CAUTIONARY STATEMENT REGARDING FORWARD LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains a number of forward-looking statements where we indicate that we anticipate, believe, expect, estimate or use similar words to indicate what might happen in the future. These forward-looking statements represent our expectations about future events, including anticipated product introductions; changes in markets, customers and customer order rates; changes in third party reimbursement rates; anticipated levels of expenditure growth in revenue; taxation levels; and the effects of pricing decisions. When used in this 10-Q, the words anticipate, believe, expect, estimate and similar expressions are generally intended to identify forward-looking statements. You should evaluate these forward-looking statements in the context of a number of factors that may affect our financial condition and results of operations, including the following:

The rates at which our United States medical products are reimbursed varies with each third party payer, and also with each product we sell. Further, the third party payers, including both private payers such as HMOs and insurance companies, and governmental payers such as Medicare and Medicaid, adjust their rates of payment from time to time. We recognize revenue for sale of our products when we have completed documentation based on the overall percentage of our quoted historical experience. Because of the variation in payment, it is not possible for us to estimate and record revenue based on what will be paid by each third party payer for each product we sell. If the mix of products we sell and the payers for the patients to whom we sell products changes, the rate of payment we receive may change. These changes may require an adjustment in our revenue recognition rates and policies, resulting in lower revenue.

Like many medical device companies that rely on third party reimbursement entities for payment, we have a large balance of uncollected accounts receivable. We also have a reserve for the portion of those receivables that we estimate will not be collected based on our historical experience. If we cannot collect an amount of receivables that is consistent with historical collection rates, we might be required to increase our reserve and charge off the portion of receivables we cannot collect. This additional provision for uncollectible accounts could significantly impact our operating results.

In the United States, our products are subject to reimbursement by private and public healthcare reimbursement entities that generally impose limits on reimbursement and strict rules on applications for reimbursement. Changes in the rates, eligibility or requirements for reimbursement, or failure to comply with reimbursement requirements, could cause a reduction in our income from operations.

We maintain significant amounts of finished goods inventory on consignment at clinics for distribution to patients. We may not be able to completely control losses of this inventory and, if inventory losses are not consistent with historical experience, we might be required to write off a portion of the carrying value of inventory. Any write-off could both decrease our income currently, and increase the rate at which we provide for additions to the reserve for inventory losses in the future. This increase in the rate of additions to the reserve could affect our income in future periods.

The clinical effectiveness of our electrotherapy products has periodically been challenged and the effectiveness of electrotherapy products such as those offered by Compex SA for fitness and health applications has sometimes been questioned. Publicity about the effectiveness of electrotherapy for pain relief or other clinical applications and continued questions about the effectiveness of electrotherapy for conditioning could negatively impact revenue and income from operations.

We operate in both the medical and consumer fitness markets, both of which are subject to a significant amount of regulation that affects the way we can advertise our products, sell our products, bill customers for our products and

collect payment for our products.

Table of Contents

The products we sell in our United States medical products business may only be sold on physician prescription and, for most of those products where there is a government sponsored payer, only if we receive detailed documentation from the physician indicating the medical necessity of the product together with forms which we must submit to the paying agency. In most cases, the reimbursement agency, including Medicare, requires strict adherence to the requirements of the form and the failure to properly obtain and maintain the documentation can result in significant fines, penalties, and civil litigation. For example, we were subject to a Medicare whistleblower suit that we settled in 2000 for approximately \$1.6 million. Although we believe we have implemented a compliance program designed to detect errors in complying with these regulations, if our program fails, our operations and results could be adversely affected.

The manufacture of medical products, and the labeling of those products for sale in the United States, requires compliance with quality assurance and labeling regulations of the Food and Drug Administration. Although we believe our manufacturing facilities and operations comply with such regulations, a failure to comply could result in our inability to manufacture and refurbish products until compliance is achieved.

