VIEWPOINT CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America, consistent in all material respects with those applied in the Company's Annual Report on Form 10-K/A for the year ended December 31, 2003. The interim financial information is unaudited, but reflects all adjustments which are, in the opinion of management, necessary for a fair presentation of the financial position and operating results of Viewpoint Corporation (Viewpoint or the Company) for the interim periods.

These unaudited consolidated financial statements have been prepared in accordance with the instructions to Rule 10-01 of Regulation S-X and, therefore, do not include all of the information and footnotes normally provided in annual financial statements. As a result, these unaudited consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto, together with management's discussion and analysis of financial condition and results of operations, contained in Viewpoint's Annual Report on Form 10-K/A for the year ended December 31, 2003. The results of operations for the three and nine months ended September 30, 2004 are not necessarily indicative of the results to be expected for the year ending December 31, 2004 or other future periods.

Certain reclassifications have been made to the 2003 consolidated financial statements to conform to the 2004 presentation.

Liquidity

The Company had cash, cash equivalents and marketable securities of \$5.7 million at September 30, 2004. During the nine months ended September 30, 2004, net cash used in operations amounted to \$7.5 million. Though the Company has converted \$2.7 million in convertible debt to equity during 2004, it has had significant quarterly and annual operating losses since its inception, and as of September 30, 2004, had an accumulated deficit of \$254.7 million. There can be no assurance that Viewpoint will achieve or sustain positive cash flows from operations or profitability.

The Company has contingency plans for the remainder of 2004 and through 2005 if expected revenue targets are not achieved. These plans include further workforce reductions as well as reductions in overhead and capital expenditures. The Company may seek additional funds when necessary through public or private equity financing or from other sources to fund operations and pursue growth, although, there are no assurances that the Company can obtain such financing with reasonable terms.

The Company currently has no commitment for additional financing, and may experience difficulty in obtaining additional financing on favorable terms, if at all. Any financing the Company obtains may contain covenants that restrict the Company's freedom to operate the business or may have rights, preferences or privileges senior to the Company's common stock and may dilute the Company's current shareholders' ownership interest in Viewpoint.

Revenue Recognition

Edgar Filing: VIEWPOINT CORP - Form 10-Q

The Company recognizes revenue in accordance with Statement of Position (SOP) 97-2, Software Revenue Recognition, as amended, Emerging Issues Task Force (EITF) No. 00-21 Revenue Arrangements with Multiple Deliverables, and Staff Accounting Bulletin (SAB) No. 101 Revenue Recognition in Financial Statements as amended by SAB No. 104 Revenue Recognition. Per SOP 97-2 and SAB No. 101, as amended by SAB No. 104, the Company recognizes revenue when the following criteria are met: (a) persuasive evidence of an arrangement exists, (b) delivery has occurred or services have been rendered, (c) the Company's fee is fixed or determinable, and (d) collectibility is reasonably assured.

Viewpoint has generated revenues through four sources: (a) software licenses, (b) services, (c) search advertising, and (d) advertising systems revenue. License revenues are generated from licensing the rights to use

VIEWPOINT CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

products directly to customers and indirectly through Value Added Resellers (VARs). Service revenues are generated from fee-based professional services, customer support services (maintenance arrangements), and training services performed for customers that license the company's products. Search revenue, as explained in more detail below, is derived from a share of the fees charged by Yahoo!/Overture to advertisers who pay for sponsored links when a customer clicks on the paid link on the results provided by the Viewpoint Toolbar. Advertising systems revenue is generated by charging customers to host advertising campaigns based on a cost per thousand (CPM) impressions.

License revenues from direct customers include sales of perpetual and term-based licenses for broadcasting digital content in the Viewpoint format. License revenues are recognized up-front provided no further significant obligations exist and the resulting receivable is deemed collectible by management. Arrangements with VARs require (i) an up-front, non-refundable payment, (ii) a percentage royalty based on sell-through, or (iii) both as consideration for the right to resell the Viewpoint technology. Up-front, non-refundable payments are recognized as license revenues when the VAR's right to resell the company's technology begins and the technology has been delivered to the VAR, which is upon contract signing, provided all other revenue recognition criteria are met and no further significant obligations exist. For arrangements that do not call for an up-front, non-refundable payment, revenues are recognized as the royalties are earned, which is upon notification of sell-through by the VAR, provided all other revenue recognition criteria are met and no further significant obligations exist.

Fee-based professional services for customized software development are performed on a fixed-fee or time-and-materials basis under separate service arrangements. Revenues for fixed-fee arrangements are recognized over the pattern of performance in accordance with the provisions of SAB No. 104. The pattern of performance for service arrangements is measured by the percentage of costs incurred and accrued to date for each contract, which primarily consist of direct labor costs, cost of outsourcing, and overhead, to the estimated total cost for each contract at completion. The percentage approximates the percentage of a customer's contract that has been completed and would be available for the customer to use at that point in time. Use of this method is based on the availability of reasonably dependable estimates. If reasonably dependable estimates are not available due to the complexity of the services to be performed, the Company defers recognition of any revenues for the project until the project is completed, delivered and accepted by the customer, provided all other revenue recognition criteria are met and no further significant obligations exist. Revenues from customer support services are recognized ratably over the term of the contract. Revenues from training services are recognized as services are performed.

Fees from licenses sold together with fee-based professional services are generally recognized upon delivery of the software, provided that the payment of the license fees are not dependent upon the performance of the services, and the services are not essential to the functionality of the licensed software. If the services are essential to the functionality of the software, or payment of the license fees are dependent upon the performance of the services, both the software license and service fees are recognized in accordance with SOP 81-1 Accounting for Performance of Construction-Type and Certain Production-Type Contracts. The percentage of completion method is used for those arrangements in which reasonably dependable estimates are available. If reasonably dependable estimates are not available due to the complexity of the services to be performed, the Company defers recognition of any revenues for the project until the project is completed, delivered and accepted by the customer, provided all other revenue recognition criteria are met and no further significant obligations exist.

For arrangements involving multiple elements, the Company defers revenue for the undelivered elements based on their relative fair value and recognizes the difference between the total arrangement fee and the amount deferred for the undelivered elements as revenue. The determination of fair value of each undelivered element in multiple element arrangements is based on the price charged when the same element is sold separately. For maintenance and technical

support elements, the Company uses renewal rates to determine the price when sold separately. The Company accounts for multiple element arrangements which involve only fee-based professional services in accordance with EITF 00-21. For licenses sold that include updates over a period of time the Company recognizes the license revenue over the period in which updates are provided.

Search revenue is generated when a customer uses the Viewpoint Toolbar to search the internet, and clicks on a sponsored advertisement included in the search results. The Viewpoint Toolbar's search results are provided by Yahoo!/Overture, who collects a fee from the advertiser and remits a percentage of the fee to Viewpoint. Revenue generated is a function of the number of Viewpoint Toolbars performing searches, the number of searches that are sponsored by advertisers, the number of advertisements that are clicked on by Viewpoint Toolbar searchers, the rate advertisers pay for those advertisements, and the percentage retained by Yahoo!/Overture for providing the results.

VIEWPOINT CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Viewpoint also offers an online advertising campaign management and deployment product. This advertising system permits publishers, advertisers, and their agencies to manage the process of deploying online advertising campaigns. The Company charges customer on a cost per thousand (CPM) impression basis, and recognizes revenue when the impressions are served, so long as all other revenue recognition criteria are satisfied.

Standard terms for license arrangements require payment within 90 days of the contract date, which typically coincides with delivery. Standard terms for service arrangements, which are typically billed and collected on an installment basis, require final payment within 90 days of completion of the services. Probability of collection is based upon the assessment of the customer's financial condition through the review of their current financial statements and/or credit reports. For follow-on sales to existing customers, prior payment history is also used to evaluate probability of collection. The Company's arrangements with customers do not contain product return rights. If the fee is not fixed or determinable, revenue is recognized as payments become due or as cash is received from the customer. If a nonstandard acceptance period is required, revenues are recognized upon the earlier of customer acceptance or the expiration of the acceptance period.

Stock-Based Compensation

The Company accounts for stock option grants in accordance with Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees, Financial Accounting Standards Board (FASB) issued Interpretation No. 44, Accounting for Certain Transactions Involving Stock Compensation, an Interpretation of APB Opinion No. 25 (FIN 44), and complies with the disclosure provisions of Statement of Financial Accounting Standards (SFAS) No. 123, Accounting for Stock-Based Compensation, as amended by SFAS No. 148 Accounting for Stock-Based Compensation-Transition and Disclosure. Under APB Opinion No. 25, compensation expense is recognized over the vesting period based on the difference, if any, at the date of grant between the fair value of the Company's stock and the exercise price. The Company accounts for stock issued to non-employees in accordance with SFAS No. 123 and EITF Issue No. 96-18 Accounting for Equity Instruments That Are Issued to Other Than Employees for Acquiring, or in Conjunction with Selling, Goods or Services.

Pro forma information regarding net income and earnings per share is required by SFAS No. 123, as amended by SFAS No. 148, and has been determined as if the Company has accounted for its employee stock option grants under the fair value method of SFAS No. 123. The fair value of options issued to employees was estimated at the date of grant using the Black-Scholes option-pricing model. For purposes of pro forma disclosures, the estimated fair value of the Company's employee options is amortized to expense over the options' vesting periods. If the Company elected to record stock-based compensation charges in accordance with SFAS 123, the pro forma non-cash stock-based employee compensation charges and net income (loss) per common share would approximate the following (in thousands, except per share amounts):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2004	2003	2004	2003
Net loss, as reported	\$(1,295)	\$(5,518)	\$ (9,157)	\$(18,308)
Add: Non-cash stock-based employee compensation charges included in reported net	3	520	284	2,388

loss, net of related tax effects				
Deduct: Non-cash stock-based employee compensation charges determined under fair value based method for all awards, net of related tax effects	(661)	(1,196)	(2,329)	(4,990)
	<u> </u>	<u> </u>	<u> </u>	<u> </u>
Pro forma net loss	\$(1,953)	\$(6,194)	\$(11,202)	\$(20,910)
	<u> </u>	<u> </u>	<u> </u>	<u> </u>

The effects of applying SFAS No. 123, as amended by SFAS No. 148, in this pro forma disclosure are not indicative of future amounts. The Company anticipates grants of additional awards in future years.

VIEWPOINT CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Basic and Diluted Net Income (Loss) Per Common Share

Basic net income or loss per common share is computed using the weighted average number of shares outstanding and diluted net income or loss per common share is computed using the weighted average number of shares of common and common equivalent shares outstanding. Common equivalent shares related to stock options and warrants totaling 7.9 million for the three and nine months ended September 30, 2004, and common equivalent shares related to stock options and warrants totaling 5.2 million for the three and nine months ended September 30, 2003, are excluded from the computation of diluted net loss per common share because their effect was anti-dilutive.

In March 2004, the Company sold 1.5 million shares of common stock, in a private placement to an institutional investor for \$3.7 million or \$2.45 per share. The institutional investor was one of the holders of the convertible notes. Prior to the closing of the March 2004 private placement the institutional investor converted \$0.9 million of outstanding notes and received 0.9 million shares of Company common stock in the exchange.

