information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a small reporting company. See definitions of large accelerated filer, accelerated filer, and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting
company

(Do not check if a smaller
reporting company)

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No

The aggregate market value of voting and non-voting common equity held by non-affiliates as of September 30, 2010 (based on the closing price on the NASDAQ Stock Market, LLC on September 30, 2010) was \$230,092,140. Shares of Common Stock held by each officer, director and holder of 5% or more of the outstanding Common Stock have been excluded in that such persons may be deemed affiliates. This determination of affiliate status is not necessarily a conclusive determination for other purposes.

As of June 1, 2011, 6,821,356 shares of Registrant's Common Stock, \$.01 par value, were outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of Cavco Industries, Inc.'s definitive Proxy Statement relating to its 2011 Annual Meeting of Stockholders are incorporated by reference into Part III hereof.

PART I

ITEM 1. BUSINESS

General

Cavco Industries, Inc., a Delaware corporation, was formed on June 30, 2003 as a successor corporation to previous Cavco entities operating since 1965. Headquartered in Phoenix, Arizona, the Company designs and produces factory-built homes, which are mainly distributed by a network of retailers throughout most of the continental United States. The products we manufacture are sold under a variety of brand names and are offered in a variety of floor plans and price ranges. We are one of the largest producers of manufactured homes in the United States, based on reported wholesale shipments. Cavco is also a leading producer of park model homes and vacation cabins in the United States. Our business encompasses manufacturing operations and wholesale and retail marketing. The terms Cavco, us, we, our, the Company, and any other similar terms refer to Cavco Industries, Inc. and its subsidiaries, unless otherwise indicated in this Form 10-K.

We produce homes constructed to the building standards of the U.S. Department of Housing and Urban Development (HUD), International Residential Code, Uniform Building Code, and ANSI 119.5 Building Code. Our HUD code homes generally range in size from approximately 500 to 3,300 square feet and typically include two to five bedrooms, a living room, dining room, kitchen and two or more full bathrooms. Most of these are comprised of two or more modules that are joined together at the home site; however, we also produce single-section homes. Our park model homes and campground cabins are less than 400 square feet in size and are purchased primarily for use as second homes, vacation homes or for seasonal retirement living. These homes are placed in planned communities or recreational and resort properties. We also produce commercial structures for a variety of purposes, such as portable offices, showrooms and banking facilities.

The Company and an investment partner, Third Avenue Value Fund (Third Avenue), acquired certain manufactured housing assets and liabilities of Fleetwood Enterprises, Inc. (FEI) on August 17, 2009 (the Fleetwood Acquisition Date) through their jointly-owned corporation, Fleetwood Homes, Inc. (Fleetwood Homes). The Fleetwood Homes transaction included seven operating manufactured housing plants located in Nampa, Idaho; Woodburn, Oregon; Riverside, California; Waco, Texas; Lafayette, Tennessee; Douglas, Georgia; and Rocky Mount, Virginia, and two idle factories located in Woodland, California and Waco, Texas. Also, Fleetwood Homes purchased all related equipment, accounts receivable, inventory, certain trademarks and trade names, intellectual property, and specified contracts and leases and assumed express warranty liabilities pertaining to certain of the previous operations. Third Avenue Management is an investment advisor to Third Avenue and is a principal stockholder of the Company, as described further in Note 12 to the Consolidated Financial Statements.

Financial information for Fleetwood Homes is included in the Company s Consolidated Financial Statements and the related Notes that appear in this Form 10-K. Fleetwood Homes was formed by the Company and Third Avenue, with each contributing \$35 million in exchange for equal ownership interests. Although the Company holds a fifty-percent financial interest in Fleetwood Homes, its results of operations are required to be fully consolidated in the Company s financial statements. See Note 1 to the Consolidated Financial Statements. Third Avenue s financial interest in Fleetwood Homes is considered a redeemable noncontrolling interest, as determined by U.S. generally accepted accounting principles (GAAP), and is designated as such in the Consolidated Financial Statements.

Fleetwood Homes, through its wholly-owned subsidiary, Palm Harbor Homes, Inc., a Delaware corporation (Acquisition Co.), entered into an agreement (the Purchase Agreement) with Palm Harbor Homes, Inc., a Florida corporation, and certain of its subsidiaries (collectively Palm Harbor) to purchase substantially all of the assets and assume specified liabilities of Palm Harbor, pursuant to an auction process under Section 363 of the U.S. Bankruptcy Code. On March 1, 2011, Acquisition Co. was selected as the successful bidder in the court auction and Acquisition Co. completed the purchase of the Palm Harbor assets and the assumption of specified liabilities pursuant to the Amended and Restated Asset Purchase Agreement dated March 1, 2011. The effective date of the transaction was April 23, 2011 (the Acquisition Date). The aggregate gross purchase price was \$83.9 million and is exclusive of transaction costs, specified liabilities assumed and post-closing adjustments. Of the purchase price, (i) approximately \$45.3 million was used to retire the Debtor-In-Possession (DIP) loan previously made by Fleetwood Homes to Palm Harbor; and (ii) \$13.4 million was deposited in escrow pending regulatory approval to transfer the stock of Standard

Casualty Co. (a subsidiary of Palm Harbor) to Acquisition Co., at which time the escrowed funds will be released to the Palm Harbor estate. The purchase price was funded by Fleetwood Homes' cash on hand, along with equal contributions of \$36 million each from the Company and Third Avenue.

Acquisition Co. acquired five operating manufactured housing production facilities, idled factories in nine locations, 49 operating retail locations, one office building, real estate, all related equipment, accounts receivable, customer deposits, inventory, certain trademarks and trade names, intellectual property, and specified contracts and leases. In addition, Acquisition Co. purchased all of the outstanding shares of CountryPlace Acceptance Corp., CountryPlace Mortgage, Ltd. and their wholly-owned finance subsidiaries (collectively, CountryPlace). Acquisition Co. also acquired all of the outstanding shares of Standard Insurance Agency, Inc. and its wholly-owned insurance agency subsidiary, subject, however to a claw-back agreement to return those shares to Palm Harbor if regulatory approval of the Standard Casualty Co. transfer cannot be obtained, as described above. Further, Acquisition Co. assumed certain liabilities of Palm Harbor, including primarily debt facilities of the finance subsidiaries and certain warranty obligations (see Note 10).

Table of Contents

We construct our homes using an assembly-line process in which each section or floor is assembled in stages. Our assembly-line process is designed to be flexible enough to accommodate significant customization as requested by our customers. As of March 31, 2011, the Company operated ten homebuilding facilities located in the Northwest, Southwest, South Central, South and Mid-Atlantic regions. These factories range in size from 79,000 to 250,000 square feet. Effective April 23, 2011, through the Palm Harbor transaction, we added five operating factories located in Austin, Texas; Fort Worth, Texas; Martinsville, Virginia; Millersburg, Oregon; and Plant City, Florida.

As of March 31, 2011, we distributed our homes through six Company-owned retail outlets and a network of approximately 919 independent retail outlets in 36 states, Canada and Mexico. A significant number of these independent retail outlets are located in Arizona, California and Texas. Effective April 23, 2011, through the Palm Harbor transaction, the Company added 49 Company-owned and 135 independent retail outlets. Thirty-one of the Company-owned Palm Harbor retail stores are located in Texas. See Management's Discussion and Analysis of Financial Condition and Results of Operations Industry and Company Outlook.

Industry Overview

General. Manufactured housing provides an alternative in urban, suburban and rural areas to other forms of new low-cost housing, such as site-built housing and condominiums, and to existing housing such as pre-owned homes and apartments. According to statistics published by the Institute for Building Technology and Safety (IBTS), and the United States Department of Commerce, Bureau of the Census, for the year ended December 31, 2010, manufactured housing wholesale shipments of HUD code homes accounted for an estimated 10% of all new single-family housing starts and 14% of all new single-family homes sold.

According to data reported by the Manufactured Housing Institute (MHI), during calendar year 2010, our industry shipped approximately 50,000 HUD code manufactured homes, one of the lowest numbers since shipment statistics began to be recorded in 1959. This followed approximately 50,000 and 82,000 homes shipped in calendar years 2009 and 2008, respectively. Yearly home shipments from 2003 to 2009 were less than the annual home shipments for each of the 40 years from 1963 to 2002. For the past 10- and 20-year periods, annual home shipments averaged 117,000 and 207,000, respectively.

We believe the segment of the housing market in which manufactured housing is most competitive includes consumers with household incomes under \$40,000. This segment has a high representation of young single persons and young married couples, as well as persons age 55 and older. The comparatively low cost of fully-equipped manufactured housing attracts these consumers. Persons in rural areas, where fewer housing alternatives exist, and those who presently live in manufactured homes also make up a significant portion of the demand for new manufactured housing. Improvements in engineering and design as well as efficiencies in production techniques continue to position manufactured homes as viable options in meeting the demand for affordable housing in markets such as rural areas and manufactured housing communities and parks. The markets for affordable factory-built housing are very competitive as well as both cyclical and seasonal. The industry is sensitive to the availability of financing, general economic conditions, employment levels and consumer confidence.

Protracted Industry Downturn. Since mid-1999, the manufactured housing industry has experienced a prolonged and significant downturn. This downturn has resulted in part from the fact that, beginning in 1999, consumer lenders in the sector began to tighten underwriting standards and curtail credit availability in response to higher than anticipated rates of loan defaults and significant losses upon the repossession and resale of the manufactured homes securing defaulted loans. In more recent years, the industry's downturn was exacerbated by the aggressive financing methods available to customers of developers and marketers of standard site-built homes, which had the effect of diverting potential manufactured housing buyers to more expensive site-built homes; the global credit crisis; and general deterioration of economic conditions. These factors have resulted in reduced wholesale shipments and excess manufacturing and retail locations.

As a result of the foregoing factors, based on industry data as of the end of 2010, the number of active industry manufacturing facilities was 131, a decrease of 149 plants since the end of 2000, representing a 53% reduction. These industry conditions have adversely affected the results of operations of all of the major producers of manufactured homes, including our Company.

Table of Contents

Business Strategies

Our marketing strategy is to offer a line of manufactured homes that appeal to a wide range of homebuyers. Our principal focus is the mainstream market, which involves the sale of high-value homes to entry-level and move-up buyers. We also market to special niches such as sub-division developers, senior living community operations and vacation homebuyers.

Our production strategy is to develop and maintain the resources necessary to build to varied and unique customer specifications in an efficient factory production environment. This enables us to attract retailers and consumers who want the flexibility to build homes to meet their specific needs, but still seek the value created by building a home on a factory production line.

Our competitive strategy is to build homes of superior quality, offer innovative designs and floor plans, demonstrate exceptional value, and provide the engineering and technical resources to enable custom home building and to be responsive and efficient in servicing the customer after the sale. We strive to maintain a competitive advantage by reacting quickly to changes in the marketplace and to the specific needs of our retailers and consumers.

Products

Most of our homes are constructed in accordance with the National Manufactured Home Construction and Safety Standards promulgated by HUD. Approximately 85% of the homes we produced in fiscal year 2011 were HUD code homes. The remaining homes we build are primarily park model homes, which are constructed to standards approved by the American National Standards Institute, a private, non-profit organization that administers and coordinates a voluntary standardization and conformity program. We also produce modular homes, vacation cabins and commercial structures built to state and local standards.

We produce a broad range of HUD code homes under various trade names and brand names and in a variety of floor plans and price ranges. Substantially all of these homes are single-story homes. Our HUD code homes generally range in size from approximately 500 to 3,300 square feet. In fiscal year 2011, we sold 4,771 homes, of which 2,503 were multi-section. Included in single-section homes sold are park model homes, which are less than 400 square feet in size and are purchased primarily for use as second homes, vacation homes or retirement living and are placed in planned communities or recreational home parks.

Each home contains a living room, dining area, kitchen, one to five bedrooms and one or more bathrooms, and is equipped with central heating and hot water systems, kitchen appliances, carpeting and window treatments. Feature upgrades include fireplaces, central air conditioning, tile roofs, high ceilings, skylights, hardwood floors and cabinetry, granite countertops, and energy conservation items. We also offer a variety of structural and decorative customizations to meet the home buyer's specifications. With manufacturing centers strategically positioned across the nation, we utilize local market research to design homes to meet the demands of our customers. We have the ability to react and modify floor plans and designs to consumers' specific needs. By offering a full range of homes from entry level models to large custom homes and with the ability to engineer designs in-house, we can accommodate virtually any customer request. We also build modular homes, park models and cabins, and light commercial buildings at many of our manufacturing facilities.

During fiscal year 2011, our average wholesale sales price for a home was approximately \$35,000, excluding delivery. Retail sales prices of our HUD code homes, without land, generally range from \$23,000 to more than \$153,000, depending upon size, floor plan, features and options. Many of the homes we produce are sold in retail transactions covering both the home and the land on which it is placed.

Our manufactured homes are constructed and equipped at our manufacturing facilities. The finished home is then transported by independent trucking companies either to a retail sales center, planned community, housing development or the customer's site. Retailers or other independent installers are responsible for placing the home on site and, in most instances, arranging for connections to utilities and providing installation and finish-out services. Although our manufactured homes are designed to be transportable, only a small percentage are ever moved from their original site after installation.

Through the Palm Harbor acquisition, we have increased our capabilities to manufacture a broad range of single and multi-section manufactured and modular homes under various brand names and in a variety of floor plans and price ranges. While most of the homes built by Palm Harbor are multi-section/modular ranch-style homes, we also build

single-section homes, split-level homes, cape cod style homes, two and three story homes and multi-family units such as apartments and duplexes. Palm Harbor also produces commercial modular structures, including apartment buildings, condominiums, hotels, schools and military barracks and other housing for U.S. military troops. Commercial buildings are constructed in the same facilities in which we build our homes, using similar assembly line processes and techniques. These commercial projects are generally engineered to the purchaser's specifications. The buildings are transported to the customer's site in the same manner as homes and are often set by crane at the site. Commercial projects are finished on site.

Table of Contents

We are constantly introducing new floor plans, decors, exteriors, features and accessories to appeal to changing trends in different regions of the country. Our factory-built homes are designed after extensive field research and consumer feedback. We have developed engineering systems which, through the use of computer-aided technology, permit customization of homes and assist with product development and enhancement.

Manufacturing Operations

Our homes are constructed in plant facilities using an assembly-line process employing from 70 to 250 employees at each facility. Most of our homes are constructed in one or more sections (also known as floors or modules) on a permanently affixed steel support chassis. Each section or floor is assembled in stages beginning with the construction of the chassis, followed by the addition of other constructed and purchased components, and ending with a final quality control inspection. The efficiency of the assembly-line process and the benefits of constructing homes in a controlled factory environment enable us to produce quality homes in less time and at a lower cost per square foot than building homes on individual sites.

During fiscal year 2011, we operated ten manufacturing facilities in Phoenix and Goodyear, Arizona; Nampa, Idaho; Woodburn, Oregon; Riverside, California; Seguin and Waco, Texas; Lafayette, Tennessee; Douglas, Georgia; and Rocky Mount, Virginia. These manufacturing facilities range from approximately 79,000 to 250,000 square feet of floor space. The production schedules for our manufacturing facilities are based on wholesale and retail orders received from buyers, which fluctuate from week to week. In general, however, our facilities are structured to operate on a one shift per day, five days per week basis, and we currently manufacture a typical home in approximately seven production days. During the fiscal quarter ended March 31, 2011, our rate of production was approximately 30 sections per day.

Manufactured housing is a regional business and the primary geographic market for a typical manufacturing facility is within a 350-mile radius. Each of our manufacturing facilities serves between 50 to 140 retailers along with a large number of one-time purchasers. Because we produce homes to fill existing wholesale and retail orders, our manufacturing plants generally do not carry finished goods inventories, except for homes awaiting delivery.

The following table sets forth the total number of homes sold from our factories and the number of manufacturing facilities which produced those homes for the fiscal years indicated:

	Year Ended March 31,		
	2011	2010	2009
Homes sold:			
Single-section	2,268	1,679	1,338
Multi-section	2,503	1,576	1,265
Total homes sold	4,771	3,255	2,603

Operating manufacturing facilities at end of period	10	10	4
---	----	----	---

The ten manufacturing facilities operating at March 31, 2010 were located in the Northwest, Southwest, South Central, South and Mid-Atlantic regions. Effective April 23, 2011, through the Palm Harbor transaction, we added five operating factories located in Austin, Texas; Fort Worth, Texas; Martinsville, Virginia; Millersburg, Oregon; and Plant City, Florida

The principal materials used in the production of our manufactured homes include wood, wood products, aluminum, steel, gypsum wallboard, windows, doors, fiberglass insulation, carpet, vinyl, fasteners, appliances, electrical items and tires. We buy these materials from various third-party manufacturers and distributors. The inability to obtain any materials used in the production of our homes, whether resulting from material shortages, destruction of supplier facilities or other events affecting production of component parts, may affect our ability to meet or maintain production requirements.

At March 31, 2011, we had a backlog of home orders of approximately \$5.9 million, compared to a backlog of \$5.4 million at March 31, 2010. Retailers may cancel orders prior to production without penalty. After production of a

particular home has commenced, the order becomes noncancelable and the retailer is obligated to take delivery of the home. Accordingly, until production of a particular home has commenced, we do not consider our order backlog to be firm orders. Because of the seasonality of the housing market, the level of our order backlog historically declines during the winter months.

