfers commercial and consumer loans through securitization transactions. The transferred loans are de-recognized, and gains/losses are accounted for only if we surrender the rights to benefits specified in the underlying securitized loan contract. Recourse and servicing obligations are accounted for net of provisions.

In accordance with the Reserve Bank of India guidelines for securitization of standard assets, in effect from February 1, 2006, the Bank accounts for any loss arising from securitization immediately at the time of sale, and the

profit/premium arising from securitization is amortized over the life of the securities issued or to be issued by the special purpose vehicle to which the assets are sold.

In the case of loans sold to an asset reconstruction company, the excess provision is not reversed but is utilized to meet the shortfall/loss on account of the sale of other financial assets to the securitization/reconstruction company.

ICICI Prudential Life Insurance Company

Premium is recognized as income when due. For our unit-linked business, premium is recognized as income when the associated units are created.

Income from linked funds, which includes fund management charges, policy administration charges, mortality charges, etc., are recovered from the linked funds in accordance with terms and conditions of policies issued and are recognized when due.

Acquisition costs are costs that vary with and are primarily related to the acquisition of insurance contracts and are expensed in the period in which they are incurred.

Statutory reserves are held as per the requirements of the Insurance Regulatory and Development Authority and the Actuarial Society of India. Accordingly, the reserves are computed using the Gross Premium Method (reserves are computed as the present value of future benefits including future bonuses and the present value of expenses including overheads and are net of the present value of future total premiums, paid by policyholders).

Certain actuarial reserves on lapsed policies created in earlier years are not immediately released through our profit and loss account upon the lapse of the policy. The release of such actuarial reserves will have been accounted for as funds for future appropriations as a balance sheet item in accordance with the instructions received from the Insurance Regulatory and Development Authority and the same is recognized in our profit and loss account only on the expiration of the reinstatement period.

Investments are accounted for in accordance with the guidelines issued by the Insurance Regulatory and Development Authority. Accordingly, unrealized gain on investment is not taken into the profit and loss account except in the case of unit-linked businesses. Unrealized gains/losses arising due to changes in the fair value of equity shares and mutual fund units, in non-unit-linked policyholders' and shareholders' segments, are reflected in the "Fair Value Change Account" in the balance sheet. Unrealized gains/losses arising out of investments in real estate are reflected in the "Revaluation Reserve" in the balance sheet.

Fair Value Measurements

For the purposes of U.S. GAAP, we adopted Statement of FASB ASC Topic 820 "Fair Value Measurements and Disclosures" on April 1, 2008. We determine the fair values of our financial instruments based on the fair value hierarchy established in ASC Topic 820. The standard describes three levels of inputs that may be used to measure fair value.

The valuation of Level 1 instruments is based upon the unadjusted quoted prices of identical instruments traded in active markets.

The valuation of Level 2 instruments is based upon the quoted prices for similar instruments in active markets, the quoted prices for identical or similar instruments in markets that are not active, prices quoted by market participants and prices derived from valuation models which use significant inputs that are observable in active markets. Inputs

used include interest rates, yield curves, volatilities and credit spreads, which are available from public sources such as Reuters, Bloomberg and the Fixed Income Money Markets and Derivatives Association of India.

The valuation of Level 3 instruments is based on valuation techniques or models which use significant market unobservable inputs or assumptions. Financial instruments are considered Level 3 when their values are determined using pricing models, discounted cash flow methodologies or similar techniques and at least one significant model assumption or input is unobservable or when the determination of the fair value requires significant management judgment or estimation.

The valuation methodologies adopted by us for valuing our investments and derivatives portfolio are summarized below. A substantial portion of the portfolio is valued based on the unadjusted quoted or traded prices or based on models using market observable inputs such as interest rates, yield curves, volatilities and credit spreads available from public sources like Reuters, Bloomberg and stock exchanges.

The rupee denominated fixed income portfolio, which includes all rupee investments in government securities and corporate bonds, is valued based on guidelines for market participants established by the Fixed Income Money Market and Derivatives Association. The Fixed Income Money Market and Derivatives Association is an association of scheduled commercial banks, public financial institutions, primary dealers and insurance companies, and is a voluntary market body for bonds, derivatives and money markets in India. The international investments portfolio is generally valued on the basis of quoted prices. In certain markets, due to illiquidity, we use alternate valuation methodologies based on our own assumptions and estimates of the fair values.

A substantial part of the derivatives portfolio is valued using market observable inputs like swap rates, foreign exchange rates, volatilities and forward rates. The valuation of derivatives is carried out primarily using the market quoted swap rates and foreign exchange rates. Certain structured derivatives are valued based on counterparty quotes. The exposure regarding derivative transactions is computed and is marked against the credit limits approved for the respective counter-parties.

We also hold investments and derivatives that have been valued based on unobservable inputs or that involve significant assumptions made by the management in arriving at their fair values. Such instruments are classified under Level 3 as per the classification defined in FASB ASC Topic 820 "Fair Value Measurements and Disclosures".

A description of the valuation methodologies of Level 3 investments under U.S. GAAP:

Our total investment in Level 3 instruments amounted to Rs. 16.0 billion at year-end fiscal 2012, as compared to Rs. 33.0 billion at year-end fiscal 2011. Out of the total Level 3 investments, investments amounting to Rs. 9.7 billion were India-linked and investments amounting to Rs. 6.3 billion were non-India linked. India-linked investments consisted primarily of funded credit derivatives of Rs. 1.5 billion referencing Indian companies, pass through certificates of Rs. 3.9 billion, venture capital unit of Rs. 2.5 billion, security receipts of Rs. 0.6 billion and equity share of Rs. 0.5 billion. Non-India linked investments consisted primarily of corporate debt securities of Rs 3.4 billion and mortgage backed securities of Rs. 2.6 billion at year-end fiscal 2012.

Bonds that have been identified as illiquid and valued on the basis of a valuation model are classified as Level 3 instruments, only if the input used to value those securities is collected from unobservable market data or if the bonds were valued after making adjustment to the market observable data. Due to illiquidity in the asset backed, mortgage backed and Master Asset Vehicle security markets, a substantial part of these securities are classified as Level 3 and valuation models are used to value these securities. India-linked single name funded credit derivatives of Rs. 1.5 billion are valued based on credit spreads from market sources, wherever such spreads are available; where such spreads are not available, they are valued based on a valuation model using the Fixed Income Money Market and Derivatives Association spreads corresponding to the domestic ratings (or, if not available, the internal rating) of the issuer (capped to sovereign rating) with appropriate mark-ups.

The valuation of Indian pass through certificates is dependent on the estimated cash flows that the underlying trust would pay out. Assumptions are made with regards to various variables to arrive at the estimated cash flows. The cash flow for pass through certificates is discounted at the zero curve rates and credit spreads published by Fixed Income Money Market and Derivatives Association on month ends.

The valuation of security receipts and venture capital funds is calculated using the net asset value published by the issuing company.

Our Canadian subsidiary holds investments in asset backed commercial paper amounting to Rs. 0.7 billion (book value, net of provision) at year-end fiscal 2012, which are overdue. We have made provisions on these investments based on management's estimates of expected recovery. Retained interest, largely representing the excess spread of mortgage interest over the rate of return on the mortgaged backed securities, has been recorded as available-for-sale securities in the balance sheet at fair value of Rs. 1.9 billion determined using an internal model. Valuations of investments in master asset vehicle are determined using an internal model.

The investment in bonds of Rs. 0.7 billion held by our UK subsidiary is valued at the amortized cost net of impairment.

The sensitivity of the fair value of the Level 3 investments discussed above to an adverse change in the significant unobservable assumptions is a loss of Rs. 0.4 billion. For the calculation of sensitivity, an adverse change of 10% in the market value of the unlisted equity shares, security receipts and venture funds and a 50 basis points adverse change in yields for other securities have been assumed.

The methodologies we use for validating the pricing of products which are priced with reference to market observable inputs include comparing the outputs of our models with counterparty quotes, in comparison with pricing from third party pricing tools, replicating the valuation methodology used in the model or other methods used on a case-by-case basis. The prices are also computed under various scenarios and are checked for consistency. However, for products where there are no reliable market prices or market observable inputs available, valuation is carried out using models developed using alternate approaches and incorporating proxies wherever applicable. The validation of pricing models is performed by an independent risk management group, and approved by the Asset Liability Management Committee.

Recently Issued Accounting Pronouncements under U.S. GAAP

Accounting for Costs Associated with Acquiring or Renewing Insurance Contracts

In October 2010, FASB issued Accounting Standard Update 2010-26, which provides guidelines regarding which costs relating to the acquisition of new or renewal insurance contracts qualify for deferral. Under the guidelines, the following costs incurred in the acquisition of new or renewal contracts should be capitalized.

Incremental direct costs of contract acquisition

Incremental direct costs are those costs that result directly from and are essential to the contract transaction(s) and would not have been incurred by the insurance entity had the contract transaction(s) not occurred.

Certain costs incurred by the insurer for the activities performed directly related to the acquisition of contract are as below:

- Underwriting
- Policy issuance and processing
- Medical and inspection

- Sales force contract selling.

The costs related directly to those activities include only the portion of an employee's total compensation (excluding any compensation that is capitalized as incremental direct costs of contract acquisition) and payroll-related fringe benefits related directly to time spent performing those activities for actual acquired contracts and other costs related directly to those activities that would not have been incurred if the contract had not been acquired.

Advertising costs should be included in deferred acquisition costs only if the capitalization criteria specified in the direct-response advertising guidance in Subtopic 340-20, Other Assets and Deferred Costs—Capitalized Advertising Costs, are met.

All other acquisition-related costs—including costs incurred by the insurer for soliciting potential customers, market research, training, administration, unsuccessful acquisition or renewal efforts, and product development—should be charged to expense as incurred. Administrative costs, rent, depreciation, occupancy, equipment, and all other general overhead costs are considered indirect costs and should be charged to expense as incurred.

If the initial application of the amendments in this Accounting Standard Update results in the capitalization of acquisition costs that had not been capitalized previously by an entity, the entity may elect not to capitalize those types of costs.

The amendments in this Accounting Standard Update are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2011. The amendments in this Update could be applied prospectively or retrospectively upon adoption. We will adopt this update in fiscal 2013 and will apply it retrospectively to all prior periods presented in its consolidated financial statements for all insurance contracts. Our insurance companies estimate that their deferred acquisition costs will be reduced by approximately Rs. 12.0 billion and total equity will be reduced by approximately Rs. 11.0 billion, net of income tax, as of the date of adoption.

Troubled Debt Restructuring

In April 2011, FASB issued Accounting Standard Update 2011-02, which provides the guideline to help the creditors in determining whether a concession granted to a creditor will be considered as trouble debt restructuring. As per the guidelines a restructuring should be considered as a troubled debt restructuring if both the conditions exist:

- The restructuring constitutes a concession.
- The debtor is experiencing financial difficulties.

The amendments in this Accounting Standard Update are effective for the first interim or annual period beginning on or after June 15, 2011. We are in the process of evaluating the impact of adopting this statement.

Reconsideration of Effective Control for Repurchase Agreements

In April 2011, FASB issued Accounting Standard Update 2011-03 to improve accounting for repurchase agreements and other agreements that entitle and obligate a transferor to repurchase or redeem financial assets before their maturity by amending the criteria for determining effective control of collateral. The guidance is effective for fiscal quarters and years beginning on or after December 15, 2011. We are in the process of evaluating the impact of adopting this statement.

Fair Value Measurement

In May 2011, FASB issued Accounting Standards Update 2011-04 “Fair Value Measurement” (Topic 820), regarding the establishment of a global standard for applying fair value measurement, which clarifies three points in Topic 820.

- Application of the highest and best use and valuation premise concepts: The amendments specify that the concepts of highest and best use and valuation premise in a fair value measurement are relevant only when measuring the fair value of non-financial assets and are not relevant when measuring the fair value of financial assets or of

liabilities.

- Measuring the fair value of an instrument classified in a reporting entity's shareholders' equity. The amendments include requirements specific to measuring the fair value of those instruments, such as equity interests issued as consideration in a business combination. Those amendments are consistent with the

203

requirements for measuring the fair value of liabilities and specify that a reporting entity should measure the fair value of its own equity instrument from the perspective of a market participant that holds that instrument as an asset.

- Disclosures about fair value measurements: The amendments clarify that a reporting entity should disclose quantitative information about the unobservable inputs used in a fair value measurement that is categorized within Level 3 of the fair value hierarchy.

The guidance is effective during interim and annual periods beginning after December 15, 2011. We are in the process of evaluating the impact of adopting this statement.

Comprehensive Income

In June 2011, FASB issued new accounting guidance on the presentation of comprehensive income in financial statements. The new guidance requires entities to report components of comprehensive income in either a continuous statement of comprehensive income or two separate but consecutive statements. The guidance is effective during interim and annual periods beginning after December 15, 2011. This update will not impact our consolidated financial position, results of operations or cash flows and will only impact the presentation of Other Comprehensive Income in the financial statements.

Intangibles – Goodwill Impairment Testing

In September 2011, FASB issued new accounting guidance that simplifies goodwill impairment testing. The new guidance permits entities to make a qualitative assessment of whether it is likely that the fair value of a reporting unit is less than its carrying value. If, under this assessment, it is likely that the fair value of a reporting unit is less than the carrying amount, an entity is required to perform the two-step impairment test. The guidance is effective during interim and annual periods beginning after December 15, 2011. We are in the process of evaluating the impact of adopting this statement.

Offsetting – Financial Instruments and Derivative Instruments

In December 2011, FASB issued new accounting guidance that requires additional disclosures on financial instruments and derivative instruments that are either offset in accordance with existing accounting guidance or are subject to an enforceable master netting arrangement or similar agreement. The new requirements do not change the accounting guidance on netting, but rather enhance the disclosures to more clearly show the impact of netting arrangements on a company's financial position. This new accounting guidance will be effective, on a retrospective basis for all comparative periods presented, beginning after January 1, 2013. We are in the process of evaluating the impact of adopting this statement.

MANAGEMENT

Directors and Executive Officers

Our Board of Directors, consisting of 12 members at June 30, 2012, is responsible for the management of our business. Our organizational documents provide for a minimum of three directors and a maximum of 21 directors, excluding the government director and the debenture director (defined below), if any. We may, subject to the provisions of our organizational documents and the Companies Act, 1956, change the minimum or maximum number of directors by a resolution which is passed at a general meeting by a majority of the present and voting shareholders. In addition, under the Banking Regulation Act 1949, the Reserve Bank of India may require us to convene a meeting of our shareholders for the purposes of appointing new directors to our Board of Directors. The Banking Regulation Act requires that at least 51% of our directors should have special knowledge or practical experience in banking and areas relevant to banking including accounting, finance, agriculture and small scale industry. All of our directors are professionals with special knowledge of one or more of the above areas. Of the 12 directors, four directors are in our whole-time employment, or executive directors and the remaining eight directors including the government director are non-executive/independent directors. The appointment of the chairman and executive directors requires the approval of the Reserve Bank of India and the shareholders. Mr. Arvind Kumar, Joint Secretary, Department of Financial Services, Ministry of Finance, is the government nominee director on our Board effective July 22, 2011. Of the remaining seven non-executive, Mr. K. V. Kamath is the chairman of our Board and the others are company executives, retired company executives, advisors and chartered accountants. Of the eight non-executive directors, two have specialized knowledge in respect of agriculture and rural economy or small scale industry. The Reserve Bank of India has also prescribed 'fit and proper' criteria to be considered while appointing persons as directors of banking companies. Our directors (other than the government director) are required to make declarations confirming their ongoing compliance of the 'fit and proper' criteria. Our Board of Directors has reviewed the declarations received from the directors in this regard and determined that all our directors satisfy the 'fit and proper' criteria.

Pursuant to the provisions of the Companies Act, at least two-thirds of the total number of directors are subject to retirement by rotation. The government director and the debenture director are not subject to retirement by rotation as per our organizational documents. One-third of the directors must retire from office at each annual meeting of shareholders. A retiring director is eligible for re-election. Pursuant to the provisions of the Banking Regulation Act, none of the directors other than the Chairman and executive directors may hold office continuously for a period exceeding eight years. Pursuant to the Reserve Bank of India guidelines, a person would be eligible for appointment as director if he or she is between 35 and 70 years of age.

Our organizational documents also provide that we may execute trust deeds in respect of our debentures under which the trustee or trustees may appoint a director, known as the debenture director. The debenture director is not subject to retirement by rotation and may only be removed as provided in the relevant trust deed. Currently, there is no debenture director on our Board of Directors.

Mr. K.V. Kamath was the Managing Director and CEO of ICICI Bank from May 3, 2002 until April 30, 2009 and was appointed as non-executive Chairman for a period of five years effective May 1, 2009. Under the definition of independent director in Clause 49 of the listing agreement executed with the Indian stock exchanges, a director who has been an executive of the company in the immediately preceding three financial years would not be classified as an independent director. K. V. Kamath was a non-executive, non-independent director until April 30, 2012 and qualified as an independent director effective May 1, 2012.

Ms. Chanda Kochhar was appointed as Executive Director effective April 1, 2001, designated as Deputy Managing Director effective April 29, 2006 and Joint Managing Director and Chief Financial Officer effective October 19, 2007.

She was appointed as Managing Director and CEO for a period of five years effective May 1, 2009.

Mr. K. Ramkumar was appointed as Executive Director, for a period of five years, effective February 1, 2009. Mr. N. S. Kannan was appointed as Executive Director and Chief Financial Officer, for a period of five years, effective May 1, 2009.

The Reserve Bank of India has approved the above appointments and terms of office.

Mr. Rajiv Sabharwal was appointed as Executive Director for a period of five years effective June 24, 2010. While our shareholders have approved the above, the Reserve Bank of India approved the appointment of Mr. Rajiv Sabharwal for a period of three years effective June 24, 2010.

Our Board of Directors, at its meeting held on January 31, 2012, appointed Dr. Swati Piramal as a non-executive director up to the date of annual general meeting. Our shareholders have approved her appointment at the annual general meeting on June 25, 2012.

Mr. V. Prem Watsa, who was appointed as a non-executive director effective January 29, 2004 retired at the Annual General Meeting held on June 27, 2011 and expressed his desire not to be re-appointed as a director in view of his impending retirement in January 2012 on completion of eight years on the Board.

Edgar Filing: ICICI BANK LTD - Form 20-F

In order to comply with the provisions of the Companies Act and our organizational documents, Mr. N. S. Kannan, Mr. K. Ramkumar, and Mr. Rajiv Sabharwal will be subject to retirement by rotation if at any time the number of non-rotational directors exceeds one-third of the total number of directors. If they are re-appointed as directors immediately upon retirement by rotation, they will continue to hold their offices as Executive Directors and the retirement by rotation and re-appointment shall not be deemed to constitute a break in their appointment. Our other executive officers may hold office until they retire, unless they are discharged earlier by us.

Our Board of Directors had the following members at June 30, 2012:

(1) Includes salary and other benefits excluding bonus and ICICI Bank's contribution to superannuation fund, provident and gratuity fund paid for fiscal 2012 and excludes bonus for fiscal 2011 which was paid in fiscal 2012.

(2) Stock options granted and bonuses for fiscal 2012 are subject to approval of the Reserve Bank of India.

(3) Excludes special grant of options on February 7, 2011 of 250,000 options for Ms. Chanda Kochhar, 150,000 options each for Mr. N. S. Kannan, Mr. K. Ramkumar and Mr. Rajiv Sabharwal and 75,000 options each for Mr. Vijay Chandok and Ms. Zarin Daruwala.

(4) Each stock option, once exercised, is equivalent to one equity share of ICICI Bank. ICICI Bank granted these stock options to its executive officers at no cost. See "—Compensation and Benefits to Directors and Officers—Employee Stock Option Scheme" for a description of the other terms of these stock options. In accordance with the Scheme of Amalgamation, directors and employees of ICICI have received stock options in ICICI Bank equal to half the number of the outstanding unexercised stock options they held in ICICI with the exercise price of these options being equal to twice the exercise price for the ICICI stock options exchanged. The stock options mentioned above include ICICI stock options converted into ICICI Bank stock options on this basis.

(5) Executive officers and directors (including non-executive directors) as a group held about 0.08% (of ICICI Bank's equity shares as of this date).

Ms. Chanda Kochhar has a post-graduate degree in management from Jamnalal Bajaj Institute of Management Studies, Mumbai and a degree in cost and works accountancy from the Institute of Cost and Works Accountants of India. She started her career in 1984 with ICICI in its project finance department and has worked in the areas of corporate banking, infrastructure financing, e-commerce, strategy, retail banking and finance. She was appointed to

our Board as an Executive Director in April 2001. Our Board designated her as Deputy Managing Director effective April 29, 2006 and as Joint Managing Director and Chief Financial Officer in October 2007. Effective May 1, 2009 our Board appointed Ms. Chanda Kochhar as Managing Director and CEO.

Mr. N. S. Kannan is a graduate in mechanical engineering, a post-graduate in management from the Indian Institute of Management, Bangalore and a chartered financial analyst from the Institute of Chartered Financial Analysts of India. He joined ICICI in 1991. He has worked in the areas of corporate finance, infrastructure finance, structured finance, treasury and life insurance. He was Chief Financial Officer and Treasurer of ICICI Bank from 2003 to 2005 and Executive Director on the board of ICICI Prudential Life Insurance Company from 2005 to 2009. Our Board of Directors appointed him as Executive Director and Chief Financial Officer effective May 1, 2009. His responsibilities include finance, treasury, commercial banking, corporate legal, risk management, corporate communications and corporate branding. He is also responsible for day-to-day administration of the compliance and internal audit functions.

Mr. K. Ramkumar is a science graduate from Madras University with a post-graduate diploma in Personnel Management. He worked with ICI India before joining ICICI Bank in 2001 in the human resources department. In 2006 he was designated as Group Chief Human Resources Officer. Our Board of Directors appointed him as

Executive Director effective February 1, 2009. He is currently responsible for human resources, customer service and operations.

Mr. Rajiv Sabharwal is a graduate in mechanical engineering and a post-graduate in management from the Indian Institute of Management, Lucknow. He joined ICICI in 1998 and has worked in the areas of credit policy, collections, mortgage finance, consumer loans, rural banking, microfinance and financial inclusion. He left the services of the Bank in December 2008 and rejoined effective April 1, 2010, as Senior General Manager in charge of retail banking. Our Board of Directors appointed him as an Executive Director effective June 24, 2010. He is currently responsible for retail banking and inclusive and rural banking.

Mr. Vijay Chandok is a graduate in mechanical engineering and a post-graduate in management from Narsee Monjee Institute of Management Studies, Mumbai. He joined ICICI in 1993 and has worked in the areas of project finance, corporate banking, small enterprises and retail banking. He was designated as Group Executive-International Banking in April 2010 and re-designated as President effective May 10, 2011. He is responsible for international banking and small and medium enterprise businesses.

Ms. Zarin Daruwala is a chartered accountant. She joined ICICI in 1989 and has worked in the areas of project finance, corporate banking, mid-corporate business and agri-business. She was designated as Group Executive-Wholesale Banking in July 2010 and re-designated as President effective May 10, 2011.

Mr. Pravir Vohra who was the Group Chief Technology Officer and was re-designated as President effective May 10, 2011, retired from the services of the Bank on May 31, 2012.

Corporate Governance

Our corporate governance policies recognize the accountability of the Board and the importance of making the Board transparent to all our constituents, including employees, customers, investors and the regulatory authorities, and for demonstrating that the shareholders are the ultimate beneficiaries of our economic activities.

Our corporate governance framework is based on an effective independent board, the separation of the Board's supervisory role from the executive management and the constitution of Board committees, generally comprising a majority of independent directors and chaired by independent directors, to oversee critical areas and functions of executive management.

Our corporate governance philosophy encompasses not only regulatory and legal requirements, such as the terms of listing agreements with stock exchanges, but also several voluntary practices aimed at a high level of business ethics, effective supervision and enhancement of value for all stakeholders.

Our Board's role, functions, responsibility and accountability are clearly defined. In addition to its primary role of monitoring corporate performance, the functions of our Board include:

- approving corporate philosophy and mission;
- participating in the formulation of strategic and business plans;
- reviewing and approving financial plans and budgets;
- monitoring corporate performance against strategic and business plans, including overseeing operations;

- ensuring ethical behavior and compliance with laws and regulations;
- reviewing and approving borrowing limits;
- formulating exposure limits; and
- keeping shareholders informed regarding plans, strategies and performance.

To enable our Board of Directors to discharge these responsibilities effectively, executive management provides detailed reports on its performance to the Board on a quarterly basis.

Our Board functions either as a full board or through various committees constituted to oversee specific operational areas. These Board committees meet regularly. The constitution and main functions of the various committees are given below.

Audit Committee

As of the date of filing this annual report, the Audit Committee comprises four independent directors—Mr. Sridar Iyengar, Mr. Homi Khusrokhana, Mr. M. S. Ramachandran and Mr. V. Sridar. Mr. Sridar Iyengar, an independent director, is the Chairman of the Committee and Mr. Homi Khusrokhana is the Alternate Chairman. Mr. Sridar Iyengar, Mr. Homi Khusrokhana and Mr. V. Sridar are Chartered Accountants.

Our Board of Directors has also determined that Mr. Sridar Iyengar qualifies as an Audit Committee financial expert.

The Audit Committee provides direction to the audit function and monitors the quality of internal and statutory audit. The responsibilities of the Audit Committee include overseeing the financial reporting process to ensure fairness, sufficiency and credibility of financial statements, recommendation of appointment and removal of central and branch statutory auditors and chief internal auditor and fixation of their remuneration, approval of payment to statutory auditors for other permitted services rendered by them, review of functioning of Whistle Blower Policy, review of the quarterly and annual financial statements before submission to the Board, review of the adequacy of internal control systems and the internal audit function, review of compliance with inspection and audit reports and reports of statutory auditors, review of the findings of internal investigations, review of statement of significant related party transactions, review of management letters/letters on internal control weaknesses issued by statutory auditors, reviewing with the management, the statement of uses/application of funds raised through an issue (public issue, rights issue, preferential issue, etc.), the statement of funds utilized for the purposes other than those stated in the offer document/prospectus/notice and the report submitted by the monitoring agency, monitoring the utilization of proceeds of a public or rights issue and making appropriate recommendations to the Board to take steps in this matter, discussion on the scope of audit with external auditors and examination of reasons for substantial defaults, if any, in payment to stakeholders. The Audit Committee is also empowered to appoint/oversee the work of any registered public accounting firm, establish procedures for receipt and treatment of complaints received regarding accounting and auditing matters and engage independent counsel as also provide for appropriate funding for compensation to be paid to any firm/advisors. In addition, the Audit Committee also exercises oversight of the regulatory compliance function of the Bank. The Audit Committee is also empowered to approve the appointment of the Chief Financial Officer (i.e., the whole-time finance Director or any other person heading the finance function or discharging that function) after assessing the qualifications, experience and background etc. of the candidate.

All significant audit and non-audit services to be provided by our principal accountants are pre-approved by the Audit Committee before such services are provided to us.

Board Governance, Remuneration and Nomination Committee

As of the date of filing this annual report, the Board Governance, Remuneration and Nomination Committee comprises three independent directors—Mr. Sridar Iyengar, Mr. K. V. Kamath and Mr. Homi Khusrokhana. Mr. Sridar Iyengar, an independent director, is the Chairman of the Committee.

The functions of the Committee include the recommendation of appointments to the Board, evaluation of the performance of the Managing Director and CEO and executive directors on pre-determined parameters,

recommendation to the Board of the remuneration (including performance bonus and perquisites) to executive directors, approval of the policy for and quantum of bonus payable to the members of the staff, framing of guidelines for the Employees Stock Option Scheme and recommendation of grant of ICICI Bank stock options to the employees and the executive directors of ICICI Bank and its subsidiary companies.

Corporate Social Responsibility Committee

As of the date of filing this annual report, the Corporate Social Responsibility Committee comprises four directors—Mr. M. S. Ramachandran, Mr. Arvind Kumar, Dr. Tushaar Shah and Ms. Chanda Kochhar. Mr. M. S. Ramachandran, an independent director, is the Chairman of the Committee.

The functions of the Committee include reviewing corporate social responsibility initiatives undertaken by us and the ICICI Foundation for Inclusive Growth, making recommendations to the Board with respect to our corporate social responsibility initiatives, policies and practices and reviewing and implementing, if required, any other matters related to corporate social responsibility initiatives as recommended/suggested by the Reserve Bank of India or any other body.

Credit Committee

As of the date of filing this annual report, the Credit Committee comprises four directors—Mr. K. V. Kamath, Mr. Homi Khusrookhan, Mr. M. S. Ramachandran, and Ms. Chanda Kochhar. Mr. K. V. Kamath, an independent director, is the Chairman of the Committee.

The functions of the Committee include review of developments in key industrial sectors and approval of credit proposals as per the authorization approved by the Board.

Customer Service Committee

As of the date of filing this annual report, the Customer Service Committee comprises four directors—Mr. K. V. Kamath, Mr. M. S. Ramachandran, Mr. V. Sridar, and Ms. Chanda Kochhar. Mr. K. V. Kamath, an independent director, is the Chairman of the Committee.

The functions of the Committee include review of customer service initiatives, overseeing the functioning of the Customer Service Council and evolving innovative measures for enhancing the quality of customer service and improvement in the overall satisfaction level of customers.

Fraud Monitoring Committee

As of the date of filing this annual report, the Fraud Monitoring Committee comprises six directors—Mr. V. Sridar, Mr. K.V. Kamath, Mr. Homi Khusrookhan, Mr. Arvind Kumar, Ms. Chanda Kochhar and Mr. Rajiv Sabharwal. Mr. V. Sridar, an independent director, is the Chairman of the Committee.

The Committee monitors and reviews all frauds involving an amount of Rs. 10.0 million and above so as to identify the systemic lacunae, if any, that may have facilitated perpetration of the fraud and to put in place measures to rectify the same, identify the reasons for delay in detection, if any, report to top management of the Bank and the Reserve Bank of India, monitor the progress of investigations and recovery positions, ensure that staff accountability is examined at all levels in all the cases of frauds and that action, if required, is completed quickly without loss of time and review of efficacy of the remedial action taken to prevent recurrence of frauds, such as strengthening of internal controls and putting in place other measures as may be considered relevant to strengthen preventive measures against frauds.

Information Technology Strategy Committee

As of the date of filing this annual report, the Information Technology Strategy Committee comprises four directors—Mr. Homi Khusrokhana, Mr. K. V. Kamath, Mr. Sridar Iyengar and Ms. Chanda Kochhar. Mr. Homi Khusrokhana, an independent director, is the Chairman of the Committee.

The Board of Directors, at its meeting held on September 15-16, 2011, established the Information Technology Strategy Committee effective October 31, 2011. The Committee is empowered to approve the information technology strategy and policy documents, ensure that information technology strategy is aligned with business strategy, review information technology risks, ensure the proper balance of information technology investments for

sustaining growth, oversee the aggregate funding of information technology, ascertain if the management has resources to ensure the proper management of information technology risks and review the contribution of information technology to businesses.

Risk Committee

As of the date of filing this annual report, the Risk Committee comprises five directors—Mr. K. V. Kamath, Mr. Sridar Iyengar, Mr. Arvind Kumar, Mr. V. Sridar and Ms. Chanda Kochhar. Mr. K. V. Kamath, an independent director, is the Chairman of the Committee.

The Committee is empowered to review ICICI Bank's risk management policies in relation to various risks (credit, market, liquidity, operational and reputation risks), investment policies and strategy and regulatory and compliance issues in relation thereto. The Committee is also empowered to review the risk return profile of the Bank, capital adequacy based on the risk profile of the Bank's balance sheet, Basel-II implementation, business continuity plan and disaster recovery plan, key risk indicators and significant risk exposures and implementation of enterprise risk management.

Share Transfer and Shareholders'/Investors' Grievance Committee

As of the date of filing this annual report, the Share Transfer and Shareholders'/Investors' Grievance Committee comprises three directors—Mr. Homi Khusrokhani, Mr. V. Sridar, and Mr. N. S. Kannan. Mr. Homi Khusrokhani, an independent director, is the Chairman of the Committee.

The functions and powers of the Committee include approval and rejection of transfer or transmission of equity shares, preference shares, bonds, debentures and securities, issue of duplicate certificates, allotment of shares and securities issued from time to time, review and redressal of shareholders' and investors' complaints, delegation of authority for opening and operation of bank accounts for payment of interest, dividend and redemption of securities and the listing of securities on stock exchanges.

Committee of Executive Directors

As of the date of filing this annual report, the Committee of Executive Directors comprises all four executive directors and Ms. Chanda Kochhar, Managing Director and CEO is the Chairperson of the Committee. The other members are Mr. N. S. Kannan, Mr. K. Ramkumar and Mr. Rajiv Sabharwal.

The powers of the Committee include approval/renewal of credit proposals, restructuring and settlement as per authorization approved by the Board, approvals of detailed credit norms related to individual business groups, approvals to facilitate introduction of new products and product variants, program lending within each business segment and asset or liability category, including permissible deviations. The Committee also approves and reviews from time to time limits on exposure to any group or individual company as well as approves underwriting assistance to equity or equity linked issues and subscription to equity shares or equity linked products or preference shares. The Committee also exercises powers in relation to borrowing and treasury operations as approved by the Board, empowers officials of the Bank or its subsidiaries through execution of Power of Attorney, if required under the Common Seal of the Bank, and further exercises powers in relation to premises and property related matters.

Code of Ethics

We have adopted a Group Code of Business Conduct and Ethics for our directors and all our employees. In fiscal 2012, we have not amended any provision of the code that is applicable to our executive officers, nor have we granted

a waiver from any provision of the code to any of our executive officers.

Principal Accountant Fees and Services

The total fees to our principal accountant relating to the audit of consolidated financial statements for fiscal 2011 and fiscal 2012 and the fees for other professional services billed in fiscal 2011 and fiscal 2012 are as follows:

213

	Year ended March 31,		Convenience translation into US\$ 2012 (in thousands)
	2011 (in millions)	2012	
Audit			
Audit of ICICI Bank Limited and our subsidiaries	Rs. 148	Rs. 153	US\$ 3,006
Audit-related services	—	—	—
Opinion on non-statutory accounts presented in Indian Rupees	5	4	79
Others	4	8	157
Sub-total	157	165	3,242
Non-audit services			
Tax services	—	—	—
Tax compliance	3	5	98
Other services	7	17	334
Sub-total	10	22	432
Total	Rs. 167	Rs. 187	US\$ 3,674

Fees for “other services” under the non-audit services category are principally fees related to certification services. Our Audit Committee approved the fees paid to our principal accountant relating to audit of consolidated financial statements for fiscal 2012 and fees for other professional services billed in fiscal 2012. Our Audit Committee pre-approves all significant assignments undertaken for us by our principal accountant.

Summary Comparison of Corporate Governance Practices

The following is a summary comparison of significant differences between our corporate governance practices and those required by the New York Stock Exchange for United States issuers.

Independent Directors. A majority of our Board are independent directors, as defined under applicable Indian legal requirements. Under these requirements, directors are not independent if they have any material pecuniary relationship or transactions with us, our management or our subsidiaries. We have not made a determination as to whether our directors would be considered independent under the New York Stock Exchange rules. Although the judgment on independence must be made by our Board, there is no requirement that our Board affirmatively make such determination, as required by the New York Stock Exchange rules. Further, one of our directors is a representative of the Indian government, as required by the terms of the loan and guarantee facilities provided by the Indian government.

Non-Management Directors Meetings. Although there is no such requirement under applicable Indian legal requirements, our non-management directors meet separately before or after each Board meeting.

Board Governance, Remuneration and Nomination Committee and the Audit Committee. All members of our Board Governance, Remuneration and Nomination Committee are independent, as defined under applicable Indian legal requirements. All members of our Audit Committee are independent under Rule 10A-3 under the Exchange Act. The constitution and main functions of these committees as approved by our Board are described above and comply with the spirit of the New York Stock Exchange requirements for United States issuers.

Corporate Governance Guidelines. Under New York Stock Exchange rules, United States issuers are required to adopt and disclose corporate governance guidelines addressing matters such as standards of director qualification, responsibilities of directors, director compensation, director orientation and continuing education, management succession and annual performance review of the Board of Directors. As a foreign private issuer, we are not required to adopt such guidelines.

Compensation and Benefits to Directors and Officers

Remuneration

Under our organizational documents, each non-executive director, except the government director, is entitled to receive remuneration for attending each meeting of our Board or of a Board committee. The amount of remuneration payable to non-executive directors is set by our Board from time to time in accordance with limits prescribed by the Companies Act or the government. The remuneration for attending each Board or committee meeting is currently fixed at Rs. 20,000. In addition, we reimburse directors for travel and related expenses in connection with Board and committee meetings and related matters. If a director is required to perform services for us beyond attending meetings, we may remunerate the director as determined by our Board of Directors and this remuneration may be either in addition to or as substitution for the remuneration discussed above. We have not paid any remuneration to non-executive directors other than the remuneration for attending each meeting of our Board or of a Board committee, except to Mr. K. V. Kamath, who is being paid a remuneration of Rs. 2,000,000 per annum as approved by the Reserve Bank of India. The above remuneration has also been approved by shareholders and the government of India. Non-executive directors are not entitled to the payment of any benefits at the end of their terms of office.

Our Board or any committee thereof may fix, within the range approved by the shareholders, the salary payable to the executive directors. We are required to obtain specific approval of the Reserve Bank of India for the actual monthly salary and performance bonus paid each year to the executive directors.

The following table sets forth the currently applicable monthly salary ranges:

Name and Designation	Monthly Salary Range (Rs.)
Ms. Chanda Kochhar, Managing Director and CEO	700,000 - 1,350,000 (US\$ 13,755- US\$ 26,528)
Mr. N. S. Kannan, Executive Director and CFO	300,000 - 1,000,000 (US\$ 5,895- US\$ 19,650)
Mr. K. Ramkumar, Executive Director	300,000 - 1,000,000 (US\$ 5,895- US\$ 19,650)
Mr. Rajiv Sabharwal, Executive Director	300,000 - 1,000,000 (US\$ 5,895- US\$ 19,650)

The executive directors are entitled to perquisites (evaluated pursuant to Indian income-tax rules wherever applicable and otherwise at actual cost to the Bank) such as the benefit of the Bank's furnished accommodation, gas, electricity, water and furnishings, club fees, group insurance, use of car and telephone at residence or reimbursement of expenses in lieu thereof, medical reimbursement, leave and leave travel concession, education benefits, provident fund, superannuation fund and gratuity, in accordance with the scheme(s) and rule(s) applicable from time to time.

The Board, at its meeting held on April 27, 2012, approved a revision in the supplementary allowance for executive directors. Consequently, Ms. Chanda Kochhar, shall be paid a supplementary allowance of Rs. 870,862 per month as compared to Rs. 700,000 per month; N. S. Kannan, and K. Ramkumar, shall each be paid a supplementary allowance of Rs. 596,037 per month as compared to Rs. 480,000 per month; and Rajiv Sabharwal, shall be paid a supplementary allowance of Rs. 576,713 per month as compared to Rs. 465,000 per month effective April 1, 2012, subject to the approval of the Reserve Bank of India and our shareholders. The shareholders have approved the revision in supplementary allowance at the annual general meeting held on June 25, 2012.

In line with the staff loan policy applicable to specified grades of employees who fulfill prescribed eligibility criteria to avail loans for purchase of residential property, the executive directors are also eligible for housing loans subject to the approval of the Reserve Bank of India.

There are no service contracts with our executive directors providing for benefits upon termination of their employment.

The total compensation paid by ICICI Bank to its executive directors and executive officers, i.e., to Ms. Chanda Kochhar, Mr. N. S. Kannan, Mr. K. Ramkumar, Mr. Rajiv Sabharwal, Mr. Vijay Chandok, Ms. Zarin Daruwala and Mr. Pravir Vohra, during fiscal 2012 was Rs. 180 million.

Bonus

Each year, our Board of Directors awards discretionary bonuses to employees and executive directors on the basis of performance and seniority. The performance of each employee is evaluated through a performance management appraisal system. The aggregate amount of bonuses to all eligible employees and executive directors of ICICI Bank for fiscal 2012 was Rs. 3.8 billion. This amount was paid in fiscal 2013, excluding the payment of bonuses to executive directors which is subject to the approval of the Reserve Bank of India.

Employee Stock Option Scheme

ICICI Bank has an employee stock option scheme to encourage and retain high-performing employees. Pursuant to the stock option scheme as amended by the Scheme of Amalgamation in relation to the merger of ICICI Limited and ICICI Bank Limited and further amended in September 2004, up to 5.0% of the aggregate of issued equity shares at the time of the grant of stock options could be allocated under the employee stock option scheme. At March 31, 2012 against the limit of 5.0% of issued shares, equivalent to 57.6 million shares, we had granted about 57.1 million shares under the employee stock option scheme. Since we had not sought an increase in the option pool since inception of the employee stock option scheme in 2000, we proposed to increase the limit of stock option grants from 5.0% to 10.0% of issued shares at the time of grant of stock options, with a view to be able to continue linking our reward structure to the performance of the organization. In June 2012, our shareholders approved the amendment of our employee stock option scheme thereby increasing the limit of grant of stock options to 10.0% of our issued shares at the time of grant. Permanent employees and directors of ICICI Bank, its subsidiaries and its holding company are eligible employees for grants of stock options. ICICI Bank has no holding company. The maximum number of options granted to any eligible employee in a year is restricted to 0.05% of the Bank's issued equity shares at the time of the grant.

Under the stock option scheme, eligible employees are entitled to apply for equity shares. Options granted for fiscal 2003 and earlier years vested in a graded manner over a three-year period, with 20%, 30% and 50% of the grants vesting in each year commencing from the end of 12 months from the date of grant. Options granted from fiscal 2004 vest in a graded manner over a four-year period, with 20%, 20%, 30% and 30% of the grants vesting in each year commencing from the end of 12 months from the date of grant.

Options granted in April 2009 vest in a graded manner over a five year period with 20%, 20%, 30% and 30% of grant vesting each year, commencing from the end of 24 months from the date of grant. Options approved in October 2010 and granted in February 2011 would vest 50% on April 30, 2014 and the remaining 50% would vest on April 30, 2015. Options granted in September 2011 vest in a graded manner over a five year period with 15%, 20%, 20% and 45% of the grant vesting in each year, commencing from the end of 24 months from the date of grant.

Options can be exercised within ten years from the date of grant or five years from the date of vesting, whichever is later. The exercise price for options granted prior to June 30, 2003 is equal to the market price of our equity shares on the date of grant on the stock exchange, which recorded the highest trading volume on the date of grant. On June 30, 2003, the Securities and Exchange Board of India revised its guidelines on employee stock options. While the revised guidelines provided that companies were free to determine the exercise price of stock options granted by them, they prescribed accounting rules and other disclosures, including expensing of stock options in the income statement, which are applicable to their Indian GAAP financial statements, in the event the exercise price was not equal to the average of the high and low market price of the equity shares in the two week period preceding the date of grant of the options, on the stock exchange which recorded the highest trading volume during the two week period. Effective July 22, 2004, the Securities and Exchange Board of India revised this basis of pricing to the latest available closing price, prior to the date of the meeting of the Board of Directors, in which options are granted, on the stock exchange which recorded the highest trading volume on that date. The exercise price for options granted by ICICI Bank on or after June 30, 2003, but before July 22, 2004 is equal to the average of the high and low market price of the equity shares in

the two week period preceding the date of grant of the options, on the stock exchange which recorded the highest trading volume during the two week period. The exercise price of options granted before June 30, 2003 and on or after July 22, 2004 (other than the options approved by the Board at its meeting held on October 29, 2010, where the grant price was the average closing price of the equity shares on the stock exchange during the six months up to October 28, 2010) is equal to the closing price on the stock

exchange which recorded the highest trading volume preceding the date of grant of options. Options granted in February 2011 were granted at an exercise price which was approximately 3.0% below the closing price preceding the date of grant of options. The difference between the closing price and the exercise price has been accounted for as an expense over the vesting period of the options.