The marketing of our consumer products is subject to regulations and oversight by both the FDA and the Federal Trade Commission relating to misleading advertising. The FTC has commenced several enforcement actions against advertisers of abdominal belts during the past few years based on unsubstantiated claims. Although we have attempted to limit the claims made in our advertisements to matters that can be substantiated, if the FTC were to disagree with our conclusions, it could enjoin our marketing of these products for a period of time and impose fines and penalties. Any such actions would have a significant adverse impact on our operations.

Approximately 38% of our revenue for the nine months ended March 31, 2004, was generated by Compex SA, a subsidiary headquartered in Switzerland that does business primarily in Europe. There are risks in doing business in international markets which could adversely affect our business, including:

- regulatory requirements;
- export restrictions and controls, tariffs and other trade barriers;
- difficulties in staffing and managing international operations;
- fluctuations in currency exchange rates;
- reduced protection for intellectual property rights;
- seasonal reductions in business activity; and
- potentially adverse tax assessments.

We have not sold substantial volumes of consumer products in the United States, but intend to devote significant resources to market consumer products for health and fitness applications. The consumer market for electrical stimulation products is new and developing, and our success in this market will depend on a number of factors, including:

- our ability to obtain clearance from the FDA and other regulatory authorities to market the products for all relevant consumer applications;

our ability to maintain distribution rights with, and to obtain adequate quantities of product from, the manufacturers of consumer products for which we serve as distributors;

our ability to establish consumer demand with a limited marketing budget;

our ability to secure contracts and shelf space in the United States with significant retailers;

the effectiveness of our products for their intended applications.

Table of Contents

We market and sell several products manufactured by third parties, including abdominal belts and other garment-based consumer products purchased from a manufacturer in Ireland, iontophoresis products manufactured by a company in Utah, traction devices manufactured by a company in Minnesota, and electrodes manufactured by a number of different companies. We generally have less control over the quality and reliability of these third-party products. If the products do not comply with their specifications or otherwise fail to properly function, we may receive an increased amount of returns for which we are primarily responsible, may be required to recall products, may suffer a decrease in product reputation and goodwill in the marketplace, and may be unable to sell products currently on hand. Any of these events could negatively impact our operations, particularly if sale of these third party products becomes a substantial part of our business

Our third party distribution contracts, including our contract for purchase from the manufacturer and sale of Slendertone products, may be cancelled by the manufacturer if we do not meet certain sales quotas. Although we believe we are currently in compliance with those contracts, we cannot be certain that we will be able to continue to sell product at the rates these contracts require. Cancellation of our distribution rights could have a significant adverse effect on our revenue and profitability.

COMPEX TECHNOLOGES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2004

1. Accounting Policies

The amounts set forth in the preceding financial statements are unaudited as of and for the periods ended March 31, 2004 and 2003 but, in the opinion of management, reflect all adjustments (consisting only of normal recurring adjustments) necessary for a fair statement of the results for the periods presented. Such results are not necessarily indicative of results for the full year. The accompanying financial statements of the Company should be read in conjunction with the audited consolidated financial statements for the year ended June 30, 2003 included in the Company's Annual Report on Form 10-K.

2. Reclassification

Certain prior year items have been reclassified to conform with the current year presentation.

3. Stock-Based Compensation

The Company has adopted the disclosure-only provisions of SFAS No. 123, as amended by SFAS No. 148. Accordingly, the Company continues to account for stock-based compensation using the intrinsic value method as prescribed under Accounting Principles Board Opinion (APB) No. 25 and related Interpretations.

Had compensation expense for the Company's stock-based compensation plans been determined based on the fair value at the grant dates consistent with the method of SFAS No. 123, the Company's net income and earnings per share would have been reduced to the pro forma amounts indicated below:

		Three Months Ended March 31		Nine Months Ended March 31	
		2003	2004	2003	2004
Net Income	As reported	\$1,355,442	\$ 428,735	\$3,284,701	\$2,011,475
	Pro forma	(161,115)	(214,351)	(393,176)	(607,006)
	option expense, net of tax				
	Pro forma	\$1,194,327	\$ 214,384	\$2,891,525	\$1,404,469
Basic earnings per share	As reported	\$ 0.12	\$ 0.03	\$ 0.30	\$ 0.17
	Pro forma	0.11	0.02	0.26	0.12
Diluted earnings per share	As reported	\$ 0.12	\$ 0.03	\$ 0.30	\$ 0.16
	Pro forma	0.11	0.02	0.26	0.11

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted-average assumptions used for grants in 2003 and 2004: dividend yield of 0%; expected volatility of 57.6% and 61.4%; risk-free interest rate of 4.82% and 2.91%; and expected lives of 5 years.

