SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

Various statements in this Form 10-K or incorporated by reference into this Form 10-K, in future filings by us with the Securities and Exchange Commission (the "SEC"), in our press releases and in oral statements made by or with the approval of authorized personnel constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are based on current expectations and are indicated by words or phrases such as anticipate, estimate, expect, project, we believe, is or remains optimistic, currently and similar words or phrases and involve known and unknown risks, uncertainties and other factors which may cause actual results, performance or achievements to be materially different from the future results, performance or achievements expressed in or implied by such forward-looking statements. Forward-looking statements include statements regarding, among other items:

- our anticipated growth strategies;
- our plans to expand internationally;
- our plans to open new retail stores;
- our ability to make certain strategic acquisitions of certain selected licenses held by our licensees;
- our intention to introduce new products or enter into new alliances;
- anticipated effective tax rates in future years;
- future expenditures for capital projects;
- our ability to continue to pay dividends and repurchase Class A common stock;
- our ability to continue to maintain our brand image and reputation;
- our ability to continue to initiate cost cutting efforts and improve profitability; and
- our efforts to improve the efficiency of our distribution system.

These forward-looking statements are based largely on our expectations and judgments and are subject to a number of risks and uncertainties, many of which are unforeseeable and beyond our control. A detailed discussion of significant risk factors that have the potential to cause our actual results to differ materially from our expectations is described in this Form 10-K under the heading of "Risk Factors." We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

WEBSITE ACCESS TO COMPANY REPORTS

Our investor website is <http://investor.ralphlauren.com>. We were incorporated in June 1997 under the laws of the State of Delaware. Our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to those reports filed with or furnished to the SEC pursuant to Section 13(a) or Section 15(d) of the Securities Exchange Act of 1934 are available at our investor website under the caption "SEC Filings" promptly after we electronically file such materials with or furnish such materials to the SEC. Information relating to corporate governance at Polo Ralph Lauren Corporation, including our Corporate Governance Policies, our Code of Business

Edgar Filing: POLO RALPH LAUREN CORP - Form 10-K

Conduct and Ethics for all directors, officers, and employees, our Code of Ethics for Principal Executive Officers and Senior Financial Officers, and information concerning our directors, Committees of the Board, including Committee charters, and transactions in Polo Ralph Lauren Corporation securities by directors and executive officers, is available at our website under the captions Corporate Governance and SEC Filings. Paper copies of these filings and corporate governance documents are available to stockholders without charge by written request to Investor Relations, Polo Ralph Lauren Corporation, 625 Madison Avenue, New York, New York 10022.

Table of Contents

In this Form 10-K, references to Polo, ourselves, we, our, us and the Company refer to Polo Ralph Lauren Corporation and its subsidiaries, unless the context indicates otherwise. Due to the collaborative and ongoing nature of our relationships with our licensees, such licensees are sometimes referred to in this Form 10-K as licensing alliances. Our fiscal year ends on the Saturday nearest to March 31. All references to Fiscal 2008 represent the 52-week fiscal year ended March 29, 2008. All references to Fiscal 2007 represent the 52-week fiscal year ended March 31, 2007. All references to Fiscal 2006 represent the 52-week fiscal year ended April 1, 2006.

PART I**Item 1. Business****General**

Polo Ralph Lauren Corporation, founded in 1967 by Ralph Lauren, is a global leader in the design, marketing and distribution of premium lifestyle products, including men's, women's and children's apparel, accessories, fragrances and home furnishings. We believe that our global reach, breadth of product and multi-channel distribution is unique among luxury and apparel companies. We operate in three distinct but integrated segments: Wholesale, Retail and Licensing. During the past several years, we have continued to develop our business model, expand our vertically integrated Retail segment, reposition our Wholesale segment, and maintain a strong Licensing segment despite the strategic acquisition of several of our key licensed businesses. The following tables show our net revenues and operating profit (excluding unallocated corporate expenses and legal and restructuring charges) by segment for the last three fiscal years:

	Fiscal Years Ended		
	March 29, 2008	March 31, 2007	April 1, 2006
	(millions)		
Net revenues:			
Wholesale	\$ 2,758.1	\$ 2,315.9	\$ 1,942.5
Retail	1,912.6	1,743.2	1,558.6
Licensing	209.4	236.3	245.2
Total net revenues	\$ 4,880.1	\$ 4,295.4	\$ 3,746.3

	Fiscal Years Ended		
	March 29, 2008	March 31, 2007	April 1, 2006
	(millions)		
Operating income:			
Wholesale	\$ 565.4	\$ 477.8	\$ 398.3
Retail	204.2	224.2	140.0
Licensing	96.7	141.6	153.5
	866.3	843.6	691.8

Edgar Filing: POLO RALPH LAUREN CORP - Form 10-K

Less:			
Unallocated corporate expenses	(217.0)	(183.4)	(159.1)
Unallocated legal and restructuring charges	4.1	(7.6)	(16.1)
Total operating income	\$ 653.4	\$ 652.6	\$ 516.6

Our net revenues by geographic region for the last three fiscal years are shown in the tables below. Note 20 to our accompanying audited consolidated financial statements included in this Annual Report on Form 10-K contains additional segment and geographic area information.

Table of Contents

	Fiscal Years Ended		
	March 29, 2008	March 31, 2007 (millions)	April 1, 2006
Net revenues:			
United States and Canada	\$ 3,653.1	\$ 3,452.2	\$ 3,032.3
Europe	944.7	767.9	627.7
Japan	272.4	64.6	44.3
Other regions	9.9	10.7	42.0
Total net revenues	\$ 4,880.1	\$ 4,295.4	\$ 3,746.3

Over the past five fiscal years, our sales have grown to \$4.880 billion in Fiscal 2008 from \$2.650 billion in Fiscal 2004. This growth has been largely a result of both our acquisitions and organic growth. We have diversified our business by channels of distribution, price point and target consumer, as well as by geography. Our global reach is one of the broadest in the apparel industry, with merchandise available at approximately 10,800 different retail locations worldwide. In addition to our wholesale distribution, we sell directly to customers throughout the world via 313 full-price and factory retail stores and our e-commerce website, RalphLauren.com.

We continue to invest in our business. In the past five fiscal years, we have invested approximately \$1.9 billion for the acquisition of several key licensed businesses and capital improvements, primarily through strong operating cash flow. In addition, during Fiscal 2008 we launched *American Living*, a new lifestyle brand created exclusively in the U.S. for distribution by J.C. Penney Company, Inc. (JCPenney). We intend to continue to execute our long-term strategy of expanding our accessories and other product offerings, growing our specialty retail store base, and expanding our presence internationally. See Item 7 *Overview Our Objectives and Risks* for further discussion of the Company's long-term strategy.

We have been controlled by the Lauren family since the founding of our Company. As of March 29, 2008, Mr. Ralph Lauren, or entities controlled by Mr. Ralph Lauren, owned approximately 87% of the voting power of the outstanding common stock of the Company.

Seasonality of Business

Our business is affected by seasonal trends, with greater Wholesale segment sales in our second and fourth quarters and greater Retail segment sales in our second and third quarters. These trends result primarily from the timing of seasonal wholesale shipments and key vacation travel, back-to-school and holiday shopping periods in the Retail segment. As a result of the growth in our retail operations and other changes in our business, historical quarterly operating trends and working capital requirements may not be indicative of future performances. In addition, fluctuations in sales and operating income in any fiscal quarter may be affected by, among other things, the timing of seasonal wholesale shipments and other events affecting retail sales.

Working capital requirements vary throughout the year. Working capital increases during the first half of the fiscal year as inventory builds to support peak shipping periods and, accordingly, decreases during the second half of the fiscal year as inventory is shipped. Cash provided by operating activities is typically higher in the second half of the fiscal year due to higher net income and reduced working capital requirements during that period.

Recent Developments

Japanese Business Acquisitions

On May 29, 2007, the Company completed its previously announced transactions to acquire control of certain of its Japanese businesses that were formerly conducted under licensed arrangements, consistent with the Company's long-term strategy of international expansion. In particular, the Company acquired approximately 77% of the outstanding shares of Impact 21 Co., Ltd. (Impact 21) that it did not previously own in a cash tender offer (the Impact 21 Acquisition), thereby increasing its ownership in Impact 21 from approximately 20% to

3

Table of Contents

approximately 97%. Impact 21 conducts the Company's men's, women's and jeans apparel and accessories business in Japan under a pre-existing, sub-license arrangement. In addition, the Company acquired the remaining 50% interest in Polo Ralph Lauren Japan Corporation (PRL Japan), which holds the master license to conduct Polo's business in Japan, from Onward Kashiwama and Seibu (the PRL Japan Minority Interest Acquisition). Collectively, the Impact 21 Acquisition and the PRL Japan Minority Interest Acquisition are herein referred to as the Japanese Business Acquisitions.

The purchase price initially paid in connection with the Japanese Business Acquisitions was approximately \$360 million, including transaction costs of approximately \$12 million. In January 2008, at an Impact 21 shareholders meeting, the Company obtained the necessary approvals to complete the process of acquiring the remaining approximately 3% of outstanding shares not exchanged as of the close of the tender offer period (the minority squeeze-out). In February 2008, the Company acquired approximately 1% of the remaining Impact 21 shares outstanding at an aggregate cost of \$5 million. The Company expects the minority squeeze-out to be successfully concluded in the first quarter of Fiscal 2009, at an estimated aggregate cost of \$9 million.

The Company funded the Japanese Business Acquisitions with available cash on-hand and ¥20.5 billion of borrowings under a one-year term loan agreement pursuant to an amendment and restatement to the Company's existing credit facility. The Company repaid the borrowing by its maturity date on May 22, 2008 using approximately \$200 million of Impact 21's cash on-hand acquired as part of the acquisition.

The results of operations for Impact 21, which were previously accounted for using the equity method of accounting, have been consolidated in the Company's results of operations commencing April 1, 2007. Accordingly, the Company recorded within minority interest expense the amount of Impact 21's net income allocable to the holders of the approximate 80% of the Impact 21 shares not owned by the Company prior to the closing date of the tender offer. The results of operations for PRL Japan have already been consolidated by the Company as described further in Note 2 to the accompanying audited consolidated financial statements.

American Living

In Fiscal 2008, the Company launched *American Living*, a new lifestyle brand created exclusively in the U.S. for distribution by JCPenney through the Company's new Global Brand Concepts (GBC) group. The Company began shipping related product to JCPenney in December 2007 to support the launch of this new product line. The success of *American Living* and the introduction of new product categories in both the U.S. and overseas may be negatively impacted in Fiscal 2009 by ongoing economic uncertainty. See Item 7 *Overview Global Economic Uncertainty* for further discussion.

Other Developments

In late Fiscal 2007, the Company formed the Ralph Lauren Watch and Jewelry Company, S.A.R.L. (the RL Watch Company), a joint venture with Financiere Richemont SA (Richemont), the Swiss Luxury Goods Group. The Company began to incur certain start-up costs in Fiscal 2008 to support the launch of this business, which is expected to occur in the spring of calendar 2009.

Our Brands and Products

Since 1967, our distinctive brand image has been consistently developed across an expanding number of products, price tiers and markets. Our brands, which include apparel, accessories and fragrance collections for men and women as well as childrenswear and home furnishings, comprise one of the world's most widely recognized families of consumer brands. Reflecting a distinctive American perspective, we have been an innovator in aspirational lifestyle

branding and believe that, under the direction of internationally renowned designer Ralph Lauren, we have had a considerable influence on the way people dress and the way that fashion is advertised throughout the world. We combine consumer insight with our design, marketing and imaging skills to offer, along with our licensing alliances, broad lifestyle product collections with a unified vision:

Apparel Products include extensive collections of men's, women's and children's clothing;

Table of Contents

Accessories Products encompass a broad range, including footwear, eyewear, jewelry, hats, belts and leathersgoods, including handbags and luggage;

Home Coordinated products for the home include bedding and bath products, furniture, fabric and wallpaper, paint, tabletop and giftware; and

Fragrance Fragrance products are sold under our Glamourous, Romance, Polo, Lauren, Safari, Ralph and Black Label brands, among others.

Our lifestyle brand image is reinforced by our RalphLauren.com internet site, which averaged 2.6 million unique visitors a month and acquired approximately 290,000 new customers during Fiscal 2008 resulting in 1.3 million customers in total.

Ralph Lauren Purple Label

A contemporary take on traditional bespoke tailoring, Ralph Lauren Purple Label is the ultimate expression of modern elegance for men. From precisely tailored made-to-measure suits to sophisticated sportswear, Purple Label reflects an impeccable sense of the dashing and refined, fashioned from exclusive, limited-edition fabrics of the highest quality and expertly crafted in the spirit of Savile Row tailoring. Purple Label also offers made-to-order dress furnishings, accessories, luggage and benchmade footwear, as well as hand monogramming and custom engraving services. Ralph Lauren Purple Label competes with the finest men's hand-tailored clothing lines. Ralph Lauren Purple Label is available primarily in Ralph Lauren stores, but is also available through specialty stores, fine department stores and online at RalphLauren.com.

Ralph Lauren Black Label for Men

Reflecting a sharp, modern attitude, Ralph Lauren Black Label is the essence of sophisticated dressing for men. Featuring razor-sharp tailoring and dramatically lean silhouettes, classic suitings and sportswear are infused with a savvy attitude for a look that is at once modern and timeless. Iconic yet fresh, Ralph Lauren Black Label represents a new chapter in men's style. Black Label creates a niche among the finest contemporary tailored clothing lines. Black Label is available in Ralph Lauren stores, limited selection of specialty stores and better department stores and online at RalphLauren.com.

Polo by Ralph Lauren

Classic and authentic, Polo by Ralph Lauren is the foundation of the world of Ralph Lauren menswear, combining the time-honored aesthetic of East Coast Ivy League casual style with proper English refinement. Polo is an original symbol of the preppy lifestyle. The iconic polo player logo is recognized worldwide as a symbol of heritage and authenticity. From classic favorites such as oxford shirts and chino pants to modern collections that combine heritage preppy with a chic, downtown feel, Polo sets the standard for a well-worn look with an aspirational sensibility, creating a comprehensive line of sportswear, tailored clothing and accessories to fulfill a man's every wardrobe need. Polo leads the industry of fine men's sportswear brands. Polo is available in Ralph Lauren stores, department stores, specialty stores and elsewhere online at Bloomingdales.com and RalphLauren.com.

Lauren for Men

Created to broaden the reach of the Ralph Lauren men's statement, Lauren for Men conveys a spirit of tradition while recalling the sophistication of Polo Ralph Lauren menswear. Classic and perfectly polished, the Lauren men's line

includes suits, sport coats, dress pants, tuxedos, outerwear and rental formalwear. This comprehensive line competes with other men's designer fashion lines. Lauren for Men is available at better department stores.

Ralph by Ralph Lauren

The Ralph by Ralph Lauren collection features suits, sport coats, dress trousers and suit vests designed with the classic style and fine fabrics for which Ralph Lauren is known. Refined construction details—all hallmarks of better men's suitings—and a range of timeless patterns and colors establish Ralph by Ralph Lauren as a strong foundation for the modern man's wardrobe. Ralph by Ralph Lauren is available exclusively at Dillard's stores.

Table of Contents

Ralph Lauren Collection

The crown jewel of Ralph Lauren womenswear, Collection makes its dramatic first appearance each season on the runways of New York, providing the fashion world with the season's definitive Ralph Lauren style statement. Embodying glamour and sophistication, Collection's distinctive couture sensibility is expressed through modern yet timeless silhouettes expertly crafted from the finest luxury fabrics reflecting the epitome of bold femininity and rarefied chic as expressed by Ralph Lauren. Ralph Lauren Collection competes with the finest designer collections found in Paris, Milan and New York. Ralph Lauren Collection is sold primarily in Ralph Lauren stores. Select pieces are also available through specialty stores, the finest department stores and online at RalphLauren.com.

Ralph Lauren Black Label for Women

Sophisticated and classic with a modern edge, Black Label translates the luxurious spirit of Ralph Lauren Collection into a distinctive, timeless collection of icons for town, country, day and evening. Created from the finest materials, Black Label silhouettes elegant and striking are the cornerstones of the Ralph Lauren woman's wardrobe. Black Label competes with the finest women's collections the gold tier of wholesale brands. Black Label is offered primarily in Ralph Lauren stores. Select pieces are also available in designer boutiques, fine specialty stores, better department stores and online at RalphLauren.com.

Ralph Lauren Blue Label

Fresh and eclectic with a sexy, youthful spirit, Blue Label embodies the Ralph Lauren sensibility through heritage looks with a chic, modern twist. Whether reflecting Ivy League-inspired style, a modern take on proper English refinement or a feminine translation of the rugged spirit of the American West, Blue Label creates a mix of style that is eclectic, timeless and unmistakably Ralph Lauren. Blue Label occupies a niche in the women's sportswear market. Blue Label is offered primarily through Ralph Lauren stores and online at RalphLauren.com.

Lauren by Ralph Lauren

Created to broaden the reach of the Ralph Lauren women's statement, Lauren conveys a spirit of heritage and tradition while recalling the sophisticated luxury of Black Label. Timeless and perfectly polished, Lauren suits, sportswear and outerwear provide ideal combinations for every occasion, while Lauren Active infuses a country club sensibility into practical sports apparel, creating fashionable wardrobe solutions for golf, tennis, yoga or weekend wear. Lauren competes with other designer fashion lines and is sold in department stores in the U.S. and Canada and online at RalphLauren.com.

Pink Pony

Established in 2000, Pink Pony is Polo Ralph Lauren's initiative in the fight against cancer. With a focus on breast cancer, Pink Pony supports programs for early diagnosis, education, treatment and research, and is dedicated to bringing patient navigation and quality cancer care to medically underserved communities. A portion of sales from Pink Pony products benefits the Pink Pony Fund. Pink Pony apparel consists of feminine, slim-fitting women's sportswear items and accessories crafted in luxurious fabrics. Hooded sweatshirts, cotton mesh polos, canvas tote bags and cashmere yoga pants all feature our iconic pink Polo Player—a symbol of our commitment to the fight against cancer. Pink Pony is available at select Ralph Lauren stores and online at RalphLauren.com. To learn more about Pink Pony and Polo Ralph Lauren's other philanthropic efforts, please visit the PRL Foundation section of RalphLauren.com.

RRL

Embodying the cool rugged spirit of classic Western Americana, RRL is inspired by an authentic sensibility, providing distinctive designs and a selection of vintage pieces for men and women. From weathered blue jeans, distressed leather jackets and Western shirts to one-of-a-kind belts and cowboy boots, RRL evokes the bohemian freedom of the frontier borderlands — distinctively Ralph Lauren, distinctly American. RRL competes with a wide range of new and vintage clothing lines that pique the interest of collectors of unique American style. RRL is available at select Ralph Lauren stores and freestanding RRL stores.

Table of Contents

RLX

Created to answer the demands of dedicated athletes for superior high-performance outfitting, RLX provides gear that unites the highest standards of quality, design and technology. The result is a line of cutting edge athletic fashion with an unmistakable respect for both functionality and style. Utilizing a network of alliances among the RLX design team, world-class athletes and makers of the most innovative fabrics available, RLX helps athletes overcome the challenges encountered in disciplines as varied as wintersports, tennis, golf, sailing and cycling. Chaps

Rooted in the rich heritage of Polo Ralph Lauren, Chaps is a premier lifestyle brand that translates the timeless style of Polo into an accessible line of sportswear and accessories for men, women, children and the home. A complete American lifestyle collection, Chaps offers a world of classic, authentic style in the spirit of Ralph Lauren. The Chaps men's collection is available at select department and specialty stores. The Chaps collections for women, children and the home are available exclusively at Kohls and Kohls.com.

Table of Contents**Global Brand Concepts*****American Living***

American Living is the first brand developed under the new Global Brand Concepts group. American Living is a full lifestyle brand, featuring menswear, womenswear, childrenswear, accessories and home furnishings with a focus on timeless, authentic American classics for every day. American Living is available exclusively at JCPenney in the U.S. and online at JCP.com.

Our Wholesale Segment

Our Wholesale segment sells our products to leading upscale and certain mid-tier department stores, specialty stores and golf and pro shops, both domestically and internationally. We have focused on elevating our brand and improving productivity by reducing the number of unproductive doors within department stores in which our products are sold, improving in-store product assortment and presentation, and improving full-price sell-throughs to consumers. As of March 29, 2008, the end of Fiscal 2008, our products were sold through 10,806 doors worldwide, and during Fiscal 2008, we invested approximately \$49 million in shop-within-shops dedicated to our products primarily in domestic and international department stores. We have also effected selective price increases on basic products and introduced new fashion offerings at higher price points.

Department stores are our major wholesale customers in North America. In Europe, our wholesale sales are a varying mix of sales to both department stores and specialty shops, depending on the country. Our collection brands Women's Ralph Lauren Collection and Black Label and Men's Purple Label Collection and Black Label are distributed through a limited number of premier fashion retailers. In addition, we sell excess and out-of-season products through secondary distribution channels, including our retail factory stores.

In Japan, our products are distributed primarily through shop-within-shops at premiere department stores. The mix of business is weighted to Polo Ralph Lauren in Men's and Women's Blue Label. The distribution of Men's and Women's Black Label is also expanding through shop-within-shop presentations in top tier department stores across Japan.

Worldwide Distribution Channels

The following table presents the approximate number of doors by geographic location, in which products distributed by our Wholesale segment were sold to consumers as of March 29, 2008:

Location	Number of Doors^(a)
United States and Canada	8,611
Europe	2,075
Japan	120
Total	10,806

^(a) In Asia/Pacific (excluding Japan), our products are distributed by our licensing partners.

The following department store chains were wholesale customers whose purchases represented more than 10% of our worldwide wholesale net sales for the year ended March 29, 2008:

Macy's, Inc. (formerly known as Federated Department Stores, Inc.), which represented approximately 24%; and

Dillard Department Stores, Inc., which represented approximately 12%.

Our product brands are sold primarily through their own sales forces. Our Wholesale segment maintains their primary showrooms in New York City. In addition, we maintain regional showrooms in Atlanta, Chicago, Dallas, Los Angeles, Milan, Paris, London, Munich, Madrid and Stockholm.

Table of Contents

Shop-within-Shops. As a critical element of our distribution to department stores, we and our licensing partners utilize shop-within-shops to enhance brand recognition, to permit more complete merchandising of our lines by the department stores and to differentiate the presentation of products. Shop-within-shops fixed assets primarily include items such as customized freestanding fixtures, wall cases and components, decorative items and flooring.

As of March 29, 2008, we had approximately 10,800 shop-within-shops dedicated to our wholesale products worldwide and our licensing partners had over 460 shop-within-shops. During Fiscal 2008, we added approximately 500 shop-within-shops, net. Excluding significantly larger shop-within-shops in key department store locations, the size of our shop-within-shops typically ranges from approximately 200 to 6,000 square feet. We share in the cost of these shop-within-shops.

Basic Stock Replenishment Program. Basic products such as knit shirts, chino pants and oxford cloth shirts can be ordered at any time through our basic stock replenishment programs. We generally ship these products within three-to-five days of order receipt. These products accounted for approximately 6% of our wholesale net sales in Fiscal 2008.

Our Retail Segment

As of March 29, 2008, our Retail segment consisted of 155 full-price retail stores and 158 factory stores worldwide, totaling approximately 2.4 million square feet. The expansion of our full-price retail store base is a primary long-term strategic goal. We opened 8 new full-price stores, net, in Fiscal 2008 and currently anticipate opening between 10 and 15 full-price stores in Fiscal 2009. Our retail operating income as a percentage of retail net revenues increased from 4.8% in Fiscal 2004 to 10.7% in Fiscal 2008, reflecting improvements in productivity, gross margins, and full-margin sell-through rates. Our full-price retail stores reinforce the luxury image and distinct sensibility of our brands and feature exclusive lines that are not sold in domestic department stores: Blue Label for Women and Black Label for Men. We operated the following full-price retail stores as of March 29, 2008:

Full-Price Retail Stores

Location	Ralph Lauren	Club Monaco	Rugby	Total
United States and Canada	59	65	10	134
Europe	16			16
Japan	2			2
Latin America	3			3
Total	80	65	10	155

Ralph Lauren stores feature the full-breadth of the Ralph Lauren apparel, accessory and home product assortments in an atmosphere reflecting the distinctive attitude and luxury positioning of the Ralph Lauren brand. Our nine flagship Ralph Lauren stores showcase our upper-end luxury styles and products and demonstrate our most refined merchandising techniques.

Club Monaco stores feature updated fashion apparel and accessories for both men and women. The brand's clean and updated classic signature style forms the foundation of a modern wardrobe.

Rugby is a vertical retail format featuring an aspirational lifestyle collection of apparel and accessories for men and women. The brand is characterized by a youthful, preppy attitude which resonates throughout the line and the store experience.

In addition to generating sales of our products, our worldwide full-price stores set, reinforce and capitalize on the image of our brands. Our stores range in size from approximately 600 to over 37,500 square feet. These full-price stores are situated in major upscale street locations and upscale regional malls, generally in large urban markets. We generally lease our stores for initial periods ranging from 5 to 10 years with renewal options.

Table of Contents

We extend our reach to additional consumer groups through our 158 Polo Ralph Lauren factory stores worldwide. During Fiscal 2008, we added 13 new Polo Ralph Lauren factory stores, net. Our factory stores are generally located in outlet malls. We operated the following factory retail stores as of March 29, 2008:

Factory Retail Stores

Location	Ralph Lauren
United States and Canada	132
Europe	22
Japan	4
Total	158

Polo Ralph Lauren factory stores offer selections of our menswear, womenswear, children's apparel, accessories, home furnishings and fragrances. Ranging in size from approximately 2,000 to 33,000 square feet, with an average of approximately 8,600 square feet, these stores are principally located in major outlet centers in 36 states and Puerto Rico.

European factory stores offer selections of our menswear, womenswear, children's apparel, accessories, home furnishings and fragrances. Ranging in size from approximately 2,400 to 13,200 square feet, with an average of approximately 6,700 square feet, these stores are located in 7 countries, principally in major outlet centers.