The following table sets forth certain information regarding the stock option grants ICICI Bank has made under its employee stock option scheme. ICICI Bank granted all of these stock options at no cost to its employees. ICICI Bank has not granted any stock options to its non-executive directors.

Date of grant	Number of options granted	Exercise price	
		Rs.	US\$
February 21, 2000	1,713,000	171.90	3.38
April 26, 2001	1,580,200	170.00	3.34
March 27, 2002	3,155,000	120.35	2.36
April 25, 2003	7,338,300	132.05	2.59
July 25, 2003	147,500	157.03	3.09
October 31, 2003	6,000	222.40	4.37

September 16, 2011	30,000	876.20	17.22
October 31, 2011	3,000	933.35	18.34
April 27, 2012(1)	4,392,200	841.45	16.53

(1) Options granted on April 27, 2012, include options granted to executive directors, which are subject to the approval of the Reserve Bank of India.

ICICI also had an employee stock option scheme for its directors and employees and the directors and employees of its subsidiary companies, the terms of which were substantially similar to the employee stock option scheme of ICICI Bank. The following table sets forth certain information regarding the stock option grants made by ICICI under its employee stock option scheme prior to the merger. ICICI had not granted any stock options to its non-executive directors.

217

Date of grant	Number of options granted	Exercise price	
		Rs.	US\$
August 3, 1999	2,323,750	85.55	1.68
April 28, 2000	2,902,500	133.40	2.62
November 14, 2000	20,000	82.90	1.63
May 3, 2001	3,145,000	82.00	1.61
August 13, 2001	60,000	52.50	1.03
March 27, 2002	6,473,700	60.25	1.18

(1) The exercise price is equal to the market price of ICICI's equity shares on the date of grant.

In accordance with the Scheme of Amalgamation, directors and employees of ICICI and its subsidiary companies received stock options in ICICI Bank equal to half the number of their outstanding unexercised stock options in ICICI. The exercise price for these options is equal to twice the exercise price for the ICICI stock options. All other terms and conditions of these options are similar to those applicable to ICICI Bank's stock options pursuant to its employee stock option scheme.

The following table sets forth certain information regarding the options granted by ICICI Bank (including options granted by ICICI adjusted in accordance with the Scheme of Amalgamation) at June 30, 2012.

Particulars	ICICI Bank
Options granted (net of lapsed)	56,813,321
Options vested	45,537,833
Options exercised	29,710,098
Options forfeited/lapsed	9,860,534
Extinguishment or modification of options	None
Amount realized by exercise of options	Rs. 7,236,805,781
Total number of options in force	27,103,223

ICICI Prudential Life Insurance Company has an Employee Stock Option Scheme, the terms of which allow up to 3.0% of its issued capital to be allocated to employee stock options. ICICI Prudential Life Insurance Company had 12,762,698 stock options outstanding (net of forfeited or lapsed options) at year-end fiscal 2012.

ICICI Lombard General Insurance Company has an Employee Stock Option Scheme, the terms of which allow up to 5.0% of its paid-up capital to be allocated to employee stock options. ICICI Lombard General Insurance Company had 8,713,800 employee stock options outstanding (net of forfeited or lapsed options) at year-end fiscal 2012.

Loans

ICICI Bank has internal rules for grant of loans to employees and executive directors to acquire certain assets such as property, vehicles and other consumer durables. ICICI Bank's loans to employees have been made at interest rates ranging from 2.5% to 3.5% per annum and are repayable over fixed periods of time. The loans are generally secured by the assets acquired by the employees. Pursuant to the Banking Regulation Act, ICICI Bank's non-executive directors are not eligible for any loans. At year-end fiscal 2012, outstanding loans to ICICI Bank's employees totaled Rs. 5.6 billion, compared to Rs. 5.9 billion at year-end fiscal 2011. This amount included loans to certain of ICICI Bank's directors and executive officers amounting to Rs. 6 million at year-end fiscal 2012, compared to Rs. 6 million

at year-end fiscal 2011, made on the same terms, including as to interest rates and collateral, as loans to other employees. Loans to the executive directors are made after approval by the Reserve Bank of India. See also “Operating and Financial Review and Prospects—Related Party Transactions”.

Gratuity

ICICI Bank pays gratuity to employees who retire or resign after a minimum prescribed period of continuous service and, in the case of employees at overseas locations, in accordance with the rules in force in the respective

countries. ICICI Bank makes contributions to gratuity funds for employees which are administered by the Life Insurance Corporation of India and ICICI Prudential Life Insurance Company Limited.

Actuarial valuation of the gratuity liability for all the above funds is determined by an actuary appointed by the Bank. Actuarial valuation of gratuity liability is determined based on certain assumptions regarding rate of interest, salary growth, mortality and staff attrition as per the projected unit credit method.

The accounts of the fund are audited by independent auditors. The total corpus of the fund at year-end fiscal 2012 based on its audited financial statements was Rs. 5,003 million compared to Rs. 5,238 million at year-end fiscal 2011.

Superannuation Fund

ICICI Bank contributes 15% of the total annual basic salary to a superannuation fund in respect of the employees to whom it applies. ICICI Bank's employees get an option on retirement or resignation to receive one-third or one-half, depending on the tenure of service, of the total balance as commutation and a monthly pension based on the remaining balance. In the event of the death of an employee, his or her beneficiary receives the remaining accumulated balance, if eligible. ICICI Bank also gives a cash option to its employees, allowing them to receive the amount that would otherwise be contributed by ICICI Bank in their monthly salary during their employment. From fiscal 2006, the superannuation fund is being administered by Life Insurance Corporation of India and ICICI Prudential Life Insurance Company Limited. Employees have the option to choose between the Life Insurance Corporation of India and ICICI Prudential Insurance Company Limited. The total corpus of the superannuation fund was Rs. 1,822 million at year-end fiscal 2012 compared to Rs. 1,651 million at year-end fiscal 2011.

Provident Fund

ICICI Bank is statutorily required to maintain a provident fund as part of its retirement benefits to its employees. There are separate provident funds for employees inducted from Bank of Madura, The Bank of Rajasthan, Sangli Bank and for other employees of ICICI Bank. These funds are managed by in-house trustees. Each employee contributes 12.0% of his or her basic salary (10.0% for clerks and sub-staff of Sangli Bank) and ICICI Bank contributes an equal amount to the funds. The investments of the funds are made according to rules prescribed by the government of India. The accounts of the funds are audited by independent auditors. The total corpuses of the funds for employees inducted from Bank of Madura, The Bank of Rajasthan, Sangli Bank and other employees of ICICI Bank at year-end fiscal 2012, based on their audited financial statements, amount to Rs. 906 million, Rs. 1,990 million, Rs. 810 million and Rs. 8,392 million respectively.

Pension Fund

The Bank provides for pension, a deferred retirement plan covering certain employees of the former Bank of Madura, Sangli Bank and Bank of Rajasthan. The plan provides for pension payments, including dearness relief, on a monthly basis to these employees on their retirement based on the respective employee's years of service with the Bank and applicable salary. For the former Bank of Madura, Sangli Bank and Bank of Rajasthan employees in service, separate pension funds are managed by the trust and the liability is funded as per actuarial valuation. The Bank purchases annuities from the Life Insurance Corporation of India and ICICI Prudential Life Insurance Company Limited as part of its master policies for payment of pension to retired employees of the former Bank of Madura, Sangli Bank and Bank of Rajasthan. Employees covered by the pension plan are not eligible for their employer's contribution under the provident fund plan. The corpus, based on audited financial statements, for Bank of Madura employees at year-end fiscal 2012 was Rs. 576 million (net of annuities amounting to Rs. 1,384 million) compared to Rs. 509 million (net of annuities amounting to Rs. 933 million) at year-end fiscal 2011. The corpus, based on audited financial statements, for The Bank of Rajasthan employees at year-end fiscal 2012 was Rs. 7,452 million (net of annuities amounting to Rs.

3,461 million) compared to Rs. 6,477 million (net of annuities amounting to Rs. Nil) at year-end fiscal 2011. The corpus, based on audited financial statements, for Sangli Bank employees was Rs. 1,261 million (net of annuities amounting to Rs. 1,765 million) at year-end fiscal 2012 compared to Rs. 1,251 million (net of annuities amounting to Rs. 1,245 million) at year-end fiscal 2011.

Interest of Management in Certain Transactions

Except as otherwise stated in this annual report, no amount or benefit has been paid or given to any of our directors or executive officers.

220

OVERVIEW OF THE INDIAN FINANCIAL SECTOR

Introduction

The Reserve Bank of India, the central banking and monetary authority of India, is the central regulatory and supervisory authority for the Indian financial system. A variety of financial intermediaries in the public and private sectors participate in India's financial sector, including the following:

- commercial banks;
- long-term lending institutions;
- non-bank finance companies, including housing finance companies;
- other specialized financial institutions, and state-level financial institutions;
- insurance companies; and
- mutual funds.

Until the early 1990s, the Indian financial system was strictly controlled. Interest rates were administered, formal and informal parameters governed asset allocation, and strict controls limited entry into and expansion within the financial sector. The Indian government's economic reform program, which began in 1991, encompassed the financial sector. The first phase of the reform process began with the implementation of the recommendations of the Committee on the Financial System, the Narasimham Committee I. The second phase of the reform process began in 1999. See "Banking Sector Reform—Committee on Banking Sector Reform (Narasimham Committee II)".

This discussion presents an overview of the role and activities of the Reserve Bank of India and of each of the major participants in the Indian financial system, with a focus on commercial banks. This is followed by a brief summary of the banking reform process along with the recommendations of various committees that have played a key role in the reform process. A brief discussion on the impact of the liberalization process on long-term lending institutions and commercial banks is then presented. Finally, reforms in the non-banking financial sector are briefly reviewed.

The Reserve Bank of India

The Reserve Bank of India, established in 1935, is the central banking and monetary authority in India. The Reserve Bank of India manages the country's money supply and foreign exchange and also serves as a bank for the government of India and for the country's commercial banks. In addition to these traditional central banking roles, the Reserve Bank of India undertakes certain developmental and promotional roles.

The Reserve Bank of India issued guidelines on exposure limits, income recognition, asset classification, provisioning for non-performing and restructured assets, investment valuation and capital adequacy for commercial banks, long-term lending institutions and non-bank finance companies. The Reserve Bank of India requires these institutions to furnish information relating to their businesses to it on a regular basis. For further discussion regarding the Reserve Bank of India's role as the regulatory and supervisory authority of India's financial system and its impact on us, see "Supervision and Regulation".

Commercial Banks

Commercial banks in India have traditionally focused on meeting the short-term financial needs of industry, trade and agriculture. In recent years they have also focused on increasing long-term financing to sectors like infrastructure. At December 31, 2011, there were 166 scheduled commercial banks in the country, with a network of 92,690 branches serving approximately Rs. 58.10 trillion in deposit accounts. Scheduled commercial banks are banks that are listed in the schedule of the Reserve Bank of India Act, 1934, and are further categorized as public sector banks, private sector banks and foreign banks. Scheduled commercial banks have a presence throughout

India, with approximately 62.5% of bank branches located in rural or semi-urban areas of the country. A large number of these branches belong to the public sector banks.

Public Sector Banks

Public sector banks make up the largest category in the Indian banking system. They include the State Bank of India and its five associate banks, 19 nationalized banks and 82 regional rural banks. Excluding the regional rural banks, the remaining public sector banks have 64,489 branches, and accounted for 73.7% of the outstanding gross bank credit and 74.0% of the aggregate deposits of the scheduled commercial banks at December 31, 2011. The public sector banks' large network of branches enables them to fund themselves out of low cost savings and current deposits. The State Bank of India is the largest bank in India in terms of total assets. At December 31, 2011, the State Bank of India and its five associate banks had 18,336 branches. They accounted for 21.9% of aggregate deposits and 22.5% of outstanding gross bank credit of all scheduled commercial banks.

Regional rural banks were established from 1976 to 1987 by the central government, state governments and sponsoring commercial banks jointly with a view to develop the rural economy. Regional rural banks provide credit to small farmers, artisans, small entrepreneurs and agricultural laborers. The National Bank for Agriculture and Rural Development is responsible for supervising the functions of the regional rural banks. In 1986 the Kelkar Committee made comprehensive recommendations covering both the organizational and operational aspects of regional rural banks, several of which were adopted as amendments to the Regional Rural Banking Act, 1976. As part of a comprehensive restructuring program, re-capitalization of the regional rural banks was initiated in fiscal 1995, a process which continued until fiscal 2000 and covered 187 regional rural banks with aggregate financial support of Rs. 21.9 billion from the stakeholders. Simultaneously, prudential norms on income recognition, asset classification and provisioning for loan losses following customary banking benchmarks were introduced.

Currently there are 82 regional rural banks and at December 31, 2011 they had 15,838 branches, and accounted for 2.9% of aggregate deposits and 2.5% of gross bank credit outstanding of scheduled commercial banks.

Private Sector Banks

After the first phase of bank nationalization was completed in 1969, public sector banks made up the largest portion of Indian banking. The focus on public sector banks was maintained throughout the 1970s and 1980s. In addition, existing private sector banks that showed signs of an eventual default were merged with state-owned banks. In July 1993, as part of the banking reform process and as a measure to induce competition in the banking sector, the Reserve Bank of India permitted entry of the private sector into the banking system. This resulted in the introduction of private sector banks, including us. These banks are collectively known as the "new" private sector banks. At year-end fiscal 2012, there were seven "new" private sector banks. In addition, 14 old private sector banks existing prior to July 1993 were operating. The Sangli Bank Limited, an unlisted "old" private sector bank merged with us, effective April 19, 2007. The Centurion Bank of Punjab merged with HDFC Bank in May 2008. The Bank of Rajasthan Limited, an old private sector bank, merged with us with effect from the close of business on August 12, 2010.

At December 31, 2011, private sector banks accounted for approximately 18.7% of aggregate deposits and 18.6% of gross bank credit outstanding of the scheduled commercial banks. Their network of 12,061 branches accounted for 13.0% of the total branch network of scheduled commercial banks in the country.

In August 2011, the Reserve Bank of India issued draft guidelines on the entry of new banks in the private sector, specifying that select entities in the private sector with a successful track record of at least ten years and not receiving over 10% of income from real estate, construction and/or broking activities would be eligible to promote banks. The minimum capital requirement for these entities is Rs. 5.0 billion, with foreign shareholding not exceeding 49.0% for

the first five years. The new banks can be set up only through a wholly owned non-operative holding company registered with the Reserve Bank of India.

Foreign Banks

There are over 36 foreign banks operating in India and at December 31, 2011, foreign banks had 302 branches in India. Foreign banks accounted for 4.5% of aggregate deposits and 5.2% of outstanding gross bank credit of scheduled commercial banks. As part of the liberalization process, the Reserve Bank of India has permitted foreign banks to operate more freely, subject to requirements largely similar to those imposed on domestic banks. The primary activity of most foreign banks in India has been in the corporate segment. However, some of the larger foreign banks have made retail banking a significant part of their portfolios. Most foreign banks operate in India through branches of the parent bank. Certain foreign banks also have wholly-owned non-bank finance company subsidiaries or joint ventures for both corporate and retail lending. In a circular dated July 6, 2004, the Reserve Bank of India stipulated that banks should not acquire any fresh stake in another banks' equity shares, if by such acquisition, the investing bank's holding exceeded 5.0% of the investee bank's equity capital. This also applies to holdings of foreign banks with a presence in India, in Indian banks. The Reserve Bank of India issued a notification on "Roadmap for presence of foreign banks in India" on February 28, 2005, announcing the following measures with respect to the presence of foreign banks:

- During the first phase (up to March 2009), foreign banks were allowed to establish a presence by setting up wholly-owned subsidiaries or by converting existing branches into wholly-owned subsidiaries.
- In addition, during the first phase, foreign banks were allowed to acquire a controlling stake in a phased manner only in private sector banks that are identified by the Reserve Bank of India for restructuring.
- For new and existing foreign banks, it has been proposed to go beyond the existing World Trade Organization commitment of allowing increases of 12 branches per year. A more liberal policy will be followed for areas with a small number of banks.
- During the second phase (scheduled to be from April 2009 onwards), after a review of the first phase, foreign banks would be allowed to acquire up to 74.0% in private sector banks in India.

In April 2009, in light of the deterioration in the global financial markets, the Reserve Bank of India decided to put on hold the second phase until there was greater clarity over the economic recovery as well as the reformed global regulatory and supervisory architecture. In January 2011, the Reserve Bank of India released a draft discussion paper on the type of presence foreign banks should have in India. The paper indicates a preference for a wholly-owned subsidiary model of presence over a branch model. Other recommendations of the discussion paper include requiring systemically important foreign banks to convert their Indian operations into wholly-owned subsidiaries, a less restrictive branch expansion policy for such converted subsidiaries, lower priority sector targets as compared to domestic banks and regulations of Indian banks with respect to investments in subsidiaries and associates.

Co-operative Banks

Co-operative banks cater to the financing needs of agriculture, small industry and self-employed businessmen in urban and semi-urban areas of India. The state land development banks and the primary land development banks provide long-term credit for agriculture. In light of the liquidity and insolvency problems experienced by some cooperative banks in fiscal 2001, the Reserve Bank of India undertook several interim measures, pending formal legislative changes, including measures related to lending against shares, borrowings in the call market and term deposits placed with other urban co-operative banks. Presently, the Reserve Bank of India is responsible for the supervision and regulation of urban co-operative banks, and the National Bank for Agriculture and Rural Development for state co-operative banks and district central cooperative banks. The Banking Regulation (Amendment) and Miscellaneous Provisions Act, 2004 provides for the regulation of all co-operative banks by the Reserve Bank of India. See also "—Recent Structural Reforms—Proposed Amendments to the Banking Regulation Act".

A task force appointed by the government of India to examine the reforms required in the co-operative banking system submitted its report in December 2004. It recommended several structural, regulatory and operational reforms for co-operative banks, including the provision of financial assistance by the government for revitalizing

223

this sector. In the Indian government's budget for fiscal 2006, the Finance Minister accepted the recommendations of the Task Force in principle and proposed to call state governments for consultation and begin to implement the recommendations in the states willing to do so. During fiscal 2006 the Reserve Bank of India outlined a medium term framework for urban co-operative banks. Subsequently a task force for urban co-operative banks has been set up in select states to identify and establish an action plan with a specific timeframe for reviving potentially viable urban co-operative banks and for ensuring the non-disruptive exit of non-viable urban co-operative banks.

Long-Term Lending Institutions

The long-term lending institutions were established to provide medium-term and long-term financial assistance to various industries for setting up new projects and for the expansion and modernization of existing facilities. These institutions provided fund-based and non-fund-based assistance to industries in the form of loans, underwriting, direct subscription to shares, debentures and guarantees. The primary long-term lending institutions included Industrial Development Bank of India (now a bank), IFCI Limited, and the Industrial Investment Bank of India, as well as ICICI prior to the merger.

The long-term lending institutions were expected to play a critical role in Indian industrial growth and, accordingly, had access to concessional government funding. However, in recent years, the operating environment of the long-term lending institutions has changed substantially. Although the initial role of these institutions was largely limited to providing a channel for government funding to industries, the reform process required such institutions to expand the scope of their business activities, including into:

- fee-based activities like investment banking and advisory services; and
- short-term lending activities, including making corporate finance and working capital loans.

Pursuant to the recommendations of the Narasimham Committee II and the Khan Working Group, a working group created in 1999 to harmonize the role and operations of long-term lending institutions and banks, the Reserve Bank of India, in its mid-term review of monetary and credit policy for fiscal 2000, announced that long-term lending institutions would have the option of transforming themselves into banks subject to compliance with the prudential norms as applicable to banks. In April 2001, the Reserve Bank of India issued guidelines on several operational and regulatory issues, which needed to be addressed, and laid down a path for how long-term lending institutions can transition into universal banks. See “—Recent Structural Reforms—Universal Banking Guidelines”. In April 2002, ICICI merged with ICICI Bank. The Industrial Development Bank (Transfer of Undertaking and Repeal) Act, 2003 converted the Industrial Development Bank of India into a banking company incorporated under the Companies Act, 1956 on September 27, 2004, with exemptions from certain statutory and regulatory norms applicable to banks, including an exemption for a certain period from the statutory liquidity ratio. IDBI Bank Limited, a new private sector bank that was a subsidiary of the Industrial Development Bank of India, was merged with the Industrial Development Bank of India in April 2005. The long-term funding needs of Indian companies are met primarily by banks, Life Insurance Corporation of India and specialized non-bank finance companies. Indian companies also make bond issuances to institutional and retail investors.

Non-Bank Finance Companies

There were about 12,409 non-bank finance companies in India as of June 30, 2011, mostly in the private sector. All non-bank finance companies are required to register with the Reserve Bank of India. The non-bank finance companies may be categorized into entities that take public deposits and those that do not. The companies that take public deposits are subject to strict supervision and capital adequacy requirements of the Reserve Bank of India. The Reserve Bank of India classifies non-bank financial companies in five categories—asset finance companies, loan companies,

investment companies, infrastructure companies and microfinance companies. In February 2010, the Reserve Bank of India introduced a fourth category of non-banking finance companies called infrastructure finance companies. In December 2011, the Reserve Bank of India announced yet another category—microfinance institutions. ICICI Securities Limited, our subsidiary, is a non-banking finance company that does not accept public deposits, and ICICI Home Finance Company, our subsidiary, is a non-banking finance company that accepts public deposits. The primary activities of the non-bank finance companies are consumer credit (including automobile

finance), home finance and consumer durable products finance, wholesale finance products such as bill discounting for small and medium companies), and infrastructure finance, and fee-based services, such as investment banking and underwriting. In 2003, Kotak Mahindra Finance Limited, a large non-bank finance company, was granted a banking license by the Reserve Bank of India and converted itself into Kotak Mahindra Bank. Certain non-bank finance companies have defaulted on their obligations to investors and depositors in the past. As a result, several actions (including bankruptcy proceedings) have been initiated against these companies; many of these actions are currently pending. See also “Reforms of the Non-Bank Finance Companies”.

The Reserve Bank of India issues guidelines on the financial regulation of systemically important non-banking finance companies and banks’ relationship with them in order to remove the possibility of regulatory arbitrage leading to an uneven playing field and potential systemic risk. Within non-deposit taking non-banking finance companies, the guidelines classify those with an asset size above Rs. 1.0 billion as per the last audited balance sheet as systemically important. These non-banking finance companies are required to maintain a minimum capital to risk-weighted assets ratio of 15.0%, in addition to conforming to single and group exposure norms. The Reserve Bank of India also issues draft guidelines covering non-deposit taking non-banking finance companies, wherein non-deposit taking non-banking finance companies with an asset size of Rs. 1.0 billion and above must maintain a capital to risk weighted assets ratio of 15.0%.

For the purpose of enhancing the flow of funds to infrastructure projects, the Reserve Bank of India issued guidelines in November 2011 for the establishment of Infrastructure Debt Funds in the form of mutual funds or non-bank finance companies. We are planning to establish an infrastructure debt fund, structured as a non-bank finance company in partnership with other banks and financial institutions. Our shareholding in this company would be 31%.

In August 2011, the Reserve Bank of India released a working group report on issues and concerns in the non-bank finance companies sector. Some key recommendations of the group included a minimum asset size of Rs. 500 million with a minimum net owned fund of Rs. 20 million for registering as a non-bank finance company, a minimum Tier I capital of 12% to be achieved in three years, introduction of liquidity ratios, more stringent asset classification norms and provisioning norms and limits on exposure to real estate. The Reserve Bank of India, in its Annual Review of Monetary Policy for fiscal 2013, indicated that draft guidelines on the regulatory framework for non-bank finance companies would be released in 2012.

Housing Finance Companies

Housing finance companies form a distinct sub-group of the non-bank finance companies. As a result of the various incentives given by the government for investing in the housing sector in recent years, the scope of this business has grown substantially. Housing Development Finance Corporation Limited is a leading provider of housing finance in India. In recent years, several other players, including banks, have entered the housing finance industry. We also have a housing finance subsidiary, ICICI Home Finance Company. The National Housing Bank and the Housing and Urban Development Corporation Limited are the two major financial institutions instituted through acts of Parliament to improve the availability of housing finance in India. The National Housing Bank Act provides for securitization of housing loans, foreclosure of mortgages and setting up of the Mortgage Credit Guarantee Scheme.

Other Financial Institutions

Specialized Financial Institutions

In addition to the long-term lending institutions, there are various specialized financial institutions which cater to the specific needs of different sectors. These include the National Bank for Agricultural and Rural Development, Export Import Bank of India, Small Industries Development Bank of India, Risk Capital and Technology Finance

Corporation Limited, Tourism Finance Corporation of India Limited, National Housing Bank, Power Finance Corporation Limited, Infrastructure Development Finance Corporation Limited and India Infrastructure Finance Company.

225

State Level Financial Institutions

State financial corporations operate at the state level and form an integral part of the institutional financing system. State financial corporations were set up to finance and promote small and medium-sized enterprises. The state financial institutions are expected to achieve balanced regional socio-economic growth by generating employment opportunities and widening the ownership base of industry. At the state level, there are also state industrial development corporations, which provide finance primarily to medium-sized and large enterprises.

Insurance Companies

Currently, there are 48 insurance companies in India, of which 24 are life insurance companies and 24 are general insurance companies. Of the 24 life insurance companies, 23 are in the private sector and one is in the public sector. Among the general insurance companies, 18 are in the private sector and six (including the Export Credit Guarantee Corporation of India Limited and the Agriculture Insurance Company of India Limited) are in the public sector. The re-insurance company, General Insurance Corporation of India, is in the public sector. Life Insurance Corporation of India, General Insurance Corporation of India and public sector general insurance companies also provide long-term financial assistance to the industrial sector.

The insurance sector in India is regulated by the Insurance Regulatory and Development Authority. In December 1999, the Indian Parliament passed the Insurance Regulatory and Development Authority Act, 1999, which also amended the Insurance Act, 1938. This opened up the Indian insurance sector for foreign and private investors. The Insurance Act allows foreign equity participation in new insurance companies of up to 26.0%. A new company should have minimum paid up equity capital of Rs. 1.0 billion to carry on the business of life insurance or general insurance. A new company should have minimum paid up equity capital of Rs. 2.0 billion to carry on exclusively the business of reinsurance.

In the monetary and credit policy for fiscal 2001, the Reserve Bank of India issued guidelines governing the entry of banks and financial institutions into the insurance business. The guidelines permit banks and financial institutions to enter the business of insurance underwriting through joint ventures provided they meet stipulated criteria relating to their net worth, capital adequacy ratio, profitability track record, level of non-performing loans and the performance of their existing subsidiary companies. The promoters of insurance companies have to divest in a phased manner their shareholding in excess of 26.0% (or such other percentage as may be prescribed), after a period of ten years from the date of commencement of business or within such period as may be prescribed by the Indian government.

During fiscal 2012, the new business weighted individual premium underwritten by the life insurance sector decreased by 4.8% to Rs. 479.4 billion compared to Rs. 503.7 billion during fiscal 2011. Of the above, the share of the private sector decreased from 45.7% during fiscal 2011 to 36.5% during fiscal 2012. The gross premium underwritten in the general insurance sector amounted to Rs. 547.6 billion during fiscal 2012 as against Rs. 445.3 billion during fiscal 2011, recording a year-on-year growth of 23.0% (excluding the Export Credit Guarantee Corporation of India Limited and the Agriculture Insurance Company of India Limited). The share of the private sector increased from 43.5% in fiscal 2011 to 44.2% in fiscal 2012.

The life insurance sector grew by 30.7% on a new business weighted individual premium basis in fiscal 2008, but subsequently moderated due to changes in unit linked insurance products. Effective September 2010, the Insurance Regulatory and Development Authority introduced revisions to the unit-linked insurance products such as an increase in the lock-in period from three years to five years, a minimum mortality cover, a cap on surrender and other charges and a minimum guaranteed return of 4.5% on pension annuity products. The minimum guaranteed return of 4.5% on pension products was applicable up to year-end fiscal 2011. From fiscal 2012 the guaranteed return is 50 basis points above the average reverse repo rate subject to a maximum of 6% and a minimum of 3%. On October 21, 2010, the

Insurance Regulatory and Development Authority stipulated that insurers would not be permitted to sell universal life insurance products until guidelines on the regulation of such products were finalized. In November 2010, the Insurance Regulatory and Development Authority issued the final guidelines on universal life insurance products. The guidelines state that universal life products will be known as variable insurance products. Variable insurance products are defined as non-linked life insurance products that provide a death benefit equal to the guaranteed sum assured plus the balance in the policy account and a maturity benefit equal to the

balance in the policy account together with a terminal bonus, if any, as applicable. Such products will only provide mortality coverage, and no other contingency will be covered. The sum assured shall be at least ten times the annualized premium. The minimum policy and premium payment term will be five years and there will be a lock-in period of three years. The products must have a guaranteed interest rate, referred to as the minimum floor rate. These changes have impacted the life insurance business in India, resulting in changes in product offerings and lower margins.

In the general insurance sector, gross premiums underwritten by general insurance companies moderated in fiscal 2008 and fiscal 2009 owing to de-tariffing of the general insurance sector. Until January 1, 2007, almost 70.0% of the general insurance market was subject to price controls under a tariff regime. With the commencement of a tariff-free regime effective January 1, 2007, the resultant competitive pricing led to a significant decrease in premium rates across the industry leading to moderate premium growth during fiscal 2009 and fiscal 2010. During fiscal 2012, industry premium grew by 23% as compared to an increase of 23.5% in fiscal 2011 and an increase of 15.6% in fiscal 2010. In March 2011, the Insurance Regulatory and Development Authority conducted an audit of the Indian Motor Third Party Insurance Pool and concluded that the pool reserves needed to be enhanced significantly. Accordingly, all general insurance companies were required to provide for third party motor pool losses at a rate of 153.0% from fiscal 2008 to 2011, compared to the earlier loss rate of 122-127%. In fiscal 2012, the Insurance Regulatory and Development Authority directed the dismantling of the Pool and advised the general insurance companies to recognize the Pool liabilities using the loss ratios estimated by the General Actuaries Department of the United Kingdom; i.e., 159.0%, 188.0%, 200.0%, 213.0% and 145.0% respectively for underwriting years from fiscal 2008 to fiscal 2012. Further, the Insurance Regulatory and Development Authority directed all insurers that liability related to the Pool for fiscal 2008 and fiscal 2009 be accounted for and recognized in full in fiscal 2012. With respect to liabilities pertaining to fiscal 2010 to fiscal 2012, the liabilities could be recognized in fiscal 2012, although general insurance companies were also provide with the option to recognize the liability over a three year period.

The Insurance Regulatory and Development Authority ordered the dismantling of the Pool with effect from March 31, 2012 and set up a framework for the Indian Motor Third Party Declined Risk Insurance Pool (the “Declined Risk Pool”) for commercial vehicles. The Declined Risk Pool is effective from April 1, 2012. Under Declined Risk Pool approach, insurers will cede to the Declined Risk Pool only the policies that they would not consider underwriting themselves. Insurers have been instructed to underwrite motor pool policies to the extent of the sum of 50% of their share in total gross premium and 50% share in total motor premium. Any shortfall against this requirement will be allocated to the insurers from the Declined Risk Pool. Additionally, as compared to the earlier Pool approach of ceding all third party premiums (including those related to comprehensive policies), under the Declined Risk Pool framework, only specific third party insurance premiums will be pooled. Accordingly, under this approach, the size of the Pool is expected to decline substantially and the allocation of losses to individual insurers will be based on their ability to meet the mandated targets. The Insurance Regulatory and Development Authority increased the premium of motor third party liability coverage paid by customers effective April 1, 2012 in order to give effect to the higher loss ratios. See also “Risk Factors—Risks Relating to Our Business— While our insurance businesses are becoming an increasingly important part of our business, there can be no assurance of their future rates of growth or level of profitability.” and “Business—Overview of Our Products and Services—Insurance”.

We have joint ventures in each of the life insurance and the general insurance sectors. Our life insurance joint venture, ICICI Prudential Life Insurance Company, is the largest private sector player in the life insurance sector in India in terms of new business retail weighted received premium. Our general insurance joint venture, ICICI Lombard General Insurance Company, is the largest private sector player in the general insurance sector in India in terms of gross written premium (excluding premium on the motor third party insurance pool).

Mutual Funds

Currently there are 44 mutual funds in India with assets under management at March 31, 2012 of Rs. 5,872.17 billion. Average assets under management of all mutual funds decreased by 5.1% to Rs. 6,647.9. billion at March 2012 from Rs. 7,005.4 billion at March 2011. From year 1963 to 1987, Unit Trust of India was the only mutual fund operating in the country. It was set up in 1963 at the initiative of the government and the Reserve Bank of India. From 1987 onwards, several other public sector mutual funds entered this sector. These mutual funds were

established by public sector banks, the Life Insurance Corporation of India and General Insurance Corporation of India. The mutual funds industry was opened up to the private sector in 1993. The industry is regulated by the Securities and Exchange Board of India (Mutual Fund) Regulation, 1996. Our asset management joint venture, ICICI Prudential Asset Management Company, was among the top three mutual funds in India in terms of average assets under management for the quarter ended March 2012, with an overall market share of about 10.3%.

To enhance marketability and access to mutual fund schemes, the Securities and Exchange Board of India in November 2009 permitted the use of stock exchange terminals to facilitate transactions in mutual fund schemes. As a result, mutual funds units can now be traded on recognized stock exchanges. In June 2009, the Securities and Exchange Board of India removed the entry load, up-front charges deducted by mutual funds, for all mutual fund schemes and required that the up-front commission to distributors should be paid by the investor to the distributor directly. In February 2010, the Securities and Exchange Board of India introduced guidelines for the valuation of money market and debt securities, with a view to ensuring that the value of money market and debt securities in the portfolio of mutual fund schemes reflect the current market scenario. The valuation guidelines were effective from August 1, 2010.

Impact of Liberalization on the Indian Financial Sector

Until 1991, the financial sector in India was heavily controlled and commercial banks and long-term lending institutions, the two dominant financial intermediaries, had mutually exclusive roles and objectives and operated in a largely stable environment, with little or no competition. Long-term lending institutions were focused on the achievement of the Indian government's various socio-economic objectives, including balanced industrial growth and employment creation, especially in areas requiring development. Long-term lending institutions were extended access to long-term funds at subsidized rates through loans and equity from the government of India and from funds guaranteed by the government of India originating from commercial banks in India and foreign currency resources originating from multilateral and bilateral agencies.

The focus of the commercial banks was primarily to mobilize household savings through demand and time deposits and to use these deposits to meet the short-term financial needs of borrowers in industry, trade and agriculture. In addition, the commercial banks provided a range of banking services to individuals and business entities.

However, since 1991, there have been comprehensive changes in the Indian financial system. Various financial sector reforms, implemented since 1991, have transformed the operating environment of banks and long-term lending institutions. In particular, the deregulation of interest rates, emergence of a liberalized domestic capital market, and entry of new private sector banks, along with the transformation of long-term lending institutions into banks, have progressively intensified competition among banks. The Reserve Bank of India permitted the transformation of long-term lending institutions into banks subject to compliance with the prudential standards applicable to banks.

Banking Sector Reform

Most large banks in India were nationalized in 1969 and thereafter were subject to a high degree of control until reform began in 1991. In addition to controlling interest rates and entry into the banking sector, these regulations also channeled lending into priority sectors. Banks were required to fund the public sector through the mandatory acquisition of low interest-bearing government securities or statutory liquidity ratio bonds to fulfill statutory liquidity requirements. As a result, in the banking sector, profitability was low, non-performing assets were comparatively high, capital adequacy was diminished, and operational flexibility was hindered. Reforms in the 1990s addressed a range of issues, including organizational issues, accounting practices, operating procedures, capital adequacy requirements, asset classification and provisioning, risk management and merger policies.

Recent Structural Reforms

Amendments to the Banking Regulation Act

The government promulgated an ordinance in 2007 enabling the Reserve Bank of India to specify the statutory liquidity ratio without any floor rate. The ordinance has subsequently been repealed and replaced by the Banking Regulation (Amendment) Act, 2007.

Amendments to the Reserve Bank of India Act

In May 2006, the Indian Parliament approved amendments to the Reserve Bank of India Act removing the floor rate of 3.0% for cash reserve ratio requirement, giving the Reserve Bank of India discretion to reduce the cash reserve ratio to less than 3.0%. The amendments also created a legal and regulatory framework for derivative instruments.

Amendments to Laws Governing Public Sector Banks

In 2006, the Indian Parliament amended the laws governing India's public sector banks permitting these banks to issue preference shares and make preferential allotments or private placements of equity. The amendments also authorize the Reserve Bank of India to prescribe 'fit and proper' criteria for directors of such banks and to permit the supersession of their boards and appointment of administrators in certain circumstances.

Proposed Amendments to the Banking Regulation Act

Legislation seeking to amend the Banking Regulation Act has been introduced in the Indian Parliament. As presently drafted, the main amendments propose to:

- permit all banking companies to issue preference shares that will not carry any voting rights;
- make prior approval by the Reserve Bank of India mandatory for the acquisition of more than 5.0% of a banking company's paid-up capital or voting rights by any individual or firm or group, and empower the Reserve Bank of India to impose conditions while granting approval for such acquisition;
 - empower the Reserve Bank of India, after consultations with the Central Government, to supersede the board of a private sector bank for a total period not exceeding twelve months, during which time the Reserve Bank of India will have the power to appoint an administrator to manage the bank;
- give the Reserve Bank of India the right to inspect affiliates of enterprises or banking entities (affiliates include subsidiaries, holding companies or any joint ventures of banks);
 - exempt bank-related mergers from the scrutiny of the Competition Commission of India; and
- remove the 10.0% limit on the maximum voting power exercisable by a shareholder in a banking company.

Insurance Laws (Amendment) Bill 2008

The Insurance Laws (Amendment) Bill 2008 was introduced in the Indian Parliament in 2008 and currently includes provisions to:

- raise the foreign investment limit in the insurance sector from 26.0% to 49.0%; and

- eliminate the requirement that Indian promoters of an insurance company reduce their stake to 26.0% after ten years.

Legislative Framework for Recovery of Debts due to Banks

In fiscal 2003, the Indian Parliament passed the Securitization and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002 (as amended, the “Securitization Act”). The Securitization Act provides that a secured creditor may, in respect of loans classified as non-performing in accordance with the Reserve Bank of India guidelines, give notice in writing to the borrower requiring it to discharge its liabilities within 60 days, failing which the secured creditor may take possession of the assets constituting the security for the loan, and exercise management rights in relation thereto, including the right to sell or otherwise dispose of the assets. The Securitization Act also provides for the setting up of asset reconstruction companies regulated by the Reserve Bank of India to acquire assets from banks and financial institutions. The Reserve Bank of India has issued guidelines for asset reconstruction companies in respect of their establishment, registration and licensing by the Reserve Bank of India, and operations. Asset Reconstruction Company (India) Limited, set up by us, Industrial Development Bank of India, State Bank of India and certain other banks and institutions, received registration from the Reserve Bank of India and commenced operation in August 2003. Foreign direct investment is now permitted in the equity capital of asset reconstruction companies and investment by Foreign Institutional Investors registered with the Securities and Exchange Board of India is permitted in security receipts issued by asset reconstruction companies, subject to certain conditions and restrictions.

Several petitions challenging the constitutional validity of the Securitization Act were filed before the Indian Supreme Court. The Supreme Court, in April 2004, upheld the constitutionality of the Securitization Act, other than the requirement originally included in the Act that the borrower deposit 75.0% of the dues with the debt recovery tribunal as a pre-condition for appeal by the borrower against the enforcement measures. In November 2004, the government of India issued an ordinance amending the Securitization Act. The Indian Parliament has subsequently passed this ordinance as an Act. This Act, as amended, now provides that a borrower may make an objection or representation to a secured creditor after a notice is issued by the secured creditor to the borrower under the Act demanding payment of dues. The secured creditor has to give reasons to the borrower for not accepting the objection or representation. The Act also introduces a deposit requirement for borrowers if they wish to appeal the decision of the debt recovery tribunal. Further, the Act permits a lender to take over the business of a borrower under the Securitization Act under certain circumstances (unlike the earlier provisions under which only assets could be taken over). See also “Supervision and Regulation—Regulations Relating to Sale of Assets to Asset Reconstruction Companies”.

Earlier, following the recommendations of the Narasimham Committee, the Recovery of Debts due to Banks and Financial Institutions Act, 1993 was enacted. This legislation provides for the establishment of a tribunal for speedy resolution of litigation and recovery of debts owed to banks or financial institutions. The Act creates tribunals before which the banks or the financial institutions can file a suit for recovery of the amounts due to them. However, if a scheme of reconstruction is pending before the Board for Industrial and Financial Reconstruction, under the Sick Industrial Companies (Special Provision) Act, 1985, no proceeding for recovery can be initiated or continued before the tribunals. This protection from creditor action ceases if the secured creditor takes action under the Securitization Act. While presenting its budget for fiscal 2002, the government of India announced measures for the setting up of more debt recovery tribunals and the eventual repeal of the Sick Industrial Companies (Special Provision) Act, 1985. To date, however, this Act has not been repealed.

Corporate Debt Restructuring Forum

The Reserve Bank of India has devised a corporate debt restructuring system to put in place an institutional mechanism for the restructuring of corporate debt. The objective of this framework is to ensure a timely and transparent mechanism for the restructuring of corporate debts of viable entities facing problems, outside the purview of the Board of Industrial and Financial Rehabilitation, debt recovery tribunals and other legal proceedings. In particular, this framework aims to preserve viable corporations that are affected by certain internal and external factors

and minimize the losses to the creditors and other stakeholders through an orderly and coordinated restructuring program. The corporate debt restructuring system is a non-statutory mechanism and a voluntary system based on debtor-creditor and inter-creditor agreements.

Pension Reforms

Currently, there are three categories of pension schemes in India: pension schemes for government employees, pension schemes for employees in the organized sector and voluntary pension schemes. In case of pension schemes for government employees, the government pays its employees a defined periodic benefit upon their retirement. Further, the contribution towards the pension scheme is funded solely by the government and not matched by a contribution from the employees. The Employees Provident Fund, established in 1952, is a mandatory program for employees of certain establishments. It is a contributory program that provides for periodic contributions of 10% to 12% of the basic salary by both the employer and the employees. The contribution is invested in prescribed securities and the accumulated balance in the fund (including the accretion thereto) is paid to the employee as a lump sum on retirement. Besides these, there are voluntary pension schemes administered by the government (the Public Provident Fund to which contribution may be made up to a maximum of Rs. 100,000 per year) or offered by insurance companies, where the contribution may be made on a voluntary basis. Such voluntary contributions are often driven by tax benefits offered under the scheme.

In 1998, the government commissioned the Old Age Social and Income Security project and nominated an expert committee to suggest changes to the existing policy framework. The committee submitted its report in January 2000, recommending a system for private sector management of pension funds to provide market-linked returns. It also recommended the establishment of a separate pension regulatory authority to regulate the pensions system. Subsequently, in the budget for fiscal 2001, the government announced that a high level committee would be formulated to design a contribution-based pension scheme for new government recruits. The government also requested that the Insurance Regulatory and Development Authority draw up a roadmap for implementing the Old Age Social and Income Security Report. The Insurance Regulatory and Development Authority submitted its report in October 2001. The report suggested that pension fund managers should constitute a separate legal entity to conduct their pension business. In August 2003, the government announced that it would be mandatory for its new employees (excluding defense personnel) to join a new defined contribution pension scheme where both the government and the employee would make monthly contributions of 10% of the employee's basic salary. The government also announced that a Pension Fund Development and Regulatory Authority would be set up to regulate the pension industry. The government constituted the interim Pension Fund Development and Regulatory Authority on October 11, 2003. In December 2003, the government announced that the new pension system would be applicable to all new recruits to Indian government service (excluding defense personnel) from January 1, 2004. Further, on December 30, 2004, the government promulgated an ordinance establishing the statutory regulatory body, Pension Fund Regulatory and Development Authority to undertake promotional, developmental and regulatory functions with respect to the pension sector. In March 2005, the government tabled the Pension Fund and Development Authority Bill in the Parliament. The Indian government's budget for fiscal 2006 recognized the opportunities for foreign direct investment in the pension sector and it has also announced that the government would issue guidelines for such investment. In 2009, the government extended the New Pension System to all citizens of India on a voluntary basis, effective from May 1, 2009. Private sector participation in managing pension assets was permitted for the first time in fiscal 2009, and six private sector companies have been issued licenses. See also "Business—Overview".