Table of Contents

4. Stock Offering

Compex received net proceeds from the sale of common stock to certain shareholders in a private placement, completed on November 20, 2003, of approximately \$8.3 million and approximately \$2.3 million of additional investment rights exercised on February 18, 2004. Compex has used these proceeds to reduce indebtedness, and intends to use the balance of the proceeds for marketing and other expenses incurred in expanding its consumer business, and for other general working capital requirements.

On December 4, 2003, the Company filed a registration statement on Form S-3 to register the sale of 1,250,000 shares of common stock held by three shareholders who purchased these securities in the previously mentioned private placements plus exercising their additional investment rights.

5. Note Payable and Long Term Debt

The Company has a \$5,000,000 U. S. credit facility which provides for revolving borrowings at varying rates based either on the bank's prime rate or LIBOR. As of March 31, 2004, there were borrowings outstanding of \$500,000 on the revolving credit line. The Company currently has \$4,500,000 available under the revolving credit line. Borrowings under the U. S. credit facility are secured by substantially all assets of the Company other than those pledged as collateral on existing lease or mortgage obligations. The weighted average rate on borrowings under the revolving line of credit was 4.00%.

The Company was in compliance with all financial covenants in its U. S. credit agreement as of March 31, 2004 and for the period then ended.

The Company has a \$4,975,000 Swiss credit facility that provides for a three-year term loan at varying rates. As of March 31, 2004, there were borrowings outstanding of \$4,126,901 under this credit facility. Borrowings under this credit facility were used to fund the acquisition of Filsport Assistance S.r.l. on July 3, 2003. Borrowings under the Swiss credit facility are secured by all of the equity interest held by the Company's Swiss subsidiary in Filsport. The first advance on the loan bears interest at 3.69%, the second advance bears interest at 4.09%, and the third and final advance bears interest at 4.40%.

The Company was in compliance with all financial covenants in its Swiss Credit agreement as of March 31, 2004 and for the period then ended.

Table of Contents

6. Per Share Data

Net income per share is calculated in accordance with Financial Accounting Standards Board Statement No. 128, Earnings Per Share. Potential common shares are included in the diluted net income per share calculation when dilutive. Potential common shares consisting of common stock issuable upon exercise of outstanding common stock options are computed using the treasury stock method. Our basic net income per share is computed by dividing net income by the weighted average number of common shares outstanding during the period. Diluted net income per share is computed by dividing net income by the weighted average number of common shares outstanding during the period, increased to include dilutive potential common shares issuable upon the exercise of stock options that were outstanding during the period. The table below is a reconciliation of the numerator and denominator in the basic and diluted net income per share calculation.

	For the Three Months Ended March 31		For the Nine Months Ended March 31	
	2003	2004	2003	2004
Numerator				
Net Income	\$ 1,355,442	\$ 428,735	\$ 3,284,701	\$ 2,011,475
Denominator				
Denominator for basic net income per share weighted average shares outstanding	10,934,858	12,257,734	10,945,773	11,612,383
Effect of dilutive stock options	38,354	1,007,640	81,410	949,472
Denominator for diluted net income per share weighted average shares outstanding	<u>10,973,212</u>	<u>13,265,374</u>	<u>11,027,183</u>	<u>12,561,855</u>
Basic net income per share	\$ 0.12	\$ 0.03	\$ 0.30	\$ 0.17
Diluted net income per share	0.12	0.03	0.30	0.16

Employee stock options of 92,000 and 48,669 for the third quarter and nine months ended March 31, 2004, have been excluded from the diluted net income per share calculation because their effect would be anti-dilutive. For the third quarter and nine months ended March 31, 2003, employee options of 1,499,500 and 1,031,967 have been excluded from the diluted net income per share calculation because their effect would be anti-dilutive.