Factory stores obtain products from our retail stores, our product licensing partners and our suppliers.

RalphLauren.com

In addition to our stores, our Retail segment sells Ralph Lauren products online through our e-commerce website, RalphLauren.com (<http://www.RalphLauren.com>). RalphLauren.com offers our customers access to the full breadth of Ralph Lauren apparel, accessories and home products, allows us to reach retail customers on a multi-channel basis and reinforces the luxury image of our brands. RalphLauren.com averaged 2.6 million unique visitors a month and acquired approximately 290,000 new customers, resulting in 1.3 million total customers in Fiscal 2008.

RalphLauren.com is owned and operated by Ralph Lauren Media, LLC (*RL Media*). We acquired the remaining 50% equity interest in RL Media, formerly held by NBC-Lauren Media Holdings, Inc., a subsidiary wholly owned by the National Broadcasting Company, Inc. (37.5%) and Value Vision Media, Inc. (*Value Vision*) (12.5%) (the *RL Media Minority Interest Acquisition*), in late Fiscal 2007.

Our Licensing Segment

Through licensing alliances, we combine our consumer insight, design, and marketing skills with the specific product or geographic competencies of our licensing partners to create and build new businesses. We generally seek out licensing partners who:

are leaders in their respective markets;

contribute the majority of the product development costs;

provide the operational infrastructure required to support the business; and

own the inventory.

We grant our product licensees the right to manufacture and sell at wholesale specified categories of products under one or more of our trademarks. We grant our international geographic area licensing partners exclusive rights to distribute certain brands or classes of our products and operate retail stores in specific international territories. These geographic area licensees source products from us, our product licensing partners and independent sources. Each licensing partner pays us royalties based upon its sales of our products, generally subject to a minimum royalty requirement for the right to use the Company's trademarks and design services. In addition, licensing partners may be required to allocate a portion of their revenues to advertise our products and share in the creative costs associated

Table of Contents

with these products. Larger allocations are required in connection with launches of new products or in new territories. Our licenses generally have 3 to 5-year terms and may grant the licensee conditional renewal options.

We work closely with our licensing partners to ensure that their products are developed, marketed and distributed so as to reach the intended market opportunity and to present consistently to consumers worldwide the distinctive perspective and lifestyle associated with our brands. Virtually all aspects of the design, production quality, packaging, merchandising, distribution, advertising and promotion of Ralph Lauren products are subject to our prior approval and continuing oversight. The result is a consistent identity for Ralph Lauren products across product categories and international markets.

Approximately 16% of our licensing revenue for Fiscal 2008 was derived from two product licensing partners: WestPoint Home, Inc. (8%) and Peerless, Inc. (8%).

Product Licenses

The following table lists our principal product licensing agreements for men's and women's sportswear, men's tailored clothing, intimate apparel, accessories and fragrances as of March 29, 2008. The products offered by these licensing partners are listed below. Except as noted in the table, these product licenses cover the U.S. or North America only.

Licensing Partner	Licensed Product Category
L'Oréal S.A./Cosmair, Inc. (global)	Men's and Women's Fragrances, Cosmetics, Color and Skin Care Products
Peerless, Inc.	Men's, Chaps, Lauren, Ralph, and American Living Tailored Clothing
Hanes Brands (formerly Sara Lee Corporation)	Men's Polo Ralph Lauren Underwear and Sleepwear
Luxottica Group, S.p.A	Eyewear
The Warnaco Group, Inc.	Men's Chaps Sportswear

International Licenses

We believe that international markets offer additional opportunities for our quintessential American designs and lifestyle image. We work with our international licensing partners to facilitate international growth in their respective territories. International expansion/growth opportunities may include:

- the roll out of new products and brands following their launch in the U.S.;
- the introduction of additional product lines;
- the entrance into new international markets;
- the addition of Ralph Lauren or Polo Ralph Lauren stores in these markets; and
- the expansion and upgrade of shop-in-shop networks in these markets.

Table of Contents

The following table identifies our principal international area licensing partners (excluding Ralph Lauren Home licensees) for Fiscal 2008:

Licensing Partner	Territory
Oroton Group/PRL Australia	Australia and New Zealand
Doosan Corporation	Korea
P.R.L. Enterprises, S.A.	Panama, Aruba, Curacao, The Cayman Islands, Costa Rica, Nicaragua, Honduras, El Salvador, Guatemala, Belize, Colombia, Ecuador, Bolivia, Peru, Antigua, Barbados, Bonaire, Dominican Republic, St. Lucia, Trinidad and Tobago
Dickson Concepts/PRL Hong Kong	Hong Kong, China, Philippines, Malaysia, Singapore, Taiwan and Thailand
Naigai Co., Ltd	Japan

Our international licensing partners acquire the right to sell, promote, market and/or distribute various categories of our products in a given geographic area. These rights may include the right to own and operate retail stores. The economic arrangements are similar to those of our product licensing partners. We design licensed products either alone or in collaboration with our domestic licensing partners. Our product licensees whose territories do not include the international geographic area licensees' territories generally provide our international licensing partners with product or patterns, piece goods, manufacturing locations and other information and assistance necessary to achieve product uniformity, for which they are often compensated.

As of March 29, 2008, our international licensing partners operated 99 Ralph Lauren stores and 49 Club Monaco stores and dedicated shops.

Ralph Lauren Home

Together with our licensing partners, we offer an extensive collection of home products that draw upon and further the design themes of our other product lines, contributing to our complete lifestyle concept. Products are sold under the *Ralph Lauren Home*, *Lauren Ralph Lauren*, *Chaps* and *American Living* brands in three primary categories: bedding and bath, home décor and home improvement. As of March 29, 2008, we had agreements with 10 domestic and 2 international home product licensing partners and one international home product sublicensing partner.

We perform a broader range of services for our Ralph Lauren Home licensing partners than we do for our other licensing partners. These services include design, operating showrooms, marketing, advertising and, in some cases, sales. In general, the licensing partners manufacture and own the inventory, and ship the products. Our Ralph Lauren Home licensing alliances generally have 3 to 5-year terms and may grant the licensee conditional renewal options.

Ralph Lauren Home products are positioned at the upper tiers of their respective markets and are offered at a range of price levels. These products are generally distributed through several channels of distribution, including department stores, specialty home furnishings stores, interior design showrooms, customer direct mail catalogs, home centers and the Internet, as well as our own stores. As with our other products, the use of shop-within-shops is central to our department store distribution strategy.

Table of Contents

The *Ralph Lauren Home*, *Lauren Ralph Lauren*, *Chaps* and *American Living* home products offered by us and our product licensing partners are:

Category	Product	Licensing Partner
Bedding and Bath	Sheets, bedding accessories, towels and shower curtains, blankets, down comforters, other decorative bedding and accessories Bath rugs	WestPoint Home, Inc. Fremaux-Delorme, Ichida, Kohl's Department Stores, Inc., JC Penney Corp., Inc. Bacova Guild, Ltd.
Home Décor	Fabric and wallpaper Furniture Tabletop and giftware, table linens, placemats, tablecloths and napkins	P. Kaufmann, Inc. Designers Guild Ltd. HDM Furniture Industries, Inc. American Commercial, Inc., JC Penney Corp., Inc., Town & Country Linen Corp., Kohl's Department Stores, Inc. JC Penney Corp., Inc.
Home Improvement	Window, luggage Interior paints and stains and broadloom carpets	The Glidden Company, Karastan, a division of Mohawk Carpet Corporation

WestPoint Home, Inc. offers a basic stock replenishment program that includes bath and bedding products, and accounted for approximately 62% of the net sales of Ralph Lauren Home products and approximately 43% of total Ralph Lauren Home licensing revenue in Fiscal 2008.

Product Design

Our products reflect a timeless and innovative interpretation of American style with a strong international appeal. Our consistent emphasis on new and distinctive design has been an important contributor to the prominence, strength and reputation of the Ralph Lauren brands.

All Ralph Lauren products are designed by, or under the direction of, Ralph Lauren and our design staff, which is divided into nine departments: Menswear, Women's Collection, Women's Ready to Wear, Dresses, Children's, Accessories, Home, Club Monaco and Rugby. We form design teams around our brands and product categories to develop concepts, themes and products for each brand and category. Through close collaboration with merchandising, sales and production staff, these teams support all three segments of our business—Wholesale, Retail and Licensing—in order to gain market and other valuable input.

Marketing and Advertising

Our marketing program communicates the themes and images of our brands and is an integral feature of our product offering. Worldwide marketing is managed on a centralized basis through our advertising and public relations departments in order to ensure consistency of presentation.

We create distinctive image advertising for all of our products, conveying the particular message of each brand within the context of our core themes. Advertisements generally portray a lifestyle rather than a specific item and include a

variety of products offered by ourselves and, in some cases, our licensing partners. Our primary advertising medium is print, with multiple page advertisements appearing regularly in a range of fashion, lifestyle and general interest magazines. Major print advertising campaigns are conducted during the fall and spring retail seasons, with additions throughout the year to coincide with product deliveries. In addition to print, some product categories have utilized television and outdoor media in their marketing programs for certain product categories. Our RalphLauren.com e-commerce website presents the Ralph Lauren lifestyle on the Internet while offering the full breadth of our apparel, accessories and home products.

Table of Contents

We advertise in consumer and trade publications, and participate in cooperative advertising on a shared cost basis with major retailers. In addition, we provide point-of-sale fixtures and signage to our wholesale customers to enhance the presentation of our products at retail locations. We expensed approximately \$188 million related to the advertising of our products in Fiscal 2008, an increase of approximately 4% from Fiscal 2007.

If our domestic licensing partners are required to spend an amount equal to a percent of their licensed product sales on advertising, we coordinate the advertising placement on their behalf.

We also conduct a variety of public relations activities. Each of our spring and fall womenswear collections are presented at major fashion shows in New York City, which typically generate extensive domestic and international media coverage. We introduce each of the spring and fall menswear collections at major fashion shows in cities such as New York or Milan, Italy. In addition, we organize in-store appearances by our models, certain professional golfers and sponsors. We are the first exclusive outfitter for all on-court officials at the Wimbledon tennis tournament. We are also the official outfitter of all on-court officials at the U.S. Open tennis tournament.

In May 2008, the Company entered into an agreement with the U.S. Olympic Committee designating Polo Ralph Lauren as an Official Outfitter of the 2008 U.S. Olympic and Paralympic Teams. Under this agreement, the Company will be designing the official Opening Ceremony and Closing Ceremony Parade Outfits for the U.S. Olympic Teams members, in addition to an assortment of village wear pieces to be provided to the athletes on the U.S. Teams. Products will be available for sale in the U.S. in June 2008 in Polo Ralph Lauren retail stores, select department stores, and RalphLauren.com, with select items available on the U.S. Olympic Committee website.

Sourcing, Production and Quality

We contract for the manufacture of our products and do not own or operate any production facilities. Over 400 different manufacturers worldwide produce our apparel, footwear and accessories products. We source both finished products and raw materials. Raw materials include fabric, buttons and other trim. Finished products consist of manufactured and fully assembled products ready for shipment to our customers. In Fiscal 2008, less than 2%, by dollar volume, of our products were produced in the U.S., and over 98%, by dollar volume, were produced outside the U.S., primarily in Asia, Europe and South America. See *Import Restrictions and other Government Regulations* and Part 1A *Our business is subject to risks associated with importing products.*

Two manufacturers engaged by us accounted for approximately 12% and 8% of our total production during Fiscal 2008. The primary production facilities of these two manufacturers are located in China, Hong Kong, Indonesia, Macau, Philippines and Sri Lanka.

Our Wholesale segment must commit to manufacture the majority of our garments before we receive customer orders. We also must commit to purchase fabric from mills well in advance of our sales. If we overestimate our primary customers' demand for a particular product, we may sell the excess in our factory stores or sell the product through secondary distribution channels. If we overestimate the need for a particular fabric or yarn, that fabric or yarn may be used in garments made for subsequent seasons or made into past seasons' styles for distribution in our factory stores.

Suppliers operate under the close supervision of our global manufacturing division and buying agents headquartered in Asia, the Americas and Europe. All garments are produced according to our specifications. Production and quality control staff in the Americas, Asia and Europe monitor manufacturing at supplier facilities in order to correct problems prior to shipment of the final product. Procedures have been implemented under our vendor certification and compliance programs, so that quality assurance is focused upon as early as possible in the production process, allowing merchandise to be received at the distribution facilities and shipped to customers with minimal interruption.

Competition

Competition is very strong in the segments of the fashion and consumer product industries in which we operate. We compete with numerous designers and manufacturers of apparel and accessories, fragrances and home furnishing products, domestic and foreign. Some of our competitors may be significantly larger and have

Table of Contents

substantially greater resources than us. We compete primarily on the basis of fashion, quality and service, which depend on our ability to:

anticipate and respond to changing consumer demands in a timely manner;

maintain favorable brand recognition;

develop and produce high quality products that appeal to consumers;

appropriately price our products;

provide strong and effective marketing support;

ensure product availability; and

obtain sufficient retail floor space and effectively present our products at retail.

See Item 1A *We face intense competition in the worldwide apparel industry.*

Distribution

To facilitate distribution domestically, Ralph Lauren men's and women's products are shipped from manufacturers primarily to our distribution center in Greensboro, North Carolina for inspection, sorting, packing and shipment to retail customers. Ralph Lauren Childrenswear products are shipped from our manufacturers to a leased distribution center in Martinsburg, West Virginia. In addition, we utilize third party logistics providers to manage selected programs for specific customers. These facilities are designed to allow for high density cube storage and utilize bar code technology to provide inventory management and carton controls. Product traffic management is also coordinated from these facilities. European distribution and warehousing has been largely consolidated into one third party facility located in Parma, Italy. Japan logistics have been consolidated into one third party facility in Kawasaki.

Our full-price store and factory store distribution and warehousing are principally handled through the Greensboro distribution center. Club Monaco products are distributed from facilities in Ontario, Canada, Greensboro, North Carolina and California.

RalphLauren.com customer contact functions and order fulfillment are performed at a new 360,000 sq. ft. leased facility in High Point, North Carolina. The facility opened and commenced customer contact operations in November 2007, and commenced fulfillment operations in February 2008.

Management Information Systems

Our management information systems make the marketing, manufacturing, importing and distribution of our products more efficient by providing, among other things:

comprehensive order processing;

production information;

accounting information; and

an enterprise view of information for our marketing, manufacturing, importing and distribution functions.

The point-of-sale registers in conjunction with other systems in our stores enable us to track inventory from store receipt to final sale on a real-time basis. We believe our merchandising and financial systems, coupled with our point-of-sale registers and software programs, allow for rapid stock replenishment, concise merchandise planning and real-time inventory accounting. See Item 1A *Certain legal proceedings and regulatory matters could adversely impact our results of operations.*

We also utilize a sophisticated automated replenishment system, Logility, to facilitate the processing of basic replenishment orders from our Retail segment and wholesale customers, the movement of goods through distribution channels, and the collection of information for planning and forecasting. We have a collaborative relationship with many of our suppliers that enables us to reduce cash-to-cash cycles in the management of our inventory. We are implementing a

Table of Contents

new, global enterprise resource management system for our Wholesale segment. See Item 1A *Our business could suffer if our computer systems and websites are disrupted or cease to operate effectively.*

Wholesale Credit Control

We manage our own credit function. We sell our merchandise primarily to major department stores and extend credit based on an evaluation of the customer's financial condition, usually without requiring collateral. We monitor credit levels and the financial condition of our customers on a continuing basis to minimize credit risk. We do not factor our accounts receivables or maintain credit insurance to manage the risks of bad debts. Our bad debt write-offs were \$1.6 million in Fiscal 2008, representing less than 1 percent of net revenues. See Item 1A *Our business could be negatively impacted by any financial instability of our customers.*

Wholesale Backlog

We generally receive wholesale orders for apparel products approximately three to five months prior to the time the products are delivered to stores. Such orders are generally subject to broad cancellation rights. As of March 29, 2008, our total backlog was \$1.573 billion, compared to \$1.396 billion as of March 31, 2007. We expect that substantially all of our backlog orders as of March 29, 2008 will be filled within the next fiscal year. Our backlog depends upon a number of factors, including the timing of the market weeks for our particular lines during which a significant percentage of our orders are received, and the timing of shipments. As a consequence, a comparison of backlog from period to period is not necessarily meaningful and may not be indicative of eventual shipments.

Trademarks

We own the Polo, Ralph Lauren and the famous polo player astride a horse trademarks in the U.S. and approximately 100 countries worldwide. Other trademarks that we similarly own include:

Lauren/Ralph Lauren ;

Ralph ;

RRL ;

Club Monaco ;

Rugby ;

RLX ;

Chaps ;

American Living ; and

Various trademarks pertaining to fragrances and cosmetics.

Mr. Ralph Lauren has the royalty-free right to use as trademarks Ralph Lauren, Double RL and RRL in perpetuity in connection with, among other things, beef and living animals. The trademarks Double RL and RRL are currently used by the Double RL Company, an entity wholly owned by Mr. Lauren. In addition, Mr. Lauren has the right to engage in personal projects involving film or theatrical productions (not including or relating to our business) through RRL

Productions, Inc., a company wholly owned by Mr. Lauren. Any activity by these companies has no impact on us.

Our trademarks are the subjects of registrations and pending applications throughout the world for use on a variety of items of apparel, apparel-related products, home furnishings and beauty products, as well as in connection with retail services, and we continue to expand our worldwide usage and registration of related trademarks. In general, trademarks remain valid and enforceable as long as the marks are used in connection with the related products and services and the required registration renewals are filed. We regard the license to use the trademarks and our other proprietary rights in and to the trademarks as extremely valuable assets in marketing our products and, on a worldwide basis, vigorously seek to protect them against infringement (see Item 3 *Legal Proceedings* for further discussion). As a result of the appeal of

Table of Contents

our trademarks, our products have been the object of counterfeiting. We have a broad enforcement program which has been generally effective in controlling the sale of counterfeit products in the U.S. and in major markets abroad.

In markets outside of the U.S., our rights to some or all of our trademarks may not be clearly established. In the course of our international expansion, we have experienced conflicts with various third parties who have acquired ownership rights in certain trademarks, including Polo and/or a representation of a polo player astride a horse, which would impede our use and registration of our principal trademarks. While such conflicts are common and may arise again from time to time as we continue our international expansion, we have generally successfully resolved such conflicts in the past through both legal action and negotiated settlements with third-party owners of the conflicting marks (see Item 1A *Our trademarks and other intellectual property rights may not be adequately protected outside the U.S.* and Item 3 *Legal Proceedings* for further discussion). Although we have not in the past suffered any material restraints or restrictions on doing business in desirable markets, we cannot assure that significant impediments will not arise in the future as we expand product offerings and additional trademarks to new markets.

We currently have an agreement with a third party which owned conflicting registrations of the trademarks Polo and a polo player astride a horse in the United Kingdom, Hong Kong and South Africa. Under the agreement, the third party retains the right to use the Polo and polo player symbol marks in South Africa and all other countries that comprise Sub-Saharan Africa, and we agreed to restrict use of those Polo marks in those countries to fragrances and cosmetics solely as part of the composite trademark Ralph Lauren and the polo player symbol, as to which our use is unlimited, and to the use of the polo player symbol mark on women's and girls' apparel and accessories and women's and girls' handkerchiefs. By agreeing to those restrictions, we secured the unlimited right to use our trademarks in the United Kingdom and Hong Kong without payment of any kind, and the third party is prohibited from distributing products under those trademarks in those countries.

Import Restrictions and Other Government Regulations

Virtually all of our merchandise imported into the U.S., Canada, and Europe is subject to duties. Until January 1, 2005, our apparel merchandise was also subject to quotas. Quotas represent the right, pursuant to bilateral or other international trade arrangements, to export amounts of certain categories of merchandise into a country or territory pursuant to a visa or license. Pursuant to the Agreement on Textiles and Clothing, quotas on textile and apparel products were eliminated for World Trade Organization (WTO) member countries, including the U.S., Canada and European countries, on January 1, 2005. Notwithstanding quota elimination, China's accession agreement for membership in the WTO provides that WTO member countries (including the U.S., Canada and European countries) may reimpose quotas on specific categories of products in the event it is determined that imports from China have surged and are threatening to create a market disruption for such categories of products (so called safeguard quota provisions). In response to surging imports, in November 2005 the U.S. and China agreed to a new quota arrangement which will impose quotas on certain textile products through the end of calendar 2008. In addition, effective January 1, 2008, the European Union also agreed with China on a new textile arrangement which imposed a double surveillance licensing scheme which is due to terminate at the end of calendar year 2008. The U.S. and other countries may also unilaterally impose additional duties in response to a particular product being imported (from China or other countries) at unfairly traded prices that in such increased quantities as to cause (or threaten) injury to the relevant domestic industry (generally known as anti-dumping actions). The European Union has imposed anti-dumping duties on imports from China and Vietnam in certain footwear categories. On January 11, 2007, the Bush Administration imposed a Vietnam Import Monitoring Program on five broad product groups shirts, trousers, sweaters, underwear, and swimwear to determine whether any of those imports might be unfairly traded, due to dumping. The review period will last for the remainder of the Bush Administration with six-month reviews of data collected. If dumping is suspected, the U.S. Government will self-initiate a dumping case on behalf of the U.S. textile industry which could significantly affect our costs. Furthermore, additional duties, generally known as countervailing duties, can also be imposed by the U.S. Government to offset subsidies provided by a foreign government to foreign manufactures if the

importation of such subsidized merchandise injures or threatens to injure a U.S. industry. Recent developments have now made it possible to impose countervailing duties on products from non-market economies, such as China, which would significantly affect our costs.

Table of Contents

We are also subject to other international trade agreements and regulations, such as the North American Free Trade Agreement, the Central American Free Trade Agreement and the Caribbean Basin Initiative. In addition, each of the countries in which our products are sold has laws and regulations covering imports. Because the U.S. and the other countries in which our products are manufactured and sold may, from time to time, impose new duties, tariffs, surcharges or other import controls or restrictions, including the imposition of safeguard quota, or adjust presently prevailing duty or tariff rates or levels, we maintain a program of intensive monitoring of import restrictions and opportunities. We seek to minimize our potential exposure to import related risks through, among other measures, adjustments in product design and fabrication, shifts of production among countries and manufacturers, as well as through geographical diversification of our sources of supply.

As almost all our products are manufactured by foreign suppliers, the enactment of new legislation or the administration of current international trade regulations, executive action affecting textile agreements, or changes in sourcing patterns resulting from the elimination of quota could adversely affect our operations. Although we generally expect that the 2005 elimination of quotas will result, over the long term, in an overall reduction in the cost of apparel produced abroad, the implementation of any safeguard quota provisions or any anti-dumping or countervailing duty actions may result, over the near term, in cost increases for certain categories of products and in disruption of the supply chain for certain products categories. See Item 1A *Risk Factors* below for further discussion.

Apparel and other products sold by us are also subject to regulation in the U.S. and other countries by other governmental agencies, including, in the U.S., the Federal Trade Commission, U.S. Fish and Wildlife Service and the Consumer Products Safety Commission. These regulations relate principally to product labeling, licensing requirements, flammability testing, and product safety particularly with respect to products used by children. We believe that we are in substantial compliance with those regulations, as well as applicable federal, state, local, and foreign rules and regulations governing the discharge of materials hazardous to the environment. We do not estimate any significant capital expenditures for environmental control matters either in the current year or in the near future. Our licensed products and licensing partners are also subject to regulation. Our agreements require our licensing partners to operate in compliance with all laws and regulations, and we are not aware of any violations which could reasonably be expected to have a material adverse effect on our business or results of operations.

Although we have not suffered any material inhibition from doing business in desirable markets in the past, we cannot assure that significant impediments will not arise in the future as we expand product offerings and introduce additional trademarks to new markets.

Employees

As of March 29, 2008, we had approximately 15,000 employees, both full and part-time, consisting of approximately 11,700 in the U.S. and approximately 3,300 in foreign countries. 36 of our U.S. production and distribution employees in the womenswear business are members of UNITE HERE (which was previously known as the Union of Needletrades, Industrial and Textile Employees, prior to its merger with the Hotel Employees and Restaurant Employees International Union) under an industry association collective bargaining agreement, which our womenswear subsidiary has adopted. We consider our relations with both our union and non-union employees to be good.

Table of Contents**Executive Officers**

The following are our current executive officers and their principal recent business experience:

Ralph Lauren	Age 68	Mr. Lauren has been Chairman, Chief Executive Officer and a director of the Company since prior to the Company's initial public offering in 1997, and was a member of the Advisory Board of the Board of Directors of the Company's predecessors since their organization. He founded Polo in 1967 and has provided leadership in the design, marketing, advertising and operational areas since such time.
Roger N. Farah	Age 55	Mr. Farah has been President, Chief Operating Officer and a director of the Company since April 2000. He was Chairman of the Board of Venator Group, Inc. from December 1994 to April 2000, and was Chief Executive Officer of Venator Group, Inc. from December 1994 to August 1999. Mr. Farah is a member of the Board of Directors of Aetna, Inc.
Jackwyn Nemerov.	Age 56	Ms. Nemerov has been Executive Vice President of the Company since September 2004 and a director of the Company since February 2007. From 1998 to 2002, she was President and Chief Operating Officer of Jones Apparel Group, Inc.
Tracey T. Travis	Age 45	Ms. Travis has been Senior Vice President of Finance and Chief Financial Officer of the Company since January 2005. Ms. Travis served as Senior Vice President, Finance of Limited Brands, Inc. from April 2002 until August 2004, and Chief Financial Officer of Intimate Brands, Inc. from April 2001 to April 2002. Prior to that time, Ms. Travis was Chief Financial Officer of the Beverage Can Americas group at American National Can from 1999 to 2001, and held various finance and operations positions at Pepsi Bottling Group from 1989-1999. Ms. Travis is a member of the boards of directors of Jo-Ann Stores, Inc. and the Lincoln Center Theater.
Mitchell A. Kosh	Age 58	Mr. Kosh has served as Senior Vice President of Human Resources and Legal of the Company since July 2000. He was Senior Vice President of Human Resources of Conesco, Inc., from February 2000 to July 2000. Prior to that time, Mr. Kosh held executive human resource positions with the Venator Group, Inc. starting in 1996.