Table of Contents**Sales and Distribution**

The following table sets forth the number of homes sold by us through independent and Company-owned distribution channels during the last three fiscal years, as well as the number of independent retail outlets and Company-owned retail centers at the end of the applicable period. The distribution channels are outlined as follows:

	Year Ended March 31,		
	2011	2010	2009
Homes sold through:			
Independent retail outlets	4,648	3,141	2,486
Company-owned retail centers	123	114	117
Total homes sold	4,771	3,255	2,603
Number of independent retail outlets at the end of the period	919	978	322
Number of Company-owned retail centers at the end of the period	6	7	6

Independent Retailers. As of March 31, 2011, we had a network of 919 independent retail outlets in 36 states, of which there were 148 in California, 143 in Texas, 86 in Arizona, 35 in Florida, 34 in Georgia, 33 in North Carolina, 31 in Virginia, 30 in South Carolina, 29 in each of Kentucky and Louisiana, and 28 in New Mexico, and the remaining 293 in 25 other states, Canada and Mexico. As is common in the industry, our independent retailers typically sell manufactured homes produced by other manufacturers in addition to those we produce. Some independent retailers operate multiple sales outlets. No independent retailer accounted for 10% or more of our manufacturing sales during any fiscal year within the three-year period ended March 31, 2011. Effective April 23, 2011, through the Palm Harbor transaction, the Company added 49 Company-owned and 135 independent retail outlets.

We continually seek to increase our wholesale shipments by growing sales at our existing independent retailers and by finding new independent retailers to sell our homes. We provide comprehensive sales training to retail sales associates and bring them to our manufacturing facilities for product training and to view new product designs as they are developed. These training seminars facilitate the sale of our homes by increasing the skill and knowledge of the retail sales consultants. In addition, we display our products in trade shows and support our retailers through the distribution of floor plan literature, brochures, decor boards and point of sale promotional material.

Independent retailers frequently finance a portion of their home purchases through wholesale floor plan financing arrangements. In most cases, we receive a deposit or a commitment from the retailer's lender for each home ordered. We then manufacture the home and ship it at the retailer's expense. Payment is due from the lender upon the acceptance by the retailer of the product. For a description of wholesale floor plan financing arrangements used by independent retailers and our obligations in connection with these arrangements, see *Financing* *Wholesale Financing* below.

Company-Owned Retail Sales Centers. As of March 31, 2011, we had a total of 6 Company-owned retail centers, located in Arizona, New Mexico and Texas. Effective April 23, 2011, through the Palm Harbor transaction, the Company added 49 Company-owned retail outlets, located in Florida, Louisiana, New Mexico, North Carolina, Oklahoma, Oregon, Texas, Virginia and Washington. Thirty-one of the Company-owned Palm Harbor retail stores are located in Texas. Each of our Company-owned retail sales centers has a sales office, which is generally a factory-built structure, and a variety of model homes of various sizes, floor plans, features and prices. Customers may purchase a home from an inventory of homes maintained at the location, including a model home, or may order a home that will be built at a manufacturing facility. Our Company-owned sales centers are generally located on a main road or highway for high visibility. Model homes may be displayed in a residential setting with sidewalks and landscaping. Each sales center usually employs a manager and three or four salespersons. As of March 31, 2011, Company-owned sales centers had an average inventory of 7 new homes per location. This number of homes in inventory includes homes delivered to a consumer home site but not yet recorded as a sale. We internally finance our inventories. Our

Company-owned retail centers employ salespersons who are compensated through a combination of salary and commission. Retail centers do not have administrative staff, as we perform most administrative functions at our corporate headquarters.

Warranties. We provide the retail home buyer a one-year limited warranty covering defects in material or workmanship in home structure, plumbing and electrical systems. Nonstructural components of a cosmetic nature are warranted for 120 days, except in specific cases where state laws require longer warranty terms. Our warranty does not extend to installation and setup of the home, which is generally arranged by the retailer. Appliances, carpeting, roofing and certain other components are warranted by their original manufacturer for various lengths of time. Refer to our discussion of the Magnuson-Moss Warranty Federal Trade Commission Improvement Act under Government Regulation beginning on page 9.

Table of Contents**Financing**

Wholesale Financing. During fiscal year 2011, approximately 30% of our wholesale sales to independent retailers were purchased through wholesale floor plan financing arrangements. Under a typical floor plan financing arrangement, an independent financial institution specializing in this line of business provides the retailer with a loan for the purchase price of the home and maintains a security interest in the home as collateral. The financial institution customarily requires us, as the manufacturer of the home, to enter into a separate repurchase agreement with the financial institution under which we are obligated, upon default by the retailer and under certain other circumstances, to repurchase the financed home at declining prices over the term of the repurchase agreement (which in most cases is 18 to 36 months). The price at which we may be obligated to repurchase a home under these agreements is based upon our original invoice price plus certain administrative and shipping expenses. Our obligation under these repurchase agreements ceases upon the purchase of the home by the retail customer. The maximum amount of our contingent obligations under such repurchase agreements was approximately \$11.1 million as of March 31, 2011. The risk of loss under these agreements is spread over many retailers and is further reduced for the resale value of the homes.

Inventory financing for the industry's wholesale distribution chain continues to be in short supply. Faced with illiquid capital markets in late calendar year 2008, each of the manufactured housing sector's remaining inventory finance companies (floor plan lenders) initiated significant changes, including one company's announcement to cease its lending activities in this industry entirely. The involvement of others is subject to more restrictive terms that continue to evolve. In connection with certain of these participation inventory finance programs, the Company provides a significant amount of the funds that independent financiers lend to distributors to finance retail inventories of our products. In addition, the Company has entered into direct inventory finance arrangements with distributors of our products under which the Company provides all of the inventory finance funds (see Note 3). The Company's participation in inventory finance has increased the availability of manufactured home inventory financing to distributors of our products. We believe that our expanding involvement in the wholesale financing of inventory is quite helpful to retailers and allows our homes continued exposure to potential homebuyers. These initiatives support the Company's ongoing efforts to expand our distribution base in all of our markets with existing and new customers. See Note 1 to the Consolidated Financial Statements for related revenue recognition implications.

Consumer Financing. Sales of factory-built homes are significantly affected by the availability and cost of consumer financing. There are three basic types of consumer financing in the factory-built housing industry: chattel or personal property loans for purchasers of a home with no real estate involved (generally HUD-code homes); non-conforming mortgages for purchasers of the home and the land on which the home is placed; and mortgage loans which comply with the requirements of Federal Housing Administration (FHA), Federal National Mortgage Association (Fannie Mae), Federal Home Loan Mortgage Corporation (Freddie Mac), or Veterans Administration loans (VA). The majority of modular homes are financed with conventional real estate mortgages. Beginning in mid-1999, lenient credit standards for chattel loans led to increased numbers of repossessions of manufactured homes and excessive inventory levels. The poor performance of manufactured home loan portfolios made it difficult for consumer finance companies in the industry to obtain long-term capital in the asset-backed securitization market. As a result, many consumer finance companies curtailed their lending or exited the manufactured housing loan industry entirely. Since then, the lenders who remained in the business tightened their credit standards and increased their fees and interest rates for chattel loans which reduced lending volumes and lowered sales volumes of manufactured homes.

The American Housing Rescue and Foreclosure Prevention Act was enacted in 2008 to provide assistance by way of legislation for the housing industry, including the manufactured housing industry. Among other things, this legislation provides for increased loan limits for chattel (home-only Title I) loans to \$69,678, up 43% from the previous limit of \$48,600 set in 1992. New FHA Title I program guidelines became effective on June 1, 2010. On June 10, 2010, the Government National Mortgage Association (Ginnie Mae) began accepting applications by lenders for participation as issuers of mortgage backed securities backed by Title I loans originated under the new program. Ginnie Mae released related pooling guidelines in November 2010. The issuance of these guidelines provides Ginnie Mae the ability to securitize manufactured home FHA Title I loans. Chattel loans have languished in recent years and these changes are meant to provide a new source of lending capital to the industry, which can then be used to fund new loans for our customers. However, a meaningful positive impact from these changes in the form of increased home orders at our

factories has yet to be realized.

Consumer financing for the retail purchase of manufactured homes needs to become more available before marked emergence from current low sales volume can occur. Restrictive underwriting guidelines, irregular appraisal processes, higher interest rates compared to site-built homes, regulatory burdens, reductions in the number of institutions lending to manufactured home buyers and limited secondary market availability for manufactured home loans are significant restraints to industry growth. We are working directly and through industry trade associations to encourage favorable legislative and government-sponsored enterprise action to address the mortgage financing needs of potential buyers of affordable homes. Although limited progress has been made in this area, it has not yet generated a meaningful increase in home orders at our factories.

Table of Contents

Financial Services

As a result of the Palm Harbor acquisition, effective April 23, 2011, we have entered into the manufactured housing consumer finance and property and casualty insurance lines of business.

Finance. We provide a source of homebuyer financing to our customers on competitive terms through our subsidiary, CountryPlace. CountryPlace offers conforming mortgages to purchasers of factory-built homes sold by Company-owned retail sales centers and certain independent retail dealers, builders and developers. CountryPlace is an approved seller-servicer with Fannie Mae, is approved by HUD to originate FHA-insured mortgages under its Direct Endorsement program, and is approved to issue Ginnie Mae mortgage-backed securities. The loans originated through CountryPlace are sold to investors. CountryPlace also provides various loan origination and servicing functions for non-affiliated entities under contract.

All of CountryPlace's loan contracts held are fixed rate and have monthly scheduled payments of principal and interest. The scheduled payments for each contract would, if made on their respective due dates, result in a full amortization of the contract. Loan contracts secured by collateral that is geographically concentrated could experience higher rates of delinquencies, default and foreclosure losses than loan contracts secured by collateral that is more geographically dispersed. CountryPlace has loan contracts secured by factory-built homes located in thirty states, including the key states of Texas, Florida, Arizona and New Mexico.

Changes in laws or other events that adversely affect liquidity in the secondary mortgage market could hurt our business. The government-sponsored enterprises, principally Fannie Mae, Ginnie Mae and Freddie Mac, play a significant role in buying home mortgages and creating investment securities that are either sold to investors or held in their portfolios. These organizations provide liquidity to the secondary mortgage market and have recently experienced financial difficulties. Any new federal laws or regulations that restrict or curtail their activities, or any other events or conditions that prevent or restrict these enterprises from continuing their historic businesses, could affect the ability of our customers to obtain the mortgage loans or could increase mortgage interest rates, fees, and credit standards, which could reduce demand for our homes and/or the loans that we originate and adversely affect our results of operations.

We believe that providing financing alternatives to our customers improves our responsiveness to the financing needs of prospective purchasers and provides us with additional sources of loan origination and servicing revenues.

Insurance. We acquired all of the outstanding shares of Standard Insurance Agency, Inc. and its wholly-owned insurance agency subsidiary, subject, however to a claw-back agreement to return those shares to Palm Harbor if regulatory approval of the Standard Casualty Co. transfer cannot be obtained (see Note 10).

Standard Casualty Co. and Standard Insurance Agency specialize in homeowner property and casualty insurance products for the manufactured housing industry, primarily serving the Texas, Georgia, Arizona and New Mexico markets. In Texas, the policies are written through one affiliated managing general agent, which produces all premiums, except surety, through local agents, most of which are manufactured home dealers. All business outside the state of Texas is written on a direct basis through local agents.

Competition

The manufactured housing industry is highly competitive at both the manufacturing and retail levels, with competition based upon several factors, including price, product features, reputation for service and quality, depth of distribution, promotion, merchandising and the terms of retail customer financing. We compete with at least 45 other producers of manufactured homes, as well as companies offering for sale homes repossessed from wholesalers or consumers. In addition, manufactured homes compete with new and existing site-built homes, as well as apartments, townhouses and condominiums.

In addition to us, there are a number of other national manufacturers competing for a significant share of the manufactured housing market in the United States, including Clayton Homes, Inc., Champion Enterprises Holding, LLC and Skyline Corporation. Certain of our competitors possess substantially greater financial, manufacturing, distribution and marketing resources.

Although many lenders to the factory-built housing industry have reduced their volume or exited the business, there are still competitors to CountryPlace in the markets we serve. These competitors include national, regional and local banks, independent finance companies, mortgage brokers and mortgage banks. Although the market is highly

fragmented, especially for conforming mortgage products, chattel financing is consolidating among a few remaining national lenders: 21st Mortgage Corporation, an affiliate of Clayton Homes, Inc. and Berkshire Hathaway, Inc.; and U.S. Bank Manufactured Housing Finance. Each of these competitors is larger than CountryPlace and has access to substantially more capital and cost efficiencies than CountryPlace.

Table of Contents

Government Regulation

Our manufactured homes are subject to a number of federal, state and local laws, codes and regulations. Construction of manufactured housing is governed by the National Manufactured Housing Construction and Safety Standards Act of 1974, as amended, or the Home Construction Act. In 1976, HUD issued regulations under the Home Construction Act establishing comprehensive national construction standards. The HUD regulations, known collectively as the Federal Manufactured Home Construction and Safety Standards, cover all aspects of manufactured home construction, including structural integrity, fire safety, wind loads, thermal protection and ventilation. Such regulations preempt conflicting state and local regulations on such matters, and are subject to periodic change. Our manufacturing facilities, and the plans and specifications of the HUD code manufactured homes they produce, have been approved by a HUD-certified inspection agency. Further, an independent HUD-certified third-party inspector regularly reviews our manufactured homes for compliance with the HUD regulations during construction. Failure to comply with applicable HUD regulations could expose us to a wide variety of sanctions, including mandated closings of our manufacturing facilities. We believe our manufactured homes are in substantial compliance with all present HUD requirements. Our park model homes are not subject to HUD regulations, but we believe that our park model homes meet all present standards of the American National Standards Institute.

Manufactured and site-built homes are all typically built with wood products that contain formaldehyde resins. HUD regulates the allowable concentrations of formaldehyde in certain products used in manufactured homes and requires manufacturers to warn purchasers as to formaldehyde-associated risks. The Environmental Protection Agency (EPA) and other governmental agencies have in the past evaluated the effects of formaldehyde. We use materials in our manufactured homes that meet HUD standards for formaldehyde emissions and believe we comply with HUD and other applicable government regulations in this regard.

The transportation of manufactured homes on highways is subject to regulation by various federal, state and local authorities. Such regulations may prescribe size and road use limitations and impose lower than normal speed limits and various other requirements.

We have leased space for our manufacturing facility in Goodyear, Arizona since 1993. The leased premise is part of what is referred to as the Phoenix-Goodyear Airport (South) Superfund Site (PGAS), which was designated as a National Priorities List (NPL) site under the authority of the Comprehensive Environmental Response, Compensation, and Liability Act in 1983. The reason for the site's NPL designation was because of extensive soil and groundwater contamination (trichloroethylene or TCE, chromium and cadmium) that resulted from historic manufacturing at the Goodyear Tire and Rubber Company and the United States Department of Defense.

Pursuant to a consent decree entered into with the EPA, the Goodyear Tire and Rubber Company is responsible for taking certain remedial actions at the PGAS site. In February 2010, the EPA completed its five-year review of the PGAS site and reported that the contaminant concentrations in groundwater at the site have been reduced, and treated groundwater from the treatment systems has met cleanup goals throughout that period of operation. Nonetheless, the groundwater still contains contaminant levels above specified cleanup goals as the remediation progresses. The EPA's five-year review identified several issues regarding the ongoing effectiveness of the remedy and several new issues regarding possible presence of trace metals, vapor intrusion, institutional controls, ecological risks, and migration, all of which the EPA is addressing.

Our lease specifically refers to the consent decree with the EPA and provides that, as between our Landlord (now JRC Goodyear, LLC) and us, the Landlord will be responsible for any liabilities resulting from the existing contamination at the site and that the Landlord will indemnify, defend, and hold us, our directors, our officers, our employees, our agents, and our successors, harmless for such liabilities. During the eighteen years that we have conducted manufacturing operations at the Goodyear, Arizona facility, we have never received any inquiry or notice from the EPA or the Arizona Department of Environmental Quality suggesting that we may be liable for any costs associated with the remediation of the PGAS site. There are no underground storage tanks at the Goodyear, Arizona facility. Our manufactured homes are subject to local zoning and housing regulations. In certain cities and counties in areas where our homes are sold, local governmental ordinances and regulations have been enacted which restrict the placement of manufactured homes on privately-owned land or which require the placement of manufactured homes in manufactured home communities. Such ordinances and regulations may adversely affect our ability to sell homes for

installation in communities where they are in effect. A number of states have adopted procedures governing the installation of manufactured homes. Utility connections are subject to state and local regulations which must be complied with by the retailer or other person installing the home.

Certain warranties we issue may be subject to the Magnuson-Moss Warranty Federal Trade Commission Improvement Act (Magnuson-Moss Warranty Act), which regulates the descriptions of warranties on consumer products. In the case of warranties subject to the Magnuson-Moss Warranty Act, the Company is subject to a number of additional regulatory requirements. For example, warranties that are subject to the Magnuson-Moss Warranty Act must be included in a single easy-to-read document that is generally made available prior to purchase. The Magnuson-Moss Warranty Act also prohibits certain attempts to disclaim or modify implied warranties and the use of deceptive or misleading terms. A claim for a violation of the Magnuson-Moss Warranty Act can be the subject of an action in federal court in which consumers may be able to recover attorneys' fees. The description and substance of our warranties are also subject to a variety of state laws and regulations. A number of states require manufactured home producers to post bonds to ensure the satisfaction of consumer warranty claims.

Table of Contents

A variety of laws affect the financing of the homes we manufacture. The Federal Consumer Credit Protection Act (Truth-in-Lending) and Regulation Z promulgated thereunder require written disclosure of information relating to such financing, including the amount of the annual percentage rate and the finance charge. The Federal Fair Credit Reporting Act also requires certain disclosures to potential customers concerning credit information used as a basis to deny credit. The Federal Equal Credit Opportunity Act and Regulation B promulgated thereunder prohibit discrimination against any credit applicant based on certain specified grounds. The Real Estate Settlement Procedures Act and Regulation X promulgated thereunder require certain disclosures regarding the nature and costs of real estate settlements. The Federal Trade Commission has adopted or proposed various Trade Regulation Rules dealing with unfair credit and collection practices and the preservation of consumers' claims and defenses. Installment sales contracts eligible for inclusion in a Government National Mortgage Association program are subject to the credit underwriting requirements of the Federal Housing Association. A variety of state laws also regulate the form of the installment sale contracts or financing documents and the allowable deposits, finance charge and fees chargeable pursuant to installment sale contracts or financing documents.