7. Comprehensive Income

SFAS No. 130, Reporting Comprehensive Income, establishes standards for the reporting and display of comprehensive income and its components. Adjustments to comprehensive income for the nine months ended March 31, 2004 and March 31, 2003 consisted solely of gains on translation of its foreign subsidiary financial statements from the functional currency to US dollars of \$762,000 and \$706,000, respectively, resulting in total comprehensive income of \$2,773,000 and \$3,991,000, respectively.

Table of Contents**8. Business Acquisition**

Acquisition of FilSPORT Assistance S.r.l.:

On July 3, 2003, the Company acquired substantially all the capital stock of FilSPORT Assistance S.r.l., an independent distributor of the Compex® brand of consumer products in Italy. The transaction involved an exchange of approximately \$4.9 million in cash for stock and provides for additional contingent consideration of up to 950,000 Euros if a certain performance milestone is achieved following the transaction. As of March 31, 2004, these performance milestones were not achieved and if current trends continue, the additional consideration will not have to be provided. The acquisition was financed through a newly-established credit facility and with existing funds. Prior to the acquisition, FilSPORT operated under an exclusive distribution arrangement and accounted for 25% of Compex SA total sales (10% of consolidated sales) in fiscal 2003. The purchase consideration exceeded the net fair value of tangible assets by \$4,511,888 and was assigned to goodwill.

Pro forma operating results of the Company as if FilSPORT had been acquired at the beginning of fiscal 2003 are as follows (unaudited):

	For the Three Months Ended March 31, 2003	For the Nine Months Ended March 31, 2003
	<hr/>	<hr/>
Net Sales	\$22,354,286	\$65,076,215
Income before taxes	2,367,471	5,827,690
Net Income	1,465,634	3,463,102
Earnings per share		
Basic	\$ 0.13	\$ 0.32
Diluted	0.13	0.31

The Company used a new term loan and a credit line to finance this business acquisition. The fair value of the assets and liabilities of the acquired company are presented as follows:

	As of March 31, 2004
	<hr/>
Accounts Receivable	\$ 2,193,589
Inventories	1,775,876
Prepaid Expenses	681,888
Property and equipment, net	135,748
Goodwill	4,511,888
Other long-term assets	39,821
Accounts payable	(1,415,652)
Accrued liabilities	(1,179,090)
Liabilities forgiven	(2,563,870)
Long-term liabilities	(790,286)

9. Segment Information

Compex Technologies, Inc. and its consolidated subsidiaries operate in one reportable segment, manufacture and distribution of electrical stimulation products for pain management, rehabilitation and fitness applications. The Company's chief operating decision makers use consolidated results to make operating and strategic decisions. Net revenue from the United States and foreign sources (primarily Europe) are as follows:

	For the Nine Months Ended March 31	
	2003	2004
U.S. revenue	\$36,178,747	\$39,211,495
Foreign revenue	19,437,421	24,060,967
	<u>\$55,616,168</u>	<u>\$63,272,462</u>

Net revenue by product line was as follows:

	For the Nine Months Ended March 31	
	2003	2004
Rehabilitation products	\$ 11,307,660	\$ 13,484,038
Pain management	11,500,920	12,240,048
Consumer products	14,059,371	18,466,046
Accessories and supplies	18,748,217	19,082,330
	<u>\$55,616,168</u>	<u>\$63,272,462</u>

During the first nine months of fiscal 2003, one customer accounted for approximately 10% of consolidated revenue. This customer represented approximately 5% of total accounts receivable at March 31, 2003.