Table of Contents

Item 1A. Risk Factors

There are risks associated with an investment in our securities. The following risk factors should be read carefully in connection with evaluating our business and the forward-looking statements contained in this Annual Report on Form 10-K. Any of the following risks could materially adversely affect our business, our prospects, our operating results, our financial condition, the trading prices of our securities and the actual outcome of matters as to which forward-looking statements are made in this report. Additional risks that we do not yet know of or that we currently think are immaterial may also affect our business operations.

Risks Related to Our Business

The loss of the services of Mr. Ralph Lauren or other key personnel could have a material adverse effect on our business.

Mr. Ralph Lauren's leadership in the design, marketing and operational areas of our business has been a critical element of our success since the inception of our Company. The death or disability of Mr. Lauren or other extended or permanent loss of his services, or any negative market or industry perception with respect to him or arising from his loss, could have a material adverse effect on our business. Our other executive officers and other members of senior management have substantial experience and expertise in our business and have made significant contributions to our growth and success. The unexpected loss of services of one or more of these individuals could also adversely affect us. We are not protected by a material amount of key-man or similar life insurance covering Mr. Lauren, our other executive officers and certain other members of senior management. We have entered into employment agreements with Mr. Lauren and our other executive officers, but the noncompete period with respect to Mr. Lauren and certain other executive officers could, in some circumstances in the event of their termination of employment with the Company, end prior to the employment term set forth in their employment agreements.

We cannot assure the successful implementation of our growth strategy.

As part of our growth strategy, we seek to extend our brands, expand our geographic coverage and increase direct management of our brands by opening more of our own stores, strategically acquiring or integrating select licenses previously held by our licensees and enhancing our operations. Implementation of our strategy involves the continued expansion of our business in Europe, Asia and other international areas. As discussed in Item 1 *Recent Developments*, on May 29, 2007, we acquired a controlling interest in Impact 21, as part of the Tender Offer, and the remaining 50% interest in PRL Japan. We also acquired our previously licensed belts and leather goods business in April 2007 and the remaining 50% interest in RL Media in March 2007. In Fiscal 2006, we acquired our previously licensed men's and women's casual apparel and sportswear in the U.S. and Canada from Jones Apparel Group, Inc. and its subsidiaries (Polo Jeans Business). In addition, in Fiscal 2006, we acquired our previously licensed men's, women's and children's footwear from Reebok International Ltd. (Footwear Business).

We may have difficulty integrating acquired businesses into our operations, hiring and retaining qualified key employees, or otherwise successfully managing such expansion. Furthermore, we may not be able to successfully integrate the business of any licensee that we acquire into our own business or achieve any expected cost savings or synergies from such integration.

In Fiscal 2008, we launched *American Living*, a new lifestyle brand created exclusively in the U.S. for JCPenney. The success of *American Living* and the introduction of new product categories in both the U.S. and overseas may be negatively impacted in Fiscal 2009 by ongoing economic uncertainty. See Item 7 *Overview Global Economic Uncertainty* for further discussion.

Implementation of our growth strategy involves the continuation and expansion of our retail distribution network, both in the U.S. and abroad, which are subject to many factors beyond our control. We may not be able to procure, purchase or lease desirable free-standing or department store locations, or renew and maintain existing free-standing store leases and department store locations on acceptable terms, or secure suitable replacement locations. The lease negotiation as well as the number and timing of new stores actually opened during any given

Table of Contents

period, and their associated contribution to net income for the period, depends on a number of factors including, but not limited, to: (i) the availability of suitable financing to us and our landlords; (ii) the timing of the delivery of the leased premises to us from our landlords in order to commence build-out construction activities; (iii) our ability and our landlords' ability to obtain all necessary governmental licenses and permits to construct and operate our stores on a timely basis; (iv) our ability to manage the construction and development costs of new stores; (v) the rectification of any unforeseen engineering or environmental problems with the leased premises; (vi) adverse weather during the construction period; and (vii) the hiring and training of qualified operating personnel in the local market. While we continue to explore new markets and are always evaluating new potential, any of the above factors could have an adverse impact on our financial operations.

In Europe we lack the large wholesale distribution channels we have in the U.S., and we may have difficulty developing successful distribution strategies and alliances in each of the major European countries. In Japan, our primary mode of distribution is via a network of shops located within the leading department stores. We may have difficulty in successfully retaining this network, and expanding into alternate distribution channels. Additionally, macroeconomic trends may not be favorable, and could limit our ability to implement our growth strategies in select geographies where we have foreign operations, such as Europe and Asia.

Our business could suffer as a result of consolidations, restructurings and other ownership changes in the retail industry.

Several of our department store customers, including some under common ownership, account for significant portions of our wholesale net sales. We believe that a substantial portion of sales of our licensed products by our domestic licensing partners, including sales made by our sales force of Ralph Lauren Home products, are also made to our largest department store customers. In Fiscal 2008, sales to Macy's, Inc. represented approximately 24% of our wholesale net sales and sales to Dillard Department Stores, Inc. represented approximately 12% of our wholesale net sales. In the aggregate, our ten largest customers accounted for approximately 69% of our wholesale net sales during Fiscal 2008. There can be no assurance that consolidations, restructurings, reorganizations or other ownership changes in the department store sector will not have a material adverse effect on our wholesale business.

We typically do not enter into long-term agreements with our customers. Instead, we enter into a number of purchase order commitments with our customers for each of our lines every season. A decision by the controlling owner of a group of stores or any other significant customer, whether motivated by competitive conditions, financial difficulties or otherwise, to decrease or eliminate the amount of merchandise purchased from us or our licensing partners; to change their manner of doing business with us or our licensing partners; or their new strategic and operational initiatives, including their continued focus on further development of their private label initiatives, could have a material adverse effect on our business or financial condition. See Item 1 *Recent Developments* for discussion of launch of *American Living*.

Our business could be negatively impacted by any financial instability of our customers.

We sell our wholesale merchandise primarily to major department stores across the U.S. and Europe and extend credit based on an evaluation of each customer's financial condition, usually without requiring collateral. However, the financial difficulties of a customer could cause us to curtail or eliminate business with that customer. We may also assume more credit risk relating to that customer's receivables. Two of our customers, Macy's, Inc. and Dillard Department Stores, Inc., in the aggregate constituted 31% of trade accounts receivable outstanding as of March 29, 2008. Our inability to collect on our trade accounts receivable from any one of these customers could have a material adverse effect on our business or financial condition. See Item 1 *Wholesale Credit Control*.

Our profitability may decline as a result of increasing pressure on margins.

The apparel industry is subject to significant pricing pressure caused by many factors, including intense competition, consolidation in the retail industry, pressure from retailers to reduce the costs of products and changes in consumer demand. These factors may cause us to reduce our sales prices to retailers and consumers, which could cause our gross margin to decline if we are unable to appropriately manage inventory levels and/or otherwise offset price reductions with comparable reductions in our operating costs. If our sales prices decline and we fail to

Table of Contents

sufficiently reduce our product costs or operating expenses, our profitability will decline. This could have a material adverse effect on our results of operations, liquidity and financial condition.

Certain legal proceedings and regulatory matters could adversely impact our results of operations.

We are involved in certain legal proceedings and are subject to various claims involving alleged breach of contract claims, credit card fraud, security breaches in certain of our retail store information systems, employment issues, consumer matters and other litigations. Certain of these lawsuits and claims, if decided adversely to us or settled by us, could result in material liability to the Company or have a negative impact on the Company's reputation or relations with its employees, customers, licensees or other third parties. In addition, regardless of the outcome of any litigation or regulatory proceedings, such proceedings could result in substantial costs and may require that the Company devotes substantial time and resources to defend itself. Further, changes in governmental regulations both in the U.S. and in other countries where we conduct business operations could have an adverse impact on our results of operations. See Item 3 *Legal Proceedings* for further discussion of the Company's legal matters.

Our business could suffer if our computer systems and websites are disrupted or cease to operate effectively.

The Company relies heavily on its computer systems to record and process transactions and manage and operate our business. We also utilize a sophisticated automated replenishment system to facilitate the processing of basic replenishment orders from our wholesale customers, the movement of goods through distribution channels, and the collection of information for planning and forecasting. In addition, we have e-commerce and other Internet websites in the U.S.. Given the complexity of our business and the significant number of transactions that we engage in on an annual basis, it is imperative that we maintain constant operation of our computer hardware and software systems. Despite our preventative efforts, our systems are vulnerable from time to time to damage or interruption from, among other things, security breaches, computer viruses or power outages.

Our business is subject to risks associated with importing products.

As of March 29, 2008, we source a significant portion of our products outside the U.S. through arrangements with over 400 foreign vendors in various countries. In Fiscal 2008, over 98%, by dollar value, of our products were produced outside the U.S., primarily in Asia, Europe and South America. Risks inherent in importing our products include:

quotas imposed by bilateral textile agreements with China and non-WTO countries. These agreements limit the amount and type of goods that may be imported annually from these countries;

changes in social, political and economic conditions or terrorist acts that could result in the disruption of trade from the countries in which our manufacturers or suppliers are located;

the imposition of additional regulations relating to imports or exports;

the imposition of additional duties, taxes and other charges on imports or exports;

significant fluctuations of the cost of raw materials;

significant delays in the delivery of cargo due to security considerations;

the imposition of antidumping or countervailing duty proceedings resulting in the potential assessment of special antidumping or countervailing duties; and

the imposition of sanctions in the form of additional duties either by the U.S. or its trading partners to remedy perceived illegal actions by national governments.

Any one of these factors could have a material adverse effect on our financial condition and results of operations.

Table of Contents

Our ability to conduct business in international markets may be affected by legal, regulatory, political and economic risks.

Our ability to capitalize on growth in new international markets and to maintain the current level of operations in our existing international markets is subject to risks associated with international operations. These include:

- the burdens of complying with a variety of foreign laws and regulations;
- unexpected changes in regulatory requirements; and
- new tariffs or other barriers in some international markets.

We are also subject to general political and economic risks in connection with our international operations, including:

- political instability and terrorist attacks;
- changes in diplomatic and trade relationships; and
- general economic fluctuations in specific countries or markets.

We cannot predict whether quotas, duties, taxes, or other similar restrictions will be imposed by the U.S., the European Union, Japan, or other countries upon the import or export of our products in the future, or what effect any of these actions would have on our business, financial condition or results of operations. Changes in regulatory, geopolitical, social or economic policies and other factors may have a material adverse effect on our business in the future or may require us to significantly modify our current business practices.

Our trademarks and other intellectual property rights may not be adequately protected outside the U.S.

We believe that our trademarks and other proprietary rights are extremely important to our success and our competitive position. We devote substantial resources to the establishment and protection of our trademarks and anti-counterfeiting activities worldwide. Significant counterfeiting of our products continues, however, and in the course of our international expansion we have experienced conflicts with various third parties that have acquired or claimed ownership rights in some trademarks that include Polo and/or a representation of a polo player astride a horse, or otherwise have contested our rights to our trademarks. We have in the past resolved certain of these conflicts through both legal action and negotiated settlements, none of which, we believe, has had a material impact on our financial condition and results of operations. We cannot guarantee that the actions we have taken to establish and protect our trademarks and other proprietary rights will be adequate to prevent counterfeiting or a material adverse effect on our business or brands arising from imitation of our products by others or to prevent others from seeking to block sales of our products as a violation of the trademarks and proprietary rights of others. Also, there can be no assurance that others will not assert rights in, or ownership of, trademarks and other proprietary rights of ours or that we will be able to successfully resolve these types of conflicts to our satisfaction or at all. In addition, the laws of certain foreign countries do not protect proprietary rights to the same extent as do the laws of the U.S. See Item 1 *Trademarks*, and Item 3 *Legal Proceedings*.

Our business could suffer as a result of a manufacturer's inability to produce our goods on time and to our specifications.

We do not own or operate any manufacturing facilities and depend exclusively on independent third parties for the manufacture of all of our products. Our products are manufactured to our specifications primarily by international

manufacturers. During Fiscal 2008, less than 2%, by dollar value, of our men's and women's products were manufactured in the U.S. and over 98%, by dollar value, of these products were manufactured in other countries. Two of the manufacturers engaged by us accounted for approximately 12% and 8% of our total production during Fiscal 2008. The primary production facilities of these two manufacturers are located in Asia. The inability of a manufacturer to ship orders of our products in a timely manner or to meet our quality standards could cause us to miss the delivery date requirements of our customers for those items, which could result in cancellation of orders, refusal to accept deliveries or a substantial reduction in purchase prices, any of which could have a material adverse effect on our financial condition and results of operations.

Table of Contents

Our business could suffer if one of our manufacturers fails to use acceptable labor practices.

We require our licensing partners and independent manufacturers to operate in compliance with applicable laws and regulations. While our internal and vendor operating guidelines promote ethical business practices and our staff periodically visits and monitors the operations of our independent manufacturers, we do not control these manufacturers or their labor practices. The violation of labor or other laws by an independent manufacturer used by us or one of our licensing partners, or the divergence of an independent manufacturer's or licensing partner's labor practices from those generally accepted as ethical or appropriate in the U.S., could interrupt, or otherwise disrupt the shipment of finished products to us or damage our reputation. Any of these, in turn, could have a material adverse effect on our financial condition and results of operations.

Our business could suffer if we need to replace manufacturers.

We compete with other companies for the production capacity of our manufacturers and import quota capacity. Some of these competitors have greater financial and other resources than we have, and thus may have an advantage in the competition for production and import quota capacity. If we experience a significant increase in demand, or if an existing manufacturer of ours must be replaced, we may have to expand our third-party manufacturing capacity. We cannot guarantee that this additional capacity will be available when required on terms that are acceptable to us. See Item 1 *Sourcing, Production and Quality*. We enter into a number of purchase order commitments each season specifying a time for delivery, method of payment, design and quality specifications and other standard industry provisions, but do not have long-term contracts with any manufacturer. None of the manufacturers we use produce our products exclusively.

Our business is exposed to domestic and foreign currency fluctuations.

We generally purchase our products in U.S. dollars. However, we source most of our products overseas. As a result, the cost of these products may be affected by changes in the value of the relevant currencies. Changes in currency exchange rates may also affect the U.S. dollar value of the foreign currency denominated prices at which our international businesses sell products. Furthermore, our international sales and licensing revenue generally is derived from sales in foreign currencies. These foreign currencies include the Japanese Yen, the Euro and the British Pound Sterling, and this revenue could be materially affected by currency fluctuations. Although we hedge certain exposures to changes in foreign currency exchange rates arising in the ordinary course of business, we cannot assure that foreign currency fluctuations will not have a material adverse impact on our financial condition and results of operations. See Item 7 *Market Risk Management*.

We rely on our licensing partners to preserve the value of our licenses.

The risks associated with our own products also apply to our licensed products in addition to any number of possible risks specific to a licensing partner's business, including, for example, risks associated with a particular licensing partner's ability to:

- obtain capital;
- manage its labor relations;
- maintain relationships with its suppliers;
- manage its credit and bankruptcy risks effectively; and

maintain relationships with its customers.

Although some of our license agreements prohibit licensing partners from entering into licensing arrangements with our competitors, our licensing partners generally are not precluded from offering, under other brands, the types of products covered by their license agreements with us. A substantial portion of sales of our products by our domestic licensing partners are also made to our largest customers. While we have significant control over our licensing partners' products and advertising, we rely on our licensing partners for, among other things, operational and financial control over their businesses. Changes in management, reduced sales of licensed products, poor execution or financial difficulties with respect to any of our licensing partners could adversely affect our revenues, both directly from reduced licensing revenue received and indirectly from reduced sales of our other products. See Item 1 *Our Licensing Segment*.

Table of Contents

Failure to maintain licensing partners could harm our business.

Although we believe in most circumstances we could replace existing licensing partners if necessary, our inability to do so for any period of time could adversely affect our revenues, both directly from reduced licensing revenue received and indirectly from reduced sales of our other products. See Item 1 *Our Licensing Segment*.

The voting shares of the Company's stock are concentrated in one majority stockholder.

As of March 29, 2008, Mr. Ralph Lauren, or entities controlled by Mr. Ralph Lauren, owned approximately 87% of the voting power of the outstanding common stock of the Company. As a result, Mr. Lauren has the ability to exercise significant control over our business, including, without limitation, (i) the election of the Company's Class B common stock directors, voting separately as a class, and (ii) any action requiring the approval of our stockholders, including the adoption of amendments to our certificate of incorporation and the approval of mergers or sales of all or substantially all of our assets.

The trading prices of our securities periodically may rise or fall based on the accuracy of predictions of our earnings or other financial performance.

Our business planning process is designed to maximize our long-term strength, growth and profitability, not to achieve an earnings target in any particular fiscal quarter. We believe that this longer-term focus is in the best interests of the Company and our stockholders. At the same time, however, we recognize that from time to time it may be helpful to provide investors with guidance as to our quarterly and annual forecast of net sales and earnings. While we generally expect to provide updates to our guidance when we report our results each fiscal quarter, we assume no responsibility to update any of our forward-looking statements at such times or otherwise. If and when we announce actual results that differ from those that have been predicted by us, outside analysts or others, the market price of our securities could be affected. Investors who rely on the predictions when making investment decisions with respect to our securities do so at their own risk. We take no responsibility for any losses suffered as a result of such changes in the prices of our securities.

Risks Relating to the Industry in Which We Compete

A downturn in the global economy may affect consumer purchases of discretionary items and luxury retail products, which could adversely affect our sales.

The industries in which we operate are cyclical. Many economic factors outside of our control affect the level of consumer spending in the apparel, cosmetic, fragrance and home products industries, including, among others:

general business conditions;

economic downturns;

employment levels;

downturns in the stock market;

interest rates;

the housing market;

consumer debt levels;

the availability of consumer credit;

increases in fuel prices;

taxation; and

consumer confidence in future economic conditions.

Consumer purchases of discretionary items and luxury retail products, including our products, may decline during recessionary periods and at other times when disposable income is lower. A downturn or an uncertain outlook in the economies in which we, or our licensing partners, sell our products may materially adversely affect our businesses and our revenues and profits. See Item 7 *Overview Our Objectives and Risks* for further discussion.

Table of Contents

The domestic and international political situation also affects consumer confidence. The threat, outbreak or escalation of terrorism, military conflicts or other hostilities could lead to a decrease in consumer spending.

We face intense competition in the worldwide apparel industry.

We face a variety of intense competitive challenges from other domestic and foreign fashion-oriented apparel and casual apparel producers, some of which may be significantly larger and more diversified and have greater financial and marketing resources than we have. We compete with these companies primarily on the basis of:

- anticipating and responding to changing consumer demands in a timely manner;
- maintaining favorable brand recognition;
- developing innovative, high-quality products in sizes, colors and styles that appeal to consumers;
- appropriately pricing products;
- failure to anticipate and maintain proper inventory levels;
- providing strong and effective marketing support;
- creating an acceptable value proposition for retail customers;
- ensuring product availability and optimizing supply chain efficiencies with manufacturers and retailers; and
- obtaining sufficient retail floor space and effective presentation of our products at retail stores.

We also face increasing competition from companies selling apparel and home products through the Internet. Although RL Media sells our products domestically through the Internet, increased competition in the worldwide apparel, accessories and home product industries from Internet-based competitors could reduce our sales, prices and margins and adversely affect our results of operations.

The success of our business depends on our ability to respond to constantly changing fashion trends and consumer demands.

Our success depends in large part on our ability to originate and define fashion product and home product trends, as well as to anticipate, gauge and react to changing consumer demands in a timely manner. Our products must appeal to a broad range of consumers whose preferences cannot be predicted with certainty and are subject to rapid change. We cannot assure you that we will be able to continue to develop appealing styles or successfully meet constantly changing consumer demands in the future. In addition, we cannot assure you that any new products or brands that we introduce will be successfully received by consumers. Any failure on our part to anticipate, identify and respond effectively to changing consumer demands and fashion trends could adversely affect retail and consumer acceptance of our products and leave us with a substantial amount of unsold inventory or missed opportunities. If that occurs, we may be forced to rely on markdowns or promotional sales to dispose of excess, slow-moving inventory, which may harm our business and impair the image of our brands. Conversely, if we underestimate consumer demand for its products or if manufacturers fail to supply quality products in a timely manner, we may experience inventory shortages, which may result in unfilled orders, negatively impact customer relationships, diminish brand loyalty and result in lost revenues. See Item 1 *Sourcing, Production and Quality*.

Item 2. *Properties*

We lease space for our retail and factory showrooms, and warehouse and office space in various domestic and international locations. We do not own any real property except for our distribution facility in Greensboro, North Carolina and a parcel of land adjacent to the facility, and retail stores in Southampton, New York and Nantucket, Massachusetts. Contemporaneous with our acquisition of the remaining 50% equity interest in RL Media, we entered into a transition services agreement with Value Vision to continue to provide warehousing, order fulfillment and call center functions for RL Media through August 2008. RL Media has begun performing warehousing, order fulfillment and call center functions on its own in Fiscal 2008.

Table of Contents

We believe that our existing facilities are well maintained, in good operating condition and are adequate for our present level of operations.

The following table sets forth information with respect to our key properties:

Location	Use	Approximate Sq. Ft.	Current Lease Term Expiration
Greensboro, N.C.	Wholesale Distribution Facility	1,500,000	Owned
High Point, N.C.	Retail Distribution Facility	360,000	January 31, 2023
Martinsburg, W.V.	Wholesale Distribution Facility	187,000	December 31, 2010
650 Madison Avenue, NYC	Executive, corporate office and design studio, Men's showrooms	207,000	December 31, 2009
Lyndhurst, N.J.	Corporate and retail administrative offices	170,000	December 31, 2019
550 7th Avenue, NYC	Corporate office, design studio and Women's showrooms	105,500	December 31, 2018
625 Madison Avenue, NYC	Corporate offices and home showroom	270,000	December 31, 2019
Geneva, Switzerland	European corporate offices	48,800	March 31, 2013
867 Madison Avenue, NYC	Retail Flagship Store	27,700	December 31, 2013
Beverly Hills, CA	Retail Flagship Store	21,600	September 30, 2023
Chicago, IL	Retail Flagship Store	37,600	November 14, 2017
Milan, Italy	Retail Flagship Store	18,000	June 30, 2015
Tokyo, Japan	Retail Flagship Store	24,300	December 31, 2020

We have begun to occupy a 360,000 square foot leased distribution facility in High Point, North Carolina, for our RL Media business during Fiscal 2008. The term of the lease commenced on August 17, 2007 and expires on January 31, 2023.

We paid aggregate rent in Fiscal 2008 of approximately \$62 million for our non-retail facilities. We anticipate that we will be able to extend those leases which expire in the near future on terms satisfactory to us or relocate to facilities timely and on acceptable terms.

As of March 29, 2008, we operated 313 retail stores, totaling approximately 2.4 million square feet. Aggregate annual rentals for retail space in Fiscal 2008 totaled approximately \$146 million. We anticipate that we will be able to extend those leases which expire in the near future on satisfactory terms or relocate to desirable locations.

Item 3. Legal Proceedings

The Company is subject to various claims relating to allegations of security breaches in certain of its retail store information systems. These claims have been made by various credit card issuers, issuing banks and credit card processors with respect to cards issued by them pursuant to the rules imposed by certain credit card issuers, particularly Visa® and MasterCard®. The allegations include fraudulent credit card charges, the cost of replacing credit cards, related monitoring expenses and other related claims.

In Fiscal 2005, the Company was subject to various claims relating to an alleged security breach of its point-of-sale systems that occurred at certain Polo retail stores in the U.S. The Company had previously recorded a reserve for an aggregate amount of \$13 million to provide for its best estimate of losses related to these claims. The Company ultimately paid approximately \$11 million in settlement of these various claims and the eligibility period for filing any such claims has expired.

In addition, in the third quarter of Fiscal 2007, the Company was notified of an alleged compromise of its retail store information systems that process its credit card data for certain Club Monaco stores in Canada. As of the end of Fiscal 2007, the Company had recorded a total reserve of \$5.0 million for this matter based on its best estimate of exposure at that time. While the final settlement of this matter is pending approval by the credit card issuers, the Company's Canadian credit card processor returned three-quarters of the funds previously escrowed to cover

Table of Contents

potential claims by the end of April 2008. Accordingly, based on the progress in this matter and the available evidence to date, the Company reversed \$4.1 million of its original \$5.0 million reserve into income during Fiscal 2008. The Company was also recently advised that the Quebec Privacy Commission has ceased its investigation of Club Monaco in connection with this matter.

The Company is cooperating with law enforcement authorities in both the U.S. and Canada in their investigations of these matters.

On August 19, 2005, Wathne Imports, Ltd. (Wathne), our domestic licensee for luggage and handbags, filed a complaint in the U.S. District Court for the Southern District of New York against us and Ralph Lauren, our Chairman and Chief Executive Officer, asserting, among other things, federal trademark law violations, breach of contract, breach of obligations of good faith and fair dealing, fraud and negligent misrepresentation. The complaint sought, among other relief, injunctive relief, compensatory damages in excess of \$250 million and punitive damages of not less than \$750 million. On September 13, 2005, Wathne withdrew this complaint from the U.S. District Court and filed a complaint in the Supreme Court of the State of New York, New York County, making substantially the same allegations and claims (excluding the federal trademark claims), and seeking similar relief. On February 1, 2006, the Court granted our motion to dismiss all of the causes of action, including the cause of action against Mr. Lauren, except for the breach of contract claims, and denied Wathne s motion for a preliminary injunction. We believe this lawsuit to be without merit, and moved for summary judgment on the remaining claims. Wathne cross-moved for partial summary judgment. A hearing on these motions occurred on November 1, 2007. The judge presiding in this case provided a written ruling on the summary judgment motion on April 11, 2008. The Court granted Polo s summary judgment motion to dismiss in large measure, and denied Wathne s cross-motion. Wathne has appealed the dismissal of its claims. A trial date has not yet been established in connection with this matter. We intend to continue to contest the few remaining claims in this lawsuit vigorously. Accordingly, management does not expect that the ultimate resolution of this matter will have a material adverse effect on the Company s liquidity or financial position.