Our sale of insurance products is subject to various state insurance laws and regulations which govern allowable charges and other insurance practices. Palm Harbor's insurance operations are regulated by the state insurance boards where they underwrite their policies. Underwriting, premiums, investments and capital reserves (including dividend payments to stockholders) are subject to the rules and regulations of these state agencies.

Governmental authorities have the power to enforce compliance with their regulations, and violations may result in the payment of fines, the entry of injunctions or both. Although we believe that our operations are in substantial compliance with the requirements of all applicable laws and regulations, these requirements have generally become more strict in recent years. Accordingly, we are unable to predict the ultimate cost of compliance with all applicable laws and enforcement policies.

Seasonality

Our business is seasonal. Generally we experience higher sales volume during the months of March through October. Our sales are slower during the winter months and shipments can be delayed in areas of the country that experience harsh weather conditions.

Employees

As of March 31, 2011, we had approximately 1,250 employees. As of April 23, 2011, and in conjunction with the Palm Harbor transaction, we hired approximately 1,200 employees, for a total of 2,450 employees. We believe that our relationship with our employees is good.

Available Information

We make available free of charge on or through our internet site, www.cavco.com, the following filings as soon as reasonably practicable after they are electronically filed with, or furnished to, the Securities and Exchange Commission (SEC): the Annual Report on Form 10-K, the Quarterly Reports on Form 10-Q, the Current Reports on Form 8-K and amendments to those Reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 (Exchange Act).

ITEM 1A. RISK FACTORS

Our business involves a number of risks and uncertainties. You should carefully consider the following risks, together with the information provided elsewhere in this Annual Report. The items described below are not the only risks facing us. Additional risks that are currently unknown to us or that we currently consider to be immaterial may also impair our business or adversely affect our financial condition or results of operations.

We operate in an industry that is currently experiencing a prolonged and significant downturn

Since mid-1999, the manufactured housing industry has experienced a prolonged and significant downturn. This downturn has resulted in part from the fact that, beginning in 1999, consumer lenders in the sector began to tighten underwriting standards and curtail credit availability in response to higher than anticipated rates of loan defaults and significant losses upon the repossession and resale of manufactured homes securing defaulted loans. In more recent years, the industry's downturn was exacerbated by the aggressive financing methods available to customers of developers and marketers of standard site-built homes which had the effect of diverting potential manufactured housing buyers to more expensive site-built homes, the global credit crisis, and general deterioration of economic

conditions. These factors have resulted in reduced wholesale shipments and excess manufacturing and retail locations.

Table of Contents

As a result of the foregoing factors, based on industry data as of the end of 2010, the number of active industry manufacturing facilities has dropped by 149 plants to 131, representing a 53% reduction since the end of 2000. The availability of consumer financing for the purchase of manufactured homes continues to be constrained, as discussed below. Although it is difficult to predict future industry conditions, the current market environment tends to indicate that a sustained recovery in the manufactured housing industry is unlikely to occur in the near term.

If current industry conditions continue or get materially worse, we may be required to take steps in an attempt to mitigate the effect of unfavorable industry conditions, such as the closure of facilities or consolidation of existing operations. These steps could impair our ability to conduct our business in a manner consistent with past practice and could make it more difficult for us to expand our operations if and when industry conditions improve. Furthermore, some of these steps could lead to fixed asset, goodwill or other impairment charges.

We may not be able to complete the acquisition of Standard Casualty Co. and successfully integrate Fleetwood Homes, Palm Harbor, and any future acquisition or attain the anticipated benefits and the acquisition of Fleetwood Homes, Palm Harbor and other future acquisitions may adversely impact the Company's liquidity

On April 23, 2011, subsequent to our March fiscal year-end, a subsidiary of Fleetwood Homes, Inc., owned 50% by Cavco and 50% by Third Avenue Value Fund, purchased substantially all of the assets and certain liabilities of Palm Harbor Homes, Inc., a Florida corporation. Palm Harbor is a manufacturer and marketer of factory-built housing and a provider of related consumer financing and insurance products. The aggregate gross purchase price was \$83.9 million and is exclusive of transaction costs, specified liabilities assumed and post-closing adjustments. Of the purchase price, approximately \$45.3 million was used to retire the debtor-in-possession loan previously made by Fleetwood Homes to Palm Harbor, and \$13.4 million was deposited in escrow pending regulatory sale approval for the stock of Standard Casualty Co., at which time the escrowed funds will be released to the Palm Harbor estate. In addition, we purchased all of the outstanding shares of CountryPlace Acceptance Corp., CountryPlace Mortgage, Ltd. and their wholly-owned finance subsidiaries. We also acquired all of the outstanding shares of Standard Insurance Agency, Inc. and its wholly-owned insurance agency subsidiary, subject, however to a claw-back agreement to return those shares to Palm Harbor if regulatory approval of the Standard Casualty Co. transfer cannot be obtained, as described above. Further, we assumed certain liabilities of Palm Harbor, including primarily debt facilities of the finance subsidiaries and certain warranty obligations. The purchase price was funded by Fleetwood Homes' cash on hand, along with contributions of \$36 million each from Cavco and Third Avenue (see Notes 10 and 12).

We completed the acquisition of certain manufactured housing assets and liabilities of Fleetwood Homes in fiscal year 2010. We may also consider other strategic acquisitions if such opportunities arise. Any transactions that we consider may involve a number of risks, including the diversion of our management's attention from our existing business for those transactions that we complete, or possible adverse effects on our operating results during the integration process and on our liquidity. In addition, we may not be able to successfully or profitably integrate, operate, maintain and manage the newly acquired operations or employees of Fleetwood Homes, Palm Harbor, or potential future acquisitions or complete the acquisition of the stock of Standard Casualty Co. We may not be able to maintain uniform standards, controls, procedures and policies, which may lead to operational inefficiencies.

Our expansion of retail and manufacturing businesses and entry into new lines of business, namely manufactured housing consumer finance and insurance, through the Palm Harbor transaction could expose the Company to additional risks

As a result of the Palm Harbor acquisition effective April 23, 2011, we have significantly expanded our manufactured housing retail and manufacturing businesses and entered into new manufactured housing consumer finance and property and casualty insurance lines of business. These new businesses may expose the Company to additional risks and uncertainties.

As of March 31, 2011, the Company operated ten homebuilding facilities located in the Northwest, Southwest, South Central, South and Mid-Atlantic regions. With the acquisition of Palm Harbor, we increased our geographic reach by adding five operating factory-built housing production facilities in four states, idled factories in nine locations and 49 company-owned retail sales centers and builder locations in nine states. These Palm Harbor locations are in the same regions as the Company's legacy business, plus Florida. The transaction significantly increased our presence in Texas by adding factories in the cities of Ft. Worth and Austin to our existing manufacturing facilities in Seguin and Waco.

Of Palm Harbor's company-owned sales centers, 31 are located in Texas. While Texas has lagged the national recession to a certain extent, a further decline in the economic conditions of Texas could have a material adverse effect on our results of operations as well.

CountryPlace offers conforming mortgages to purchasers of factory-built homes sold by Company-owned retail sales centers and certain independent retail dealers, builders and developers. CountryPlace is an approved seller-servicer with Fannie Mae, is approved by HUD to originate FHA-insured mortgages under its Direct Endorsement program, and is approved to issue Ginnie Mae mortgage-backed securities. The loans originated through CountryPlace are sold to investors. CountryPlace also provides various loan origination and servicing functions for non-affiliated entities under contract.

Table of Contents

Changes in laws or other events that adversely affect liquidity in the secondary mortgage market could hurt our business. The government-sponsored enterprises, principally Fannie Mae, Ginnie Mae and Freddie Mac, play a significant role in buying home mortgages and creating investment securities that they either sell to investors or hold in their portfolios. These organizations provide liquidity to the secondary mortgage market and have recently experienced financial difficulties. Any new federal laws or regulations that restrict or curtail their activities, or any other events or conditions that prevent or restrict these enterprises from continuing their historic businesses, could affect the ability of our customers to obtain the mortgage loans or could increase mortgage interest rates, fees, and credit standards, which could reduce demand for our homes and/or the loans that we originate and adversely affect our results of operations.

If CountryPlace's customers are unable to repay their loans, CountryPlace may be adversely affected. CountryPlace makes loans to borrowers that it believes are creditworthy based on its credit guidelines. However, the ability of these customers to repay their loans may be affected by a number of factors, including, but not limited to: national, regional and local economic conditions; changes or continued weakness in specific industry segments; natural hazard risks affecting the region in which the borrower resides; and employment, financial or life circumstances.

If customers do not repay their loans, CountryPlace may repossess or foreclose in order to liquidate its loan collateral and minimize losses. The homes and land securing the loans are subject to fluctuating market values, and proceeds realized from liquidating repossessed or foreclosed property are highly susceptible to adverse movements in collateral values. Recent and continued trends in general house price depreciation and increasing levels of unemployment may result in additional defaults and exacerbate actual loss severities upon collateral liquidation beyond those normally experienced by CountryPlace.

Some of the loans CountryPlace has originated or may originate in the future may not have a liquid market, or the market may contract rapidly in the future and the loans may become illiquid. Although CountryPlace offers loan products and prices its loans at levels that it believes are marketable at the time of credit application approval, market conditions for mortgage-related loans have deteriorated rapidly and significantly recently. CountryPlace's ability to respond to changing market conditions is bound by credit approval and funding commitments it makes in advance of loan completion. In this environment, it is difficult to predict the types of loan products and characteristics that may be susceptible to future market curtailments and tailor our loan offerings accordingly. As a result, no assurances can be given that the market value of our loans will not decline in the future, or that a market will continue to exist for loan products.

Standard Casualty Co. and Standard Insurance Agency specialize in the manufactured housing industry, primarily serving the Texas, Georgia, Arizona and New Mexico markets. In Texas, the policies are written through one affiliated managing general agent, which produces all premiums, except surety, through local agents, most of which are manufactured home dealers. All business outside the state of Texas is written on a direct basis through local agents. Property and casualty insurance companies are subject to certain Risk-Based Capital requirements as specified by the National Association of Insurance Commissioners. Under those requirements, the amount of capital and surplus maintained by a property and casualty insurance company is to be determined based on the various risk factors related to it.

Tightened credit standards, curtailed lending activity by home-only lenders and increased government lending regulations have contributed to a constrained consumer financing market

Consumers who buy our manufactured homes have historically secured retail financing from third-party lenders. The availability, terms and costs of retail financing depend on the lending practices of financial institutions, governmental policies and economic and other conditions, all of which are beyond our control. Legislation, including certain provisions of the Dodd-Frank Wall Street Reform and Consumer Protection Act may adversely affect the availability and cost of manufactured home loans. A consumer seeking to finance the purchase of a manufactured home without land will generally pay a higher interest rate and have a shorter loan maturity than a consumer seeking to finance the purchase of land and the home. In addition, home-only financing is at times more difficult to obtain than financing for site-built homes. Since 1999, home-only lenders have tightened the credit underwriting standards and increased interest rates for loans to purchase manufactured homes, which have reduced lending volumes which has negatively impacted our sales. Most of the national lenders who have historically provided home-only loans have exited this

sector of the industry. Conseco Finance Corp. (Conseco Finance) was historically one of the largest originators of home-only loans in the manufactured housing industry. In December 2002, Conseco Inc., the parent company of Conseco Finance, filed for bankruptcy protection and ceased its lending activities. In May 2004, JPMorgan Chase Bank N.A., the lender with the largest loan origination volume in the home-only financing market at that time, announced it was ceasing its manufactured housing lending activities. In March 2008, Origen Financial, Inc. (Origen) announced that it was suspending originations of manufactured home loans as a result of unfavorable conditions in the secondary market for its loans. Another major lender, 21st Mortgage Corporation, citing unreliable and inadequate sources of funding, announced in January 2009 that it was significantly curtailing its retail lending program. Remaining retail lenders such as Triad Financial Services, Inc. (Triad), U.S. Bank, and CU Factory Built Lending have tightened their loan underwriting standards. If other lenders do not absorb the volume of loans previously made by these lenders, we could experience further retail and manufacturing sales declines.

Table of Contents***The availability of wholesale financing for industry retailers is limited due to a reduced number of floor plan lenders and reduced lending limits***

Manufactured housing retailers generally finance their inventory purchases with wholesale floor plan financing provided by lending institutions. The availability of wholesale financing is significantly affected by the number of floor plan lenders and their lending limits. During the past seven years, a substantial number of wholesale lenders have exited the industry or curtailed their floor plan operations. Conseco Finance was historically the largest floor plan lender, previously providing about 25% of the industry's wholesale financing. Conseco Finance discontinued approving and funding new floor plan loan requests in April 2002 and filed for bankruptcy protection in December 2002. With Conseco Finance's exit, Deutsche Financial Services was the largest remaining floor plan lender, providing approximately 20% of the industry's wholesale financing. Deutsche Financial Services discontinued approving and funding new floor plan loan requests in November 2002 and proceeded to liquidate its existing floor plan receivables. In recent years, the Company's independent retailers have relied primarily on GE Commercial Distribution Finance, Textron Financial Corporation and 21st Mortgage Corporation, national lending institutions that have specialized in providing wholesale floor plan financing to manufactured housing retailers. As a result of the current credit crisis, in the last half of 2008, each of these remaining national floor plan lenders substantially curtailed their lending activities, and Textron Financial Corporation announced its exit from the business. We are concerned that floor plan financing providers could further reduce their levels of floor plan lending. Reduced availability of floor plan lending negatively affects the inventory levels of our independent retailers, the number of retail sales center locations and related wholesale demand, and adversely affects the availability of and our access to capital on an ongoing basis.

Our operating results could be affected by market forces and declining housing demand

As a participant in the homebuilding industry, we are subject to market forces beyond our control. These market forces include employment and employment growth, interest rates, consumer confidence, land availability and development costs, apartment vacancy levels, and the health of the general economy. Unfavorable changes in any of the above factors or other issues could have an adverse effect on our sales and earnings.

We have incurred net losses in certain prior periods and there can be no assurance that we will generate income in the future

Since becoming a stand-alone public company, we have generated net income each complete fiscal year, except for fiscal year 2010, in which we incurred net losses attributable in substantial part to the downturn affecting the manufactured housing industry, which is discussed in detail above. The likelihood that we will generate net income in the future must be considered in light of the difficulties facing the manufactured housing industry as a whole, economic conditions, the competitive environment in which we operate and the other risks and uncertainties discussed in this Annual Report. There can be no assurance that we will generate net income in the future.

A write-off of all or part of our goodwill could adversely affect our operating results and net worth

As of March 31, 2011, 25% of our total assets consisted of goodwill, all of which is attributable to our manufacturing operations. In accordance with Financial Accounting Standards Board Accounting Standards Codification (FASB ASC) 350, *Intangibles - Goodwill and Other* (ASC 350), we review goodwill at least annually for impairment by reporting unit and record an impairment charge if the implied fair value of a reporting unit, including goodwill, is less than its carrying value. If goodwill has become impaired, we charge the impairment as an expense in the period in which the impairment occurred. See Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies and Note 1 to our Consolidated Financial Statements. Our goodwill could be impaired if developments affecting our manufacturing operations or the markets in which we produce manufactured homes lead us to conclude that the cash flows we expect to derive from our manufacturing operations will be substantially reduced. A write off of all or part of our goodwill could adversely affect our results of operations and financial condition.

The cyclical and seasonal nature of the manufactured housing industry causes our revenues and operating results to fluctuate, and we expect this cyclicity and seasonality to continue in the future

The manufactured housing industry is highly cyclical and seasonal and is influenced by many national and regional economic and demographic factors including the availability of consumer financing for homebuyers, the availability

of wholesale financing for retailers, seasonality of demand, consumer confidence, interest rates, demographic and employment trends, income levels, housing demand, general economic conditions, including inflation and recessions, and the availability of suitable home sites.

As a result of the foregoing economic, demographic and other factors, our revenues and operating results fluctuate, and we expect them to continue to fluctuate in the future. Moreover, we have and may continue to experience operating losses during cyclical downturns in the manufactured housing market.

Table of Contents

Our liquidity and ability to raise capital may be limited

We may need to obtain debt or additional equity financing in the future. The type, timing and terms of the financing selected by us will depend on, among other things, our cash needs, the availability of other financing sources and prevailing conditions in the financial markets. There can be no assurance that any of these sources will be available to us at any time or that they will be available on satisfactory terms.

We have contingent repurchase obligations related to wholesale financing provided to industry retailers

In accordance with customary business practice in the manufactured housing industry, we have entered into repurchase agreements with various financial institutions and other credit sources who provide floor plan financing to industry retailers, which provide that we will be obligated, under certain circumstances, to repurchase homes sold to retailers in the event of a default by a retailer in its obligation to such credit sources. Under these agreements, we have agreed to repurchase homes at declining prices over the term of the agreement (which in most cases is 18 to 36 months). The maximum amount of our contingent obligations under such repurchase agreements was approximately \$11.1 million as of March 31, 2011, without reduction for the resale value of the homes. We may be required to honor contingent repurchase obligations in the future and may incur additional expense as a consequence of these repurchase agreements.