10. Commitments

The Company expects to invest in sales and marketing, and in inventory and infrastructure, over the next twelve months to introduce these products and the Compex sport products to the United States markets. The Company started this process during fiscal 2003 and continues to invest more in fiscal 2004 based on our experience. The Company may also apply cash to acquisitions during future periods.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

We discuss the factors that significantly affected our financial results and our financial condition in this Management's Discussion and Analysis of Financial Condition and Results of Operations. For a more complete understanding of these factors, you should also review our consolidated balance sheets at June 30, 2002 and June 30, 2003, our consolidated statements of operations, statements of shareholders' equity and statements of cash flows for the three years ended June 30, 2003, and the notes to those financial statements. These financial statements and the report of Ernst & Young LLP on our financial statements are included at Item 8 of our Form 10-K for the year ended June 30, 2003.

Critical Accounting Policies

We prepare our financial statements in accordance with generally accepted accounting principles as in effect in the United States. The preparation of these financial statements requires that we make estimates and judgments that affect the reported amounts of our assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We base these estimates on historical experience and on various other assumptions that we believe are reasonable under the circumstances. It is our policy to evaluate and update these estimates on an ongoing basis. The judgments and policies that we believe would have the most significant impact on the presentation of our financial position and results are as follows:

Revenue Recognition and Provisions for Credit Allowances and Returns. In our U.S. direct distribution electrotherapy business, we recognize revenue upon notification from a health care provider that equipment has been prescribed and provided to a patient and approved by the patient or his/her insurance provider. Many providers reimburse at rates which differ from our invoice rate based on contracts, buying agreements or negotiated rate adjustments. In addition, patients sometimes return units after initial acceptance when they determine that their responsibilities for co-payments, deductibles or other charges are more than expected. We provide for these credit allowances and returns by reducing gross revenue by a portion of the invoiced amount and by recording such amount as part of the reserve for uncollectible accounts receivable. We estimate the amount of this provision for credit allowances and returns based on our historical experience with the various reimbursement entities, any recent notifications of changes in reimbursement rates and our historic rates of product returns. Possible changes in the number of units returned by patients or the rates of reimbursement could cause this provision for credit allowances and the reserve for uncollectible accounts to be inadequate.

Reserve for Uncollectible Accounts Receivable. Managing our accounts receivable represents one of our biggest business challenges. The process of determining what products will be reimbursed by third party payors and the amounts that they will reimburse is very complex and the reimbursement environment is constantly changing. We maintain a reserve for uncollectible receivables and provide for additions to the reserve to account for the risk of nonpayment. We set the amount of the reserve and adjust the reserve at the end of each reporting period based on a number of factors, including historical rates of collection, trends in the historical rates of collection and current relationships and experience with insurance companies or other third party payors. If the rates of collection of past-due receivables recorded for previous fiscal periods changes, or if there is a trend in the rates of collection on those receivables, we may be required to change the rate at which we provide for additions to the reserve. Such a change can significantly affect operating results in current periods. A change in the rates of our collection can result from a number of factors, including turnover in personnel, changes in the reimbursement policies or practices of payors, or changes in industry rates of reimbursement. Further, the reserve may be affected by significant charge-offs if a related group of receivables become doubtful. Accordingly, the provision for uncollectible accounts recorded in the income statement has fluctuated and may continue to fluctuate significantly from quarter to quarter as such trends change.

Carrying Value of Inventory. We maintain a large balance of electrotherapy products on consignment at clinics and other health care providers that are not under our control. In the course of our business, some of this product is lost. Although we have the right in most cases to seek reimbursement for the lost product from our sales representatives or the health care providers, in many instances we forgo that right in order to maintain

Table of Contents

favorable relationships. We maintain a reserve for the amount of consignment inventory that may be lost based on our experience as developed through periodic field audits. We cannot be certain that future rates of product loss will be consistent with our historical experience and we could be required to increase the rate at which we provide for such lost inventory, thus adversely affecting our operating results.

Carrying Value of Intangible Assets. We had a balance of intangible assets of approximately \$16.5 million at March 31, 2004, most of which constituted goodwill and the value of acquired technology from several acquisitions. We are required to charge-off the carrying value of identifiable intangibles, long-lived assets and related goodwill to the extent it may not be recoverable. We annually assess the impairment of identifiable intangibles, long-lived assets and related goodwill or whenever events or changes in circumstances indicate the carrying value may not be recoverable. Factors we consider important which could trigger an impairment provision include the following:

significant under-performance relative to expected historical or projected future operating results;

significant changes in the manner of use of the acquired assets or our overall business strategy;

significant negative industry or economic trends;

significant decline in our stock price for a sustained period and our market capitalization relative to net book value.