Credit Policy Measures

The Reserve Bank of India issues an annual policy statement setting out its monetary policy stance and announcing various regulatory measures. The Reserve Bank of India issues a review of the annual policy statement on a quarterly basis, as well as four mid-quarter reviews.

Credit Policy During Fiscal 2011

During fiscal 2011, the Reserve Bank of India's monetary policy stance was oriented towards the calibrated normalization of policy rates and liquidity management with a view to controlling inflation. The repo rate was increased seven times by 25 basis points each from 5.0% to 6.75%. The cash reserve ratio was increased by 25 basis points from 5.75% to 6.0% effective April 24, 2010. As a result of tight liquidity conditions prevailing from June 2010, the Reserve Bank of India reduced the statutory liquidity ratio from 25% to 24% effective December 18, 2010. Also, in November 2010, the Reserve Bank of India announced a temporary liquidity support measure of

an exemption of up to 2% in maintaining the statutory liquidity ratio. With a permanent reduction of 1% in the statutory liquidity ratio announced in December 2010, the Reserve Bank of India reduced the temporary exemption from 2% to 1%. Subsequently, in May 2011, the temporary exemption was fully withdrawn. The Reserve Bank of India also announced that it would conduct open market operation auctions of government securities.

Other regulatory measures announced in the monetary policy statements include the following:

- The loan-to-value ratio for housing loans was capped at 80%;
- The risk weight for residential housing loans of more than Rs. 7.5 million irrespective of the loan-to-value ratio was increased to 125%;
- Standard asset provisioning on home loans sanctioned at a comparatively lower interest rates in the first few years, after which rates are reset at higher rates, was increased from 0.4% to 2.0%.

Credit Policy During Fiscal 2012

During fiscal 2012, the Reserve Bank of India adjusted its monetary policy stance in line with economic growth and inflationary trends, tightening rates in the initial part of the fiscal and maintaining a pause in the latter half of the fiscal. The repo rate was increased by 175 basis points from 6.75% to 8.50%, with the last increase of 25 basis points announced on October 25, 2011. To improve monetary transmission in the system, the Reserve Bank of India established the repo rate as the single independent policy rate, with the reverse repo pegged at a fixed 100 basis points below the repo rate. Also, a new Marginal Standing Facility was introduced, where banks could borrow overnight up to 1% of their net demand and time liabilities, at 100 basis points above the repo rate. Following a slowdown of economic growth and inflation, the Reserve Bank of India, in its December 2011 mid-quarter monetary policy review, paused further tightening of policy rates. Further, during the fourth quarter of fiscal 2011, the Reserve Bank of India reduced the cash reserve ratio by 125 basis points from 6.0% to 4.75% in two stages — by first reducing the cash reserve ratio by 50 basis points in January 2012 and then by 75 basis points in March 2012.

Other regulatory measures announced in the monetary policy statements include the following:

- in May 2011, the savings bank deposit interest rate was increased from 3.5% to 4.0%. Further, in October 2011, interest rates on savings account deposits were deregulated;
- the provisioning requirement for advances classified as sub-standard was increased from 10% to 15%; for secured advances classified as doubtful for up to one year from 20% to 25%, and for those between one and three years from 30% to 40% of loans outstanding; and
- banks were allowed to open branches in Tier 2 centers without prior permission of the Reserve Bank of India.

Credit Policy During Fiscal 2013

In the Annual Policy Statement for fiscal 2013 announced on April 17, 2012, the Reserve Bank of India reduced the repo rate by 50 basis points from 8.5% to 8.0%. Accordingly, the reverse repo rate was adjusted to 7.0% and the marginal standing facility rate was adjusted to 9.0%. Also, to improve liquidity, the borrowing limit of scheduled commercial banks under the Marginal Standing Facility was increased from 1% to 2% of net demand and time liabilities. The cash reserve ratio was kept unchanged at 4.75%.

Other regulatory measures announced in the policy statement include the following:

- the levying of foreclosure charges/pre-payment penalties on home loans on a floating interest rate basis was disallowed; and
- a bank's exposure ceiling for a single non-banking finance company with gold loans that comprise up to 50.0% or more of its financial assets was reduced from 10.0% to 7.5% of a bank's capital funds.

In the mid-quarter review announced on June 29, 2012, the Reserve Bank of India did not make any changes to the policy rates. In its first quarter review on July 31, 2012, the Reserve Bank of India reduced the statutory liquidity ratio from 24.0% to 23.0% while keeping repo rates and the cash reserve ratio unchanged.

SUPERVISION AND REGULATION

The main legislation governing commercial banks in India is the Banking Regulation Act. The provisions of the Banking Regulation Act are in addition to and not, save as expressly provided in the Banking Regulation Act, in derogation of the Companies Act, 1956 and any other law currently in force. Other important laws include the Reserve Bank of India Act, the Negotiable Instruments Act, the Foreign Exchange Management Act and the Banker's Books Evidence Act. Additionally, the Reserve Bank of India, from time to time, issues guidelines to be followed by banks. Compliance with all regulatory requirements is evaluated with respect to financial statements under Indian GAAP. Banking companies in India are also subject to the purview of the Companies Act and if such companies are listed on a stock exchange in India, then various regulations of the Securities Exchange Board of India would additionally apply to such companies.

Reserve Bank of India Regulations

Commercial banks in India are required under the Banking Regulation Act to obtain a license from the Reserve Bank of India to carry on banking business in India. This license is subject to such conditions as the Reserve Bank of India may choose to impose. Before granting the license, the Reserve Bank of India must be satisfied that certain conditions are complied with, including, but not limited to, (i) that the bank has the ability to pay its present and future depositors in full as their claims accrue; (ii) that the affairs of the bank will not be or are not likely to be conducted in a manner detrimental to the interests of present or future depositors; (iii) that the bank has adequate capital and earnings prospects; and (iv) that the public interest will be served if such license is granted to the bank. The Reserve Bank of India can cancel the license if the bank, at any point, fails to meet the above conditions or if the bank ceases to carry on banking operations in India.

ICICI Bank, because it is licensed as a banking company, is regulated and supervised by the Reserve Bank of India. The Reserve Bank of India requires us to furnish statements and information relating to our business. It has issued, among others, guidelines for commercial banks on recognition of income, classification of assets, exposure norms on concentration risk, valuation of investments, maintenance of capital adequacy and provisioning for non-performing assets. The Reserve Bank of India has set up a Board for Financial Supervision, under the chairmanship of the Governor of the Reserve Bank of India. The appointment of the auditors of banks is subject to the approval of the Reserve Bank of India. The Reserve Bank of India can direct a special audit in the interest of the depositors or in the public interest.

Regulations Relating to the Opening of Branches and Automated Teller Machines

Section 23 of the Banking Regulation Act provides that banks must obtain the prior approval of the Reserve Bank of India to open new branches. The Reserve Bank of India may cancel a branch license for violations of the conditions under which the branch license is granted. Under the banking license granted to us by the Reserve Bank of India, we are required to locate at least 25.0% of our branches in rural and semi-urban areas. A rural area is defined as a center with a population of less than 10,000 according to the 2001 census. A semi-urban area is defined as a center with a population of greater than 10,000 but less than 100,000.

Permissions for new branches are granted on an annual basis based on factors such as the financial condition and history of the banking company, its management, adequacy of capital structure, and earning prospects and the public interest. The Reserve Bank of India discusses with individual banks their branch expansion strategies and plans over the medium term. The term "branch" for this purpose would include a full-fledged branch, an extension counter, off-site automated teller machines, administrative office, and back offices. While processing authorization requests, the Reserve Bank of India gives emphasis to the nature and scope of banking services, particularly in under-banked areas, credit flow to the priority sector and efforts to promote financial inclusion, the need to induce enhanced competition in

the banking sector, the bank's regulatory compliance, quality of governance, risk management, and relationships with subsidiaries and affiliates.

Branch openings in tier 2 to tier 6 centers (centers are assigned a tier in terms of population size as specified in the 2001 census) are exempt from the prior approval requirement. However, banks are required to report the opening of such branches to the Reserve Bank of India. Further, to strengthen the branch network in unbanked

rural areas, banks were mandated to allocate 25% of the total number of new branches opened during a year to unbanked rural areas, which are tier 5 and tier 6 centers. In fiscal 2011, banks were permitted to satisfy this requirement by operating well-protected vans as mobile branches and automated teller machines in tier 3 to tier 6 centers. In fiscal 2012, banks were permitted to install offsite automated teller machines without prior permission from the Reserve Bank of India. Seeking to expand the network of automated teller machines in the tier 3 to tier 6 centers, the Reserve Bank of India issued guidelines in June 2012 allowing non-banks to set up automated teller machines, also known as “white label” automated teller machines.

Capital Adequacy Requirements

We are currently required to comply with the capital adequacy guidelines of the Basel II framework as implemented by the Reserve Bank of India effective since fiscal 2008. Before that time, Basel I guidelines were applicable. The Reserve Bank of India guidelines for Basel II require banks to maintain a minimum capital to risk weighted asset ratio of 9.0% on an ongoing basis, of which a minimum of 6.0% must be tier I capital. The guidelines stipulate that investments above 30.0% in the paid up equity of financial subsidiaries and associates (including insurance companies) that are not consolidated for capital purposes and investments in other instruments eligible for regulatory capital status in those entities must be deducted to the extent of 50.0% from tier I capital and 50.0% from tier II capital. Banks are required to maintain capital adequacy based on the higher of the minimum capital required under Basel II or the prudential floor specified for the minimum capital required under Basel I. The prudential floor for Basel I for fiscal 2008 and fiscal 2009 was 100.0% and 90.0% respectively, and from fiscal 2010 onwards the floor was set at 80.0%, until further clarification.

The total capital of a bank is classified into tier I and tier II capital. Tier I capital provides the most permanent and readily available support against unexpected losses. As per the prudential guidelines issued by the Reserve Bank of India, it comprises paid-up equity capital, reserves consisting of any statutory reserves, other disclosed free reserves, capital reserves representing surplus arising out of sale proceeds of assets, innovative perpetual debt instruments, perpetual non-cumulative preference shares and any other type of instrument generally notified by the Reserve Bank of India from time to time for inclusion in tier I capital. Intangible assets and losses in the current period and those brought forward from previous periods are deducted from tier I capital. Any deferred tax asset is treated as an intangible asset and deducted from tier I capital. In July 2009, the Reserve Bank of India stipulated that the special reserve created by banks should be considered net of tax payable in the tier I capital. The Reserve Bank of India has issued guidelines permitting banks to issue, with its prior approval instruments denominated in rupees, perpetual debt with call options that are exercisable after not less than ten years and to include such debt in tier I capital, up to a maximum of 15.0% of total tier I capital. The claims of the investors in such perpetual debt instruments are: (i) superior to the claim of the investors in equity shares; and (ii) subordinated to the claims of all other creditors of the banks. Banks are permitted to issue such instruments denominated in a foreign currency without seeking the prior approval of the Reserve Bank of India, subject to compliance with the conditions that (i) perpetual debt instruments issued in foreign currency should comply with all terms and conditions as applicable to such instruments issued in Indian rupees; and (ii) not more than 49.0% of the eligible amount that can be raised by the banks through issue of the perpetual debt instruments can be denominated in a foreign currency.

Tier II capital includes undisclosed reserves, revaluation reserves (at a discount of 55.0% while determining their value for inclusion in tier II capital), general provisions and loss reserves (allowed up to a maximum of 1.25% of total risk weighted assets), subordinated debt capital instruments classified into upper tier II and lower tier II, and any other type of instrument generally notified by the Reserve Bank of India from time to time for inclusion in tier II capital. The total amount of tier II capital cannot exceed the total amount of tier I capital after all deductions.

Upper tier II capital comprises of instruments with an original maturity of a minimum of 15 years. Further, upper tier II capital instruments can be issued with a call option, which can be exercised by the bank only after the expiry of ten

years from the date of issue and with the prior approval of the Reserve Bank of India. The claims of investors in upper tier II capital debt instruments are: (i) superior to the claims of investors in instruments eligible for inclusion in tier I capital; and (ii) subordinated to the claims of all other creditors of the bank. Banks in India are also permitted to issue such debt instruments eligible for inclusion in upper tier

II capital in foreign currency without seeking the prior approval of the Reserve Bank of India, subject to compliance with the following conditions: (i) upper tier II debt instruments issued in foreign currency should comply with all terms and conditions applicable to instruments issued in Indian rupees; (ii) the total amount of upper tier II debt instruments issued in foreign currency shall not exceed 25.0% of the unimpaired tier I capital. This eligible amount is computed with reference to the amount of tier I capital as on March 31 of the previous financial year, after the necessary deductions; and (iii) the issue of upper tier II debt instruments will be in addition to the limits of foreign currency borrowings prescribed for banks by the Reserve Bank of India.

Lower tier II capital includes instruments with an original maturity of a minimum of five years. Further, lower tier II capital instruments can be issued with a call option, which can be exercised by the bank only after the expiry of five years from the date of issue and with the prior approval of the Reserve Bank of India. Commencing five years from maturity, any subordinated debt is subject to progressive discounting each year for inclusion in tier II capital. Lower tier II subordinated debt eligible for inclusion in tier II capital cannot exceed 50.0% of tier I capital after all deductions. The claims of the investors in lower tier II subordinated debt instruments are: (i) superior to the claims of investors in instruments eligible for inclusion in tier I capital as well as upper tier II capital; and (ii) subordinated to the claims of all other creditors of the bank. Such subordinated debt instruments eligible for inclusion in lower tier II capital may be issued in foreign currency only with the prior approval of the Reserve Bank of India. In October 2007, to enhance the range of eligible instruments available to banks for capital adequacy purposes, the Reserve Bank of India issued guidelines permitting banks to issue preference shares as part of regulatory capital. Banks have been allowed to issue perpetual non-cumulative preference shares as part of tier I capital and perpetual cumulative preference shares redeemable non-cumulative preference shares and redeemable cumulative preference shares as part of tier II capital. Further, the Indian Parliament amended the laws governing India's public sector banks, thus permitting these banks to issue preference shares and make preferential allotments or private placements of equity. Private sector banks in India are not permitted to issue preference shares. In September 2009, the Reserve Bank of India issued guidelines permitting banks to issue subordinated debt as lower tier II capital with call and step-up options. However, in January 2011, the Reserve Bank of India directed banks not to issue tier I or tier II capital instruments with step-up options so that these instruments qualify as regulatory capital under the new definitions stipulated by the Basel III framework formulated by the Basel Committee on Banking Supervision.

The Reserve Bank of India guidelines on Basel II are comprised of three pillars, which are: (i) Pillar 1 — minimum capital requirements for credit risk, market risk and operational risk; (ii) Pillar 2 — Supervisory Review Process; (iii) Pillar 3 — Market Discipline. Under Pillar 1, the Bank follows the Standardized Approach for the measurement of credit and market risks and the Basic Indicator Approach for the measurement of operational risk. In the measurement of risk-weighted assets on account of credit risk, degrees of credit risk expressed as a percentage weighting have been assigned to various balance sheet asset items and off-balance sheet items. The credit equivalent value of off-balance sheet items is determined by applying conversion factors to the notional amount of the off-balance sheet items. The value of each item is multiplied by the relevant risk weight (and conversion factor for off-balance sheet items) to produce risk-adjusted values of assets and off-balance sheet items. Consumer credit exposures attract a risk weight of 125.0% and exposures meeting the qualifying criteria of regulatory retail, defined by the Reserve Bank of India, attract a risk weight of 75.0%. Loans secured by residential property attract a differential risk weight ranging from 50.0% to 100.0% based on the size of the loan and the loan-to-value ratio, except for residential loans of Rs. 7.5 million and above, which attract a risk weight of 125%, irrespective of the loan-to-value ratio. Further, restructured housing loans are required to be risk weighted with an additional risk weight of 25.0%. Credit exposures to rated corporations other than specified categories such as commercial real estate, non-deposit taking systemically important non-banking finance companies, venture funds and capital markets, are risk weighted based on the external credit ratings at a facility level, with the risk weight ranging from 20% to 150% and unrated corporate exposures being risk weighted at 100%. Credit exposures to commercial real estate and non-deposit taking systemically important non-banking finance companies are risk weighted at 100.0%, exposures to capital markets are risk weighted at 125% and exposures to venture capital funds are risk weighted at 150.0%. Capital requirements for market risk are

applicable to the trading book exposure (including derivatives) and securities included in the available-for-sale category. Capital requirements for operational risk are computed based on a 15% of average of gross income for the previous three financial years.

The Reserve Bank of India has issued a timetable for the migration of Indian banks to the advanced approaches of the Basel II framework in India. As per the timelines set, banks intending to migrate to the Internal Models Approach for market risk and the standardized approach for operational risk are required to apply to the Reserve Bank of India after April 1, 2010. Banks intending to migrate to the Advanced Measurement Approach for operational risk and internal ratings based approaches for credit risk, are required to apply to the Reserve Bank of India after April 1, 2012. Additionally, in December 2011, the Reserve Bank of India issued guidelines on the internal ratings-based approach for calculation of capital charge for credit risks. Some of the recommendations include maintaining loss given default below 65% and treating restructured assets as non-performing assets for capital adequacy purposes. ICICI Bank is in the process of implementing various projects for migrating to the advanced approaches of Basel II.

Under the Pillar 2 norms, banks are required to develop and put in place, with the approval of their boards, an Internal Capital Adequacy Assessment Process commensurate with their size, level of complexity, risk profile and scope of operations. The Reserve Bank of India has also issued guidelines on stress testing to advise banks to put in place appropriate stress testing policies and frameworks, including “sensitivity tests” and “scenario tests”, for the various risk factors, the details and results of which are included in the Internal Capital Adequacy Assessment Process.

Under the Pillar 3 norms, banks must make a set of disclosures on their capital adequacy and risk management framework.

In order to strengthen the resilience of the banking sector to potential future shocks, together with ensuring adequate liquidity in the banking system, the Basel Committee on Banking Supervision issued consultative documents on capital and liquidity (also known as “Basel III” proposals) on December 17, 2009. Following a consultation phase on these proposals, the final set of Basel III rules was issued on December 16, 2010. The Basel Committee on Banking Supervision has stipulated a phased implementation of the Basel III framework between January 1, 2013 and January 1, 2019. See also “Operating and Financial Review and Prospects—Capital Resources—Impending regulatory developments associated with capital adequacy—Basel III”.

In May 2012, the Reserve Bank of India issued guidelines on the Basel III capital regulations. The guidelines require Indian banks to maintain a minimum common equity tier I capital ratio of 5.5% of risk weighted assets, a minimum tier I capital ratio of 7.0% of risk weighted assets and a minimum overall capital adequacy ratio of 9.0%. The guidelines also stipulate a capital conservation buffer of 2.5% of risk weighted assets comprised of common equity and a minimum tier I leverage ratio of 4.5%. The guidelines further require a “corresponding deduction approach” for investments in financial subsidiaries, which means that a deduction should be applied to the same component of capital for which the capital would qualify if it was issued by the bank itself. Implementation of the guidelines would begin from January 1, 2013 and it would be fully implemented by March 31, 2018. The guidelines also stipulate that non-equity tier I and tier II capital should have loss absorbency characteristics, which require them to be written down or converted into common equity at a pre-specified trigger event. Capital instruments that no longer qualify as non-common equity tier I or tier II capital will be phased out beginning January 1, 2013, with their recognition capped at 90% from January 1, 2013 and reduced by 10 percentage points in subsequent years. See also “Operating and Financial Review and Prospects—Capital Resources—Impending regulatory developments associated with capital adequacy—Basel III”.

Loan Loss Provisions and Non-Performing Assets

The Reserve Bank of India issued consolidated instructions and guidelines until June 30, 2012 relating to income recognition, asset classification and provisioning standards in the Master Circular - Prudential Norms on Income Recognition, Asset Classification and Provisioning pertaining to Advances dated July 1, 2012. These guidelines are revised from time to time. Similarly, the Reserve Bank of India consolidated all instructions and guidelines until June 30, 2012 relating to valuation of investments in Master Circular — Prudential Norms for Classification, Valuation and

Operation of Investment Portfolio by Banks dated July 1, 2012. These guidelines are also revised from time to time.

236

The principal features of the Reserve Bank of India guidelines, which have been implemented with respect to our loans, debentures, lease assets, hire purchases and bills in our Indian GAAP financial statements, are set forth below.

Asset Classification

A non-performing asset is an asset in respect of which any amount of interest or principal is overdue for more than 90 days. In particular, an advance is a non-performing asset where:

- interest and/or installment of principal remains overdue for a period of more than 90 days in respect of a term loan;
- the account remains “out-of-order” (as defined below) for a period of more than 90 days in respect of an overdraft or cash credit;
 - the bill remains overdue for a period of more than 90 days in case of bills purchased and discounted;
- installment of principal or interest remains overdue for two crop seasons for short duration crops or for one crop season for long duration crops;
- the amount of liquidity facility remains outstanding for more than 90 days, in respect of a securitization transaction undertaken in accordance with the Reserve Bank of India guidelines on securitization issued on February 1, 2006; or
- in respect of derivative transactions, the overdue receivables related to positive mark-to-market value of a derivative contract, if these remain unpaid for a period of 90 days from the specified due date for payment.

An account is treated as “out-of-order” if the outstanding balance remains continuously in excess of the approved drawing limit. In circumstances where the outstanding balance in the principal operating account is less than the approved drawing limit, but (i) there are no credits continuously for a period of 90 days as of the date of the balance sheet of the bank or (ii) the credits are not sufficient to cover the interest debited during the same period, these accounts are treated as “out-of-order”.

Interest in respect of non-performing assets is not recognized or credited to the income account unless collected.

Non-performing assets are classified as described below.

Sub-Standard Assets: Assets that are non-performing assets for a period not exceeding 12 months. In such cases, the current net worth of the borrower/guarantor or the current market value of the security charged is not enough to ensure recovery of dues to the banks in full. Such an asset has well-defined credit weaknesses that jeopardize the liquidation of the debt and are characterized by the distinct possibility that the bank will sustain some loss, if deficiencies are not corrected.

Doubtful Assets: Assets that are non-performing assets for more than 12 months. A loan classified as doubtful has all the weaknesses inherent in assets that are classified as sub-standard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently known facts, conditions and values, highly questionable and improbable.

Loss Assets: Assets on which losses have been identified by the bank or internal or external auditors or the Reserve Bank of India inspection but the amount has not been written off fully.

There are separate guidelines for classification of loans for projects under implementation which are based on the date of commencement of commercial production and date of completion of the project as originally envisaged at the time of financial closure.

Restructured Loans

The Reserve Bank of India also has separate guidelines for restructured loans. A fully secured standard loan can be restructured by rescheduling the principal repayment and/or the interest element, but must be separately disclosed as a restructured loan. The amount of diminution, if any, in the fair value of the loan, measured in present value terms, is either written off or provided for to the extent of the diminution involved. There are some categories of advances that are not eligible for classification as a standard asset upon restructuring. These include consumer and personal loans, advances classified as capital market exposures and commercial real estate exposures. Similar guidelines are applicable to sub-standard and doubtful assets. The sub-standard accounts that have been subjected to restructuring, whether in respect of principal installment or interest amount, by whatever modality, are eligible to be upgraded to the standard category only after the specified period, i.e., a period of one year after the date when first payment of interest or of principal, whichever is earlier, falls due, subject to satisfactory performance during the period. The Reserve Bank of India has specific sections concerning debt-restructuring mechanisms for small and medium enterprises in its guidelines on restructuring of loans by banks issued on August 27, 2008. In fiscal 2009, due to the extraordinary economic circumstances, modifications to guidelines on restructuring of loans covering all categories of loans were issued. The modified guidelines applied until June 30, 2009 and included measures such as allowing second restructurings of loan exposures, permitting restructuring of commercial real estate exposures, and disclosing in the annual report restructuring proposals received, implemented and under consideration during the year.

In October 2008, the Reserve Bank of India issued guidelines requiring banks to classify derivatives contract receivables overdue for ninety days or more as non-performing assets.

In March 2010, the Reserve Bank of India issued standards for the restructuring of advances for infrastructure and non-infrastructure projects classified as projects under implementation. With respect to infrastructure projects, a loan would be classified as non-performing if they fail to commence commercial operations within two years from the documented date of commencement, unless restructured during the period. With respect to non-infrastructure projects, a loan would be classified as non-performing if the projects fail to commence commercial operations within six months from the documented date of commencement, unless it has been restructured during the period. Any extension of the date of commencement for commercial operations would be treated as restructuring of the account. However, real estate projects do not have the benefit of an extension from the documented date of commencement and are classified as non-performing if the project does not commence by the specified date.

In July 2012, the Reserve Bank of India released the report of the working group, which recommended that over a period of time, restructured loans (other than in the infrastructure sector) should be classified as non-performing and the provisioning and capital adequacy requirements applicable to non-performing assets should be applied to such loans. The report also recommends a phased increase in the general provisioning requirement on restructured standard assets from the present level of 2.0% to 5.0%, prescribing a ceiling on the conversion of debt into preference/equity shares, increasing the amount of owner haircuts required in restructurings of large exposures and requiring enhanced restructuring disclosure requirements for banks.

To put in place an institutional mechanism for the restructuring of corporate debt, the Reserve Bank of India has devised a corporate debt restructuring system. See “Overview of the Indian Financial Sector—Recent Structural Reforms—Corporate Debt Restructuring Forum”.

Provisioning and Write-Offs

Provisions under Indian GAAP are based on guidelines specific to the classification of the assets. The following guidelines apply to the various asset classifications:

- Standard Assets: A general provision of 0.40% is required, except in the case of direct advances to the agricultural and small and medium enterprise sectors, for which a provision of 0.25% applies. On November 5, 2009, the Reserve Bank of India increased general provisioning requirements for advances to commercial real estate classified as standard assets from 0.40% to 1.00%. From December 2010, the standard asset provisioning requirement was increased to 2.0% on housing loans, where such

loans are made at comparatively lower interest rates for the first year of the loan, after which the rates are reset at higher rates. In May 2011, the Reserve Bank of India increased the provision for restructured non-performing advances that are upgraded to standard assets from 0.25-1.0% to 2.0% in the first year of upgradation.

- **Sub-Standard Assets:** A general provision of 15.0% of the total outstanding is required with effect from May 2011. This was an increase over the earlier requirement of 10.0% through fiscal 2011. However, unsecured exposures, which are identified as sub-standard, attract an additional provision of 10.0%, i.e., a total of 25.0% on the outstanding balance.
- **Doubtful Assets:** A 100.0% provision/write-off is required against the unsecured portion of the doubtful asset and charged against income. With effect from fiscal 2012, for the secured portion of assets classified as doubtful, 25.0% provision is required to be made for assets that have been classified as doubtful for a year (20% through fiscal 2011), 40.0% for assets that have been classified as doubtful for one to three years (30% through fiscal 2011) and 100.0% assets classified as doubtful for more than three years. The value assigned to the collateral securing a loan is the amount reflected on the borrower's books or the realizable value determined by third party appraisers.
 - **Loss Assets:** The entire asset is required to be written off or provided for.
- **Restructured Loans:** Until August 2008, a provision equal to the difference between the present value of the future interest as per the original loan agreement and the present value of future interest on the basis of rescheduled terms at the time of restructuring was required to be made. For loans restructured after August 2008, a provision equal to the difference between the fair value of the loan before and after restructuring is required to be made. The fair value of the loan before restructuring is computed as the present value of cash flows representing the interest at the existing rate charged on the loan before restructuring and the principal. The fair value of the loan after restructuring is computed as the present value of cash flows representing the interest at the rate charged on the loan on restructuring and the principal. Both sets of cash flows are discounted by the bank's benchmark prime lending rate or base rate, whichever is applicable to the borrower, as on the date of restructuring plus the appropriate term premium and credit risk premium for the borrower category on the date of restructuring. In May 2011, the Reserve Bank of India announced that restructured accounts classified as standard advances would attract a provision of 2.0% in the first two years from the date of restructuring.

In June 2006, the Reserve Bank of India issued prudential norms on creation and utilization of floating provisions (i.e., provisions which are not made in respect of specific non-performing assets or are made in excess of regulatory requirements for provisions for standard assets). The norms state that floating provisions can be used only for contingencies under extraordinary circumstances for making specific provisions against non-performing accounts after obtaining approval from the board of directors and with the prior permission of the Reserve Bank of India. Floating provisions for advances and investments must be held separately and cannot be reversed by credit to the profit and loss account. Until utilization of such provisions, they can be netted off from gross non-performing assets to compute the net non-performing assets. Alternatively, floating provisions could be treated as part of tier II capital within the overall ceiling of 1.25% of total risk-weighted assets for inclusion of general provisions and loss reserves in tier II capital. Floating provisions do not include specific voluntary provisions made by banks for advances which are higher than the minimum provision stipulated by the Reserve Bank of India guidelines. The banks have the choice between deducting their existing floating provisions from gross non-performing assets to arrive at net non-performing assets or reckon it as part of tier II capital subject to the overall ceiling of 1.25% of total risk weighted assets.

In October 2009, the Reserve Bank of India advised Indian banks to increase their total provisioning coverage ratio, including floating provisions and prudential/technical write-offs, to 70% by September 30, 2010. The Reserve Bank of India allowed the banks to include prudential/technical write-off in both the gross non-performing assets and the provisions held in the calculation of provisioning coverage ratio. The Reserve Bank of India permitted us to achieve

the stipulated level of provisioning coverage of 70% in a phased manner by March 31, 2011. We reached the required 70% in December 2010. In April 2011, the Reserve Bank of India stipulated that banks would be required to maintain their provisioning coverage ratios with reference to their

gross non-performing assets position at September 30, 2010 and not on an ongoing basis. Also, the Reserve Bank of India further clarified that any surplus provisioning should not be written back but should be segregated into a “countercyclical provisioning buffer” and that banks will be allowed to use this buffer to make specific provisions for non-performing assets during a system-wide downturn. See also “Risk Factors—Risks Relating to Our Business—Further deterioration of our non-performing asset portfolio combined with recent Reserve Bank of India requirements that all Indian banks increase their provisioning coverage as a percentage of gross non-performing assets could adversely affect our business”.

To limit the volatility of loan loss provisioning over the course of an economic cycle, the Reserve Bank of India released a discussion paper on a dynamic loan loss provisioning framework in March 2012. The framework proposes to replace the existing general provisioning standards and recommends that banks make provisions on their loan book every year based on historical loss experience in various categories of loans. In years where the bank’s actual provisions is higher than the computed dynamic provisions requirement, the bank can draw down from existing dynamic provisions to the extent of the difference, subject to the retention of a specified minimum level of dynamic provisions.

Guidelines on Sale and Purchase of Non-performing Assets

In order to provide banks with options to resolve their non-performing assets, the Reserve Bank of India issued guidelines on the sale and purchase of non-performing assets among banks, financial institutions and non-bank finance companies in July 2005. As per these guidelines, the board of directors of the bank must establish a policy for the purchase and sale of non-performing assets. Purchases and sales of non-performing assets must be without recourse to the seller and on a cash basis, with the entire consideration being paid upfront. An asset must have been classified as non-performing for at least two years by the seller to be eligible for sale. The purchasing bank must hold the non-performing asset on its books for at least 15 months before it can sell the asset to another bank. The asset cannot be sold back to the original seller.

In October 2007, the Reserve Bank of India issued guidelines regarding valuation of non-performing assets being put up for sale. Banks have been instructed to calculate the net present value of the estimated cash flows associated with the realizable value of the available asset net of the cost of realization. The sale price should not be lower than the net present value. The Reserve Bank of India has instructed banks to follow the same procedure in case where a settlement is reached with the party that had defaulted on the non-performing asset.

Guidelines Relating to Use of Recovery Agents by Banks

In April 2008, the Reserve Bank of India issued guidelines for banks engaging recovery agents. The Reserve Bank of India has asked banks to put in place a due diligence process for the engagement of recovery agents, structured to cover individuals involved in the recovery process. Banks are expected to communicate details of recovery agents to borrowers and have in place a grievance redressal mechanism pertaining to the recovery process. The Reserve Bank of India has advised banks to initiate a training course for current and prospective recovery agents to ensure prudent recovery practices.

Regulations Relating to Sale of Assets to Asset Reconstruction Companies

The Securitization Act, also known as the Securitization and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002 (SARFAESI Act), provides for the sale of financial assets by banks and financial institutions to asset reconstruction companies. The Reserve Bank of India has issued guidelines to banks on the process to be followed for sales of financial assets to asset reconstruction companies. These guidelines provide that a bank may sell financial assets to an asset reconstruction company provided the asset is a non-performing asset. These

assets are to be sold on a 'without recourse' basis only. A bank may sell a standard asset only if the borrower has a consortium or multiple banking arrangements, at least 75.0% by value of the total loans to the borrower are classified as non-performing and at least 75.0% by value of the banks and financial institutions in the consortium or multiple banking arrangements agree to the sale. The banks selling financial assets should ensure that there is no known liability devolving on them and that they do not assume any operational, legal or any other type of risks relating to the financial assets sold. Further, banks may not sell

financial assets at a contingent price with an agreement to bear a part of the shortfall on ultimate realization. However, banks may sell specific financial assets with an agreement to share in any surplus realized by the asset reconstruction company in the future. While each bank is required to make its own assessment of the value offered in the sale before accepting or rejecting an offer for purchase of financial assets by an asset reconstruction company, in consortium or multiple banking arrangements where more than 75.0% by value of the banks or financial institutions accept the offer, the remaining banks or financial institutions are obliged to accept the offer. Consideration for the sale may be in the form of cash, bonds or debentures or security receipts or pass through certificates issued by the asset reconstruction company or trusts set up by it to acquire the financial assets. Banks can also invest in security receipts or pass-through certificates issued by the asset reconstruction company or trusts set up by it to acquire the financial assets. In April 2010, amendments were made to the Securitization Companies and Reconstruction Companies (Reserve Bank) Guidelines, 2003, wherein the period for realization of assets acquired by securitization and reconstruction companies was extended from five years to eight years. Securitization and reconstruction companies must invest and hold a minimum 5% stake of the outstanding amount of security receipts issued under each scheme until redemption. See also “Overview of the Indian Financial Sector—Recent Structural Reforms—Legislative Framework for Recovery of Debts Due to Banks”.

Regulations Relating to Making Loans

The provisions of the Banking Regulation Act govern the making of loans by banks in India. The Reserve Bank of India also issues directions covering the loan activities of banks. These directions and guidelines issued by the Reserve Bank of India have been consolidated in Master Circular — Loans and Advances — Statutory and Other Restrictions dated July 1, 2012. These guidelines and directions are revised from time to time by the Reserve Bank of India. Some of the major guidelines of the Reserve Bank of India pertain to bank loans to non-bank finance companies and to priority sectors, in addition to banks’ lending rates, base rates and loans against shares.

Banks are free to determine their own lending rates but each bank must disclose its base rate. The base rate, which takes into consideration all elements of lending rates that are common across borrowers, replaced the benchmark prime lending rate as the standard on July 1, 2010. The base rate is the minimum rate for all loans; banks are not permitted to lend below the base rate except for Differential Rate of Interest advances, loans to banks’ own employees and loans to banks’ depositors against their own deposits. Accordingly, the earlier stipulation of the benchmark prime lending rate as the ceiling rate for loans of up to Rs. 200,000 has been withdrawn. Banks are permitted to arrive at the base rate for a specific tenor that would be needed to be disclosed transparently. Further, banks are permitted to determine their final lending rates on loans and advances with reference to the base rate and by including such other customer specific charges as they consider appropriate. Until such time that loans linked to the benchmark prime lending rate exists, banks must announce both the benchmark prime lending rate and the base rate.

In terms of Section 20(1) of the Banking Regulation Act, a bank cannot grant any loans and advances against the security of its own shares, a banking company is prohibited from entering into any commitment for granting any loans or advances to or on behalf of any of its directors, or any firm in which any of its directors is interested as partner, manager, employee or guarantor, or any company (not being a subsidiary of the banking company or a company registered under Section 25 of the Companies Act, 1956, or a government company) of which, or the subsidiary or the holding company of which any of the directors of the bank is a director, managing agent, manager, employee or guarantor or in which he holds substantial interest, or any individual in respect of whom any of its directors is a partner or guarantor. There are certain exemptions in this regard as the explanation to the section provides that ‘loans or advances’ shall not include any transaction which the Reserve Bank of India may specify by general or special order as not being a loan or advance for the purpose of such section.

There are guidelines on loans against equity shares in respect of amount, margin requirement and purpose.

In June 2005, the Reserve Bank of India issued guidelines requiring banks to put in place a policy for exposure to real estate with the approval of their boards. The policy is required to include exposure limits, collaterals to be considered, collateral cover and margins and credit authorization. The Reserve Bank of India has also permitted

banks to extend financial assistance to Indian companies for acquisition of equity in overseas joint ventures or wholly owned subsidiaries or in other overseas companies, new or existing, as strategic investment. Banks are not permitted to finance acquisitions by companies in India. With regards to mortgages, in May 2011 the Reserve Bank of India imposed a ceiling on the loan-to-value ratio in respect of housing loans at 80.0%. Small value loans of less than Rs. 2.0 million were permitted to have a loan-to-value ratio not exceeding 90.0%.

Directed Lending

Priority Sector Lending

The Reserve Bank of India issues guidelines on lending to priority sectors which are summarized in the master circular on Lending to Priority Sector. The guidelines require commercial banks to lend a certain percentage of their net bank credit to specific sectors (the priority sectors), such as agriculture, micro and small enterprises, micro-credit, education and housing finance. The target for total priority sector advances is set at 40.0% of adjusted net bank credit (which is net bank credit plus those investments made by banks in non-statutory liquidity bonds that are included in the held-to-maturity category minus recapitalization bonds floated by the government) or of the credit equivalent amount of off-balance sheet exposure, whichever is higher as of March 31 of the previous fiscal year. Of the total priority sector advances, agricultural advances are required to be 18.0% of adjusted net bank credit and advances to weaker sectors are required to be at 10.0% of the adjusted net bank credit. Additionally, 1.0% of the previous year's total advances outstanding is required to be lent under the Differential Rate of Interest scheme. Advances to the agricultural sector are further divided into "direct lending," with a target of 13.5% of adjusted net bank credit, and "indirect lending," with a target of 4.5% of adjusted net bank credit. The guidelines have capped eligible direct agriculture finance to non-individuals (i.e., partnership firms, corporations and institutions) at Rs. 10 million per borrower. One-third of loans in excess of Rs. 10 million per borrower would also be considered as direct finance while the remaining two-thirds would constitute indirect finance. The limit on housing loans eligible for priority sector lending is Rs. 2.5 million per borrower. Loans granted to housing finance companies for on-lending for housing up to Rs. 2.0 million of each loan may be classified as priority sector loans.

Banks falling short of their priority sector lending targets are required to contribute amounts equivalent to the shortfall to specific funds like the Rural Infrastructure Development Fund, established by the National Bank for Agriculture and Rural Development, or funds with other financial institutions. The allocation of amounts among the banks is decided by the Reserve Bank of India. The contribution is made by subscribing to bonds issued with a maturity of up to seven years. The interest rates on these contributions are periodically established depending on the bank rate. In fiscal 2012, the bank rate, which is linked to the repo rate, was set 100 basis points above the repo rate.

In February 2011, the Reserve Bank of India issued guidelines excluding loans sanctioned to non-banking finance companies which are then lent onwards to individuals and entities with gold jewelry as collateral, from classification as direct agriculture lending under priority sector requirements. Similarly, investments made by banks in securitized assets originated by non-banking finance companies, where the underlying assets were loans against gold jewelry, and the purchase/assignment of a gold loan portfolio from non-banking finance companies were also made ineligible for classification under agriculture sector lending. In May 2011, the Reserve Bank of India issued guidelines declassifying fresh loans to non-banking finance companies for on-lending to individuals from priority sector effective from April 1, 2011. However, loans to microfinance institutions, including non-banking finance companies operating as microfinance companies prior to April 1, 2011, for on-lending to individuals continue to be eligible for classification under the priority sector category.

Prior to the merger, the advances of ICICI were not subject to the priority sector lending requirement, which only applies to banks. Pursuant to the terms of the Reserve Bank of India's approval of the merger, we were required to maintain a total of 50.0% of our domestic adjusted net bank credit on the residual portion of our advances (i.e., the

portion of our total advances excluding advances of ICICI) in the form of priority sector advances. This additional requirement of 10.0% by way of priority sector advances applies until such time as the aggregate priority sector advances reach a level of 40.0% of our total adjusted net bank credit. In fiscal 2012, the Reserve Bank of India stipulated that the Bank will be required to extend 38.5% of its adjusted net bank

credit (including the advances of ICICI) to priority sectors and achieve the target of 40.0% of adjusted net bank credit beginning fiscal 2013.

In July 2012, the Reserve Bank of India released revised guidelines on priority sector lending. The revised guidelines maintained the overall priority sector lending target of 40% of adjusted net bank credit, and also the sub-target of 18.0% towards agriculture lending. With a view to increase direct bank lending to farmers, self-help groups and joint liability groups, loans to corporations engaged in agriculture and allied activities was classified under indirect agriculture lending. Lending to a small or micro enterprise in the services sector was capped at Rs. 10 million. The guidelines also stipulate that investments by banks in securitized assets, outright purchases of loans and assignments would be eligible for classification under priority sector if the underlying assets themselves qualified for such treatment. Also, the interest rates charged to ultimate borrowers by the originating entities in such transactions was capped for such transactions to be classified as priority sector. Further, the priority sector target for foreign banks with 20 or more branches in India were brought on par with domestic banks with their target increasing from 32% of adjusted net bank credit to 40%.

Export Credit

The Reserve Bank of India also requires commercial banks to make loans to exporters at concessional rates of interest. This enables exporters to have access to an internationally competitive financing option. Pursuant to existing guidelines, 12.0% of a bank's adjusted net bank credit is required to be in the form of export credit. This target is in addition to the priority sector lending mandate of 40.0% of adjusted net bank credit. We provide export credit for pre-shipment and post-shipment requirements of exporter borrowers in rupees and foreign currencies.

Credit Exposure Limits

As a prudential measure aimed at better risk management and avoidance of concentration of credit risks, the Reserve Bank of India has prescribed credit exposure limits for banks and long-term lending institutions in respect of their lending to individual borrowers and to all companies in a single group (or sponsor group). These measures are consolidated in the Reserve Bank of India's master circular on exposure norms dated July 1, 2012. The limits currently set by the Reserve Bank of India are as follows:

- The exposure ceiling for a single borrower is 15.0% of capital funds and group exposure limit is 40.0% of capital funds. In case of financing for infrastructure projects, the exposure limit to a single borrower may be extended by another 5.0% (i.e., up to 20.0% of capital funds) and the group exposure limit may be extended by another 10.0% (i.e., up to 50.0% of capital funds). Effective May 29, 2008, the exposure limit in respect of single borrower was raised to 25.0% of capital funds for oil companies that were issued oil bonds. Banks may, in exceptional circumstances, with the approval of their board of directors, consider enhancement of the exposure to a borrower up to a maximum of further 5.0% of capital funds, subject to the borrower consenting to the banks making appropriate disclosures in their annual reports.
- From July 1, 2008, exposures to public sector undertakings were exempted from group exposure limits.
- Capital funds are the total capital as defined under capital adequacy norms (tier I and tier II capital).
- Exposure shall include credit exposure (funded and non-funded credit limits) and investment exposure (including underwriting and similar commitments). Non-fund based exposures are calculated at 100.0% and in addition, banks include forward contracts in foreign exchange and other derivative products, like currency swaps and options, at their replacement cost value in determining individual or group borrower exposure ceilings, effective April 1, 2003.