The manufactured housing industry is highly competitive, and competition may increase the adverse effects of industry conditions

The manufactured housing industry is highly competitive. Competition at both the manufacturing and retail levels is based upon several factors, including price, product features, reputation for service and quality, merchandising, terms of retailer promotional programs and the terms of retail customer financing. Numerous companies produce manufactured homes in our markets. In addition, our homes compete with repossessed homes that are offered for sale in our markets. Certain of our manufacturing competitors also have their own retail distribution systems and consumer finance and insurance operations. The ability to offer consumer finance and insurance products may provide some competitors with an advantage. In addition, there are many independent manufactured housing retail locations in most areas where we have retail operations. We believe that where wholesale floor plan financing is available, it is relatively easy for new retailers to enter into our markets as competitors. In addition, our products compete with other forms of low to moderate-cost housing, including new and existing site-built homes, apartments, townhouses and condominiums. If we are unable to compete effectively in this environment, our retail and wholesale sales could be reduced.

If we are unable to establish or maintain relationships with independent retailers who sell our homes, our sales could decline

During fiscal year 2011, approximately 97% of our wholesale sales of manufactured homes were to independent retail locations. As is common in the industry, independent retailers may also sell homes produced by competing manufacturers. We may not be able to establish relationships with new independent retailers or maintain good relationships with independent retailers that sell our homes. Even if we do establish and maintain relationships with independent retailers, these retailers are not obligated to sell our homes exclusively, and may choose to sell our competitors' homes instead. The independent retailers with whom we have relationships can cancel these relationships on short notice. In addition, these retailers may not remain financially solvent, as they are subject to industry, economic, demographic and seasonal trends similar to those faced by us. If we do not establish and maintain relationships with solvent independent retailers in one or more of our markets, sales in those markets could decline.

Our results of operations can be adversely affected by labor shortages and the pricing and availability of raw materials

The homebuilding industry has from time to time experienced labor shortages and other labor related issues. A number of factors may adversely affect the labor force available to us and our subcontractors in one or more of our markets including high employment levels, construction market conditions and government regulation which include laws and regulations related to workers' health and safety, wage and hour practices and immigration. An overall labor shortage or a lack of skilled labor could cause significant increases in costs or delays in construction of homes which could have a material adverse effect upon our sales and results of operations.

Our results of operations can be affected by the pricing and availability of raw materials. Although we attempt to increase the sales prices of our homes in response to higher materials costs, such increases typically lag behind the escalation of materials costs. Sudden increases in price and lack of availability of raw materials can be caused by natural disaster or other market forces, as has occurred in recent years. Although we have not experienced any production halts, severe or prolonged shortages of some of our most important building materials, which include wood and wood products, gypsum wallboard, steel, insulation, and other petroleum-based products, have occurred. There can be no assurance that sufficient supplies of these and other raw materials will continue to be available to us.

Table of Contents

If the manufactured housing industry is not able to secure favorable local zoning ordinances, our sales could decline and our business could be adversely affected

Manufactured housing communities and individual home placements are subject to local zoning ordinances and other local regulations relating to utility service and construction of roadways. In the past, property owners often have resisted the adoption of zoning ordinances permitting the location of manufactured homes in residential areas, which we believe has restricted the growth of the industry. Manufactured homes may not achieve widespread acceptance and localities may not adopt zoning ordinances permitting the development of manufactured home communities. If the manufactured housing industry is unable to secure favorable local zoning ordinances, our sales could decline and our business, results of operations and financial condition could be adversely affected.

The loss of any of our executive officers could reduce our ability to execute our business strategy and could have a material adverse effect on our business and results of operations

We are dependent to a significant extent upon the efforts of our executive officers, particularly Joseph H. Stegmayer, our Chief Executive Officer, Daniel L. Urness, our Chief Financial Officer, and Charles E. Lott, President of Fleetwood Homes. The loss of the services of one or more of our executive officers could impair our ability to execute our business strategy and have a material adverse effect upon our business, financial condition and results of operations. We currently have no key man life insurance for our executive officers.

Certain provisions of our organizational documents could delay or make more difficult a change in control of our Company

Certain provisions of our restated certificate of incorporation and restated bylaws could delay or make more difficult transactions involving a change of control of our Company, and may have the effect of entrenching our current management or possibly depressing the market price of our common stock. For example, our restated certificate of incorporation and restated bylaws authorize blank series preferred stock, establish a staggered board of directors and impose certain procedural and other requirements for stockholder proposals. Furthermore, the fact that income taxes could be imposed as a result of ownership changes occurring in conjunction with a distribution may have the effect of delaying or making more difficult certain transactions involving a change of control of our Company.

Volatility of Stock Price

The price of our common stock may fluctuate widely, depending upon a number of factors, many of which are beyond our control. These factors include the perceived prospects of our business and the manufactured housing industry as a whole; differences between our actual financial and operating results and those expected by investors and analysts; changes in analysts' recommendations or projections; changes affecting the availability of financing in the wholesale and consumer lending markets; actions or announcements by competitors; changes in the regulatory environment in which we operate; and changes in general economic or market conditions. In addition, stock markets generally experience significant price and volume volatility from time to time which may adversely affect the market price of our common stock for reasons unrelated to our performance.

Deterioration in economic conditions in general and continued turmoil in the credit markets could reduce our earnings and financial condition

Deterioration in global economic conditions and continued turmoil in the credit markets could have a negative impact on our business. Among other things, unfavorable changes in employment levels, job growth, consumer confidence and income, and interest rates may further reduce demand for our products, which could negatively affect our business, results of operations, and financial condition. Unprecedented contraction in the credit markets and the financial services industry have occurred in recent years, characterized by the bankruptcy, failure or consolidation of various financial institutions and extraordinary intervention from the federal government. These factors could have an adverse affect on the availability of financing to our customers, causing our revenues to decline.

Our participation in certain wholesale financing programs for the purchase of our products by industry retailers may expose us to additional risk of credit loss, which could adversely impact the Company's liquidity and results of operations

We are exposed to risks associated with the creditworthiness of certain customers and business partners, including independent retailers, developers and inventory financing partners, many of whom may be adversely affected by the volatile conditions in the economy and financial markets. These conditions could result in financial instability or other

adverse effects at any of our customers or business partners. The consequences of such adverse effects could include delinquencies by retailers who purchase our product under special inventory financing initiatives and deterioration of collateral values. In addition, we may incur losses if our collateral cannot be recovered or liquidated at prices sufficient to recover recorded notes receivable balances. We expect to expand our participation in certain wholesale financing programs in connection with any general increase in wholesale order activity and the operation of Palm Harbor's manufacturing business subsequent to the Acquisition Date. The realization of any of these factors may adversely affect our cash flow, profitability and financial condition.

None.

ITEM 2. PROPERTIES

During fiscal year 2011, we owned or leased and operated ten manufacturing facilities in Phoenix and Goodyear, Arizona; Nampa, Idaho; Woodburn, Oregon; Riverside, California; Seguin and Waco, Texas; Lafayette, Tennessee; Douglas, Georgia; and Rocky Mount, Virginia, and idle factories located in Phoenix, Arizona; Woodland, California; and Waco, Texas. In an effort to further streamline our cost structure in this environment, during the first quarter of fiscal year 2010, the Company moved its park model and vacation cabin manufacturing operations from its Specialty plant in Phoenix, Arizona to a second production line at its Cavco West facility in Goodyear, Arizona, which is in the Phoenix area. The Company is evaluating its options with respect to the idle Specialty plant, including the potential sale or lease of the facility. During fiscal year 2011, the Company leased its Woodland, California facility and sold its idle, 68,000 square-foot Waco, Texas facility.

Except in the case of the Goodyear, Arizona plant, we own the land on which these facilities are located. We also own substantially all of the machinery and equipment used at these factories. We believe that these facilities are adequately maintained and suitable for the purposes for which they are used. We also own approximately 30 acres of land in Phoenix, Arizona, which is the intended site of a future manufacturing plant. The following table sets forth certain information with respect to our active legacy Cavco and Fleetwood Homes manufacturing locations:

Location	Date of Commencement of Operations	Owned / Leased	Square Feet
Phoenix, Arizona	1978	Owned	79,000
Goodyear, Arizona	1993	Leased (1)	250,000
Seguin, Texas	2006	Owned	129,000
Woodburn, Oregon	2009	Owned	221,000
Riverside, California	2009	Owned	107,000
Nampa, Idaho	2009	Owned	171,000
Waco, Texas	2009	Owned	132,000
Lafayette, Tennessee	2009	Owned	149,000
Douglas, Georgia	2009	Owned	142,000
Rocky Mount, Virginia	2009	Owned	137,000

(1) This lease expires in 2013.

Effective April 23, 2011, through the Palm Harbor transaction, we increased our geographic reach to fifteen operating factories including the following Palm Harbor operating manufacturing facilities:

Location	Owned / Leased	Square Feet
Austin, Texas	Owned	104,000
Fort Worth, Texas	Owned	121,000
Martinsville, Virginia	Owned	75,000
Millersburg, Oregon	Owned	169,000
Plant City, Florida	Owned	87,000

Table of Contents

The following table sets forth information with respect to our owned inactive manufacturing facilities:

Location	Square Feet
Casa Grande, Arizona	90,000
Phoenix, Arizona (Specialty)	94,000
Tempe, Arizona	104,000
Woodland, California	149,000
Plant City, Florida	94,000
Arabi, Georgia	98,000
Albemarle, North Carolina	113,000
Siler City, North Carolina	91,000
Austin, Texas	77,000
Buda, Texas	88,000
Martinsville, Virginia (3 facilities)	248,000

In addition to our production facilities, we own ten properties upon which seven of our active retail centers are located. The remaining active sales centers are leased under operating leases with lease terms generally ranging from monthly to four years. Our Company-owned retail centers generally range in size from one acre to nine acres. We also lease approximately 11,000 square feet of office space in Phoenix, Arizona for our corporate headquarters. Our corporate headquarters lease was renewed during the year and expires in 2012.

ITEM 3. LEGAL PROCEEDINGS

We are party to certain legal proceedings that arise in the ordinary course and are incidental to our business. Certain of the claims pending against us in these proceedings allege, among other things, breach of contract and warranty, product liability, construction defect and personal injury. Although litigation is inherently uncertain, based on past experience and the information currently available, our management does not believe that the currently pending and threatened litigation or claims will have a material adverse effect on the Company's consolidated financial position or results of operations. However, future events or circumstances, currently unknown to management will determine whether the resolution of pending or threatened litigation or claims will ultimately have a material effect on our consolidated financial position, liquidity or results of operations in any future reporting periods.

Table of Contents**SUPPLEMENTAL ITEM. EXECUTIVE OFFICERS OF THE REGISTRANT (See Item 10 of Part III of this Report)**

The following is an alphabetical listing of our executive officers as of June 1, 2011; as such term is defined under the rules and regulations of the Securities and Exchange Commission. Officers are generally elected by the Board of Directors at its meeting immediately following our annual stockholders meeting, with each officer serving until a successor has been elected and qualified. There is no family relationship between these officers.

Name	Age	Positions with Cavco or Business Experience
Joseph H. Stegmayer	60	Chairman of the Board, President and Chief Executive Officer since March 2001; Director of Fleetwood Homes, Inc. since August 2009; President of Centex Manufactured Housing Group, LLC from September 2000 to June 2003; President Retail Operations and Chief Financial Officer of Champion Enterprises, Inc. from January 1998 to September 2000; President, Vice Chairman and Chairman of the Executive Committee of Clayton Homes, Inc. from 1993 to January 1998
Daniel L. Urness	43	Vice President, Chief Financial Officer and Treasurer since January 2006; Director of Fleetwood Homes, Inc. since August 2009; Interim Chief Financial Officer of the Company from August 2005 to January 2006; Corporate Controller from May 2005 to August 2005; Financial Consultant from June 2002 to May 2005; Controller from May 1999 to June 2002; Manager and staff with Deloitte & Touche, LLP from September 1993 to May 1999
Charles E. Lott	63	President of Fleetwood Homes, Inc. since August 2009; President and Vice President Housing Group of Fleetwood Enterprises, Inc. from April 2005 to August 2009; Mr. Lott has worked for Fleetwood Enterprises and subsequently Fleetwood Homes for all but six years of his 40-year career in the manufactured housing industry.

Table of Contents**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

The Company's common stock is traded on the NASDAQ Global Select Market under the symbol "CVCO". The following table sets forth, for each of the periods indicated, the reported high and low sale prices per share on the NASDAQ for the Company's common stock.

	Sales Price	
	High	Low
Year ended March 31, 2011		
Fourth Quarter	\$ 49.04	\$ 37.50
Third Quarter	49.00	31.50
Second Quarter	37.46	31.53
First Quarter	43.41	33.48
Year ended March 31, 2010		
Fourth Quarter	\$ 40.30	\$ 32.78
Third Quarter	38.18	28.92
Second Quarter	37.83	25.54
First Quarter	26.73	22.11

As of May 16, 2011, the Company had 926 stockholders of record and approximately 3,421 beneficial holders of its common stock, based upon information in securities position listings by registered clearing agencies upon request of the Company's transfer agent.

We do not expect to pay any dividends on our common stock in the foreseeable future. The payment of dividends to our stockholders is subject to the discretion of our board of directors, and various factors may prevent us from paying dividends. Such factors include our cash requirements and liquidity and the requirements of state corporate and other laws.

Equity Compensation Plan Table

Information concerning equity compensation plans is included in Part III, Item 12, in this Annual Report.

Issuer Purchases of Equity Securities

In January 2008, we announced a stock repurchase program. A total of \$10 million may be used to repurchase our outstanding common stock. The repurchases may be made in the open market or in privately negotiated transactions in compliance with applicable state and federal securities laws and other legal requirements. The level of repurchase activity is subject to market conditions and other investment opportunities. The repurchase program does not obligate us to acquire any particular amount of common stock and may be suspended or discontinued at any time. The repurchase program will be funded using our available cash. No repurchases have been made under this program to date.

Table of Contents**Performance Graph**

The following graph compares the yearly change in the cumulative total stockholder return on Cavco common stock during the five fiscal years ended March 31, 2011 with the NASDAQ index composite and a peer group composed of companies with businesses in one or more of Cavco's primary lines of business: the production and sale of manufactured homes. The companies comprising the peer group are weighted by their respective market capitalization and include the following: Deer Valley Corp., Liberty Homes, Inc. (Class A Common Stock), Nobility Homes, Inc., and Skyline Corporation. The comparison assumes \$100 (with reinvestment of all dividends) was invested on March 31, 2006 in Cavco common stock and in each of the foregoing indices.

Depreciation continuing operations	\$ 1,304	\$ 1,170	\$ 817	\$ 785	\$ 692

The selected financial data set forth above includes the accounts of Cavco and its subsidiaries, CRG Holdings, LLC, and Fleetwood Homes, Inc. The results of the Fleetwood Homes operations have been included in the Consolidated Financial Statements and the related Notes since the Fleetwood Acquisition Date in accordance with the provisions of FASB ASC 810, *Consolidation* (ASC 810). Management has determined that, under generally accepted accounting principles, although Fleetwood Homes is only fifty-percent owned by the Company, Cavco has a controlling interest

and is required to fully consolidate the results of Fleetwood Homes. The primary factors that contributed to this determination were Cavco's board and management control of Fleetwood Homes. To that end, members of Cavco's management hold two out of three total seats on the board of directors of Fleetwood Homes. In addition, as part of a management services agreement among Cavco, Fleetwood Homes and Third Avenue, Cavco provides all executive-level management services to Fleetwood Homes including, among other things, general management oversight, marketing and customer relations, accounting and cash management. Third Avenue's financial interest in Fleetwood Homes is considered a redeemable noncontrolling interest, as determined by generally accepted accounting principles, and is designated as such in the selected financial data above and in the Consolidated Financial Statements. See Note 11 to the Consolidated Financial Statements for further information on the redeemable noncontrolling interest.

The selected financial data set forth above may not be indicative of our future performance.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Introduction

The following should be read in conjunction with the Company's Consolidated Financial Statements and the related Notes that appear in Part IV of this Report. References to "Note" or "Notes" refer to the Notes to the Company's Consolidated Financial Statements.

Overview

Headquartered in Phoenix, Arizona, the Company designs and produces factory-built homes, which are sold to a network of retailers located throughout the continental United States. The products we manufacture are sold under a variety of brand names. We are one of the largest producers of HUD code manufactured homes in the United States, based on reported wholesale shipments of both Cavco and Fleetwood Homes. The Company is also a leading producer of park model homes and vacation cabins in the United States.

Company Growth

The Company and an investment partner, Third Avenue, acquired certain manufactured housing assets and liabilities of Fleetwood Enterprises, Inc. on August 17, 2009 through their jointly owned corporation, Fleetwood Homes. Third Avenue Management is an investment advisor to Third Avenue Value Fund and is a principal stockholder of the Company, as described further in Notes 11 and 12.

Financial information for Fleetwood Homes is included in the Company's Consolidated Financial Statements and the related Notes that appear in Part IV of this report. Fleetwood Homes was formed by the Company and Third Avenue with each contributing \$35 million in exchange for equal ownership interests. Although the Company holds a fifty-percent financial interest in Fleetwood Homes, its results of operations are required to be fully consolidated. Third Avenue's financial interest in Fleetwood Homes is considered a redeemable noncontrolling interest, as determined by generally accepted accounting principles, and is designated as such in the Consolidated Financial Statements. See Note 1.

The Fleetwood Homes transaction included seven operating manufactured housing plants located in Nampa, Idaho; Woodburn, Oregon; Riverside, California; Waco, Texas; Lafayette, Tennessee; Douglas, Georgia; and Rocky Mount, Virginia, and two idle factories located in Woodland, California and Waco, Texas. Also, Fleetwood Homes purchased all related equipment, accounts receivable, inventory, certain trademarks and trade names, intellectual property, and specified contracts and leases and assumed express warranty liabilities pertaining to certain of the previous operations. The purchase price of the transaction was \$25.8 million and was paid in cash. Neither Fleetwood Homes nor the Company incurred debt in connection with the purchase or subsequent operations. During fiscal year 2011, the Company leased its Woodland, California facility and sold its idle, 68,000 square-foot Waco, Texas facility.