In June 2004, the Company exercised its right to convert the remaining outstanding convertible notes of \$1.8 million and the related outstanding interest into 1.7 million shares of Viewpoint common stock.

Derivatives

In 2002 and 2003, the Company issued convertible notes and warrants which would require Viewpoint to issue registered shares of common stock upon conversion of these securities. The Company accounts for the fair values of these outstanding warrants to purchase common stock and conversion options of its convertible notes in accordance with SFAS No. 133 *Accounting for Derivative Instruments and Hedging Activities*, and EITF Issue No. 00-19 *Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock*, which requires the Company to bifurcate and separately account for the conversion option and warrants as embedded derivatives contained in the Company's convertible notes. The Company is required to carry these embedded derivatives on its balance sheet at fair value and the unrealized changes in the value of these embedded derivatives are reflected in net income as changes in fair values of warrants to purchase common stock and conversion options of convertible notes. Such changes in fair value are recorded as an adjustment to reconcile net loss to net cash used in operating activities in the consolidated statement of cash flows.

Recent Accounting Pronouncements

In April 2004, the Emerging Issues Task Force issued Statement No. 03-06 *Participating Securities and the Two-Class Method Under FASB Statement No. 128, Earnings Per Share* (EITF 03-06). EITF 03-06 addresses a number of questions regarding the computation of earnings per share by companies that have issued securities other than common stock that contractually entitle the holder to participate in dividends and earnings of the Company when, and if, it declares dividends on its common stock. The issue also provides further guidance in applying the two-class method of calculating earnings per share, clarifying what constitutes a participating security and how to apply the two-class method of computing earnings per share once it is determined that a security is participating, including how to allocate undistributed earnings to such a security. EITF 03-06 is effective for fiscal periods beginning after March 31, 2004. The EITF did not have an effect on the Company's financial statements.

The Emerging Issues Task Force (EITF) has reached a consensus on EITF Issue No. 04-8, *Accounting Issues Related to Certain Features of Contingently Convertible Debt and the Effect on Diluted Earnings per Share*. This EITF will be effective for reporting periods ending after December 15, 2004 and will have to be applied retroactively.

Contingently convertible debt instruments are structured financial transactions that combine the features of contingently issuable shares with a convertible debt instrument. Contingently convertible debt instruments are convertible into common shares of the issuer after the common stock price has exceeded a predetermined threshold for a specified time period (market price trigger). The Company will adopt EITF 04-8 during the fourth quarter of 2004. Diluted earnings per share for the three and nine months ended September 30, 2003 would remain unchanged. The Company does not expect the adoption of EITF 04-8 to have a significant impact on earnings (loss) per share in the future.

3. Goodwill and Intangible Assets

As required by SFAS No. 142, Goodwill and Other Intangible Assets, all remaining and future acquired goodwill will be subject to impairment tests annually, or earlier if indicators of potential impairment exist, using a fair-value-based approach. All other intangible assets will continue to be amortized over their estimated useful lives and assessed for impairment under SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets.

During the three months and nine months ended September 30, 2004 there were no impairments recorded.

During the three and nine months ended September 30, 2003, the market value of the Company's equity securities declined below the Company's carrying value indicating the existence of a potential goodwill impairment. In accordance with SFAS No. 142, the Company performed the first step of the goodwill impairment test as of September 30, 2003. The fair value of the Company was determined to exceed its carrying value using a market-based approach with selected multiples ranging from 1.5 to 2.0 times revenues and 1.8 to 2.5 times gross profit. In

VIEWPOINT CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

accordance with SFAS No. 142, the second step of the impairment test was unnecessary, and no goodwill impairment charges were recorded.

The changes in the carrying amounts of goodwill and intangible assets during the three and nine months ended September 30, 2004, are as follows (in thousands):

	<u>Goodwill</u>	<u>Intangible Assets</u>	<u>Total</u>

	<u> </u>	<u> </u>	<u> </u>	<u> </u>	<u> </u>	<u> </u>

Amortization of patents and trademarks is estimated to be \$10,000 a year for the next five years.

4. Long Term Debt

Convertible Notes

On December 31, 2002, the Company completed a private placement of convertible notes and warrants in which it issued to three institutional investors, 4.95% convertible notes having an aggregate principal amount of \$7.0 million, and warrants to purchase 0.7 million shares of Company common stock. The convertible notes were to mature on December 31, 2007, unless earlier converted into shares of Company common stock at a price of \$2.26 per share. The warrants expire on December 31, 2006, and are exercisable at a price of \$2.26 per share.

On March 25, 2003, the Company entered into Redemption, Amendment and Exchange Agreements with the three institutional investors with whom it had completed the private placement of convertible notes and warrants on December 31, 2002. The Company recorded a loss for the quarter ended June 30, 2003, on the early extinguishment of

the original convertible notes in the amount of \$1.7 million of which \$0.7 related to the write-off of deferred loan costs. In conjunction with the extinguishment, the Company paid \$3.3 million, issued new convertible notes in the

VIEWPOINT CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

principal amount of \$2.7 million and issued \$1.4 million shares of its common stock with a market value of \$0.7 million. The difference between (i) the carrying value of the outstanding convertible notes exchanged and (ii) cash paid and the fair value of the common stock and new convertible notes issued, amounted to \$1.0 million and was included in the loss on early extinguishment of debt.

Interest on the convertible notes was payable quarterly in arrears in cash or, at the option of the Company, in shares of Company common stock provided the Company satisfies certain financial and other conditions. The new convertible notes matured on December 31, 2007, unless earlier converted into shares of Company common stock. The conversion price of the first \$0.9 million tranche of notes is \$1.10. The conversion price of the second and third tranche of notes is \$1.00.

Each tranche of the notes was convertible at the Company's election at any time after May 20, 2004 if the dollar volume-weighted average price of Company common stock exceeds 150% of the conversion price applicable to the notes for any 25 consecutive trading days following April 15, 2004.

Pursuant to SFAS No. 133, the Company bifurcated the fair value of the conversion options from the new convertible notes since the conversion options were determined to not be clearly and closely related to the debt host. In addition, since the effective registration of the securities underlying the conversion options is an event outside of the control of the Company, pursuant to EITF Issue No. 00-19, the Company recorded the fair value of the conversion options as long-term liabilities, as it was assumed that the Company would be required to net-cash settle the underlying securities.

The Company recorded income or loss based on the decrease or increase, respectively, in the fair values of the new conversion options and original warrants in the Company's consolidated statements of operations. The amortization of discount on the new convertible notes and debt issue costs were accounted for using the effective interest method.

On March 17, 2004, one of the institutional investors holding the convertible notes converted \$0.9 million of outstanding notes for shares of the Company's common stock. In the first quarter of 2004, the Company recorded a loss of \$1.4 million related to the change in the fair value of the conversion feature from January 1, 2004 through the date of the conversion. For the three months ended March 31, 2004 the Company also recorded a loss related to a change in the fair value of the conversion feature and warrants of \$3.7 million and \$1.3 million, respectively.

In addition, on the same day as the conversion, the Company sold 1.5 million shares of common stock in a private placement to the institutional investor, for \$3.7 million or \$2.45 per share. The Company recorded a loss on conversion of debt in the amount of \$0.6 million, which represented the write-off of unamortized loan discount and debt issuance costs of \$0.1 million and the difference between the proceeds received from the private placement and the fair value of the common stock issued based upon the closing price of the Company's stock on the day of the sale of \$0.5 million. The remaining noteholders chose not to exercise their right to redeem their notes in amount up to 20% of the \$3.7 million received by the Company within 10 days of the Company's public announcement of the closing of the private placement.

During the period beginning on April 15, 2004 and May 20, 2004—a period which covered 25 consecutive trading days—the dollar volume-weighted average price of the Company's common stock exceeded 150% of the conversion price applicable to the outstanding convertible notes and the Company determined to exercise its right to convert the outstanding notes into shares of Company common stock. Accordingly, on May 20, 2004, the Company informed the institutional investors holding the outstanding convertible notes that it would exercise its right to convert that debt. On

June 18, 2004, the Company completed the conversion of the remaining outstanding convertible notes of \$1.8 million and the related outstanding interest into 1.7 million shares of Viewpoint common stock. In the second quarter of 2004, the Company recorded a gain of \$3.0 million related to the change in the fair value of the conversion feature during the period from April 1, 2004 through June 18, 2004, the date of the conversion.

In addition, the Company recorded a loss on conversion which represented the difference between the fair value of the common stock issued in exchange for the notes and the carrying value of the convertible notes on the date of conversion. This change was primarily comprised of the write-off of unamortized loan discount and debt issuance costs.

VIEWPOINT CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The Company recorded a loss based on the change in the fair values of the original warrants of \$0.2 million resulting from an increase in the fair market value of the Company's common stock, for the three months ended September 30, 2004.

Subordinated Notes

On March 26, 2003, Viewpoint Corporation entered into a Securities Purchase Agreement with three other accredited investors, pursuant to which it received \$3.5 million in exchange for an aggregate of \$3.5 million principal amount of 4.95% subordinated notes and 3,614,756 shares of Viewpoint common stock. The subordinated notes are scheduled to mature on March 31, 2006. Interest on these notes is payable quarterly in arrears in cash. The Company has the right at any time to redeem up to all of the outstanding notes at par plus accrued and unpaid interest.

The \$3.5 million of proceeds was allocated to subordinated notes, common stock, and additional paid in capital based on the market value of the Company's common stock on March 26, 2003. In accordance with the provisions of APB Opinion No. 21, the Company recorded a debt discount of \$2.0 million. Debt issuance costs, which amounted to \$0.2 million, were recorded as other assets in the Company's consolidated balance. The amortization of the discount on the subordinated notes and debt issue costs totaled \$0.2 million and \$0.4 million for the three and nine months ended September 30, 2004, respectively, were accounted for using the effective interest method.

5. Related Party Transactions

During the three and nine months ended September 30, 2004 the Company recorded revenues totaling \$1.4 million and \$4.7 million, respectively, related to agreements with America Online, Inc (AOL) that were entered into prior to December 31, 2003.

An employee of AOL served on the Board of Directors of the Company, until the Director's term expired in December 2003. Accordingly, revenue associated with contracts entered into with AOL after December 31, 2003 is treated as third party revenue.

As of September 30, 2004, the Company had \$5.8 million in deferred revenues relating to transactions with AOL for contracts entered into with AOL prior to December 31, 2003.

In 2003, the Company entered into an amended license agreement with AOL which provides for payments by AOL of \$10.0 million which were all received during the fourth quarter of 2003. The agreement contains multiple elements consisting of a perpetual broadcast license, a perpetual source code license, quarterly updates to the source code through December 2005, and maintenance and consulting services. The Company will recognize \$9.0 million of revenue from this agreement ratably as license and services revenue, through December 31, 2005, which represents the duration of the Company's obligation for post-contract customer support of the source code element including quarterly upgrades and maintenance requirements. The Company recognized \$0.9 million and \$2.6 million in related party license revenue for the three and nine months ended September 30, 2004, respectively, and \$0.4 million and \$0.7 million in related party service revenue for the three and nine months ended September 30, 2004, respectively, relating to this agreement. At September 30, 2004, related party deferred revenue related to this transaction amounted to \$5.9 million.