To ensure that exposures are evenly spread, the Reserve Bank of India requires banks to fix internal limits of exposure to specific sectors. These limits are subject to periodical review by the banks. We have fixed a ceiling of 15.0% on our exposure to any one industry (other than retail loans) and monitor our exposures accordingly.

243

Limits on Exposure to Non-banking Finance Companies

The guidelines restrict each bank's holding in non-banking finance companies, excluding asset financing and infrastructure financing companies, to 10.0% of the bank's capital funds as per the last audited balance sheet. Exposure to non-banking asset finance companies and infrastructure finance companies has been restricted to 15.0% of bank's capital funds. The limit may be increased to 15.0% and 20.0% respectively provided that the excess exposure is on account of funds lent by the non-banking financial company to infrastructure sectors.

Regulations Relating to Investments and Capital Market Exposure Limits

The Reserve Bank of India guidelines on capital market exposures stipulate that a bank's exposure to capital markets in all forms (both fund based and non-fund based) by way of investments in shares, convertible bonds/debentures, units of equity oriented mutual funds, loans against shares, and secured and unsecured advances to stock brokers, should not exceed 40% of its net worth on both a standalone and consolidated basis as of March 31 of the previous year. Within this overall limit, direct investments in shares, convertible bonds/debentures, and units of equity oriented mutual funds and all exposures to venture capital funds have been restricted to 20.0% of their net worth on both a standalone and consolidated basis. Further, in July 2011, the Reserve Bank of India stipulated that a bank's investments in liquid schemes of debt oriented mutual funds are subject to a prudential cap of 10.0% of the bank's net worth as of March 31 of the previous year. The above guidelines are also applicable at a consolidated level.

Investment by banks in specified instruments which are issued by other banks or financial institutions and are eligible for capital status for the investee bank/financial institution should not exceed 10% of the investing bank's capital funds (tier I plus tier II). Further, the banks/financial institutions should not acquire any fresh stake in a bank's equity shares, if by such acquisition, the investing bank's or financial institution's holding exceeds 5% of the investee bank's equity capital. The guideline requires banks to obtain prior approval of the Reserve Bank of India for equity investment in a company engaged in the financials sector and such investments are held under the held-for-trading category.

The Reserve Bank of India has issued detailed guidelines on investments by banks in non-statutory liquidity ratio securities. These guidelines apply to primary market subscriptions and secondary market purchases. Pursuant to these guidelines, banks are prohibited from investing in non-statutory liquidity ratio securities with an original maturity of less than one year, other than commercial paper and certificates of deposits. Banks are also prohibited from investing in unrated securities. A bank's investment in unlisted non-statutory liquidity ratio securities may not exceed 10.0% of its total investment in non-statutory liquidity ratio securities at the end of the preceding fiscal year. However, the bank's investments in unlisted non-statutory liquidity ratio securities may exceed the 10.0% limit by an additional 10.0%, provided the investment is in securitization papers issued for infrastructure projects and bonds/debentures issued by securitization companies and reconstruction companies set up under the Securitization and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002 and registered with the Reserve Bank of India. In December 2007, the Reserve Bank of India permitted banks to invest in unrated bonds of corporations engaged in infrastructure activities within the ceiling of 10.0% for unlisted non-statutory liquidity ratio securities in order to encourage flow of credit to infrastructure sector.

The Reserve Bank of India has also issued guidelines on investments in subsidiaries and other companies, including investments in non-financial services companies. According to the guidelines, equity investments by a bank in a subsidiary company or other financial services company cannot exceed 10.0% of the bank's paid-up share capital and reserves. Equity investment by banks in non-financial services companies is capped at 10.0% (as opposed to an earlier cap of 30.0%) of the investee company's paid-up share capital. Equity investments in non-financial services companies at the group level, including investments by the bank's subsidiaries, cannot exceed 20% of the investee company's paid-up share capital. Also, overall equity investments by a bank, including investments in its subsidiaries and other companies, cannot exceed 20.0% of the bank's paid-up share capital and reserves.

Further, the total investment by banks in liquid or short term debt schemes of mutual funds with weighted average maturity of portfolio of not more than one year will be subject to a prudential cap of 10% of their net worth as on March 31 of the previous year.

In July 2011, the Reserve Bank of India issued guidelines on risk-weighting banks' investments in paid up equity of financial entities exempted from capital market exposure, effective from January 1, 2012. The entities exempted include institutions constituting crucial financial infrastructure, such as stock exchanges, commodity exchanges and depositories. The Reserve Bank of India assigned a 125% risk weight on all investments by a bank in the paid-up equity of such entities. With this mandate, the risk weight on all capital market exposures has been brought at par.

Banks' Investment Classification and Valuation Norms

The key features of the Reserve Bank of India guidelines on categorization and valuation of banks' investment portfolio are given below.

- The entire investment portfolio is required to be classified under three categories: (a) held to maturity, (b) held for trading and (c) available-for-sale. Held to maturity includes securities so classified in accordance with the Reserve Bank of India guidelines; held for trading includes securities acquired with the intention of being traded to take advantage of the short-term price/interest rate movements; and available-for-sale includes securities not included in held to maturity and held for trading. Banks should decide the category of investment at the time of acquisition.
- The held to maturity category can include statutory liquidity ratio securities up to 25% of the demand and time liabilities and certain non-statutory liquidity ratio securities, including fresh re-capitalization bonds received from the government of India towards re-capitalization requirement and held in the investment portfolio, fresh investment in the equity of subsidiaries and joint ventures, Rural Infrastructure Development Fund/Small Industries Development Board of India/Rural Housing Development Fund deposits and investment in long-term bonds (with a minimum residual maturity of seven years) issued by companies engaged in infrastructure activities. From December 18, 2010, the Reserve Bank of India reduced the statutory liquidity ratio from 25% to 24%. On July 31, 2012, the Reserve Bank of India reduced the statutory liquidity ratio to 23.0%.
- Profit or loss on the sale of investments in both held for trading and available-for-sale categories are taken in the income statement. Profit on the sale of investments in the held to maturity category, net of tax and statutory reserve, is appropriated to the capital reserve account after being taken in the income statement. Loss on any sale is recognized in the income statement.
- The market price of the security available from the stock exchange, the price of securities in subsidiary general ledger transactions, the Reserve Bank of India price list or prices declared by Primary Dealers Association of India jointly with the Fixed Income Money Market and Derivatives Association of India serves as the "market value" for investments in available-for-sale and held for trading securities.
- Investments under the held for trading category should be sold within 90 days; in the event of inability to sell due to adverse factors including tight liquidity, extreme volatility or a unidirectional movement in the market, the unsold securities should be shifted to the available-for-sale category.
- Investments may be shifted from or to held-to-maturity with the approval of the board of directors once a year, normally at the beginning of the accounting year; shifting of investments from available-for-sale to held for trading may be done with the approval of the board of directors, the Asset Liability Management Committee or the Investment Committee; shifting from held for trading to available-for-sale is generally not permitted. Since August 2010, the Reserve Bank of India has mandated that, with regards to sales and transfers of securities from or to the

held-to maturity category, if the value of sales exceeds 5% of the book value of the investment held in the held-to-maturity category at the beginning of the year, the market value of the investment will have to be disclosed in the notes to the financial accounts in the annual report along with the excess book value over market value for which a provision was not made.

- Banks are permitted to exceed the limit of 24.0% of total investments for the held-to-maturity category provided the excess comprises only statutory liquidity ratio securities and the aggregate of statutory liquidity ratio investments in the held-to-maturity category do not exceed 24.0% of the demand and time liabilities. The Reserve Bank of India had reduced the statutory liquidity ratio from 25.0% to 24.0% since December 18, 2010. On July 31, 2012, the Reserve Bank of India reduced the statutory liquidity ratio to 23.0%.

Held-to-maturity securities need not be marked to market and are carried at acquisition cost, unless it is more than the face value, in which case the premium should be amortized over the period remaining to maturity.

Investments under available-for-sale category are marked to market at quarterly intervals and held for trading securities valued at market at monthly intervals. Depreciation or appreciation for each basket within the available-for-sale and held for trading categories is aggregated. Net appreciation in each basket, if any, which is not realized, is ignored, while net depreciation is provided for.

Investments in security receipts or pass through certificates issued by asset reconstruction companies or trusts set up by asset reconstruction companies should be valued at the lower of: (a) the redemption value of the security receipts or pass through certificates; and (b) the net book value of the financial asset. However, if the instrument issued by securitization/asset reconstruction companies is limited to the actual realization of the financial asset assigned to the instrument, the net asset value should be obtained from the securitization/asset reconstruction companies for valuation of the investments.

In June 2008, the Reserve Bank of India issued revised guidelines for the valuation of non-statutory liquidity ratio securities, requiring banks to value such securities issued by the government of India at a spread of 25 basis points above the corresponding yield on government of India securities from an earlier spread of 50 basis points above the corresponding yield on government of India securities.

Limit on Transactions through Individual Brokers

Guidelines issued by the Reserve Bank of India require banks to appoint brokers for transactions in securities. These guidelines also require that a disproportionate part of the bank's business should not be transacted only through one broker or a few brokers. The Reserve Bank of India specifies that not more than 5.0% of the total transactions through appointed brokers can be transacted through one broker. If for any reason this limit is breached, the Reserve Bank of India has stipulated that the board of directors of the bank should ratify such action.

Prohibition on Short-Selling

The Reserve Bank of India permits scheduled commercial banks and primary dealers to undertake short sale of central government dated securities, subject to the short position being covered within a maximum period of five trading days, including the day of trade. The short positions shall have to be covered only by outright purchase of an equivalent amount of the same security.

Introduction of Credit Default Swaps for Corporate Bonds

In fiscal 2012, the Reserve Bank of India introduced credit default swaps on corporate bonds. Banks are allowed to undertake such transactions, both as market makers as well as users. Commercial banks will be eligible to act as market makers provided they fulfill the criteria of a minimum 11.0% capital adequacy ratio with a tier I ratio of at least 7%, and a net non-performing assets ratio of less than 3.0%. Credit default swaps are only allowed on listed corporate bonds and unlisted but rated bonds of infrastructure companies. Banks' net credit exposures on account of credit default swaps cannot exceed 10.0% of the investment portfolio of unlisted/unrated bonds.

Subsidiaries and Other Financial and Non-Financial Sector Investments

We need the prior permission of the Reserve Bank of India to incorporate a subsidiary. We are required to maintain an “arms’ length” relationship with our subsidiaries and with mutual funds sponsored by us in

246

regard to business parameters such as not taking undue advantage in borrowing/lending funds, transferring/selling/buying of securities at rates other than market rates, giving special consideration for securities transactions, in supporting/financing the subsidiary or financing our clients through them when we are not able or not permitted to do so our self. We have to observe the prudential norms stipulated by the Reserve Bank of India, from time to time, in respect of our underwriting commitments. Pursuant to such prudential norms, our underwriting or the underwriting commitment of our subsidiaries under any single obligation shall not exceed 15.0% of an issue. We also need the prior specific approval of the Reserve Bank of India to participate in the equity of financial services ventures including stock exchanges and depositories notwithstanding the fact that such investments may be within the ceiling (the lower of 30.0% of the paid-up capital of the investee company or 30.0% of the investing bank's own paid up capital and reserves) prescribed under Section 19(2) of the Banking Regulation Act.

Under Reserve Bank of India guidelines a bank's equity investments by a bank in a subsidiary company, or a financial services company (including a financial institution, a stock or other exchange or a depository) which is not a subsidiary should not exceed 10% of the bank's paid-up share capital and reserves and the total investments made in all subsidiaries and all non-subsidiary financial services companies should not exceed 20% of the bank's paid-up share capital and reserves. However, the cap of 20% does not apply, nor is the prior approval of the Reserve Bank of India required, if investments in financial services companies are held under the 'held for trading' category, and are not held beyond 90 days.

Under Reserve Bank of India regulation, a bank's equity investment in companies engaged in non-financial services activities are subject to a limit of 10% of the investee company's paid-up share capital or 10% of the bank's paid-up share capital and reserves, whichever is less. For the purpose of this limit, equity investments held under the 'held for trading' category are included. Equity investments in any non-financial services company held by a bank; or entities which are bank's subsidiaries, associates or joint ventures; and mutual funds managed by asset management companies controlled by the bank should in the aggregate not exceed 20% of the investee company's paid up share capital. Any investment by a bank in excess of 10% of the investee company's paid-up share capital, but not exceeding 30%, requires the approval of the Reserve Bank of India.

A bank holding may hold equity in excess of 10% of a non-financial services investee company's paid-up capital without the prior approval of the Reserve Bank of India if the additional acquisition is made through a restructuring or corporate debt restructuring, or is acquired by the bank in order to protect its interest on loans/investments made in a company. However, banks have to submit to the Reserve Bank of India a time bound action plan for disposal of such shares within a specified period.

Further, a bank's equity investments in subsidiaries and other entities that are engaged in financial services activities, together with equity investments in entities engaged in non-financial services activities should not exceed 20% of the bank's paid-up share capital and reserves. The cap of 20% would not apply for investments classified under 'held for trading' category and which are not held beyond 90 days. The Reserve Bank of India has clarified that investment in overseas banking subsidiaries can be excluded from the above 20% limit. In August 2006, the Reserve Bank of India issued guidelines that included banks' investments in venture capital funds in this limit.

Regulations Relating to Securitization of Loans

With a view to developing an orderly and healthy securitization market, and ensuring alignment of originators and investors' interests, the Reserve Bank of India issued guidelines on securitization in May 2012. Under the guidelines, all on-balance sheet standard assets are eligible for securitization, except for revolving credit facilities, mortgage backed securities and asset backed securities. Loans must also meet a minimum holding period requirement, based on the maturity and repayment frequency of the loan, in order to be eligible for securitization. A minimum retention requirement is prescribed to ensure that the originating banks have a continuing stake in the performance of the

securitized assets. The total exposure of banks to the securitized loans cannot exceed 20% of the total securitized instruments, and any exposure in excess of this limit must be risk-weighted at 1111%.

Regulations Relating to Deposits

The Reserve Bank of India has permitted banks to independently determine interest rates offered on term deposits. However, banks cannot pay interest on current account deposits. Interest rates payable on savings deposits were regulated until October 2011. In May 2011, the Reserve Bank of India increased the interest rate on savings deposits from 3.5% to 4.0%. In October 2011, the Reserve Bank of India deregulated the savings account interest rate, instead applying a uniform interest rate to be paid on deposits up to Rs. 100,000 and permitting differential rates for deposits of over Rs. 100,000, depending on the amount in the account.

The Reserve Bank of India has required that payment of interest be calculated on saving bank account deposits on a daily product basis since April 1, 2010.

Domestic time deposits and rupee-denominated non-resident ordinary and non-resident rupee (NRE) accounts have a minimum maturity of seven days. Time deposits from non-resident Indians denominated in foreign currency have a minimum maturity of one year and a maximum maturity of five years.

Banks have the flexibility to offer varying rates of interests on domestic deposits of the same maturity subject to the following conditions:

- time deposits are of Rs. 1.5 million and above; and
- interest on deposits is paid in accordance with the schedule of interest rates disclosed in advance by the bank and not pursuant to negotiation between the depositor and the bank.

Interest rates on non-resident rupee term deposits of one to three years maturity are linked to the LIBOR/SWAP rates for U.S. dollar of corresponding maturity. The rate is periodically prescribed by the Reserve Bank of India. Interest rates on non-resident rupee savings deposits are at the rate applicable to domestic savings deposits. In fiscal 2012, the Reserve Bank of India deregulated interest rates on non-resident (external) rupee deposits and ordinary non-resident accounts, allowing banks to determine the interest rates on savings and term deposits with maturities of one year and above.

With a view to increasing the availability of financial services across regions and population segments, the Reserve Bank of India has advised banks to make available a basic banking “no frills” account requiring either nil or very low minimum balances and charges that would make these accounts accessible to low-income segments of the population.

Deposit Insurance

Demand and time deposits of up to Rs. 100,000 that are accepted by Indian banks have to be insured with the Deposit Insurance and Credit Guarantee Corporation, a wholly-owned subsidiary of the Reserve Bank of India. Banks are required to pay the insurance premium for the eligible amount to the Deposit Insurance and Credit Guarantee Corporation on a semi-annual basis. The cost of the insurance premium cannot be passed on to the customer.

Regulations Relating to Knowing the Customer and Anti-Money Laundering

The Reserve Bank of India has prescribed comprehensive guidelines for Know Your Customer, Anti-Money Laundering and Combating Financing of Terrorism procedures since November 2004. This is in line with the recommendations made by the Financial Action Task Force on Anti-Money Laundering standards and on Combating Financing of Terrorism. These guidelines are revised from time to time, and consolidated guidelines are issued in the Reserve Bank of India’s master circulars. The objective of these guidelines is to prevent banks from being used,

intentionally or unintentionally, by criminal elements for money laundering or terrorist financing activities. The guidelines cover key aspects including customer acceptance policy, customer identification procedures, monitoring of transactions and risk management. The guidelines also cover enhanced due diligence measures, appointment of principal officers, training and audit.

The Prevention of Money Laundering Act, 2002, which came into effect beginning in July 2005, seeks to prevent money laundering and also provides for the freezing and confiscation of assets concerned in money laundering/terrorism and the appointment of various authorities, including the Financial Intelligence Unit. The Act lays down the obligations of banks in maintaining records of prescribed transactions and in reporting such transactions to the Financial Intelligence Unit. It also lists out the prescriptive offences that will come under the purview of the Act. Prevention of Money-Laundering Rules have also been framed under the Act. The Act and the Rules have since been amended from time to time.

The Reserve Bank of India has simplified the Know Your Customers procedure for opening accounts for persons who intend to keep balances not exceeding Rs. 50,000 in all their accounts taken together and for whom the total credit in all accounts taken together does not exceed Rs. 100,000 in a year. This is to ensure that the implementation of the Know Your Customers guidelines does not result in the denial of banking services to those who are financially or socially disadvantaged.

Regulations on Asset Liability Management

The Reserve Bank of India's regulations for asset liability management require banks to draw up asset-liability gap statements separately for rupee and foreign currencies for the domestic operations of the bank. These gap statements are prepared by scheduling all assets and liabilities according to the stated and anticipated repricing date, or maturity date. The statements are submitted to the Reserve Bank of India on a periodic basis. The Reserve Bank of India has advised banks to actively monitor the difference in the amount of assets and liabilities maturing or being repriced in a particular period and to place internal prudential limits on the gaps in each time period, as a risk control mechanism.

In March 2007, the Reserve Bank of India issued guidelines regarding prudential limits for inter-bank liabilities. Inter-bank liabilities of a bank cannot exceed 200.0% of its net worth as on the last day of the previous fiscal year. Individual banks have been permitted, with the approval of their boards of directors, to fix a lower limit for their inter-bank liabilities, keeping in view their business model. However, banks whose capital to risk assets ratio is at least 25% more than the minimum capital to risk assets ratio (currently 9%), i.e., 11.25% as on the last day of the previous fiscal year, are allowed a higher limit with respect to inter-bank liability of up to 300.0% of their net worth. It may be noted that the limits prescribed above would include only fund-based inter-bank liabilities within India (including inter-bank liabilities in foreign currency to banks operating within India), and inter-bank liabilities outside India are excluded. The Reserve Bank of India guidelines also stipulate that existing limits on call-money borrowing shall form a sub-limit of the above-mentioned limit. At present, on a fortnightly average basis, call/notice money borrowings should not exceed 100% of bank's capital funds. However, banks are allowed to borrow a maximum of 125% of their capital funds on any day during a fortnight.

In October 2007, the Reserve Bank of India issued amendments to guidelines on asset liability management to improve management of liquidity by banks and to provide a stimulus for development of the term-money market. The Reserve Bank of India has advised banks to adopt a more detailed approach to the measurement of liquidity risk effective January 1, 2008 by splitting the first time period (1-14 days earlier) in the statement of structural liquidity into three time periods—next day, 2-7 days and 8-14 days. The net cumulative negative liquidity mismatches during the next day, 2-7 days, 8-14 days and 15-28 days periods should not exceed 5.0%, 10.0%, 15.0% and 20.0% of the cumulative cash outflows in the respective time periods in order to recognize the cumulative impact on liquidity. Banks have also been advised to undertake dynamic liquidity management and are required to prepare the structural liquidity statement on a daily basis. Further, since April 1, 2008, banks are required to report their liquidity gap statements on a fortnightly basis.

In November 2010, the Reserve Bank of India issued guidelines on the introduction of duration gap analysis for interest rate risk management. The guidelines are aimed at providing an indication of the interest rate risk to which the

bank is exposed. The report on interest rate sensitivity as per duration gap analysis is required to be submitted on a quarterly basis with effect from June 30, 2011 and on a monthly basis with effect from April 30, 2012.

In February 2012, the Reserve Bank of India released draft guidelines on liquidity risk management and the Basel III framework on liquidity standards. The guidelines are aimed at improving the liquidity risk management

framework and increasing the frequency and variety of reports submitted pertaining to liquidity risk management. Further, for implementation of the liquidity ratios prescribed under the Basel III framework, the Reserve Bank of India has also prescribed the monitoring and reporting of liquidity coverage ratio, designed to ensure that a bank maintains an adequate level of liquid assets to survive an acute stress scenario lasting one month, and net stable funding ratio, designed to ensure a minimum amount of funding that is expected to be stable over a one-year time horizon.

Foreign Currency Dealership

The Reserve Bank of India has granted us a full-fledged authorized dealers' license to deal in foreign exchange through our designated branches. Under this license, we have been granted permission to:

- engage in foreign exchange transactions in all currencies;
- open and maintain foreign currency accounts abroad;
- raise foreign currency and rupee denominated deposits from non-resident Indians;
- grant foreign currency loans to on-shore and off-shore corporations;
 - open documentary credits;
 - grant import and export loans;
- handle collection of bills, funds transfer services;
 - issue guarantees; and
- enter into derivative transactions and risk management activities that are incidental to our normal functions authorized under our organizational documents and as permitted under the provisions of the Banking Regulation Act.

Further, we have been permitted to hedge foreign currency loan exposures of Indian corporations in the form of interest rate swaps, currency swaps and forward rate agreements, subject to certain conditions. Banks in the authorized dealer category may become trading or clearing members of the currency derivatives segment to be set up by stock exchanges recognized by the Securities and Exchange Board of India, subject to their fulfilling the requirements of (i) minimum net worth of Rs. 5.0 billion, (ii) minimum capital adequacy ratio of 10%, (iii) net non-performing assets not exceeding 3% and (iv) net profit for the previous three years.

Our foreign exchange operations are subject to the guidelines specified by the Reserve Bank of India in the exchange control manual. As an authorized dealer, we are required to enroll as a member of the Foreign Exchange Dealers Association of India, which prescribes the rules relating to foreign exchange business in India.

Authorized dealers, like us, are required to determine our limits on open positions and maturity gaps in accordance with the Reserve Bank of India guidelines and these limits are approved by the Reserve Bank of India.

In July 2010, the Reserve Bank of India permitted persons resident in India to enter into currency futures on stock exchanges.

Statutes Governing Foreign Exchange and Cross-Border Business Transactions

Foreign exchange and cross border transactions undertaken by banks are subject to the provisions of the Foreign Exchange Management Act. Banks are required to monitor transactions of customers based on pre-defined rules using a risk-based approach. The transaction monitoring system envisages identification of unusual transactions, undertaking due diligence on such transactions and, if confirmed as suspicious, reporting to the financial intelligence unit of the respective jurisdiction. Our transaction monitoring system is periodically reviewed and is being supplemented with appropriate anti-money laundering software technology solutions.

250

The Reserve Bank of India issues guidelines on external commercial borrowings from time to time. The guidelines do not permit financial intermediaries, including banks, to raise such borrowings or provide guarantees in favor of overseas lenders for such borrowings. Eligible borrowers, which are largely corporations, may raise such borrowings for investments such as the import of capital goods, in new and expansion projects, and also to meet foreign exchange needs of the infrastructure sector. The external commercial borrowing proceeds can also be utilized for overseas direct investment in joint ventures and wholly owned subsidiaries subject to the existing guidelines on Indian Direct Investment in joint ventures and wholly owned subsidiaries abroad. Utilization of external commercial borrowing proceeds is not permitted for lending, capital market investments or acquisitions in India or real estate investments (including integrated townships). Since November 2011, the all-in-cost ceiling for external commercial borrowings was fixed at LIBOR plus 350 basis points for borrowings with an average maturity period of three to five years from the earlier 300 basis points over LIBOR. For borrowings with an average maturity of over five years, the all-in-cost ceiling remains at 500 basis points over LIBOR. The limit on external commercial borrowings was enhanced in September 2011 to U.S.\$750 million, from the earlier limit of U.S.\$500 million. Corporations in the services sector were permitted to avail of external commercial borrowing of up to U.S.\$200 million as against the earlier limit of U.S.\$100 million. Also, in July 2012, the Reserve Bank of India permitted companies in the manufacturing and infrastructure sector to raise external commercial borrowings for the repayment of rupee loans availed from domestic banks, subject to their satisfying certain conditions.

Non-banking finance companies categorized as infrastructure finance companies were allowed to raise borrowings through external commercial borrowing in March 2010 and were permitted to borrow up to 50% of their owned funds under the automatic approval route in May 2010. In September 2011, a number of measures were announced to ease availability of funding to infrastructure projects through external commercial borrowing.

- Companies in the infrastructure sector were permitted to utilize 25.0% of fresh external commercial borrowing towards refinancing existing rupee loans as against the earlier guideline which did not allow repayment of outstanding rupee loans through external commercial borrowing.
- Companies in the infrastructure sector were allowed to import capital goods by availing of short-term credit in the nature of a bridge finance. The bridge finance can later be replaced with long-term external commercial borrowing.
- “Interest during construction” was accepted as an eligible end-use for availing external commercial borrowing.
- Foreign equity holders were allowed to provide credit enhancement to Indian companies exclusively engaged in the development of infrastructure under the automatic route without the prior approval of the Reserve Bank of India.

In July 2010, the Reserve Bank of India permitted take-out financing arrangements through external commercial borrowing, under the approval route, for refinancing rupee loans providing for new infrastructure projects, including sea ports, airports, roads, bridges and the power sector.

Further, in December 2011, microfinance institutions were allowed to raise external commercial borrowings of up to US\$10.0 million during a year.

In fiscal 2012, following the sharp depreciation in the Rupee, the Reserve Bank of India issued several guidelines to provide support to the currency. With regard to export earners foreign currency accounts, the Reserve Bank of India required that 50% of the balances in such accounts be converted immediately into Rupee balances and credited to the Rupee accounts. Also, only 50% of all future foreign exchange earnings could be retained in the export earners foreign currency account and access to foreign exchange markets was allowed only after utilizing the available balances in these accounts. Further, the net overnight open position limit of authorized dealers in the exchanges for trading

currency futures and options was set at US\$ 100 million or 15% of the outstanding open interest, whichever is lower.

Foreign Currency Borrowings by Banks in India

The Reserve Bank of India has allowed banks to borrow funds from their overseas branches and correspondent banks (including borrowings for financing export credit, external commercial borrowings and overdrafts from their head office/nostro account) up to a limit of 50.0% of unimpaired tier I capital or U.S.\$10 million, whichever is higher, as against the earlier overall limit of 25.0% (excluding borrowings for financing export credit). However, short-term borrowings up to a period of one year or less should not exceed 20.0% of unimpaired tier I capital within the overall limit of 50.0%.

All the regulations and guidelines issued by the Reserve Bank of India, as amended from time to time, in connection with foreign currency borrowings by banks in India have been consolidated in the Master Circular on Risk Management and Inter-Bank Dealings dated July 1, 2012. The aforesaid limit applies to the aggregate amount availed of by all the offices and branches in India from all their branches or correspondents abroad and also includes overseas borrowings in gold for funding domestic gold loans. Capital funds raised by issue of innovative perpetual debt instruments and other overseas borrowings with the specific approval of the Reserve Bank of India will continue to be outside the limit of 50.0% of unimpaired tier I capital.

Legal Reserve Requirements

Cash Reserve Ratio

A bank is required to maintain a specified percentage of its net demand and time liabilities, excluding inter-bank deposits, by way of cash reserve with itself and by way of balance in current account with the Reserve Bank of India. Following the enactment of the Reserve Bank of India (Amendment) Bill 2006, the floor and ceiling rates (earlier 3.0% and 20.0% respectively) on the cash reserve ratio were removed. The following liabilities are excluded from the calculation of the demand and time liabilities to determine the cash reserve ratio:

- inter-bank liabilities;
- liabilities to primary dealers;
- refinancing from the Reserve Bank of India and other institutions permitted to offer refinancing to banks; and
- perpetual debt qualifying for lower tier I capital treatment.

The cash reserve ratio was revised to 4.75% in March 2012, a reduction of 75 basis points. Effective April 13, 2007 the Reserve Bank of India does not pay any interest on cash reserve ratio balances.

The cash reserve ratio has to be maintained on an average basis for a fortnightly period and should not be below 70.0% of the required cash reserve ratio on any day of the fortnight.

Statutory Liquidity Ratio

In addition to the cash reserve ratio, a bank is required to maintain a specified percentage of its net demand and time liabilities by way of liquid assets like cash, gold or approved unencumbered securities. The percentage of this liquidity ratio is fixed by the Reserve Bank of India from time to time, and must be a minimum of 24.0% and a maximum of 40.0% pursuant to section 24 of the Banking Regulation Act. See also

“Overview of the Indian Financial Sector—Recent Structural Reforms—Proposed Amendments to the Banking Regulation Act”. With effect from December 18, 2010, the Reserve Bank of India had reduced the statutory liquidity

ratio from 25% to 24%. In its first quarter review on July 31, 2012, the Reserve Bank of India reduced the statutory liquidity ratio to 23.0%.

Ownership Restrictions

The government of India regulates foreign ownership in Indian banks. The total foreign ownership in a private sector bank, like us, cannot exceed 74.0% of the paid-up capital, and shares held by foreign institutional investors under portfolio investment schemes through stock exchanges cannot exceed 49.0% of the paid-up capital.

The Reserve Bank of India's acknowledgement is required for the acquisition or transfer of a bank's shares which will take the aggregate holding (direct and indirect, beneficial or otherwise) of an individual or a group to the equivalent of 5.0% or more of the bank's total paid up capital. The Reserve Bank of India, while granting acknowledgement, may take into account all matters that it considers relevant to the application, including ensuring that shareholders whose aggregate holdings are above specified thresholds meet fitness and propriety tests. In determining whether the acquirer or transferee is fit and proper to be a shareholder, the Reserve Bank of India may take into account various factors including, but not limited to, the acquirer or transferee's integrity, reputation and track record in financial matters and compliance with tax laws, proceedings of a serious disciplinary or criminal nature against the acquirer or transferee and the source of funds for the investment.

The Reserve Bank of India issued guidelines on ownership and governance in private sector banks in February 2005. The key provisions of the guidelines on ownership are:

- No single entity or group of related entities would be permitted to directly or indirectly hold or control more than 10.0% of the paid up equity capital of a private sector bank and any higher level of acquisition would require the Reserve Bank of India's prior approval;
- In respect of corporate shareholders, the objective will be to ensure that no entity or group of related entities has a shareholding in excess of 10.0% in the corporate shareholder. In the case of shareholders that are financial entities, the objective will be to ensure that it is widely held, publicly listed and well regulated;
- The Reserve Bank of India may permit a higher level of shareholding in the case of the restructuring of problem banks or weak banks or in the interest of consolidation in the banking industry;
- No single non-resident Indian can invest in excess of 5.0% of the paid-up capital of a private sector bank. The aggregate limit for investments by non-resident Indians is restricted to 10.0% of a private sector bank's paid-up capital and can be increased to 24.0% of the bank's paid-up capital by approval of its board of directors;
- Banks would be responsible for compliance with the "fit and proper" criteria for shareholders on an ongoing basis; and
- Banks where shareholders holdings are in excess of the prescribed limit would have to indicate a plan for compliance.

A legislation has been introduced in the Parliament to amend the Banking Regulation Act making the prior approval of the Reserve Bank of India mandatory for the acquisition of more than 5.0% of a banking company's paid up capital or voting rights by any individual or firm or group. Approval of this amendment is still awaited.

In February 2009, the government of India issued guidelines for calculation of total foreign investment, both direct and indirect, in Indian companies. Pursuant to this guideline, the foreign shareholding in an Indian company which is not majority owned and controlled by Indian shareholders will be taken into account in computing the foreign shareholding in investee companies of such Indian company (other than investee companies in the insurance sector, for which there are separate specific regulations). Since foreign ownership up to 74% is permitted in Indian private

sector banks, such as us, this would impact investments made by Indian private sector banks, including us, and their subsidiaries, in other companies. This would also require assessment of whether any of the Indian shareholders are to be reckoned for purposes of adherence to the foreign ownership limit of 74%. This does not, however, impact our investments in our insurance subsidiaries. We have sought clarification from the Department of Industrial Policy and Promotion on our status and that of our subsidiaries under these guidelines, which are awaited.

Holding Companies

In the annual policy review for fiscal 2011, the Reserve Bank of India announced the formation of a working group, with representatives from the government, various regulatory authorities and banks, to draw a roadmap for the introduction of holding company structure. The report of the working group was released in May 2011 with key recommendations favoring a financial holding company structure for the financial sector, particularly large financial groups, with a separate regulatory framework for these holding companies.

Restrictions on Payment of Dividends

The Banking Regulation Act requires banks to completely write off capitalized expenses and transfer 20.0% of the disclosed yearly profit to a reserve account before declaring a dividend.

Banks have to comply with the following prudential requirements to be eligible to declare dividends:

- The capital adequacy ratio is at least 9.0% for the preceding two completed years and the accounting year for which the bank proposes to declare a dividend.
 - The net non-performing asset ratio is less than 7.0%.
- The Bank is in compliance with the prevailing regulations and guidelines issued by the Reserve Bank of India, including the creation of adequate provision for the impairment of assets, staff retirement benefits, transfer of profits to statutory reserves, etc.
 - The proposed dividend will be paid out of the current year's profit.
- The Reserve Bank of India has not placed any explicit restrictions on the bank regarding the declaration of dividends.

In case a bank does not meet the capital adequacy norms for two consecutive years, but has a capital adequacy ratio of at least 9.0% for the accounting year for which it proposes to declare a dividend, it would be eligible to do so if its net non-performing asset ratio is less than 5.0%.

Banks that are eligible to declare dividends under the above rules can do so subject to the following:

- The dividend payout ratio (calculated as a percentage of dividend payable in a year to net profit during the year) must not exceed 40.0%. The maximum permissible dividend payout ratio would vary from bank to bank, depending on the capital adequacy ratio in each of the last three years and the net non-performing asset ratio.
- In case the profit for the relevant period includes any extraordinary income, the payout ratio must be calculated after excluding that income for compliance with the prudential payout ratio.
- The financial statements pertaining to the financial year for which the bank is declaring a dividend should be free of any qualification by the statutory auditors, which might have an adverse effect on the profit during that year. In case there are any such qualifications, the net profit should be suitably adjusted while computing the dividend payout ratio.

Moratorium, Reconstruction and Amalgamation of Banks

The Reserve Bank of India can apply to the government of India for suspension of business by a banking company. The government of India, after considering the application of the Reserve Bank of India, may order a moratorium staying commencement of action or proceedings against such company for a maximum period of six months. During such period of moratorium, the Reserve Bank of India may (a) in the public interest; (b) in the interest of the depositors; (c) in order to secure the proper management of the bank; or (d) in the interests of the banking system of the country as a whole, prepare a scheme for the reconstruction of the bank or merger of the bank with any other bank. In circumstances entailing reconstruction of the bank or merger of the bank with another

bank, the Reserve Bank of India invites suggestions and objections on the draft scheme prior to placing the scheme before the government of India for its approval. The central government may approve the scheme with or without modifications. The law does not require consent of the shareholders or creditors of such banks.

Regulations on Mergers between Private Sector Banks and between Banks and Non-banking Finance Companies

In May 2005, the Reserve Bank of India issued guidelines on mergers between private sector banks and between banks and non-banking finance companies. The guidelines particularly emphasize the examination of the rationale for merger, the systemic benefits arising from it and the advantages accruing to the merged entity. With respect to a merger between two private sector banks, the guidelines require the draft scheme of merger to be approved by the shareholders of both banks with a two-thirds majority after approval by the boards of directors of the two banks concerned. The draft scheme should also consider the impact of merger on the valuation, profitability and capital adequacy ratio of the amalgamating bank and verify that the reconstituted board conforms to the Reserve Bank of India norms. The approved scheme needs to be submitted to the Reserve Bank of India for valuation and approval in accordance with the Banking Regulation Act, along with other documentation such as the draft document of proposed merger, copies of all relevant notices and certificates, swap ratio, share prices, etc. With respect to a merger of a bank and a non-banking company, the guidelines specify that the non-banking financial company has to comply with Know Your Customer norms for all accounts and all relevant norms issued by the Reserve Bank of India and the Securities and Exchange Board of India. The non-banking finance company should also conform to insider trading norms issued by the Securities and Exchange Board of India, whether it is listed or not, in order to regulate the promoter's trading of shares before and after the merger discussion period.

Credit Information Bureaus

The Parliament of India has enacted the Credit Information Companies (Regulation) Act, 2005, pursuant to which every credit institution, including a bank, has to become a member of a credit information bureau and furnish to it such credit information as may be required of the credit institution by the credit information bureau about persons who enjoy a credit relationship with it. Other credit institutions, credit information bureaus and such other persons as the Reserve Bank of India specifies may access such disclosed credit information.

Financial Stability and Development Council and Financial Sector Legislative Reforms Commission

The Indian government set up an apex-level body called the Financial Stability and Development Council in fiscal 2011. This is an independent body that oversees regulation and strengthens mechanisms for maintaining financial stability. The institution monitors macro-prudential supervision of the economy and the functioning of large financial conglomerates addresses inter-regulatory coordination issues and focuses on financial literacy and financial inclusion activities. The government has also set up a Financial Sector Legislative Reforms Commission to review the financial sector laws and to bring them in line with the requirements of the sector.

In August 2010, the parliament passed the Securities and Insurance Laws (Amendment and Validation) Bill, 2010, which provides a mechanism to settle disputes between regulators. A committee chaired by the Finance Minister, with the governor of the Reserve Bank of India as vice chairperson and chairpersons of Securities and Exchange Board of India, Insurance Regulatory and Development Authority of India, Pension Fund Regulatory of India and Development Authority and secretaries of Department of Economic Affairs and Department of Financial Services would make the final decision on such disputes.

Microfinance Institutions

A sub-committee of the Central Board of the Reserve Bank of India was established to study issues and concerns in the Indian microfinance industry and submitted its report in January 2011. The recommendations of the committee include, inter alia, margin and rate caps on loans by such institutions and transparency in interest charges. The Reserve Bank of India has accepted the broad framework recommended by the committee. In July 2011, the government released the draft Micro Financial Sector (Development and Regulation) Bill, 2011, seeking to bring all microfinance institutions under the regulation of the Reserve Bank of India. In the second

quarter monetary policy review for fiscal 2012, the Reserve Bank of India accepted the recommendations of the Malegam committee report and decided to introduce a new category of non-banking financial company — microfinance institutions. These microfinance non-banking finance companies would require a minimum net worth of Rs. 50 million and a minimum capital adequacy of 15.0% of risk weighted assets, with interest on individual loans capped at 25.0% per annum with an aggregate margin cap of 12.0%.

Regulations Governing Use of Business Correspondents

To increase the outreach of banking and ensure greater financial inclusion, in January 2006 the Reserve Bank of India issued guidelines for the engagement of Business Correspondents by banks providing banking and financial services. Business Correspondents are agents engaged by banks to provide banking services at locations other than a bank branch. Business Correspondents offer a limited range of banking services at low cost, as setting up a brick and mortar branch may not be viable in all areas. Banks are required to take full responsibility for the acts of omission and commission of the Business Correspondents that they engage and to conduct due diligence for minimizing agency risks. When the Business Correspondent model was introduced in January 2006, the entities permitted to act as Business Correspondents included individuals such as retired bank employees, retired teachers, individual owners of kirana (small, independent grocery stores), medical and fair price shops and certain other individuals. The non-individual entities included Non-Government Organizations or Micro Finance Institutions set up under Societies/Trust Acts, societies registered under Mutually Aided Cooperative Societies Acts or the Cooperative Societies Acts of States, Section 25 companies and post offices. This list was eventually expanded to include Section 25 companies, provided the companies are stand-alone entities or Section 25 companies in which non-banking finance companies, banks, telecom companies and other corporate entities or their holding companies do not have holdings in excess of 10%. Also, from September 2010, banks are allowed to engage for-profit companies registered under the Indian Companies Act, 1956, excluding non-banking finance companies, as Business Correspondents in addition to the individuals/entities permitted earlier.

Requirements of the Banking Regulation Act

Prohibited Business

The Banking Regulation Act specifies the business activities in which a bank may engage. Banks are prohibited from engaging in business activities other than the specified activities.

Reserve Fund

Any bank incorporated in India is required to create a reserve fund to which it must transfer not less than 25.0% of the profits of each year before dividends. If there is an appropriation from this account, the bank is required to report the same to the Reserve Bank of India within 21 days, explaining the circumstances leading to such appropriation. The government of India may, on the recommendation of the Reserve Bank of India, exempt a bank from requirements relating to its reserve fund.

Restriction on Share Capital and Voting Rights

Banks can issue only ordinary shares. The Banking Regulation Act currently specifies that no shareholder in a banking company can exercise voting rights on poll in excess of 10.0% of total voting rights of all the shareholders of the banking company.

In 2006, the Indian Parliament amended the laws governing India's public sector banks permitting these banks to issue preference shares and make preferential allotments or private placements of equity. According to current provisions

private sector banks in India are not permitted to issue preference shares. Legislation has been introduced in the Parliament to amend the Banking Regulation Act to allow all banks to issue redeemable and non-redeemable preference shares. Prior to the merger, ICICI had preference share capital of Rs. 3.5 billion redeemable in 2018. The government of India, on the recommendation of the Reserve Bank of India, had granted us an exemption which allowed the inclusion of preference capital in our capital structure until the maturity of these shares. However, the Reserve Bank of India, in March 2010, issued a guideline requiring all commercial banks to treat preference shares as borrowings.

Legislation has been introduced in the Indian parliament to amend the Banking Regulation Act to remove the limit of 10.0% on the maximum voting power exercisable by a shareholder in a banking company and to allow banks to issue redeemable and non-redeemable preference shares. See also “Overview of the Indian Financial Sector—Recent Structural Reforms—Proposed Amendments to the Banking Regulation Act”.

Restrictions on Investments in a Single Company

No bank may hold shares, as a pledgee, mortgagee or absolute owner in any company other than a subsidiary, exceeding 30.0% of the paid up share capital of that company or 30.0% of its own paid up share capital and reserves, whichever is less. In December 2011, the Reserve Bank of India issued guidelines on banks’ investments in non-financial services companies, under which equity investment by a bank in companies engaged in non-financial services activities was limited to 10% of the investee company’s paid up share capital.

Regulatory Reporting and Examination Procedures

The Reserve Bank of India is authorized under the Banking Regulation Act to inspect a bank. The Reserve Bank of India monitors prudential parameters at quarterly intervals. To this end and to enable off-site monitoring and surveillance by the Reserve Bank of India, banks are required to report to the Reserve Bank of India on aspects such as:

- assets, liabilities and off-balance sheet exposures;
- the risk weighting of these exposures, the capital base and the capital adequacy ratio;
- the unaudited operating results for each quarter;
- asset quality;
- concentration of exposures;
- connected and related lending and the profile of ownership, control and management; and
- other prudential parameters.

The Reserve Bank of India also conducts periodic on-site inspections on matters relating to the bank’s portfolio, risk management systems, internal controls, credit allocation and regulatory compliance, at intervals ranging from one to three years. We are subject to the on-site inspection by the Reserve Bank of India at yearly intervals. The inspection report, along with the report on actions taken by us, has to be placed before our Board of Directors. On approval by our Board of Directors, we are required to submit the report on actions taken by us to the Reserve Bank of India. The Reserve Bank of India also discusses the report with our management team, including the Managing Director and CEO.