In addition to the seven factories listed above, during fiscal year 2011 the Company operated two homebuilding facilities located in the Phoenix, Arizona area and one factory in Seguin, Texas. The integration of the Cavco and Fleetwood Homes operations has progressed well. Operating styles and management philosophies have been merged and the business has begun to operate as a cohesive organization. We are in the process of expanding our product offerings throughout the combined organization via the sharing of product designs and production methods. The supportive response by our customer base to the acquisition has been encouraging. We believe we are in a position to realize some operating efficiency improvements as a result of our larger size and buying power. We believe that the acquisition will be a positive long-term strategic move for both the Cavco and Fleetwood Homes brands.

On November 29, 2010, Fleetwood Homes entered into an agreement with Palm Harbor Homes, Inc., a Florida corporation, and certain of its subsidiaries to provide DIP financing to Palm Harbor during the reorganization of Palm Harbor under chapter 11 of the U.S. Bankruptcy Code. Palm Harbor is a manufacturer and marketer of factory-built housing and a provider of related financing and insurance. In conjunction with Palm Harbor's filing, Fleetwood Homes committed up to \$55 million for a DIP credit facility. The credit facility was partially used by Palm Harbor to extinguish its Textron Financial Corporation debt facility and to fund post-petition operations, commitments to customers, and employee obligations. Fleetwood Homes held a first position lien on substantially all of Palm Harbor's assets. At March 31, 2011, the outstanding balance on the DIP credit facility was \$40.1 million.

Additionally, Fleetwood Homes, through its wholly-owned subsidiary, Palm Harbor Homes, Inc., a Delaware corporation, entered into an agreement with Palm Harbor to purchase substantially all of the assets, and assume specified liabilities of Palm Harbor, pursuant to an auction process under Section 363 of the U.S. Bankruptcy Code. On March 1, 2011, Acquisition Co. was selected as the successful bidder in the court auction. The transaction was approved and a sale order entered by the U.S. Bankruptcy Court on March 4, 2011.

Table of Contents

Subsequent to the Company's fiscal year end, Acquisition Co. completed the purchase of the Palm Harbor assets and the assumption of specified liabilities pursuant to the Amended and Restated Asset Purchase Agreement dated March 1, 2011. The effective date of the transaction was April 23, 2011. The aggregate gross purchase price was \$83.9 million and is exclusive of transaction costs, specified liabilities assumed, and post-closing adjustments. Of the purchase price, (i) approximately \$45.3 million was used to retire the debtor-in-possession loan previously made by Fleetwood Homes to Palm Harbor; and (ii) \$13.4 million was deposited in escrow pending regulatory approval to transfer the stock of Standard Casualty Co. to Acquisition Co., at which time the escrowed funds will be released to the Palm Harbor estate. The purchase price was funded by Fleetwood Homes' cash on hand, along with contributions of \$36 million each from the Company and Third Avenue (see Note 12).

As of the Acquisition Date, Acquisition Co. acquired five operating manufactured housing production facilities, idled factories in nine locations, 49 operating retail locations, one office building, real estate, all related equipment, accounts receivable, customer deposits, inventory, certain trademarks and trade names, intellectual property, and specified contracts and leases. In addition, Acquisition Co. purchased all of the outstanding shares of CountryPlace Acceptance Corp., CountryPlace Mortgage, Ltd. and their wholly-owned finance subsidiaries. Acquisition Co. also acquired all of the outstanding shares of Standard Insurance Agency, Inc. and its wholly-owned insurance agency subsidiary, subject, however to a claw-back agreement to return those shares to Palm Harbor if regulatory approval of the Standard Casualty Co. transfer cannot be obtained. Further, Acquisition Co. assumed certain liabilities of Palm Harbor, including primarily debt facilities of the finance subsidiaries and certain warranty obligations (see Note 10). Cash and cash equivalents of the Company totaled approximately \$76.5 million on March 31, 2011. Of that amount, approximately \$30.3 million was used to complete the purchase of Palm Harbor on April 23, 2011 and approximately \$19.4 million was used to retire a certain debt obligation of the Company's new subsidiary, CountryPlace, on May 10, 2011.

Industry and Company Outlook

The manufactured housing industry and the Company continue to operate at low production and shipment levels. According to data provided by MHI, during calendar year 2010 and 2009, our industry shipped approximately 50,000 HUD code manufactured homes annually, the lowest levels since shipment statistics began to be recorded in 1959. This followed approximately 82,000 homes shipped in calendar year 2008, which was the previous low. Yearly home shipments from 2003 to 2009 were less than the annual home shipments for each of the 40 years from 1963 to 2002. For the past 10- and 20-year periods, annual home shipments averaged 137,000 and 214,000, respectively. General economic challenges remain, including turmoil in the mortgage loan markets, unemployment, low consumer confidence levels, and overall housing sector weakness.

Several major obstacles are impeding annual home shipment volume; including a lack of mortgage financing. Consumer financing for the retail purchase of manufactured homes needs to become more available before marked emergence from current lows can occur. Restrictive underwriting guidelines, irregular appraisal processes, higher interest rates compared to site-built homes, regulatory burdens, reductions in the number of institutions lending to manufactured home buyers and limited secondary market availability for manufactured home loans are significant restraints to industry growth. We are working directly and through industry trade associations to encourage favorable legislative and government-sponsored enterprise action to address the mortgage financing needs of potential buyers of affordable homes. Although only limited progress has been made in this area, a meaningful positive impact in the form of increased home orders at our factories has yet to be realized. See Regulatory Developments on page 25. In addition, sales of our homes have been negatively affected by high unemployment rates and underemployment. Combined with weak consumer confidence in the U.S. economy, the environment is not conducive for potential customers to commit to a home purchase. General economic challenges need to diminish in order to spur annual industry and Company shipment levels.

Competition from excess site-built home inventory is an issue that is also of concern. Surplus homes creating the oversupply have various sources. Lender inventories of repossessed site-built homes are significant and liquidation selling prices are often lower than the current cost to build a similar home. Many on-site home builders with high inventory levels are offering sizable incentives to homebuyers in order to be competitive with lender foreclosure pricing in their sales areas. The resultant price points are low enough in many cases to truly compete with

manufactured housing. Lower home prices and slow sales activity have also had an adverse impact on the contingency contract process, wherein potential manufactured home buyers must sell their existing home in order to facilitate the purchase of a new factory built home.

The Company has operated with low backlogs throughout fiscal years 2011 and 2010, but improved modestly by year end. The backlog of sales orders at March 31, 2011 varied among our ten factories, but in total was \$5.9 million, or approximately two weeks of current production levels.

Table of Contents

Inventory financing for the industry's retail distribution chain continues to be in short supply. Faced with illiquid capital markets in late calendar year 2008, each of the manufactured housing sector's remaining inventory finance lenders initiated significant changes, including one company's announcement to cease lending activities in this industry entirely. The involvement of others is subject to more restrictive terms that continue to evolve. As most retailers require financing to maintain inventories of the homes, the Company partnered with several lenders to provide this type of inventory financing. In connection with certain of these participation inventory finance programs, the Company provides a significant amount of the funds that independent financiers lend to distributors to finance retail inventories of our products. In addition, the Company has entered into direct inventory finance arrangements with distributors of our products wherein the Company provides all of the inventory finance funds (see Note 3). The Company's participation in inventory finance has increased the availability of manufactured home inventory financing to distributors of our products. We believe that our expanding involvement in the wholesale financing of inventory is quite helpful to distributors and allows our homes continued exposure to potential homebuyers. These initiatives support the Company's ongoing efforts to expand our distribution base in all of our markets with existing and new customers.

Although times remain difficult, we are optimistic about our long-term prospects and we believe that we are located in attractive geographic markets. The April 2011 purchase of the Palm Harbor assets provides further geographic expansion, increased home distribution, and entry into financial and insurance businesses specific to our industry. We are the nation's second largest builder of manufactured homes and the largest provider of park models and cabins. With the acquisition of Palm Harbor, we now operate fifteen manufacturing facilities nationwide, which build four of the most prominent brand names in the industry: *Cavco Homes*, *Fleetwood Homes*, *Palm Harbor Homes*, and *Nationwide Homes*.

The two largest manufactured housing consumer demographics, young adults and those who are 55+ years old, are both growing. Household formation is estimated to increase as the young adult population rises with the growth in the 25 to 34-year-old age bracket, known as the echo boom generation. This generation is attracted by the affordability, diversity of style choices and flexibility as to the location of their home. The age 55 and older category is reported to be the fastest growing segment of the U.S. population. This group is similarly interested in the value proposition; however, they are also motivated by the low maintenance requirements of factory built homes, and by the lifestyle of many age-restricted planned communities that are specifically designed for manufactured homes.

The national rental vacancy rate was recently reported to have declined to 9.4% in the final calendar quarter of 2010, from 10.3% in the same prior year quarter. Rental housing competes directly with many of our product offerings, and reductions in rental availability may have the effect of shifting interested buyers to other housing alternatives including manufactured homes.

With manufacturing centers strategically positioned across the nation, we utilize local market research to design homes to meet the demands of our customers. We have the ability to react and modify floor plans and designs to consumers' specific needs. By offering a full range of homes from entry level models to large custom homes and with the ability to engineer designs in-house, we can accommodate virtually any customer request. We also build modular homes, park models and cabins, and light commercial buildings at many of our manufacturing facilities.

Company-wide, we have intensified our efforts to identify niche market opportunities where our diverse product lines and custom building capabilities provide our company with a competitive advantage. Green construction processes and environmentally-friendly building materials have long been a part of our home-building process and their popularity is expected to grow. We have a wide array of building materials that, combined with our building process, give us a Green Advantage over other home builders. Many of the homes we build meet Energy Star standards. Building Green also significantly reduces greenhouse gas emissions without sacrificing features, style or comfort. From bamboo flooring and tankless water heaters to solar-powered homes, our products are diverse and tailored to a wide range of consumer interests. Innovation in housing design is a forte of the Company and we continue to introduce new models at competitive price points with expressive interiors and exteriors that complement home styles in the areas in which they are located.

We maintain a conservative cost structure, which enables us to build added value into our homes. We have placed a consistent focus on developing synergies among all operations. In addition, the Company has worked diligently to

maintain a solid financial position. Our balance sheet strength and position in cash and cash equivalents should help us to avoid the liquidity problems faced by many other companies and enable us to act effectively as market opportunities present themselves.

We were recently named the 2011 Manufacturer of the Year by MHI, the factory-built home industry's national trade organization, for the second consecutive year. In addition, both Cavco and Palm Harbor received several design awards from MHI. These honors are a reflection of our valued employees, customers and vendors and we appreciate the recognition.

Table of Contents**Regulatory Developments**

The American Housing Rescue and Foreclosure Prevention Act was enacted in 2008 to provide assistance by way of legislation for the housing industry, including the manufactured housing industry. Among other things, the act provides for increased loan limits for chattel (home-only) loans to \$69,678, up 43% from the previous limit of \$48,600 set in 1992. New Federal Housing Administration (FHA) Title I program guidelines became effective on June 1, 2010. On June 10, 2010, the Government National Mortgage Association (Ginnie Mae) began accepting applications by lenders for participation as issuers of mortgage backed securities backed by Title I loans originated under the new program. Ginnie Mae released related pooling guidelines in November 2010. The issuance of these guidelines provides Ginnie Mae the ability to securitize manufactured home FHA Title I loans. Chattel loans have languished in recent years and these changes are meant to provide a new source of lending capital to the industry, which can then be used to fund new loans for our customers. However, a meaningful positive impact from these changes in the form of increased home orders at our factories has yet to be realized.

Results of Operations

(Dollars in thousands, except average sales price amounts)

The following table summarizes certain financial and operating data for fiscal years 2011, 2010 and 2009.

	Year Ended March 31,		
	2011	2010	2009
Statement of Operations Data:			
Net sales			
Manufacturing	\$ 166,915	\$ 112,345	\$ 101,373
Retail	10,247	8,218	8,807
Less: Intercompany	(5,335)	(4,951)	(4,818)
Total net sales	171,827	115,612	105,362
Cost of sales	147,549	104,915	94,591
Gross profit	24,278	10,697	10,771
Selling, general and administrative expenses	21,345	16,718	11,213
Income (loss) from operations	2,933	(6,021)	(442)
Interest income	2,028	222	764
Income (loss) from continuing operations before income taxes	4,961	(5,799)	322
Income tax (expense) benefit	(889)	2,006	136
Net income (loss)	4,072	(3,793)	458
Less: net income (loss) attributable to noncontrolling interest	1,241	(422)	
Net income (loss) attributable to Cavco common stockholders	\$ 2,831	\$ (3,371)	\$ 458
Other Data:			
Floors sold manufacturing	7,308	4,880	3,917
Homes sold manufacturing	4,771	3,255	2,603
Homes sold retail	123	114	117

Capital expenditures	\$	959	\$	391	\$	986
Depreciation	\$	1,304	\$	1,170	\$	817

Fiscal Year 2011 Compared to Fiscal Year 2010

Net Sales. Total net sales increased 48.6% to \$171,827 in fiscal year 2011 from \$115,612 in fiscal year 2010.

Manufacturing net sales were higher by 48.6% to \$166,915 in fiscal year 2011 from \$112,345 in fiscal year 2010. The fiscal year 2011 results include the Fleetwood Homes operations, which were acquired on August 17, 2009, and from that date forward were included in the results of fiscal year 2010. The increase in net sales was also driven by an increase in the average sales price per home, up \$470 to \$34,985 in fiscal year 2011 from \$34,515 last year. Total homes sold during fiscal year 2011 increased 46.6% to 4,771 versus 3,255 last year.

Retail net sales increased by \$2,029 or 24.7% to \$10,247 for fiscal year 2011 from \$8,218 last year. This increase in retail sales was the result of a 7.9% increase in the overall number of homes sold through Company-owned retail locations.

Table of Contents

Gross Profit. Gross profit increased to \$24,278, which was 14.1% of net sales for fiscal year 2011 compared to \$10,697 or 9.3% of net sales last year. The gross profit was a result of our operations people effectively managing costs to help improve gross profit as a percentage of net sales. Current year margins were also positively affected by the timing of revenue recognition for certain production completed in the prior year but revenue was deferred because of the Company's participation in the financing of that product. While improved, gross profit continues to be adversely impacted by pricing competition, a product mix favoring smaller-size homes with fewer amenities, and reduced production efficiencies inherent with low capacity utilization.

Selling, General and Administrative Expenses. Selling, general and administrative expenses increased by 27.7% or \$4,627 to \$21,345 or 12.4% of net sales for fiscal year 2011 versus \$16,718 or 14.5% of net sales last year. The current period amount includes \$272 in acquisition-related costs for the purchase of the Palm Harbor assets as discussed in Note 10. The prior year amount includes acquisition-related costs of \$772 pertaining to the purchase of the Fleetwood Homes assets. The increase during fiscal 2011 relates primarily to additional expenses due to the increased size of the consolidated Company after the purchase of the Fleetwood Homes assets and increased incentive compensation resulting from the impact of improved earnings. The decrease in selling, general and administrative expenses as a percentage of net sales resulted from higher sales volume. We anticipate additional acquisition-related costs in fiscal year 2012 for the purchase of the Palm Harbor assets.

Interest Income. Interest income represents income earned on inventory finance notes receivable, debtor-in-possession note receivable and unrestricted cash and cash equivalents held at various times throughout the year. Our interest income increased 814% to \$2,028 for fiscal year 2011 as compared to \$222 last year. The increase resulted mainly from \$996 of interest income earned on the debtor-in-possession note receivable and portfolio growth of inventory finance notes receivable.

Income Taxes. The effective income tax rate was approximately 18% for fiscal year 2011 (see Note 7) and 35% for fiscal year 2010. Cavco recognized an income tax benefit of \$950 resulting from a decrease in Arizona statutory income tax rates, enacted during the fourth quarter of fiscal year 2011. Excluding this adjustment, income tax expense would have been \$1,839 with an effective annual tax rate of 37%. The income tax benefit recognized during fiscal year 2010 is the result of current period losses and the Company's belief that it will be able to fully realize the benefits associated with its deferred tax assets.

Noncontrolling Interest. Net income attributable to the noncontrolling interest in Fleetwood Homes held by Third Avenue was \$1,241 for fiscal year 2011, representing fifty percent of the income attributable the subsidiary for the year ended March 31, 2011.

Fiscal Year 2010 Compared to Fiscal Year 2009

Net Sales. Total net sales increased 9.7% to \$115,612 in fiscal year 2010 from \$105,362 in fiscal year 2009. Manufacturing net sales were higher by 10.8% to \$112,345 in fiscal year 2010 from \$101,373 in fiscal year 2009. The fiscal year 2010 results included the Fleetwood Homes operations, which were acquired during the second quarter of fiscal year 2010. The increase in net sales was also attributable to an increased number of homes sold, the result of additional Fleetwood Homes orders and operations. Total homes sold during fiscal year 2010 increased 25.0% to 3,255 versus 2,603 during fiscal year 2009. The increase in net sales was partially offset by an 11.4% decrease in the average sales price per home, down \$4,430 to \$34,515 in fiscal year 2010 from \$38,945 in fiscal year 2009. Retail net sales decreased by \$589 or 6.7% to \$8,218 for fiscal year 2010 from \$8,807 for the prior year. This decrease in retail sales was the result of lower average selling prices and a 2.6% decrease in the overall number of homes sold through Company-owned retail locations.

Gross Profit. Gross profit decreased to \$10,697, which was 9.3% of net sales for fiscal year 2010 compared to \$10,771 or 10.2% of net sales for fiscal year 2009. The gross profit was negatively affected by lower margins typically associated with lower average selling prices. The downward movement in the average wholesale selling price is primarily from generally depressed market conditions. The gross profit was also adversely affected by reduced production efficiencies inherent with low capacity utilization.