During the three and nine months ended September 30, 2003, the Company recorded related party revenues totaling \$0.7 million and \$5.1 million, respectively, related to agreements with AOL.

At December 31, 2003, the Company had \$0.9 million in related party accounts receivable and \$9.7 million in related party deferred revenues relating to transactions entered into with AOL and Computer Associates.

6. Restructuring and Impairment Charges

In 2003, the Company implemented three restructuring plans. The first plan, implemented in February 2003, reduced operating expenses by closing the Company's Utah office and related to the termination of 28 employees in that office who were primarily engaged in sales and marketing activities. In accordance with SFAS No. 146

Accounting for Costs Associated with Exit or Disposal Activities, the Company recorded restructuring charges of \$1.2 million. The restructuring charges represent the fair value of remaining lease commitments reduced by estimated sublease rentals, employee severance and termination benefits, the write-off of the net book value of certain fixed assets used in the Utah office, and other miscellaneous charges. In September 2003, the Company re-evaluated market conditions surrounding its efforts to sub-lease the Utah office space and adjusted the restructuring

VIEWPOINT CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

charge by \$0.2 million related to the reduction of estimated sublease rentals as of September 30, 2003. The Company believes that it may be necessary to adjust the estimate of sublease income in the future as the Company's ability to sublease the property in Utah is contingent upon real estate and other market conditions in Utah.

The restructuring reserve activity for the nine months ended September 30, 2004 for the first plan related to lease costs. The activity in the first plan was as follows (in thousands):

	Lease Costs
Restructuring and impairment charges at December 31, 2003	\$ 508
Cash paid	(30)
Balance at March 31, 2004	478
	<hr style="width: 100px; margin: 0;"/>
Cash paid	(32)
Balance at June 30, 2004	446
	<hr style="width: 100px; margin: 0;"/>
Cash paid	(34)
Balance at September 30, 2004	\$ 412
	<hr style="width: 100px; margin: 0;"/>

The second plan was implemented in September 2003, and was designed to streamline the business. Under the plan the Company eliminated 24 sales and marketing, research and development, and general and administrative positions. The Company incurred a restructuring charge of \$0.5 million related to severance arrangements. The charge is recorded on the income statement as a restructuring and impairment charge. The second restructuring plan was completed by September 30, 2003. In November 2003, however, the Company increased the restructuring charge by \$0.1 million in settlement of an action brought by one of the terminated employees. In January 2004 the Company recorded a non-cash adjustment to the restructuring accrual to reflect payments that were less than originally contemplated under the plan.

The restructuring activity for the second restructuring plan related to employee severance and termination benefits up to March 31, 2004. There was no activity for the second restructuring plan in the third quarter of 2004.

The third plan was implemented in December 2003, and was designed to consolidate international operations to the New York office. Accordingly, the Company closed the London, England office, incurring a restructuring charge of \$0.1 million related to severance arrangements. This severance payment was made in January 2004. As the lease relating to this office terminated in February 2004 the Company did not incur a charge related to rent expense. The severance charge is recorded on the income statement as a restructuring charge. There was no activity for the third restructuring plan in the third quarter of 2004.

7. Comprehensive Loss

Total comprehensive loss for the three and nine months ended September 30, 2004 and 2003 consisted of the following (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2004	2003	2004	2003
Net income (loss)	\$(1,295)	\$(5,518)	\$(9,157)	\$(18,308)
Foreign currency translation adjustment		(6)	(3)	(20)
Unrealized gain (loss) on marketable securities	(1)		(10)	
Comprehensive net income (loss)	\$(1,296)	\$(5,524)	\$(9,170)	\$(18,328)

7. Segment Reporting

In 2003, the Company began to manage and analyze the business in segments. In 2003, sales and production employees became dedicated to its License or Service business and each business was managed separately. In 2004, the Company added Search and Advertising systems as businesses that it managed separately. The License segment sells software licenses to use the Viewpoint software platform. Licenses are sold directly by the company's sales employees and indirectly through VARs, for which the Company pays a commission. The Service segment

VIEWPOINT CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

provides creative and support services to customers who generally have purchased or received licenses to use the Viewpoint software platform. Services are generally sold directly by the company's sales team and occasionally by VAR's. Services revenues are generally earned by the delivery of product created or provided by Company employees or third parties that the Company has contracted to perform services under the guidance of the Company. Search revenue is generated when a customer uses the Viewpoint Toolbar to search the internet, and clicks on a sponsored advertisement included in the search results. The Viewpoint Toolbar's search results are provided by Yahoo!/Overture, who collects a fee from the advertiser and remits a percentage of the fee to Viewpoint. Due to the nature of the business, for the three months ended September 30, 2004, the Company did not have employees dedicated to the Search advertising segment. Advertising systems revenue is generated by charging customers to host advertising campaigns based on a cost per thousand (CPM) impressions.

The accounting policies of the segments are the same as those described in the summary of significant accounting policies. The Company does not currently evaluate the performance of its segments beyond gross profit. The Company does not allocate research and development, sales and marketing or general and administrative costs, specifically, to either segment as it does not use that information to make key operating decisions and does not believe that allocating these expenses is necessary in evaluating performance.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with the consolidated financial statements and notes thereto.

In addition to historical information, this Quarterly Report on Form 10-Q contains forward-looking statements that involve risks and uncertainties that could cause actual results to differ materially from the results implied by the forward looking statements. Factors that might cause or contribute to such differences include, but are not limited to, those discussed in the section entitled Factors That May Affect Future Results of Operations. You should carefully review the risks described in other documents we file from time to time with the Securities and Exchange Commission, including any future reports to be filed in 2004 and our Annual Report on Form 10-K/A for 2003. When used in this report, the words expects, anticipates, intends, plans, believes, seeks, targets, estimates, and similar expressions are generally intended to identify forward-looking statements. You should not place undue reliance on these forward-looking statements, which speak only as of the date of this Quarterly Report on Form 10-Q. We undertake no obligation to publicly release any revisions to the forward looking statements or reflect events or circumstances after the date of this document.

Overview

Viewpoint Corporation (Viewpoint or the Company) is a leading provider of interactive media technologies and services. Its graphics operating platform, the Viewpoint Media Player, has been licensed by Fortune 500 companies and others for use in online, offline and embedded applications serving a wide variety of needs, including: marketing campaigns, rich media online advertising, product presentations, and business process visualizations. Since November 2000 the Company has focused on the current business of licensing the rights to use the Company's products and providing fee-based professional services.

On March 17, 2004, Viewpoint entered the internet search business by launching a toolbar search product which the Company calls the Viewpoint Toolbar. The Viewpoint Toolbar attaches to the Internet Explorer browser, enabling web surfers to conduct internet searches without leaving the web page they are viewing. When a user enters a term or phrase in the search field of the Viewpoint Toolbar, search results appear not only as text links listed on a search results page but also as thumbnail icons of the web pages themselves in a tray that descends from the Viewpoint Toolbar. Search results delivered to users of the Viewpoint Toolbar are supplied by Yahoo!/Overture and its wholly-owned subsidiary, Overture Services, Inc. Under its Agreement with Yahoo!/Overture, Viewpoint receives a share of the fees advertisers pay to Yahoo!/Overture to be listed in the search results as a sponsored link. In April 2004, the Company ended the test phase, and began delivering the Viewpoint Toolbar Version 1.0. Adding a number of upgrades, including decreasing the file size of the toolbar and adding text to the image results of the tray, on July 1, the Company rolled out Viewpoint Toolbar Version 2.0.

Viewpoint also offers an online advertising campaign management and deployment product. Advertising systems permits publishers, advertisers, and their agencies to manage the process of deploying online advertising campaigns. This process includes creating the advertising content, selecting the sites on which the advertisements will be deployed, setting the metrics (ad rotation, the frequency with which an ad may be deployed, and others) associated with the campaign, ad deployment, and tracking of campaign results. Advertising systems product enables users to manage advertising campaigns across many sites. In March 2004, Viewpoint announced the availability of AirTime, an extension of advertising systems that permits users to manage and deploy online video advertising campaigns.

Viewpoint has a limited operating history upon which an evaluation of the Company and its prospects can be based. Viewpoint has had significant quarterly and annual operating losses since its inception, and, as of September 30, 2004, had an accumulated deficit of \$254.7 million. Viewpoint's prospects must be considered in light of the risks

and difficulties frequently encountered in entering new businesses. There can be no assurance that Viewpoint will achieve or sustain profitability.

RESULTS OF OPERATIONS

The following table sets forth for the three and nine months ended September 30, 2004 and 2003, the Company's consolidated statements of operations expressed as a percentage of total revenues for the periods indicated:

	Three Months Ended September 30,		Nine Months Ended September 30,

Critical Accounting Policies And Estimates

Viewpoint's discussion and analysis of its financial condition and results of operations are based upon its consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. The Company evaluates its critical accounting policies and estimates, including those related to revenue recognition and goodwill and other intangible assets. The Company bases estimates on historical experience and on various other assumptions that the Company believes to be reasonable under the circumstances though actual results may differ from these estimates under different assumptions or conditions. For a complete description of the Company's accounting policies, see Note 2 to the consolidated financial statements included in the 2003 Annual Report on Form 10-K/A.

Described below are the areas where the Company believes that the estimates, judgments or assumptions that the Company has made, if different, would have yielded the most significant differences in the Company's financial statements:

Revenue Recognition

The Company recognizes revenue in accordance with Statement of Position (SOP) 97-2, Software Revenue Recognition, as amended, Emerging Issues Task Force (EITF) No. 00-21 Revenue Arrangements with Multiple Deliverables, and Staff Accounting Bulletin (SAB) No. 101 Revenue Recognition in Financial Statements as amended by SAB No. 104 Revenue Recognition. Per SOP 97-2 and SAB No. 101, as amended by SAB No. 104, the Company recognizes revenue when the following criteria are met: (a) persuasive evidence of an arrangement exists, (b) delivery has occurred or services have been rendered, (c) the Company's fee is fixed or determinable, and (d) collectibility is reasonably assured.

Viewpoint has generated revenues through four sources: (a) software licenses, (b) services, (c) search advertising, and (d) advertising systems revenue. License revenues are generated from licensing the rights to use products directly to customers and indirectly through Value Added Resellers (VARs). Service revenues are generated from fee-based professional services, customer support services (maintenance arrangements), and training services performed for customers that license the company's products. Search revenue, as explained in more detail below, is derived from a share of the fees charged by Yahoo!/Overture to advertisers who pay for sponsored links when a customer clicks on the paid link on the results provided by the Viewpoint Toolbar. Advertising systems revenue is generated by charging customers to host advertising campaigns based on a cost per thousand (CPM) impressions.