The Reserve Bank of India also conducts on-site supervision of selected branches with respect to their general operations and foreign exchange related transactions.

Appointment and Remuneration of the Chairman, Managing Director and Other Directors

We are required to obtain prior approval of the Reserve Bank of India before we appoint our chairman, managing director and any other executive directors and fix their remuneration. The Reserve Bank of India is authorized to

remove an appointee from the posts of chairman, managing director and other executive directors on the grounds of public interest, interest of depositors or to ensure our proper management. Further, the Reserve Bank of India may order meetings of our Board of Directors to discuss any matter in relation to us, appoint observers to such meetings and in general may make such changes to the management as it may deem necessary and may also order the convening of a general meeting of our shareholders to elect new directors. We cannot appoint as a director any person who is a director of another banking company. The Reserve Bank of India has issued guidelines on 'fit and proper' criteria for directors of banks. Our directors must satisfy the requirements of these guidelines.

On January 13, 2012, the Reserve Bank of India issued guidelines on the compensation of whole-time directors/chief executive officers/risk takers and control function staff of private sector and foreign banks operating in India. The guidelines include principles for effective governance of compensation, alignment of compensation with risk taking and effective supervisory oversight and engagement by stakeholders.

Penalties

The Reserve Bank of India may impose penalties on banks and its employees in case of infringement of regulations under the Banking Regulation Act. The penalty may be a fixed amount or may be related to the amount involved in any contravention of the regulations. The penalty may also include imprisonment. A press release has been issued by the Reserve Bank of India giving details of the circumstances under which the penalty is imposed on the bank along with the communication on the imposition of the penalty in public domain. The banks are also required to disclose the penalty in their annual report. In April 2008, the Reserve Bank of India issued guidelines for banks engaging recovery agents. Under these guidelines, the Reserve Bank of India may ban banks from engaging recovery agents in a particular area, either jurisdictional or functional, for a limited period, in case of complaints received by the regulator regarding violation of the above guidelines and adoption of abusive practices followed by banks' recovery agents. In case of persistent breach of above guidelines, the Reserve Bank of India may consider extending the period of ban or the area of ban. Similar supervisory action could be attracted when the High Courts or the Supreme Court pass strictures or impose penalties against any bank or its directors/officers/agents with regard to policy, practice and procedure related to the recovery process.

Assets to be Maintained in India

Every bank is required to ensure that its assets in India (including import-export bills drawn in India and the Reserve Bank of India approved securities, even if the bills and the securities are held outside India) are not less than 75.0% of its demand and time liabilities in India.

Restriction on Creation of Floating Charge

Prior approval of the Reserve Bank of India is required for creating floating charge on our undertaking or property. Currently, all of our borrowings, including bonds, are unsecured.

Maintenance of Records

We are required to maintain books, records and registers. The Banking Regulation Act specifically requires banks to maintain books and records in a particular manner and file the same with the Registrar of Companies on a periodic basis. The provisions for production of documents and availability of records for inspection by shareholders as stipulated under the Companies Act and the rules thereunder would apply to us as in the case of any company. The Know Your Customer Guidelines framed by the Reserve Bank of India also provide for certain records to be updated every five years. As per the Prevention of Money Laundering Act, records of a transaction are to be preserved for 10 years from the date of the transaction between a customer and a bank.

Secrecy Obligations

Our obligations relating to maintaining secrecy arise out of common law principles governing our relationship with our customers. We cannot disclose any information to third parties except under clearly defined circumstances. The following are the exceptions to this general rule:

- where disclosure is required to be made under any law;

- where there is an obligation to disclose to the public;
- where we need to disclose information in its interest; and
- where disclosure is made with the express or implied consent of the customer.

We are also required to disclose information if ordered to do so by a court. The Reserve Bank of India may, in the public interest, publish the information obtained from the bank. Under the provisions of the Banker's Books Evidence Act, a copy of any entry in a bankers' book, such as ledgers, day books, cash books and account books certified by an officer of the bank may be treated as prima facie evidence of the transaction in any legal proceeding.

Regulations Governing Offshore Banking Units

The government and the Reserve Bank of India have permitted banks to set up offshore banking units in Special Economic Zones, which are specially delineated duty-free enclaves deemed to be foreign territory for the purpose of trade operations, duties and tariffs. We have an offshore banking unit located in the Santacruz Electronic Exports Promotion Zone, Mumbai. The key regulations applicable to offshore banking units include, but are not limited to, the following:

- No separate assigned capital is required. However, the parent bank is required to provide a minimum of U.S.\$ 10 million to its offshore banking unit.
 - Offshore banking units are exempt from cash reserve ratio requirements.
- The Reserve Bank of India may exempt a bank's offshore banking unit from statutory liquidity ratio requirements on specific application by the bank.
- An offshore banking unit may not enter into any transactions in foreign exchange with residents in India, unless such a person is eligible to enter into or undertake such transactions under the Foreign Exchange Management Act, 1999.
 - All prudential norms applicable to overseas branches of Indian banks apply to offshore banking units.
- Offshore banking units are required to adopt liquidity and interest rate risk management policies prescribed by the Reserve Bank of India in respect of overseas branches of Indian banks as well as within the overall risk management and asset and liability management framework of the bank subject to monitoring by the bank's board of directors at prescribed intervals. Further, the bank's board would be required to set comprehensive overnight limits for each currency for these branches, which would be separate from the open position limit of the parent bank.
- Offshore banking units may raise funds in convertible foreign currency as deposits and borrowings from non-residents including non-resident Indians but excluding overseas corporate bodies.
 - Offshore banking units may operate and maintain balance sheets only in foreign currency.
- The loans and advances of offshore banking units would not be reckoned as net bank credit for computing priority sector lending obligations.
- Offshore banking units must follow the Know Your Customer guidelines and must be able to establish the identity and address of the participants in a transaction, the legal capacity of the participants and the identity of the beneficial owner of the funds.
- The Special Economic Zone Act, 2005 permitted offshore banking units to additionally undertake the following activities:

- lend outside India and take part in international syndications/consortiums on par with foreign offices.
 - invest in foreign currency denominated debt of Indian units; and
 - extend facilities to subsidiaries/units of Indian entities, located outside India.

Consolidated Supervision Guidelines

In fiscal 2003, the Reserve Bank of India issued guidelines for consolidated accounting and consolidated supervision for banks. These guidelines became effective April 1, 2003. The principal features of these guidelines are:

Consolidated Financial Statements: Banks are required to prepare consolidated financial statements intended for public disclosure.

Consolidated Prudential Returns: Banks are required to submit to the Reserve Bank of India consolidated prudential returns reporting their compliance with various prudential norms on a consolidated basis, excluding insurance subsidiaries and group companies engaged in businesses not pertaining to financial services. Compliance on a consolidated basis is required in respect of the following main prudential norms:

- single borrower exposure limit of 15.0% of capital funds (20.0% of capital funds, provided that the additional exposure of up to 5.0% is for the purpose of financing infrastructure projects);
- borrower group exposure limit of 40.0% of capital funds (50.0% of capital funds, provided that the additional exposure of up to 10.0% is for the purpose of financing infrastructure projects);
- deduction from tier I capital of the bank of any shortfall in capital adequacy of a subsidiary for which capital adequacy norms are specified; and
- consolidated capital market exposure limit of 40.0% of consolidated net worth with a direct investment limit of 20.0% of consolidated net worth.

See also “Business—Loan Portfolio—Loan Concentration”.

In June 2004, the Reserve Bank of India published the report of a working group on the monitoring of financial conglomerates, which proposed the following framework:

- identification of financial conglomerates that would be subjected to focused regulatory oversight;
- monitoring intra-group transactions and exposures and large exposures of the group to outside counter parties;
- identifying a designated entity within each group that would collate data in respect of all other group entities and furnish the same to its regulator; and
- formalizing a mechanism for inter-regulatory exchange of information.

The framework covers entities under the jurisdiction of the Reserve Bank of India, the Securities and Exchange Board of India, the Insurance Regulatory and Development Authority and the National Housing Bank and would in due course be extended to entities regulated by the proposed Pension Fund Regulatory and Development Authority. The Reserve Bank of India has identified us and our related entities as a financial conglomerate with ICICI Bank as the designated entity responsible for reporting to the Reserve Bank of India.

Regulations and Guidelines of the Securities and Exchange Board of India

The Securities and Exchange Board of India was established to protect the interests of public investors in securities and to promote the development of and to regulate the Indian securities market. We and our subsidiaries and affiliates

are subject to the Securities and Exchange Board of India regulations for public capital issuances, as well as underwriting, custodial, depository participant, investment banking, brokering, asset management and debenture trusteeship activities. These regulations provide for our registration with the Securities and Exchange Board of India for each of these activities, functions and responsibilities. We and our subsidiaries are required to adhere to codes of conduct applicable for these activities.

260

Special Status of Banks in India

The special status of banks is recognized under various statutes including the Sick Industrial Companies Act, 1985, Recovery of Debts Due to Banks and Financial Institutions Act, 1993, and the Securitization Act. As a bank, we are entitled to certain benefits under various statutes including the following:

- The Recovery of Debts Due to Banks and Financial Institutions Act, 1993 provides for establishment of Debt Recovery Tribunals for expeditious adjudication and recovery of debts due to any bank or Public Financial Institution or to a consortium of banks and Public Financial Institutions. Under this Act, the procedures for recoveries of debt have been simplified and time frames have been fixed for speedy disposal of cases. Upon establishment of the Debt Recovery Tribunal, no court or other authority can exercise jurisdiction in relation to matters covered by this Act, except the higher courts in India in certain circumstances.
- The Sick Industrial Companies Act, 1985, provides for referral of sick industrial companies to the Board for Industrial and Financial Reconstruction. Under the Act, other than the board of directors of a company, a scheduled bank (where it has an interest in the sick industrial company by any financial assistance or obligation, rendered by it or undertaken by it) may refer the company to the Board of Industrial and Financial Reconstruction.
- The Securitization Act focuses on improving the rights of banks and financial institutions and other specified secured creditors as well as asset reconstruction companies by providing that such secured creditors can take over management control of a borrower company upon default and/or sell assets without the intervention of courts, in accordance with the provisions of the Securitization Act.

Income Tax Benefits

As a banking company, the Bank is entitled to certain tax benefits under the Indian Income-tax Act including the following:

- We are allowed a deduction of up to 20% of the profits derived from the business of providing long-term finance (defined as loans and advances extended for a period of not less than five years) computed in the manner specified under the Indian Income-tax Act and carried to a Special Reserve account. The deduction is allowed subject to the aggregate of the amounts transferred to the Special Reserve Account for this purpose from time to time not exceeding twice our paid-up share capital and general reserves. The amount withdrawn from such a Special Reserve Account would be chargeable to income tax in the year of withdrawal, in accordance with the provisions of the Income-tax Act.
- We are entitled to a tax deduction, for income from an offshore banking unit in a special economic zone, at the rate of 100.0% for a period of five consecutive years beginning with the year in which permission under Banking Regulation Act, 1949 is obtained, i.e., up to March 31, 2008 for Offshore Banking Unit in Santacruz Electronics Export Processing Zone, Mumbai and 50.0% deduction for a period of five consecutive years thereafter in accordance with and subject to the conditions prescribed therein.

Regulations Governing Insurance Companies

ICICI Prudential Life Insurance Company and ICICI Lombard General Insurance Company, our subsidiaries offering life insurance and non-life insurance respectively, are subject to the provisions of the Insurance Act, 1938 and the various regulations prescribed by the Insurance Regulatory and Development Authority. These regulations regulate and govern, among other things, registration as an insurance company, investment, solvency margin requirements, licensing of insurance agents, advertising, sale and distribution of insurance products and services and protection of

policyholders' interests.

In May 2002, the Indian Parliament approved the Insurance (Amendment) Act 2002, which facilitates the appointment of corporate agents by insurance companies and prohibits intermediaries and brokers from operating as surrogate insurance agents. The Indian government has proposed an increase in the limit on foreign equity

261

participation in private sector insurance companies from 26.0% to 49.0%, which is awaiting Parliament's approval. Also, the current policy requires the Indian promoter to reduce its stake to 26.0% after completion of 10 years of operations in a manner that would be prescribed by the regulator. The new Insurance Amendment Bill 2008 introduced in Parliament proposes to remove this restriction on divestment by Indian promoters.

The Insurance Regulatory and Development Authority periodically issues guidelines pertaining to life insurance business. The Insurance Regulatory and Development Authority has issued guidelines introducing a cap on charges levied on customers investing in equity linked life insurance policies and unit-linked insurance products. For unit-linked insurance products, the difference between gross and net yields are capped at 300 basis points for products with a tenor of less than 10 years and 225 basis points for products with a tenor more than 10 years. The fund management charges within these charges are capped at 150 basis points and 125 basis points for products with tenors of less than 10 years and more than 10 years respectively. Further, it has been clarified that mortality and morbidity charges are not a part of the cap, and any policy surrender charges from the fifth policy year onwards for unit-linked products have been removed. In September 2009, the transfer of agency/corporate agency from one insurer to another was restricted.

The life insurance industry had to incorporate specific changes in its product offering as mandated by the Insurance Regulatory and Development Authority, with effect from September 1, 2010. The changes specified include a cap on surrender charges, an increase in the minimum premium paying term and minimum guaranteed positive returns on pension products. The minimum guaranteed return of 4.5% on pension products was applicable up to year-end fiscal 2011, and was withdrawn beginning fiscal 2012. The Insurance Regulatory and Development Authority released draft guidelines on bancassurance (i.e., the practice of banks selling insurance products in a marketing arrangement with insurance companies) in November 2011, under which banks cannot align with more than one life, one non-life and one standalone health insurance company in any of the zones in the country, as defined by the regulator. Correspondingly, no insurer can tie up with a bancassurance agent in more than a specified number of zones. Final guidelines on bancassurance are awaited.

With regard to guidelines pertaining to the general insurance industry, in fiscal 2007, the general insurance industry in India was de-tariffed and insurance premiums were freed from price controls. In March 2011, the Insurance Regulatory and Development Authority decided that all general insurance companies were required to provide for losses on the third party motor pool at a provisional rate of 153.0% over fiscal 2008 to fiscal 2011 compared to the earlier loss rate of 122.0%-127.0%. Further, based on the results of an evaluation instituted to determine the loss rates of the third party motor pool released on January 3, 2012, the loss rates were further revised upwards to 159% for fiscal 2008, 188% for fiscal 2009, 200% for fiscal 2010 and 213% for fiscal 2011. Further, pursuant to the decision to dismantle the third party motor pool by the Insurance Regulatory and Development Authority, effective April 1, 2012, the above loss rates will be applicable till March 31, 2012 and a Declined Risk Pool has been created in its place. Under this Pool approach, insurers will cede only those policies to the pool that they would not consider underwriting themselves. Insurers have been mandated to underwrite motor pool policies to the extent of the sum of 50% of their share in total gross premium and 50% share in total motor premium. Any shortfall against this requirement will be allocated to the insurers from the Declined Risk Pool. Additionally, as against the earlier approach of ceding all third party premiums including those related to comprehensive policies, under the Declined Risk Pool framework, only specific third party insurance premiums will be pooled. Accordingly, under this approach, the size of the pool is expected to decline substantially and the allocation of losses to individual insurers will be based on their ability to meet the mandated targets. Further, the Insurance Regulatory and Development Authority relaxed the Solvency requirements for insurers to 1.3 at March 2012, 1.4 at March 2013, 1.5 at March 2014 and thereafter at all times. See also "Risk Factors—Risks Relating to Our Business—The regulatory environment for financial institutions is facing unprecedented change in the post-financial crisis environment".

In December 2011, the Insurance Regulatory and Development Authority issued regulations on the issue of capital by life insurance companies and disclosure requirements. As per the guidelines, an insurance company can raise share capital through a public issue after completion of 10 years from the date of commencement of operations, having maintained the prescribed regulatory solvency margin for at least the preceding six quarters, and an embedded value of at least twice the paid up equity capital.

Regulations Governing Mutual Funds

ICICI Prudential Asset Management Company, our asset management subsidiary, is subject to provisions of the Securities and Exchange Board of India (Mutual Fund) Regulations 1996, as amended from time to time. These regulations regulate and govern, among other things, registration as a mutual fund, restrictions on business activities of an asset management company, process for launching of mutual fund schemes, investment objectives and valuation policies and pricing. In June 2009, the Securities and Exchange Board of India issued guidelines stating that mutual funds could not charge any entry load to investors investing in mutual fund schemes. In August 2009, the Securities and Exchange Board of India issued guidelines directing mutual funds to ensure parity of exit loads charged across various unit holder groups.

In February 2010, the Securities and Exchange Board of India introduced guidelines for the valuation of money market and debt securities with a view to ensuring that the value of money market and debt securities in the portfolio of mutual fund schemes reflects the current market scenario. The valuation guidelines have been effective from August 1, 2010.

Regulations Governing International Operations

Our international operations are governed by regulations in the countries in which we have a presence.

Overseas Banking Subsidiaries

Our wholly-owned subsidiary in the United Kingdom, ICICI Bank UK PLC, is authorized and regulated by the Financial Services Authority, which granted its application for authorization under Part IV of the Financial Services and Markets Act, 2000. The UK subsidiary has established a branch in Antwerp, Belgium under the European Union Passporting arrangements and also opened a branch in Frankfurt, Germany. The UK subsidiary implemented the Basel II capital adequacy framework for calculating minimum capital requirements effective January 1, 2008.

Our wholly owned subsidiary in Canada, ICICI Bank Canada (a Schedule II Bank in Canada), is regulated by the Office of the Superintendent of Financial Institutions, which provided it with an order to commence and carry on business on November 25, 2003. ICICI Bank Canada's wholly owned subsidiary, ICICI Wealth Management Inc., is regulated by Ontario Securities Commission, which licensed it as a Limited Market Dealer, on March 2, 2007. The Canadian subsidiary adopted the capital adequacy framework (Basel II) as required by the Office of the Superintendent of Financial Institutions effective January 1, 2008.

Our wholly-owned subsidiary in Russia, ICICI Bank Eurasia Limited Liability Company, is regulated by the Central Bank of the Russian Federation. The capital requirements prescribed by the Central Bank of Russia, which are based on Basel I, are applicable for ICICI Bank Eurasia Limited Liability Company.

Offshore Branches

The Foreign Exchange Management (Borrowing or Lending in Foreign Exchange) Regulations, 2000, as amended, and rules issued thereunder, permit a branch located outside India of a bank incorporated or constituted in India to borrow in foreign currency in the normal course of its banking business outside India, subject to the directions or guidelines issued by the Reserve Bank of India from time to time and the Regulatory Authority of the country where the branch is located.

Our Singapore branch is currently engaged in corporate and institutional banking, private banking and treasury-related activities. In April 2010, the Monetary Authority of Singapore granted the Singapore branch Qualified Full Banking

privileges which entitled us to take retail deposits. In Bahrain, we have an offshore branch, regulated by the Central Bank of Bahrain. The Bahrain branch is permitted to transact banking business with approved financial institutions within Bahrain, individuals or institutions outside Bahrain. It is also permitted to offer banking services to non-resident Indians in Bahrain. Our branch in Hong Kong is regulated by the Hong Kong Monetary Authority and is permitted to undertake banking business with certain restrictions. Our branch in Sri Lanka is

263

regulated by the Central Bank of Sri Lanka. Our branch in the Dubai International Financial Centre is regulated by the Dubai Financial Services Authority and is licensed to engage in the arrangement of credit or investment and to provide advice on financial products and services. The Qatar Financial Centre Regulatory Authority regulates our branch in Qatar. Our branch in New York is regulated by the Federal Reserve Board and the Office of the Comptroller of the Currency. In addition, we also have an Offshore Banking Unit located in the Santacruz Electronic Exports Promotion Zone, Mumbai.

Representative Offices

Our representative offices in United Arab Emirates, China, South Africa, Bangladesh, Malaysia, Thailand and Indonesia are regulated by the respective regulatory authorities.

EXCHANGE CONTROLS

Restrictions on Conversion of Rupees

There are restrictions on the conversion of rupees into dollars. Before February 29, 1992, the Reserve Bank of India determined the official value of the rupee in relation to a weighted basket of currencies of India's major trading partners. In the February 1992 budget, a new dual exchange rate mechanism was introduced by allowing conversion of 60.0% of the foreign exchange received on trade or current account at a market-determined rate and the remaining 40.0% at the official rate. All importers were, however, required to buy foreign exchange at the market rate except for certain specified priority imports. In March 1993, the exchange rate was unified and allowed to float. In February 1994 and again in August 1994, the Reserve Bank of India announced relaxations in payment restrictions in the case of a number of transactions. Since August 1994, the government of India has substantially complied with its obligations owed to the International Monetary Fund, under which India is committed to refrain from using exchange restrictions on current international transactions as an instrument in managing the balance of payments. Effective July 1995, the process of current account convertibility was advanced by relaxing restrictions on foreign exchange for various purposes, such as foreign travel and medical treatment.

The Foreign Exchange Management Act, 1999 regulates transactions involving foreign exchange and provides that certain transactions cannot be carried out without the general or special permission of the Reserve Bank of India. The Foreign Exchange Management Act, 1999 has substantially eased the restrictions on current account transactions (with a few exceptions). However, the Reserve Bank of India continues to exercise control over capital account transactions (i.e., those which alter the assets or liabilities, including contingent liabilities, of persons). The Reserve Bank of India has issued regulations under the Foreign Exchange Management Act, 1999 to regulate the various kinds of capital account transactions, including certain aspects of the purchase and issuance of shares of Indian companies. The Reserve Bank of India has also permitted authorized dealers to freely allow remittances by individuals up to U.S.\$ 200,000 per financial year for any permissible current or capital account transactions or a combination of both, under the Liberalized Remittance Scheme.

Restrictions on Sale of the Equity Shares underlying ADSs and Repatriation of Sale Proceeds

ADSs issued by Indian companies to non-residents have free transferability outside India. Under current Indian regulations and practice, approval of the Reserve Bank of India is not required for the sale of equity shares underlying ADSs by a non-resident of India to a resident of India if the sale has been executed on a recognized stock exchange in India through a registered broker at the prevailing market price. Approval of the Reserve Bank of India is not required for a sale of shares of a company other than a company in the financial services sector (banks, non-bank finance companies and insurance companies) and certain other specified sectors, even if the transfer is other than on a recognized stock exchange in India or through a registered broker, as long as conditions prescribed in the Reserve Bank of India guidelines are complied with. The same applies to a renunciation of rights to a resident of India. Foreign institutional investors registered with the Securities and Exchange Board of India are eligible to purchase shares of an Indian company under the Portfolio Investment Scheme. Certain limits are however prescribed by the Reserve Bank of India for investment through the Portfolio Investment Scheme. Approval of the Reserve Bank of India is not required for a sale of shares under the Portfolio Investment Scheme prescribed by the Reserve Bank of India provided the sale is made on a recognized stock exchange and through a registered stock broker.

If a sale of securities has taken place in terms of the Reserve Bank of India guidelines and other applicable regulations, as briefly described in the previous paragraph, then provided (i) the securities were held on repatriation basis, (ii) the shares have been sold on a recognized stock exchange in India through a stock broker at the ruling market price as determined on the floor of the exchange and (iii) a no objection/tax clearance certificate from income tax authority has been obtained, the sale proceeds may be freely remitted. If a sale was made pursuant to specific

approval of the Reserve Bank of India, then sale proceeds can be remitted as per the terms of such an approval. If the equity shares underlying ADSs are sold under the Portfolio Investment Scheme, then the sale proceeds may be remitted through an authorized dealer, without the approval of the Reserve Bank of India, provided that the equity shares are sold on a recognized stock exchange through a registered stock broker and a no objection/tax clearance certificate from the income-tax authority has been produced.

After the announcement of India's budget for fiscal 2002, the Reserve Bank of India issued certain notifications for the liberalization of the capital account. Pursuant to the notifications, in contrast to prior regulations, two-way fungibility in ADS/GDR issues of Indian companies was introduced, subject to sectoral caps, wherever applicable. On April 1, 2011 a new edition of Consolidated Foreign Direct Investment Policy came into effect, to further liberalize capital account transactions.

The Reserve Bank of India issued a notification under the provisions of the Foreign Exchange Management Act, 1999, permitting a registered broker in India to purchase shares of any Indian company on behalf of a person resident outside India, for the purpose of converting the shares so purchased into ADSs, provided that:

- the shares are purchased on a recognized stock exchange;
- the Indian company has issued ADSs;
- the shares are purchased with the permission of the custodian of ADSs of the concerned Indian company and are deposited with the custodian;
- the number of shares so purchased shall not exceed the number of ADSs converted into underlying shares and shall be subject to sectoral caps as applicable; and
- the non-resident investor, broker, custodian and the overseas depository comply with the provisions of the Scheme for Issue of Foreign Currency Convertible Bonds and Ordinary Shares (through Depository Receipt Mechanism) Scheme, 1993 and the guidelines issued there under by the government of India from time to time.

On November 23, 2002, the government of India's Ministry of Finance issued Operative Guidelines for Disinvestment of Shares by the Indian Companies in the Overseas Market through the Issue of ADSs. Under these guidelines, the shareholders may divest their holdings in the overseas market through the mechanism of a sponsored ADS issue by the Indian company. The holdings which may be divested are holdings in Indian companies which are listed either in India or on an overseas exchange. The divestment process is initiated when the Indian company whose shares are being offered for divestment in the overseas market sponsors an ADS issue against the block of existing shares offered by the shareholders under these guidelines. Such ADS issues against existing shares offered for divestment must also comply with the Securities and Exchange Board of India (Substantial Acquisition of Shares and Takeover) Regulations, 1997, if ADSs are cancelled and the underlying shares are to be registered with the company. Such divestment would result in foreign equity investment and would also need to conform to the foreign direct investment sectoral policy. All mandatory approvals including those under the Companies Act, 1956 and the approval of the Foreign Investment Promotion Board for foreign equity induction through the offer of existing shares would have to be obtained.

The Reserve Bank of India has permitted Indian companies to retain abroad, for any period, the funds raised through an issue of ADSs (except funds raised under a sponsored issue of ADSs), in order to meet their future foreign exchange requirement. Further, pending repatriation or utilization, the Indian company may invest the foreign currency funds raised in:

- deposits or certificates of deposit or other products offered by banks who have been rated by Standard and Poor's Ratings Service/Fitch, IBCA or by Moody's Investors Service; and such rating not being less than the applicable rating stipulated by the Reserve Bank of India from time to time for the purpose.
- deposits with an overseas branch of an authorized dealer in India; and
- treasury bills and other monetary instruments with a maturity or unexpired maturity of one-year or less.

The Reserve Bank of India permits resident shareholders of Indian companies who offer their shares for conversion to ADSs to receive the sale proceeds in foreign currency. However, the conversion to such ADSs must have the approval of the Foreign Investment Promotion Board. Further, the sale proceeds received by residents are

266

permitted to be credited to their Exchange Earners' Foreign Currency/Resident Foreign Currency (Domestic) accounts or to their rupee accounts in India at their option.

267

RESTRICTION ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

The Government of India strictly regulates ownership of Indian companies by foreigners. Foreign investment in Indian securities, including the equity shares represented by ADSs, is generally regulated by the Foreign Exchange Management Act, 1999, which permits transactions involving the inflow or outflow of foreign exchange and authorizes the Reserve Bank of India to prohibit or regulate such transactions.

The Foreign Exchange Management Act, 1999 regulates transactions involving foreign exchange and provides that certain transactions cannot be carried out without the general or special permission of the Reserve Bank of India or the Foreign Investment Promotion Board of the government of India. The Foreign Exchange Management Act, 1999 has eased restrictions on current account transactions. However, the Reserve Bank of India continues to exercise control over capital account transactions (i.e., those which alter the assets or liabilities, including contingent liabilities, of persons). The Reserve Bank of India has issued regulations under the Foreign Exchange Management Act, 1999 to regulate the various kinds of capital account transactions, including certain aspects of the purchase and issuance of shares of Indian companies.

Under the foreign investment rules, the following are the restrictions on foreign ownership applicable to us:

- Foreign investors may own up to 74.0% (including by foreign institutional investors) of our equity share capital subject to conformity with guidelines issued by the Reserve Bank of India from time to time. The limit under the automatic route is 49.0% and does not require specific approval of the Foreign Investment Promotion Board. The limit under the approval route is beyond 49.0% and up to 74%. It includes investments by way of foreign direct investment, ADSs, Global Depository Receipts and investment under the Portfolio Investment Scheme by foreign institutional investors and also non-resident Indians, and also includes shares acquired by subscription to private placements and public offerings and acquisition of shares from existing shareholders. At all times, at least 26.0% of the paid up equity capital would have to be held by residents, except in regard to a wholly- owned subsidiary of a foreign bank. The Reserve Bank of India released its roadmap for foreign banks in India. The roadmap was divided into two phases. During the first phase, between March 2005 and March 2009, foreign banks were allowed to acquire a controlling stake in a phased manner only in private sector banks that are identified by the Reserve Bank of India for restructuring. The second phase was scheduled to commence in April 2009 after a review of the experience gained and after due consultation with all the stakeholders in the banking sector. For new and existing foreign banks, it was proposed to go beyond the existing commitment to the World Trade Organization of allowing an increase of 12 branches per year. A more liberal policy was to be followed for under-banked areas. However, in April 2009, in view of the deterioration in the global financial markets, the Reserve Bank of India decided to put on hold the second phase until greater clarity emerged on recovery as well as the reformed global regulatory and supervisory architecture. In January 2011, the Reserve Bank of India released a discussion paper on the Presence of Foreign Banks in India. It is expected that comprehensive guidelines on the mode of presence of foreign banks in India will be issued after consideration of comments on the discussion paper.
- Indian companies can raise foreign currency resources abroad through the issue of ADSs, in accordance with the Scheme for Issue of Foreign Currency Convertible Bonds and Ordinary Shares (through Depository Receipt Mechanism), 1993 (FCCB Scheme) and guidelines issued by the government of India there under from time to time. The policy for External Commercial Borrowings is also applicable to FCCBs. Under the FCCB Scheme, foreign investors may purchase ADSs, subject to the receipt of all necessary government approvals at the time the depository receipt program is set up. The government of India announced the Issue of Foreign Currency Exchangeable Bonds Scheme, 2008 on February 15, 2008 and the policy was implemented through a Reserve Bank of India circular dated September 23, 2008 to facilitate the issue of bonds expressed in a foreign currency exchangeable into equity shares of another group company.
-

Under the portfolio investment scheme, foreign institutional investors, subject to registration with the Securities and Exchange Board of India, may hold in aggregate up to 24.0% of paid-up equity capital, and this limit may be raised to the sectoral cap/statutory ceiling of 49.0%, subject to the approval of the board

of directors followed by the general body of the company passing a special resolution to that effect, provided that no single foreign institutional investor may own more than 10.0% of total paid-up equity capital on behalf of itself or its sub-accounts. The shareholding of an individual non-resident Indian is restricted to 5.0% of our total paid-up equity capital both on repatriation and non-repatriation basis. This limit may be raised to 24.0% by a special resolution at a general meeting of the shareholders of the company. Foreign institutional investors registered with the Securities and Exchange Board of India shall restrict the allocation of their total investment between equities and debt in the Indian capital market in a 70:30 ratio.

- A person residing outside India (other than a non-resident Indian and overseas corporate bodies) may transfer by way of sale or gift the shares or convertible debentures to any person residing outside India (including a non-resident Indian), subject to the requirement that the transferee obtain prior permission of the Secretarial for Industrial Assistance/Foreign Investment Promotion Board to acquire the shares if he has previous venture or tie-up in India through investment/technical collaboration/trade mark agreement in the same field in which the Indian company, whose shares are being transferred, is engaged. This restriction is, however, not applicable to the transfer of shares to international financial institutions such as The Asian Development Bank, International Financial Corporation, Commonwealth Development Corporation, Deutsche Entwicklungs Gesellschaft and transfer of shares to an Indian company engaged in information technology sector.
- The Reserve Bank of India guidelines relating to acquisition by purchase or otherwise of equity shares of a private sector bank, if such acquisition results in any person owning or controlling 5.0% or more of the paid up capital of the bank, are also applicable to non-resident investors investing in our shares. For more details on the Reserve Bank of India guidelines relating to acquisition by purchase or otherwise of shares of a private bank, see “Supervision and Regulation—Ownership Restrictions”.

Pursuant to a circular dated November 29, 2001, the Reserve Bank of India stated that, as of that date, overseas corporate bodies are not permitted to invest under the portfolio investment scheme, although they may continue to hold investments that have already been made under the portfolio investment scheme until such time as these investments are sold on the stock exchange. Overseas corporate bodies have been derecognized as a class of investor entity in India with effect from September 16, 2003. However, requests from such entities which are incorporated and not under the adverse notice of the Reserve Bank of India or the Securities and Exchange Board of India will be considered for fresh investments under the foreign direct investment scheme of the Reserve Bank of India with prior approval of the government of India or the Reserve Bank of India, as applicable.

An Indian company may sponsor an issue of ADSs with an overseas depository against shares held by its shareholders at a price to be determined by the lead manager. Under this mechanism the company offers its resident shareholders a choice to submit their shares back to the company so that on the basis of such shares, ADSs can be issued abroad. The proceeds of a sponsored ADR must be repatriated to India within a period of one month of the closure of the issue. The sponsoring company must comply with the provisions of the FCCB Scheme and the guidelines issued thereunder by the government of India from time to time. The sponsoring company must also furnish full details of the issue in the prescribed forms to the Reserve Bank of India within 30 days from the date of closure of the issue.

We obtained the approval of the Foreign Investment Promotion Board for our ADS offering in March 2000 and our sponsored ADS offering in March 2005, which were foreign direct investments. The investments through the portfolio investment scheme in the secondary market in India by foreign institutional investors, non-resident Indians and overseas corporate bodies and investments through the foreign direct investment scheme are distinct schemes that are available concurrently. As of June 30, 2012, foreign investors owned approximately 62.7% of our equity in total, of which 27.4% was through the ADS program.

An investor in ADSs does not need to seek the specific approval from the government of India to purchase, hold or dispose of ADSs. In the ADS offerings, we obtained the approval of the government of India’s Department of

Corporate Affairs and the relevant stock exchanges.

269

Equity shares which have been withdrawn from the depository facility and transferred on our register of shareholders to a person other than the depository or its nominee may be voted by that person provided the necessary procedural requirements have been met. However, you may not receive sufficient advance notice of shareholder meetings to enable you to withdraw the underlying equity shares and vote at such meetings.

Notwithstanding the foregoing, if a foreign institutional investor, non-resident Indian or overseas corporate body were to withdraw its equity shares from the ADS program, its investment in the equity shares would be subject to the general restrictions on foreign ownership noted above and may be subject to the portfolio investment restrictions. Secondary purchases of securities of a banking company in India by foreign direct investors or investments by non-resident Indians, overseas corporate bodies and foreign institutional investors above the ownership levels set forth above require the Indian government's approval on a case-by-case basis. It is unclear whether similar case-by-case approvals of ownership of equity shares withdrawn from the depository facility by foreign institutional investors, non-resident Indians and overseas corporate bodies would be required.

You will be required to make a public offer to the remaining shareholders to purchase the equity shares held by them if you withdraw your equity shares from the ADS program and your direct or indirect holding in us exceeds 15.0% of our total equity under the Securities and Exchange Board of India (Substantial Acquisition of Shares and Takeover) Regulations, 1997, as amended from time to time. Such a public offer would have to be made in compliance with the provisions of the aforesaid regulations of the Securities and Exchange Board of India. You will also require the acknowledgement of the Reserve Bank of India for the acquisition or transfer of our shares, which will take your aggregate holding (direct and indirect, beneficial or otherwise) as an individual or a group to the equivalent of 5.0% or more of our total paid up capital. The Reserve Bank of India, while granting acknowledgement, may take into account all matters that it considers relevant to the application, including ensuring that shareholders whose aggregate holdings are above specified thresholds meet fitness and propriety tests. For more details on the Reserve Bank of India guidelines relating to acquisition by purchase or otherwise of shares of a private bank, see "Supervision and Regulation—Ownership Restrictions".

ADSs issued by Indian companies to non-residents have free transferability outside India. Under current Indian regulations and practice, approval of the Reserve Bank of India is not required for the sale of equity shares underlying the ADSs by a non-resident of India to a resident of India if the sale has been executed on a recognized stock exchange in India through a registered broker at the prevailing market price. Approval of the Reserve Bank of India is also not required for a sale of shares of a company other than a company in the financial services sector (banks, non-bank finance companies and insurance companies), even if the transfer is other than on a recognized stock exchange in India or through a registered broker, as long as conditions generally prescribed by the Reserve Bank of India are complied with. The same restrictions apply to a renunciation of rights to a resident of India. Approval of the Reserve Bank of India is not required for sale of shares under the portfolio investment scheme prescribed by the Reserve Bank of India provided the sale is made on a recognized stock exchange and through a registered stock broker.

In February 2009, the government of India issued guidelines for the calculation of total foreign investment, both direct and indirect, in Indian companies. Pursuant to this guideline, the foreign shareholding in an Indian company which is not majority owned and controlled by Indian shareholders will be taken into account in computing the foreign shareholding in investee companies of such Indian company (other than investee companies in the insurance sector, for which there are separate specific regulations). Since foreign ownership up to 74% is permitted in Indian private sector banks, such as us, this would impact investments made by Indian private sector banks, including us, and their subsidiaries, in other companies. This would also require an assessment as to whether any of the Indian shareholders are to be included for purposes of adherence to the foreign ownership limit of 74%. This does not, however, impact our investments in our insurance subsidiaries. We have sought clarification from the Department of Industrial Policy and Promotion on our status and that of our subsidiaries under these guidelines and are currently awaiting a response.

DIVIDENDS

Under Indian law, a company pays dividends upon a recommendation by its board of directors and approval by a majority of the shareholders at the annual general meeting of shareholders held within six months of the end of each fiscal year. The shareholders have the right to decrease but not increase the dividend amount recommended by the board of directors. Dividends may be paid out of the company's profits for the fiscal year in which the dividend is declared or out of undistributed profits of prior fiscal years. Dividends can also be paid by a company in the interim, termed "interim dividend" which does not require the approval of the shareholders unless it is combined with the final dividend being recommended by the board of directors. The Reserve Bank of India has stipulated that banks may declare and pay interim dividend out of the profits from the relevant accounting period, without prior approval of the Reserve Bank of India if they satisfy the minimum prudential requirements and subject to the prudential cap on dividend payout ratio prescribed in the guidelines issued in this regard by the Reserve Bank of India. See also "Supervision and Regulation—Restrictions on Payment of Dividends".

Pursuant to circular number NSDL/SG/005/2000 issued by National Securities Depository Limited in February 2000, equity shares issued by us are pari passu in all respects including dividend entitlement.

ICICI Bank has paid dividends consistently every year from fiscal 1996, the second year of our operations. For fiscal 2008, we paid a dividend, excluding dividend tax, of Rs. 11.00 per equity share aggregating to Rs. 12.2 billion in July 2008. For fiscal 2009, we paid a dividend, excluding dividend tax, of Rs. 11.00 per equity share aggregating to Rs. 12.3 billion in July 2009. For fiscal 2010, we paid a dividend, excluding dividend tax, of Rs. 12.00 per equity share aggregating to Rs. 13.4 billion in June 2010. For fiscal 2011, we paid a dividend, excluding dividend tax, of Rs. 14.00 per equity share aggregating to Rs. 16.1 billion in June 2011. For fiscal 2012, we paid a dividend, excluding dividend tax, of Rs. 16.50 per equity share aggregating to Rs. 19.0 billion in June 2012.

The following table sets forth, for the periods indicated, the dividend per equity share and the total amount of dividends paid out on the equity shares during the fiscal year by ICICI Bank, each exclusive of dividend tax. This may be different from the dividend declared for the year.

	Dividend per equity share	Total amount of dividends paid (Rs. in billions)
Dividend paid during the fiscal year		
2008	10.00	9.0
2009	11.00	12.2
2010	11.00	12.3
2011	12.00	13.4
2012	14.00	16.1

Dividend income is tax-exempt in the hands of shareholders. However, we are required to pay a tax at the rate of 16.2225% (including surcharge and cess) on distributed profits.

Future dividends will depend upon our revenues, cash flow, financial condition, the regulations of the Reserve Bank of India and other factors. Owners of ADSs will be entitled to receive dividends payable in respect of the equity shares represented by such ADSs. The equity shares represented by ADSs rank pari passu with existing equity shares. At present, we have equity shares issued in India and equity shares represented by ADSs.

TAXATION

Indian Tax

The following discussion of material Indian tax consequences to investors in ADSs and equity shares who are not resident in India, regardless of whether such investors are of Indian origin or not (each a “non-resident investor”), is based on the provisions of the Indian Income-tax Act, 1961 (the “Income-tax Act”), including the special tax regime for ADSs contained in Section 115AC, which has been extended to cover additional ADSs that an investor may acquire in an merger or restructuring of the company, and certain regulations implementing the Section 115AC regime. The Income-tax Act is amended every year by the Finance Act of the relevant year. Some or all of the tax consequences described herein may be amended or modified by future amendments to the Income-tax Act. This summary is not intended to constitute a complete analysis of the tax consequences under Indian law of the acquisition, ownership and sale of ADSs and equity shares by non-resident investors. Holders should, therefore, consult their own tax advisers regarding the tax consequences of such acquisition, ownership and sale, including the tax consequences under Indian law, the law of the jurisdiction of their residence, any tax treaty between India and their country of residence, and in particular the application of the regulations implementing the Section 115AC regime.

Residence

For the purposes of the Income-tax Act, an individual is a resident of India during any fiscal year, if such individual (i) is in India in that year for 182 days or more or (ii) having been in India for a period or periods aggregating 365 days or more during the four years preceding that fiscal year, is in India for a period or periods aggregating 60 days or more in that fiscal year. The period of 60 days is replaced with 182 days in the case of an Indian citizen or person of Indian origin who, being resident outside India, comes on a visit to India during the fiscal year, or an Indian citizen who leaves India for purposes of employment or as a member of the crew of an Indian ship during the fiscal year. A company is resident in India in any fiscal year if it is registered in India or the control and management of its affairs are situated wholly in India in that year. A firm or other association of persons is resident in India except where the control and the management of its affairs are situated wholly outside India.

Taxation of Distributions

Dividends paid are not subject to tax in India in the hands of a recipient. However, we are required to pay tax at the rate of 16.2225% (including the applicable surcharge and education cess) on the dividends distributed by us. Under Section 115-O(1A) of the Income-tax Act, dividends received by us on which our direct Indian subsidiaries have paid the dividend distribution tax (the “DDT”) are deducted from the dividends distributed by us for the purpose of determining the DDT payable by us, subject to certain prescribed conditions being fulfilled. Effective July 1, 2012, the deduction under Section 115-O(1A) has been broadened to include dividends received from any subsidiary on which the DDT has been paid by such subsidiary. Any dividend so paid is not taxable in India under Section 115AC in the hands of the ADS holders.

Taxation on Exchange of ADSs

The receipt of equity shares upon the surrender of ADSs by a non-resident investor will not give rise to a taxable event for Indian tax purposes.

Taxation on Sale of ADSs or Equity Shares

Any transfer of ADSs outside India by a non-resident investor to another non-resident investor will not give rise to Indian capital gains tax in the hands of the transferor.