Selling, General and Administrative Expenses. Selling, general and administrative expenses increased by 49.1% or \$5,505 to \$16,718 or 14.5% of net sales for fiscal year 2010 versus \$11,213 or 10.6% of net sales for fiscal year 2009. The increase related primarily to \$772 in acquisition-related costs for the purchase of the Fleetwood Homes assets and

additional expenses because of the increased size of the consolidated Company.

Interest Income. Interest income represented income earned on unrestricted cash and cash equivalents and short-term investments held at various times throughout the prior year as well as inventory finance receivables. Our interest income decreased 70.9% to \$222 for fiscal year 2010 as compared to \$764 for fiscal year 2009. The decrease resulted from the effect of lower interest rates earned on our investments in U.S. Treasury money market funds and short-term bank certificates of deposit, offset in part by interest income earned on inventory finance receivables.

Table of Contents

Income Taxes. The income tax benefit recognized during fiscal year 2010 was the result of losses and the Company's belief that it will be able to fully realize the benefits associated with its deferred tax assets. The effective income tax rate was approximately 35% for fiscal year 2010. The income tax benefit recognized during fiscal year 2009 was the result of two discrete items during the year: (i) a change in the estimated blended rate to be applied to our deferred tax assets and liabilities, and (ii) a calculated true-up to our fiscal year 2008 tax return filed on December 12, 2008.

Noncontrolling Interest. Net loss attributable to the noncontrolling interest in Fleetwood Homes held by Third Avenue was \$422 for fiscal year 2010, representing fifty percent of the losses incurred by the new subsidiary for the period since the Fleetwood Acquisition Date through March 31, 2010.

Liquidity and Capital Resources**(Dollars in thousands)**

We believe that cash and cash equivalents on hand at March 31, 2011, together with cash flow from operations, will be sufficient to fund our operations for the next twelve months and into the foreseeable future, even after giving effect to our funding of the remaining cash transferred for the Palm Harbor transaction (\$30,342) and the retirement of certain CountryPlace debt (\$19,443). See Note 10. Because of the Company's cash position, the Company has not sought, nor does it have access to, external sources of liquidity, other than the contribution of \$36,000 from Third Avenue to fund the Palm Harbor transaction (see Note 12). Depending on our operating results and strategic opportunities, we may need to seek additional or alternative sources of financing such as a credit facility. There can be no assurance that such financing would be available on satisfactory terms, if at all. If this financing were not available, it could be necessary for us to reevaluate our long-term operating plans to make more efficient use of our existing capital resources. The exact nature of any changes to our plans that would be considered depends on various factors, such as conditions in the factory-built housing industry and general economic conditions outside of our control.

Projected cash to be provided or used by manufacturing operations in the coming year is largely dependent on sales volume. Our manufactured homes are sold mainly through company-owned stores and independent retailers who have historically relied on third-party lenders to provide floor plan financing for homes purchased. In addition, third-party lenders generally provide consumer financing for manufactured home purchases. Our sales depend in large part on the availability and cost of financing for manufactured home purchasers and independent retailers. The availability and cost of such financing is further dependent on the number of financial institutions participating in the industry, the departure of financial institutions from the industry, the financial institutions' lending practices, the strength of the credit markets generally, governmental policies and other conditions, all of which are beyond our control.

As a result of the current credit crisis, during the last half of 2008, each of the remaining national floor plan lenders substantially curtailed their lending activities, and Textron Financial Corporation announced its intention to exit the business. Another floor plan lender, 21st Mortgage Corporation, citing unreliable and inadequate sources of funding, announced in January 2009 that it was significantly curtailing its retail lending program. Remaining retail lenders such as Triad, U.S. Bank, and CU Factory Built Lending have tightened their loan underwriting standards. The reduction in available financing has had an adverse effect on the manufactured housing industry and has negatively impacted the ability of our retailers to obtain financing for home purchases. To further support floor plan availability for our retailers, Cavco has begun to provide some of the capital used by inventory lenders to finance wholesale home purchases by retailers (see Note 3). States may classify manufactured homes for both legal and tax purposes as personal property rather than real estate. As a result, financing for the purchase of manufactured homes is thereby characterized by shorter loan maturities and higher interest rates. Unfavorable changes in these factors and the current adverse trend in the availability and terms of financing in the industry may have a material adverse effect on our results of operations and financial condition.

Operating activities provided \$3,141 of cash during fiscal year 2011 compared to the use of \$9,551 of cash during fiscal year 2010. Cash provided by operating activities for the current fiscal year was primarily derived from operating income before non-cash charges, a decrease in other current assets from a federal income tax refund of \$3,979 and collections of trade receivables, offset in part by cash used for inventory finance initiatives and payments of trade payables. Cash used in operating activities in the prior year primarily funded operating losses before non-cash charges, inventory financing initiatives and an increase in prepaid expenses and other current assets, partially offset by increased accounts payable and accrued liabilities.

Investing activities required the use of \$39,007 of cash during fiscal year 2011 compared to the use of \$21,713 during fiscal year 2010. In fiscal year 2011, cash used by investing activities was primarily for funds provided to Palm Harbor Homes, Inc. under the debtor-in-possession credit facility, as discussed in Note 9, and capital expenditures in all of our operations, partially offset by proceeds from the sale of an idle production facility in Waco, Texas. For fiscal year 2010, cash used by investing activities was comprised primarily of \$25,799 for the acquisition of the Fleetwood Homes assets, offset in part by net proceeds of \$4,464 from sales of short-term investments in bank certificates of deposit.

Table of Contents

Financing activities provided \$37,391 in cash during the fiscal year 2011, consisting of \$36,000 from the issuance of convertible notes payable to Third Avenue, which holds the redeemable noncontrolling interest in Fleetwood Homes (see Note 11), and \$1,391 from the issuance of common stock under our stock incentive plans. The \$36,000 convertible note payable was subsequently converted to noncontrolling interest in Fleetwood Homes in conjunction with the purchase of Palm Harbor on April 23, 2011. Financing activities provided \$35,695 in cash during fiscal year 2010, resulting from proceeds of the issuance of Fleetwood Homes, Inc. stock to Third Avenue for \$35,000 with the remaining amount from the issuance of common stock and related incremental tax benefits upon exercise of stock options under our stock incentive plans.

Contractual Obligations and Commitments

The following table summarizes our contractual obligations at March 31, 2011, consisting of future payments under non-cancelable operating lease agreements and convertible note payable to Third Avenue. Concurrent with the successful completion of the acquisition of Palm Harbor Homes, all outstanding convertible notes were converted to shares of Fleetwood Homes, Inc. on April 23, 2011. For additional information related to these obligations, see Notes 5 and 12, respectively, to the Consolidated Financial Statements. This table excludes long-term obligations for which there is no definite commitment period.

	Total	Payments Due by Period			
		Less than 1 year	1 - 3 Years	4 - 5 Years	After 5 Years
(In thousands)					
Commitments for future payments under noncancelable operating leases	\$ 1,336	\$ 666	\$ 669	\$ 1	\$
Convertible debt obligation: Noncontrolling interest note payable	\$ 36,000	\$ 36,000			

The following table summarizes our contingent commitments at March 31, 2011, consisting of contingent repurchase obligations. For additional information related to these contingent obligations, see Notes 5 and 6 to the Consolidated Financial Statements and **Critical Accounting Policies** below.

	Total	Contingent Payments Due by Period			
		Less than 1 year	1 - 3 Years	4 - 5 Years	After 5 Years
(In thousands)					
Repurchase obligations (1)	\$ 11,136	\$ 9,820	\$ 1,316	\$	\$

(1) For a complete description of the contingent repurchase obligation, see **Critical Accounting Policies** Reserve for Repurchase Commitments below. Although the commitments outstanding at March 31, 2011 have a finite life, these commitments are continually replaced as we continue to sell manufactured homes to retailers under repurchase and other recourse agreements with lending institutions which have provided wholesale floor plan financing to retailers.

Critical Accounting Policies

Our discussion and analysis of our financial condition and results of operations are based upon our Consolidated Financial Statements, which have been prepared in accordance with U.S. generally accepted accounting principles. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. Management bases its estimates and judgments on historical experience and on various other factors that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these

estimates under different assumptions or conditions.

Management believes the following critical accounting policies, among others, affect its more significant judgments and estimates used in the preparation of its Consolidated Financial Statements.

Warranties. We provide the retail home buyer a one-year limited warranty covering defects in material or workmanship in home structure, plumbing and electrical systems. We record a liability for estimated future warranty costs relating to homes sold, based upon our assessment of historical experience factors. Factors we use in the estimation of the warranty liability include the estimated amount of homes still under warranty including homes in retailer inventories, homes purchased by consumers still within the twelve-month warranty period, the timing in which work orders are completed, and the historical average costs incurred to service a home. Based on the terms of the associated purchase agreement between the Company's subsidiary, Fleetwood Homes, and Fleetwood Enterprises, Inc., the Company is only obligated to provide warranty coverage for certain homes produced by select factories and sold by FEI. Fleetwood Homes did not assume any warranty liabilities for homes in which the warranty period expired prior to August 17, 2009. We have a reserve for estimated warranties of \$9.4 million and \$13.9 million at March 31, 2011 and 2010, respectively. Although we maintain reserves for such claims, based on our assessments as described above, which to date have been adequate, there can be no assurance that warranty expense levels will remain at current levels or that such reserves will continue to be adequate. A large number of warranty claims exceeding our current warranty expense levels could have a material adverse effect on our results of operations.

Table of Contents

Reserve for Repurchase Commitments. Manufactured housing companies customarily enter into repurchase and other recourse agreements with lending institutions which have provided wholesale floor plan financing to retailers. A significant portion of our sales are made to retailers pursuant to repurchase agreements with lending institutions. These agreements generally provide that we will repurchase our new products from the lending institutions in the event such product is repossessed upon a retailer's default. The risk of loss under repurchase agreements is lessened by certain factors, including the following:

- sales of our manufactured homes are spread over a relatively large number of independent retailers;
- the price that we are obligated to pay under such repurchase agreements declines based on predetermined amounts over the period of the agreement (generally 18 to 36 months); and
- we have historically been able to resell homes repurchased from lenders.

The Company applies FASB ASC 460, *Guarantees* (ASC 460) and FASB ASC 450-20, *Loss Contingencies* (ASC 450-20), to account for its liability for repurchase commitments. Under the provisions of ASC 460, issuance of a guarantee results in two different types of obligations: (1) a non-contingent obligation to stand ready to perform under the repurchase commitment (accounted for pursuant to ASC 460) and (2) a contingent obligation to make future payments under the conditions of the repurchase commitment (accounted for pursuant to ASC 450-20). Management reviews retailers' inventories to estimate the amount of inventory subject to repurchase obligation which is used to calculate (1) the fair value of the non-contingent obligation for repurchase commitments and (2) the contingent liability based on historical information available at the time. During the period in which a home is sold (inception of a repurchase commitment), the Company records the greater of these two calculations as a liability for repurchase commitments and as a reduction to sales.

(1) The Company estimates the fair value of the non-contingent portion of its manufacturer's inventory repurchase commitment under the provisions of ASC 460 when a home is shipped to retailers whose floor plan financing includes a repurchase commitment. The fair value of the inventory repurchase agreement is determined by calculating the net present value of the difference in (a) the interest cost to carry the inventory over the maximum repurchase liability period at the prevailing floor plan note interest rate and (b) the interest cost to carry the inventory over the maximum repurchase liability period at the interest rate of a similar type loan without a manufacturer's repurchase agreement in force.

(2) The Company estimates the contingent obligation to make future payments under its manufacturer's inventory repurchase commitment for the same pool of commitments as used in the fair value calculation above and records the greater of the two calculations. This contingent obligation is estimated using historical loss factors, including the frequency of repurchases and the losses experienced by the Company for repurchased inventory.

Additionally, subsequent to the inception of the repurchase commitment, the Company evaluates the likelihood that it will be called on to perform under the inventory repurchase commitments. If it becomes probable that a retailer will default and an ASC450-20 loss reserve should be recorded, then such contingent liability is recorded equal to the estimated loss on repurchase. Based on identified changes in retailers' financial conditions, the Company evaluates the probability of default for retailers who are identified at an elevated risk of default and applies a probability of default, based on historical default rates. Commensurate with this default probability evaluation, the Company reviews repurchase notifications received from floor plan sources and reviews retailer inventory for expected repurchase notifications based on various communications from the lenders and the retailers as well as for retailers who, the Company believes, are experiencing financial difficulty. The Company's repurchase commitments for the retailers in the category of elevated risk of default are excluded from the pool of commitments used in both of the calculations at (1) and (2) above. Changes in the reserve are recorded as an adjustment to sales.

The maximum amount for which the Company was contingently liable under such agreements approximated \$11.1 million and \$12.7 million at March 31, 2011 and 2010, respectively, without reduction for the resale value of the homes. The Company had a reserve for repurchase commitments of \$597,000 and \$760,000 at March 31, 2011 and 2010, respectively. The Company made payments under repurchase commitments of \$26,000 and \$45,000 during fiscal years 2011 and 2010, respectively.

Retailer Volume Rebates. The Company's manufacturing operations sponsor volume rebate programs under which certain sales to retailers and builder/developers can qualify for cash rebates generally based on the level of sales

attained during a twelve-month period. Volume rebates are accrued at the time of sale and are recorded as a reduction of net sales.

Table of Contents

Impairment of Long-Lived Assets. The Company periodically evaluates the carrying value of long-lived assets to be held and used and when events and circumstances warrant such a review. The carrying value of long-lived assets is considered impaired when the anticipated undiscounted cash flow from such assets is less than its carrying value. In that event, a loss is recognized based on the amount by which the carrying value exceeds the fair market value of the long-lived assets. Fair market value is determined primarily using the anticipated cash flows discounted at a rate commensurate with the risk involved. Losses on long-lived assets to be disposed of are determined in a similar manner, except that the fair market values are based primarily on independent appraisals and preliminary or definitive contractual arrangements less costs to dispose. The Company recognized impairment losses on long-lived assets of \$327,000 and \$288,000 during fiscal years 2011 and 2010, respectively.

Income Taxes and Deferred Tax Assets and Liabilities. Deferred tax assets and liabilities are determined based on temporary differences between the financial statement amounts and the tax bases of assets and liabilities using enacted tax rates in effect in the years in which the differences are expected to reverse. The Company periodically evaluates the deferred tax assets based on the requirements established in FASB ASC 740, *Income Taxes*, which requires the recording of a valuation allowance when it is more likely than not that some portion or all of the deferred tax assets will not be realized. The determination of the need for or amount of any valuation allowance involves significant management judgment and is based upon the evaluation of both positive and negative evidence, including estimates of anticipated taxable profits in various jurisdictions with which the deferred tax assets are associated. At March 31, 2011, the Company evaluated forecasted taxable profits and determined that all of the deferred tax assets would be utilized in future periods. Ultimate realization of the deferred tax assets depends on our ability to meet these forecasts in future periods. Changes in events or expectations could result in significant adjustments, which could include the recording of a valuation allowance and material changes to the provision for income taxes.

Goodwill and Other Intangibles. We test goodwill annually for impairment by reporting unit and record an impairment charge if the implied fair value of a reporting unit, including goodwill, is less than its carrying value. We generally utilize either quoted market values or a discounted cash flow methodology to test for impairment of goodwill. The results of discounted cash flow methodology depend upon a number of estimates and assumptions relating to cash flows, discount rates and other matters. Accordingly, such testing is subject to certain uncertainties, which could cause the fair value of goodwill to fluctuate from period to period. We test other intangibles for impairment annually and when indicators of impairment exist.

As of March 31, 2011, all of our goodwill is attributable to our manufacturing reporting unit. We performed our annual goodwill impairment analysis as of March 31, 2011. The first step under FASB ASC 350, *Intangibles Goodwill and Other (ASC 350)* is to compare the fair value of the reporting unit to the carrying value of the reporting unit. If the fair value is less than the carrying value, the second step must be completed, comparing the fair value of goodwill to the carrying value of goodwill. In assessing the fair value of the manufacturing reporting unit, the Company considered the income approach. Based on this analysis, the fair value of the reporting unit, including goodwill, was deemed to be substantially greater than its carrying value. As such, there was no need to continue to the second step under ASC 350 and test the goodwill individually.

In the event that we are not able to achieve expected cash flow levels, or other factors indicate that goodwill is impaired, we may need to write off all or part of our goodwill, which would adversely affect our operating results and net worth. See Item 1A, *Risk Factors*.

Redeemable Noncontrolling Interest. During fiscal year 2010, the Company and an investment partner, Third Avenue formed Fleetwood Homes, Inc., with a contribution of \$35 million each for equal fifty-percent ownership interests. The results of the Fleetwood Homes operations have been included in the Consolidated Financial Statements and the related Notes since the Fleetwood Acquisition Date in accordance with the provisions of ASC 810. Management has determined that, under generally accepted accounting principles, although Fleetwood Homes is only fifty-percent owned by the Company, Cavco has a controlling interest and is required to fully consolidate the results of Fleetwood Homes. The primary factors that contributed to this determination were Cavco's board and management control of Fleetwood Homes. To that end, members of Cavco's management hold two out of three total seats on the board of directors of Fleetwood Homes. In addition, as part of a management services agreement among Cavco, Fleetwood Homes and Third Avenue, Cavco provides all executive-level management services to Fleetwood Homes including,

among other things, general management oversight, marketing and customer relations, accounting and cash management. See Note 1. Third Avenue's financial interest in Fleetwood Homes is considered a redeemable noncontrolling interest (see Note 11).