License revenues from direct customers include sales of perpetual and term-based licenses for broadcasting digital content in the Viewpoint format. License revenues are recognized up-front provided no further significant obligations exist and the resulting receivable is deemed collectible by management. Arrangements with VARs require (i) an up-front, non-refundable payment, (ii) a percentage royalty based on sell-through, or (iii) both as consideration for the right to resell the Viewpoint technology. Up-front, non-refundable payments are recognized as license revenues when the VAR's right to resell the company's technology begins and the technology has been delivered to the VAR, which is upon contract signing, provided all other revenue recognition criteria are met and no further significant obligations exist. For arrangements that do not call for an up-front, non-refundable payment, revenues are recognized as the royalties are earned, which is upon notification of sell-through by the VAR, provided all other revenue recognition criteria are met and no further significant obligations exist.

Fee-based professional services for customized software development are performed on a fixed-fee or time-and-materials basis under separate service arrangements. Revenues for fixed-fee arrangements are recognized

over the pattern of performance in accordance with the provisions of SAB No. 104. The pattern of performance for service arrangements is measured by the percentage of costs incurred and accrued to date for each contract, which primarily consist of direct labor costs, cost of outsourcing, and overhead, to the estimated total cost for each contract at completion. The percentage approximates the percentage of a customer's contract that has been completed and would be available for the customer to use at that point in time. Use of this method is based on the availability of reasonably dependable estimates. If reasonably dependable estimates are not available due to the complexity of the services to be performed, the Company defers recognition of any revenues for the project until the project is

completed, delivered and accepted by the customer, provided all other revenue recognition criteria are met and no further significant obligations exist. Revenues from customer support services are recognized ratably over the term of the contract. Revenues from training services are recognized as services are performed.

Fees from licenses sold together with fee-based professional services are generally recognized upon delivery of the software, provided that the payment of the license fees are not dependent upon the performance of the services, and the services are not essential to the functionality of the licensed software. If the services are essential to the functionality of the software, or payment of the license fees are dependent upon the performance of the services, both the software license and service fees are recognized in accordance with SOP 81-1 Accounting for Performance of Construction-Type and Certain Production-Type Contracts. The percentage of completion method is used for those arrangements in which reasonably dependable estimates are available. If reasonably dependable estimates are not available due to the complexity of the services to be performed, the Company defers recognition of any revenues for the project until the project is completed, delivered and accepted by the customer, provided all other revenue recognition criteria are met and no further significant obligations exist.

For arrangements involving multiple elements, the Company defers revenue for the undelivered elements based on their relative fair value and recognizes the difference between the total arrangement fee and the amount deferred for the undelivered elements as revenue. The determination of fair value of each undelivered element in multiple element arrangements is based on the price charged when the same element is sold separately. For maintenance and technical support elements, the Company uses renewal rates to determine the price when sold separately. The Company accounts for multiple element arrangements which involve only fee-based professional services in accordance with EITF 00-21. For licenses sold that include updates over a period of time the Company recognizes the license revenue over the period in which updates are provided.

Search revenue is generated when a customer uses the Viewpoint Toolbar to search the internet, and clicks on a sponsored advertisement included in the search results. The Viewpoint Toolbar's search results are provided by Yahoo!/Overture, who collects a fee from the advertiser and remits a percentage of the fee to Viewpoint. Revenue generated is a function of the number of Viewpoint Toolbars performing searches, the number of searches that are sponsored by advertisers, the number of advertisements that are clicked on by Viewpoint Toolbar searchers, the rate advertisers pay for those advertisements, and the percentage retained by Yahoo!/Overture for providing the results.

Viewpoint also offers an online advertising campaign management and deployment product. This advertising system permits publishers, advertisers, and their agencies to manage the process of deploying online advertising campaigns. The Company charges customer on a cost per thousand (CPM) impression basis, and recognizes revenue when the impressions are served, so long as all other revenue recognition criteria are satisfied.

Standard terms for license arrangements require payment within 90 days of the contract date, which typically coincides with delivery. Standard terms for service arrangements, which are typically billed and collected on an installment basis, require final payment within 90 days of completion of the services. Probability of collection is based upon the assessment of the customer's financial condition through the review of their current financial statements and/or credit reports. For follow-on sales to existing customers, prior payment history is also used to evaluate probability of collection. The Company's arrangements with customers do not contain product return rights. If the fee is not fixed or determinable, revenue is recognized as payments become due or as cash is received from the customer. If a nonstandard acceptance period is required, revenues are recognized upon the earlier of customer acceptance or the expiration of the acceptance period.

Derivatives

In 2002 and 2003, the Company issued convertible notes and warrants which would require Viewpoint to issue registered shares of common stock upon conversion of these securities. The Company accounts for the fair values of these outstanding warrants to purchase common stock and conversion options of its convertible notes in accordance with SFAS No. 133 Accounting for Derivative Instruments and Hedging Activities, and EITF Issue No. 00-19

Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock, which requires the Company to bifurcate and separately account for the conversion option and warrants as embedded derivatives contained in the Company's convertible notes. The Company is required to carry these embedded derivatives on its balance sheet at fair value and the unrealized changes in the value of these embedded derivatives are reflected in net income as changes in fair values of warrants to purchase common stock and

conversion options of convertible notes. Such changes in fair value are recorded as an adjustment to reconcile net loss to net cash used in operating activities in the consolidated statement of cash flows.

Financial Results

Viewpoint reported total revenue of \$3.4 million for the third quarter 2004, compared to \$2.5 million for the third quarter 2003. Viewpoint reported total revenue of \$9.8 million for the nine months ended September 30, 2004, compared to \$11.0 million for the nine months ended September 30, 2003. Gross profit for the third quarter of 2004 was \$2.6 million compared to \$1.1 million for the same period of 2003. Gross profit for the nine months ended September 30, 2004 was \$7.4 million, compared to \$6.0 million for the nine months ended September 30, 2003. The improvement in gross profit in 2004 compared to 2003 was due to the addition of revenues from our higher margin search products of \$0.9 million, and higher margin services contracts during 2004.

Operating loss for the nine months ended September 30, 2004 was \$4.0 million compared to \$17.1 million for the nine months ended September 30, 2003. The lower level of operating losses came from a reduction in operating expenses due to steps management implemented in 2003 to reduce costs, primarily in payroll. Additionally in 2003 the Company recognized \$1.9 million in restructuring costs that were not recognized in 2004 and experienced a \$2.1 million decrease in additional non-cash stock based compensation charges in 2003 compared to 2004.

The Company recognized net loss of \$1.3 million, or \$(0.02) per share, in the third quarter of 2004, compared to a net loss of \$5.5 million, or \$(0.12) per share for the third quarter of 2003. For the nine months ended September 30, 2004, the Company incurred a net loss of \$9.2 million, or \$(0.17) per share, compared to a net loss of \$18.3 million, or \$(0.41) per share, for the nine months ended September 30, 2003. The lower level of net loss was principally due to reduced operating losses, offset by an increase in other expenses principally due to an increase in the fair value of its obligation to convertible debt and warrant holder of \$3.7 million in the first nine months of 2004 on the cost attributable to its March 2003 financing.

In March 2004, the Company completed a private placement whereby it directly issued 1.5 million shares of common stock to an institutional investor who had participated in the March 2003 financing. The issuance was for an aggregate purchase price of \$3.7 million and did not require banking placement fees. Additionally, prior to the completion of the private placement the institutional investor exercised its right to convert approximately \$0.9 million of Viewpoint convertible debt it had acquired in March 2003 into shares of Viewpoint common stock. This conversion resulted in a non-cash loss on conversion of debt of \$0.6 million.

During the period beginning on April 15, 2004 and May 20, 2004 a period which covered 25 consecutive trading days the dollar volume-weighted average price of the Company's common stock exceeded 150% of the conversion price applicable to the outstanding convertible notes and the Company determined to exercise its right to convert the outstanding notes into shares of Company common stock. Accordingly, on May 20, 2004, the Company informed the institutional investors holding the outstanding convertible notes that it would exercise its right to convert that debt. On June 18, 2004, the Company completed the conversion of the remaining outstanding convertible notes of \$1.8 million and the related outstanding interest into 1.7 million shares of Viewpoint common stock. The Company recorded a gain of \$3.0 million related to the change in the fair value of the conversion feature during the three months ended June 18, 2004 through the date of the conversion. In addition, the Company recorded a loss on conversion which represented the difference between the fair value of the common stock issued in exchange for the notes and the carrying value of the convertible notes on the date of conversion. This change was primarily comprised of the write-off of unamortized loan discount and debt issuance costs.

Viewpoint's cash, cash equivalents, and marketable securities as of September 30, 2004 were \$5.7 million compared to cash, cash equivalents, and marketable securities of \$9.5 million at December 31, 2003. This decrease

can be attributed to the Company's operating loss less the recognition of deferred revenue, which was a non-cash item during the nine months ended September 30, 2004, offset by the first quarter's private placement.

The Company generates revenues by selling licenses to the Viewpoint graphical platform principally to internet content publishers. Prior to 2004, licenses were generally 15 months in duration. Revenues were recognized upon the completion of the sales and delivery process so long as all other revenue recognition criteria were satisfied. The Company supplemented its license revenue by providing content development services to licensees. The service revenues were recognized on a percentage of completion basis as computed by comparing the incurred costs of the project to the total estimated project cost and applying this percentage against the total contracted revenue.

During 2004 the Company continues to recognize license sales upon delivery so long as all other revenue recognition criteria are satisfied. Since January 2004, licenses are generally sold for a 12 month term. The Company also adopted a new licensing price structure in 2004 whereby larger license sales, that are made less frequently, contain product upgrades when and if available for a period of 12 months. These license sales will be amortized over a 12 month period, due to the nature of when and if available upgrades.

During October, 2003 the Company entered into an amended license agreement with America Online, Inc. (AOL) which provided for payments by AOL of \$10 million which was received in the fourth quarter of 2003. The agreement

contains multiple elements consisting of a perpetual broadcast license, a perpetual source code license, quarterly updates to the source code through December 2005, and maintenance and consulting services. The company will recognize revenue from this agreement ratably as license and services revenue through December 2005 which represents the duration of the Company's obligation for post-contract support of the source code element including quarterly upgrades and maintenance requirements. Approximately \$0.9 million is recognized each quarter as related party license revenue and \$0.1 million as related party services revenue.

During 2003 the Company began to migrate its license and services sales efforts toward larger customers. The customers the Company began targeting had longer sales cycles and often elected to procure limited use or project licenses for the Company's software. This enabled the customers to understand the software's capabilities before they committed to larger and longer license purchases. These limited use projects are generally for services as the Company develops content for the customers to use with the Company's software. As the Company has been migrating its sales efforts towards these larger customers with a longer license sales cycle, the Company has experienced a decline in the mix of license revenues relative to total revenues. The Company adopted a consistent license pricing schedule at the beginning of 2004 to help broaden its potential customer base. If the Company is not able to increase the number of sales at the entry level, or sell larger and longer term licenses to larger customers the Company may not be able to reverse the decline in License revenues relative to total revenues.