Subject to any relief under any relevant double taxation treaty, gain arising from the sale of an equity share will generally give rise to liability for Indian income tax in the hands of the transferor and tax will be required to be withheld at source. Gains will either be taxable as capital gains or business income, depending upon the nature of holding. Where the equity share has been held for more than 12 months (measured from the date of advice of redemption of the ADS by the depository as specified below), the resulting long-term capital gains will be exempt

from tax if the shares are traded on a recognized stock exchange and securities transaction tax (the “STT”), described below, is paid on such sale. If the equity share has been held for 12 months or less, the resulting short-term capital gains, in the case of a non-resident individual holder will be taxable for fiscal 2012 at a tax rate of 15.45% (including the applicable education cess and secondary and higher education cess) and 15.76% in the case of a company (including the applicable surcharge, education cess and secondary and higher education cess). These rates of tax are applicable provided the gains are treated as capital gains and provided the shares are sold on the recognized Indian stock exchanges and are subject to STT. In other cases, the rate of tax applicable under the provisions of the Income-tax Act varies, subject to a maximum rate of 42.024% (including the applicable surcharges and education cess and secondary and higher education cess) for fiscal 2012. The actual rate depends on a number of factors, including without limitation the nature of the non-resident investor.

The above rate may be reduced under the provisions of the double taxation treaty entered into by the government of India with the country of residence of the non-resident investors. The double taxation treaty between the United States and India (the “Treaty”) does not provide U.S. residents with any relief from Indian tax on capital gains. As per the Finance Act of 2012, the benefit of a double tax treaty may be available provided that a tax residency certificate, containing such particulars as may be prescribed, is obtained by the taxpayer from the government of the applicable country or territory.

Further, investors are required to submit a valid Permanent Account Number, issued by the Indian Income Tax authorities, to the person responsible for deducting tax on capital gains or business income, otherwise tax will be deducted at the higher of (a) the rate specified in the relevant provisions of the Finance Act of 2012; (b) the rate in force; or (c) 20%.

A sale of equity shares entered into on a recognized stock exchange in India, whether settled by actual delivery or transfer, will be subject to STT at the rate of 0.125% on the value of the transaction at the time of sale, which tax is payable by both the seller and buyer. Effective July 01, 2012, the applicable STT rate has been reduced to 0.1%.

For purposes of determining the amount of capital gains arising on a sale of an equity share for Indian tax purposes, the cost of acquisition of an equity share received upon the surrender of an ADS will be the price of the share prevailing on the Bombay Stock Exchange or the National Stock Exchange on the date on which the depository advises the custodian of such event, not the acquisition cost of the ADS being surrendered. The holding period of an equity share received upon the surrender of an ADS will commence on the date of advice of such event by the depository.

Rights

Distributions to non-resident customers of additional ADSs or equity shares or rights to subscribe for equity shares made with respect to ADSs or equity shares are not subject to Indian income tax in the hands of the non-resident investor.

It is unclear whether capital gains derived from the sale of rights outside India by a non-resident investor, that is not entitled to exemption under a tax treaty, to another non-resident investor will be subject to Indian capital gains tax. These rights, however, may be deemed by the Indian tax authorities to be situated within India (as our situs is in India), in which case, any gains realized on the sale of the rights will be subject to Indian capital gains taxation, in the manner discussed above under “—Taxation on Sale of ADS or Equity Shares”.

Stamp Duty

Upon the issuance of the equity shares underlying ADSs, we are required to pay a stamp duty of 0.1% of the issue price per share if the aggregate value of shares being issued does not exceed Rs. 1,000,000, and 0.2 % of the issue price per share if the aggregate value of shares being issued exceeds Rs. 1,000,000. A transfer of ADSs is not subject to stamp duty under Indian law. Generally, upon the receipt of equity shares in physical form from the depository in exchange for ADSs representing such equity shares, a non-resident investor is liable for stamp duty under Indian law which would be applicable to re-issuances in physical form. This stamp duty is the same as stamp duty payable on original issuances in physical form. Similarly, a sale of equity shares in physical form by a non-

resident investor is also subject to stamp duty at the rate of 0.01 % of the market value of the equity shares on the trade date, or the consideration value, whichever is higher, for the document relating to the sale of shares. In addition, a stamp duty of 0.75% of the market value of the equity shares on the trade date is levied upon the transfer certificate. Customarily, such tax is borne by the transferee, that is, the purchaser. However, our equity shares are compulsorily delivered in non-physical form, unless the trade is for 500 shares or less, in which case, the shares may be delivered in physical form. Under stamp laws in India, no stamp duty is payable on the acquisition or transfer of equity shares in non-physical form. Except for the stamp duty payable on a transfer certificate, the rates of stamp duty provided above are the rates that are applicable when the document is stamped in the state of Maharashtra. The transfer certificate is stamped as per the rate prescribed under the Indian Stamp Act, 1899.

Other Taxes

At present, there are no taxes on wealth, gifts or inheritance which apply to the ADSs or underlying equity shares.

Service Tax

Brokerage fees paid to stockbrokers in connection with the sale or purchase of shares which are listed on any recognized stock exchange in India are subject to a service tax at a rate of 12.36% (including the applicable education cess). The stockbroker is responsible for collecting the service tax and paying it to the relevant authority.

The constitutional amendment bill necessary for implementation of the Goods and Services Tax Act as well as the provisions of Goods and Services tax Act are yet to be introduced.

General Anti Avoidance Rule (GAAR)

The Finance Act of 2012 introduced provisions for General Anti Avoidance of Tax (“GAAR”) which will be effective beginning in April 1, 2013. The specific details of the relevant guidelines are not known yet. The powers to invoke GAAR are bestowed upon the Indian Income Tax Authorities if they allege that the primary motive of a particular transaction or arrangement is to obtain a tax advantage. If GAAR is invoked by tax authorities, then the tax benefit or benefit under the tax treaty may be denied.

Direct Tax Code

The Direct Tax Code Bill (the “Bill”) was tabled in the Parliament in August 2010, and will come into effect on the date to be announced. The following discussion describes salient provisions of the Bill.

Tax Residency in India

The benefit of substituting the period of 60 days stay in India with a period of 182 days stay in India in a financial year in the case of an Indian citizen or person of Indian origin who, being resident outside India, comes on a visit to India is proposed to be deleted. Accordingly, such person will be treated as resident in India if (a) such person’s stay in India during the fiscal year is 182 days or more or (b) such person’s stay in India is 365 days or more within the four years preceding the fiscal year and is for a period or periods aggregating 60 days or more in the fiscal year.

A foreign company will be treated as tax resident in India if its place of effective management is in India. A company’s place of effective management is where the board of directors makes decisions or executive directors or officers perform functions or make commercial decisions that are routinely approved by the board. A firm or other association of persons is resident in India except where the control and management of its affairs are situated wholly outside India.

Taxation of Distributions

Dividends paid by Indian companies will be subject to DDT at the rate of 15%. Dividends, received from a direct Indian subsidiary company, that has paid the dividend distribution tax, will be deducted from dividends paid

274

that are subject to the DDT. Dividends are not taxable under the Direct Tax Code in the hands of the dividend recipient.

Capital Gains Tax

Capital gains tax is proposed to be applicable at a maximum marginal rate of 30% pursuant to the First Schedule to the Bill. Further, in the case of capital gains arising from the sale of equity shares or units of an equity-oriented fund that is subject to STT, a 100% deduction will be allowed for assets held for more than one year and a 50% deduction for assets held for one year or less. For equity shares held for more than one year that are not subject to STT, capital gains are computed after indexation for inflation. The Bill proposes to change the base year for the purposes of the computation of capital gains indexation from 1981 to 2000.

Tax Residency Certificate

The Bill provides that a person will not be entitled to relief under a double taxation avoidance agreement between the Government and another country or specified territory unless such person obtains a certificate from the tax authority of the relevant country or specified territory, evidencing such person's residency therein.

United States Tax

The following is a description of the material U.S. federal income tax consequences to the U.S. Holders described below of owning and disposing of ADSs or equity shares, but it does not purport to be a comprehensive description of all tax considerations that may be relevant to a particular person's decision to hold ADSs or equity shares. This discussion applies only to a U.S. Holder that holds ADSs or equity shares as capital assets for U.S. federal income tax purposes.

This discussion does not discuss all of the tax consequences that may be relevant in light of your particular circumstances, including alternative minimum tax consequences and tax consequences applicable to U.S. Holders subject to special rules, such as:

- insurance companies ;
- tax-exempt entities;
- certain dealers and traders in securities who use a mark-to-market method of tax accounting;
- certain financial institutions;
- persons who own ADSs or equity shares as part of an integrated investment (including a straddle or conversion transaction) comprised of ADS or equity shares, and one or more other positions for U.S. federal income tax purposes;
- persons whose functional currency is not the U.S. dollar;
- persons who acquired ADSs or equity shares pursuant to the exercise of any employee stock option or otherwise as compensation;
- persons holding ADSs or equity shares in connection with a trade or business conducted outside of the United States;

- persons who own, actually or constructively, 10.0% or more of our voting stock; or
- partnerships or other entities classified as partnerships for U.S. federal income tax purposes.

If an entity that is classified as a partnership for U.S. federal income tax purposes holds ADSs or equity shares, the U.S. federal income tax treatment of a partner will generally depend on the status of the partner and the activities of the partnership. Partnerships holding ADSs or equity shares and partners in such partnerships should consult their

tax advisers as to the particular U.S. federal income tax consequences of holding and disposing of ADSs or equity shares.

This discussion is based on the tax laws of the United States including the Internal Revenue Code of 1986, as amended, (referred to as the “Code”), proposed and final Treasury Regulations, Revenue Rulings and judicial decisions, all as of the date hereof. These laws may change, possibly with retroactive effect.

A “U.S. Holder” is a holder who, for U.S. federal income tax purposes, is a beneficial owner of ADSs or equity shares and is:

- a citizen or individual resident of the United States;
- a corporation, or other entity taxable as a corporation, created or organized under the laws of the United States, any state therein or the District of Columbia; or
- an estate or trust the income of which is includable in gross income for U.S. federal income tax purposes regardless of its source.

In general, a U.S. Holder who owns ADSs will be treated as the owner of the underlying equity shares represented by those ADSs for U.S. federal income tax purposes. Accordingly, no gain or loss will be recognized if a U.S. Holder exchanges ADSs for the underlying equity shares represented by those ADSs.

The U.S. Treasury has expressed concern that parties to whom depositary shares are released before shares are delivered to the depositary (“pre-release”), or intermediaries in the chain of ownership between holders and the issuer of the security underlying the depositary shares, may be taking actions that are inconsistent with the claiming of foreign tax credits by U.S. Holders of depositary shares. These actions would also be inconsistent with the claiming of the reduced rate of tax, described below, applicable to dividends received by certain non-corporate U.S. Holders. Accordingly, the creditability of Indian taxes and the availability of the reduced tax rate for dividends received by certain non-corporate U.S. Holders, each described below, could be affected by actions taken by such parties or intermediaries. This discussion is also based in part on representations by the depositary and assumes that each obligation under the deposit agreement and any related agreement will be performed in accordance with its terms.

Please consult your tax adviser with regard to the application of U.S. federal income tax laws to ADSs or equity shares in your particular circumstances, including the passive foreign investment company (“PFIC”) rules described below, as well as any tax consequences arising under the laws of any state, local or other taxing jurisdiction.

This discussion assumes that we are not, and will not become, a PFIC (as discussed below).

Taxation of Dividends

Distributions you receive on ADSs or equity shares, other than certain pro rata distributions of equity shares or rights to acquire equity shares to all holders of equity shares (including holders of ADSs), will generally constitute foreign-source dividend income for U.S. federal income tax purposes. The amount of the dividend you will be required to include in income will be based on the U.S. dollar value of the rupee, calculated by reference to the exchange rate in effect on the date the payment is received by the depositary (in the case of ADSs) or by you (in the case of equity shares) regardless of whether the payment is converted into U.S. dollars on the date of receipt. If the dividend is converted into U.S. dollars on the date of receipt, you should not be required to recognize foreign currency gain or loss in respect of the dividend income. You may have foreign currency gain or loss if the dividend is converted into U.S. dollars after the date of receipt. If you realize gain or loss on a sale or other disposition of rupees, it will

constitute U.S.-source ordinary income or loss. The amount of the dividend will not be eligible for the dividends-received deduction generally available to U.S. corporations under the Code. Subject to applicable limitations and the discussion above regarding concerns expressed by the U.S. Treasury, if you are a non-corporate U.S. Holder, dividends paid to you in taxable years beginning before January 1, 2013 may be taxable at a maximum

rate of 15.0%. If you are a non-corporate U.S. Holder, you should consult your tax adviser to determine whether you are subject to any special rules that limit your ability to be taxed at this favorable rate.

Taxation of Capital Gains

You will recognize gain or loss for U.S. federal income tax purposes on the sale or exchange of ADSs or equity shares. The gain or loss will generally be U.S.-source capital gain or loss, which will be long-term capital gain or loss if you have held such ADSs or equity shares for more than one year. You should consult your tax adviser about the treatment of capital gains, which may be taxed at lower rates than ordinary income for non-corporate taxpayers, and capital losses, the deductibility of which may be limited.

Under certain circumstances as described under “Taxation—Indian Tax—Taxation on Sale of ADSs or Equity Shares,” you may be subject to Indian tax upon the disposition of equity shares. You should consult your tax adviser with respect to your ability to credit this Indian tax against your U.S. federal income tax liability.

Passive Foreign Investment Company Rules

In general, a foreign corporation is a PFIC for any taxable year in which (i) 75.0% or more of its gross income consists of passive income (such as dividends, interest, rents, royalties and capital gains) or (ii) 50.0% or more of the average quarterly value of its assets consists of assets that produce, or are held for the production of, passive income. There are certain exceptions for active business income, including exceptions for certain income earned by active foreign banks and insurance companies. Based upon certain proposed Treasury regulations, which are proposed to be effective for taxable years beginning after December 31, 1994, we do not believe we were a PFIC for our taxable year that ended March 31, 2012. Since there can be no assurance that the proposed regulations will be finalized in their current form, the manner of the application of the proposed regulations is not entirely clear, and the composition of our income and assets will vary over time, there can be no assurance that we will not be considered a PFIC for any taxable year.

If we were a PFIC for any taxable year during which you held ADSs or equity shares, you may be subject to adverse tax consequences. Generally, gain recognized upon a disposition (including, under certain circumstances, a pledge) of ADSs or equity shares by you would be allocated ratably over your holding period for such ADSs or equity shares. The amounts allocated to the taxable year of disposition and to years before we became a PFIC would be taxed as ordinary income. The amount allocated to each other taxable year would be subject to tax at the highest rate in effect for that taxable year for individuals or corporations, as appropriate, and an interest charge would be imposed on the tax attributable to the allocated amounts. Further, to the extent that any distribution received by you on your ADSs or equity shares exceeds 125% of the average of the annual distributions on such ADSs or equity shares received during the preceding three years or your holding period, whichever is shorter, that distribution would be subject to taxation in the same manner as gain, as described in this paragraph.

If we were a PFIC for any year during which you held ADSs or equity shares, we generally would continue to be treated as a PFIC with respect to you for all succeeding years during which you held ADSs or equity shares, even if we ceased to meet the threshold requirements for PFIC status.

Alternatively, if we were a PFIC and if ADSs or equity shares were “regularly traded” on a “qualified exchange,” you could make a mark-to-market election that would result in tax treatment different from the general tax treatment for PFICs described above. ADSs or equity shares would be treated as “regularly traded” in any calendar year in which more than a de minimis quantity of ADSs or equity shares, as the case may be, were traded on a qualified exchange on at least 15 days during each calendar quarter. The New York Stock Exchange, on which ADSs are listed, is a qualified exchange for this purpose. A foreign exchange is a “qualified exchange” if it is regulated by a governmental authority in

the jurisdiction in which the exchange is located and with respect to which certain other requirements are met.

If you make the mark-to-market election (assuming the election is available), you generally will recognize as ordinary income any excess of the fair market value of ADSs or equity shares at the end of each taxable year over their adjusted tax basis, and will recognize an ordinary loss in respect of any excess of the adjusted tax basis of

ADSs or equity shares over their fair market value at the end of the taxable year (but only to the extent of the net amount of income previously included as a result of the mark-to-market election). If you make the election, your tax basis in ADSs or equity shares will be adjusted to reflect these income or loss amounts. Any gain recognized on the sale or other disposition of ADSs or equity shares in a year when we are a PFIC will be treated as ordinary income and any loss will be treated as ordinary loss (but only to the extent of the net amount of income previously included as a result of the mark-to-market election).

In addition, if we were a PFIC or, with respect to you, were treated as a PFIC for the taxable year in which we paid a dividend or for the prior taxable year, the 15% dividend rate with respect to dividends paid to certain non-corporate U.S. Holders, described above under “—Taxation of Dividends,” would not apply.

If you own ADSs or equity shares during any year in which we are a PFIC, you may be required to file a report with respect to us, generally with your federal income tax return, containing such information as the U.S. Treasury may require.

You should consult your tax adviser regarding whether we are or were a PFIC and the potential application of the PFIC rules.

Information Reporting and Backup Withholding

Payments of dividends and sales proceeds that are made within the United States or through certain U.S.-related financial intermediaries generally are subject to information reporting and to backup withholding unless (i) you are an exempt recipient or (ii) in the case of backup withholding, you provide a correct taxpayer identification number and certify that no loss of exemption from backup withholding has occurred. The amount of any backup withholding from a payment to you will be allowed as a credit against your U.S. federal income tax liability and may entitle you to a refund, provided that the required information is timely furnished to the Internal Revenue Service.

PRESENTATION OF FINANCIAL INFORMATION

Pursuant to the issuance and listing of our securities in the United States under registration statements filed with the United States Securities Exchange Commission, we file annual reports on Form 20-F which must include financial statements prepared under generally accepted accounting principles in the United States (U.S. GAAP) or financial statements prepared according to a comprehensive body of accounting principles with a reconciliation of net income and stockholders' equity to U.S. GAAP. When we first listed our securities in the United States, Indian GAAP was not considered a comprehensive body of accounting principles under the United States securities laws and regulations. Accordingly, our annual reports on Form 20-F for fiscal years 2000 through 2005 have included U.S. GAAP financial statements. However, pursuant to a significant expansion of Indian accounting standards, Indian GAAP constitutes a comprehensive body of accounting principles. Accordingly, from fiscal 2006 onwards we have included in the annual report consolidated financial statements prepared according to Indian GAAP, which varies in certain respects from U.S. GAAP. For a reconciliation of net income and stockholders' equity to U.S. GAAP, a description of significant differences between Indian GAAP and U.S. GAAP and certain additional information required under U.S. GAAP, see notes 20 and 21 to our consolidated financial statements herein. For selected financial data in accordance with U.S. GAAP see "Selected Consolidated Financial and Operating Data—Selected U.S. GAAP Financial Data".

The data for fiscal 2008 through fiscal 2012 have been derived from our consolidated financial statements. The accounting and reporting policies used in the preparation of our financial statements reflect general industry practices and conform with Indian GAAP including the Accounting Standards (AS) issued by Institute of Chartered Accountants of India, guidelines issued by the Reserve Bank of India, the Insurance Regulatory and Development Authority and the National Housing Bank as applicable to relevant companies.

The consolidated financial statements for fiscal 2008 through fiscal 2010 were audited by B S R & Co. Chartered Accountants, and for fiscal 2011 and fiscal 2012 by S. R. Batliboi & Co., Chartered Accountants, under auditing standards issued by the Institute of Chartered Accountants of India. The consolidated financial statements for fiscal 2008 through fiscal 2012 have also been audited by KPMG, an independent registered public accounting firm in India, in accordance with the standards of the United States Public Company Accounting Oversight Board. Our financial statements as per Indian GAAP along with the reconciliation of net profit and stockholders' equity to U.S. GAAP, including the notes to these financial statements, audited by KPMG are set forth at the end of this annual report.

Under U.S. GAAP, the consolidation of ICICI's majority ownership interest in two insurance companies, ICICI Prudential Life Insurance Company Limited and ICICI Lombard General Insurance Company Limited, because of substantive participative rights retained by the minority shareholders, is accounted for by the equity method. Under Indian GAAP these insurance subsidiaries are fully consolidated.

Under Indian GAAP, we have not consolidated certain entities (primarily 3i Infotech Limited) in which investments are intended to be temporary. However under U.S. GAAP, these entities have been consolidated in accordance with FASB ASC Subtopic 810-10, "Consolidation – Overall" or have been accounted for as equity affiliates in accordance with FASB ASC Subtopic 323-10, "Investments – Equity Method and Joint Ventures". Under Indian GAAP, till fiscal 2011, 3i Infotech Limited was not consolidated in which the investment is intended to be temporary. During fiscal 2012, loans to 3i Infotech Limited were restructured and as per the restructuring scheme a certain portion of the loans provided by ICICI Bank to 3i Infotech Limited will be converted into equity shares. Based on the continued intention to reduce the stake below 20% in the near future and severe long term restrictions on 3i Infotech Limited under the debt restructuring scheme which impairs the ability of 3i Infotech Limited to transfer funds to its investee, the results of 3i Infotech Limited were not consolidated in fiscal 2012 in Indian GAAP. Although we have translated in this annual report certain rupee amounts into dollars for convenience, this does not mean that the rupee amounts referred to could have been, or could be, converted into dollars at any particular rate, the rates stated earlier in this annual report, or at all. Except in the section on "Market Price Information", all translations from rupees to U.S. dollars are based on the exchange rate as set forth in the H.10 statistical release of the Federal Reserve Board at March 31, 2012.

The Federal Reserve Bank of New York certifies this rate for customs purposes in a weekly version of the H.10 release. The exchange rate as set forth in the H.10 statistical release of the Federal Reserve Board at March 31, 2012 was Rs. 50.89 per U.S.\$ 1.00.

ADDITIONAL INFORMATION

Memorandum and Articles of Association

Objects and Purposes

Pursuant to Clause III. A. 1 of ICICI Bank's Memorandum of Association, ICICI Bank's main objective is to, inter alia, carry on the business of banking in any part of India or outside India.

Directors' Powers

ICICI Bank's directors' powers include the following:

- Article 140 of the Articles of Association provides that no director of ICICI Bank shall, as a director, take any part in the discussion of or vote on any contract or arrangement if such director is directly or indirectly concerned or interested in such contract or arrangement.
- Directors have no powers to vote in absence of a quorum.
- Article 83 of the Articles of Association provides that the directors may by a resolution passed at a meeting of the board of directors borrow moneys and raise and secure the payment of amounts in a manner and upon such terms and conditions in all respects as they think fit and in particular by the issue of bonds, debenture stock, or any mortgage or charge or other security on the undertaking or the whole or any part of the property of ICICI Bank (both present and future) including our uncalled capital.

Amendment to Rights of Holders of Equity Shares

Any change to the existing rights of the equity holders can be made only by amending the Articles of Association which would require a special resolution of the shareholders, which must be passed by not less than three times the number of votes cast against the resolution.

Change in Control Provisions

Article 59 of the Articles of Association provides that the Board of Directors may at their discretion decline to register or acknowledge any transfer of shares in respect of shares upon which we have a lien or whilst any money in respect of the shares desired to be transferred or any of them remain unpaid. Moreover, the Board of Directors may refuse to register the transfer of any shares if the total nominal value of the shares or other securities intended to be transferred by any person would, together with the total nominal value of any shares held in ICICI Bank, exceed 1% of the paid up equity share capital of ICICI Bank or if the Board of Directors is satisfied that as a result of such transfer, it would result in the change in the Board of Directors or change in the controlling interest of ICICI Bank and that such change would be prejudicial to the interests of ICICI Bank. However, under the Indian Companies Act, the enforceability of such transfer restrictions is unclear.

Recent Amendments to Memorandum and Articles of Association

The last amendment as effected to the Memorandum and Articles of Association was by a special resolution passed by our shareholders at our annual general meeting held on July 21, 2007, pursuant to which Article 56(d) of the Articles of Association was amended. Post this amendment, this Article requires a shareholder to obtain prior approval of the Reserve Bank of India before raising his/her/its holding of the Bank's equity shares to a level of 5.0% or more of the total paid-up capital of ICICI Bank, or such other percentage as may be prescribed by the Reserve Bank of India from

time to time, whereas prior to this amendment, this provision required the Reserve Bank of India's approval before a shareholder raised his/her/our stake above 5.0% of total issued capital.

Also, pursuant to a resolution passed by shareholders on June 8, 2007, section 5 of our Memorandum of Association was amended so that the authorized share capital of ICICI Bank was altered to Rs. 17,750,000,000

divided into 1,275,000,000 shares of Rs. 10 each, 15,000,000 shares of Rs. 100 each and 350 shares of Rs. 10 million each. The amended Memorandum and Articles of Association are attached as exhibits to this annual report.

Documents on Display

The documents concerning us which are referred to herein may be inspected at the Securities and Exchange Commission ("SEC"). You may read and copy any document filed or furnished by us at the SEC's public reference rooms in Washington D.C., New York and Chicago, Illinois or obtain them by mail upon payment of prescribed rates. Please call the SEC at 1-800-SEC-0330 for further information. The SEC also maintains a website at www.sec.gov, which contains, in electronic form, each of the reports and other information that we have filed electronically with the SEC. Information about ICICI Bank is also available on the web at www.icicibank.com.

Incorporation by Reference

We incorporate by reference the information disclosed under "Description of Equity Shares" and "Description of the American Depositary Shares" in ICICI Bank's Registration Statement on Form F-1 (File No. 333-30132).

EXHIBIT INDEX

Exhibit No.	Description of Document
1.1	ICICI Bank Memorandum of Association, as amended (incorporated by reference to ICICI Bank's Annual Report on Form 20-F for fiscal 2008 filed on September 29, 2008).
1.2	ICICI Bank Articles of Association, as amended (incorporated by reference to ICICI Bank's Annual Report on Form 20-F for the year-end fiscal 2008 filed on September 29, 2008).
2.1	Deposit Agreement among ICICI Bank, Deutsche Bank and the holders from time to time of American Depositary Receipts issued thereunder (including as an exhibit, the form of American Depositary Receipt) (incorporated herein by reference to ICICI Bank's Registration Statement on Form F-1 (File No. 333-30132)).
2.2	Letter Agreements dated February 19, 2002 and April 1, 2002 (incorporated herein by reference to ICICI Bank's Annual Report on Form 20-F for the year ended March 31, 2002 filed on September 30, 2002) and Letter Agreement dated March 8, 2005 (incorporated by reference to ICICI Bank's Registration Statement on Form F-3 (File No. 333-121664) amending and supplementing the Deposit Agreement.
2.3	Letter Agreement dated November 4, 2011 amending and supplementing the Deposit Agreement.
2.4	ICICI Bank's Specimen Certificate for Equity Shares (incorporated herein by reference to ICICI Bank's Registration Statement on Form F-1 (File No. 333-30132)).
4.1	ICICI Bank's Employee Stock Option Plan, as amended.
8.1	List of Subsidiaries (included under "Business—Subsidiaries and Joint Ventures" herein).
11.1	Code of Business Conduct and Ethics, as amended (incorporated by reference to ICICI Bank's Annual Report on Form 20-F for the year ended March 31, 2008 filed on September 29, 2008).
12.1	Certification of the Managing Director and Chief Executive Officer of the Company pursuant to Section 302 of the Sarbanes-Oxley Act.
12.2	Certification of the Executive Director and Chief Financial Officer of the Company pursuant to Section 302 of the Sarbanes-Oxley Act.
13	Certification of periodic financial report pursuant to 18 U.S.C. Section 1350, as mandated by Section 906 of the Sarbanes-Oxley Act.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
ICICI Bank Limited

We have audited the accompanying consolidated balance sheets of ICICI Bank Limited and subsidiaries (the “Company”) as of March 31, 2012 and 2011, and the related consolidated profit and loss accounts and consolidated cash flow statements for each of the years in the three-year period ended March 31, 2012. These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of March 31, 2012 and 2011, and the results of their operations and their cash flows for each of the years in the three-year period ended March 31, 2012, in conformity with generally accepted accounting principles in India.

Accounting principles generally accepted in India vary in certain significant respects from U.S. generally accepted accounting principles. Information relating to the nature and effect of such differences is presented in Note 20 of Schedule 18B to the consolidated financial statements.

As discussed in Notes 20(c) and 21(a) of Schedule 18B to the consolidated financial statements, the Company changed its method of accounting for qualifying special purpose entities and variable interest entities during the year ended March 31, 2011.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company’s internal control over financial reporting as of March 31, 2012, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated July 31, 2012 expressed an unqualified opinion on the effectiveness of the Company’s internal control over financial reporting.

as to which the date is July 31, 2012

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
ICICI Bank Limited

We have audited ICICI Bank Limited and subsidiaries' (the "Company") internal control over financial reporting as of March 31, 2012, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control Over Financial Reporting in the accompanying Form 20-F for the year ended March 31, 2012. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of March 31, 2012, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of the Company as of March 31, 2012 and 2011, and the related consolidated profit and loss accounts and consolidated cash flow statements for each of the years in the three-year period ended March 31, 2012, and our report dated April 27, 2012, except as to additional notes in Schedule 18B as to which the date is July 31, 2012 expressed an unqualified opinion on those consolidated financial statements.

ICICI Bank Limited and subsidiaries

Schedules forming part of the Consolidated Accounts

SCHEDULE 17

Significant accounting policies

Overview

ICICI Bank Limited (the Bank) together with its subsidiaries, joint ventures and associates (collectively, the Group) is a diversified financial services group providing a wide range of banking and financial services including commercial banking, retail banking, project and corporate finance, working capital finance, insurance, venture capital and private equity, investment banking, broking and treasury products and services

The Bank was incorporated in Vadodara, India and is a banking company governed by the Banking Regulation Act, 1949.

Principles of consolidation

The consolidated financial statements include the financials of ICICI Bank, its subsidiaries, associates and joint ventures.

Entities, in which the Bank holds, directly or indirectly, more than 50.00% of the voting rights or where it exercises control, are fully consolidated on a line-by-line basis in accordance with the provisions of AS 21. Entities where the Bank, directly or indirectly, holds 20.00% to 50.00% of the voting rights and/or has the ability to exercise significant influence are accounted for under the equity method of accounting and the pro-rata share of their profit/(loss) is included in the consolidated profit and loss account. Assets, liabilities, income and expenditure of jointly controlled entities are consolidated using the proportionate consolidation method. Under this method, the Bank's share of each of the assets, liabilities, income and expenses of the jointly controlled entity is reported in separate line items in the consolidated financial statements. The Bank does not consolidate entities where the significant influence/control is intended to be temporary. All significant inter-company accounts and transactions are eliminated on consolidation.

Basis of preparation

The accounting and reporting policies of the Group used in the preparation of the consolidated financial statements conform to Generally Accepted Accounting Principles in India (Indian GAAP), the guidelines issued by the Reserve Bank of India (RBI), Securities and Exchange Board of India (SEBI), Insurance Regulatory and Development Authority (IRDA), National Housing Bank (NHB), the Accounting Standards (AS) issued by the Institute of Chartered Accountants of India (ICAI) and notified by the Companies (Accounting Standards) Rules, 2006 from time to time, as applicable to relevant companies and practices generally prevalent within the banking industry in India. In the case of the foreign subsidiaries, Generally Accepted Accounting Principles as applicable to the foreign subsidiaries are followed

The Group follows the accrual method of accounting except where otherwise stated, and the historical cost convention. In case the accounting policies followed by a subsidiary or joint venture are different from those followed by the Bank, the same have been disclosed separately.

The preparation of consolidated financial statements requires management to make estimates and assumptions that are considered in the reported amounts of assets and liabilities (including contingent liabilities) as of the date of the consolidated financial statements and the reported income and expenses during the reporting period. Management believes that the estimates used in the preparation of the consolidated financial statements are prudent and reasonable. Future results could differ from these estimates

The consolidated financial statements include the results of the following entities in addition to the Bank.

Sr. no.	Name of the entity ⁴	Country of incorporation	Nature of relationship	Nature of business	Ownership interest

29.	NIIT Institute of Finance Banking and Insurance Training Limited ³	India	Associate	Education and training in banking and finance	18.79%
30.	ICICI Merchant Services Private Limited ³	India	Associate	Merchant servicing	19.00%
31.	Mewar Aanchalik Gramin Bank ³	India	Associate	Banking	35.00%

1. The financial statements of these jointly controlled entities have been consolidated as per AS 21 on 'consolidated financial statements' consequent to the limited revision to AS 27 on 'financial reporting of interests in joint ventures'.
2. The entity has been consolidated as per the proportionate consolidation method as prescribed by AS 27 on 'financial reporting of interests in joint ventures'.
3. These entities have been accounted as per the equity method as prescribed by AS 23 on 'accounting for investments in associates in consolidated financial statements'.
4. During the quarter ended December 31, 2011, Prize Petroleum Company Limited ceased to be an associate and accordingly has not been accounted as per the equity method as prescribed by AS 23.
- 5.

During the quarter ended December 31, 2011, I-Solutions Providers (India) Private Limited has been amalgamated with I-Process Services (India) Private Limited and therefore ceased to be an associate. Accordingly, it has not been accounted as per the equity method as prescribed by AS 23.

6. ICICI Prudential Pension Funds Management Company Limited is a wholly owned subsidiary of ICICI Prudential Life Insurance Company Limited.

The financial statements of Comm Trade Services Limited have not been consolidated under AS 21, since the investment is temporary in nature.

The financial statements of 3i Infotech Limited (3i Infotech) had not been consolidated under AS 23 till the year ended March 31, 2011, since the ICICI Group's holding in 3i Infotech was temporary in nature. During the year, 3i Infotech was referred to the Corporate Debt Restructuring (CDR) Cell for restructuring of debt under the CDR scheme. Based on the approved CDR package, the holding of ICICI Group will increase from the current holding of 20.3%. Based on the continued intention of ICICI Group to reduce its stake below 20.0% in the near future and the restructuring arrangement, which provides for severe long-term restrictions, the results of 3i Infotech will continue not to be consolidated for the year ended March 31, 2012 as per AS 23.

SIGNIFICANT ACCOUNTING POLICIES

1. Transactions involving foreign exchange

The consolidated financial statements of the Group are reported in Indian rupees (Rs.), the national currency of India. Foreign currency income and expenditure items are translated as follows:

- For domestic operations, at the exchange rates prevailing on the date of the transaction with the resultant gain or loss accounted for in the profit and loss account.
- For integral foreign operations, at weekly average closing rates with the resultant gain or loss accounted for in the profit and loss account. An integral foreign operation is a subsidiary, associate, joint venture or branch of the reporting enterprise, the activities of which are based or conducted in a country other than the country of the reporting enterprise but are an integral part of the reporting enterprise
- For non-integral foreign operations, at the quarterly average closing rates with the resultant gains or losses accounted for as foreign currency translation reserve.

Monetary foreign currency assets and liabilities of domestic and integral foreign operations are translated at closing exchange rates notified by Foreign Exchange Dealers' Association of India (FEDAI) at the balance sheet date and the resulting profits/losses are included in the profit and loss account

Both monetary and non-monetary foreign currency assets and liabilities of non-integral foreign operations are translated at closing exchange rates notified by FEDAI at the balance sheet date and the resulting profits/losses from exchange differences are accumulated in the foreign currency translation reserve until the disposal of the net investment in the non-integral foreign operations.

The premium or discount arising on inception of forward exchange contracts in domestic operations that are entered to establish the amount of reporting currency required or available at the settlement date of a transaction is amortized over the life of the contract. All other outstanding forward exchange contracts are revalued based on the exchange rates notified by FEDAI for specified maturities and at interpolated rates for contracts of interim maturities. The contracts of longer maturities where exchange rates are not notified by FEDAI, are revalued, based on the forward exchange rates implied by the swap curves for respective currencies. The resultant gains or losses are recognized in the profit and loss account.

Contingent liabilities on account of guarantees, endorsements and other obligations denominated in foreign currency are disclosed at the closing exchange rates notified by FEDAI at the balance sheet date.

2. Revenue recognition

- Interest income is recognized in the profit and loss account as it accrues except in the case of non-performing assets (NPAs) where it is recognized upon realization, as per the income recognition and asset classification norms of RBI/NHB.
- Income from leases is calculated by applying the interest rate implicit in the lease to the net investment outstanding on the lease over the primary lease period. Finance leases entered into prior to April 1, 2001 have been accounted for as per the Guidance Note on accounting for

leases issued by ICAI. The finance leases entered post April 1, 2001 have been accounted for as per AS 19 on 'leases' issued by ICAI.

- Income on discounted instruments is recognized over the tenure of the instrument on a constant yield basis.
- Dividend income is accounted on an accrual basis when the right to receive the dividend is established.
- Loan processing fee is accounted for upfront when it becomes due except in the case of foreign banking subsidiaries, where it is amortized over the period of the loan.
 - Project appraisal/structuring fee is accounted for on the completion of the agreed service.
- Arranger fee is accounted for as income when a significant portion of the arrangement/syndication is completed.
- Commission received on guarantees issued is amortized on a straight-line basis over the period of the guarantee.
 - All other fees are accounted for as and when they become due.
- Net income arising from sell-down/securitization of loan assets prior to February 1, 2006 has been recognized upfront as interest income. With effect from February 1, 2006, net income arising from securitization of loan assets is amortized over the life of securities issued or to be issued by the special purpose vehicle/special purpose entity to which assets are sold. Net income arising from sale of loan assets through direct assignment with recourse obligation is amortized over the life of underlying assets sold and net income from sale of loan assets through direct assignment, without any recourse obligation, is recognized at the time of sale. Net loss arising on account of the sell-down/securitization and direct assignment of loan assets is recognized at the time of sale.
- The Bank deals in bullion business on a consignment basis. The difference between price recovered from customers and cost of bullion is accounted for at the time of sale to the customers. The Bank also deals in bullion on a borrowing and lending basis and the interest paid/received is accounted on accrual basis.
- Income from brokerage activities is recognized as income on the trade date of the transaction. Brokerage income in relation to public or other issuances of securities is recognized based on mobilization and terms of agreement with the client.
- Life insurance premium is recognized as income when due. Premium on lapsed policies is recognized as income when such policies are reinstated. Top-up premiums are considered as single premium. For linked business, premium is recognized when the associated units are created. Income from linked funds, which includes fund management charges, policy administration charges, mortality charges etc. are recovered from the linked fund in accordance with the terms and conditions of the policy and are recognized when due.
- In the case of general insurance business, premium is recorded for the policy period at the commencement of risk and for instalment cases, it is recorded on instalment due dates. Premium earned is recognized as income over the period of risk or the contract period based on 1/365 method, whichever is appropriate, on a gross basis, net of service tax. Any subsequent revision to premium is recognized over the remaining period of risk or contract period. Adjustments to premium income arising on cancellation of policies are recognized in the period in which the

policies are cancelled. Commission on re-insurance ceded is recognized as income in the period of ceding the risk. Profit commission under re-insurance treaties, wherever applicable, is recognized as income in the period of final determination of profits and combined with commission on reinsurance ceded.

- In the case of general insurance business, insurance premium on ceding of the risk is recognized in the period in which the risk commences. Any subsequent revision to premium ceded is recognized in the period of such revision. Adjustment to re-insurance premium arising on cancellation of policies is recognized in the period in which it is cancelled. In case of life insurance business, cost of reinsurance ceded is accounted for at the time of recognition of premium income in accordance with the treaty or in-principle arrangement with the reinsurer. Profit commission on reinsurance ceded is netted off against premium ceded on reinsurance.
- In the case of general insurance business, premium deficiency is recognized when the sum of expected claim costs and related expenses exceed the reserve for unexpired risks and is computed at a business segment level.

3. Stock based compensation

The following entities within the group have granted stock options to their employees:

- ICICI Bank Limited
- ICICI Prudential Life Insurance Company Limited
- ICICI Lombard General Insurance Company Limited
- ICICI Venture Funds Management Company Limited

The Employees Stock Option Scheme (the Scheme) provides for grant of equity shares of the Bank to wholetime directors and employees of the Bank and its subsidiaries. The Scheme provides that employees are granted options to subscribe to equity shares of the Bank that vest in a graded manner. The options may be exercised within a specified period. ICICI Prudential Life Insurance Company and ICICI Lombard General Insurance Company have also formulated similar stock option schemes for their employees for grant of equity shares of their respective companies.

The Group follows the intrinsic value method to account for its stock-based employee compensation plans. Compensation cost is measured as the excess, if any, of the fair market price of the underlying stock over the exercise price on the grant date. The fair market price is the latest closing price, immediately prior to the grant date, which is generally the date of the Board of Directors meeting in which the options are granted, on the stock exchange on which the shares of the Bank are listed. If the shares are listed on more than one stock exchange, then the stock exchange where there is highest trading volume on the said date is considered. The banking subsidiaries namely, ICICI Bank UK and ICICI Bank Canada account for the cost of the options granted to employees by ICICI Bank using the fair value method based on binomial tree model. In the case of ICICI Prudential Life Insurance Company and ICICI Lombard General Insurance Company, the fair value of the shares is determined based on an external valuation report.

The Group's venture capital subsidiary i.e. ICICI Venture Funds Management Company has settled carried interest trusts for the benefit of its employees. These trusts have investment in a separate class of units of certain fully consolidated funds. These carried interest entitlements are treated as employee compensation and are accounted for at the time of distribution of such carried interest to the trusts.

4. Income taxes

Income tax expense is the aggregate amount of current tax and deferred tax expense incurred by the Group. The current tax expense and deferred tax expense is determined in accordance with the

provisions of the Income Tax Act, 1961 and as per AS 22 on 'accounting for taxes on income' issued by ICAI, respectively. Deferred tax adjustments comprise changes in the deferred tax assets or liabilities during the year.

Deferred tax assets and liabilities are recognized on a prudent basis for the future tax consequences of timing differences arising between the carrying value of assets and liabilities and their respective tax basis and carry forward losses. Deferred tax assets and liabilities are measured using tax rates and tax laws that have been enacted or substantively enacted at the balance sheet date. The impact of changes in the deferred tax assets and liabilities is recognized in the profit and loss account.

Deferred tax assets are recognized and re-assessed at each reporting date, based on the management's judgement as to whether their realization is considered as reasonably certain. However, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognized only if there is virtual certainty of realization of such assets.

In the consolidated financial statements, deferred tax assets and liabilities are computed at an individual entity level and aggregated for consolidated reporting.

5. Claims and benefits paid

In the case of general insurance business, claims incurred comprise claims paid, estimated liability for outstanding claims made following a loss occurrence reported and estimated liability for claims incurred but not reported (IBNR) and claims incurred but not enough reported (IBNER). Further, claims incurred also include specific claim settlement costs such as survey/legal fees and other directly attributable costs. Claims (net of amounts receivable from re-insurers/co-insurers) are recognized on the date of intimation based on estimates from surveyors/insured in the respective revenue account. Estimated liability for outstanding claims at the balance sheet date is recorded net of claims recoverable from/payable to co-insurers/re-insurers and salvage to the extent there is certainty of realization. Estimated liability for outstanding claim is determined by the entity on the basis of ultimate amounts likely to be paid on each claim based on the past experience. These estimates are progressively revalidated on availability of further information. Claims IBNR represent that amount of claims that may have been incurred during the accounting period but have not been reported or claimed. The claims IBNR provision also includes provision, if any, required for claims IBNER. Estimated liability for claims IBNR/claims IBNER is based on an actuarial estimate duly certified by the appointed actuary of the entity.

In the case of life insurance business, claims other than maturity claims are accounted for on receipt of intimation. Survival benefit and maturity claims are accounted when due. Withdrawals and surrenders under linked policies are accounted in the respective schemes when the associated units are cancelled/redeemed. Re-insurance recoveries on claims are accounted for, in the same period as the related claims.

6. Liability for life policies in force

In the case of life insurance business, liability for life policies in force and also policies in respect of which premium has been discontinued but a liability exists, is determined by the appointed actuary as per the gross premium method in accordance with accepted actuarial practice, requirements of the IRDA and the Actuarial Society of India.

7. Reserve for unexpired risk

Reserve for unexpired risk is recognized net of re-insurance ceded and represents premium written that is attributable and to be allocated to succeeding accounting periods for risks to be borne by the entity under contractual obligations on contract period basis or risk period basis, whichever is appropriate. It is

calculated on a daily pro-rata basis subject to a minimum of 50.00% of the aggregated premium, written on policies during the twelve months preceding the balance sheet date for fire, marine, cargo and miscellaneous business and 100.00% for marine hull business, on all unexpired policies at balance sheet date, in accordance with the provisions of the Insurance Act, 1938.