After the fifth anniversary of the Fleetwood Acquisition Date, (i.e. after August 17, 2014), or at any time after Fleetwood Homes has earned net income of at least \$10 million in each of its two most recently completed consecutive fiscal years, Third Avenue has the right (Put Right) to require Cavco to purchase all of Third Avenue's shares of Fleetwood Homes common stock for an amount based upon a calculation that is designed to approximate fair value. Likewise, Cavco has the right (Call Right) to require Third Avenue to sell all of its shares of Fleetwood Homes common stock based on the same timing and calculation as described above for the Put Right (see Note 11). The conditions for the Put Right or Call Right to become exercisable have not been met as of March 31, 2011. The purchase price to be payable by Cavco for the purchase of Third Avenue's shares pursuant to the exercise of the Put Right or the Call Right may be settled in cash or shares of common stock of Cavco. However, the circumstances under which net share settlement would be allowed are not solely within the control of Cavco (see Note 11). There is no explicit cap on the maximum number of common shares that could be potentially issuable upon redemption; therefore, GAAP requires that Third Avenue's noncontrolling interest in Fleetwood Homes be classified as a temporary equity mezzanine item between liabilities and stockholders' equity.

Table of Contents**Other Matters**

Related Party Transactions. On July 15, 2009, the Company and Third Avenue formed Fleetwood Homes, with an equity contribution of \$35 million each for equal fifty-percent ownership interests. See Redeemable Noncontrolling Interest under Critical Accounting Policies above. On July 21, 2009, Fleetwood Homes entered into an Asset Purchase Agreement with FEI and certain of its subsidiaries to purchase certain assets and liabilities of its manufactured housing business. On the Acquisition Date, Fleetwood Homes acquired seven operating manufactured housing plants and two idle factories. FH also purchased all related equipment, accounts receivable, inventory, certain trademarks and trade names, intellectual property, and specified contracts and leases; and assumed express warranty liabilities pertaining to certain of the previous operations. The purchase price of the transaction was \$25.8 million and was paid in cash.

On December 1, 2010, the Company and Third Avenue entered into separate convertible note payable agreements with their subsidiary, Fleetwood Homes, for \$14 million each, convertible to 200 shares of Fleetwood Homes, Inc. common stock at the successful close of the contemplated Palm Harbor transaction. The convertible notes were subsequently increased by \$22 million each, convertible to an additional 314.28 shares, for a total of \$36 million per note, convertible to 514.28 shares in the fourth quarter of 2011. The convertible notes bore interest of 2.5% per annum. As of March 31, 2011, the balance of accrued interest payable to Third Avenue was \$119,000. The \$36 million note payable by Fleetwood Homes to Cavco and related accrued interest was eliminated upon consolidation. The note payable to Third Avenue appears on the Consolidated Balance Sheets as Noncontrolling interest note payable. Subsequent to March 31, 2011, concurrent with the successful completion of the acquisition of Palm Harbor Homes, all outstanding convertible notes were converted to shares of Fleetwood Homes, Inc. on April 23, 2011. Any right to interest income was forfeited by the note holders upon conversion.

Third Avenue Management LLC beneficially owned approximately 12.2% of our outstanding common shares and thus meets the definition of a principal owner under FASB ASC 850, *Related Party Disclosures*. Third Avenue Management LLC and Third Avenue Value Fund are either directly or indirectly under common control.

Impact of Inflation. We believe that the general inflation rate over the past several years has not had a significant impact on our sales or profitability, but we can give no assurance that this trend will continue in the future. However, sudden increases in specific costs, such as the increases in material costs we have experienced since early 2004, as well as price competition, can affect our ability to increase our selling prices and adversely impact our results of operations. Therefore, we can give no assurance that inflation or the impact of rising material costs will not have a significant impact on our sales or results of operations in the future.

Impact of Accounting Standards. In July 2010, the Financial Accounting Standards Board issued ASU 2010-20, *Receivables (Topic 310): Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses*, which requires entities to provide new disclosures in their financial statements about their financing receivables, including credit risk exposures and the allowance for credit losses on a disaggregated basis. The ASU is effective for public entities for reporting periods ending on or after December 15, 2010 for disclosures of financing receivables as of the end of a reporting period. The disclosures related to activity that occurs during a reporting period are required to be adopted for periods beginning on or after December 15, 2010. In April 2011, the FASB issued ASU 2011-02, *A Creditor's Determination of Whether a Restructuring Is a Troubled Debt Restructuring*. ASU 2011-02 clarifies when creditors should classify loan modifications as troubled debt restructurings. In addition, ASU 2011-02 deferred the effective date of the disclosures about troubled debt restructurings in ASU 2010-20 to periods beginning after June 15, 2011. The Company adopted the provisions of ASU 2010-20 relating to period-end disclosures as of December 31, 2010, and the remaining provisions during the quarter ended March 31, 2011 (see Note 3), except for the disclosures related to troubled debt restructurings, which will be effective for the Company's quarter ended September 30, 2011. The Company is currently evaluating the effect ASU 2011-02 will have on the Company's disclosures in the Notes to the Consolidated Financial Statements.

In December 2010, the FASB issued ASU 2010-29, *Business Combinations (Topic 805): Disclosure of Supplementary Pro Forma Information for Business Combinations*, which clarifies the disclosures required of a public entity regarding pro forma information for business combinations that occurred in the current reporting period. The required disclosures include pro forma revenue and earnings of the combined entity for the current reporting period as though

the acquisition date had been as of the beginning of the annual reporting period. When comparative financial statements are presented, the pro forma revenue and earnings of the combined entity for the comparable prior reporting period should be reported as though the acquisition date for business combinations had been as of the beginning of the prior annual reporting period. In addition, disclosure of the nature and amount of any material pro forma adjustments in the reported pro forma revenue and earnings will be required. This ASU is effective for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2010. The Company is currently evaluating the effect ASU 2010-29 will have on the Company's disclosures in the Notes to Consolidated Financial Statements.

Table of Contents

From time to time, new accounting pronouncements are issued by the FASB and other regulatory bodies that are adopted by the Company as of the specified effective date. Unless otherwise discussed, management believes that the impact of recently issued standards, which are not yet effective, will not have a material impact on the Company's Consolidated Financial Statements upon adoption.

FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K includes forward-looking statements, as that term is defined in Section 27A of the Securities Act of 1933 and Section 21E of the Exchange Act. All statements, other than statements of historical facts, included or incorporated in this Form 10-K could be deemed forward-looking statements, particularly statements about our plans, strategies and prospects under the headings Business, Management's Discussion and Analysis of Financial Condition and Results of Operations. Forward-looking statements are often characterized by the use of words such as believes, estimates, expects, projects, may, will, intends, plans, or anticipates, or by discussion of strategy, plans or intentions. Forward-looking statements are included, for example, in discussions regarding the manufactured housing industry and market, economic conditions and consumer confidence, our financial performance and operating results, our operational and legal risks, how we may be affected by governmental regulations and legal proceedings, the expected effect of certain risks and uncertainties on our business, financial condition and results of operations, the availability of favorable consumer and wholesale manufactured home financing, market interest rates and our investments, and the ultimate outcome of our commitments and contingencies.

All forward-looking statements are subject to risks and uncertainties, many of which are beyond our control. As a result, our actual results or performance may differ materially from anticipated results or performance. Also, forward-looking statements are based upon management's estimates of fair values and of future costs, using currently available information. Therefore, actual results may differ materially from those expressed or implied in those statements. Factors that could cause such differences to occur include, but are not limited to, those discussed under Item 1A, Risk Factors, and elsewhere in this Annual Report. We expressly disclaim any obligation to update any forward-looking statements contained in this Annual Report, whether as a result of new information, future events or otherwise. For all of these reasons, you are cautioned not to place undue reliance on any forward-looking statements included in this Annual Report.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is the risk of loss arising from adverse changes in market prices and interest rates. We may from time to time be exposed to interest rate risk inherent in our financial instruments, but are not currently subject to foreign currency or commodity price risk. We manage our exposure to these market risks through our regular operating and financing activities. We are not currently a party to any market risk sensitive instruments that could be reasonably expected to have a material effect on our financial condition or results of operations.

Our operations and investments are interest rate sensitive. As overall manufactured housing demand can be adversely affected by increases in interest rates, a significant increase in mortgage interest rates may negatively affect the ability of buyers to secure financing. Higher interest rates could unfavorably impact our revenues, gross margins and net earnings. Lower interest rates could have the effect of reducing interest income earned on our investments, including cash equivalents and inventory finance receivables. Our business is also sensitive to the effects of inflation, particularly with respect to raw material and transportation costs. We may not be able to offset inflation through increased selling prices.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Reference is made to the Consolidated Financial Statements, the Reports thereon, the Notes thereto, and the supplementary data commencing on page F-1 of this report, which Consolidated Financial Statements, Reports, Notes and data are incorporated herein by reference.

Table of Contents

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in the Exchange Act Rules 13a-15(e) and 15d-15(e)). Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered in this report, our disclosure controls and procedures were effective.

Management's Assessment on Internal Controls Over Financial Reporting

The Company's management assessed the effectiveness of the Company's internal control over financial reporting based on the criteria in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation under the criteria in Internal Control – Integrated Framework, the Company's management concluded that the Company's internal control over financial reporting was effective as of March 31, 2011. For Management's Report On Internal Control Over Financial Reporting refer to page F-2 of this report.

Changes in Internal Control over Financial Reporting

There were no changes in our internal controls over financial reporting identified in connection with this evaluation that occurred during our last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

Table of Contents**PART III****ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE**

For a description of the directors of the Company and other information called for by this Item 10, see Election of Directors, and General-Section 16(a) Beneficial Ownership Reporting Compliance of the Company's Proxy Statement for the Annual Meeting of Stockholders to be held on June 30, 2011, which is incorporated herein by reference. Also see the information relating to executive officers of the Company that follows Item 3 of Part I of this Report, which is incorporated in this Item 10 by reference.

The Company has adopted a Code of Ethics that applies to all directors, officers and employees of the Company. A copy of the Company's Code of Ethics is located on the Company's website at www.cavco.com or will be mailed, at no charge, upon request submitted to James P. Glew, Secretary, Cavco Industries, Inc., 1001 North Central Avenue, Suite 800, Phoenix, Arizona, 85004. If the Company makes any amendment to, or grants any waivers of, a provision of the Code of Ethics that applies to its principal executive officer, principal financial officer, principal accounting officer or controller where such amendment or waiver is required to be disclosed under applicable SEC rules, the Company intends to disclose such amendment or waiver and the reasons therefore on its Internet website at www.cavco.com.

ITEM 11. EXECUTIVE COMPENSATION

For a description of the Company's executive compensation, see Election of Directors, and Executive Compensation (other than the Compensation Committee Report) of the Company's Proxy Statement for the Annual Meeting of Stockholders to be held on June 30, 2011, which is incorporated herein by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

For a description of the security ownership of management and certain beneficial owners, see Stock Ownership of the Company's Proxy Statement for the Annual Meeting of Stockholders to be held on June 30, 2011, which is incorporated herein by reference.

Securities Authorized for Issuance Under Equity Compensation Plans

The following table sets forth information as of March 31, 2011, with respect to our compensation plans and individual compensation arrangements under which our equity securities were authorized for issuance to directors, officers, employees, consultants and certain other persons and entities in exchange for the provision to us of goods or services.

Plan Category	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants, and Rights (a)	Weighted-Average Exercise Price of Outstanding Options, Warrants, and Rights (b)	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column (a)) (c)
Equity compensation plans approved by stockholders	401,500	\$ 27.95	349,126
Equity compensation plans not approved by stockholders			
Total	401,500	\$ 27.95	349,126

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

For a description of certain relationships and related transactions of the Company, see Compensation Discussion and Analysis-Compensation Committee Interlocks and Insider Participation of the Company's Proxy Statement for the Annual Meeting of Stockholders to be held on June 30, 2011, which is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

For a description of principal accounting fees and services, see Audit Fees and Ratification of Appointment of Independent Auditors of the Company's Proxy Statement for the Annual Meeting of Stockholders to be held on June 30, 2011, which is incorporated herein by reference.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

To the Shareholders of Cavco Industries, Inc.,

The management of Cavco Industries, Inc. (the Company), is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f). Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the Company's assets; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in conformity with U.S. generally accepted accounting principles, and that the Company's receipts and expenditures are being made only in accordance with authorizations of our management and directors; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements. Because of its inherent limitations, the Company's controls and procedures may not prevent or detect misstatements. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the controls system are met. Because of the inherent limitations in all controls systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. Management assessed the effectiveness of the Company's internal control over financial reporting based on the criteria in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on management's evaluation under the criteria in Internal Control - Integrated Framework, management concluded that the Company's internal control over financial reporting was effective as of March 31, 2011.

The effectiveness of the Company's internal control over financial reporting as of March 31, 2011, has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in their report which is included herein.

June 3, 2011

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders

Cavco Industries, Inc.

We have audited Cavco Industries, Inc.'s internal control over financial reporting as of March 31, 2011, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Cavco Industries, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Cavco Industries, Inc. maintained, in all material respects, effective internal control over financial reporting as of March 31, 2011, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the March 31, 2011 consolidated financial statements of Cavco Industries, Inc. and subsidiaries, and our report dated June 3, 2011 expressed an unqualified opinion thereon.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders

Cavco Industries, Inc.

We have audited the accompanying consolidated balance sheets of Cavco Industries, Inc. and subsidiaries (the Company) as of March 31, 2011 and 2010, and the related consolidated statements of operations, redeemable noncontrolling interest and stockholders' equity, and cash flows for each of the three years in the period ended March 31, 2011. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Cavco Industries, Inc. and subsidiaries at March 31, 2011 and 2010, and the consolidated results of their operations and their cash flows for each of the three years in the period ended March 31, 2011, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Cavco Industries Inc.'s internal control over financial reporting as of March 31, 2011, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated June 3, 2011 expressed an unqualified opinion thereon.

CAVCO INDUSTRIES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except per share amounts)

1. Summary of Significant Accounting Policies

Principles of Consolidation. These Consolidated Financial Statements include the accounts of Cavco Industries, Inc. and its subsidiaries (collectively, the Company or Cavco). All significant intercompany transactions and balances have been eliminated in consolidation. Certain prior period amounts have been reclassified to conform to current period classification. The Company has evaluated subsequent events after the balance sheet date of March 31, 2011 through the date of the filing of this report with the Securities and Exchange Commission (SEC). See Notes 10 and 12 for the Company s discussion of disclosable subsequent events.

During fiscal year 2010, the Company and an investment partner, Third Avenue Value Fund (Third Avenue), formed Fleetwood Homes, Inc. (Fleetwood Homes), with a contribution of \$35,000 each for equal fifty-percent ownership interests. On August 17, 2009 (the Fleetwood Acquisition Date), Fleetwood Homes acquired seven operating manufactured housing plants, two idle factories, all related equipment, accounts receivable, inventory, certain trademarks and trade names, intellectual property, and specified contracts and leases; and assumed express warranty liabilities pertaining to certain of the previous operations. The purchase price of the transaction was \$25,800 and was paid in cash.

The results of the Fleetwood Homes operations have been included in the Consolidated Financial Statements and the related Notes since the Fleetwood Acquisition Date in accordance with the provisions of the Financial Accounting Standards Board (FASB) Accounting Standards Codification (the Codification or ASC) 810, *Consolidation*. Management has determined that, under generally accepted accounting principles, although Fleetwood Homes is only fifty-percent owned by the Company, Cavco has a controlling interest and is required to fully consolidate the results of Fleetwood Homes. The primary factors that contributed to this determination were Cavco s board and management control of Fleetwood Homes. To that end, members of Cavco s management hold two out of three total seats on the board of directors of Fleetwood Homes. In addition, as part of a management services agreement among Cavco, Fleetwood Homes and Third Avenue, Cavco provides all executive-level management services to Fleetwood Homes including, among other things, general management oversight, marketing and customer relations, accounting and cash management. Third Avenue s financial interest in Fleetwood Homes is considered a redeemable noncontrolling interest, and is designated as such in the Consolidated Financial Statements (see Note 11).

Nature of Operations. Headquartered in Phoenix, Arizona, the Company designs and produces manufactured homes which are sold to a network of retailers located throughout the continental United States. The Company also operates retail sales locations which offer the Company s homes to retail customers.

Accounting Estimates. Preparation of financial statements in conformity with U.S. generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from the estimates and assumptions used in preparation of the financial statements.

Fair Value of Financial Instruments. The Company s financial instruments consist of cash and cash equivalents, accounts receivable, debtor-in-possession note receivable, inventory finance notes receivable, accounts payable, noncontrolling interest note payable and certain accrued liabilities. The carrying amounts of these instruments approximate fair value due to their nature and relative shorter maturity periods.

Revenue Recognition. Revenue from homes sold to independent retailers is generally recognized when the home is shipped, at which time title passes to the independent retailer, and collectability is reasonably assured. Homes sold to independent retailers are generally paid for prior to shipment or financed by the independent retailer through standard industry arrangements which include repurchase agreements (see Note 5). Manufacturing sales are reduced by a provision for estimated repurchase obligations based upon past experience and market conditions. Revenue from homes sold under special inventory finance programs involving funds provided by the Company is deferred until such time that sufficient payment for the related loan receivable is received by the Company. Retail sales for Company locations are recognized when funding is reasonably assured, the customer has entered into a legally binding sales contract, title has transferred and the home is accepted by the customer, delivered and permanently located at the

customer's site.

Some of the Company's independent retailers operate multiple sales outlets. No independent retailer accounted for 10% or more of our manufacturing sales during any fiscal year within the three-year period ended March 31, 2011.

Cash and Cash Equivalents. Highly liquid investments with insignificant interest rate risk and original maturities of three months or less, when purchased, are classified as cash equivalents. The Company's cash equivalents are comprised of U.S. Treasury money market funds and money market funds with carrying amounts that approximate fair value due to their short-term nature.