On March 17, 2004 Viewpoint entered the internet search business, by launching the Viewpoint Toolbar on a test basis. In April 2004, the Company ended the test phase, and began delivering the Viewpoint Toolbar Version 1.0. Search revenue is generated when a customer uses the Viewpoint Toolbar to search the internet, and clicks on a sponsored advertisement included in the search results. The Viewpoint Toolbar's search results are provided by Yahoo!/Overture, who collects a fee from the advertiser and remits a percentage of the fee to Viewpoint. Revenue generated is a function of the number of Viewpoint Toolbars performing searches, the number of searches that are sponsored by advertisers, the number of advertisements that are clicked on by Viewpoint Toolbar searchers, the rate advertisers pay for those advertisements, and the percentage retained by Yahoo!/Overture for providing the results. Search revenue reported to the Company by the search results provider in the second quarter of 2004 did not meet the criteria for fixed and determinable revenue, and was therefore not recorded as revenue. The Company obtained satisfactory documentation to meet the fixed and determinable criteria for Search revenue in the third quarter and recognized revenues of \$0.9 million for the entire third quarter during the three months ended September 30, 2004.

Viewpoint also offers an online advertising campaign management and deployment product. Advertising systems permits publishers, advertisers, and their agencies to manage the process of deploying online advertising campaigns. The Company charges customers on a cost per thousand (CPM) impression basis, and recognizes revenue when the impressions are served, so long as all other revenue recognition criteria are satisfied. The Company expects revenues from advertising systems to continue to grow in future quarters.

License revenues of \$0.2 million decreased approximately \$0.2 million or 50% for the three months ended September 30, 2004 compared to the same period last year. License revenues for the three months ended September 30, 2004 were essentially generated from the sale of three licenses, which were greater than \$50,000, sold during the first nine months of 2004, which provided upgrade rights, and are therefore being recognized ratably over 12 months. The revenue related to these contracts amounted to \$0.1 million in the third quarter of 2004. In addition, the Company recognized another \$0.1 million for license contracts that were recognized upon delivery of the software, since the Company did not provide any significant post contract customer support. For the three months ended September 30, 2003, the Company sold seven licenses totaling more than \$0.3 million, in the aggregate, that were recognized upon delivery of the software, since the Company did not provide any significant post contract customer support.

License revenues of \$0.5 million decreased approximately \$1.6 million or 75% for the nine months ended September 30, 2004, compared to the same period last year. License revenues in 2004 were essentially generated from sales to smaller licensees or were larger licenses, but included upgrades when and if available, and therefore, are being recognized ratably over 12 months. As mentioned above, the Company sold three licenses that were greater than \$50,000 during the first nine months of 2004, which provided upgrade rights, and are therefore being recognized ratably over 12 months. Conversely, for the nine months ending September 30, 2003, the Company sold nine licenses for more than \$50,000, totaling \$1.7 million, which did not provide upgrades and were recognized upon delivery of the software. These licenses included three licenses purchased by international Value Added Resellers (VAR s), two international sales through its London office and two multi-year licenses. The Company has ceased pursuing sales through reseller channels and closed the department that supported this process at its headquarters. It has also closed its London office in December 2003 due to costs involved in supporting that location. One of the multi-year licenses remains in place and another was subsequently modified.

Related party license revenues of \$0.9 million increased approximately \$0.9 million, or 100%, for the three months ended September 30, 2004 compared to the same period last year. During 2003 an AOL employee was also a Director of the Company. This employee's term as Director ended in December 2003. Accordingly, revenue associated with contracts entered into with AOL prior to December 31, 2003 was recorded as related party revenue. The increase in related party license revenues was due to AOL, working under a new agreement that was executed in October 2003, which, based on the terms of the agreement, require revenue to be recognized ratably through December 2005, as

opposed to the previous agreement which required the Company to recognize revenues when payments were due. The agreement entered into in October 2003 will be recorded as related party revenue, as the terms were agreed upon and the contract signed when AOL was a related party.

Related party license revenues increased approximately \$1.6 million, or 150% to \$2.7 million, for the nine months ended September 30, 2004 compared to the same period last year. The nine month increase is attributable to the difference in the agreements AOL was working under, signed in October 2003, as mentioned above.

Service revenues of \$0.9 million decreased approximately \$0.6 million or 41% for the three months ended September 30, 2004 compared to the same period last year. The decrease is related to a significant non-recurring project that was largely completed in the third quarter of 2003.

Service revenues of \$3.5 million decreased approximately \$0.2 million or 6% for the nine months ended September 30, 2004 compared to the same period last year. The Company's revenues during 2004 included \$0.5 million from a service project that was completed in the third quarter of 2003 for which the Company received a final payment in February 2004. The Company recorded \$1.2 million in revenue for this same service project for the same period in 2003. The decrease was offset by certain service revenues from AOL which are also included in this category in 2004 as they ceased being a related party in December 2003.

Related party service revenues of \$0.5 million and \$2.1 million for the three and nine months ended September 30, 2004, respectively decreased by approximately \$0.2 million or 28%, and \$2.0 million or 49%, respectively, compared to the same period last year. This decrease is due to AOL use of the Company's engineering professional services extensively in the second and third quarter of 2003, amounting to \$1.5 million in revenue. These services were not used in 2004. In addition, revenues included in 2004 as related party service revenues relate to contracts that were entered into prior to December 2003.

Search revenues of \$0.9 million for the three and nine month periods of 2004 include approximately \$0.1 million from the second quarter of 2004 that is recognized in the third quarter when revenue amounts became fixed or determinable for the period. Search revenues are generated when users of the Viewpoint Toolbar are provided search results from advertisers that they click on to see. These advertisers then pay a fee to Yahoo!/Overture, who remits a percentage of the fee to Viewpoint. The Company had installed 1.5 million tool bars through July 2, 2004 and 4.8 million toolbars through September 30, 2004.

The Company recognized \$46,000 and \$83,000 in advertising systems revenue for the three and nine months ended September 30, 2004. While growth in this product revenue has been slower than anticipated the Company expects growth to continue during the fourth quarter which has historically been a stronger period of advertising, and as more clients use the advertising system.

Cost of revenues for licenses consists primarily of commissions to VAR s. The decrease in cost of license revenues for the three and nine months ended September 30, 2004 is attributable to a decrease in sales to VAR s that require commission payments, as compared to the same periods last year.

Cost of revenues for services consists primarily of salaries, consulting fees and overhead for those who provide fee-based content creation and engineering professional services. Cost of revenues decreased by \$0.7 million for the three months ended September 30, 2004 as compared to the same period last year, due to the overall decrease in services revenues as well as the Company s cost controls, including a reduced reliance on outside contractors in the services group. Cost of revenues for services decreased by \$2.7 million for the nine months ended September 30, 2004 as compared to the same period last year. The decrease in cost of revenues for services is attributable to the decrease in service revenues. Services expenses as a percentage of services revenues decreased because of the \$0.5 million payment made in February 2004, which was recognized as revenue in 2004 against which the cost had been recognized in cost of revenues in 2003, and due to more effective cost controls, including a reduced reliance on outside contractors, by the services group.

The Company incurs cost of revenues related to Search revenue for the hosting services associated with providing search results. Bandwidth costs utilized in providing results has been minimal. As Search revenue increases the hosting services associated with this revenue will increase.

Cost of revenues from advertising systems consists of the web-hosting fees associated with serving advertising content and costs of developing certain advertisements in contracts that included a combined price for developing creative material and delivering that material. The Company is continually evaluating pricing for hosting services in order to reduce the delivery expenses to the greatest extent practicable. The Company has recently separated creative

development from delivery contracts which will separate the creative development revenues and costs into services revenues and costs in future quarters.

Sales and marketing

	September 30,		
	2004	2003	%
	(dollars in thousands)		Change
Three months ended:			
Sales and Marketing	\$ 929	\$1,637	(43)%
Percentage of total revenues	28%	65%	
Nine months ended:			
Sales and Marketing	\$2,925	7,625	(62)%
Percentage of total revenues	30%	69%	

Sales and marketing expenses include salaries and benefits, sales commissions, non-cash stock-based compensation charges, consulting fees, and travel and entertainment expenses for sales and marketing personnel. Sales and marketing expenses also include the cost of programs aimed at increasing revenue, such as advertising, trade shows, and public relations.

Sales and marketing expenses decreased by \$0.7 million or 43% for the three months ended September 30, 2004 compared to the same period last year due to a decrease in personnel in the sales and marketing area. Personnel costs decreased by \$0.8 million due to a reduction in sales staff associated with slower license sales, and a change in marketing emphasis and support. Travel and entertainment expenses decreased by \$0.1 million due to a reduction in sales staff. These decreases were offset by an increase in marketing expense related to the Company's search business of \$0.3 million.

Sales and marketing expenses decreased by \$4.7 million or 62% for the nine months ended September 30, 2004 compared to the same period last year due to a decrease in personnel in the sales and marketing area. Personnel costs decreased by \$3.7 million due to a reduction in sales staff associated with slower license sales, and a change in marketing emphasis and support. Travel and entertainment expenses decreased by \$0.4 million due to a reduction in sales staff and a decrease in the number of trade events attended by the Company. Consulting expenses, including marketing expenses such as trade shows, decreased by \$0.9 million related to decreases in marketing efforts for certain products compared to the same period last year. Non-cash stock-based compensation charges decreased \$0.4 million due to headcount reductions in sales and marketing personnel who had received option grants in the past where the exercise price was lower than the market value of the Company's common stock on the date of grant, or whose options became fully vested. Currently the Company issues stock options to new personnel with an exercise price equal to the market value of the common stock on the date of grant. These decreases were offset by an increase in marketing expense related to the Company's search business of \$0.8 million.

Research and development

September 30,

	2004	2003	% Change
	(dollars in thousands)		
Three months ended:			
Research and development	\$ 783	\$ 921	(15)%
Percentage of total revenues	23%	36%	
Nine months ended:			
Research and development	\$2,556	\$3,232	(21)%
Percentage of total revenues	26%	29%	

Research and development expenses consist primarily of salaries and benefits for software developers, contracted development efforts, and non-cash stock-based compensation charges related to the Company's product development efforts. The Company expenses as incurred research and development costs necessary to establish the

technological feasibility of its internally developed software products and technologies. To date, the establishment of technological feasibility of the Company's products and general release has substantially coincided. As a result, the Company has not capitalized any software development costs since costs qualifying for such capitalization have not been significant. Additionally, the Company capitalizes costs of software, consulting services, hardware and payroll-related costs incurred to purchase or develop internal-use software, if technological feasibility has been established, it is probable that the project will be completed and the software will be used as intended. The Company expenses costs incurred during preliminary project assessment, research and development, re-engineering, training and application maintenance.