8. Actuarial method and valuation

In the case of life insurance business, the actuarial liability on both participating and non-participating policies is calculated using the gross premium method, using assumptions for interest, mortality, expense and inflation, and in the case of participating policies, future bonuses together with allowance for taxation and allocation of profits to shareholders. These assumptions are determined as prudent estimates at the date of valuation with allowances for adverse deviations. No allowance is made for expected lapses.

The greater of liability calculated using discounted cash flows and unearned premium reserves are held for the unexpired portion of the risk for the general fund liabilities of linked business and attached riders. An unearned premium reserve is held for one year renewable group term insurance.

The unit liability in respect of linked business has been taken as the value of the units standing to the credit of policyholders, using the Net Asset Value (NAV) prevailing at the valuation date. The adequacy of charges under unit linked policies to meet future expenses has been tested and provision made as appropriate. Provision has also been made for the cost of guarantee under unit linked products that carry a guarantee. The units held in respect of lapsed policies are divided into a revival reserve, which contributes to liabilities, and a fund for future appropriation, which contributes to regulatory capital.

The interest rates used for valuing the liabilities are in the range of 4.93% to 6.02% per annum (previous year – 6.16% to 6.86% per annum).

Mortality rates used are based on the published IALM (94 – 96) Ultimate Mortality Table for assurances and LIC 96-98 table for annuities, adjusted to reflect expected experience while morbidity rates used are based on CIBT 93 table, adjusted for expected experience, or on risk rates supplied by reinsurers

Expenses are provided for at current levels, in respect of renewal expenses, with no allowance for future improvements. Per policy renewal expenses for regular premium policies are assumed to inflate at 5.20% (previous year – 5.90%)

9. Acquisition costs for insurance business

Acquisition costs are those costs that vary with and are primarily related to the acquisition of insurance contracts and are expensed in the period in which they are incurred.

10. Staff retirement benefits

Gratuity

The Group pays gratuity to employees who retire or resign after a minimum prescribed period of continuous service and in the case of employees at the overseas locations as per the rules in force in the respective countries. ICICI Bank makes contributions to five separate gratuity funds, for employees inducted from erstwhile ICICI Limited (erstwhile ICICI), employees inducted from erstwhile Bank of Madura Limited (erstwhile Bank of Madura), employees inducted from erstwhile The Sangli Bank Limited (erstwhile Sangli Bank), employees inducted from erstwhile The Bank of

Rajasthan Limited (erstwhile Bank of Rajasthan) and employees of ICICI Bank other than those inducted from erstwhile ICICI, erstwhile Bank of Madura, erstwhile Sangli Bank and erstwhile Bank of Rajasthan.

F-28

Separate gratuity funds for employees inducted from erstwhile ICICI, erstwhile Bank of Madura, erstwhile Sangli Bank and erstwhile Bank of Rajasthan are managed by ICICI Prudential Life Insurance Company Limited.

The gratuity fund for employees of ICICI Bank, other than employees inducted from erstwhile ICICI, erstwhile Bank of Madura, erstwhile Sangli Bank and erstwhile Bank of Rajasthan is administered by Life Insurance Corporation of India (LIC) and ICICI Prudential Life Insurance Company Limited.

Actuarial valuation of the gratuity liability for all the above funds is determined by an appointed actuary. Actuarial valuation of gratuity liability is determined based on certain assumptions regarding rate of interest, salary growth, mortality and staff attrition as per the projected unit credit method.

Superannuation fund

ICICI Bank contributes 15.0% of the total annual basic salary of certain employees to a superannuation fund for ICICI Bank employees. The employee gets an option on retirement or resignation to commute one-third of the total credit balance in his/her account and receive a monthly pension based on the remaining balance. In the event of death of an employee, his or her beneficiary receives the remaining accumulated balance. ICICI Bank also gives an option to its employees, allowing them to receive the amount contributed by ICICI Bank in their monthly salary during their employment.

Upto March 31, 2005, the superannuation fund was administered solely by Life Insurance Corporation of India. Subsequent to March 31, 2005, both Life Insurance Corporation of India and ICICI Prudential Life Insurance Company Limited are administering separate funds. Employees have the option to decide on an annual basis, the insurance company for management of that year's contribution towards superannuation fund.

ICICI Prudential Life Insurance Company, ICICI Prudential Asset Management Company and ICICI Venture Funds Management Company have accrued for superannuation liability based on a percentage of basic salary payable to eligible employees for the period of service.

Pension

The Bank provides for pension, a deferred retirement plan covering certain employees of erstwhile Bank of Madura, erstwhile Sangli Bank and erstwhile Bank of Rajasthan. The plan provides for pension payment including dearness relief on a monthly basis to these employees on their retirement based on the respective employee's years of service with the Bank and applicable salary. For erstwhile Bank of Madura, erstwhile Sangli Bank and erstwhile Bank of Rajasthan employees in service, separate pension funds are managed by the trust and the liability is funded as per actuarial valuation. The Bank purchases annuities from LIC and ICICI Prudential Life Insurance Company Limited as part of master policies for payment of pension to retired employees of erstwhile Bank of Madura, erstwhile Sangli Bank and erstwhile Bank of Rajasthan.

Actuarial valuation of the pension liability for all the above funds is determined by an actuary appointed by the Bank. Actuarial valuation of pension liability is calculated based on certain assumptions regarding rate of interest, salary growth, mortality and staff attrition as per the projected unit credit method.

Employees covered by the pension plan are not eligible for employer's contribution under the provident fund plan.

Provident fund

The Group is statutorily required to maintain a provident fund as a part of retirement benefits to its employees. There are separate provident funds for employees inducted from erstwhile Bank of Madura, erstwhile Sangli Bank, erstwhile Bank of Rajasthan and for other employees of ICICI Bank. In-house trustees manage these funds. Each employee contributes a specified portion of the basic salary and the Group contributes an equal amount. The funds are invested according to the rules prescribed by the Government of India.

Actuarial valuation for the interest rate guarantee on the provident fund balances is determined by an actuary.

Leave encashment

The Group provides for leave encashment benefit, which is a long term defined benefit scheme, based on actuarial valuation conducted by an independent actuary.

11. Provisions, contingent liabilities and contingent assets

The Group estimates the probability of any loss that might be incurred on outcome of contingencies on the basis of information available upto the date on which the consolidated financial statements are prepared. A provision is recognized when an enterprise has a present obligation as a result of a past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are determined based on management estimate required to settle the obligation at the balance sheet date, supplemented by experience of similar transactions. These are reviewed at each balance sheet date and adjusted to reflect the current management estimates. In cases where the available information indicates that the loss on the contingency is reasonably possible but the amount of loss cannot be reasonably estimated, a disclosure to this effect is made in the consolidated financial statements. In case of remote possibility, neither provision nor disclosure is made in the consolidated financial statements. The Group does not account for or disclose contingent assets, if any.

12. Cash and cash equivalents

Cash and cash equivalents include cash in hand, balances with RBI, balances with other banks and money at call and short notice.

13. Investments

i) Investments of the Bank are accounted for in accordance with the extant RBI guidelines on investment classification and valuation as given below.

a) All investments are classified into 'Held to Maturity', 'Available for Sale' and 'Held for Trading'. Reclassifications, if any, in any category are accounted for as per the RBI guidelines.

Under each classification, the investments are further classified as (a) government securities, (b) other approved securities, (c) shares, (d) bonds and debentures and (e) others.

b) 'Held to Maturity' securities are carried at their acquisition cost or at amortized cost, if acquired at a premium over the face value. Any premium over the face value of fixed rate and floating rate securities acquired is amortized over the remaining period to maturity on a constant yield basis and straight line basis respectively.

c) 'Available for Sale' and 'Held for Trading' securities are valued periodically as per RBI guidelines. Any premium over the face value of fixed rate and floating rate investments in government securities, classified as 'Available for Sale', is amortized over the remaining period to maturity on constant yield basis and straight line basis respectively. Quoted investments are valued based on the trades/quotes on the recognized stock exchanges, subsidiary general ledger account transactions, price list of RBI or prices declared by Primary Dealers Association of India jointly with Fixed Income Money Market and Derivatives Association (FIMMDA), periodically.

The market/fair value of unquoted government securities which are in the nature of Statutory Liquidity Ratio (SLR) securities included in the 'Available for Sale' and 'Held for Trading' categories is as per the rates published by FIMMDA. The valuation of other unquoted fixed income securities wherever linked to the Yield-to-Maturity (YTM) rates, is computed with a mark-up (reflecting associated credit risk) over the YTM rates for government securities published by FIMMDA.

Unquoted equity shares are valued at the break-up value, if the latest balance sheet is available or at Rs.1 as per RBI guidelines.

Securities are valued scrip-wise and depreciation/appreciation is aggregated for each category. Net appreciation in each category, if any, being unrealized, is ignored, while net depreciation is provided for.

d) Costs including brokerage and commission pertaining to investments, paid at the time of acquisition, are charged to the profit and loss account.

e) Profit/loss on sale of investments in the 'Held to Maturity' category is recognized in the profit and loss account and profit is thereafter appropriated (net of applicable taxes and statutory reserve requirements) to Capital Reserve. Profit/loss on sale of investments in 'Available for sale' and 'Held for Trading' categories is recognized in the profit and loss account.

f) Market repurchase and reverse repurchase transactions, are accounted for as borrowing and lending transactions respectively in accordance with the extant RBI guidelines. The transactions with RBI under Liquidity Adjustment Facility (LAF) are accounted for as borrowing and lending transactions from the three months ended March 31, 2012.

g) Broken period interest (the amount of interest from the previous interest payment date till the date of purchase/sale of instruments) on debt instruments is treated as a revenue item.

h) At the end of each reporting period, security receipts issued by asset reconstruction companies are valued in accordance with the guidelines applicable to such instruments, prescribed by RBI from time to time. Accordingly, in cases where the cash flows from security receipts issued by asset reconstruction companies are limited to the actual realization of the financial assets assigned to the instruments in the concerned scheme, the Bank reckons the NAV, obtained from the asset reconstruction company from time to time, for valuation of such investments at each reporting period end.

i) The Bank follows trade date method of accounting for purchase and sale of investments, except for government of India and state government securities where settlement date method of accounting is followed in accordance with RBI guidelines.

ii) The Bank's consolidating venture capital funds carry investments at fair values, with unrealized gains and temporary losses on investments recognized as components of investors' equity and accounted for in the unrealized investment reserve account. The realized gains and

F-31

losses on investments and units in mutual funds and unrealized gains or losses on revaluation of units in mutual funds are accounted for in the profit and loss account. Provisions are made in respect of accrued income considered doubtful. Such provisions as well as any subsequent recoveries are recorded through the profit and loss account. Subscription to/purchase of investments are accounted at the cost of acquisition inclusive of brokerage, commission and stamp duty. Bonus shares and right entitlements are recorded when such benefits are known. Quoted investments are valued on the valuation date at the closing market price. Quoted investments that are not traded on the valuation date but are traded during the two months prior to the valuation date are valued at the latest known closing price. An appropriate discount is applied where the asset management company considers it necessary to reflect restrictions on disposal. Quoted investments not traded during the two months prior to the valuation date are treated as unquoted. Unquoted investments are valued at their estimated fair values by applying appropriate valuation methods. Where there is a decline, other than temporary in the carrying amounts of investments, the resultant reduction in the carrying amount is charged to the profit and loss account during the period in which such decline is identified.

- iii) The Bank's primary dealership and securities broking subsidiaries classify their investments as short-term and trading or as long-term investments. The securities held with the intention of holding for short-term and trading are classified as stock-in-trade and are valued at lower of cost or market value. The securities acquired with the intention of holding till maturity or for a longer period are classified as long-term investments and are carried at cost. Appropriate provision is made for other than temporary diminution in the value of investments. Commission earned in respect of securities acquired upon devolvement is reduced from the cost of acquisition.
- iv) The Bank's housing finance subsidiary classifies its investments as current investments and long-term investments. Investments that are readily realizable and intended to be held for not more than a year are classified as current investments, which are carried at the lower of cost and net realizable value. All other investments are classified as long-term investments, which are carried at cost. However, a provision for diminution in value is made to recognize any other than temporary decline in the value of such long-term investments. Costs such as brokerage, commission etc. paid at the time of acquisition of investments are included in the investment cost.
- v) The Bank's United Kingdom and Canadian banking subsidiaries account for unrealized gain/loss, net of tax, on investment in 'Available for Sale' category directly in their reserves. Further, in the case of the Bank's United Kingdom and Canadian banking subsidiaries, unrealized gain/loss on investment in 'Held for Trading' category is accounted directly in the profit and loss account.
- vi) In the case of life and general insurance businesses, investments are made in accordance with the Insurance Act, 1938, the IRDA (Investment) Regulations, 2000, and various other circulars/notifications issued by the IRDA in this context from time to time.

In the case of life insurance business, valuation of investments (other than linked business) is done on the following basis:

- a. All debt securities and redeemable preference shares are considered as 'held to maturity' and accordingly stated at historical cost, subject to amortization of premium or accretion of discount in the profit or loss account over the period of maturity/holding on a straight line basis.
- b. Listed equity shares are stated at fair value being the last quoted closing price on the National Stock Exchange (NSE) [in case of securities not listed on NSE, the last quoted closing price on the Bombay Stock Exchange (BSE) is used].

c. Mutual fund units at the balance sheet date are valued at the latest available net asset values of the respective fund.

Unrealized gains/losses arising due to changes in the fair value of listed equity shares and mutual fund units are taken to 'Revenue and other reserves' in the balance sheet for life insurance business.

In the case of general insurance business, valuation of investments is done on the following basis:

a. All debt securities including government securities and non-convertible preference shares are considered as 'held to maturity' and accordingly stated at amortized cost determined after amortization of premium or accretion of discount on a straight line basis over the holding/maturity period.

b. Listed equities and convertible preference shares at the balance sheet date are stated at fair value, being the lowest of last quoted closing price on NSE or BSE.

c. Mutual fund investments (other than venture capital fund) are stated at fair value, being the closing net asset value at balance sheet date.

d. Investments other than mentioned above are valued at cost.

Unrealized gains/losses arising due to changes in the fair value of listed equity shares and mutual fund units are taken to 'Revenue and other reserves' in the balance sheet for general insurance business.

The general insurance subsidiary assesses at each balance sheet date whether there is any indication that any investment in equity or units of mutual fund may be impaired. If any such indication exists, the carrying value of such investment is reduced to its recoverable amount and the impairment loss is recognized in the revenue(s)/profit and loss account.

The total proportion of investments for which subsidiaries have applied accounting policies different from the Bank as mentioned above, is approximately 15.18% of the total investments at March 31, 2012.

14. Provisions/write-offs on loans and other credit facilities

a) All credit exposures, including overdues arising from crystallised derivative contracts, are classified as per RBI guidelines, into performing and NPAs. Advances held at the overseas branches that are identified as impaired as per host country regulations but which are standard as per the extant RBI guidelines are identified as NPAs at a borrower level. Further, NPAs are classified into sub-standard, doubtful and loss assets based on the criteria stipulated by RBI.

In the case of corporate loans, provisions are made for sub-standard and doubtful assets at the rates prescribed by RBI. Loss assets and the unsecured portion of doubtful assets are provided for/written off as per the extant RBI guidelines. For advances booked in overseas branches, which are standard as per the extant RBI guidelines but are classified as NPAs based on host country guidelines, provisions are made as per the host country regulations. Provisions on homogeneous retail loans, subject to minimum provisioning requirements of RBI, are assessed at a borrower level on the basis of days past due.

The Bank holds specific provisions against non-performing loans and general provision against performing loans and floating provisions taken over from erstwhile Bank of Rajasthan upon amalgamation. The assessment of incremental specific provisions is made after taking into consideration the existing specific provision held. The specific provisions on retail loans held by the Bank are higher than the minimum regulatory requirements.

b) Provision on assets restructured/rescheduled is made in accordance with the applicable RBI guidelines on restructuring of advances by Banks.

In respect of non-performing loan accounts subjected to restructuring, the account is upgraded to standard only after the specified period i.e. a period of one year after the date when first payment of interest or of principal, whichever is earlier, falls due, subject to satisfactory performance of the account during the period.

c) Amounts recovered against debts written off in earlier years and provisions no longer considered necessary in the context of the current status of the borrower are recognized in the profit and loss account.

d) In addition to the specific provision on NPAs, the Bank/the Bank's housing finance subsidiary maintains a general provision on performing loans. The general provision covers the requirements of the RBI/NHB guidelines.

e) In addition to the provisions required to be held according to the asset classification status, provisions are held for individual country exposures (other than for home country exposure). The countries are categorised into seven risk categories namely insignificant, low, moderate, high, very high, restricted and off-credit and provisioning is made on exposures exceeding 180 days on a graded scale ranging from 0.25% to 100.00%. For exposures with contractual maturity of less than 180 days, provision is required to be held at 25.00% of the rates applicable to exposures exceeding 180 days. If the country exposure (net) of the Bank in respect of each country does not exceed 1.00% of the total funded assets, no provision is required on such country exposure.

f) In the case of the Bank's housing finance subsidiary, loans and other credit facilities are classified as per the NHB guidelines into performing and non-performing assets. Further, NPAs are classified into sub-standard, doubtful and loss assets based on criteria stipulated by NHB. Additional provisions are made against specific non-performing assets over and above what is stated above, if in the opinion of the management, increased provisions are necessary.

g) In the case of the Bank's overseas banking subsidiaries, loans are stated net of allowance for credit losses. Loans are classified as impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition on the loan (a loss event) and that loss event (or events) has an impact on the estimated future cash flows of the loans that can be reliably estimated. An allowance for impairment losses is maintained at a level that management considers adequate to absorb identified credit related losses as well as losses that have occurred but have not yet been identified.

The total proportion of loans for which subsidiaries have applied accounting policies different from the Bank as mentioned above, is approximately 11.56% of the total loans at March 31, 2012.

15. Transfer and servicing of assets

The Bank transfers commercial and consumer loans through securitization transactions. The transferred loans are de-recognized and gains/losses are accounted for only if the Bank surrenders the

rights to benefits specified in the underlying securitized loan contract. Recourse and servicing obligations are accounted for net of provisions.

In accordance with the RBI guidelines for securitization of standard assets, with effect from February 1, 2006, the Bank accounts for any loss arising from securitization immediately at the time of sale and the profit/premium arising from securitization is amortized over the life of the securities issued or to be issued by the special purpose vehicle to which the assets are sold. In the case of loans sold to an asset reconstruction company, the excess provision is not reversed but is utilized to meet the shortfall/loss on account of sale of other financial assets to securitization company (SC)/reconstruction company (RC).

The Canadian subsidiary has entered into securitization arrangements in respect of its originated mortgages. ICICI Bank Canada either retains substantially all the risk and rewards or retains control over these mortgages, hence these arrangements do not qualify for de-recognition accounting under their local accounting standards. It continues to recognize the mortgages securitized in the book of accounts and the amounts received through securitization are recognized as "Other borrowings".

16. Fixed assets and depreciation

Premises and other fixed assets are carried at cost less accumulated depreciation. Cost includes freight, duties, taxes and incidental expenses related to the acquisition and installation of the asset. Depreciation is charged over the estimated useful life of a fixed asset on a straight-line basis. The rates of depreciation for fixed assets, which are not lower than the rates prescribed in Schedule XIV of the Companies Act, 1956.

Depreciation on leased assets and leasehold improvements is recognized on a straight-line basis using rates determined with reference to the primary period of lease or rates specified in Schedule XIV of the Companies Act, 1956, whichever is higher.

Assets purchased/sold during the period are depreciated on a pro-rata basis for the actual number of days the asset has been put to use.

In case of the Bank, items costing up to Rs.5,000/- are depreciated fully over a period of 12 months from the date of purchase.

In case of revalued/impaired assets, depreciation is provided over the remaining useful life of the assets with reference to revised values of the assets.

17. Accounting for derivative contracts

The Group enters into derivative contracts such as foreign currency options, interest rate and currency swaps, credit default swaps and cross currency interest rate swaps.

The swap contracts entered into to hedge on-balance sheet assets and liabilities are structured such that they bear an opposite and offsetting impact with the underlying on-balance sheet items. The impact of such derivative instruments is correlated with the movement of underlying assets and accounted pursuant to the principles of hedge accounting. Hedge swaps are accounted for on an accrual basis except in the case of the Bank's United Kingdom and Canadian banking subsidiaries, where the hedging transactions and the hedged items (for the risks being hedged) are measured at fair value with changes recognized in the profit and loss account.

Foreign currency and rupee derivative contracts entered into for trading purposes are marked to market and the resulting gain/loss, (net of provisions, if any) is accounted for in the profit and loss account. Pursuant to RBI guidelines, any receivables under derivative contracts which remain overdue

F-35

for more than 90 days and mark-to-market gains on other derivative contracts with the same counter-parties are reversed through the profit and loss account.

18. Impairment of assets

Fixed assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset with future net discounted cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment is recognized by debiting the profit and loss account and is measured as the amount by which the carrying amount of the assets exceeds the fair value of the assets.

19. Lease transactions

Lease payments for assets taken on operating lease are recognized as an expense in the profit and loss account over the lease term.

20. Earnings per share

Basic and diluted earnings per share are computed in accordance with AS 20 on 'earnings per share' issued by ICAI.

Basic EPS is calculated by dividing the net profit or loss after tax for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year.

Diluted earnings per share reflect the potential dilution that could occur if contracts to issue equity shares were exercised or converted during the year. Diluted earnings per equity share is computed using the weighted average number of equity shares and dilutive potential equity shares issued by the group outstanding during the year, except where the results are anti-dilutive.

SCHEDULE 18: NOTES FORMING PART OF THE ACCOUNTS

A. The following additional disclosures have been made taking into account the requirements of Accounting Standards (ASs) and Reserve Bank of India (RBI) guidelines in this regard.

1. Earnings per share

Basic and diluted earnings per equity share are computed in accordance with AS 20 on 'earnings per share'. Basic earnings per share is computed by dividing net profit after tax by the weighted average number of equity shares outstanding during the year. The diluted earnings per equity share is computed using the weighted average number of equity shares and dilutive potential equity shares outstanding during the year.

The following table sets forth, for the periods indicated, the computation of earnings per share.

	Rupees in million, except per share data	
	Year ended March 31, 2012	Year ended March 31, 2011
Basic		
Weighted average no. of equity shares outstanding	1,152,338,322	1,137,988,639
Net profit	76,429.2	60,932.7
Basic earnings per share (Rs.)	66.33	53.54
Diluted		
Weighted average no. of equity shares outstanding	1,155,591,617	1,143,267,823
Net profit	76,338.7	60,876.5
Diluted earnings per share (Rs.)	66.06	53.25
Nominal value per share (Rs.)	10.00	10.00

The dilutive impact is mainly due to options granted to employees by the Group.

2. Related party transactions

The Group has transactions with its related parties comprising associates/other related entities and key management personnel and their relatives.

Associates/other related entities

Financial Inclusion Network & Operations Limited, I-Process Services (India) Private Limited, I-Solutions Providers (India) Private Limited (up to September 30, 2011)¹, NIIT Institute of Finance Banking and Insurance Training Limited, Comm Trade Services Limited, Prize Petroleum Company Limited (up to September 30, 2011), ICICI Foundation for Inclusive Growth, Rainbow Fund, ICICI Merchant Services Private Limited and Mewar Aanchalik Gramin Bank².

1. I-Solutions Providers (India) Private Limited has been amalgamated with I-Process Services (India) Private Limited during the three months ended December 31, 2011.

2. With respect to an entity, which has been identified as a related party during the quarter ended September 30, 2010, transactions reported from the quarter ended September 30, 2010.

Key management personnel

Ms. Chanda Kochhar, Mr. Sandeep Bakhshi¹, Mr. N. S. Kannan, Mr. K. Ramkumar, Mr. Rajiv Sabharwal², Mr. Sonjoy Chatterjee³.

Relatives of key management personnel

Mr. Deepak Kochhar, Mr. Arjun Kochhar, Ms. Aarti Kochhar, Mr. Mahesh Advani, Ms. Varuna Karna, Ms. Sunita Advani, Ms. Mona Bakhshi¹, Mr. Sameer Bakhshi¹, Ms. Rangarajan Kumudalakshmi, Ms. Aditi Kannan, Mr. Narayanan Raghunathan, Mr. Narayanan Rangarajan, Mr. Narayanan Krishnamachari, Ms. Narayanan Sudha, Mr. R. Shyam, Ms. R. Suchithra, Mr. K. Jayakumar, Ms. J. Krishnaswamy, Ms. Sangeeta Sabharwal², Mr. Sanjiv Sabharwal², Mr. Somnath Chatterjee³, Mr. Tarak Nath Chatterjee³, Ms.

Sunaina Chatterjee³, Ms. Nandini Chatterjee³

1. Transactions reported upto July 31, 2010.
2. Transactions reported with effect from June 24, 2010.
3. Transactions reported upto April 30, 2010.

The following were the significant transactions between the Group and its related parties for the year ended March 31, 2012. A specific related party transaction is disclosed as a material related party transaction wherever it exceeds 10% of all related party transactions in that category.

Insurance services

During the year ended March 31, 2012, the Group received insurance premium from associates/other related entities amounting to Rs. 17.8 million (March 31, 2011: Rs. 9.5 million), from key management personnel of the Bank amounting to Rs. 1.1 million (March 31, 2011: Rs. 0.2 million) and from relatives of key management personnel amounting to Rs. 0.1 million (March 31, 2011: Rs. 0.1 million). The material transactions for the year ended March 31, 2012 was with Financial Inclusion Network & Operations Limited amounting to Rs. 15.1 million (March 31, 2011: Rs. 7.7 million).

During the year ended March 31, 2012, the Group paid insurance claims to its associates/other related entities amounting to Rs. 0.4 million (March 31, 2011: Rs. 0.7 million). The material transactions for the year ended March 31, 2012 were with I-Process Services (India) Private Limited amounting to Rs. 0.4 million (March 31, 2011: Rs. 0.1 million) and with Financial Inclusion Network & Operations Limited amounting to Nil (March 31, 2011: Rs. 0.6 million).

Fees and commission and other income

During the year ended March 31, 2012, the Group received fees from its associates/other related entities amounting to Rs. 21.8 million (March 31, 2011: Rs. 0.9 million) and from key management personnel of the Bank amounting to Rs. 0.3 million (March 31, 2011: Nil) and from relatives of key management personnel amounting to Nil (March 31, 2011: Nil). The material transactions for the year ended March 31, 2012 were with ICICI Merchant Services Private Limited amounting to Rs. 18.7 million (March 31, 2011: Nil), NIIT Institute of Finance Banking and Insurance Training Limited amounting to Rs. 1.1 million (March 31, 2011: Rs. 0.8 million) and with Rainbow Fund amounting to Nil (March 31, 2011: Rs. 0.1 million).

Lease of premises, common corporate and facilities expenses

During the year ended March 31, 2012, the Group recovered from its associates/other related entities an amount of Rs. 38.4 million (March 31, 2011: Rs. 86.6 million) for lease of premises, common corporate and facilities expenses. The material transaction for the year ended March 31, 2012 was with ICICI Merchant Services Private Limited amounting to Rs. 38.4 million (March 31, 2011: Rs. 86.6 million).

Secondment of employees

During the year ended March 31, 2012, the Group recovered towards deputation of employees from its associates/other related entities an amount of Rs. 7.0 million (March 31, 2011: Rs. 32.7 million). The material transactions for the year ended March 31, 2012 were with I-Process Services (India) Private Limited amounting to Rs. 7.0 million (March 31, 2011: Rs. 3.8 million) and with ICICI Merchant Services Private Limited amounting to Nil (March 31, 2011: Rs. 24.4 million).

Brokerage, fees and other expenses

During the year ended March 31, 2012, the Group paid brokerage/fees and other expenses to its associates/other related entities amounting to Rs. 2,551.8 million (March 31, 2011: Rs. 1,987.2 million).

F-38

The material transactions for the year ended March 31, 2012 were with Financial Inclusion Network & Operations Limited amounting to Rs. 978.3 million (March 31, 2011: Rs. 922.1 million), ICICI Merchant Services Private Limited amounting to Rs. 953.9 million (March 31, 2011: Rs. 664.4 million) and with I-Process Services (India) Private Limited amounting to Rs. 606.5 million (March 31, 2011: Rs. 392.9 million).

Purchase of investments

During the year ended March 31, 2012, the Group invested in equity warrants of Financial Inclusion Network & Operations Limited amounting to Rs. 40.0 million (March 31, 2011: Nil).

Sale of investments

During the year ended March 31, 2012, the Group sold certain investments to its associates/other related entities amounting to Rs. 48.7 million (March 31, 2011: Nil). The material transaction for the year ended March 31, 2012 was with Mewar Aanchalik Gramin Bank amounting to Rs. 48.7 million (March 31, 2011: Nil).

Interest expenses

During the year ended March 31, 2012, the Group paid interest to its associates/other related entities amounting to Rs. 156.6 million (March 31, 2011: Rs. 79.5 million), to its key management personnel amounting to Rs. 2.0 million (March 31, 2011: Rs. 1.5 million) and to relatives of key management personnel amounting to Rs. 1.1 million (March 31, 2011: Rs. 0.7 million). The material transactions for the year ended March 31, 2012 were with Mewar Aanchalik Gramin Bank amounting to Rs. 128.9 million (March 31, 2011: Rs. 69.7 million) and with ICICI Merchant Services Private Limited amounting to Rs. 17.0 million (March 31, 2011: Rs. 3.2 million).

Interest income

During the year ended March 31, 2012, the Group received interest from its associates/other related entities amounting to Rs. 51.6 million (March 31, 2011: Rs. 7.0 million), from its key management personnel amounting to Rs. 0.5 million (March 31, 2011: Rs. 0.4 million) and from relatives of key management personnel amounting to Rs. 0.7 million (March 31, 2011: Rs. 0.7 million). The material transactions for the year ended March 31, 2012 were with ICICI Merchant Services Private Limited amounting to Rs. 48.0 million (March 31, 2011: Nil) and with Financial Inclusion Network & Operations Limited amounting to Rs. 3.5 million (March 31, 2011: Rs. 7.0 million).

Dividend paid

During the year ended March 31, 2012, the Bank paid dividend to its key management personnel amounting to Rs. 4.5 million (March 31, 2011: Rs. 4.2 million). The dividend paid during the year ended March 31, 2012 to Ms. Chanda Kochhar was Rs. 3.8 million (March 31, 2011: Rs. 3.2 million) and to Mr. N. S. Kannan was Rs. 0.7 million (March 31, 2011: Rs. 1.0 million). The dividend paid for the year ended March 31, 2011 to Mr. Sandeep Bakhshi was Rs. 0.04 million.

Remuneration to whole-time directors

Remuneration paid to the whole-time directors of the Bank during the year ended March 31, 2012 was Rs. 111.3 million (March 31, 2011: Rs. 79.6 million). The remuneration paid for the year ended March 31, 2012 to Ms. Chanda Kochhar was Rs. 37.7 million (March 31, 2011: Rs. 25.2 million), to Mr. K. Ramkumar was Rs. 25.4 million (March 31, 2011: Rs. 17.6 million), to Mr. N. S. Kannan was Rs. 25.0 million (March 31, 2011: Rs. 15.8 million) and to Mr. Rajiv Sabharwal was Rs. 23.2 million (March 31, 2011: Rs. 9.0 million). The remuneration paid for the year ended

March 31, 2011 to Mr. Sandeep Bakhshi was Rs. 7.7 million and to Mr. Sonjoy Chatterjee was Rs. 4.3 million.

F-39

Sale of fixed assets

During the year ended March 31, 2012, the Group sold fixed assets to its associates/other related entities amounting to Nil (March 31, 2011: Rs. 2.8 million). The material transaction for the year ended March 31, 2012 was with ICICI Merchant Services Private Limited amounting to Nil (March 31, 2011: Rs. 2.8 million).

Donation

During the year ended March 31, 2012, the Group has given donation to ICICI Foundation for Inclusive Growth amounting to Rs. 259.0 million (March 31, 2011: Rs. 97.0 million).

Related party balances

The following table sets forth, for the periods indicated, the balance payable to/receivable from its associates/other related entities.

Items	At March 31, 2012	Rs. in million
		At March 31, 2011
Deposits with the Group	2,011.1	1,561.7
Advances	1,004.8	44.3
Investments of the Group in related parties	955.0	965.2

Deposits	29.3	22.3
Advances	9.2	9.1

3. Employee stock option scheme (ESOS)

In terms of the ESOS, as amended, the maximum number of options granted to any eligible employee in a financial year shall not exceed 0.05% of the issued equity shares of the Bank at the time of grant of the options and aggregate of all such options granted to the eligible employees shall not exceed 5% of the aggregate number of the issued equity shares of the Bank on the date(s) of the grant of options. Under the stock option scheme, eligible employees are entitled to apply for equity shares. Options granted for fiscal 2003 and earlier years vest in a graded manner over a three-year period, with 20%, 30% and 50% of the grants vesting in each year commencing from the end of 12 months from the date of grant. Options granted from fiscal 2004 vest in a graded manner over a four-year period, with 20%, 20%, 30% and 30% of the grants vesting in each year commencing from the end of 12 months from the date of grant. Options granted in April 2009 vest in a graded manner over a five year period with 20%, 20%, 30% and 30% of grant vesting each year, commencing from the end of 24 months from the date of grant. Options granted in September, 2011 vest in a graded manner over a five years period with 15%, 20%, 20% and 45% of grant vesting each year, commencing from the end of 24 months from the date of the grant. The options can be exercised within 10 years from the date of grant or five years from the date of vesting, whichever is later. As per the scheme, the exercise price of ICICI Bank's options is the last closing price on the stock exchange, which recorded highest trading volume preceding the date of grant of options. Hence, there was no compensation cost based on intrinsic value of options.

In February, 2011, the Bank granted 3,035,000 options to eligible employees and whole-time Directors of ICICI Bank and certain of its subsidiaries at an exercise price of Rs. 967. Of these options granted, 50% would vest on April 30, 2014 and the balance 50% would vest on April 30, 2015. The options can be exercised within 10 years from the date of grant or five years from the date of vesting, whichever is later. Based on intrinsic value of options, compensation cost of Rs. 20.9 million was recognized during the year ended March 31, 2012 (March 31, 2011 Rs. 2.9 million).

If ICICI Bank had used the fair value of options based on binomial tree model, compensation cost in the year ended March 31, 2012 would have been higher by Rs. 1,816.1 million. The key assumptions used to estimate the fair value of options granted during the year ended March 31, 2012 are given below.

Risk-free interest rate	7.99 to 9.07% p.a
Expected life	6.35 to 6.98 years
Expected volatility	47.53 to 49.20% p.a
Expected dividend yield	1.26 to 1.60% p.a

The weighted average fair value of options granted during the year ended March 31, 2012 is Rs. 592.52 per option (March 31, 2011: Rs. 535.87).

A summary of the status of the Bank's stock option plan is given below.

Particulars	Rs. except number of options			
	Stock options outstanding			
	Year ended March 31, 2012		Year ended March 31, 2011	
	Number of options	Weighted Average Exercise Price	Number of options	Weighted Average Exercise Price
Outstanding at the beginning of the year	20,529,387	779.72	18,763,460	689.50
Add: Granted during the year	4,060,600	1,104.82	5,514,600	972.00
Less: Lapsed during the year, net of re-issuance	448,372	798.77	1,005,536	871.95
Less: Exercised during the year	942,070	510.94	2,743,137	517.21
Outstanding at the end of the year	23,199,545	846.94	20,529,387	779.72
Options exercisable	12,019,655	745.26	10,197,137	682.72

In terms of the Scheme, 23,199,545 options (March 31, 2011: 20,529,387 options) granted to eligible employees were outstanding at March 31, 2012.

A summary of stock options outstanding at March 31, 2012 is given below.

Range of exercise price (Rs. per share)	Number of shares arising out of options	Weighted average exercise price (Rs. per	Weighted average remaining contractual life

Range of exercise price (Rs. per share)	Number of shares arising out of options (Number of shares)	Weighted average exercise price (Rs. per share)	Weighted average remaining contractual life (Number of years)
30-400	12,762,698	211.43	5.10

ICICI General:

ICICI Lombard General Insurance Company has formulated various ESOS schemes to their employees. There is no compensation cost for the year ended March 31, 2012 based on the intrinsic value of options.

F-43

If the entity had used the fair value of options based on the binomial tree model, compensation cost for the year ended March 31, 2012 would have been higher by Rs. 167.2 million (March 31, 2011: Rs. 67.5 million).

The following table sets forth, the key assumptions used to estimate the fair value of options granted during the year ended March 31, 2012.

Risk-free interest rate	7.96-8.41% p.a.
Expected life	3-7 years
Expected volatility	17.00-84.89% p.a.
Expected dividend yield	0.80-2.85% p.a.

The following table sets forth, for the periods indicated, a summary of the status of the stock option plan of ICICI Lombard General Insurance Company.

Particulars	Rs. except number of options			
	Stock options outstanding			
	Year ended March 31, 2012		Year ended March 31, 2011	
	Number of shares	Weighted Average Exercise Price	Number of shares	Weighted Average Exercise Price
Outstanding at the beginning of the year	13,644,522	98.72	13,345,912	94.55
Add: Granted during the year	722,900	109.00	2,311,800	114.00
Less: Forfeited/ lapsed during the year	1,100,770	134.13	1,132,190	126.62
Less : Exercised during the year	817,390	47.23	881,000	43.17
Outstanding at the end of the year	12,449,262	99.33	13,644,522	98.72
Options exercisable	8,713,800	87.23	7,576,580	75.09

The following table sets forth, summary of stock options outstanding of ICICI Lombard General Insurance Company at March 31, 2012.

Range of exercise price (Rs. per share)	Number of shares arising out of options (Number of shares)	Weighted average exercise price (Rs. per share)	Weighted average remaining contractual life (Number of years)
35 – 200	12,449,262	99.33	6.78

If the Group had used the fair value of options based on the binomial tree model, the compensation cost for the year ended March 31, 2012 would have been higher by Rs. 1,891.9 million (March 31, 2011: Rs. 1,022.6 million) and the proforma consolidated profit after tax would have been Rs.74.54 billion (March 31, 2011: Rs. 59.91 billion). On a proforma basis, the Group's basic earnings per share would have been Rs. 64.68 (March 31, 2011: Rs. 52.65) and

diluted earnings per share would have been Rs. 64.42 (March 31, 2011: Rs. 52.35).

4. Fixed assets

The following table sets forth, for the periods indicated, the movement in software acquired by the Group, as included in fixed assets.

F-44

Rs. in million

Particulars	At March 31, 2012	At March 31, 2011
At cost at March 31 of preceding year	8,994.9	8,014.6
Additions during the year	1,206.3	1,185.5
Deductions during the year	(34.7)	(205.2)

The estimates of future salary increases, considered in actuarial valuation, take into consideration inflation, seniority, promotion and other relevant factors.

Provident Fund (PF)

The Group has provided for an amount of Rs. 17.8 million for the year ended March 31, 2012 towards interest rate guarantee on exempt Provident Fund on the basis of actuarial valuation.

Assumptions

Particulars	Year ended March 31, 2012
Discount rate for the term of the obligation	8.25%-8.30%
Average historic yield on the investment portfolio	8.34%-8.97%
Discount rate for the remaining term to maturity of the investment portfolio	8.55%
Expected investment return	8.09%-8.67%
Guaranteed rate of return	8.25%

The Group has contributed Rs. 1,558.2 million to provident fund for the year ended March 31, 2012 (March 31, 2011: Rs. 1,635.6 million) which includes compulsory contribution made towards employee pension scheme under Employees Provident Fund and Miscellaneous Provisions Act, 1952.

9. Provision for income tax

The provision for income tax (including deferred tax) for the year ended March 31, 2012 amounted to Rs. 27,428.6 million (March 31, 2011: Rs. 20,684.9 million).

The Group has a comprehensive system of maintenance of information and documents required by transfer pricing legislation under sections 92-92F of the Income Tax Act, 1961. The management is of the opinion that all international transactions are at arm's length so that the above legislation will not have material impact on the financial statements.

10. Deferred tax

At March 31, 2012 the Group has recorded net deferred tax asset of Rs. 28,033.7 million (March 31, 2011: Rs. 29,936.7 million), which has been included in other assets.

The following table sets forth, for the periods indicated, the break-up of deferred tax assets and liabilities into major items.

Particulars	Rs. in million	
	At March 31, 2012	At March 31, 2011
Deferred tax asset		
Provision for bad and doubtful debts	28,072.1	29,506.7
Capital loss	79.5	--
Others	3,853.9	4,972.1
Total deferred tax asset	32,005.5	34,478.8
Deferred tax liability		
Depreciation on fixed assets	4,331.8	4,496.2
Others	47.8	63.6
Total deferred tax liability	4,379.6	4,559.8
Add: Net deferred tax asset/(liability) pertaining to foreign branches/foreign subsidiaries	407.8	17.7
Total net deferred tax asset/(liability)	28,033.7	29,936.7

At March 31, 2012, ICICI Prudential Life Insurance Company has created deferred tax asset on carry forward unabsorbed losses amounting to Rs. 860.3 million (March 31, 2011: Rs. 1,330.8 million) which can be set off against future taxable income. ICICI Lombard General Insurance Company has created deferred tax asset on carry forward unabsorbed losses amounting to nil (March 31, 2011: Rs. 305.8 million).

11. Information about business and geographical segments

A. Business segments for the year ended March 31, 2012

The primary segment for the Group has been presented as follows:

- Retail banking includes exposures of the Bank which satisfy the four criteria of orientation, product, granularity and low value of individual exposures for retail exposures laid down in the Basel Committee on Banking Supervision document 'International Convergence of Capital Measurement and Capital Standards', as per the RBI guidelines for the Bank.
- Wholesale banking includes all advances to trusts, partnership firms, companies and statutory bodies, by the Bank which are not included under Retail Banking segment, as per the RBI guidelines for the Bank.
- Treasury includes the entire investment portfolio of the Bank, ICICI Eco-net Internet and Technology Fund, ICICI Equity Fund, ICICI Emerging Sectors Fund, ICICI Strategic Investments Fund and ICICI Venture Value Fund.
- Other banking business includes hire purchase and leasing operations and other items not attributable to any particular business segment of the Bank. Further, it includes the Bank's banking subsidiaries i.e. ICICI Bank UK PLC, ICICI Bank Canada and ICICI Bank Eurasia LLC.
- Life insurance represents results of ICICI Prudential Life Insurance Company Limited.

6. General insurance represents results of ICICI Lombard General Insurance Company Limited.
7. Venture fund management represents results of ICICI Venture Funds Management Company Limited.

F-50

8. Others includes ICICI Home Finance Company Limited, ICICI International Limited, ICICI Securities Primary Dealership Limited, ICICI Securities Limited, ICICI Securities Holdings Inc., ICICI Securities Inc., ICICI Prudential Asset Management Company Limited, ICICI Prudential Trust Limited, ICICI Investment Management Company Limited, ICICI Trusteeship Services Limited, TCW/ICICI Investment Partners Limited, ICICI Kinfra Limited, ICICI West Bengal Infrastructure Development Corporation Limited (upto December 31, 2010), I-Ven Biotech Limited and ICICI Prudential Pension Funds Management Company Limited.

Income, expenses, assets and liabilities are either specifically identified with individual segments or are allocated to segments on a systematic basis.

All liabilities are transfer priced to a central treasury unit, which pools all funds and lends to the business units at appropriate rates based on the relevant maturity of assets being funded after adjusting for regulatory reserve requirements.

The results of reported segments for the year ended March 31, 2012 are not comparable with that of reported segments for the year ended March 31, 2011 to the extent entities have been discontinued from consolidation.

F-51

Edgar Filing: ICICI BANK LTD - Form 20-F

The following table sets forth, the business segment results for the year ended March 31, 2012.

Sr. no.	Particulars	Rs. in million

2. Includes assets which cannot be specifically allocated to any of the segments, tax paid in advance/tax deducted at source (net), deferred tax asset (net).

3. Includes share capital and reserves and surplus.

F-53

B. Geographical segments

The Group has reported its operations under the following geographical segments.