Restricted Cash. Restricted cash represents deposits received from retail customers required to be held in trust accounts which the Company cannot access for general operating purposes until the sale of the home to the retail customer is completed.

Table of Contents

Accounts Receivable. The Company extends competitive credit terms on a retailer-by-retailer basis in the normal course of business and its accounts receivable are subject to normal industry risk. The Company provides for reserves against accounts receivable for estimated losses that may result from customers' inability to pay. Uncollectible accounts receivable have historically been insignificant and therefore the Company has no reserve for credit losses on trade receivables at March 31, 2011 and 2010.

Inventories. Raw material inventories are valued at the lower of cost (first-in, first-out method) or market. Finished goods and work-in-process inventories are valued at the lower of cost or market, using the specific identification method.

Property, Plant and Equipment. Property, plant and equipment are carried at cost. Depreciation is calculated using the straight-line method over the estimated useful lives of each asset. Estimated useful lives for significant classes of assets are as follows: buildings and improvements 10 to 30 years, and machinery and equipment 7 to 25 years. Repairs and maintenance charges are expensed as incurred.

Asset Impairment. The Company periodically evaluates the carrying value of long-lived assets to be held and used when events and circumstances warrant such a review. The carrying value of a long-lived asset is considered impaired when the anticipated undiscounted cash flow from such asset is less than its carrying value. In that event, a loss is recognized based on the amount by which the carrying value exceeds the fair market value of the long-lived asset. Fair market value is determined primarily using the anticipated cash flows discounted at a rate commensurate with the risk involved. Losses on long-lived assets to be disposed of are determined in a similar manner, except that the fair market values are primarily based on independent appraisals and preliminary or definitive contractual arrangements less costs to dispose. The Company recognized impairment losses on long-lived assets of \$327 and \$288 during fiscal 2011 and 2010, respectively.

Inventory Finance Receivable. The Company's inventory finance notes receivable balance consists of amounts loaned by the Company under inventory financing programs for the benefit of our independent retailers' home product inventory needs. Under the terms of these programs, the Company provides a significant amount of the funds that independent financiers lend to distributors to finance retail inventories of our products. In addition, the Company has entered into direct inventory finance arrangements with distributors of our products wherein the Company provides all of the inventory finance funds. Interest income on inventory finance notes receivable is recognized as interest income on an accrual basis.

Allowance for Loan Loss. The allowance for loan losses reflects the Company's judgment of the probable loss exposure on our inventory finance receivable held for investment as of the end of the reporting period. The allowance for loan loss is developed at a portfolio level. A range of probable losses is calculated and the Company makes a determination of the best estimate within the range of loan losses. The Company has historically been able to resell repossessed homes, thereby mitigating loss experience. If a default occurs and collateral is lost, the Company is exposed to loss of the full value of the home loan. If the Company determines that it is probable that a borrower will default, a specific reserve is determined and recorded within the estimated allowance for loan loss. The Company recorded an allowance for loan loss of \$169 and \$40 at March 31, 2011 and 2010, respectively (see Note 3).

Goodwill and Other Intangibles. The Company accounts for goodwill and other intangible assets in accordance with the provisions of FASB ASC 350, *Intangibles - Goodwill and Other* (ASC 350). As such, the Company tests goodwill annually for impairment by reporting unit and records an impairment charge if the implied fair value of a reporting unit, including goodwill, is less than its carrying value. As of March 31, 2011 and 2010, all of the Company's goodwill of \$67,346 is attributable to its manufacturing reporting unit.

The Company performed its annual goodwill impairment analysis as of March 31, 2011. The first step under ASC 350 is to compare the fair value of the reporting unit to the carrying value of the reporting unit. If the fair value is less than the carrying value, the second step must be completed, comparing the fair value of goodwill to the carrying value of goodwill. In assessing the fair value of the manufacturing reporting unit, the Company primarily considered the income approach. Within the income approach, the fair value of the reporting unit was based on the discounted cash flow method, which compares the present value of expected future cash flows with the carrying value of the reporting unit's net assets. The income approach is dependent on a number of significant management assumptions, including estimated future revenue growth rates, gross margins, operating margins, capital expenditures, and discount rates.

Based on this analysis, the fair value of the reporting unit was deemed to be sufficiently greater than the carrying value of the reporting unit as of March 31, 2011. As such, there was no need to continue to the second step under ASC 350 and test the goodwill individually.

In conjunction with the Fleetwood Homes transaction, the Company acquired \$1,600 of intangible assets, \$800 assigned to trademarks and trade names, which are considered indefinite lived intangible assets and are not subject to amortization and \$800 assigned to a customer-related intangible subject to amortization over its useful life of 15 years. The Company tests other intangibles for impairment annually and when indicators of impairment exist. Amortization expense recognized for the fiscal years ended March 31, 2011 and 2010 was \$53 and \$34, respectively, leaving a net customer-related intangible balance at March 31, 2011 and 2010 of \$713 and \$766, respectively.

Table of Contents

Warranties. The Company provides retail homebuyers or builder/developers with a twelve-month warranty for manufacturing defects from the date of sale to the retail customer. Estimated warranty costs are accrued as cost of sales at the time of sale. The warranty provision and reserves are based on estimates of the amounts necessary to settle existing and future claims on homes sold as of the balance sheet date. Factors used to calculate the warranty obligation are the estimated amount of homes still under warranty including homes in retailer inventories, homes purchased by consumers still within the twelve-month warranty period, the timing in which work orders are completed, and the historical average costs incurred to service a home.

Retailer Volume Rebates. The Company's manufacturing operations sponsor volume rebate programs under which certain sales to retailers and builder/developers can qualify for cash rebates generally based on the level of sales attained during a twelve-month period. Volume rebates are accrued at the time of sale and are recorded as a reduction of net sales.

Reserve for Repurchase Commitment. The Company is contingently liable under terms of repurchase agreements with financial institutions providing inventory financing for retailers of its products. These arrangements, which are customary in the industry, provide for the repurchase of products sold to retailers in the event of default by the retailer. The risk of loss under these agreements is spread over numerous retailers. The price the Company is obligated to pay generally declines over the period of the agreement (generally 18 to 36 months) and is further reduced by the resale value of repurchased homes. The Company applies FASB ASC 460, *Guarantees* (ASC 460) and FASB ASC 450-20, *Loss Contingencies* (ASC 450-20), to account for its liability for repurchase commitments. Under the provisions of ASC 460, during the period in which a home is sold (inception of a repurchase commitment), the Company records the greater of the estimated fair value of the non-contingent obligation or a contingent liability for each repurchase arrangement under the provisions of ASC 450-20, based on historical information available, as a reduction to sales. Additionally, subsequent to the inception of the repurchase commitment, the Company evaluates the likelihood that it will be called on to perform under the inventory repurchase commitments. If it becomes probable that a retailer will default and an ASC 450-20 loss reserve should be recorded, then such contingent liability is recorded equal to the estimated loss on repurchase. Changes in the reserve are recorded as an adjustment to sales. Following the inception of the commitment, the recorded reserve is reduced over the repurchase period in conjunction with applicable curtailment arrangements and is eliminated once the retailer sells the home.

Insurance. The Company is self-insured for a significant portion of its general and products liability, auto liability, health and property coverage. Since October 1, 2009, and between October 1, 2006, and October 1, 2008, the Company has been fully insured for workers' compensation. Prior to October 1, 2006, and between October 1, 2008 and October 1, 2009, the Company was self-insured for workers' compensation liability. Insurance is maintained for catastrophic exposures and those risks required to be insured by law. Estimated self-insurance costs are accrued for incurred claims and estimated claims incurred but not yet reported. For product liability in particular, the Company has purchased stop-loss insurance, which will reimburse the Company for claims exceeding \$1,000 per occurrence. A reserve for products liability is actuarially determined and reflected in accrued liabilities in the accompanying Consolidated Balance Sheets. The determination of claims and expenses and the appropriateness of the related liabilities are regularly reviewed and updated.

Redeemable Noncontrolling Interest. During fiscal year 2010, the Company and an investment partner, Third Avenue formed Fleetwood Homes, Inc., with a contribution of \$35,000 each for equal fifty-percent ownership interests. Management has determined that, although Fleetwood Homes is only fifty-percent owned by the Company, Cavco has a controlling interest and is required to fully consolidate the results of Fleetwood Homes. The primary factors that contributed to this determination were Cavco's board and management control of Fleetwood Homes. Third Avenue's financial interest in Fleetwood Homes is considered a redeemable noncontrolling interest. After the fifth anniversary of the Fleetwood Acquisition Date, (i.e. after August 17, 2014), or at any time after Fleetwood Homes has earned net income of at least \$10,000 in each of its two most recently completed consecutive fiscal years, Third Avenue has the right (Put Right) to require Cavco to purchase all of Third Avenue's shares of Fleetwood Homes common stock for an amount based upon a calculation that is designed to approximate fair value. Likewise, Cavco has the right (Call Right) to require Third Avenue to sell all of its shares of Fleetwood Homes common stock based on the same timing and calculation as described above for the Put Right (see Note 11). The conditions for the Put Right or

Call Right to become exercisable have not been met as of March 31, 2011.

The purchase price to be payable by Cavco for the purchase of Third Avenue's shares pursuant to the exercise of the Put Right or the Call Right may be settled in cash or shares of common stock of Cavco. However, the circumstances under which net share settlement would be allowed are not solely within the control of Cavco (see Note 11). There is no explicit cap on the maximum number of common shares that could be potentially issuable upon redemption; therefore, GAAP requires that Third Avenue's noncontrolling interest in Fleetwood Homes be classified as a temporary equity mezzanine item between liabilities and stockholders' equity. In prior periods, the Company had initially classified the noncontrolling interest as a component of stockholders' equity. However, as of March 31, 2011 and for all respective prior periods, the noncontrolling interest was reclassified to be a temporary equity mezzanine item. The reclassification did not affect the Company's current or historical consolidated statements of operations or cash flows, and the Company believes the effects of this reclassification on the historical consolidated balance sheets and statements of stockholders' equity are not material.

Table of Contents

Advertising. Advertising costs are expensed as incurred and were \$241, \$247 and \$268 for the fiscal years ended March 31, 2011, 2010 and 2009, respectively.

Freight. Substantially all freight costs are reimbursed by the Company's retailers. Reimbursed freight expense of \$8,168, \$5,855 and \$5,931 were recognized in net sales and cost of sales for the fiscal years ended March 31, 2011, 2010 and 2009, respectively.

Income Taxes. The Company accounts for income taxes pursuant to FASB ASC 740, *Income Taxes*, (ASC 740) and provides for income taxes utilizing the asset and liability approach. Under this approach, deferred taxes represent the future tax consequences expected to occur when the reported amounts of assets and liabilities are recovered or paid. The provision for income taxes generally represents income taxes paid or payable for the current year plus the change in deferred taxes during the year. Deferred taxes result from differences between the financial and tax bases of the Company's assets and liabilities and are adjusted for changes in tax rates and tax laws when changes are enacted. The Company recognized an income tax benefit of \$950 resulting from a decrease in Arizona statutory income tax rates, enacted during the fourth quarter of fiscal year 2011.

The calculation of tax liabilities involves considering uncertainties in the application of complex tax regulations. The Company recognizes liabilities for anticipated tax audit issues based on the Company's estimate of whether, and the extent to which, additional taxes will be due. If payment of these amounts ultimately proves to be unnecessary, the reversal of the liabilities would result in tax benefits being recognized in the period when the liabilities are no longer determined to be necessary. If the estimate of tax liabilities proves to be less than the ultimate assessment, a further charge to expense would result.

Net Income Per Share. Basic earnings per common share is computed based on the weighted-average number of common shares outstanding during the reporting period. Diluted earnings per common share is computed based on the combination of dilutive common share equivalents, comprised of shares issuable under the Company's share-based compensation plans and the weighted-average number of common shares outstanding during the reporting period. Dilutive common share equivalents include the dilutive effect of in-the-money options to purchase shares, which is calculated based on the average share price for each period using the treasury stock method. However, when a net loss exists, no potential common stock equivalents are included in the computation of the diluted per-share amount because the computation would result in an anti-dilutive per-share amount. The following table sets forth the computation of basic and diluted earnings per share:

	2011	2010	2009
Net income (loss) attributable to Cavco common stockholders (in thousands)	\$ 2,831	\$ (3,371)	\$ 458
Weighted average shares outstanding:			
Basic	6,637,270	6,516,572	6,487,665
Add: Effect of dilutive stock options	222,187		205,267
Diluted	6,859,457	6,516,572	6,692,932
Net income (loss) per share attributable to Cavco common stockholders:			
Basic	\$ 0.43	\$ (0.52)	\$ 0.07
Diluted	\$ 0.41	\$ (0.52)	\$ 0.07

Anti-dilutive common stock equivalents excluded from the computation of diluted earnings per share were 84, 246,192 and 7,052 for the fiscal years ended March 31, 2011, 2010 and 2009, respectively.

Comprehensive Income (Loss). Total comprehensive income (loss) includes net income and other comprehensive income (loss). The Company had no other comprehensive income (loss) for the fiscal years ended March 31, 2011, 2010 and 2009. As such, net income (loss) equals total comprehensive income (loss) of \$2,831, \$(3,371) and \$458 for the fiscal years ended March 31, 2011, 2010 and 2009, respectively.

Recent Accounting Pronouncements. In July 2010, the Financial Accounting Standards Board issued ASU 2010-20, *Receivables (Topic 310): Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses*, which requires entities to provide new disclosures in their financial statements about their financing receivables, including credit risk exposures and the allowance for credit losses on a disaggregated basis. The ASU is effective for public entities for reporting periods ending on or after December 15, 2010 for disclosures of financing receivables as of the end of a reporting period. The disclosures related to activity that occurs during a reporting period are required to be adopted for periods beginning on or after December 15, 2010. In April 2011, the FASB issued ASU 2011-02, *A Creditor's Determination of Whether a Restructuring Is a Troubled Debt Restructuring*. ASU 2011-02 clarifies when creditors should classify loan modifications as troubled debt restructurings. In addition, ASU 2011-02 deferred the effective date of the disclosures about troubled debt restructurings in ASU 2010-20 to periods beginning after June 15, 2011. The Company adopted the provisions of ASU 2010-20 relating to period-end disclosures as of December 31, 2010, and the remaining provisions during the quarter ended March 31, 2011 (see Note 3), except for the disclosures related to troubled debt restructurings, which will be effective for the Company's quarter ended September 30, 2011. The Company is currently evaluating the effect ASU 2011-02 will have on the Company's disclosures in the Notes to the Consolidated Financial Statements.

In December 2010, the FASB issued ASU 2010-29, *Business Combinations (Topic 805): Disclosure of Supplementary Pro Forma Information for Business Combinations*, which clarifies the disclosures required of a public entity regarding pro forma information for business combinations that occurred in the current reporting period. The required disclosures include pro forma revenue and earnings of the combined entity for the current reporting period as though the acquisition date had been as of the beginning of the annual reporting period. When comparative financial statements are presented, the pro forma revenue and earnings of the combined entity for the comparable prior reporting period should be reported as though the acquisition date for business combinations had been as of the beginning of the prior annual reporting period. In addition, disclosure of the nature and amount of any material pro forma adjustments in the reported pro forma revenue and earnings will be required. This ASU is effective for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2010. The Company is currently evaluating the effect ASU 2010-29 will have on the Company's disclosures in the Notes to Consolidated Financial Statements.

From time to time, new accounting pronouncements are issued by the FASB and other regulatory bodies that are adopted by the Company as of the specified effective date. Unless otherwise discussed, management believes that the impact of recently issued standards, which are not yet effective, will not have a material impact on the Company's Consolidated Financial Statements upon adoption.

Table of Contents**3. Inventory Finance Notes Receivable and Allowance for Loan Loss**

The Company's inventory finance notes receivable balance consists of two classes: (i) amounts loaned by the Company under participation inventory financing programs; and (ii) direct inventory financing arrangements for the home product inventory needs of our independent distribution base.

Under the terms of the participation programs, the Company provides loans to independent financial institutions representing a significant portion of the funds that such financiers then lend to retailers to finance their inventory purchases of our products. The participation inventory finance notes receivable are unsecured general obligations of the independent floorplan lenders.

Under the terms of the direct inventory finance arrangements, the Company provides all of the inventory finance funds. These notes are secured by the inventory collateral and other security depending on borrower circumstances. The other terms of direct inventory finance arrangements vary depending on the needs of the borrower and the opportunity for the Company, but generally follow the same tenets as the participation programs.

Inventory finance notes receivable, net, consists of the following by class of financing receivable (in thousands):

	March 31,	
	2011	2010
Direct inventory finance notes receivable	\$ 12,157	\$ 8,216
Participation inventory finance notes receivable	5,771	4,753
Allowance for loan loss	(169)	(40)
	\$ 17,759	\$ 12,929

The Company evaluates the potential for loss from its participation inventory finance programs based on the independent lender's overall financial stability and has determined that an applicable allowance for loan loss was not needed at March 31, 2011 and 2010, respectively.

With respect to the direct inventory finance notes receivable, the risk of loss is spread over numerous borrowers. Borrower inventory levels and activity are monitored in conjunction with third-party service providers where applicable, to estimate the potential for loss on the related notes receivable, considering potential exposures including repossession costs, remarketing expenses, impairment of value and the risk of collateral loss. The Company has historically been able to resell repossessed unused homes, thereby mitigating loss experience. If a default occurs and collateral is lost, the Company is exposed to loss of the full value of the home loan. If the Company determines that it is probable that a borrower will default, a specific reserve is determined and recorded within the estimated allowance for loan loss. The Company recorded an allowance for loan loss of \$169 and \$40 at March 31, 2011 and 2010, respectively. The following table represents changes in the estimated allowance for loan losses, including related additions and deductions to the allowance for loan loss applicable to the direct inventory finance notes receivable (in thousands):

Direct