The Company's research and development efforts have historically been primarily directed at improving the overall quality of the Viewpoint Media Player and its proprietary software tools for creating digital content. During 2003, the Company developed significant enhancements to the video playback functionality of Viewpoint Media Player (which the Company made available in September 2003), an authoring tool for clients publishing advertising content, Computer Aided Design (CAD) workflow solutions and technology for converting CAD data into Viewpoint content, expanded capability of the Video Media Player onto new platforms, developed new configuration capabilities for user interfaces, and enhancements to the Viewpoint Media Player that allow print quality images to be generated from interactive online content. Additionally, the Company built an ad serving system, which is capable of deploying advertising on internet websites. Beginning in 2004 the Company expanded its efforts to build the Viewpoint Toolbar for searching and related advertising efforts. It also developed a creative assembly capability for the advertising systems product that is used to deploy advertising to publisher sites on the internet. Additionally it developed the capability of delivering video advertising using its advertising system. The Company has also been building a software development kit that will simplify the creation of graphical content to be deployed on the Viewpoint platform that should be available to the market in 2005.

Research and development expenses decreased by \$0.1 million or 15% for the three months ended September 30, 2004 compared to the same period last year. The most significant decrease came in non-cash stock-based compensation which decreased \$0.1 million due to headcount reductions in research and development personnel who had received option grants in the past where the exercise price was lower than the market value of the Company's common stock on the date of grant, or whose options became fully vested. Travel and entertainment costs associated with a small reduction in staff size of the research and development department and consulting expenses resulted in \$0.1 million decrease compared to the same period last year. These decreases were off-set by an increase in salary expenses \$0.1 million. Salary expenses increased due to specific engineering salaries that were classified as cost of revenues as a result of revenue generating customer specific development work in the third quarter of 2003. Such contracts did not exist in the third quarter of 2004.

Research and development expenses decreased by \$0.7 million or 21% for the nine months ended September 30, 2004 compared to the same period last year. The most significant decrease came in non-cash stock-based compensation which decreased \$0.8 million due to headcount reductions in research and development personnel who had received option grants in the past where the exercise price was lower than the market value of the Company's common stock on the date of grant, or whose options became fully vested. These decreases were off-set by an increase in salaries and benefits of \$0.2 million. Salaries and benefits increased due to specific engineering salaries and benefits that were classified as cost of revenues as a result of revenue generating customer specific development work during the first three quarters of 2003. Such contracts did not exist in the same period of 2004.

General and administrative

	<u>September 30,</u>		
	<u>2004</u>	<u>2003</u>	<u>%</u> <u>Change</u>
	<u>(dollars in thousands)</u>		
Three months ended:			
General and Administrative	\$1,631	\$3,413	(52)%
Percentage of total revenues	49%	136%	
Nine months ended:			
General and Administrative	\$5,358	\$8,951	(40)%
Percentage of total revenues	55%	81%	

General and administrative expenses primarily consist of corporate overhead of the Company, which includes salaries and benefits related to finance, human resources, legal, and executive personnel along with other administrative costs such as facilities costs, legal, accounting and investor relations fees, insurance expense, and bad debt expense.

General and administrative expenses decreased by \$1.8 million or 52% for the three months ended September 30, 2004 compared to the same period last year. Salary costs decreased by \$0.7 million associated with the reduction in executive staff associated with the cost reduction programs implemented by management in 2003. Non-cash stock-based compensation decreased by \$0.3 million due to headcount reductions in general and administrative personnel who had received option grants in the past where the exercise price was lower than the market value of the Company's common stock on the date of grant, or whose options became fully vested. Corporate costs were also \$0.2 million higher in the third quarter of 2003 due to the SEC review of the company's financial statements. In addition, the Company wrote off \$0.2 million of internally developed software costs in 2003 that was determined to be obsolete in September 2003. Lastly, the Company received \$0.1 million of a receivable that had been written off in the second quarter of 2003.

General and administrative expenses decreased by \$3.6 million or 40% for the nine months ended September 30, 2004 compared to the same period last year. Bad debt expense decreased by \$0.7 million, and non-cash stock-based compensation decreased by \$0.9 million due to headcount reductions in general and administrative personnel who had received option grants in the past where the exercise price was lower than the market value of the Company's common stock on the date of grant, or whose options became fully vested. Facility costs decreased by \$0.4 million associated with the closing of a facility in Utah in a restructuring completed in 2003. Salary costs decreased by \$0.5 million associated with the reduction in executive staff associated with the cost reduction programs implemented by management in 2003. Corporate costs were also higher by \$0.6 million in 2003 due to the SEC review of the Company's financial statements.

Depreciation expense

Percentage of total revenues	6%	15%	
Nine months ended:			
Depreciation	\$ 629	\$ 1,305	(52)%
Percentage of total revenues	6%	12%	

Depreciation expense decreased \$0.2 million, or 46%, for the three months ended September 30, 2004, compared to the same period last year, and \$0.7 million, or 52%, for the nine months ended September 30, 2004, respectively. The decreases were due to the write-off of certain fixed assets related to the closure of the Company's Utah office in 2003, and the overall reduction of assets used in business due to the restructurings.

Percentage of total revenues	%	17%	

In 2003, the Company implemented three restructuring plans. The first plan, implemented in February 2003, reduced operating expenses by closing the Company's Utah office and related to the termination of 28 employees in that office who were primarily engaged in sales and marketing activities. In accordance with SFAS No. 146

Accounting for Costs Associated with Exit or Disposal Activities, the Company recorded restructuring charges of \$1.2 million. The restructuring charges represent the fair value of remaining lease commitments reduced by estimated sublease rentals, employee severance and termination benefits, the write-off of the net book value of certain fixed assets used in the Utah office, and other miscellaneous charges. In September 2003, the Company re-evaluated market conditions surrounding its efforts to sub-lease the Utah office space and increased the restructuring charge by \$0.2 million related to the reduction of estimated sublease rentals.

The second plan was implemented in September 2003, and was designed to streamline the business. Under the plan the Company eliminated 24 sales and marketing, research and development, and general and administrative positions. The Company incurred a restructuring charge of \$0.5 million related to severance arrangements. The second

restructuring plan was completed by September 30, 2003. In November 2003, the Company increased the restructuring charge by \$0.1 million in settlement of an action brought by one of the terminated employees. In January 2004 the Company recorded a non-cash adjustment to the restructuring accrual to reflect payments that were less than originally contemplated under the plan.

The third plan was implemented in December 2003 and was designed to consolidate international operations to the New York office. Accordingly the Company closed the London, England office incurring a restructuring charge of \$0.1 million primarily related to severance. The charge is recorded on the income statement as a restructuring charge. The third restructuring plan was completed by December 31, 2003.

Certain adjustments relating to termination benefits were recorded against the remaining restructuring accruals in 2004.

Interest and other income, net

Percentage of total revenues	1%	%	
Nine months ended:			
Interest and other income, net	\$ 69	\$ 42	64%
Percentage of total revenues	1%	%	

Interest and other income, net, primarily consists of interest and investment income on cash, cash equivalents and marketable securities. As a result, interest and other income, net, fluctuates with changes in the Company's cash, cash equivalents and marketable securities balances and market interest rates.

Interest and other income, net, increased for the three and nine months ended September 30, 2004 compared to the same periods last year due to an increase in average cash, cash equivalents, and marketable securities balances due to the private placements in March 2004 and November 2003.

Interest expense

Nine months ended:			
Interest expense	\$(717)	\$(743)	(3)%
Percentage of total revenues	(7)%	(7)%	

Interest expense consists of interest paid and accrued, and amortization of debt discount and debt issue costs on the Company's outstanding convertible and subordinated notes. The notes were executed and funded during the first quarter of 2003. In March 2004, \$0.9 million of convertible notes were exchanged for common stock by the note-holder. In June 2004, the remaining \$1.8 million of convertible notes were exchanged for common stock by the note-holders.

Interest expense decreased for the three months ended September 30, 2004 due to the conversion of debt in March and June of 2004.

Loss on early extinguishment of debt

Percentage of total revenues	%	(15)%	

On December 31, 2002, the Company completed a private placement of convertible notes and warrants in which it issued to three institutional investors, 4.95% convertible notes having an aggregate principal amount of \$7.0 million, and warrants to purchase 0.7 million shares of Company common stock. The convertible notes were to mature on December 31, 2007, unless earlier converted into shares of Company common stock at a price of \$2.26 per share.

On March 25, 2003, the Company entered into Redemption, Amendment and Exchange Agreements with the three institutional investors with whom it had completed the private placement of convertible notes and warrants on December 31, 2002. The Company recorded a loss for the quarter ended September 30, 2003, on the early extinguishment of the original convertible notes in the amount of \$1.7 million of which \$0.7 million related to the write-off of deferred loan costs. In conjunction with the extinguishment, the Company paid \$3.3 million, issued new convertible notes in the principal amount of \$2.7 million and issued 1,351,351 shares of its common stock with a market value of \$0.7 million. The difference between (i) the carrying value of the outstanding convertible notes exchanged and (ii) cash paid and the fair value of the common stock and new convertible notes issued, amounted to \$1.0 million and was included in the loss on early extinguishment of debt.

The Company charged the loss on early extinguishment of debt to operations as such loss did not qualify for classification as extraordinary.

Loss on conversion of debt

	<u>September 30,</u>

	<u>(dollars in thousands)</u>		
Three months ended:			
Loss on conversion of debt	\$	\$	N/A
Percentage of total revenues	%	%	
Nine months ended:			
Loss on conversion of debt	\$ (810)	\$	N/A
Percentage of total revenues	(9)%	%	

On March 17, 2004, one of the institutional investors holding the convertible notes converted \$0.9 million of outstanding notes for shares of the Company's common stock. In the first quarter of 2004, the Company recorded a loss of \$1.4 million related to the change in the fair value of the conversion feature from January 1, 2004 through the date of the conversion. For the three months ended March 31, 2004 the Company also recorded a loss related to a change in the fair value of the conversion feature and warrants of \$3.7 million and \$1.3 million, respectively.

In addition, on the same day as the conversion, the Company sold 1.5 million shares of common stock in a private placement to the institutional investor, for \$3.7 million or \$2.45 per share. The Company recorded a loss on conversion of debt in the amount of \$0.6 million, which represented the write-off of unamortized loan discount and debt issuance costs of \$0.1 million and the difference between the proceeds received from the private placement and the fair value of the common stock issued based upon the closing price of the Company's stock on the day of the sale of \$0.5 million. The remaining noteholders chose not to exercise their right to redeem their notes in amount up to 20% of the \$3.7 million received by the Company within 10 days of the Company's public announcement of the closing of the private placement.

During the period beginning on April 15, 2004 and ending on May 20, 2004, a period which covered 25 consecutive trading days, the dollar volume-weighted average price of the Company's common stock exceeded 150% of the conversion price applicable to the outstanding convertible notes and the Company determined to exercise its right to convert the outstanding notes into shares of Company common stock. Accordingly, on May 20, 2004, the

Company informed the institutional investors holding the outstanding convertible notes that it would exercise its right to convert that debt. On June 18, 2004, the Company completed the conversion of the remaining outstanding convertible notes of \$1.8 million and the related outstanding interest into 1.7 million shares of Viewpoint common stock. In addition, the Company recorded a loss on conversion which represented the difference between the fair value of the common stock issued in exchange for the notes and the carrying value of the convertible notes on the date of conversion. This change was primarily comprised of the write-off of unamortized loan discount and debt issuance costs.