On October 1, 1999, we filed a lawsuit against the U.S. Polo Association Inc. (USPA), Jordache, Ltd. (Jordache) and certain other entities affiliated with them, alleging that the defendants were infringing on our trademarks. In connection with this lawsuit, on July 19, 2001, the USPA and Jordache filed a lawsuit against us in the U.S. District Court for the Southern District of New York. This suit, which was effectively a counterclaim by them in connection with the original trademark action, asserted claims related to our actions in connection with our pursuit of claims against the USPA and Jordache for trademark infringement and other unlawful conduct. Their claims stemmed from our contacts with the USPA s and Jordache s retailers in which we informed these retailers of our position in the original trademark action. All claims and counterclaims, except for our claims that the defendants violated our trademark rights, were settled in September 2003. We did not pay any damages in this settlement.

On July 30, 2004, the Court denied all motions for summary judgment, and trial began on October 3, 2005 with respect to the four double horseman symbols that the defendants sought to use. On October 20, 2005, the jury rendered a verdict, finding that one of the defendants marks violated our world famous Polo Player Symbol trademark and enjoining its further use, but allowing the defendants to use the remaining three marks. On November 16, 2005, we filed a motion before the trial court to overturn the jury s decision and hold a new trial with respect to the three marks that the jury found not to be infringing. The USPA and Jordache opposed our motion, but did not move to overturn the jury s decision that the fourth double horseman logo did infringe on our trademarks. On July 7, 2006, the judge denied our motion to overturn the jury s decision. On August 4, 2006, we filed an appeal of the judge s decision to deny our motion for a new trial to the U.S. Court of Appeals for the Second Circuit. On March 4, 2008, the Court of Appeals issued a decision affirming the judgment of the U.S. District Court for the Southern District of New York.

On March 2, 2006, a former employee at our Club Monaco store in Los Angeles, California filed a lawsuit against us in the San Francisco Superior Court alleging violations of California wage and hour laws. The plaintiff purports to

represent a class of Club Monaco store employees who allegedly have been injured by being improperly classified as exempt employees and thereby not receiving compensation for overtime and not receiving meal and rest breaks. The complaint seeks an unspecified amount of compensatory damages, disgorgement of profits,

Table of Contents

attorneys' fees and injunctive relief. We believe this suit is without merit and intend to contest it vigorously. Accordingly, management does not expect that the ultimate resolution of this matter will have a material adverse effect on the Company's liquidity or financial position.

On May 30, 2006, four former employees of our Ralph Lauren stores in Palo Alto and San Francisco, California filed a lawsuit in the San Francisco Superior Court alleging violations of California wage and hour laws. The plaintiffs purport to represent a class of employees who allegedly have been injured by not properly being paid commission earnings, not being paid overtime, not receiving rest breaks, being forced to work off of the clock while waiting to enter or leave the store and being falsely imprisoned while waiting to leave the store. The complaint seeks an unspecified amount of compensatory damages, damages for emotional distress, disgorgement of profits, punitive damages, attorneys' fees and injunctive and declaratory relief. We have filed a cross-claim against one of the plaintiffs for his role in allegedly assisting a former employee misappropriate Company property. Subsequent to answering the complaint, we had the action moved to the United States District Court for the Northern District of California. We believe this suit is without merit and intend to contest it vigorously. Accordingly, management does not expect that the ultimate resolution of this matter will have a material adverse effect on the Company's liquidity or financial position.

On August 21, 2007, eleven former and current employees of our Club Monaco stores in California filed a lawsuit in Los Angeles Superior Court alleging similar claims as the Club Monaco action in San Francisco. The complaint seeks an unspecified amount of compensatory damages, attorney's fees and punitive damages. We believe this suit is without merit and intend to contest it vigorously. Accordingly, management does not expect that the ultimate resolution of this matter will have a material adverse effect on the Company's liquidity or financial position.

We are otherwise involved from time to time in legal claims and proceedings involving credit card fraud, trademark and intellectual property, licensing, employee relations and other matters incidental to our business. We believe that the resolution of these other matters currently pending will not individually or in the aggregate have a material adverse effect on our financial condition or results of operations.

Item 4. *Submission of Matters to a Vote of Security Holders*

No matters were submitted to a vote of security holders during the fourth quarter of the fiscal year ended March 29, 2008.

Table of Contents**PART II****Item 5. Market for Registrants' Common Equity and Related Stockholders Matters and Issuer Purchases of Equity Securities**

Our Class A common stock is traded on the New York Stock Exchange (NYSE) under the symbol RL. The following table sets forth the high and low sales prices per share of the Class A common stock for each quarterly period in our two most recent fiscal years, as reported on the NYSE Composite Tape:

	Market Price of Class A Common Stock	
	High	Low
Fiscal 2008:		
First Quarter	\$ 101.46	\$ 87.70
Second Quarter	102.58	71.76
Third Quarter	78.61	60.50
Fourth Quarter	68.67	50.55
Fiscal 2007:		
First Quarter	\$ 62.87	\$ 52.02
Second Quarter	66.20	45.65
Third Quarter	83.15	64.77
Fourth Quarter	90.12	77.90

On May 20, 2003, our Board of Directors initiated a regular quarterly cash dividend program of \$0.05 per share, or \$0.20 per share on an annual basis, on our Class A common stock. Approximately \$20 million was recorded as a reduction to retained earnings during Fiscal 2008 in connection with these dividends.

As of May 16, 2008, there were 1,144 holders of record of our Class A common stock and 14 holders of record of our Class B common stock. All of our outstanding shares of Class B common stock are owned by Mr. Ralph Lauren and related entities and are convertible at any time into shares of Class A common stock on a one-for-one basis.

The following table sets forth the repurchases of our Class A common stock during the fiscal quarter ended March 29, 2008:

Total Number of Shares Purchased⁽¹⁾	Average Price	Total Number of Shares Purchased as Part of Publicly Announced	Maximum Number (or Approximate Dollar Value) of Shares That May Yet be Purchased Under the
---	--------------------------	---	---

		Paid Per Share	Plans or Programs⁽¹⁾	Plans or Programs (millions)
December 30, 2007 to January 26, 2008		\$		\$ 298
January 27, 2008 to February 23, 2008	1,500,000	65.93	1,500,000	199
February 24, 2008 to March 29, 2008	1,039,107 ⁽²⁾	57.30	1,003,803	142
	2,539,107		2,503,803	

⁽¹⁾ These purchases were made on the open market under the Company's Class A common stock repurchase program. In August 2007, the Company's Board of Directors approved an expansion of the Company's existing common stock repurchase program that allowed the Company to repurchase up to an additional \$250 million of Class A common stock. Repurchases of shares of Class A common stock are subject to overall business and market conditions. This program does not have a fixed termination date.

⁽²⁾ Includes 35,304 shares surrendered to, or withheld by, the Company in satisfaction of withholding taxes in connection with the vesting of an award under the Company's 1997 Long-Term Stock Incentive Plan.

Table of Contents

The following graph compares the cumulative total stockholder return (stock price appreciation plus dividends) on our Class A common stock with the cumulative total return of the Standard & Poor's 500 Index, our peer group for the preceding fiscal year (the Old Peer Group), and a peer group index of companies that we believe are similar to ours (the New Peer Group) for the period from March 28, 2003, the last trading day in the Company's 2003 fiscal year, through March 28, 2008, the last trading day in the Company's 2008 fiscal year. Our Old Peer Group consisted of Coach, Estee Lauder, Jones Apparel, Kellwood, Kenneth Cole, Liz Claiborne, Phillips Van Heusen, Tiffany & Co., VF Corp., Warnaco, LVMH, Burberry, Christian Dior, PPR SA, Hermes International, Richemont, Luxottica and Tod's Group. Our New Peer Group consists of the same companies in our Old Peer Group with the exception of Kellwood and Christian Dior. All calculations done for foreign companies in our New Peer Group are made using the local foreign issue of such companies. We believe that the companies in our New Peer Group index, taken together, are more comparable to our businesses. The returns are calculated by assuming an investment in the Class A common stock and each index of \$100 on March 29, 2003, with all dividends reinvested.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN*

Item 6. *Selected Financial Data*

See the Index to Consolidated Financial Statements and Supplementary Information, and specifically Selected Financial Information appearing at the end of this Annual Report on Form 10-K.

Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations*

The following discussion and analysis of financial condition and results of operations should be read together with our audited consolidated financial statements and footnotes, which are included elsewhere in this Annual Report on Form 10-K for Fiscal 2008 (Fiscal 2008 10-K). We utilize a 52-53 week fiscal year ending on the Saturday closest to March 31. As such, fiscal year 2008 ended on March 29, 2008 and reflected a 52-week period (Fiscal 2008); fiscal year 2007 ended on March 31, 2007 and reflected a 52-week period (Fiscal 2007); and fiscal year 2006 ended on April 1, 2006 and also reflected a 52-week period (Fiscal 2006).

INTRODUCTION

Management's discussion and analysis of financial condition and results of operations (MD&A) is provided as a supplement to the accompanying audited consolidated financial statements and footnotes to help provide an understanding of our financial condition, changes in financial condition and results of our operations. MD&A is organized as follows:

Overview. This section provides a general description of our business, including our objectives and risks, and a summary of financial performance for Fiscal 2008. In addition, this section includes a discussion of recent developments and transactions affecting comparability that we believe are important in understanding our results of operations and financial condition, and in anticipating future trends.

Results of operations. This section provides an analysis of our results of operations for Fiscal 2008, Fiscal 2007 and Fiscal 2006.

Financial condition and liquidity. This section provides an analysis of our cash flows for Fiscal 2008, Fiscal 2007 and Fiscal 2006, as well as a discussion of our financial condition and liquidity as of March 29, 2008. The discussion of our financial condition and liquidity includes (i) our available financial capacity under our credit facility, (ii) a summary of our key debt compliance measures and (iii) a summary of our outstanding debt and commitments as of March 29, 2008.

Market risk management. This section discusses how we manage exposure to potential losses arising from adverse changes in interest rates, foreign currency exchange rates and fluctuations in the reported net assets of certain of our international operations.

Critical accounting policies. This section discusses accounting policies considered to be important to our financial condition and results of operations, which require significant judgment and estimation on the part of management in their application. In addition, all of our significant accounting policies, including our critical accounting policies, are summarized in Notes 3 and 4 to our accompanying audited consolidated financial statements.

Recent accounting standards. This section discusses the potential impact to our reported financial condition and results of operations of accounting standards that have been issued, but which we have not yet adopted.

OVERVIEW

Our Business

Our Company is a global leader in the design, marketing and distribution of premium lifestyle products including men's, women's and children's apparel, accessories, fragrances and home furnishings. Our long-standing reputation and distinctive image have been consistently developed across an expanding number of products, brands and international markets. Our brand names include *Polo by Ralph Lauren*, *Ralph Lauren Purple Label*,

Table of Contents

Ralph Lauren Collection, Black Label, Blue Label, Lauren by Ralph Lauren, RRL, RLX, Rugby, Ralph Lauren Childrenswear, Chaps, Club Monaco and American Living, among others.

We classify our businesses into three segments: Wholesale, Retail and Licensing. Our wholesale business (representing 57% of Fiscal 2008 net revenues) consists of wholesale-channel sales made principally to major department stores, specialty stores and golf and pro shops located throughout the U.S., Europe and Asia. Our retail business (representing 39% of Fiscal 2008 net revenues) consists of retail-channel sales directly to consumers through full-price and factory retail stores located throughout the U.S., Canada, Europe, South America and Asia, and through our retail internet site located at www.RalphLauren.com (formerly known as Polo.com). In addition, our licensing business (representing 4% of Fiscal 2008 net revenues) consists of royalty-based arrangements under which we license the right to third parties to use our various trademarks in connection with the manufacture and sale of designated products, such as apparel, eyewear and fragrances, in specified geographical areas for specified periods. Approximately 25% of our Fiscal 2008 net revenues was earned in international regions outside of the U.S. and Canada. See Note 20 to the accompanying audited consolidated financial statements for a summary of net revenues by geographic location.

Our business is affected by seasonal trends, with higher levels of wholesale sales in our second and fourth quarters and higher retail sales in our second and third quarters. These trends result primarily from the timing of seasonal wholesale shipments and key vacation travel, back-to-school and holiday periods in the Retail segment.

Our Objectives and Risks

Our core strengths include a portfolio of global luxury lifestyle brands, a strong and experienced management team, a proven ability to develop and extend our brands distributed through multiple retail channels in global markets, a disciplined investment philosophy and a solid balance sheet. Despite the various risks and uncertainties associated with the current global economy as further discussed below, we believe our core strengths will continue to allow us to execute our strategy for long-term sustainable growth in revenue, net income and operating cash flow.

During the course of the past five fiscal years, our revenues, net income and operating cash flow have grown to record levels. See Selected Financial Information included elsewhere in this Fiscal 2008 10-K for further discussion.

Our operating success has been driven by the Company's focus on six key objectives:

- Creating unique businesses primarily centered around one core and heritage-driven brand;
- Diversifying and expanding our products and prices, distribution channels and geographic regions;
- Improving brand control and positioning;
- Focusing on selective strategic partnerships;
- Implementing infrastructure improvements that support a worldwide business; and
- Funding our expansion through strong operating cash flow.

As our business has grown, our portfolio mix and brand control has evolved from primarily that of a mono-brand U.S. centric menswear wholesaler with a broad array of product and geographic licenses to that of a portfolio of lifestyle brands with a direct control model over most of our brands, products and international territories. We believe that this broader and better-diversified portfolio mix positions us for ongoing growth, offering our customers a range

of products, price points and channels of distribution, and our size and global operations favorably position us to take advantage of synergies in design, sourcing and distribution.

In connection with our key objectives, we intend to continue to pursue opportunities for growth during the course of Fiscal 2009 and beyond. These opportunities and continued investment initiatives include:

Global expansion of our retail presence in various formats and key markets, including Paris, France;

Ongoing integration of our newly acquired Japanese businesses, and the transition of certain key product categories operated under pre-existing sublicenses in Japan into our own business;

Table of Contents

Further development of a wide array of luxury accessories product offerings, including handbags, footwear, small leathersgoods and watches/jewelry; and

Further growth in our initiatives to develop new lifestyle brands in partnership with select department and specialty stores, such as our current *American Living* brand with J.C. Penney Company, Inc. (JCPenney) and our current *Chaps* brand with Kohl 's Department Stores, Inc.

Global Economic Uncertainty

Our opportunities for long-term growth are accompanied by significant challenges and risks, particularly in the near term. Specifically, our business is dependent on consumer demand for our products. We believe that significant uncertainty and a slowdown in the U.S. macroeconomic environment negatively impacted the level of consumer spending for discretionary items during most of Fiscal 2008. Despite the more challenging U.S. retail environment that affected both the Company 's wholesale customers and retail channels, we continued to experience reported revenue growth for all quarters during Fiscal 2008. If the U.S. macroeconomic environment continues to be weak and/or spreads to significant markets outside of the U.S., these worsening economic conditions could have a continuing negative effect on the Company 's sales and operating margin growth rates across all segments in Fiscal 2009.

As of March 29, 2008, largely in response to the U.S. macroeconomic environment, our traditional retail partners in the U.S. have reduced their initial wholesale orders for fall 2008 apparel products. This contraction in the U.S. department and specialty store channel in Fiscal 2009 is expected to be more than offset primarily by sales in our new *American Living* product line and by the continuing growth in profitability of our businesses in Europe and Japan.

See Item 1A *Risk Factors* included elsewhere in this Fiscal 2008 10-K for further discussion.

Summary of Financial Performance

Operating Results

During Fiscal 2008, we reported revenues of \$4.880 billion, net income of \$419.8 million and net income per diluted share of \$3.99. This compares to revenues of \$4.295 billion, net income of \$400.9 million and net income per diluted share of \$3.73 during Fiscal 2007. As discussed further below, the comparability of our operating results has been affected by recent acquisitions and the adoption of the provisions of Financial Accounting Standards Board Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* An Interpretation of Statement of Financial Accounting Standards (FAS) No. 109 (FIN 48), effective as of the beginning of Fiscal 2008.

On a reported basis, our operating performance in Fiscal 2008 was primarily driven by 13.6% revenue growth, led by our Wholesale and Retail segments (including the effect of certain acquisitions that occurred in the first quarter of Fiscal 2008; see *Recent Developments* for further discussion). This revenue growth was partially offset by a decline in gross profit percentage of 30 basis points to 54.1% primarily due to the purchase accounting effects of our recent acquisitions, as well as increases in selling, general and administrative (SG&A) expenses and amortization expense of intangible assets driven by these acquisitions. The increase in SG&A expense was also attributable to the overall growth in our business. Excluding the effects of acquisitions, revenues increased by 8.6%, led by our Wholesale segment (8.1% growth) and Retail segment (9.7% growth). Excluding the effects of acquisitions, gross profit as a percentage of net revenues increased 10 basis points as improved performance in our European wholesale operations more than offset increased domestic promotional activity associated in part with the challenging U.S. retail environment.

Net income and net income per diluted share increased in Fiscal 2008 as compared to Fiscal 2007, principally due to a \$20.1 million decrease in the provision for income taxes and an \$0.8 million increase in operating income. The decrease in the provision for income taxes was driven by a 310 basis point decline in our effective tax rate.

See *Transactions Affecting Comparability of Results of Operations and Financial Condition* described below for further discussion of the recent acquisitions and the adoption of FIN 48.

Table of Contents

Financial Condition and Liquidity

Our financial position reflects the funding of our recent acquisitions, our increased share repurchase activity and the overall relative strength of our business results. Excluding \$74.3 million of short-term investments classified in our consolidated balance sheet outside of cash and cash equivalents, we ended Fiscal 2008 in a net debt position (total debt less total cash and cash equivalents) of \$127.7 million, compared to a net cash position (total cash and cash equivalents less total debt) of \$165.1 million at the end of Fiscal 2007.

The decrease in our net cash position as of the end of Fiscal 2008 was primarily due to the Japanese Business Acquisitions (as defined and discussed under *Recent Developments*), net of approximately \$239 million of Impact 21 s cash on-hand acquired. The decrease is also due to an increase in our share repurchases and capital expenditures. Our stockholders' equity increased to \$2.390 billion as of March 29, 2008, compared to \$2.335 billion as of March 31, 2007. This increase was primarily due to our net income and higher other comprehensive income during Fiscal 2008, offset in part by our increased share repurchase activity and a \$62.5 million reduction in retained earnings in connection with the adoption of FIN 48.

We generated \$695.4 million of cash from operations in Fiscal 2008, compared to \$796.1 million in Fiscal 2007. The decrease in operating cash flow was primarily driven by the absence of the approximately \$180 million, net of certain tax withholdings, received under the Eyewear Licensing Agreement (as defined in Note 22 to the accompanying audited consolidated financial statements) in the prior fiscal year. We used our cash availability to reinvest in our business through capital spending and acquisitions, as well as in connection with our common stock repurchase program. In particular, we spent \$217.1 million for capital expenditures primarily associated with global retail store expansion, construction and renovation of department store shop-in-shops and investments in our facilities and technological infrastructure. We used \$188.7 million primarily to fund the Japanese Business Acquisitions and the Small Leathergoods Business Acquisition, net of cash acquired (see *Recent Developments* for further discussion). We also used \$475.4 million to repurchase 6.0 million shares of Class A common stock.

Transactions Affecting Comparability of Results of Operations and Financial Condition

The comparability of the Company's operating results for the three fiscal years presented herein has been affected by certain transactions, including:

Acquisitions that occurred in Fiscal 2008, Fiscal 2007 and Fiscal 2006. In particular, the Company completed the Japanese Business Acquisitions on May 29, 2007, the Small Leathergoods Business Acquisition on April 13, 2007, the RL Media Minority Interest Acquisition on March 28, 2007, the Polo Jeans Business Acquisition on February 3, 2006 and the Footwear Business Acquisition on July 15, 2005 (each as defined in Note 5 to the accompanying audited consolidated financial statements).

The adoption of the provisions of FIN 48 as of the beginning of Fiscal 2008 (April 1, 2007). Accruals required for Fiscal 2008 under the provisions of FIN 48 were entirely offset by the reversal of tax reserves, principally associated with an audit settlement and the expiration of a statute of limitations. The incremental impact of the adoption of FIN 48 decreased the effective tax rate by 97 basis points in Fiscal 2008. See Note 12 to the accompanying audited consolidated financial statements for further discussion of the Company's adoption of FIN 48.

The change in accounting for stock-based compensation effective as of the beginning of Fiscal 2007 (April 2, 2006), as well as certain pretax charges related to retail asset impairments recognized during each of Fiscal 2008 and Fiscal 2006.

Certain pretax charges (reversals) related to restructurings and the Company's credit card contingencies during the fiscal years presented.

Table of Contents

A summary of the effect of certain of these items on pretax income for each applicable fiscal year presented is noted below (references to notes are to the notes to the accompanying audited consolidated financial statements):

	Fiscal Years Ended		
	March 29, 2008	March 31, 2007	April 1, 2006
	(millions)		
Stock-based compensation costs (see Note 18)	\$ (70.7)	\$ (43.6)	\$ (26.6)
Restructuring charges (see Note 11)		(4.6)	(9.0)
Impairments of retail assets (see Note 7)	(5.0)		(10.8)
Credit card contingency reserve reversals (charges) (see Note 15)	4.1	(3.0)	(6.8)
	\$ (71.6)	\$ (51.2)	\$ (53.2)

The following discussion of results of operations highlights, as necessary, the significant changes in operating results arising from these items and transactions. However, unusual items or transactions may occur in any period.

Accordingly, investors and other financial statement users individually should consider the types of events and transactions that have affected operating trends.

Recent Developments***Japanese Business Acquisitions***

On May 29, 2007, the Company completed its previously announced transactions to acquire control of certain of its Japanese businesses that were formerly conducted under licensed arrangements, consistent with the Company's long-term strategy of international expansion. In particular, the Company acquired approximately 77% of the outstanding shares of Impact 21 Co., Ltd. (Impact 21) that it did not previously own in a cash tender offer (the Impact 21 Acquisition), thereby increasing its ownership in Impact 21 from approximately 20% to approximately 97%. Impact 21 conducts the Company's men's, women's and jeans apparel and accessories business in Japan under a pre-existing, sub-license arrangement. In addition, the Company acquired the remaining 50% interest in Polo Ralph Lauren Japan Corporation (PRL Japan), which holds the master license to conduct Polo's business in Japan, from Onward Kashiya and Seibu (the PRL Japan Minority Interest Acquisition). Collectively, the Impact 21 Acquisition and the PRL Japan Minority Interest Acquisition are herein referred to as the Japanese Business Acquisitions.

The purchase price initially paid in connection with the Japanese Business Acquisitions was approximately \$360 million, including transaction costs of approximately \$12 million. In January 2008, at an Impact 21 shareholders meeting, the Company obtained the necessary approvals to complete the process of acquiring the remaining approximately 3% of outstanding shares not exchanged as of the close of the tender offer period (the minority squeeze-out). In February 2008, the Company acquired approximately 1% of the remaining Impact 21 shares outstanding at an aggregate cost of \$5 million. The Company expects the minority squeeze-out to be successfully concluded in the first quarter of Fiscal 2009, at an estimated aggregate cost of \$9 million.

The Company funded the Japanese Business Acquisitions with available cash on-hand and ¥20.5 billion of borrowings under a one-year term loan agreement pursuant to an amendment and restatement to the Company's existing credit facility. The Company repaid the borrowing by its maturity date on May 22, 2008 using approximately \$200 million

of Impact 21's cash on-hand acquired as part of the acquisition.

The results of operations for Impact 21, which were previously accounted for using the equity method of accounting, have been consolidated in the Company's results of operations commencing April 1, 2007. Accordingly, the Company recorded within minority interest expense the amount of Impact 21's net income allocable to the holders of the approximate 80% of the Impact 21 shares not owned by the Company prior to the closing date of the tender offer. The results of operations for PRL Japan have already been consolidated by the Company as described further in Note 2 to the accompanying audited consolidated financial statements.

Table of Contents

Acquisition of Small Leathergoods Business

On April 13, 2007, the Company acquired from Kellwood Company (Kellwood) substantially all of the assets of New Campaign, Inc., the Company's licensee for men's and women's belts and other small leather goods under the *Ralph Lauren*, *Lauren* and *Chaps* brands in the U.S. (the Small Leathergoods Business Acquisition). The assets acquired from Kellwood are operated under the name of Polo Ralph Lauren Leathergoods and allowed the Company to further expand its accessories business. The acquisition cost was approximately \$10 million. Kellwood provided various transition services to the Company for a period of up to six months from the date of acquisition.

The results of operations for the Polo Ralph Lauren Leathergoods business have been consolidated in the Company's results of operations commencing April 1, 2007.

Acquisition of RL Media Minority Interest

On March 28, 2007, the Company acquired the remaining 50% equity interest in Ralph Lauren Media, LLC (RL Media) formerly held by NBC-Lauren Media Holdings, Inc., a subsidiary wholly owned by the National Broadcasting Company, Inc. (NBC) (37.5%) and Value Vision Media, Inc. (Value Vision) (12.5%) (the RL Media Minority Interest Acquisition). RL Media conducts the Company's e-commerce initiatives through the RalphLauren.com internet site and is consolidated by the Company as a wholly owned subsidiary. The acquisition cost was \$175 million. In addition, Value Vision entered into a transition services agreement with the Company to provide order fulfillment and related services over a period of up to seventeen months from the date of the acquisition of the RL Media minority interest.

American Living

In Fiscal 2008, the Company launched *American Living*, a new lifestyle brand created exclusively in the U.S. for distribution by JCPenney through the Company's new Global Brand Concepts (GBC) group. The Company began shipping related product to JCPenney in December 2007 to support the launch of this new product line. The success of *American Living* and the introduction of new product categories in both the U.S. and overseas may be negatively impacted in Fiscal 2009 by ongoing economic uncertainty. See *Global Economic Uncertainty* for further discussion.