- Domestic operations comprise branches and subsidiaries/joint ventures in India.
- Foreign operations comprise branches and subsidiaries/joint ventures outside India and offshore banking unit in India.

The Group conducts transactions with its customers on a global basis in accordance with their business requirements, which may span across various geographies.

The following tables set forth, for the periods indicated, the geographical segment results.

	Rs. in million	
Revenue	Year ended March 31, 2012	Year ended March 31, 2011
Domestic operations	600,630.9	553,305.3
Foreign operations	65,951.9	62,641.7
Total	666,582.8	615,947.0

	Rs. in million	
Assets	At March 31, 2012	At March 31, 2011
Domestic operations	4,698,080.0	4,128,281.6
Foreign operations	1,277,623.4	1,142,335.5
Total	5,975,703.4	5,270,617.1

Note: Segment assets do not include tax paid in advance/tax deducted at source (net) and deferred tax asset (net).

	Rs. in million			
	Capital expenditure incurred during the year ended		Depreciation provided on capital expenditure during the year ended	
	March 31, 2012	March 31, 2011	March 31, 2012	March 31, 2011
Domestic operations	5,703.3	25,008.7	6,543.1	7,188.6
Foreign operations	394.5	94.6	171.3	208.2
Total	6,097.8	25,103.3	6,714.4	7,396.8

12. Penalties/fines imposed by RBI and other banking regulatory bodies

The penalty imposed by RBI and other banking regulatory bodies during the year ended March 31, 2012 was Rs. 1,510,000 (March 31, 2011: Rs. 510,000). RBI imposed a penalty of Rs. 1,500,000 in April 2011 on the Bank towards non-compliance of certain instructions issued by RBI in respect of derivative business and in February 2012, RBI imposed a penalty of Rs. 10,000 under section 11(3) of FEMA, 1999 with regard to delay in reporting a FDI transaction. The Bank has paid the penalties to RBI.

13. Small and Micro Industries

Under the Micro, Small and Medium Enterprises Development Act, 2006 which came into force from October 2, 2006, certain disclosures are required to be made relating to enterprises covered under the Act. During the year ended March 31, 2012, the amount paid after the due date to vendors registered under the MSMED Act, 2006 was Rs. 7.1 million (March 31, 2011: Rs. 17.9 million). An amount of Rs. 0.1 million (March 31, 2011: Rs. 0.7 million) has been charged to profit & loss account towards accrual of interest on these delayed payments.

14. Reconciliation of Nostro account

In terms of RBI circular no. DBOD.BP.BC.No. 133/21.04.018/2008-09 dated May 11, 2009, Rs. 3.2 million (March 31, 2011: Rs. 2.6 million) representing outstanding credit balances of individual value less than US\$ 2,500 or equivalent lying in nostro account, which were originated up to March 31, 2002, was transferred to profit and loss account during the year ended March 31, 2012 and has been subsequently appropriated to General Reserve.

15. Repurchase transactions

The Bank has started accounting for LAF transactions as borrowing and lending during the year ended March 31, 2012. If the bank had continued to account for LAF transactions as "sale and repurchase" at March 31, 2012, the investments would have been lower by Rs. 168,000.0 million and the borrowings would have been lower by Rs. 168,000.0 million.

16. Contribution to Motor Third Party Insurance Pool by ICICI Lombard General Insurance Company Limited (ICICI General)

In accordance with IRDA guidelines, ICICI General, together with all other general insurance companies participated in the Indian Motor Third Party Insurance Pool ('the Pool'), administered by the General Insurance Corporation of India ('GIC') from April 1, 2007. The Pool covers reinsurance of third party risks of commercial vehicles.

ICICI General ceded 100.0% of the third party premium collected to the Pool and recorded its share of results in the pool based on unaudited statement received from the Pool for the period from March 2011 up to February 2012 and on management's estimate for March 2012. In accordance with regulations, the Pool had followed a policy of providing for Unexpired Risk Reserve at a minimum of 50.0% of the Pooled business. Accordingly company has carried forward 50.0% of current year premiums from the Pool as Unexpired Risk Reserve.

IRDA through its orders dated December 23, 2011, January 3, 2012 and March 22, 2012 has directed the dismantling of the Pool on a clean cut basis and advised recognition of the Pool liabilities as per the loss ratios estimated by GAD UK ('GAD Estimates') for underwriting years commencing from the year ended March 31, 2008 to year ended March 31, 2012, with the option

to recognize the same over a three year period. ICICI General has decided to recognize the additional liabilities of the Pool in the current year and accordingly, the Bank's consolidated net profit after tax for the year ended March 31, 2012 includes impact of additional Pool losses of Rs. 5,030.3 million in line with the Bank's shareholding in ICICI General.

During the year ended March 31, 2011, IRDA had carried out independent assessment of the provision required and through its order dated March 12, 2011 directed all general insurance companies to make a provision of not less than 153.00% for each of the four years from the inception of the Pool (i.e. from 2007-08). Due to this, an additional provision of Rs. 2,720.0 million had been created by ICICI General in the year ended March 31, 2011. Accordingly, the Bank's consolidated net profit after tax for the year ended March 31, 2011 included impact of additional losses on account of the Pool of Rs. 2,000.6 million.

17. Transition from Canadian GAAP to IFRS by ICICI Bank Canada

Pursuant to the decision of Canadian Accounting Standards Board, ICICI Bank Canada has adopted International Financial Reporting Standards (IFRS) for preparation of its financial statements for periods beginning on or after January 1, 2011. Accordingly, its financial statements included in the consolidated financial statements were prepared in accordance with Canadian Generally Accepted Accounting Principles for previous periods and have been prepared as per IFRS with effect from April 1, 2011. The impact of Rs. 717.8 million on first time adoption of IFRS has been adjusted and shown in Schedule 2- Reserves and Surplus under balance in profit and loss account-others in the financials for the year ended March 31, 2012.

18. Additional disclosure

Additional statutory information disclosed in the separate financial statements of the Bank and subsidiaries having no material bearing on the true and fair view of the consolidated financial statements and the information pertaining to the items which are not material have not been disclosed in the consolidated financial statements.

19. Comparative figures

Figures of the previous year have been re-grouped to conform to the current year presentation.

ICICI Bank Limited and subsidiaries

Schedules forming part of the Consolidated Financial Statements

B. Additional Notes

1. Reserves

Balance in profit and loss account: Represents the balance of profit after appropriations.

Statutory reserve: Represents reserve created as a percentage of the net profit before any other appropriation as required by the Banking Regulation Act, 1949. Every banking company in India is currently required to transfer not less than 25% of the net profit (before appropriations) to the “statutory reserve”.

Capital reserve: Represents amount of gains on sale of securities classified as held to maturity and gains on sale of land and building, net of tax and transfer to statutory reserves.

Securities premium: Represents amount of premium received on issue of share capital, net of expenses incurred on issue of shares.

Special reserve: Represents reserve maintained under the Income Tax Act, 1961 to avail tax benefits.

Foreign currency translation reserve: Represents exchange differences on translation of financial statements of non-integral foreign operations.

Revenue and other reserves: Represents reserves other than capital reserves and those separately classified.

Unrealized investment reserve: Represents unrealized gains/losses on venture capital investments.

Reserve fund: Represents appropriation made to reserve fund and investment fund account in accordance with regulations applicable to Sri Lanka branch.

Investment reserve account: Represents provision for depreciation on available for sale and held for trading securities in excess of required amount which is credited to profit and loss account and appropriated to this reserve, net of tax and transfer to statutory reserve.

2. Deposits

Deposits include demand deposits, which are non-interest bearing, and savings and time deposits, which are interest bearing.

The following table sets forth the residual contractual maturities of time deposits at March 31, 2012.

Rupees in million

Deposits maturing during the year ended March 31,

2013	1,279,276.3
2014	208,066.1
2015	74,819.6

2016	31,536.9
2017	24,018.8
Thereafter	14,021.4
Total time deposits	1,631,739.1

At March 31, 2012, the aggregate of time deposits with individual balances greater than Rs. 5.0 million was Rs. 1,021,020.9 million (March 31, 2011: Rs. 890,277.1 million).

F-57

ICICI Bank Limited and subsidiaries

Schedules forming part of the Consolidated Financial Statements

3. Long-term debt

Long-term debt represents debt with an original contractual maturity of greater than one year. Maturity distribution is based on contractual maturity or the date at which the debt is callable at the option of the holder, whichever is earlier. A portion of the long-term debt bears a fixed rate of interest. Interest rates on floating-rate debt are generally linked to the London Inter-Bank Offer Rate ('LIBOR') or similar money market rates. The segregation between fixed-rate and floating-rate obligations is based on the contractual terms.

The following table sets forth a listing of long-term debt at March 31, 2012, by maturity and interest rate profile.

	Rupees in million		
	Fixed-rate obligations	Floating-rate obligations	Total
Long-term debt maturing during the year ended March 31,			
2013	163,469.1	72,421.7	235,890.8
2014	32,815.5	92,089.9	124,905.4
2015	54,873.4	27,774.0	82,647.4
2016	77,494.7	21,285.7	98,780.4
2017	145,942.7	15,940.4	161,883.1
Thereafter	342,079.3	40,726.7	382,806.0
Total	816,674.7	270,238.4	1,086,913.1
Less: Unamortized debt issue costs			(713.2)
Total			1,086,199.9

Debt aggregating Rs. 16,358.1 million (March 31, 2011: Rs. 20,882.5 million) is guaranteed by the Government of India (GOI). Long-term debt is denominated in various currencies. At March 31, 2012, long-term debt comprises Indian rupee debt of Rs. 388,482.2 million (March 31, 2011: Rs. 431,436.0 million) and foreign currency debt of Rs. 697,717.7 million (March 31, 2011: Rs. 544,651.4 million).

6. Repurchase transactions

The Group has undertaken repurchase and reverse repurchase transactions of Government securities during the year. These transactions are generally of a very short tenure and are undertaken with banks and other financial institutions as counterparties. Repurchase transactions and reverse repurchase transactions are each two-step transactions. In both types of transactions, the agreements for the first and the second steps are entered into concurrently.

Until March 31, 2010, the Group removed securities from its investment portfolio by selling them to banks or financial institutions in the first step of a repurchase transaction, in accordance with the Reserve Bank of India guidelines. The second step of a repurchase transaction entailed “reversing” the first step by repurchasing the sold securities. In the first step of a reverse repurchase transaction, by contrast, the securities were added to the Group’s investment portfolio by purchasing securities from banks or financial institutions. The second step of a reverse repurchase transaction entailed “reversing” the first step by selling the purchased securities.

Under the Reserve Bank of India guidelines, the original transferor of the securities (borrower of funds) continued to receive coupon payments on the securities, even while the repurchase transaction was open. The original transferor (borrower of funds) paid the agreed upon interest to the original transferee (lender of funds). Accordingly, upon completion of the second step, the net income impact of a repurchase transaction was recognition of interest expense in accordance with the terms of the repurchase agreement, whereas the net

F-62

ICICI Bank Limited and subsidiaries

Schedules forming part of the Consolidated Financial Statements

income impact of a reverse repurchase transaction was recognition of interest income in accordance with the terms of the reverse repurchase agreement.

From April 1, 2010, the Reserve Bank of India changed the guidelines for transactions with banks and financial institutions (other than transactions made by the Bank under the Liquidity Adjustment Facility with the Reserve Bank of India). These non-Liquidity Adjustment Facility transactions are now treated as secured borrowings and lendings. For the last three months of fiscal 2012 (i.e., through March 31, 2012) the repurchase and reverse repurchase transactions with the Reserve Bank of India under the Liquidity Adjustment Facility are also accounted for as secured borrowings and lendings.

At March 31, 2012, outstanding borrowings under repurchase transactions with other banks and financial institutions amounted to Rs. 24,247.2 million (March 31, 2011: Rs. 21,897.1 million) and the outstanding lendings under reverse repurchase transactions with other banks and financial institutions amounted to Rs. 6,891.2 million (March 31, 2011: Rs. 124.0 million). At March 31, 2012, outstanding borrowings under Liquidity Adjustment Facility with the Reserve Bank of India amounted to Rs. 176,400.0 million (securities sold at March 31, 2011: Rs. 105,500.0 million) and the outstanding lendings under the Liquidity Adjustment Facility with Reserve Bank of India amounted to nil (securities purchased at March 31, 2011: nil).

During fiscal 2012, average borrowings under repurchase transactions with other banks and financial institutions amounted to Rs. 44,336.3 million (March 31, 2011: Rs. 57,466.3 million) and average lendings under reverse repurchase transactions with other banks and financial institutions amounted to Rs. 1,399.4 million (March 31, 2011: Rs. 2,006.9 million). During fiscal 2012, average borrowings under the Liquidity Adjustment Facility with the Reserve Bank of India amounted to Rs. 47,038.9 million (March 31, 2011: Rs. 43,330.1 million) and lending amounted to Rs. 1,432.8 million (March 31, 2011: Rs. 5,004.1 million).

2. Lease financing activity includes leasing and hire purchase.
3. Excludes provision on performing loans.

F-63

ICICI Bank Limited and subsidiaries

Schedules forming part of the Consolidated Financial Statements

Commercial loans

Commercial loans comprise term loans and working capital facilities extended to corporate and other business entities. Commercial lending constitutes the largest category of the total loan portfolio.

Each commercial loan undergoes a detailed credit review process in accordance with the Bank's credit policy. After disbursement, commercial loans are individually monitored and reviewed for any possible deterioration of the borrower's ability to repay the loan. Term loans, including corporate finance and project finance loans, are typically secured by a first lien on the borrower's fixed assets, which normally consist of property, plants, and equipment. Working capital facilities are typically secured by a first lien on the borrower's current assets, which normally consist of inventory and receivables.

The overall economic condition affecting businesses impacts the Bank's commercial loan portfolio. A prolonged slowdown in the Indian economy could adversely affect clients' abilities to repay loans. In light of increasing international trade linkages, clients' abilities to repay loans may also be negatively affected by adverse economic developments in the United States and other major economies. Unfavorable exchange rate movements may also increase clients' debt burdens and adversely affect their abilities to repay loans.

Project financing term loans provided to the industrial and manufacturing sectors constitute a significant portion of the Bank's commercial loan portfolio. Each client's ability to repay these loans depends on the viability of the project financed which, in turn, depends on the timeliness of the project's completion, the stability of government policies and changes in market demand.

Consumer loans

The Bank's consumer loan portfolio comprises both secured loans and unsecured loans. Secured consumer loans constitute a significant majority of the Bank's total consumer loan portfolio. Though the loans in the Bank's secured loan portfolio are secured by first and exclusive liens on the assets financed, recoveries in case of default may be subject of delays up to several years, due to the protracted legal process in India. The challenge of collection, which is affected by the regulatory guidelines on collection practices, also affects recoveries. To mitigate risk, the Bank obtains direct debit mandates or post-dated checks on pre-specified dates for repayment of consumer installment loans.

Secured consumer loan portfolio

The Bank's secured loan portfolio consists of mortgage loans, automobile loans, commercial vehicle loans and other secured loans.

The Bank's mortgage loan portfolio includes mortgage loans made to individuals and business entities. Typically, mortgage loans are secured by first and exclusive liens on the financed properties. Borrower default risk is mitigated by rigorous credit review procedures. The Banks' mortgage loan portfolio risk is driven primarily by interest rate movement, the loan-to-value ratios of the loans in the portfolio, the nature of the borrowers' employment (e.g., salaried or self-employed) and the borrowers' income levels.

The Bank's automobile loan and commercial vehicle loan portfolios are also secured by first liens on the assets financed by the loans. Major factors affecting the performance of the automobile loan portfolio include the nature of the borrowers' employment, the borrowers' income levels, the loan-to-value ratios of the loans in the portfolio and the nature of the use of the financed vehicles. The Bank's commercial vehicle loan portfolio risk is largely driven by fuel price, rate of economic activity and borrowers' characteristics.

ICICI Bank Limited and subsidiaries

Schedules forming part of the Consolidated Financial Statements

Borrowers' abilities to repay farm equipment loans generally depend on the agriculture in India which, in turn, depends on the timing of monsoons.

Unsecured consumer loan portfolio

The Bank's unsecured loan portfolio includes personal loans and credit cards. General economic conditions and other factors such as changes in unemployment rates, economic growth rates and borrowers' income levels impact this portfolio.

Maturity profile of loans

The following table sets forth, for the periods indicated, the maturity profile of loans.

	Rupees in million	
	At March 31,	
	2011	2012
Less than one year	747,501.8	837,595.1
One to five years	1,442,739.7	1,632,321.9
Greater than five years	369,951.6	451,337.2
Total	2,560,193.1	2,921,254.2

Interest income on loans

The Group recognizes interest income in the profit and loss account as it accrues except in the case of non-performing loans where it is recognized upon realization, as per the income recognition and asset classification norms of Reserve Bank of India/National Housing Board. Interest income in borrower accounts that are upgraded from the non-performing category to the standard category is accrued from the date of such upgradation.

The following table sets forth, for the periods indicated, a listing of interest income on loans.

	Rupees in million		
	Year ended March 31,

1. Includes bills purchased and discounted, over drafts, cash credit, loans repayable on demand and term loans.
2. Includes mortgage loans, automobile loans, commercial business loans, two wheeler loans, personal loans, credit card receivables and farm equipment loans.
3. Lease financing activity includes leasing and hire purchase.

Standard restructured loans

The Group classifies a loan as a restructured loan where it has made concessionary modifications that it would not otherwise consider, to the contractual terms of a loan to a borrower experiencing financial difficulties. After restructuring, based on the satisfactory performance of the borrower over a period of time, the restructured account is upgraded and removed from this category. At March 31, 2012, the Group had committed to lend (includes fund-based commitments fungible with non fund-based facilities) Rs. 4,572.5 million (March 31, 2011: Rs. 2,439.9 million) to borrowers who are parties to restructurings.

1. Includes bills purchased and discounted, over drafts, cash credit and loans repayable on demand.

2. Lease financing activity includes leasing and hire purchase.

The Bank classifies all credit exposures, including overdues arising from crystallized derivative contracts, into performing and non-performing loans as per Reserve Bank of India guidelines. Advances held at the overseas branches that are identified as impaired as per host country regulations but which are standard as per the extant Reserve Bank of India guidelines are identified as non-performing at a borrower level. In the case of Bank's housing finance subsidiary, loans and other credit facilities are classified as per the National Housing Board guidelines into performing and non-performing loans. Further, non-performing loans are classified into sub-standard, doubtful and loss assets based on the criteria stipulated by Reserve Bank of India/National Housing Board. Loans in the Bank's overseas banking subsidiaries are classified as impaired if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition on the loan (a loss event) and that loss event (or events) has an impact on the estimated future cash flows of the loans that can be reliably estimated.

The following table sets forth a listing of non-performing loans including non-standard restructured loans.

1. Includes bills purchased and discounted, over drafts, cash credit and loans repayable on demand.
2. Lease financing activity includes leasing and hire purchase.
3. Identification of loans as non-performing/impaired is in line with guidelines issued by regulators of respective subsidiaries.

ICICI Bank Limited and subsidiaries

Schedules forming part of the Consolidated Financial Statements

Provision for loan losses

The Bank and its housing finance subsidiary hold specific provisions against non-performing loans and general provision against performing loans. The assessment of incremental specific provisions is made after taking into consideration the existing specific provision held. The specific provisions on retail loans held by the Bank are higher than the minimum regulatory requirements. The Bank's overseas banking subsidiaries maintain allowances for credit losses at a level that management considers adequate to absorb identified credit related losses as well as losses that have occurred but are not yet identifiable. The Bank makes provision on assets that are restructured/rescheduled in accordance with the applicable RBI guidelines on restructuring of advances by Banks.

The following table sets forth, for the periods indicated, the movement in the provision for loan losses on restructured loans.

	Rupees in million		
	Year ended March 31,		
	2010	2011	2012

The Group has a comprehensive framework for monitoring credit quality of its corporate and retail loans based on internal ratings. For majority of the portfolio, the credit rating of every borrower/portfolio is being reviewed at least annually. For the purpose of disclosure, the Group has used internal ratings as credit quality indicator.

F-70

ICICI Bank Limited and subsidiaries

Schedules forming part of the Consolidated Financial Statements

The following table sets forth, a description of internal rating grades linked to the likelihood of loss associated with each rating grade:

Grade	Definition
(I) Investment grade	Entities/obligations are judged to offer moderate to high safety with regard to timely payment of financial obligations.
AAA, AA+, AA, AA-, S1-S4, 1,2A-C	Entities/obligations are judged to offer high safety with regard to timely payment of financial obligations.
A+, A, A-, S5-S7, 3A-C	Entities/obligations are judged to offer an adequate degree of safety with regard to timely payment of financial obligations.
BBB+, BBB and BBB-, S8, 4A-C	Entities/obligations are judged to offer moderate safety with regard to timely payment of financial obligations.
(II) Below investment grade (BB and B, 5, 6)	Entities/obligations are judged to carry inadequate safety with regard to timely payment of financial obligations.

The following table sets forth, for the period indicated, credit quality indicators of net loans.

Rupees in million

Net loans	2,560,193.1	2,921,254.2

1. For year ended March 31, 2011 includes loans of Rs. 53,973.2 million, acquired from Bank of Rajasthan as Bank of Rajasthan used a different rating methodology.

8. Financial assets transferred during the year to securitization company (SC)/reconstruction company (RC)

The Bank has transferred certain assets to Asset Reconstruction Companies (ARCs) in terms of the guidelines issued by Reserve Bank of India governing such transfer. The Bank transfers its non-performing assets to asset reconstruction companies primarily in exchange for the receipt of securities in the form of pass-through instruments issued by such asset reconstruction companies, wherein payments to holders of securities are based on the actual realized cash flows from the transferred assets. For the purpose of the valuation of underlying security receipts issued by underlying trusts managed by ARCs, the security receipts are valued at their respective net asset values as advised by the ARCs.

The following table sets forth, for the periods indicated, the details of the assets transferred.

Rupees in million, except number of accounts
Year ended March 31,
2010 2011 2012

Number of accounts ¹	55,160	..	2
Aggregate value (net of provisions) of accounts sold to SC/RC	7,617.9	..	44.4
Aggregate consideration	7,866.7	..	94.1
Additional consideration realized in respect of accounts transferred in earlier years ²
Aggregate gain/(loss) over net sale value	248.8	..	49.7

1 Excludes accounts previously written-off.

2 During the year ended March 31, 2012, Asset Reconstruction Company (India) Limited (ARCIL) fully redeemed six security receipts. The Bank incurred net loss of Rs. 950.6 million on such redemptions (March 31, 2011: Rs. 67.6 million).

ICICI Bank Limited and subsidiaries

Schedules forming part of the Consolidated Financial Statements

In fiscal 2010, the Bank primarily sold a larger number of small value personal loans and vehicle loans, which have lower net book value (net of provision). In fiscal 2011, the Bank sold credit card receivables, which were fully written-off. In fiscal 2012, the Bank sold 2 corporate loans with aggregate book value (net of provision) of Rs. 44.4 million.

9. Details of non-performing assets sold, excluding those sold to SC/RC

The Bank has sold certain non-performing assets in terms of the guidelines issued by Reserve Bank of India on such sale.

The following table sets forth, for the periods indicated, the details of non-performing assets sold, excluding those sold to SC/RC.

	Rupees in million, except number of accounts		
	Year ended March 31, 2010	Year ended March 31, 2011	Year ended March 31, 2012
No. of accounts	7,428	..	1
Aggregate value (net of provisions) of accounts sold, excluding those sold to SC/RC	479.0	..	642.0
Aggregate consideration	463.6	..	641.0
Aggregate gain/(loss) over net book value	(15.4)	..	(1.0)

During fiscal-2010, the Bank sold certain retail non-performing loans (comprising commercial vehicle loans, two-wheeler loans and personal loans) to non-banking finance companies in India as part of its overall strategy of managing the portfolio of retail non-performing loans. In fiscal 2012, the Bank sold one corporate loan.

10. Concentration of credit risk

Concentration of credit risk exists when changes in economic, industry or geographic factors affect groups of counter-parties whose aggregate credit exposure is material in relation to Group's total credit exposure. The Group's portfolio of financial instruments is broadly diversified along industry, product and geographic lines primarily within India.

The Group is subject to supervision guidelines for consolidated accounts issued by the Reserve Bank of India. The Group's 20 largest exposures (non-bank) based on gross exposure, totaled approximately Rs. 1,025,751.4 million at March 31, 2012 which represent 129.9% of the capital funds (March 31, 2011: Rs. 1,008,725.0 million which represent 136.1% of the capital funds). The single largest exposure (non-bank) at March 31, 2012 was Rs. 96,088.7 million which represents 12.2% of the capital funds (March 31, 2011: Rs. 88,028.9 million which represent 11.9% of the capital funds).

The largest group of companies under the same management control accounted for approximately 30.3% of the capital funds at March 31, 2012 (March 31, 2011: approximately 28.9% of the capital funds).

ICICI Bank Limited and subsidiaries

Schedules forming part of the Consolidated Financial Statements

11. Loan commitments

The Group has outstanding undrawn commitments to provide loans and financing to customers. These loan commitments aggregated to Rs. 1,054,212.9 million (includes fund-based commitments fungible with non fund-based facilities) at March 31, 2012 (March 31, 2011: Rs. 956,774.4 million). The interest rate on a significant portion of these commitments is dependent on the lending rates prevailing on the date of the loan disbursement. Further, the commitments have fixed expiration dates and are contingent upon the borrower's ability to maintain specific credit standards.

12. Capital commitments

The Group is obligated under a number of capital contracts. Capital contracts are job orders of a capital nature, which have been committed. Estimated amounts of contracts remaining to be executed on capital account aggregated to Rs. 4,679.3 million at March 31, 2012 (March 31, 2011: Rs. 3,852.4 million).

13. Derivatives

ICICI Bank is a major participant in the financial derivatives market. The Bank deals in derivatives for balance sheet management and market making purposes whereby the Bank offers derivative products to its customers, enabling them to hedge their risks.

Dealing in derivatives is carried out by identified groups in the treasury of the Bank based on the purpose of the transaction. Derivative transactions are entered into by the treasury front office. Treasury middle office conducts an independent check of the transactions entered into by the front office and also undertakes activities such as confirmation, settlement, accounting, risk monitoring and reporting and ensures compliance with various internal and regulatory guidelines.

The market making and the proprietary trading activities in derivatives are governed by the Investment Policy and the Derivative Policy of the Bank, which lay down the position limits, value at risk limits, stop loss limits as well as other risk limits. The Risk Management Group (RMG) lays down the methodology for computation and monitoring of risk. The Risk Committee of the Board (RCB) reviews the Bank's risk management policies in relation to various risks including Credit and Recovery Policy, Investment Policy, Derivative Policy, Asset Liability Management Policy and Operational Risk Management Policy. The RCB comprises non-executive directors and the Managing Director and CEO.

The Bank measures and monitors risk of its derivatives portfolio using such risk metrics as Value at Risk (VAR), stop loss limits and relevant risk measures for options. Risk reporting on derivatives forms an integral part of the management information system.

The use of derivatives for hedging purposes under Indian GAAP is governed by the hedge policy approved by Asset Liability Management Committee (ALCO). Subject to prevailing RBI guidelines, the Bank deals in derivatives for hedging fixed rate, floating rate or foreign currency assets/liabilities. Transactions for hedging and market making purposes are recorded separately. For hedge transactions, the Bank identifies the hedged item (asset or liability) at the inception of the hedge itself. The effectiveness is assessed at the time of inception of the hedge and periodically

thereafter.

Hedge derivative transactions are accounted for pursuant to the principles of hedge accounting. Derivatives for market making purpose are marked to market and the resulting gain/loss is recorded in the profit and loss account. The premium on option contracts is accounted for as per Foreign Exchange Dealers Association of India (FEDAI) guidelines.

F-73

ICICI Bank Limited and subsidiaries

Schedules forming part of the Consolidated Financial Statements

Credit exposure on interest rate and currency derivative transactions (both trading and hedging), other than contracts with an original maturity of less than or equal to 14 days, is computed using the Current Exposure Method according to Reserve Bank of India guidelines, which is arrived at by adding up the positive mark-to-market values and the potential future exposure of these contracts. According to the Reserve Bank of India guidelines, the potential future exposure is determined by multiplying the notional principal amount of each of these contracts (irrespective of whether the mark-to-market value of these contracts is zero, positive or negative value) by the relevant add-on factor, ranging from 0.5% to 15%, according to the type of contract and residual maturity of the instrument. The credit exposure for a single currency floating/floating interest rate swaps and options sold is calculated based on a positive mark-to-market value of these instruments. The credit exposure for unfunded credit derivatives is computed as the total of outstanding notional value of the contract and positive mark-to-market value. Credit exposure on unfunded credit derivatives has been computed in accordance with Reserve Bank of India guidelines. Credit exposure on issuer on account of unfunded credit derivatives is computed according to the current exposure method under Basel II framework. In the case of sell protection trades the entire unpaid premia is treated as an exposure on the protection buyer and in case of buy protection trades exposure is reckoned as the sum of the current mark-to-market value, if positive (zero, if mark-to-market value is negative) and the potential future exposure. The potential future exposure is determined by multiplying the notional principal amount of each of these contracts (irrespective of whether the mark-to-market value of these contracts is zero, positive or negative value) by the relevant add-on factor, ranging from 10% to 20%, according to the rating of reference obligation. In case of collateralised buy protection trades, no exposure is reckoned to the extent of collateral available. Credit exposure on reference obligation on account of unfunded credit derivatives is determined as the entire notional of outstanding contracts. In case of two completely identical opposite positions in unfunded credit derivatives forming a hedged position no exposure is reckoned against the reference entity. The credit exposure for equity futures and options is computed based on the market value and open quantity of the contracts at the balance sheet date. The credit exposure for equity futures and options is computed based on the market value and open quantity of the contracts at the balance sheet date.

Derivative transactions are covered under International Swaps and Derivatives Association (ISDA) master agreements with the respective counter parties. The exposure on account of derivative transactions is computed as per RBI guidelines.

The following table sets forth the details of the notional amounts, marked to market position, gain and loss on derivatives and credit exposure of trading derivatives for the year ended March 31, 2012.

Particulars	Notional amount	Gross positive fair value	Gross negative fair value	Rupees in million	
				Gain/(loss) on derivatives ³	Credit exposure
Interest rate derivatives ¹	3,500,936.9	33,419.2	(30,621.2)	2,853.4	63,051.4
Currency derivatives (including foreign exchange derivatives) ²	4,834,523.8	153,928.8	(125,158.3)	(390.6)	298,557.4
Equity derivatives	171.1	..	(0.2)	23.1	171.1
Un-funded credit derivatives	11,103.1	240.2	(275.0)	519.6	11,378.4

1. Foreign currency interest rate swaps, forward rate agreements and swap options are included in interest rate derivatives.

2.

Foreign currency options, cross currency interest rate swaps and foreign currency futures are included in currency derivatives.

3. The Bank has additionally recorded a gain of Rs. 226.8 million due to recoveries of credit losses booked in earlier years.

-

Foreign currency interest rate swaps, forward rate agreements and swap options are included in interest rate derivatives.

2. Foreign currency options, cross currency interest rate swaps and foreign currency futures are included in currency derivatives.

The gains/(losses) on hedged items arising from changes in fair value for the year ended March 31, 2012 and March 31, 2011 amounted to Rs. (10,013.8) million and Rs. (1,883.0) million respectively and gains/(losses) on corresponding hedging instruments arising from changes in fair value during the year ended March 31, 2012 and March 31, 2011 amounted to Rs. 9,721.0 million and Rs. 2,603.8 million respectively.

The Group has also hedged the foreign currency exposure of its net investment in foreign operations through forex forward contracts of a notional amount of Rs. 44,488.0 million at March 31, 2012. The gross positive and negative fair values of these hedging instruments were Rs. 141.5 million and Rs. (76.8) million respectively and the credit exposure was Rs. 1,031.2 million at March 31, 2012.

The Group deals in credit derivative instruments including credit default swaps, credit linked notes, collateralized debt obligations and principal protected structures. The portfolio has exposure to corporate and

ICICI Bank Limited and subsidiaries

Schedules forming part of the Consolidated Financial Statements

financial institutions as the underlying reference entities and has an average maturity of less than two years. These instruments, which contain credit-risk-related contingent features, require the Group to make payments to the counterparty in case of various credit events like bankruptcy, insolvency, payment default and delinquency of the underlying asset.

The Group has transacted in such structures in order to benefit from the possible higher yields, with a good understanding of the risks associated with the reference entities underlying the structures and the flexibility to select tenors for exposures as compared to cash products, amongst others. The risk with respect to such products is governed by our limit structure, which stipulates the size of the portfolio, rating profile, tenor, etc.

The notional principal amount of these credit derivatives outstanding at March 31, 2012, excluding accrued interest of Rs. 62.4 million (Rs. 297.8 million at March 31, 2011), was Rs. 1,526.3 million in funded instruments (Rs. 18,157.7 million at March 31, 2011) and Rs. 11,103.1 million in non-funded instruments (Rs. 29,417.7 million at March 31, 2011) which includes Rs. 50.0 million of protection bought by the Group (Rs. 223.0 million at March 31, 2011). In case of funded instruments, the Group deposits an amount with the protection buyer for protection sold in accordance with the contractual terms. The net mark-to-market loss on the portfolio at March 31, 2012, determined based on the internal models using inputs from market sources such as Bloomberg/Reuters, and Fixed Income Money Markets & Derivatives Association of India, was Rs. 102.2 million (Rs. 708.5 million at March 31, 2011), which has been fully provided for through profit and loss account. The profit and loss impact on the above portfolio on account of mark-to-market and realized gains/losses during the year ended March 31, 2012 was a net profit of Rs. 714.7 million (Rs. 182.3 million for March 31, 2011). At March 31, 2012, the Group's maximum amount of future payment towards funded and unfunded credit derivatives was Rs. 12,579.4 million.

At March 31, 2012, the fair value of non-funded credit derivatives that were in net liability position was Rs. 90.9 million (Rs. 271.6 million at March 31, 2011). For these credit derivatives, the Group did not post any collateral with counterparties. If the credit risk related contingent features underlying these instruments had been triggered on March 31, 2012, the Group would not have been required to post any collateral to the counterparties but would have been required to pay Rs. 11,053.1 million (Rs. 29,194.7 million at March 31, 2011) which represents the notional principal amount and unwinding cost to settle the instrument immediately. At March 31, 2012, the gross mark-to-market loss on funded credit derivatives was Rs. 42.6 million (Rs. 523.0 million at March 31, 2011). The Group has deposited an amount of Rs. 1,526.3 million (Rs. 18,157.7 million at March 31, 2011) with the protection buyers, which represents the notional principal amount for these funded credit derivatives. If the credit risk contingent features underlying these instruments had been triggered at March 31, 2012, the Group would not have been required to post any additional collateral to counterparties, but the deposit already made would have been utilized to settle these instruments immediately.

Based on historical experience, the Group believes that the potential losses for credit protection sold will be less than the maximum amount of future payments. The Group as seller of credit default swaps protection is entitled to receive the underlying obligation, which can be in the nature of bonds or loans of the reference entity, from the buyer of protection in case of credit default.

The Bank offers deposit products to customers of its offshore branches with structured returns linked to interest, forex, credit or equity benchmarks. The Bank covers these exposures in the inter-bank market. At March 31, 2012, the net open position on this portfolio was nil (March 31, 2011: Rs. nil) with mark-to-market gain of Rs. 24.8 million (March

31, 2011: Rs. 27.8 million) at that date, which had been provided for through profit and loss account. The fair value amount of such structured returns linked derivatives that were in net

F-76

ICICI Bank Limited and subsidiaries

Schedules forming part of the Consolidated Financial Statements

liability position at March 31, 2012 was Rs. 335.5 million (March 31, 2011: Rs. 518.1 million). With reference to such instruments, the Bank does not place any collateral with the counterparties. The aggregate amount needed to settle such credit instruments immediately if the credit risk related contingent features were triggered at March 31, 2012 would be Rs. 10,037.0 million (Rs. 9,471.1 million at March 31, 2011).

14. Tax contingencies

Various tax-related legal proceedings are pending against the Group at various levels of appeal either with the tax authorities or in the courts. Where after considering all available information in the opinion of management a liability requires accrual, the Group accrues such liability.

Where such proceedings are sufficiently advanced to enable management to assess that a liability exists and are subject to reasonable estimation, management records its best estimate of such liability. Where a reasonable range of potential outcomes is estimated, management records its best estimate, or in the absence of a basis for selecting a specific estimate within a range, management records a liability no less than the lower end of the estimated range. The contested tax demands are adjusted by the tax authorities against refunds due to the Group on favorable resolution of earlier year's appeals/ completion of assessments or paid or kept in abeyance in accordance with the terms of the stay order. The payment/adjustment/stay does not prejudice the outcome of the appeals filed by the Group. The advance tax payments are recorded as advance tax payments under other assets.

As of March 31, 2012, the Group has assessed its contingent tax liability at an aggregate of Rs. 31,559.8 million (March 31, 2011: Rs. 19,961.6 million), mainly pertaining to income tax and sales tax/value added tax demands by the Government of India's tax authorities for past years. The Group has appealed each of these tax demands. The consequence of enquiries initiated by the tax authorities cannot be quantified, as the Group believes that the proceedings so initiated are likely to be dropped by the tax authorities or will not be upheld by judicial authorities. Based on consultation with counsel and favorable decisions in the Group's own or other cases as set out below, the Group's management believes that the tax authorities are not likely to be able to substantiate their tax assessments and accordingly has not provided for these tax demands at March 31, 2012.

In the Group's assessment of sales tax/VAT aggregating to Rs. 1,997.3 million, the Group has appealed the tax demands and expects a favorable outcome based on opinions from counsels and decisions in own/other cases. The disputed issues mainly pertain to tax on interstate/import leases by various state government authorities in respect of lease transactions entered into by the Bank, VAT on sale of repossessed assets and bullion related matters pertaining to procedural issues like submission of statutory forms etc.

In the Group's assessments pertaining to income tax aggregating to Rs. 29,562.5 million comprises of appeals filed by the Group or the tax authorities where we are relying on favorable precedent decisions of the appellate court and expert opinions. The key disputed liabilities are detailed below:

Allocation of expenses to earn dividend income of Rs. 9,449.6 million (March 31, 2011: Rs. 6,234.5 million) relates to whether interest expenses can be attributed to earning tax-exempt income. The Group believes that no interest can be allocated thereto as there are no borrowings earmarked for investment in tax free securities and the interest free funds are sufficient to cover investments in the underlying tax free securities. The Group relies on the favorable opinion from counsel and favorable appellate decisions in similar cases.

Marked-to-market losses on derivatives of Rs. 5,018.6 million (March 31, 2011: Rs.29.4 million) relates to the disallowance of marked-to-market losses on derivative transactions treated by the tax authorities as notional losses. The Group relies on the favorable opinion from counsel and favorable appellate decisions in similar cases, which had allowed the deduction of marked-to-market losses from business income.

F-77

ICICI Bank Limited and subsidiaries

Schedules forming part of the Consolidated Financial Statements

Depreciation on leased assets: Rs. 3,732.1 million (March 31, 2011: Rs. 3,869.8 million) relates to the disallowance of depreciation claims on leased assets by the tax authorities, who believe the lease transactions should be treated as loan transactions. There was a recent unfavorable court judgement in a similar case, which could have an impact on the Group's case, the Group has obtained a favorable opinion from counsel that based on the merits of the Group's case, the Group has a high probability of obtaining a favorable judgment before higher appellate authorities.

Taxability under section 41(4A) of amounts withdrawn from Special Reserve created up to Assessment Year 1997-98 of Rs.2,690.2 million (March 31, 2011: Rs. 2,463.6 million): ICICI had maintained two special reserve accounts, which includes special reserves created up to assessment year 1997-98. Withdrawals from this account were assessed as taxable by the tax authorities for assessment year 1998-99 to 2000-01. The Group has received judicial relief for the assessment year 1998-99 and 1999-2000 but the income tax department has appealed the favorable order.

Taxation of Emerging fund of Rs. 1,669.5 million (March 31, 2011: Rs.1,678.2 million) relates to double taxation of income of our Emerging Sector Fund. The assessing officer has taxed the income received by the Emerging Sector Fund by treating the venture fund as an "association of persons" resulting in double taxation of income both in the hands of Emerging Sector Fund and beneficiaries. The Emerging Sector Fund has obtained relief from the Commissioner of Income Tax (Appeals) but the tax authorities have challenged the same before the higher appellate authority.

Based on judicial precedents in the Group's and other cases and on consultation with tax counsels, the management believes that it is more likely than not that the Group's tax positions will be sustained. Accordingly, no provision has been made in the accounts.

The above mentioned contingent liability does not include Rs.22,165.8 million (March 31, 2011: Rs. 16,919.6 million) pertaining to the deduction of bad debts and levy of penalties which are pending before appellate authorities, as these liabilities are considered remote, since they are covered by Apex Court decisions in other cases and therefore not required to be disclosed as contingent liability.

15. Litigation

A number of litigation and claims against the Group and its directors are pending in various forums. The claims on the Group mainly arise in connection with civil cases involving allegations of service deficiencies, property or labor disputes, fraudulent transactions, economic offences and other cases filed in the normal course of business. The Group is also subject to counter-claims arising in connection with its enforcement of contracts and loans. A provision is created where an unfavorable outcome is deemed probable and in respect of which a reliable estimate can be made. In view of inherent unpredictability of litigation and cases where claims sought are substantially high, actual cost of resolving litigations may be substantially different than the provision held. For cases where unfavorable outcome is deemed to be reasonably possible, it is not possible

ICICI Bank Limited and subsidiaries

Schedules forming part of the Consolidated Financial Statements

to make an estimate of the possible loss or range of possible losses due to the nature of the cases as explained above. The total amount of claims against the Group where an unfavorable outcome is deemed probable was Rs. 1,383.6 million and where unfavorable outcome is reasonably possible was Rs. 2,236.7 million at March 31, 2012. Based upon a review of open matters with its legal counsels including loss contingency on account of such litigation and claims, and classification of such contingency as 'probable', 'possible' or 'remote' and with due provisioning for the relevant litigation and claims, the management believes that the outcome of such matters will not have a material adverse effect on the Group's consolidated financial position, results of operations or cash flows.

16. Segmental Information

The following table sets forth, the business segment results for the period ended March 31, 2012 prepared on the basis described in Schedule 18 note 12A.

Rupees in million

Sr. No.	Particulars	Retail Banking	Wholesale Banking	Treasury	Other banking business	Life insurance	General insurance	Venture fund management	Others

F-81

ICICI Bank Limited and subsidiaries

Schedules forming part of the Consolidated Financial Statements

During fiscal 2010, the Bank increased the proportion of retail deposit liabilities, which are generally lower cost liabilities. During the same year, loans in the retail banking segment declined due to moderation in retail loan growth in the system, the Bank's strategy of reducing unsecured retail loan portfolio and repayments and prepayments from the existing retail portfolio. Consequently, the retail segment liabilities were higher than the assets at March 31, 2010.

During fiscal 2011, the Bank focused on lending to selected credit segments in the retail banking segment, such as mortgages and secured retail loans. However, the loans in the retail banking segment declined during fiscal 2011, primarily due to higher repayments and prepayments in the portfolio relative to new loan disbursements. The Bank's overall balance sheet size grew as compared to fiscal 2010. At the same time, the Bank pursued a conscious strategy of increasing the share of low cost current and savings account deposits and re-balancing the funding mix. This resulted in significant increase in segment liability balance for the retail banking segment at March 31, 2011 as compared to March 31, 2010.

During fiscal 2012, the bank grew its overall balance sheet size as compared to fiscal 2011. The Bank continued to focus on select credit segments in the retail banking segment which resulted in growth in advances in retail banking segment compared to fiscal 2011. At the same time, the Bank pursued a conscious strategy of increasing the share of low cost retail deposits in fiscal 2012. This resulted in segment liabilities of retail banking segment being significantly higher than segment assets at March 31, 2012.