Changes in fair value of warrants to purchase common stock and conversion options of convertible notes

Based on the provisions of SFAS No. 133 Accounting for Derivative Instruments and Hedging Activities, and EITF Issue No. 00-19 Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock, the Company records either income or expense based on a decrease or increase, respectively, of the Company share price. The Company recorded a loss for the three months ended September 30, 2004 based on the increase in fair values of the warrants of \$0.2 million. For the nine months ended September 30, 2004, the Company recorded a loss based on the increase in fair values of the conversion options of its convertible notes of \$3 million and warrants of \$0.7 million.

Percentage of total revenues	1%	1%	

In December 1999, the Board of Directors of the Company approved a plan to focus exclusively on its interactive media technologies and digital content creation services and to correspondingly divest itself of its prepackaged

software graphics business. Accordingly, these operations are reflected as discontinued operations for all periods presented in the accompanying consolidated statements of operations.

The adjustment to net loss on disposal of discontinued operations for the three and nine months ended September 30, 2004, represents royalty payments received for certain prepackaged software.

Factors That May Affect Future Results of Operations

We believe that in the future our results of operations could be affected by various factors including:

We have a history of losses and expect to incur losses in the future, which may cause our share price to decline.

We may have to obtain financing on less favorable terms, which could dilute current stockholders' ownership interests in the company.

Our business is difficult to evaluate because we have a limited operating history and have only recently launched our search toolbar and advertising systems products.

Our competitors in the search business include much larger companies like Google, Microsoft, Yahoo! and others that have significantly greater resources than we do to build a business.

The success of our graphically enhanced search operations depends on users' satisfaction with search results supplied by Yahoo!/Overture.

Our business may not grow if the internet advertising market does not continue to develop or if we are unable to successfully implement our business model.

Our failure to successfully compete may hinder our growth.

Our revenues will be subject to seasonal fluctuations.

Our financial performance and reduction of our workforce may affect the morale and performance of our personnel.

We may need to enter into business combinations and strategic alliances which could be difficult to integrate and may disrupt our business.

We may need to develop new products or other untested methods of increasing sales with our existing products or distribution network to generate sales and if we are unsuccessful the growth of our business may cease or decline.

We will need to keep pace with rapid technological change in the internet search and advertising industries.

Our ad campaign management and deployment solution may not be successful at attracting and retaining customers.

We might experience significant defects in our products.

Our technical systems are vulnerable to interruption and damage.

Our stock price is volatile, which could subject us to class action litigation or make future financing difficult.

Our charter documents could make it more difficult for an unsolicited third party to acquire us.

We may be unable to protect our intellectual property rights.

We may be liable for infringing the intellectual property rights of others.

Internet security poses risks to our entire business.

If we fail to maintain an effective system of internal controls, we may not be able to accurately report our financial results or prevent fraud, which could result in a negative market reaction. We are now in the process of complying with requirements resulting from the Sarbanes-Oxley Act of 2002 (SOX), including those provisions of Section 404 of SOX that establish requirements for both management and independent registered public accounting firms with respect to reporting on internal control over financial reporting. In 2004, we have devoted significant financial and other resources to review and strengthen our internal controls in advance of complying with the Section 404 requirements. The requirements and processes associated with Section 404 are new and untested and we cannot be certain that the measures we have taken will be sufficient to meet the Section 404 requirements or that we will be able to implement and maintain adequate controls over our financial processes and reporting in the future. If we are unable to comply with the requirements imposed by Section 404 of SOX in a timely manner, we cannot predict how the market or regulators will react.

Recent Accounting Pronouncements

In April 2004, the Emerging Issues Task Force issued Statement No. 03-06 Participating Securities and the Two-Class Method Under FASB Statement No. 128, *Earnings Per Share* (EITF 03-06). EITF 03-06 addresses a number of questions regarding the computation of earnings per share by companies that have issued securities other than common stock that contractually entitle the holder to participate in dividends and earnings of the Company

when, and if, it declares dividends on its common stock. The issue also provides further guidance in applying the two-class method of calculating earnings per share, clarifying what constitutes a participating security and how to apply the two-class method of computing earnings per share once it is determined that a security is participating, including how to allocate undistributed earnings to such a security. EITF 03-06 is effective for fiscal periods beginning after March 31, 2004. The EITF did not have an effect on the Company's financial statements.

The Emerging Issues Task Force (EITF) has reached a consensus on EITF Issue No. 04-8, "Accounting Issues Related to Certain Features of Contingently Convertible Debt and the Effect on Diluted Earnings per Share." The effective date for this consensus will be the same as the effective date for the revised version of FASB Statement No. 128, "Earnings per Share", yet to be issued by the Board. The Board's most recent discussion on the effective date for Statement 128R indicates that it will be effective for reporting periods ending after December 15, 2004 and will have to be applied retroactively. Contingently convertible debt instruments are structured financial transactions that combine the features of contingently issuable shares with a convertible debt instrument. Contingently convertible debt instruments are convertible into common shares of the issuer after the common stock price has exceeded a predetermined threshold for a specified time period (market price trigger). After the final language has been published, the Company will determine if EITF Issue No. 04-8 is applicable to its Senior Notes. If EITF Issue No. 04-8 is applicable, the Company will have to include the number of shares to be issued upon conversion in its calculation of diluted earnings per share for prior periods, as the debt instruments were converted by the third quarter, regardless of whether the market price triggers have been met. This will result in a small decrease in the Company's diluted earnings per share for those prior periods.

LIQUIDITY AND CAPITAL RESOURCES

Liquidity and Capital Resources

Cash, cash equivalents, and marketable securities totaled \$5.7 million at September 30, 2004, down from \$9.5 million at December 31, 2003.

	September 30,	
	2004	2003
	(dollars in millions)	
Cash used in operating activities	\$ (7.5)	\$ (9.3)
Cash used by investing activities	(3.2)	(0.1)
Cash provided by (used in) financing activities	3.9	(0.5)

Operating activities

In the nine months ended September 30, 2004, cash used in operating activities was \$7.5 million, a decrease of \$1.8 million compared to the nine months ended September 30, 2003. The use of cash was caused by \$9.2 million in net loss increased by the recognition of \$3.8 million in revenue that was classified as deferred revenue. Since the cash was received in the fourth quarter of 2003, the recognition of revenue did not effect the operating cash balance. Several non-cash expenses impacted the net loss including the \$3.7 million non-cash loss related to the change in fair value of warrants to purchase common stock and conversion feature of the convertible debt caused by the increase in the Company's share price. Additionally non-cash stock based compensation, depreciation and amortization, amortization and write-off of debt discount and issuance cost, and the loss related to the conversion of debt and

issuance of stock below fair market value related to the private placement in March 2004 totaled \$2.2 million decreasing the use of cash by operating activities.

In the nine months ended September 30, 2003, cash used by operating activities was \$9.3 million. Use of cash stemmed principally from an operating loss of \$18.3 million offset by non-cash charges including the \$2.4 million loss related to non-cash stock-based compensation charges, \$1.7 million related to loss on early extinguishment of debt, \$1.9 million restructuring charge, \$1.3 million in depreciation and amortization, \$0.7 million related to the write-off of a note receivable and \$0.7 million related to bad debt expense.

Investing activities

In the nine months ended September 30, 2004, cash used by investing activities was \$3.2 million, primarily due to net purchases of short-term marketable securities of \$3.0 million. Capital expenditures were \$ 0.2 million.

In the nine months ended September 30, 2003, cash used by investing activities was \$0.1 million. The decrease was primarily due to a net purchase of short-term marketable securities of \$0.1 million. Capital expenditures were \$0.4 million and the Company sourced cash from a reduction in Restricted cash.

Financing activities

In the nine months ended September 30, 2004, net cash provided by financing activities was \$3.9 million. This resulted from the issuance of 1.5 million shares of common stock to an institutional investor on March 17, 2004 for \$3.7 million. Proceeds from the exercise of stock options was \$0.3 million.

In the nine months ended September 30, 2003, net cash used by financing activities was \$0.5 million. This primarily resulted from the payment of costs associated with two financings completed on March 25 and March 26, 2003.

On December 31, 2002, the Company completed a private placement of convertible notes and warrants in which it issued to three institutional investors, 4.95% convertible notes having an aggregate principal amount of \$7.0 million, and warrants to purchase 0.7 million shares of Company common stock. The convertible notes were to mature on December 31, 2007, unless earlier converted into shares of Company common stock at a price of \$2.26 per share. The warrants expire on December 31, 2006, and are exercisable at a price of \$2.26 per share.

On March 25, 2003, the Company entered into Redemption, Amendment and Exchange Agreements with the three institutional investors with whom it had completed the private placement of convertible notes and warrants on December 31, 2002. The Company recorded a loss for the quarter ended September 30, 2003, on the early extinguishment of the original convertible notes in the amount of \$1.7 million of which \$0.7 related to the write-off of deferred loan costs. In conjunction with the extinguishment, the Company paid \$3.3 million, issued new convertible notes in the principal amount of \$2.7 million and issued \$1.4 million shares of its common stock with a market value of \$0.7 million. The difference between (i) the carrying value of the outstanding convertible notes exchanged and (ii) cash paid and the fair value of the common stock and new convertible notes issued, amounted to \$1.0 million and was included in the loss on early extinguishment of debt.

On March 26, 2003, Viewpoint Corporation entered into a Securities Purchase Agreement with three other accredited investors, pursuant to which it received \$3.5 million in exchange for an aggregate of \$3.5 million principal amount of 4.95% subordinated notes and 3,614,756 shares of Viewpoint common stock. The subordinated notes are scheduled to mature on March 31, 2006. Interest on these notes is payable quarterly in arrears in cash. The Company has the right at any time to redeem up to all of the outstanding notes at par plus accrued and unpaid interest.

The \$3.5 million of proceeds was allocated to subordinated notes, common stock, and additional paid in capital based on the market value of the Company's common stock on March 26, 2003. In accordance with the provisions of APB Opinion No. 21, the Company recorded a debt discount of \$2.0 million. Debt issuance costs, which amounted to \$0.2 million, were recorded as other assets in the Company's consolidated balance. The amortization of the discount on the subordinated notes and debt issue costs totaled \$0.1 million and \$0.3 million for the three and nine months ended September 30, 2004, respectively, were accounted for using the effective interest method.

Interest on the convertible notes was payable quarterly in arrears in cash or, at the option of the Company, in shares of Company common stock provided the Company satisfies certain financial and other conditions. The new convertible notes matured on December 31, 2007, unless earlier converted into shares of Company common stock. The conversion price of the first \$0.9 million tranche of notes is \$1.10. The conversion price of the second and third tranche of notes is \$1.00.

Each tranche of the notes was convertible at the Company's election at any time after May 20, 2004 if the dollar volume-weighted average price of Company common stock exceeds 150% of the conversion price applicable to the notes for any 25 consecutive trading days following April 15, 2004.