Other Developments

In late Fiscal 2007, the Company formed the Ralph Lauren Watch and Jewelry Company, S.A.R.L. (the RL Watch Company), a joint venture with Financiere Richemont SA (Richemont), the Swiss Luxury Goods Group. The Company began to incur certain start-up costs in Fiscal 2008 to support the launch of this business, which is expected to occur in the spring of calendar 2009.

See Note 5 to the accompanying audited consolidated financial statements for further discussion of the Company's acquisitions and joint venture formed during the fiscal years presented.

Table of Contents**RESULTS OF OPERATIONS***Fiscal 2008 Compared to Fiscal 2007*

The following table summarizes our results of operations and expresses the percentage relationship to net revenues of certain financial statement captions:

	Fiscal Years Ended		\$ Change	% Change
	March 29, 2008	March 31, 2007		
	(millions, except per share data)

Income before provision for income taxes	642.1	643.3	(1.2)	(0.2)%
Provision for income taxes	(222.3)	(242.4)	20.1	(8.3)%
<i>Effective tax rate^(b)</i>	34.6%	37.7%		
Net income	\$ 419.8	\$ 400.9	\$ 18.9	4.7%
Net income per share Basic	\$ 4.10	\$ 3.84	\$ 0.26	6.8%
Net income per share Diluted	\$ 3.99	\$ 3.73	\$ 0.26	7.0%

(a) Includes total depreciation expense of \$154.1 million and \$129.1 million for Fiscal 2008 and Fiscal 2007, respectively.

(b) Effective tax rate is calculated by dividing the provision for income taxes by income before provision for income taxes.

NM Not meaningful.

Net Revenues. Net revenues increased by \$584.7 million, or 13.6%, to \$4.880 billion in Fiscal 2008 from \$4.295 billion in Fiscal 2007. The increase was driven by a combination of organic growth, acquisitions and favorable foreign currency effects. Excluding the effect of acquisitions, net revenues increased by \$371.2 million, or 8.6%. On a reported basis, wholesale revenues increased by \$442.2 million primarily as a result of incremental revenues from the newly acquired Impact 21 and Small Leathergoods businesses, the inclusion of revenues from the initial shipments of the *American Living* product line to JCPenney and increased sales in our global menswear and womenswear product lines, primarily driven by strong performance in Europe. The increase in net revenues also was driven by an increase of \$169.4 million in our Retail segment revenues as a result of an increase in comparable global retail store sales, continued global store expansion and growth in RalphLauren.com sales. The increase in net

Table of Contents

revenues was partially offset by a decrease of \$26.9 million in licensing revenue, primarily due to a decrease in international licensing royalties as a result of the loss of licensing revenues from Impact 21, which is now consolidated as part of the Wholesale segment. Also contributing to the decrease in licensing revenue was a net decrease in domestic licensing royalties, primarily due to the absence of approximately \$8 million of minimum royalty and design-service fees received in connection with the termination of a licensing arrangement in the prior fiscal year.

Net revenues for our three business segments are provided below:

	Fiscal Years Ended		\$ Change	% Change
	March 29, 2008	March 31, 2007 (millions)		
Net Revenues:				
Wholesale	\$ 2,758.1	\$ 2,315.9	\$ 442.2	19.1%
Retail	1,912.6	1,743.2	169.4	9.7%
Licensing	209.4	236.3	(26.9)	(11.4)%
Total net revenues	\$ 4,880.1	\$ 4,295.4	\$ 584.7	13.6%

Wholesale net revenues The net increase primarily reflects:

the inclusion of \$254 million of revenues from the newly acquired Impact 21 and Small Leathergoods businesses, net of intercompany eliminations;

an approximate \$47 million increase in our European businesses on a constant currency basis driven by increased sales in our menswear and womenswear product lines;

an aggregate \$81 million net increase in our U.S. businesses. The net increase was primarily due to the initial shipments of the *American Living* product line to JCPenney; an increase in our menswear shipments; a net increase in womenswear, primarily driven by *Chaps*, partially offset by increased promotional activity; and an increase in footwear attributable to increased door penetration. Offsetting these increases were a decline in our childrenswear product lines due to weaker sales at department stores and increased promotional activity; and a planned reduction in our off-price channel denim business; and

a \$60 million increase in revenues due to a favorable foreign currency effect, primarily related to the continued strengthening of the Euro in comparison to the U.S. dollar in Fiscal 2008.

Retail net revenues For purposes of the discussion of retail operating performance below, we refer to the measure comparable store sales. Comparable store sales refer to the growth of sales in stores that are open for at least one full fiscal year. Sales for stores that are closing during a fiscal year are excluded from the calculation of comparable store sales. Sales for stores that are either relocated, enlarged (as defined by gross square footage expansion of 25% or greater) or closed for 30 or more consecutive days for renovation are also excluded from the calculation of comparable store sales until such stores have been in their location or in a newly renovated state for at least one full fiscal year. Comparable store sales information includes both Ralph Lauren and Club Monaco stores.

Table of Contents

The increase in retail net revenues primarily reflects:

a \$87 million aggregate net increase in comparable full-price and factory store sales on a global basis, including a net aggregate favorable \$22 million foreign currency effect. This net increase was driven by increases in comparable store sales as provided below:

	Fiscal Year Ended March 29, 2008
Increases in comparable store sales as reported:	
Full-price Ralph Lauren store sales	6.6%
Full-price Club Monaco store sales	5.7%
Factory store sales	5.5%
Total increase in comparable store sales as reported	5.8%
Increases in comparable store sales excluding the effect of foreign currency:	
Full-price Ralph Lauren store sales	4.3%
Full-price Club Monaco store sales	5.7%
Factory store sales	4.2%
Total increase in comparable store sales excluding the effect of foreign currency	4.3%

a \$52 million aggregate net increase in sales from non-comparable stores, primarily relating to new store openings within the past fiscal year. There was a net increase in average global store count of 9 stores, to a total of 313 stores, compared to the prior fiscal year. The net increase in store count was primarily due to several new domestic and international full-price and factory store openings; and

a \$30 million, or 26.4%, increase in sales at RalphLauren.com.

Licensing revenue The net decrease primarily reflects:

a \$26 million net decrease in international licensing royalties, primarily due to the loss of licensing revenues from Impact 21, which is now consolidated as part of the Wholesale segment; and

a \$1 million net decrease in domestic licensing royalties, primarily due to the absence of approximately \$8 million of minimum royalty and design-service fees received in connection with the termination of a licensing arrangement in the prior fiscal year. The net decrease was partially offset by an increase in eyewear-related royalties as a result of the licensing agreement entered into with Luxottica, which took effect on January 1, 2007.

Gross Profit. Cost of goods sold includes the expenses incurred to acquire and produce inventory for sale, including product costs, freight-in, and import costs, as well as changes in reserves for shrinkage and inventory obsolescence. The costs of selling merchandise, including preparing the merchandise for sale, such as picking, packing, warehousing and order charges, are included in SG&A expenses.

Gross profit increased by \$301.9 million, or 12.9%, to \$2.638 billion in Fiscal 2008 from \$2.336 billion in Fiscal 2007. Gross profit as a percentage of net revenues decreased by 30 basis points to 54.1% in Fiscal 2008 from 54.4% in Fiscal 2007, primarily due to the dilutive effect of our recent acquisitions. Excluding the effect of acquisitions, gross profit increased by \$208.6 million, or 8.9%, and gross profit as a percentage of net revenues increased 10 basis points

compared to Fiscal 2007. The increase in gross profit as a percentage of net revenues was due to improved performance in our European wholesale operations which generally carry higher margins, offset in part by increased domestic promotional activity as well as a slight change in the overall relative sales mix between the Wholesale segment and the higher margin Retail and Licensing segments.

Gross profit as a percentage of net revenues is dependent upon a variety of factors, including changes in the relative sales mix among distribution channels, changes in the mix of products sold, the timing and level of promotional activities, foreign currency exchange rates, and fluctuations in material costs. These factors, among others, may cause gross profit as a percentage of net revenues to fluctuate from year to year.

Table of Contents

We anticipate that current macroeconomic challenges, including inflationary pressures on raw material and fuel costs, could negatively affect the cost of our products and related gross profit percentages in Fiscal 2009. See Item 1A *Risk Factors* for further discussion.

Selling, General and Administrative Expenses. SG&A expenses primarily include compensation and benefits, marketing, distribution, information technology, facilities, legal and other costs associated with finance and administration. SG&A expenses increased by \$269.1 million, or 16.2%, to \$1.932 billion in Fiscal 2008 from \$1.663 billion in Fiscal 2007. SG&A expenses as a percent of net revenues increased to 39.6% in Fiscal 2008 from 38.7% in Fiscal 2007. The net 90 basis point increase was primarily associated with operating expenses at the Company's newly acquired businesses and certain start-up costs related to new business launches. The \$269.1 million increase in SG&A expenses was primarily driven by:

the inclusion of SG&A costs of approximately \$91 million for our newly acquired Impact 21 and Small Leathergoods businesses, including costs incurred pursuant to transition service arrangements;

higher stock-based compensation expense of approximately \$27 million primarily due to an increase in the Company's share price as of the date of its annual equity award grant in the second quarter of Fiscal 2008 compared to the share price as of the comparable grant date in Fiscal 2007;

higher compensation-related expenses (excluding stock-based compensation) of approximately \$56 million, principally relating to increased selling costs associated with higher retail and wholesale sales and our ongoing product line expansion, including *American Living* and a dedicated dress business across multiple brands, as well as severance-related costs;

an approximate \$39 million increase in rent and utility costs to support the ongoing global growth of our businesses, including rent expense related to certain retail stores scheduled to open in Fiscal 2009;

an approximate \$25 million increase in depreciation expense primarily associated with global retail store expansion, construction and renovation of department store shop-in-shops and investments in our facilities and technological infrastructure; and

an approximate \$36 million increase in SG&A expenses due to unfavorable foreign currency effects, primarily related to the continued strengthening of the Euro in comparison to the U.S. dollar during Fiscal 2008.

Amortization of Intangible Assets. Amortization of intangible assets increased by \$31.6 million, to \$47.2 million in Fiscal 2008 from \$15.6 million in Fiscal 2007. The net increase was primarily due to the amortization of intangible assets acquired in connection with the Company's recent acquisitions. See *Recent Developments* for further discussion of the acquisitions.

Impairment of Retail Assets. A non-cash impairment charge of \$5.0 million was recognized in Fiscal 2008 to reduce the carrying value of certain long-lived assets in the Company's Retail segment to their estimated fair value. The impairment was primarily attributable to lower-than-expected operating cash flow performance in certain stores. No impairment charges were recognized in Fiscal 2007. See Note 7 to the accompanying audited consolidated financial statements for further discussion.

Restructuring Charges. Restructuring charges of \$4.6 million were recognized in Fiscal 2007 primarily associated with the Club Monaco retail business. No significant restructuring charges were recognized in Fiscal 2008. See Note 11 to the accompanying audited consolidated financial statements for further discussion.

Operating Income. Operating income increased slightly by \$0.8 million, or 0.1%, to \$653.4 million in Fiscal 2008 from \$652.6 million in Fiscal 2007. Operating income as a percentage of revenue decreased 180 basis points, to 13.4% in Fiscal 2008 from 15.2% in Fiscal 2007, primarily due to the effect of purchase accounting relating to the acquisitions. Excluding the effect of acquisitions, operating income increased by \$43.0 million, or 6.6%, while operating income as a percentage of net revenues decreased 30 basis points in Fiscal 2008. The decrease in operating income as a percentage of net revenues primarily reflected the increase in SG&A expenses due to business expansion, partially offset by an increase in gross profit margin as previously discussed.

Table of Contents

Operating income as reported for our three business segments is provided below:

	Fiscal Years Ended			
	March 29, 2008	March 31, 2007 (millions)	\$ Change	% Change
Operating Income:				
Wholesale	\$ 565.4	\$ 477.8	\$ 87.6	18.3%
Retail	204.2	224.2	(20.0)	(8.9)%
Licensing	96.7	141.6	(44.9)	(31.7)%
	866.3	843.6	22.7	2.7%
Less:				
Unallocated corporate expenses	(217.0)	(183.4)	(33.6)	18.3%
Unallocated legal and restructuring charges	4.1	(7.6)	11.7	(153.9)%
Total operating income	\$ 653.4	\$ 652.6	\$ 0.8	0.1%

Wholesale operating income increased by \$87.6 million, including the favorable effects from the Japanese Business and Small Leathergoods Business Acquisitions. Excluding the effects of these acquisitions, wholesale operating income increased by \$61.4 million primarily as a result of increased net sales, including shipments of *American Living*, and improved gross margin primarily in our European wholesale operations, offset in part by increased domestic promotional activity in certain product categories. The increase was partially offset by higher net SG&A expenses in support of our new product lines.

Retail operating income decreased by \$20.0 million, including the unfavorable effects from purchase accounting related to the RL Media Minority Interest Acquisition. Excluding the effects of the acquisition, retail operating income decreased by \$9.0 million primarily as a result of increased markdown activity, a non-cash impairment charge of \$5.0 million, and an increase in occupancy and other operating costs principally related to worldwide store expansion, as we continue to develop and invest in our existing retail concepts and formats. The decrease also reflected an increase in selling-related salaries and associated costs, as well as increased fulfillment costs associated with higher sales at RalphLauren.com.

Licensing operating income decreased by \$44.9 million, including the unfavorable effects from the Japanese Business and Small Leathergoods Business Acquisitions. Excluding the effects of these acquisitions, licensing operating income increased by \$12.5 million primarily due to an increase in eyewear-related royalties. This increase was partially offset by the absence of approximately \$8 million of minimum royalty and design-service fees received in connection with the termination of a licensing arrangement in the prior fiscal year.

Unallocated corporate expenses increased by \$33.6 million, primarily as a result of increases in brand-related marketing costs, including costs associated with various events related to the Company's 40th anniversary, and compensation-related and facilities costs to support the ongoing growth of our businesses. The increase in compensation-related costs includes higher stock-based compensation expense and severance-related costs, as previously discussed under *SG&A expenses*.

Unallocated legal and restructuring charges were comprised of a reversal of an excess reserve in the amount of \$4.1 million in Fiscal 2008 related to the Credit Card Matters (as defined in Note 15 to the accompanying audited consolidated financial statements). Unallocated legal and restructuring charges were \$7.6 million in Fiscal 2007 and were principally associated with the Club Monaco Restructuring Plan charges of \$4.0 million (as defined in Note 11 to the accompanying audited consolidated financial statements) and costs of \$3.0 million related to the Credit Card Matters. No significant unallocated legal and restructuring charges were recognized in Fiscal 2008.

Foreign Currency Gains (Losses). The effect of foreign currency exchange rate fluctuations resulted in a loss of \$6.4 million in Fiscal 2008, compared to a loss of \$1.5 million in Fiscal 2007. Foreign currency losses increased compared to the prior fiscal year primarily due to a \$2.0 million write-off of foreign currency option contracts, entered into to manage certain foreign currency exposures associated with the Japanese Business Acquisitions, most of which have expired unexercised as of March 29, 2008, hedge activity associated with the return of capital from a foreign subsidiary and intercompany royalty activity, as well as the timing of the settlement of third party and

Table of Contents

intercompany receivables and payables (that were not of a long-term investment nature). Foreign currency gains and losses are unrelated to the impact of changes in the value of the U.S. dollar when operating results of our foreign subsidiaries are translated to U.S. dollars.

Interest Expense. Interest expense includes the borrowing costs of our outstanding debt, including amortization of debt issuance costs. Interest expense increased by \$4.1 million to \$25.7 million in Fiscal 2008 from \$21.6 million in Fiscal 2007. The increase is primarily due to additional borrowings undertaken during the first quarter of Fiscal 2008 in connection with the Japanese Business Acquisitions (see *Debt and Covenant Compliance* for further discussion), as well as the higher principal amount of our outstanding Euro denominated debt. This increase was partially offset by the absence of overlapping interest on debt during the period between the issuance of the 2006 Euro Debt and the repayment of approximate 227 million principal amount of 6.125% notes outstanding that were due on November 22, 2006, from an original issuance of 275 million in 1999 (the 1999 Euro Debt), in the prior fiscal year.

Interest and Other Income, net. Interest and other income, net, decreased by \$1.4 million, to \$24.7 million in Fiscal 2008 from \$26.1 million in Fiscal 2007. This decrease was principally driven by lower average interest rates, lower balances on our invested excess cash and higher transaction-related costs.

Equity in Income (Loss) of Equity-Method Investees. The equity in loss of equity-method investees of \$1.8 million in Fiscal 2008 related to certain start-up costs associated with the recently formed joint venture, RL Watch Company, which the Company accounts for under the equity method of accounting. The equity in income of equity-method investees of \$3.0 million in Fiscal 2007 related to Impact 21, which was previously accounted for as an equity-method investment. The results of operations for Impact 21 have been consolidated in the Company's results of operations commencing April 1, 2007. Accordingly, no equity income related to Impact 21 was recorded in Fiscal 2008. See *Recent Developments* for further discussion of the Company's Impact 21 Acquisition.

Minority Interest Expense. Minority interest expense decreased by \$13.2 million, to \$2.1 million in Fiscal 2008 from \$15.3 million in Fiscal 2007. The decrease is related to the Company's acquisition of the remaining 50% interests in RL Media and PRL Japan. This decrease was partially offset by an increase related to the allocation of Impact 21's net income to the holders of the approximate 80% interest not owned by the Company prior to the closing date of the related tender offer and to the holders of the remaining approximate 3% interest not owned by the Company as of the end of Fiscal 2008. See *Recent Developments* for further discussion of the Company's acquisitions.

Provision for Income Taxes. The provision for income taxes represents federal, foreign, state and local income taxes. The provision for income taxes decreased by \$20.1 million, or 8.3%, to \$222.3 million in Fiscal 2008 from \$242.4 million in Fiscal 2007. This decrease was primarily due to a decrease in our reported effective tax rate of 310 basis points, to 34.6% in Fiscal 2008 from 37.7% in Fiscal 2007, and a decrease in pretax income in Fiscal 2008 compared to Fiscal 2007. The lower effective tax rate is primarily due to tax reserve reductions associated with an audit settlement and the expiration of a statute of limitations, lower state income taxes as well as a change in the geographic mix of earnings, partially offset by certain higher, non-deductible expenses under § 162(m) of the Internal Revenue Code. The effective tax rate differs from statutory rates due to the effect of state and local taxes, tax rates in foreign jurisdictions and certain nondeductible expenses. Our effective tax rate will change from year-to-year based on non-recurring factors including, but not limited to, the geographic mix of earnings, the timing and amount of foreign dividends, enacted tax legislation, state and local taxes, tax audit findings and settlements, and the interaction of various global tax strategies. See *Critical Accounting Policies* for a discussion on the accounting for uncertain tax positions and the Company's adoption of FIN 48 as of the beginning of Fiscal 2008.

Net Income. Net income increased by \$18.9 million, or 4.7%, to \$419.8 million in Fiscal 2008 from \$400.9 million in Fiscal 2007. The increase in net income principally related to the \$20.1 million decrease in provision for income taxes discussed above and the \$0.8 million increase in operating income. The increase was partially offset by reductions in

operating income primarily related to the dilutive effect of purchase accounting, an increase in domestic promotional activity and higher SG&A expenses principally associated with our recent acquisitions. The net dilutive effect related to the Company's recent acquisitions included approximately \$53 million of non-cash amortization of intangible assets and inventory. See *Recent Developments* for further discussion of the Company's acquisitions.

Table of Contents

Net Income Per Diluted Share. Net income per diluted share increased by \$0.26, or 7.0%, to \$3.99 per share in Fiscal 2008 from \$3.73 per share in Fiscal 2007. The increase in diluted per share results was primarily due to the higher level of net income and lower weighted-average diluted shares outstanding for Fiscal 2008 compared to the prior fiscal year.

Fiscal 2007 Compared to Fiscal 2006

The following table summarizes our results of operations and expresses the percentage relationship to net revenues of certain financial statement captions:

	Fiscal Years Ended		\$ Change	% Change
	March 31,	April 1,		
	2007	2006		
	(millions, except per share data)			
Net revenues	\$ 4,295.4	\$ 3,746.3	\$ 549.1	14.7%
Cost of goods sold ^(a)	(1,959.2)	(1,723.9)	(235.3)	13.7%
Gross profit	2,336.2	2,022.4	313.8	15.5%
<i>Gross profit as % of net revenues</i>	54.4%	54.0%		
Selling, general and administrative expenses ^(a)	(1,663.4)	(1,476.9)	(186.5)	12.6%
<i>SG&A as % of net revenues</i>	38.7%	39.4%		
Amortization of intangible assets	(15.6)	(9.1)	(6.5)	71.4%
Impairment of retail assets		(10.8)	10.8	(100.0)%
Restructuring charges	(4.6)	(9.0)	4.4	(48.9)%
Operating income	652.6	516.6	136.0	26.3%
<i>Operating income as % of net revenues</i>	15.2%	13.8%		
Foreign currency gains (losses)	(1.5)	(5.7)	4.2	(73.7)%
Interest expense	(21.6)	(12.5)	(9.1)	72.8%
Interest and other income, net	26.1	13.7	12.4	90.5%
Equity in income (loss) of equity-method investees	3.0	4.3	(1.3)	(30.2)%
Minority interest expense	(15.3)	(13.5)	(1.8)	13.3%
Income before provision for income taxes	643.3	502.9	140.4	27.9%
Provision for income taxes	(242.4)	(194.9)	(47.5)	24.4%
<i>Effective tax rate^(b)</i>	37.7%	38.8%		
Net income	\$ 400.9	\$ 308.0	\$ 92.9	30.2%
Net income per share Basic	\$ 3.84	\$ 2.96	\$ 0.88	29.7%
Net income per share Diluted	\$ 3.73	\$ 2.87	\$ 0.86	30.0%

(a)

Includes total depreciation expense of \$129.1 million and \$117.9 million for Fiscal 2007 and Fiscal 2006, respectively.

- (b) Effective tax rate is calculated by dividing the provision for income taxes by income before provision for income taxes.

Table of Contents

Net Revenues. Net revenues increased by \$549.1 million, or 14.7%, to \$4.295 billion in Fiscal 2007 from \$3.746 billion in Fiscal 2006. The increase was experienced in all geographic regions and was due to a combination of organic growth and acquisitions. Wholesale revenues increased by \$373.4 million, primarily as a result of revenues from the newly acquired Polo Jeans Business, the successful launch of the new Chaps for women and children product lines, and increased sales in our global menswear and womenswear product lines. The increase in net revenues also was driven by a revenue increase of \$184.6 million in our Retail segment as a result of improved comparable global retail store sales, continued store expansion and growth in RalphLauren.com sales. Licensing revenue decreased by \$8.9 million primarily due to the loss of product licensing revenue related to the Polo Jeans and Footwear Businesses (now included as part of the Wholesale segment). Net revenues for our three business segments are provided below:

	Fiscal Years Ended		\$ Change	% Change
	March 31, 2007	April 1, 2006 (millions)		
Net Revenues:				
Wholesale	\$ 2,315.9	\$ 1,942.5	\$ 373.4	19.2%
Retail	1,743.2	1,558.6	184.6	11.8%
Licensing	236.3	245.2	(8.9)	(3.6)%
Total net revenues	\$ 4,295.4	\$ 3,746.3	\$ 549.1	14.7%

Wholesale net revenues the net increase primarily reflects:

the inclusion of \$190 million of revenues from our newly acquired Footwear and Polo Jeans Businesses;

a \$156 million aggregate net increase led by our global menswear, womenswear and childrenswear businesses, primarily driven by strong growth in our Lauren product line, increased full-price sell-through performance in our menswear business and the effects from the successful domestic launch of our new Chaps for women and children product lines. These increases were partially offset by a decline in footwear sales (excluding the impact from acquisition) due to our planned integration efforts as we repositioned the related product line; and

a \$27 million increase in revenues due to a favorable foreign currency effect, primarily related to the strengthening of the Euro in comparison to the U.S. dollar in Fiscal 2007.

Retail net revenues The net increase primarily reflects:

a \$104 million aggregate net increase in comparable full-price and factory store sales on a global basis, including a net aggregate favorable \$9 million foreign currency effect. This net increase was driven by increases in comparable store sales as provided below:

**Fiscal Year Ended
March 31,
2007**

Increases in comparable store sales as reported:	
Full-price Ralph Lauren store sales	6.6%
Full-price Club Monaco store sales	10.9%
Factory store sales	8.1%
Total increase in comparable store sales as reported	7.6%
Increases in comparable store sales excluding the effect of foreign currency:	
Full-price Ralph Lauren store sales	5.7%
Full-price Club Monaco store sales	10.9%
Factory store sales	7.5%
Total increase in comparable store sales excluding the effect of foreign currency	6.9%

Table of Contents

an increase in sales from non-comparable stores, primarily relating to new store openings within the past fiscal year. There was a net increase in global store count of 3 stores compared to the prior fiscal year, to a total of 292 stores. The net increase in store count was primarily due to several new openings of full-price stores, partially offset by the closure of certain Club Monaco Caban Concept and factory stores and Polo Jeans factory stores; and

a \$26 million, or 28.9%, increase in sales at RalphLauren.com.

Licensing revenue the net decrease primarily reflects:

the loss of licensing revenues from our Polo Jeans and Footwear Businesses now included as part of the Wholesale segment;

a decline in eyewear-related royalties due to the wind-down of the Company's pre-existing licensing agreement prior to the commencement of the new Eyewear Licensing Agreement which took effect on January 1, 2007;

a decline in Home licensing royalties; and

a partially offsetting increase in international licensing royalties and the accelerated receipt and recognition of approximately \$8 million of minimum royalty and design-service fees in connection with the termination of a domestic license agreement during Fiscal 2007.