Pursuant to SFAS No. 133, the Company bifurcated the fair value of the conversion options from the new convertible notes since the conversion options were determined to not be clearly and closely related to the debt host. In addition, since the effective registration of the securities underlying the conversion options is an event outside of the control of the Company, pursuant to EITF Issue No. 00-19, the Company recorded the fair value of the conversion options as long-term liabilities, as it was assumed that the Company would be required to net-cash settle the underlying securities.

The Company recorded income or loss based on the decrease or increase, respectively, in the fair values of the new conversion options and original warrants in the Company's consolidated statements of operations. The amortization of discount on the new convertible notes and debt issue costs were accounted for using the effective interest method.

On March 17, 2004, one of the institutional investors holding the convertible notes converted \$0.9 million of outstanding notes for shares of the Company's common stock. In the first quarter of 2004, the Company recorded a loss of \$1.4 million related to the change in the fair value of the conversion feature from January 1, 2004 through the date of the conversion. For the three months ended March 31, 2004 the Company also recorded a loss related to a change in the fair value of the conversion feature and warrants of \$3.7 million and \$1.3 million, respectively.

In addition, on the same day as the conversion, the Company sold 1.5 million shares of common stock in a private placement to the institutional investor, for \$3.7 million or \$2.45 per share. The Company recorded a loss on conversion of debt in the amount of \$0.6 million, which represented the write-off of unamortized loan discount and debt issuance costs of \$0.1 million and the difference between the proceeds received from the private placement and the fair value of the common stock issued based upon the closing price of the Company's stock on the day of the sale of \$0.5 million. The remaining noteholders chose not to exercise their right to redeem their notes in amount up to 20% of the \$3.7 million received by the Company within 10 days of the Company's public announcement of the closing of the private placement.

During the period beginning on April 15, 2004 and May 20, 2004—a period which covered 25 consecutive trading days—the dollar volume-weighted average price of the Company's common stock exceeded 150% of the conversion price applicable to the outstanding convertible notes and the Company determined to exercise its right to convert the outstanding notes into shares of Company common stock. Accordingly, on May 20, 2004, the Company informed the institutional investors holding the outstanding convertible notes that it would exercise its right to convert that debt. On June 18, 2004, the Company completed the conversion of the remaining outstanding convertible notes of \$1.8 million and the related outstanding interest into 1.7 million shares of Viewpoint common stock. In the second quarter of 2004, the Company recorded a gain of \$2.3 million related to the change in the fair value of the conversion feature during the period from April 1, 2004 through September 18, 2004, the date of the conversion. The Company recorded a gain based on the change in the fair values of the original warrants of \$0.7 million, in the Company's consolidated statements of operations for the three months ended September 30, 2004.

In addition, the Company recorded a loss on conversion which represented the difference between the fair value of the common stock issued in exchange for the notes and the carrying value of the convertible notes on the date of conversion. This change was primarily comprised of the write-off of unamortized loan discount and debt issuance costs.

In November 2003, the Company sold 3.0 million shares of common stock in a private placement to Federal Partners, L.P., an affiliate of The Clark Estates, Inc. for \$2.5 million, or \$0.80 per share. The noteholders chose not to

exercise their right to redeem their notes in an amount up to 20% of the \$2.5 million received by the Company within 10 days of the Company's public announcement of the closing of the private placement.

In March 2004, the Company completed a private placement whereby it directly issued 1.5 million shares of common stock to an institutional investor who had participated in the March 2003 financing. The issuance was for an aggregate purchase price of \$3.7 million and did not require banking placement fees. Additionally, prior to the completion of the private placement the institutional investor exercised its right to convert approximately \$0.9

million of Viewpoint convertible debt it had acquired in March 2003 into shares of Viewpoint common stock. This conversion resulted in a non-cash loss on conversion of share of \$0.6 million.

In May 2004, 25 consecutive trading days following April 15, 2004 where the dollar volume-weighted average price of Company common stock exceeded 150% of the conversion price applicable to the notes, the Company exercised its right to convert the remaining outstanding convertible notes of \$1.8 million into shares of Viewpoint common stock. This conversion resulting in a non-cash gain of \$2.3 million related to the change in fair value of the conversion feature caused by the decrease in the Company's stock price. The Company also recognized a loss on conversion of \$0.2 million related to the undiscounted value of the note and the unamortized issuance cost.

In October 2003, the Company entered into an amended license agreement with AOL which provided for payments by AOL of \$10.0 million. The agreement contains multiple elements consisting of a perpetual broadcast license, a perpetual source code license, quarterly updates to the source code through December 2005, and maintenance and consulting services. The Company will recognize revenue from this agreement ratably, through December 31, 2005, which represents the duration of the Company's obligation for post-contract customer support including quarterly upgrades and maintenance requirements.

The Company implemented three restructuring plans in 2003. The first plan, implemented in February 2003, reduced operating expenses by closing the Company's Utah office and terminating 28 employees in that office who were primarily engaged in sales and marketing activities. In accordance with SFAS No. 146 Accounting for Costs Associated with Exit or Disposal Activities, the Company recorded restructuring charges of \$1.2 million on the income statement. The restructuring charges represent the fair value of remaining lease commitments reduced by estimated sublease rental income, employee severance and termination benefits, the write-off of the net book value of certain fixed assets used in the Utah office, and other miscellaneous charges. Subsequent to the restructuring, the Company re-evaluated market conditions surrounding its efforts to sub-lease the Utah office space and increased the restructuring charge by \$0.2 million related to the fair value of remaining lease commitments reduced by estimated sublease rental income. The Company believes that it may be necessary to adjust the estimate of sublease income in the future as the ability to sublease the property is contingent upon real estate and other market conditions in Utah.

The second plan was implemented in September 2003, and was designed to streamline the business. Under the plan the Company eliminated 24 research and development, sales and marketing, and general and administrative positions. The Company incurred a restructuring charge of \$0.4 million related to severance. The charge is recorded on the income statement as a restructuring charge. The second restructuring plan was completed by September 30, 2003.

The third plan was implemented in December 2003 and was designed to consolidate international operations to the New York office. Accordingly the Company closed the London, England office incurring a restructuring charge of \$0.1 million primarily related to severance. The charge is recorded on the income statement as a restructuring charge. The third restructuring plan was completed by December 31, 2003.

The Company has contingency plans for the remainder of 2004 and through 2005 if expected revenue targets are not achieved. These plans include further workforce reductions as well as reductions in overhead and capital expenditures. The Company may seek additional funds before that time through public or private equity financing or from other sources to fund operations and pursue a growth strategy. The Company has no commitment for additional financing, and may experience difficulty in obtaining additional financing on favorable terms, if at all. Any financing the Company obtains may contain covenants that restrict freedom to operate the business or may have rights, preferences or privileges senior to the Company's common stock and may dilute the current shareholders' ownership interest in Viewpoint.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company is subject to concentration of credit risk and interest rate risk related to cash, cash equivalents and marketable securities. Credit risk is managed by limiting the amount of securities placed with any one issuer, investing in high-quality marketable securities and securities of the U.S. government and limiting the average maturity of the overall portfolio. The majority of the Company's portfolio, which is classified as available-for-sale,

is comprised of fixed income securities that are subject to the risk of market interest rate fluctuations, and all of the Company's securities are subject to risks associated with the ability of the issuers to perform their obligations under the instruments. The Company may suffer losses in principal if forced to sell securities, which have declined in market value due to changes in interest rates.

Item 4. Controls and Procedures

The Sarbanes-Oxley Act of 2002 (SOX) and specifically Section 404 of SOX (Section 404) and subsequent rules as promulgated by the Securities and Exchange Commission (SEC) have created requirements for management's periodic assessment of the Company's effectiveness of our internal controls over financial reporting as of the end of the fiscal year and whether or not our internal control over financial reporting is effective. This assessment must include disclosure of any material weaknesses in our internal control over financial reporting identified by management.

The Company remains committed to conducting a thorough review of its internal controls as part of the Company's preparation for compliance with the requirements of Section 404. In addition, it has made a significant investment in resources and time in support of the Section 404 activities and is committed to maintaining a strong internal control environment.

If our management identifies one or more material weaknesses in our internal control over financial reporting, we will be unable to assert that our internal control is effective. If we are unable to assert that our internal control over financial reporting is effective, this may impact the reliability of our internal controls over financial reporting until such time as the proper controls can be implemented.

Although we are undertaking substantial efforts with regard to the assessment of internal controls as required by Section 404, our evaluation of internal controls may not be completed in time for our external auditors to complete their assessment in a timely basis. If this were to occur, we may be unable to assert that the internal controls over financial reporting are effective, or our independent registered public accountants may not be able to render the required attestation concerning our effectiveness of the internal controls over financial reporting in a timely manner.

Our management, including the Chief Executive Officer and the Chief Financial Officer, conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, pursuant to Exchange Act Rule 13a-15(e) and 15d-15(e) as of September 30, 2004. Based on that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that our disclosure controls and procedures are effective in ensuring that all material information required to be disclosed in this quarterly report has been made known to them in a timely fashion and no changes are required at this time.

In connection with the evaluation by our management, including the Chief Executive Officer and Chief Financial Officer, of our internal control over financial reporting, no changes during the quarter ended September 30, 2004 were identified that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

PART II OTHER INFORMATION**Item 4. Submission of Matters to a Vote of Security Holders**

The Annual Meeting of Stockholders of Viewpoint Corporation was held on August 5, 2004. A proposal to elect seven (7) members of the Board of Directors to serve for a one-year term expiring at the annual meeting of stockholders in 2005 was approved by the stockholders with the nominees receiving the following votes:

	For	Withheld
Jerry Amato	47,099,515	817,884
Thomas Bennett	47,063,883	853,516
James Crabbe	46,035,185	1,882,214
Stephen Duff	47,094,814	822,585
Samuel Jones	46,018,108	1,899,291
Dennis Raney	47,057,942	859,457
Robert Rice	44,642,432	3,274,967

Stockholders also approved a proposed amendment to the Company's certificate of incorporation increasing the authorized shares of common stock from 75,000,000 shares to 100,000,000 shares. This proposal received 44,983,856 votes in favor and 2,882,471 against, with 51,702 abstaining.

Finally, stockholders ratified the appointment of PricewaterhouseCoopers LLP as independent public accountants of the Company for the 2004 fiscal year. This proposal received 44,776,643 votes in favor and 2,771,047 against, with 369,709 abstaining.

Item 6. Exhibits and Reports on Form 8-K

(a) Exhibits

<u>Exhibit Number</u>	<u>Exhibit Title</u>
31.1	Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
31.2	Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
32.1	Certification Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

(b) Reports on Form 8-K

On October 26, 2004, the Registrant filed a report on Form 8-K reporting that the Board of Directors of Viewpoint Corporation elected Patrick Vogt to the Board effective October 26, 2004.

The Company filed a report on Form 8-K on November 15, 2004, to furnish its press release concerning its results of operations for the quarterly period ending on June 30, 2004.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