Gross Profit. Gross profit increased by \$313.8 million, or 15.5%, to \$2.336 billion in Fiscal 2007 from \$2.022 billion in Fiscal 2006. Gross profit as a percentage of net revenues also increased to 54.4% in Fiscal 2007 from 54.0% in Fiscal 2006. The increase in gross profit reflected higher net sales and improved merchandise margins in our wholesale and retail businesses, including the continued emphasis on shifting the mix from off-price to full-price sales across our wholesale product lines, as well as the focus on improved inventory management. However, the overall improvement in gross profit margins was partially offset by the lower gross profit performance of our newly acquired Polo Jeans Business associated with the liquidation of existing inventory in anticipation of the redesign and launch of our new denim and casual sportswear product lines during spring of calendar 2007. Gross profit margins related to our Footwear Business have also been negatively impacted during Fiscal 2007, primarily by integration efforts as we repositioned the related product line.

Selling, General and Administrative Expenses. SG&A expenses increased by \$186.5 million, or 12.6%, to \$1.663 billion in Fiscal 2007 from \$1.477 billion in Fiscal 2006. SG&A expenses as a percent of net revenues decreased to 38.7% in Fiscal 2007 from 39.4% in Fiscal 2006. The 70 basis point improvement is primarily indicative of our ability to successfully leverage our global infrastructure as we acquire businesses and grow product lines organically. The \$186.5 million net increase in SG&A expenses was primarily driven by:

higher compensation-related expenses (excluding stock-based compensation) of approximately \$69 million, principally relating to increased selling costs associated with higher retail sales and our ongoing worldwide retail store and product line expansion, and higher investment in infrastructure to support the ongoing growth of our businesses;

the inclusion of SG&A costs for our newly acquired Footwear and Polo Jeans Businesses, including costs incurred pursuant to transition service arrangements;

a \$38 million increase in brand-related marketing and facilities costs to support the ongoing growth of our businesses;

an approximate \$10 million increase in depreciation costs in connection with our increased capital expenditures and global expansion;

incremental stock-based compensation expense of approximately \$17 million as a result of the adoption of FAS 123R as of April 2, 2006 (see Note 18 to the accompanying audited consolidated financial statements for further discussion); and

a net reduction in credit card contingency charges of approximately \$4 million.

Table of Contents

Amortization of Intangible Assets. Amortization of intangible assets increased by \$6.5 million, to \$15.6 million in Fiscal 2007 from \$9.1 million in Fiscal 2006. The increase was due to the amortization of intangible assets related to the Polo Jeans Business acquired in February 2006 and the Footwear Business acquired in July 2005.

Impairment of Retail Assets. A non-cash impairment charge of \$10.8 million was recognized during Fiscal 2006 to reduce the carrying value of fixed assets largely relating to our Club Monaco brand. No impairment charges were recognized in Fiscal 2007.

Restructuring Charges. Restructuring charges decreased by \$4.4 million, to \$4.6 million in Fiscal 2007 from \$9.0 million in Fiscal 2006. Restructuring charges recognized in both periods were principally associated with the Club Monaco retail business. See Note 11 to the accompanying audited consolidated financial statements for further discussion.

Operating Income. Operating income increased by \$136.0 million, or 26.3%, to \$652.6 million in Fiscal 2007 from \$516.6 million in Fiscal 2006. Operating income as a percentage of revenue increased 140 basis points, to 15.2% in Fiscal 2007 from 13.8% in Fiscal 2006, reflecting our revenue growth, gross profit percentage expansion and improved SG&A expense leveraging. Operating income for our three business segments is provided below:

	Fiscal Years Ended		\$ Change	% Change
	March 31, 2007	April 1, 2006 (millions)		
Operating Income:				
Wholesale	\$ 477.8	\$ 398.3	\$ 79.5	20.0%
Retail	224.2	140.0	84.2	60.1%
Licensing	141.6	153.5	(11.9)	(7.8)%
	843.6	691.8	151.8	21.9%
Less:				
Unallocated corporate expenses	(183.4)	(159.1)	(24.3)	15.3%
Unallocated legal and restructuring charges	(7.6)	(16.1)	8.5	(52.8)%
Total operating income	\$ 652.6	\$ 516.6	\$ 136.0	26.3%

Wholesale operating income increased by \$79.5 million, primarily as a result of higher net sales and improved gross margin rates in most product lines, as well as the incremental contribution from the newly acquired Polo Jeans Business and the new Chaps product lines. These increases were partially offset by increases in SG&A expenses in support of new product lines across all geographic territories and higher amortization expenses associated with intangible assets recognized in acquisitions.

Retail operating income increased by \$84.2 million, primarily as a result of increased net sales and improved gross margin rates, as well as the absence of a non-cash impairment charge of \$10.8 million recognized in Fiscal 2006. These increases were partially offset by an increase in selling related salaries and associated costs in connection with the increase in retail sales, including RalphLauren.com, and worldwide store expansion, including the new Tokyo

flagship store.

Licensing operating income decreased by \$11.9 million primarily due to the loss of royalty income formerly collected in connection with the Footwear and Polo Jeans Businesses, which have now been acquired. The decline in Home royalties also contributed to the decrease along with the decline in eyewear royalties, due to the wind-down of the Company's pre-existing licensing agreement. These decreases were partially offset by an increase in international royalties, as well as the accelerated receipt and recognition of approximately \$8 million of minimum royalty and design-service fees in connection with the termination of a domestic license agreement during Fiscal 2007.

Unallocated corporate expenses increased by \$24.3 million, primarily as a result of increases in brand-related marketing, payroll-related and facilities costs to support the ongoing growth of our businesses. The increase in compensation-related costs includes higher stock-based compensation expense due to the adoption of FAS 123R (as further discussed in Note 18 to the accompanying audited consolidated financial statements).

Table of Contents

Unallocated legal and restructuring charges were \$7.6 million during Fiscal 2007, compared to \$16.1 million during Fiscal 2006. Fiscal 2007 charges were principally associated with the Club Monaco Restructuring Plan charges of \$4.0 million (as defined in Note 11 to the accompanying audited consolidated financial statements) and legal costs of \$3.0 million related to the Credit Card Matters (as defined in Note 15 to the accompanying audited consolidated financial statements). Fiscal 2006 charges also primarily included the Club Monaco Restructuring Plan charges of \$9.0 million and legal costs of \$6.8 million associated with the Credit Card Matters.

Foreign Currency Gains (Losses). The effect of foreign currency exchange rate fluctuations resulted in a loss of \$1.5 million in Fiscal 2007, compared to a loss of \$5.7 million in Fiscal 2006. The decrease in foreign currency losses compared to the prior fiscal year is due to the timing of the settlement of intercompany receivables and payables (that were not of a long-term investment nature) between certain of our international and domestic subsidiaries.

Interest Expense. Interest expense increased by \$9.1 million to \$21.6 million in Fiscal 2007 from \$12.5 million in Fiscal 2006. The increase is primarily due to an increase in interest on capitalized leases due to additional obligations in Fiscal 2007 compared to the prior fiscal year and overlapping interest on debt during the period between the issuance of the 2006 Euro Debt and the repayment of the 1999 Euro Debt. In addition, prior year interest expense was favorably impacted by the interest rate swap agreements which were terminated at the end of Fiscal 2006.

Interest and Other Income, net. Interest and other income, net, increased by \$12.4 million, to \$26.1 million in Fiscal 2007 from \$13.7 million in Fiscal 2006. This increase is primarily driven by higher average interest rates and higher balances on our invested excess cash.

Equity in Income (Loss) of Equity-Method Investees. Equity in the income of equity-method investees decreased by \$1.3 million, to \$3.0 million in Fiscal 2007 from \$4.3 million in Fiscal 2006. This income relates to our 20% investment in Impact 21, a company that holds the sublicense with PRL Japan for our men's, women's and jeans businesses in Japan. See *Recent Developments* for further discussion of the Company's Japanese Business Acquisitions that occurred in May 2007.

Minority Interest Expense. Minority interest expense increased by \$1.8 million, to \$15.3 million in Fiscal 2007 from \$13.5 million in Fiscal 2006. The net increase is primarily related to the improved operating performance of RL Media compared to the prior period and the associated allocation of income to the minority partners. As of March 28, 2007, the Company acquired the remaining 50% interest in RL Media held by the minority partners (see *Recent Developments* for further discussion).

Provision for Income Taxes. The provision for income taxes represents federal, foreign, state and local income taxes. The provision for income taxes increased by \$47.5 million, or 24.4%, to \$242.4 million in Fiscal 2007 from \$194.9 million in Fiscal 2006. This increase is a result of the increase in our pretax income, partially offset by a decrease in our reported effective tax rate, to 37.7% in Fiscal 2007 from 38.8% in Fiscal 2006. The lower effective tax rate is primarily due to a change in the mix of earnings, which resulted in more income being taxed at lower rates than in the previous fiscal year. See *Critical Accounting Policies* for a discussion on the accounting for uncertain tax positions and the Company's adoption of FIN 48 in Fiscal 2008.

Net Income. Net income increased by \$92.9 million, or 30.2%, to \$400.9 million in Fiscal 2007 from \$308.0 million in Fiscal 2006. The increase in net income principally related to our \$136.0 million increase in operating income, as previously discussed, offset in part by an increase of \$47.5 million in our provision for income taxes.

Net Income Per Diluted Share. Net income per diluted share increased by \$0.86, or 30.0%, to \$3.73 per share in Fiscal 2007 from \$2.87 per share in Fiscal 2006. The increase in diluted per share results was primarily due to the higher level of net income, partially offset by higher weighted-average diluted shares outstanding for Fiscal 2007.

Table of Contents**FINANCIAL CONDITION AND LIQUIDITY*****Financial Condition***

	March 29, 2008	March 31, 2007 (millions)	\$ Change
Cash and cash equivalents	\$ 551.5	\$ 563.9	\$ (12.4)
Current maturities of debt	(206.4)		(206.4)
Long-term debt	(472.8)	(398.8)	(74.0)
Net cash (debt) ^(a)	\$ (127.7)	\$ 165.1	\$ (292.8)
Short-term investments	\$ 74.3	\$	\$ 74.3
Stockholders' equity	\$ 2,389.7	\$ 2,334.9	\$ 54.8

(a) Net cash is defined as total cash and cash equivalents less total debt and net debt is defined as total debt less total cash and cash equivalents.

The decrease in our net cash position as of the end of Fiscal 2008 was primarily due to the Japanese Business Acquisitions, net of approximately \$239 million of Impact 21's cash on-hand acquired. As part of the Japanese Business Acquisitions, the Company borrowed ¥20.5 billion (approximately \$206 million as of March 29, 2008) under a one-year term loan agreement pursuant to an amendment and restatement to the Company's existing credit facility. The Company used the proceeds from these borrowings and available cash-on hand to fund the Japanese Business Acquisitions. In addition, the Company spent \$217.1 million for capital expenditures and used \$475.4 million to repurchase 6.0 million shares of Class A common stock.

The increase in stockholders' equity was primarily due to the Company's net income and higher other comprehensive income during Fiscal 2008, offset in part by an increase in treasury stock as a result of the Company's common stock repurchase program and a reduction in retained earnings of \$62.5 million in connection with the adoption of FIN 48.

Subsequent to year end, the Company repaid its current maturities of debt using available cash on-hand.

Cash Flows***Fiscal 2008 Compared to Fiscal 2007***

	Fiscal Years Ended March 29, 2008	March 31, 2007 (millions)	\$ Change
Net cash provided by operating activities	\$ 695.4	\$ 796.1	\$ (100.7)

Edgar Filing: POLO RALPH LAUREN CORP - Form 10-K

Net cash used in investing activities	(505.0)	(434.6)	(70.4)
Net cash provided by (used in) financing activities	(260.5)	(95.2)	(165.3)
Effect of exchange rate changes on cash and cash equivalents	57.7	11.9	45.8
Net increase (decrease) in cash and cash equivalents	\$ (12.4)	\$ 278.2	\$ (290.6)

Net Cash Provided by Operating Activities. Net cash provided by operating activities decreased to \$695.4 million in Fiscal 2008, compared to \$796.1 million in Fiscal 2007. This \$100.7 million net decrease in operating cash flow was primarily driven by:

the absence of the approximately \$180 million, net of certain tax withholdings, received under the Eyewear Licensing Agreement in the prior fiscal year; and

an increase in other receivables primarily attributable to the timing of estimated tax payments.

Table of Contents

The above decreases were partially offset by:

an increase in net income before non-cash depreciation, amortization and stock-based compensation expenses;

improved accounts receivable cash collections in the Company's Wholesale segment; and

the effects of ongoing inventory management, which resulted in lower average balance and increased inventory turns across certain businesses.

Other than the items described above, the changes in operating assets and liabilities were attributable to normal operating fluctuations.

Net Cash Used in Investing Activities. Net cash used in investing activities was \$505.0 million in Fiscal 2008, as compared to \$434.6 million in Fiscal 2007. The net increase in cash used in investing activities was primarily driven by:

an increase in net cash used to fund the Company's acquisitions. In Fiscal 2008, the Company used \$188.7 million principally to fund the Japanese Business Acquisitions, net of cash acquired, and the Small Leathersgoods Business Acquisition; whereas in Fiscal 2007, \$176.1 million was used primarily to fund the RL Media Minority Interest Acquisition;

an increase in cash used in connection with capital expenditures. In Fiscal 2008, the Company spent \$217.1 million for capital expenditures, as compared to \$184.0 million in Fiscal 2007. The increase in capital expenditures is primarily associated with global retail store expansion, construction and renovation of department store shop-in-shops and investments in our facilities and technological infrastructure, including showrooms related to our new businesses;

an increase related to purchases of investments of \$96.8 million, less proceeds from sales and maturities of investments of \$12.7 million, in Fiscal 2008; and

a partially offsetting decrease in cash deposits restricted in connection with taxes. During Fiscal 2008, \$15.1 million of cash was restricted as compared to \$74.5 million during Fiscal 2007. Restricted cash was placed in escrow with certain banks as collateral to secure guarantees of a corresponding amount made by the banks to certain international tax authorities on behalf of the Company.

Net Cash Used in Financing Activities. Net cash used in financing activities was \$260.5 million in Fiscal 2008, as compared to \$95.2 million in Fiscal 2007. The increase in net cash used in financing activities was primarily driven by:

increased repurchases of the Company's Class A common stock pursuant to the Company's common stock repurchase program. Approximately 6.0 million shares of Class A common stock at a cost of \$475.4 million were repurchased in Fiscal 2008, as compared to approximately 3.5 million shares of Class A common stock at a cost of \$231.3 million in Fiscal 2007; and

a partially offsetting increase in proceeds from issuance of debt. Fiscal 2008 included the receipt of proceeds from borrowings of ¥20.5 billion (approximately \$169 million as of the borrowing date) under a one-year term loan agreement in connection with the Japanese Business Acquisitions. On a comparative basis, Fiscal 2007 included the receipt of proceeds from the issuance of \$300 million principal amount (\$380.0 million) of 2006

Euro Debt, offset in part by the repayment of approximately 227 million principal amount (\$291.6 million) of 1999 Euro Debt.

Table of Contents***Fiscal 2007 Compared to Fiscal 2006***

	Fiscal Years Ended		
	March 31, 2007	April 1, 2006 (millions)	\$ Change
Net cash provided by operating activities	\$ 796.1	\$ 449.1	\$ 347.0
Net cash used in investing activities	(434.6)	(539.2)	104.6
Net cash provided by (used in) financing activities	(95.2)	33.5	(128.7)
Effect of exchange rate changes on cash and cash equivalents	11.9	(8.2)	20.1
Net increase (decrease) in cash and cash equivalents	\$ 278.2	\$ (64.8)	\$ 343.0

Net Cash Provided by Operating Activities. Net cash provided by operating activities increased to \$796.1 million during Fiscal 2007, compared to \$449.1 million for Fiscal 2006. This \$347.0 million increase in operating cash flow was driven primarily by the increase in net income, the receipt of approximately \$180 million under the new Eyewear Licensing Agreement (net of certain tax withholdings) and the absence of the \$100 million payment to settle the Jones-related Litigation in Fiscal 2006, partially offset by higher tax payments made in Fiscal 2007. Also offsetting the increase in operating cash flow was an increase in working capital needs during Fiscal 2007, primarily as a result of recent expansions and the overall growth in the business. This increase in working capital needs was partially offset by a decrease in accounts receivable days sales outstanding as a result of improved cash collections in the Company's Wholesale segment. On a comparative basis, operating cash flows were reduced by \$33.7 million as a result of a change in the reporting of excess tax benefits from stock-based compensation arrangements. That is, prior to the adoption of FAS 123R, benefits of tax deductions in excess of recognized compensation costs were reported as operating cash flows. FAS 123R requires excess tax benefits to be reported as a financing cash inflow rather than in operating cash flows as a reduction of taxes paid.

Net Cash Used in Investing Activities. Net cash used in investing activities was \$434.6 million for Fiscal 2007, as compared to \$539.2 million for Fiscal 2006. The net decrease in cash used in investing activities is primarily due to acquisition-related activities. In Fiscal 2007, the Company used \$175 million to fund the acquisition of the remaining 50% equity interest in RL Media that it did not previously own, whereas in Fiscal 2006, approximately \$380 million was used primarily to fund the acquisition of the Polo Jeans and Footwear Businesses. In addition, net cash used in investing activities for Fiscal 2007 included \$74.5 million of restricted cash placed in escrow with certain banks as collateral to secure guarantees of a corresponding amount made by the banks to certain international tax authorities on behalf of the Company (see Restricted Cash within Note 3 to the accompanying audited consolidated financial statements for further discussion). Net cash used in investing activities also included \$184.0 million relating to capital expenditures, as compared to \$158.6 million in the prior fiscal year.

Net Cash (Used in)/Provided by Financing Activities. Net cash used in financing activities was \$95.2 million for Fiscal 2007, compared to net cash provided by financing activities of \$33.5 million in Fiscal 2006. The increase in net cash used in financing activities during Fiscal 2007 principally related to the repayment of approximately \$227 million principal amount (\$291.6 million) of the Company's 1999 Euro Debt and the repurchase of 3.5 million shares of Class A common stock pursuant to its common stock repurchase program at a cost of \$231.3 million. Partially offsetting the increase was the receipt of proceeds from the issuance of \$300 million principal amount (approximately \$380 million) of 2006 Euro Debt. This net increase in cash used in financing activities was partially offset by the

change in the reporting of excess tax benefits from stock-based compensation arrangements of \$33.7 million.

Liquidity

The Company's primary sources of liquidity are the cash flow generated from its operations, \$450 million of availability under its credit facility, available cash and equivalents, investments and other financing options. These sources of liquidity are needed to fund the Company's ongoing cash requirements, including working capital requirements, global retail store expansion, construction and renovation of shop-in-shops, investment in technological infrastructure, acquisitions, dividends, debt repayment, stock repurchases, contingent liabilities (including uncertain tax positions) and other corporate activities. Management believes that the Company's existing resources

Table of Contents

of cash will be sufficient to support its operating, capital and debt service requirements for the foreseeable future, including the finalization of acquisitions and plans for business expansion.

As discussed below under the section entitled *Debt and Covenant Compliance*, the Company had no revolving credit borrowings outstanding under its credit facility as of March 29, 2008. However, as discussed further below, the Company may elect to draw on its credit facility or other potential sources of financing for, among other things, a material acquisition, settlement of a material contingency (including uncertain tax positions) or a material adverse business development.

In May 2007, the Company completed the Japanese Business Acquisitions. These transactions were funded with available cash on-hand and ¥20.5 billion of borrowings under a one-year term loan agreement pursuant to an amendment and restatement to the Company's existing credit facility (the Term Loan). Borrowings under the Term Loan bore interest at a fixed rate of 1.2%. The Company repaid the borrowing by its maturity date on May 22, 2008 using approximately \$200 million of Impact 21's cash on-hand acquired as part of the acquisition.

Common Stock Repurchase Program

In August 2007, the Company's Board of Directors approved an expansion of the Company's existing common stock repurchase program that allowed the Company to repurchase up to an additional \$250 million of Class A common stock. Repurchases of shares of Class A common stock are subject to overall business and market conditions. In Fiscal 2008, 6.1 million shares of Class A common stock were repurchased at a cost of \$476.4 million under the expanded and pre-existing programs, including \$24.0 million (0.4 million shares) that was traded prior to the end of the fiscal year for which settlement occurred in April 2008. The remaining availability under the common stock repurchase program was approximately \$142 million as of March 29, 2008.

In addition, during Fiscal 2008, 0.3 million shares of Class A common stock at a cost of \$23.0 million were surrendered to, or withheld by, the Company in satisfaction of withholding taxes in connection with the vesting of awards under the Company's 1997 Long-Term Stock Incentive Plan.

In Fiscal 2007, share repurchases amounted to 3.5 million shares of Class A common stock at a cost of \$231.3 million. In Fiscal 2006, the Company repurchased 69.3 thousand shares of Class A common stock at a cost of \$3.8 million.

In May 2008, the Company's Board of Directors approved a further expansion of the Company's existing common stock repurchase program that allowed the Company to repurchase up to an additional \$250 million of Class A common stock.

Dividends

The Company declared a quarterly dividend of \$0.05 per outstanding share in each quarter of Fiscal 2008, Fiscal 2007 and Fiscal 2006. The aggregate amount of dividend payments was \$20.5 million in Fiscal 2008, \$20.9 million in Fiscal 2007 and \$20.8 million in Fiscal 2006.

The Company intends to continue to pay regular quarterly dividends on its outstanding common stock. However, any decision to declare and pay dividends in the future will be made at the discretion of the Company's Board of Directors and will depend on, among other things, the Company's results of operations, cash requirements, financial condition and other factors that the Board of Directors may deem relevant.

Debt and Covenant Compliance

Euro Debt

The Company has outstanding approximately 300 million principal amount of 4.5% notes due October 4, 2013 (the 2006 Euro Debt). The Company has the option to redeem all of the 2006 Euro Debt at any time at a redemption price equal to the principal amount plus a premium. The Company also has the option to redeem all of the 2006 Euro Debt at any time at par plus accrued interest, in the event of certain developments involving U.S. tax law. Partial redemption of the 2006 Euro Debt is not permitted in either instance. In the event of a change of control

Table of Contents

of the Company, each holder of the 2006 Euro Debt has the option to require the Company to redeem the 2006 Euro Debt at its principal amount plus accrued interest.

The carrying value of the 2006 Euro Debt was \$472.8 million and \$398.8 million as of March 29, 2008 and March 31, 2007, respectively.

Revolving Credit Facility and Term Loan

The Company has a credit facility that provides for a \$450 million unsecured revolving line of credit through November 2011 (the Credit Facility). The Credit Facility also is used to support the issuance of letters of credit. As of March 29, 2008, there were no borrowings outstanding under the Credit Facility, but the Company was contingently liable for \$23.0 million of outstanding letters of credit (primarily relating to inventory purchase commitments). The Company has the ability to expand its borrowing availability to \$600 million subject to the agreement of one or more new or existing lenders under the facility to increase their commitments. There are no mandatory reductions in borrowing ability throughout the term of the Credit Facility.

Borrowings under the Credit Facility bear interest, at the Company's option, either at (a) a base rate determined by reference to the higher of (i) the prime commercial lending rate of JP Morgan Chase Bank, N.A. in effect from time to time and (ii) the weighted-average overnight Federal funds rate (as published by the Federal Reserve Bank of New York) plus 50 basis points or (b) a LIBOR rate in effect from time to time, as adjusted for the Federal Reserve Board's Euro currency liabilities maximum reserve percentage plus a margin defined in the Credit Facility (the applicable margin). The applicable margin of 35 basis points is subject to adjustment based on the Company's credit ratings.

In addition to paying interest on any outstanding borrowings under the Credit Facility, the Company is required to pay a commitment fee to the lenders under the Credit Facility in respect of the unutilized commitments. The commitment fee rate of 8 basis points under the terms of the Credit Facility also is subject to adjustment based on the Company's credit ratings.

The Credit Facility contains a number of covenants that, among other things, restrict the Company's ability, subject to specified exceptions, to incur additional debt; incur liens and contingent liabilities; sell or dispose of assets, including equity interests; merge with or acquire other companies; liquidate or dissolve itself; engage in businesses that are not in a related line of business; make loans, advances or guarantees; engage in transactions with affiliates; and make investments. In addition, the Credit Facility requires the Company to maintain a maximum ratio of Adjusted Debt to Consolidated EBITDAR (the leverage ratio), as such terms are defined in the Credit Facility. As of March 29, 2008, no Event of Default (as such term is defined pursuant to the Credit Facility) has occurred under the Company's Credit Facility.

Upon the occurrence of an Event of Default under the Credit Facility, the lenders may cease making loans, terminate the Credit Facility, and declare all amounts outstanding to be immediately due and payable. The Credit Facility specifies a number of events of default (many of which are subject to applicable grace periods), including, among others, the failure to make timely principal and interest payments or to satisfy the covenants, including the financial covenant described above. Additionally, the Credit Facility provides that an Event of Default will occur if Mr. Ralph Lauren, the Company's Chairman and Chief Executive Officer, and related entities controlled by Mr. Lauren fail to maintain a specified minimum percentage of the voting power of the Company's common stock.

The Credit Facility was amended and restated as of May 22, 2007 to provide for the addition of the Term Loan made to Polo JP Acqui B.V., a wholly owned subsidiary of the Company. The Term Loan was guaranteed by the Company, as well as the other subsidiaries of the Company which currently guarantee the Credit Facility. The proceeds of the Term Loan were used to finance the Japanese Business Acquisitions. Borrowings under the Term Loan bore interest at

a fixed rate of 1.2%. The Company repaid the borrowing by its maturity date on May 22, 2008 using approximately \$200 million of Impact 21's cash on-hand acquired as part of the acquisition. See Note 5 for further discussion of the Japanese Business Acquisitions.

Table of Contents***Contractual and Other Obligations******Firm Commitments***

The following table summarizes certain of the Company's aggregate contractual obligations as of March 29, 2008, and the estimated timing and effect that such obligations are expected to have on the Company's liquidity and cash flow in future periods. The Company expects to fund the firm commitments with operating cash flow generated in the normal course of business and, if necessary, availability under its \$450 million credit facility or other potential sources of financing.

	Fiscal 2009	Fiscal 2010-2011	Fiscal 2012-2013 (millions)	Fiscal 2014 and Thereafter	Total
Term Loan	\$ 206.4	\$	\$	\$	\$ 206.4
Euro Debt				472.8	472.8
Capital leases	8.0	14.9	12.5	37.8	73.2
Operating leases	188.1	321.3	255.7	670.7	1,435.8
Inventory purchase commitments	697.4				697.4
Total	\$ 1,099.9	\$ 336.2	\$ 268.2	\$ 1,181.3	\$ 2,885.6

The following is a description of the Company's material, firmly committed contractual obligations as of March 29, 2008:

Term Loan represents the principal amount due at maturity of the Company's outstanding Term Loan on a U.S. dollar-equivalent basis. The Term Loan was repaid on May 22, 2008 using available cash on-hand;

Euro Debt represents the principal amount due at maturity of the Company's outstanding 2006 Euro Debt on a U.S. dollar-equivalent basis. Amounts do not include any fair value adjustments, call premiums or interest payments;

Lease obligations represent the minimum lease rental payments under noncancelable leases for the Company's real estate and operating equipment in various locations around the world. Approximately 78% of these lease obligations relates to the Company's retail operations. Information has been presented separately for operating and capital leases. In addition to such amounts, the Company is normally required to pay taxes, insurance and occupancy costs relating to its leased real estate properties; and

Inventory purchase commitments represent the Company's legally binding agreements to purchase fixed or minimum quantities of goods at determinable prices.

Excluded from the above contractual obligations table is the non-current liability for unrecognized tax benefits of \$155.2 million recognized as a result of the adoption of FIN 48. This liability for unrecognized tax benefits has been excluded because the Company cannot make a reliable estimate of the period in which the liability will be settled, if ever.

The above table also excludes the following: (i) amounts included in current liabilities, other than the current maturities of debt, in the consolidated balance sheet as of March 29, 2008 as these items will be paid within one year; and (ii) non-current liabilities that have no cash outflows associated with them (e.g., deferred revenue) or the cash outflows associated with them are uncertain or do not represent a purchase obligation as the term is used herein (e.g., deferred taxes and other miscellaneous items).

The Company also has certain contractual arrangements that would require it to make payments if certain circumstances occur. See Note 15 to the accompanying audited consolidated financial statements for a description of the Company's contingent commitments not included in the above table.

Off-Balance Sheet Arrangements

The Company's off-balance sheet firm commitments, which include outstanding letters of credit and minimum funding commitments to investees, amounted to approximately \$29.8 million as of March 29, 2008. The Company

Table of Contents

does not maintain any other off-balance sheet arrangements, transactions, obligations or other relationships with unconsolidated entities that would be expected to have a material current or future effect upon its financial condition or results of operations.

MARKET RISK MANAGEMENT

The Company is exposed to a variety of risks, including changes in foreign currency exchange rates relating to certain anticipated cash flows from its international operations and possible declines in the fair value of reported net assets of certain of its foreign operations, as well as changes in the fair value of its fixed-rate debt relating to changes in interest rates. Consequently, in the normal course of business the Company employs established policies and procedures, including the use of derivative financial instruments, to manage such risks. The Company does not enter into derivative transactions for speculative or trading purposes.

As a result of the use of derivative instruments, the Company is exposed to the risk that counterparties to derivative contracts will fail to meet their contractual obligations. To mitigate the counterparty credit risk, the Company has a policy of only entering into contracts with carefully selected financial institutions based upon their credit ratings and other financial factors. The Company's established policies and procedures for mitigating credit risk on derivative transactions include reviewing and assessing the creditworthiness of counterparties.

Foreign Currency Risk Management

The Company manages its exposure to changes in foreign currency exchange rates through the use of foreign currency exchange contracts. Refer to Note 14 to the audited consolidated financial statements for a summarization of the notional amounts and fair values of the Company's foreign currency exchange contracts outstanding as of March 29, 2008.

Forward Foreign Currency Exchange Contracts – General

From time to time, the Company may enter into forward foreign currency exchange contracts as hedges to reduce its risk from exchange rate fluctuations on inventory purchases, intercompany royalty payments made by certain of its international operations, intercompany contributions made to fund certain marketing efforts of its international operations, other foreign currency-denominated operational obligations including payroll, rent, insurance, and benefit payments, and foreign currency-denominated revenues. As part of its overall strategy to manage the level of exposure to the risk of foreign currency exchange rate fluctuations, primarily to changes in the value of the Euro, the Japanese Yen, the Swiss Franc, and the British Pound Sterling, the Company hedges a portion of its foreign currency exposures anticipated over the ensuing twelve-month to two-year periods. In doing so, the Company uses foreign currency exchange contracts that generally have maturities of three months to two years to provide continuing coverage throughout the hedging period.

The Company records the above described foreign currency exchange contracts at fair value in its consolidated balance sheets. Foreign currency exchange contracts designated as cash flow hedges at hedge inception are accounted for in accordance with FAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, and subsequent amendments (collectively, *FAS 133*). As such, to the extent these hedges are effective the related gains or losses are deferred in stockholders' equity as a component of accumulated other comprehensive income. These deferred gains and losses are then recognized in our consolidated statements of operations as follows:

Inventory Purchases – Recognized as part of the cost of the inventory being hedged within cost of goods sold when the related inventory is sold.

Intercompany Royalty Payments and Marketing Contributions Recognized within foreign currency gains (losses) in the period in which the related royalties or marketing contributions being hedged are received or paid.

Operational Obligations Recognized primarily within SG&A expenses in the period in which the hedged forecasted transaction affects earnings.

The Company recognized a net loss on foreign currency exchange contracts in earnings of approximately \$8 million for Fiscal 2008, and net gains of approximately \$4 million and \$5 million for Fiscal 2007 and Fiscal 2006, respectively.

Table of Contents

Forward Foreign Currency Exchange Contracts Other

On October 10, 2007, the Company entered into a foreign exchange contract to purchase 13.5 million at a fixed rate. This contract hedges the foreign currency exposure related to the annual Euro interest payment due on October 6, 2008 for Fiscal 2009 in connection with the Company's outstanding 2006 Euro Debt. In accordance with FAS 133, the contract has been designated as a cash flow hedge. Since neither the terms of the hedge contract or the underlying exposure have changed, the related gains of \$0.7 million have been reclassified from stockholders' equity to foreign currency gains (losses) within our consolidated statement of operations to offset the related transaction loss arising from the remeasurement of the associated foreign currency-denominated accrued interest liability, as permitted by FAS 133, during Fiscal 2008.

On April 2, 2007, the Company entered into a similar foreign exchange contract to purchase 13.5 million at a fixed rate, hedging the foreign currency exposure related to the annual Euro interest payment made on October 4, 2007 for Fiscal 2008. This contract also was designated as a cash flow hedge. Consistent with the accounting treatment discussed above, the related gains of \$1.1 million were reclassified from stockholders' equity to foreign currency gains (losses) within our consolidated statement of operations during Fiscal 2008.

During the first quarter of Fiscal 2008, the Company entered into foreign currency option contracts with a notional value of \$159 million giving the Company the right, but not the obligation, to purchase foreign currencies at fixed rates by May 23, 2007. These contracts hedged the majority of the foreign currency exposure related to the financing of the Japanese Business Acquisitions, but did not qualify under FAS 133 for hedge accounting treatment. The Company did not exercise any of the contracts and recognized a loss of \$1.6 million within foreign currency gains (losses) in our consolidated statement of operations during the first quarter of Fiscal 2008.

In addition, during the fourth quarter of Fiscal 2008, the Company entered into a foreign currency exchange contract with a notional value of \$5 million hedging the foreign currency exposure related to an intercompany term loan provided by Polo Ralph Lauren Corporation to Ralph Lauren Retail Japan (RLRJ) in connection with the Japanese Business Acquisitions minority squeeze-out, as discussed in Note 5. This contract, which hedges the foreign currency exposure related to a Yen-denominated payment to be made by RLRJ during the first quarter of Fiscal 2009, did not qualify under FAS 133 for hedge accounting treatment. As such, the Company recognized a related loss of \$0.4 million within foreign currency gains (losses) in our consolidated statement of operations during Fiscal 2008.

Sensitivity

The Company performs a sensitivity analysis to determine the effects that market risk exposures may have on the fair values of the Company's derivative financial instruments. To perform the sensitivity analysis, the Company assesses the risk of loss in fair values from the effect of hypothetical changes in foreign currency exchange rates. This analysis assumes a like movement by all foreign currencies in our hedge portfolio against the U.S. dollar. Based on all foreign currency exchange contracts outstanding as of March 29, 2008, a 10% devaluation of the U.S. dollar as compared to the level of foreign currency exchange rates for currencies under contract as of March 29, 2008 would result in approximately \$2 million of net unrealized losses. Conversely, a 10% appreciation of the U.S. dollar would result in approximately \$2 million of net unrealized gains. As the Company's outstanding foreign currency exchange contracts are primarily designated as cash flow hedges of forecasted transactions, the unrealized loss or gain as a result of a 10% devaluation or appreciation would be largely offset by changes in the underlying hedged items.

Hedge of a Net Investment in Certain European Subsidiaries

The Company designated the entire principal amount of its outstanding 2006 Euro Debt as a hedge of its net investment in certain of its European subsidiaries. As required by FAS 133, the changes in fair value of a derivative

instrument or a non-derivative financial instrument (such as debt) that is designated as a hedge of a net investment in a foreign operation are reported in the same manner as a translation adjustment under FAS No. 52, Foreign Currency Translation, to the extent it is effective as a hedge. As such, changes in the fair value of the 2006 Euro Debt resulting from changes in the Euro exchange rate have been, and continue to be, reported in stockholders' equity as a component of accumulated other comprehensive income. The Company recorded within accumulated

Table of Contents

other comprehensive income the translation effects of the 2006 Euro Debt to U.S. dollars, resulting in net losses of \$45.4 million for Fiscal 2008 and \$24.5 million for Fiscal 2007, and a net gain of \$4.2 million for Fiscal 2006.

Interest Rate Risk Management

During the first six months of Fiscal 2007, the Company entered into three forward-starting interest rate swap contracts aggregating 200 million notional amount of indebtedness in anticipation of the Company's proposed refinancing of the 1999 Euro Debt, which was completed in October 2006. The Company designated these agreements as a cash flow hedge of a forecasted transaction to issue new debt in connection with the planned refinancing of its 1999 Euro Debt. The interest rate swaps hedged a total of 200.0 million, a portion of the underlying interest rate exposure on the anticipated refinancing. Under the terms of the three interest swap contracts, the Company paid a weighted-average fixed rate of interest of 4.1% and received variable interest based upon six-month EURIBOR. The Company terminated the swaps on September 28, 2006, which was the date the interest rate for the 2006 Euro Debt was determined. As a result, the Company made a payment of approximately 3.5 million (\$4.4 million based on the exchange rate in effect on that date) in settlement of the swaps. An amount of \$0.2 million was recognized as a loss for the three months ending September 30, 2006 due to the partial ineffectiveness of the cash flow hedge as a result of the forecasted transaction closing on October 5, 2006 instead of November 22, 2006 (the maturity date of the 1999 Euro Debt). The remaining loss of \$4.2 million has been deferred as a component of comprehensive income within stockholders' equity and is being recognized in earnings as an adjustment to interest expense over the seven-year term of the 2006 Euro Debt.

Sensitivity

As of March 29, 2008, the Company had no variable-rate debt outstanding. As such, the Company's exposure to changes in interest rates primarily related to its fixed rate 2006 Euro Debt. As of March 29, 2008, the carrying value of the 2006 Euro Debt was \$472.8 million and the fair value was \$423.0 million. A 25 basis point increase or decrease in the level of interest rates would, respectively, decrease or increase the fair value of the 2006 Euro Debt by approximately \$5 million. Such potential increases or decreases are based on certain simplifying assumptions, including no changes in Euro currency exchange rates and an immediate across-the-board increase or decrease in the level of interest rates with no other subsequent changes for the remainder of the period.

The Term Loan of ¥20.5 billion made to Polo JP Acqui, B.V., a wholly owned subsidiary of the Company, was repaid by the Company by its maturity date on May 22, 2008 using approximately \$200 million of Impact 21's cash on-hand acquired as part of the Japanese Business Acquisitions.

Investment Risk Management

The Company evaluates investments held in unrealized loss positions for other-than-temporary impairment on a quarterly basis. Such evaluation involves a variety of considerations, including assessments of risks and uncertainties associated with general economic conditions and distinct conditions affecting specific issuers. Factors considered by the Company include (i) the length of time and the extent to which the fair value has been below cost, (ii) the financial condition, credit worthiness and near-term prospects of the issuer, (iii) the length of time to maturity, (iv) future economic conditions and market forecasts and (v) the Company's intent and ability to retain its investment for a period of time sufficient to allow for recovery of market value. As of March 29, 2008, the fair value of the Company's available-for-sale investments was \$0.4 million below their respective par value. This gross unrealized loss has been recorded within accumulated other comprehensive income in the Company's consolidated balance sheet, as the Company believes the investments are not other-than-temporarily impaired. The Company limits its exposure by primarily investing in highly rated investments issued by municipalities.

CRITICAL ACCOUNTING POLICIES

The SEC's Financial Reporting Release No. 60, "Cautionary Advice Regarding Disclosure About Critical Accounting Policies" (FRR 60), suggests companies provide additional disclosure and commentary on those accounting policies considered most critical. FRR 60 considers an accounting policy to be critical if it is important to the Company's financial condition and results of operations and requires significant judgment and estimation on

Table of Contents

the part of management in its application. The Company's estimates are often based on complex judgments, probabilities and assumptions that we believe to be reasonable, but that are inherently uncertain and unpredictable. It is also possible that other professionals, applying reasonable judgment to the same facts and circumstances, could develop and support a range of alternative estimated amounts. The Company believes that the following list represents its critical accounting policies as contemplated by FRR 60. For a discussion of all of the Company's significant accounting policies, see Notes 3 and 4 to the accompanying audited consolidated financial statements.

Sales Reserves and Uncollectible Accounts

A significant area of judgment affecting reported revenue and net income is estimating sales reserves, which represent that portion of gross revenues not expected to be realized. In particular, wholesale revenue is reduced by estimates of returns, discounts, end-of-season markdowns, operational chargebacks and certain cooperative advertising allowances. Retail revenue, including e-commerce sales, also is reduced by estimates of returns.

In determining estimates of returns, discounts, end-of-season markdowns and operational chargebacks, management analyzes historical trends, seasonal results, current economic and market conditions and retailer performance. The Company reviews and refines these estimates on a quarterly basis. The Company's historical estimates of these costs have not differed materially from actual results.

Similarly, management evaluates accounts receivables to determine if they will ultimately be collected. Significant judgments and estimates are involved in this evaluation, including an analysis of specific risks on a customer-by-customer basis for larger accounts and customers, and a receivables aging analysis that determines the percentage of receivables that has historically been uncollected by aged category. Based on this information, management provides a reserve for the estimated amounts believed to be uncollectible. Although management believes that the Company's major customers are sound and creditworthy, a severe adverse impact on their business operations could have a corresponding material adverse effect on the Company's net sales, cash flows and/or financial condition.

See *Accounts Receivable* in Note 3 to the accompanying audited consolidated financial statements for an analysis of the activity in the Company's sales reserves and allowance for doubtful accounts for each of the three fiscal years presented.

Inventories

The Company holds inventory that is sold through wholesale distribution channels to major department stores and specialty retail stores, including its own retail stores. The Company also holds retail inventory that is sold in its own stores directly to consumers. Wholesale and retail inventories are stated at the lower of cost or estimated realizable value. Cost for wholesale inventories is determined using the first-in, first-out (FIFO) method and cost for retail inventories is determined on a moving-average cost basis.

The Company continually evaluates the composition of its inventories, assessing slow-turning product and fashion product. Estimated realizable value of distressed inventory is determined based on an analysis of historical sales trends of the Company's individual product lines for this category of inventory, the impact of market trends and economic conditions, and the value of current orders in-house relating to the future sales of this category of inventory. Estimates may differ from actual results due to quantity, quality and mix of products in inventory, consumer and retailer preferences and market conditions. The Company's historical estimates of these costs and its provisions have not differed materially from actual results.

Reserves for inventory shrinkage, representing the risk over physical loss of inventory, are estimated based on historical experience and are adjusted based upon physical inventory counts.

Purchase Accounting

The Company accounts for its business acquisitions under the purchase method of accounting. As such, the total cost of acquisitions is allocated to the underlying net assets based on their respective estimated fair values. The excess of the purchase price over the estimated fair values of the net assets acquired is recorded as goodwill. Determining the fair value of assets acquired and liabilities assumed requires management's judgment and often

Table of Contents

involves the use of significant estimates and assumptions, including assumptions with respect to future cash inflows and outflows, discount rates, asset lives and market multiples, among other items.

In addition, in connection with its recent business acquisitions, the Company has settled certain pre-existing relationships. These pre-existing relationships include licensing agreements and litigation in the case of the acquisition of the Polo Jeans Business. In accordance with the Emerging Issues Task Force (EITF) Issue No. 04-1, Accounting for Pre-existing Relationships between the Parties to a Business Combination, the Company is required to allocate the aggregate consideration exchanged in these transactions between the value of the business acquired and the value of the settlement of any pre-existing relationships in proportion to estimates of their respective fair values. If the terms of the pre-existing relationships were determined to not be reflective of market, a settlement gain or loss would be recognized in earnings. Accordingly, significant judgment is required to determine the respective fair values of the business acquired and the value of the settlement of the pre-existing relationship. The Company has historically utilized independent valuation firms to assist in the determination of fair value.

Impairment of Goodwill and Other Intangible Assets

Goodwill and other intangible assets are accounted for in accordance with the provisions of FAS No. 142, Goodwill and Other Intangible Assets (FAS 142). Under FAS 142, goodwill, including any goodwill included in the carrying value of investments accounted for using the equity method of accounting, and certain other intangible assets deemed to have indefinite useful lives, are not amortized. Rather, goodwill and such indefinite-lived intangible assets are assessed for impairment at least annually based on comparisons of their respective fair values to their carrying values. Finite-lived intangible assets are amortized over their respective estimated useful lives and, along with other long-lived assets, are evaluated for impairment periodically whenever events or changes in circumstances indicate that their related carrying amounts may not be recoverable in accordance with FAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets (FAS 144).

In accordance with FAS 142, goodwill impairment is determined using a two-step process. The first step of the goodwill impairment test is to identify potential impairment by comparing the fair value of a reporting unit with its net book value (or carrying amount), including goodwill. If the fair value of a reporting unit exceeds its carrying amount, goodwill of the reporting unit is considered not to be impaired and performance of the second step of the impairment test is unnecessary. If the carrying amount of a reporting unit exceeds its fair value, the second step of the goodwill impairment test is performed to measure the amount of impairment loss, if any. The second step of the goodwill impairment test compares the implied fair value of the reporting unit's goodwill with the carrying amount of that goodwill. If the carrying amount of the reporting unit's goodwill exceeds the implied fair value of that goodwill, an impairment loss is recognized in an amount equal to that excess. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination. That is, the fair value of the reporting unit is allocated to all of the assets and liabilities of that unit (including any unrecognized intangible assets) as if the reporting unit had been acquired in a business combination and the fair value was the purchase price paid to acquire the reporting unit.

Determining the fair value of a reporting unit under the first step of the goodwill impairment test and determining the fair value of individual assets and liabilities of a reporting unit (including unrecognized intangible assets) under the second step of the goodwill impairment test is judgmental in nature and often involves the use of significant estimates and assumptions. Similarly, estimates and assumptions are used in determining the fair value of other intangible assets. These estimates and assumptions could have a significant impact on whether or not an impairment charge is recognized and the magnitude of any such charge. To assist management in the process of determining goodwill impairment, the Company obtains appraisals from independent valuation firms. Estimates of fair value are primarily determined using discounted cash flows, market comparisons and recent transactions. These approaches use significant estimates and assumptions, including projected future cash flows (including timing), discount rates

reflecting the risks inherent in future cash flows, perpetual growth rates and determination of appropriate market comparables.

The impairment test for other indefinite-lived intangible assets consists of a comparison of the fair value of the intangible asset with its carrying value. If the carrying value of the indefinite-lived intangible asset exceeds its fair value, an impairment loss is recognized equal to the excess. In addition, in evaluating finite-lived intangible assets for recoverability, the Company uses its best estimate of future cash flows expected to result from the use of the asset

Table of Contents

and eventual disposition in accordance with FAS 144. To the extent the estimated future, undiscounted cash inflows attributable to the asset, less estimated future, undiscounted cash outflows, are less than the carrying amount, an impairment loss is recognized equal to the difference.

There have been no impairment losses recorded in connection with the assessment of the recoverability of goodwill or other intangible assets during any of the three fiscal years presented.

Impairment of Other Long-Lived Assets

Property and equipment, along with other long-lived assets, are evaluated for impairment periodically whenever events or changes in circumstances indicate that their related carrying amounts may not be recoverable in accordance with FAS 144. In evaluating long-lived assets for recoverability, the Company uses its best estimate of future cash flows expected to result from the use of the asset and its eventual disposition. To the extent that estimated future undiscounted net cash flows attributable to the asset are less than the carrying amount, an impairment loss is recognized equal to the difference between the carrying value of such asset and its fair value. Assets to be disposed of and for which there is a committed plan of disposal are reported at the lower of carrying value or fair value less costs to sell.

In determining future cash flows, the Company takes various factors into account, including changes in merchandising strategy, the emphasis on retail store cost controls, and the impacts of more experienced retail store managers and increased local advertising. Since the determination of future cash flows is an estimate of future performance, there may be future impairments in the event that future cash flows do not meet expectations.

During Fiscal 2008, the Company recorded impairment charges of \$5.0 million to reduce the carrying value of certain long-lived assets in its Retail segment to their estimated fair value. No impairment charges were recorded in Fiscal 2007. During Fiscal 2006, the Company recorded impairment charges of \$10.8 million to reduce the carrying value of certain retail fixed assets to their estimated fair value.

Income Taxes

Income taxes are provided using the asset and liability method prescribed by FAS No. 109, *Accounting for Income Taxes* (FAS 109). Under this method, income taxes (i.e., deferred tax assets and liabilities, current taxes payable/refunds receivable and tax expense) are recorded based on amounts refundable or payable in the current year and include the results of any difference between US GAAP and tax reporting. Deferred income taxes reflect the tax effect of certain net operating loss, capital loss and general business credit carryforwards and the net tax effects of temporary differences between the carrying amount of assets and liabilities for financial statement and income tax purposes, as determined under enacted tax laws and rates. The Company accounts for the financial effect of changes in tax laws or rates in the period of enactment.

In addition, valuation allowances are established when management determines that it is more-likely-than-not that some portion or all of a deferred tax asset will not be realized. Tax valuation allowances are analyzed periodically and adjusted as events occur, or circumstances change, that warrant adjustments to those balances.

Effective April 1, 2007, the Company adopted FIN 48. Upon the adoption of the provisions of FIN 48, the Company changed its policy related to the accounting for income tax uncertainties. If the Company considers that a tax position is more-likely-than-not of being sustained upon audit, based solely on the technical merits of the position, it recognizes the tax benefit. The Company measures the tax benefit by determining the largest amount that is greater than 50% likely of being realized upon settlement, presuming that the tax position is examined by the appropriate taxing authority that has full knowledge of all relevant information. These assessments can be complex and require

significant judgment, and the Company often obtains assistance from external advisors. To the extent that the Company's estimates change or the final tax outcome of these matters is different than the amounts recorded, such differences will impact the income tax provision in the period in which such determinations are made. If the initial assessment fails to result in the recognition of a tax benefit, the Company regularly monitors its position and subsequently recognizes the tax benefit if (i) there are changes in tax law or analogous case law that sufficiently raise the likelihood of prevailing on the technical merits of the position to more-likely-than-not, (ii) the statute of limitations expires, or (iii) there is a completion of an audit resulting in a settlement of that tax year with the appropriate agency. Uncertain tax positions are classified as current only when the Company expects to pay cash

Table of Contents

within the next twelve months. Interest and penalties, if any, are recorded within the provision for income taxes in the Company's consolidated statements of operations and are classified on the consolidated balance sheets with the related liability for unrecognized tax benefits.

See Note 12 to the accompanying audited consolidated financial statements for further discussion of the Company's income taxes and the adoption of FIN 48.

Contingencies

The Company periodically is exposed to various contingencies in the ordinary course of conducting its business, including certain litigations, alleged information system security breach matters, contractual disputes, employee relation matters, various tax audits, and trademark and intellectual property matters and disputes. In accordance with FAS No. 5, *Accounting for Contingencies* (FAS 5), the Company records a liability for such contingencies to the extent that it concludes their occurrence is probable and the related losses are estimable. In addition, if it is reasonably possible that an unfavorable settlement of a contingency could exceed the established liability, the Company discloses the estimated impact on its liquidity, financial condition and results of operations. Management considers many factors in making these assessments. As the ultimate resolution of contingencies is inherently unpredictable, these assessments can involve a series of complex judgments about future events including, but not limited to, court rulings, negotiations between affected parties and governmental actions. As a result, the accounting for loss contingencies relies heavily on estimates and assumptions.

Stock-based Compensation

Effective April 2, 2006, the Company adopted FAS No. 123R, *Share-Based Payment* (FAS 123R or the Statement), using the modified prospective application transition method. Under this transition method, the compensation expense recognized in the consolidated statements of operations beginning April 2, 2006 includes compensation expense for (a) all stock-based payments granted prior to, but not yet vested as of April 1, 2006, based on the grant-date fair value estimated in accordance with the original provisions of FAS No. 123, *Accounting for Stock-Based Compensation*, as amended by FAS No. 148, *Accounting for Stock-Based Compensation Transition and Disclosure* (FAS 123) and (b) all stock-based payments granted subsequent to April 1, 2006 based on the grant-date fair value estimated in accordance with the provisions of FAS 123R.

Prior to April 2, 2006, the Company accounted for stock-based compensation plans under the intrinsic value method in accordance with Accounting Principles Board (APB) Opinion No. 25, *Accounting for Stock Issued to Employees* (APB 25), and adopted the disclosure-only provisions of FAS 123. Accordingly, the Company did not recognize compensation expense for the issuance of stock options with an exercise price equal to or greater than the market price at the date of grant. However, as required, the Company disclosed, in the notes to the consolidated financial statements, the pro forma expense impact of the stock option grants as if the fair-value-based recognition provisions of FAS 123 were applied. Compensation expense was previously recognized for restricted stock and restricted stock units. The effect of forfeitures on restricted stock and restricted stock units was recognized when such forfeitures occurred.

Stock Options

Stock options are granted to employees and non-employee directors with exercise prices equal to fair market value at the date of grant. The Company uses the Black-Scholes option-pricing model to estimate the fair value of stock options granted, which requires the input of subjective assumptions. Certain key assumptions involve estimating future uncertain events. The key factors influencing the estimation process include the expected term of the option, the expected stock price volatility factor, the expected dividend yield and risk-free interest rate, among others. Generally,

once stock option values are determined, current accounting practices do not permit them to be changed, even if the estimates used are different from the actuals.

Determining the fair value of stock-based compensation at the date of grant requires significant judgment by management, including estimates of the above Black-Scholes assumptions. In addition, judgment is required in estimating the number of stock-based awards that are expected to be forfeited. If actual results differ significantly from these estimates, if management changes its assumptions for future stock-based award grants, or if there are

Table of Contents

changes in market conditions, stock-based compensation expense and the Company's results of operations could be materially impacted.

Restricted Stock and Restricted Stock Units (RSUs)

The Company grants restricted shares of Class A common stock and service-based RSUs to certain of its senior executives and non-employee directors. In addition, the Company grants performance-based RSUs to such senior executives and other key executives, and certain other employees of the Company. The fair values of restricted stock shares and RSUs are based on the fair value of unrestricted Class A common stock, as adjusted to reflect the absence of dividends for those restricted securities that are not entitled to dividend equivalents. Compensation expense for performance-based RSUs is recognized over the related service period when attainment of the performance goals is deemed probable, which involves judgment on the part of management.

RECENT ACCOUNTING STANDARDS

Refer to Note 4 to the accompanying audited consolidated financial statements for a discussion of certain accounting standards the Company is not yet required to adopt which may impact its results of operations and/or financial condition in future reporting periods.

Item 7A. *Quantitative and Qualitative Disclosures about Market Risk*

For a discussion of the Company's exposure to market risk, see *Market Risk Management* in Item 7 included elsewhere in this Annual Report on Form 10-K.

Item 8. *Financial Statements and Supplementary Data*

See the *Index to Consolidated Financial Statements* appearing at the end of this Annual Report on Form 10-K.

Item 9. *Changes in and Disagreements with Accountants on Accounting and Financial Disclosure*

Not applicable.

Item 9A. *Controls and Procedures*

(a) Evaluation of Disclosure Controls and Procedures

Disclosure controls and procedures are the controls and other procedures of an issuer that are designed to provide reasonable assurance that information required to be disclosed by the issuer in the reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time period specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that material information required to be disclosed by an issuer in the reports that it files or submits under the Securities Exchange Act of 1934 is accumulated and communicated to the issuer's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

We have evaluated, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as of the end of the fiscal year covered by this annual report. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded

that the Company's disclosure controls and procedures were effective, as of the fiscal year end covered by this Annual Report on Form 10-K, in timely making known to them material information relating to the Company and the Company's consolidated subsidiaries required to be disclosed in the Company's reports filed or submitted under the Exchange Act.

Table of Contents

(b) Management's Report of Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Securities Exchange Act Rule 13a-15(f). Internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and preparation of financial statements for external purposes in accordance with U.S. Generally Accepted Accounting Principles. Internal control over financial reporting includes maintaining records that in reasonable detail accurately and fairly reflect our transactions; providing reasonable assurance that transactions are recorded as necessary for preparation of our financial statements; providing reasonable assurance that receipts and expenditures of the Company's assets are made in accordance with management authorization; and providing reasonable assurance that unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on our financial statements would be prevented or detected on a timely basis. Because of its inherent limitations, internal control over financial reporting is not intended to provide absolute assurance that a misstatement of our financial statements would be prevented or detected. Further, the evaluation of the effectiveness of internal control over financial reporting was made as of a specific date, and continued effectiveness in future periods is subject to the risks that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies and procedures may decline.

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting as of the end of the fiscal year covered by this report based on the framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control-Integrated Framework*. Based on this evaluation, management concluded that the Company's internal controls over financial reporting were effective as of the fiscal year end covered by this Annual Report on Form 10-K.

During the first quarter of Fiscal 2008, the Company acquired control of certain of its Japanese businesses that were formerly conducted under pre-existing licensed arrangements. In particular, the Company acquired approximately 77% of the outstanding shares of Impact 21 that it did not previously own in a cash tender offer (as further defined and discussed in Note 5 to the accompanying audited consolidated financial statements). The Company is in the process of evaluating Impact 21's internal controls. However, as permitted by related SEC Staff interpretive guidance for newly acquired businesses, the Company excluded Impact 21 from management's annual assessment of the effectiveness of the Company's internal control over financial reporting as of March 29, 2008. In the aggregate, Impact 21 represented 14.2% of the total consolidated assets (including purchase accounting allocations), 5.2% of total consolidated revenues and 4.6% of total consolidated operating income of the Company as of and for the fiscal year ended March 29, 2008.

(c) Changes in Internal Controls Over Financial Reporting

Except as discussed below, there has been no change in the Company's internal control over financial reporting during the fourth quarter of Fiscal 2008, that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

The Company is in the process of evaluating the internal control structure of Impact 21 and determining how best to integrate and improve the various processes, systems, resources and controls supporting that business. In the interim, the Company has designed and implemented various transitional controls over financial reporting to supplement the existing internal controls at Impact 21.

Item 9B. Other Information

Not applicable.

PART III

Item 10. *Directors, Executive Officers and Corporate Governance*

Information relating to our directors and corporate governance will be set forth in the Company's proxy statement for its 2008 annual meeting of stockholders to be filed within 120 days after March 29, 2008 (the Proxy

Table of Contents

Statement) and is incorporated by reference herein. Information relating to our executive officers is set forth in Item I of this Annual Report on Form 10-K under the caption *Executive Officers*.

The Company has a Code of Ethics for Principal Executive Officers and Senior Financial Officers that applies to our principal executive officer, our principal operating officer, our principal financial officer, our controller, and our principal accounting officer. You can find our Code of Ethics for Principal Executive Officers and Senior Financial Officers on our internet site, <http://investor.ralphlauren.com>. We will post any amendments to the Code of Ethics for Principal Executive Officers and Senior Financial Officers and any waivers that are required to be disclosed by the rules of either the SEC or the NYSE on our internet site.

Item 11. Executive Compensation

Information relating to executive and director compensation will be set forth in the Proxy Statement and such information is incorporated by reference herein.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters**Equity Compensation Plan Information as of March 29, 2008**

The following table sets forth information as of March 29, 2008 regarding compensation plans under which the Company's equity securities are authorized for issuance:

Plan Category	(a) Numbers of Securities to be Issued upon Exercise of Outstanding Options, Warrants and Rights	(b) Weighted-Average Exercise Price of Outstanding Options (\$)	(c) Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column (a))
Equity compensation plans approved by security holders	8,036,728 ⁽¹⁾	\$ 39.93 ⁽²⁾	5,040,839 ⁽³⁾
Equity compensation plans not approved by security holders			
Total	8,036,728	\$ 39.93	5,040,839

⁽¹⁾ Consists of 6,010,622 options to purchase shares of our Class A common stock and 2,026,106 restricted stock units that are payable solely in shares of Class A common stock. Does not include 33,738 outstanding restricted shares that are subject to forfeiture.

⁽²⁾

Represents the weighted average exercise price of the outstanding stock options. No exercise price is payable with respect to the outstanding restricted stock units.

- (3) All of the securities remaining available for future issuance set forth in column (c) may be in the form of options, stock appreciation rights, restricted stock, restricted stock units, performance awards or other stock-based awards under the Company's Amended and Restated 1997 Long-Term Stock Incentive Plan. An additional 33,738 outstanding shares of restricted stock granted under the Company's Amended and Restated 1997 Long-Term Stock Incentive Plan that remain subject to forfeiture are not reflected in column (c).

Other information relating to security ownership of certain beneficial owners and management will be set forth in the Proxy Statement and such information is incorporated by reference herein.

Item 13. *Certain Relationships and Related Transactions, and Director Independence*

The information required to be included by Item 13 of Form 10-K will be included in the Proxy Statement and such information is incorporated by reference herein.

Table of Contents**Item 14. *Principal Accounting Fees and Services***

The information required to be included by Item 14 of Form 10-K will be included in the Proxy Statement and such information is incorporated by reference herein.

PART IV**Item 15. *Exhibits and Financial Statement Schedules***

POLO RALPH LAUREN CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Description of Business

Polo Ralph Lauren Corporation (PRLC) is a global leader in the design, marketing and distribution of premium lifestyle products, including men s, women s and children s apparel, accessories, fragrances and home furnishings. PRLC s long-standing reputation and distinctive image have been consistently developed across an expanding number of products, brands and international markets. PRLC s brand names include *Polo by Ralph Lauren*, *Ralph Lauren Purple Label*, *Ralph Lauren Collection*, *Black Label*, *Blue Label*, *Lauren by Ralph Lauren*, *RRL*, *RLX*, *Rugby*, *Ralph Lauren Childrenswear*, *Chaps*, *Club Monaco* and *American Living*, among others. PRLC and its subsidiaries are collectively referred to herein as the Company, we, us, our and ourselves, unless the context indicates otherwise.

The Company classifies its businesses into three segments: Wholesale, Retail and Licensing. The Company s wholesale sales are made principally to major department and specialty stores located throughout the U.S., Europe and Asia. The Company also sells directly to consumers through full-price and factory retail stores located throughout the U.S., Canada, Europe, South America and Asia, and through its retail internet site located at www.RalphLauren.com (formerly known as Polo.com). In addition, the Company often licenses the right to unrelated third parties to use its various trademarks in connection with the manufacture and sale of designated products, such as apparel, eyewear and fragrances, in specified geographical areas for specified periods.

2. Basis of Presentation

Basis of Consolidation

The consolidated financial statements present the financial position, results of operations and cash flows of the Company and all entities in which the Company has a controlling voting interest. The consolidated financial statements also include the accounts of any variable interest entities in which the Company is considered to be the primary beneficiary and such entities are required to be consolidated in accordance with accounting principles generally accepted in the U.S. (US GAAP).

Prior to the Company s acquisition of the minority ownership interest in Polo Ralph Lauren Japan Corporation (PRL Japan) in May 2007, the Company consolidated PRL Japan, formerly a 50%-owned venture with Onward Kashiya Co. Ltd and its affiliates (Onward Kashiya) and The Seibu Department Stores, Ltd (Seibu), pursuant to the provisions of Financial Accounting Standards Board (FASB) Interpretation (FIN) No. 46R, Consolidation of Variable Interest Entities (FIN 46R). PRL Japan holds the master license to conduct the Company s business in Japan. Additionally, prior to the acquisition of the minority ownership interests in Ralph Lauren Media, LLC (RL Media) in March 2007, the Company consolidated RL Media, formerly a 50%-owned venture with NBC-Lauren Media Holdings, Inc., a subsidiary wholly owned by the National Broadcasting Company, Inc. (NBC) and Value Vision Media, Inc. (Value Vision), pursuant to FIN 46R. RL Media conducts the Company s e-commerce initiatives through an internet site known as RalphLauren.com. See Note 5 for further discussion of the acquisitions referred to above, including their respective bases of consolidation in the fiscal years presented.

All significant intercompany balances and transactions have been eliminated in consolidation.

Fiscal Year

Edgar Filing: POLO RALPH LAUREN CORP - Form 10-K

The Company utilizes a 52-53 week fiscal year ending on the Saturday closest to March 31. As such, fiscal year 2008 ended on March 29, 2008 and reflected a 52-week period (Fiscal 2008); fiscal year 2007 ended on March 31, 2007 and reflected a 52-week period (Fiscal 2007); and fiscal year 2006 ended on April 1, 2006 and also reflected a 52-week period (Fiscal 2006).

The financial position and operating results of the Company s consolidated PRL Japan and Impact 21 Co., Ltd. (Impact 21) entities located in Japan are reported on a one-month lag. The net effect of this reporting lag is not

F-6

Table of Contents

POLO RALPH LAUREN CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

material to the consolidated financial statements. Similarly, prior to the fourth quarter of Fiscal 2006, the financial position and operating results of RL Media were reported on a three-month lag. During the fourth quarter of Fiscal 2006, RL Media changed its fiscal year, which was formerly on a calendar-year basis, to conform with the Company's fiscal-year basis. In connection with this change, the three-month reporting lag for RL Media was eliminated for the fiscal years presented. The net effect from this change in RL Media's fiscal year was not material to the consolidated financial statements for Fiscal 2006 and was reflected in retained earnings as a component of stockholders' equity.

Use of Estimates

The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and footnotes thereto. Actual results could differ materially from those estimates.

Significant estimates inherent in the preparation of the consolidated financial statements include reserves for customer returns, discounts, end-of-season markdowns and operational chargebacks; reserves for the realizability of inventory; reserves for litigation and other contingencies; useful lives and impairments of long-lived tangible and intangible assets; accounting for income taxes and related uncertain tax positions; the valuation of stock-based compensation and related expected forfeiture rates; and accounting for business combinations.

Reclassifications

Certain reclassifications have been made to the prior periods' financial information in order to conform to the current period's presentation, including a reclassification of \$175 million of assets related to the RL Media Minority Interest Acquisition (as defined in Note 5) that were pushed down from Corporate to the Retail segment in Fiscal 2008 that should have been reported as part of the Retail segment in Fiscal 2007. See Note 20.

3. Summary of Significant Accounting Policies

Revenue Recognition

Revenue is recognized across all segments of the business when there is persuasive evidence of an arrangement, delivery has occurred, price has been fixed or is determinable, and collectibility is reasonably assured.

Revenue within the Company's Wholesale segment is recognized at the time title passes and risk of loss is transferred to customers. Wholesale revenue is recorded net of estimates of returns, discounts, end-of-season markdowns, operational chargebacks and certain cooperative advertising allowances. Returns and allowances require pre-approval from management and discounts are based on trade terms. Estimates for end-of-season markdown reserves are based on historical trends, seasonal results, an evaluation of current economic and market conditions and retailer performance. Estimates for operational chargebacks are based on actual notifications of order fulfillment discrepancies and historical trends. The Company reviews and refines these estimates on a quarterly basis. The Company's historical estimates of these costs have not differed materially from actual results.

Retail store revenue is recognized net of estimated returns at the time of sale to consumers. E-commerce revenue from sales of products ordered through the Company's retail internet site known as RalphLauren.com is recognized upon

delivery and receipt of the shipment by its customers. Such revenue also is reduced by an estimate of returns.

Gift cards issued by the Company are recorded as a liability until they are redeemed, at which point revenue is recognized. The Company recognizes income for unredeemed gift cards when the likelihood of a gift card being redeemed by a customer is remote and the Company determines that it does not have a legal obligation to remit the value of the unredeemed gift card to the relevant jurisdiction as unclaimed or abandoned property.

F-7

Table of Contents

POLO RALPH LAUREN CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Revenue from licensing arrangements is recognized when earned in accordance with the terms of the underlying agreements, generally based upon the higher of (a) contractually guaranteed minimum royalty levels or (b) estimates of sales and royalty data received from the Company's licensees.

The Company accounts for sales and other related taxes on a net basis, excluding such taxes from revenue.

Cost of Goods Sold and Selling Expenses

Cost of goods sold includes the expenses incurred to acquire and produce inventory for sale, including product costs, freight-in, and import costs, as well as changes in reserves for shrinkage and inventory obsolescence. Gains and losses associated with foreign currency exchange contracts related to the hedging of inventory purchases also are recognized within cost of goods sold when the inventory being hedged is sold. The costs of selling merchandise, including preparing the merchandise for sale, such as picking, packing, warehousing and order charges, are included in selling, general and administrative (SG&A) expenses.

Shipping and Handling Costs

The costs associated with shipping goods to customers are reflected as a component of SG&A expenses in the consolidated statements of operations. Shipping and handling costs incurred approximated \$108 million in Fiscal 2008, \$92 million in Fiscal 2007 and \$77 million in Fiscal 2006. Shipping and handling charges billed to customers are included in revenue.

Advertising Costs

In accordance with American Institute of Certified Public Accountants (AICPA) Statement of Position (SOP) No. 93-7, Reporting on Advertising Costs, advertising costs, including the costs to produce advertising, are expensed when the advertisement is first exhibited. In accordance with Emerging Issues Task Force (EITF) Issue No. 01-09, Accounting for Consideration Given by a Vendor to a Customer or a Reseller of the Vendor's Products, costs of out-of-store advertising paid to wholesale customers under cooperative advertising programs are expensed as an advertising cost if both the identified advertising benefit is sufficiently separable from the purchase of the Company's products by customers and the fair value of such benefit is measurable. Otherwise, such costs are reflected as a reduction of revenue. Costs of in-store advertising paid to wholesale customers under cooperative advertising programs are not included in advertising costs, but are reflected as a reduction of revenues since the benefits are not sufficiently separable from the purchases of the Company's products by customers.

Advertising expense amounted to approximately \$188 million for Fiscal 2008, \$181 million for Fiscal 2007 and \$166 million for Fiscal 2006. Deferred advertising costs, which principally relate to advertisements that have not yet been exhibited or services that have not yet been received, were approximately \$8 million and \$3 million at the end of Fiscal 2008 and Fiscal 2007, respectively.

Foreign Currency Translation and Transactions

The financial position and operating results of foreign operations are primarily consolidated using the local currency as the functional currency. Local currency assets and liabilities are translated at the rates of exchange on the balance

sheet date, and local currency revenue and expenses are translated at average rates of exchange during the period. Resulting translation gains or losses are included in the consolidated statements of stockholders' equity as a component of accumulated other comprehensive income (loss). Gains and losses on translation of intercompany loans with foreign subsidiaries of a long-term investment nature also are included within this component of stockholders' equity.

The Company also recognizes gains and losses on transactions that are denominated in a currency other than the respective entity's functional currency. Foreign currency transaction gains and losses also include amounts realized on the settlement of intercompany loans with foreign subsidiaries that are either of a short-term investment nature or were previously of a long-term investment nature and deferred as a component of stockholders' equity.

Table of Contents**POLO RALPH LAUREN CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Foreign currency transaction gains and losses are recognized in earnings and separately disclosed in the consolidated statements of operations.

Comprehensive Income (Loss)

Comprehensive income (loss), which is reported in the consolidated statements of stockholders' equity, consists of net income (loss) and other gains and losses affecting equity that, under US GAAP, are excluded from net income (loss). The components of other comprehensive income (loss) for the Company primarily consist of foreign currency translation gains and losses; unrealized gains and losses on available-for-sale investments; unrealized gains and losses related to the accounting for defined benefit plans; and deferred gains and losses on hedging instruments, such as forward foreign currency exchange contracts designated as cash flow hedges and changes in the fair value of the Company's Euro-denominated debt designated as a hedge of changes in the fair value of the Company's net investment in certain of its European subsidiaries.

Net Income Per Common Share

Net income per common share is determined in accordance with Statement of Financial Accounting Standards (FAS) No. 128, Earnings per Share (FAS 128). Under the provisions of FAS 128, basic net income per common share is computed by dividing the net income applicable to common shares after preferred dividend requirements, if any, by the weighted-average number of common shares outstanding during the period. Weighted-average common shares include shares of the Company's Class A and Class B common stock. Diluted net income per common share adjusts basic net income per common share for the effects of outstanding stock options, restricted stock, restricted stock units and any other potentially dilutive financial instruments, only in the periods in which such effect is dilutive under the treasury stock method.

The weighted-average number of common shares outstanding used to calculate basic net income per common share is reconciled to those shares used in calculating diluted net income per common share as follows:

	Fiscal Years Ended		
	March 29, 2008	March 31, 2007	April 1, 2006
	(millions)		
Basic	102.3	104.4	104.2
Dilutive effect of stock options, restricted stock and restricted stock units	2.9	3.2	3.0
Diluted shares	105.2	107.6	107.2

Options to purchase shares of common stock at an exercise price greater than the average market price of the common stock during the reporting period are anti-dilutive and therefore not included in the computation of diluted net income per common share. In addition, the Company has outstanding performance-based restricted stock units that are issuable only upon the satisfaction of certain performance goals. Such units only are included in the computation of

diluted shares to the extent the underlying performance conditions (a) are satisfied prior to the end of the reporting period or (b) would be satisfied if the end of the reporting period were the end of the related contingency period and the result would be dilutive. As of the end of Fiscal 2008, Fiscal 2007 and Fiscal 2006, there was an aggregate of approximately 1.5 million, 1.0 million and 0.8 million, respectively, of additional shares issuable upon the exercise of anti-dilutive options and/or the contingent vesting of performance-based restricted stock units that were excluded from the diluted share calculations.

Stock-based Compensation

Effective April 2, 2006, the Company adopted FAS No. 123R, Share-Based Payment (FAS 123R or the Statement). The Statement requires all share-based payments to employees and non-employee directors to be

F-9

Table of Contents

POLO RALPH LAUREN CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

expensed based on the grant date fair value of the awards over the requisite service period. The Company applied the requirements of FAS 123R using the modified prospective application transition method and therefore prior periods were not restated. Under the modified prospective method, the Company records compensation expense for (1) the unvested portion of previously issued awards that remained outstanding at the initial date of adoption and (2) for any awards issued, modified or settled after the effective date of the Statement. The Company uses the Black-Scholes valuation method to determine the grant date fair value of its stock option awards.

Prior to the adoption of FAS 123R, the Company's stock-based compensation was recognized using the intrinsic value method, which measures stock-based compensation expense as the amount at which the market price of the stock at the date of grant exceeds the exercise price. Accordingly, no compensation expense was recognized for the Company's stock option awards. Prior to the adoption of FAS 123R, the Company's stock-based compensation expense consisted of restricted stock and service-based restricted stock unit and performance-based restricted stock unit awards, which were accounted for in accordance with Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees (APB No. 25). The effect of forfeitures on restricted stock and restricted stock units was recognized when such forfeitures occurred.

See Note 18 for further discussion of the Company's stock-based compensation and the adoption of FAS 123R.

Cash and Cash Equivalents

Cash and cash equivalents include all highly liquid investments with original maturities of three months or less, including investments in debt securities. Investments in debt securities are diversified among high-credit quality securities in accordance with the Company's risk-management policies, and primarily include commercial paper and money market funds.

Restricted Cash

The Company has placed 69.5 million (\$109.8 million) of cash in escrow with certain banks, primarily in Fiscal 2007, as collateral to secure guarantees of a corresponding amount made by the banks to certain international tax authorities on behalf of the Company. Of the 69.5 million of cash in escrow, 39.7 million (\$62.8 million) was placed as collateral to secure guarantees made to the French tax authorities for the payment of an asserted excess royalties tax matter and 29.8 million (\$47.0 million) was placed as collateral to secure refunds of value-added tax payments in certain international tax jurisdictions. Such cash has been classified as restricted cash and reported as a component of other non-current assets in the Company's consolidated balance sheets.

Short-term Investments

Short-term investments consist of investments which the Company expects to convert into cash within one year, including time deposits which have a maturity greater than three months. Short-term investments are reported at cost, which approximates market value. Cash inflows and outflows related to the sale and purchase of short-term investments are classified as investing activities within proceeds from sales and maturities of investments and purchases of investments, respectively, in the Company's consolidated statements of cash flows.

Accounts Receivable

In the normal course of business, the Company extends credit to customers that satisfy defined credit criteria. Accounts receivable, net, as shown in the Company's consolidated balance sheets, is net of certain reserves and allowances. These reserves and allowances consist of (a) reserves for returns, discounts, end-of-season markdowns and operational chargebacks and (b) allowances for doubtful accounts. These reserves and allowances are discussed in further detail below.

A reserve for sales returns is determined based on an evaluation of current market conditions and historical returns experience. Charges to increase the reserve are treated as reductions of revenue.

F-10

Table of Contents**POLO RALPH LAUREN CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

A reserve for trade discounts is determined based on open invoices where trade discounts have been extended to customers, and charges to increase the reserve are treated as reductions of revenue.

Estimated end-of-season markdown charges are included as reductions of revenue. The related markdown provisions are based on retail sales performance, seasonal negotiations with customers, historical deduction trends and an evaluation of current market conditions.

A reserve for operational chargebacks represents various deductions by customers relating to individual shipments. Charges to increase this reserve, net of expected recoveries, are included as reductions of revenue. The reserve is based on actual notifications of order fulfillment discrepancies and past experience.

A rollforward of the activity in the Company's reserves for returns, discounts, end-of-season markdowns and operational chargebacks is presented below:

	Fiscal Years Ended		
	March 29, 2008	March 31, 2007	April 1, 2006
	(millions)		
Beginning reserve balance	\$ 129.4	\$ 107.5	\$ 100.0
Amount charged against revenue to increase reserve	496.7	388.4	302.6
Amount credited against customer accounts to decrease reserve	(473.4)	(369.2)	(294.1)
Foreign currency translation	8.4	2.7	(1.0)
Ending reserve balance	\$ 161.1	\$ 129.4	\$ 107.5

An allowance for doubtful accounts is determined through analysis of periodic aging of accounts receivable, assessments of collectibility based on an evaluation of historic and anticipated trends, the financial condition of the Company's customers, and an evaluation of the impact of economic conditions. A rollforward of the activity in the Company's allowance for doubtful accounts is presented below:

**Fiscal Years Ended
March 29, &n**