If we determine that the carrying value of intangibles, long-lived assets and related goodwill might not be recoverable based upon the existence of one or more of the above indicators of impairment, we would measure any impairment based on a projected discounted cash flow method using a discount rate we determine to be commensurate with the risk inherent in our current business model.

Table of Contents**Results of Operations**

Although our revenues continued to grow during the third fiscal quarter at a rate that met our expectations, a large component of that growth was represented by favorable exchange rates that impact the European revenue we report. Although these exchange rates caused increases in our recorded revenue from European operations, they caused corresponding increases in expense from European operations, impacting our profitability for the quarter. Without giving effect to exchange rates, our European operations performed poorly during the quarter, reflecting both a very poor economic environment for consumer goods in Europe and continued difficulty in managing operations in several geographies.

Our United States medical products business performed very well during the quarter, showing both increased revenue and profitability, with some pressure on margins because of a change in product mix. We also made progress in our United States consumer business during the quarter, executing a celebrity endorsement contract and devoting considerable resources to market the business. Nevertheless, because it has taken us longer than anticipated to commence this marketing process, our revenues from the United States consumer business have lagged behind and did not contribute substantially to revenue for the quarter.

The combination of favorable exchange rates that increased reported revenue but also expense, with increased expenditure in consumer products marketing that has not yet been matched with revenue from consumer products, caused us to meet our revenue expectations, but to substantially miss our expectations for income for the quarter.

The following table sets forth information from the statements of operations as a percentage of revenue for the periods indicated:

	Three Months Ended March 31		Nine Months Ended March 31	
	2003	2004	2003	2004
Net sales and rental revenue	100.0%	100.0%	100.0%	100.0%
Cost of sales and rentals	29.8	32.7	30.4	32.7
Gross profit	70.2	67.3	69.6	67.3
Operating expenses				
Selling, general and administrative	55.6	60.1	56.4	58.4
Research and development	3.0	3.6	2.9	3.2
	<hr/>	<hr/>	<hr/>	<hr/>
Total operating expenses	58.6	63.7	59.3	61.6
Income from operations	11.6	3.6	10.3	5.8
Other expense, net	0.4	0.3	0.5	0.5
Income tax provision	4.1	1.3	3.9	2.1
	<hr/>	<hr/>	<hr/>	<hr/>
Net Income	7.1	2.0	5.9	3.2
	<hr/>	<hr/>	<hr/>	<hr/>

Our revenue increased by 13% to \$21,652,000 during the quarter ended March 31, 2004 from \$19,143,000 during the quarter ended March 31, 2003, and increased 14% to \$63,272,000 during the nine months ended March 31, 2004 from \$55,616,000 during the nine months ended March 31, 2003. Increases in both our domestic medical business and in our consumer business in Europe, accounted for 7% of the increase with 6% of the increase a result of favorable exchange rates. For the nine-month period, increases in both business segments accounted for 8% of the increase with 6% due to favorable exchange rates.

Table of Contents

U.S. revenue for the quarter was \$13.4 million, up 11% from the prior year's quarter of \$12.1 million. U.S. revenue for the nine-month period ended March 31, 2004, was \$39.2 million, up 8% from the \$36.2 million for the comparable period last year. On a sequential basis, U.S. revenue was relatively unchanged versus the fiscal second quarter. Our direct sales business in the United States posted a revenue increase of 10% for the quarter and 7% for the nine-month period ended March 31, 2004, as compared to the comparable periods last year. This increase is primarily due to an increase in sales and rentals of medical devices, reflecting our ongoing expansion of our direct selling efforts to the physician markets. This is partially offset by a 1.5% increase in our sales credit reserve as compared to our reserve percentage in comparable prior periods. This increase in credit reserve reflects a modest shift in our revenue mix from the higher reimbursement workers' compensation/personal injury segment to the group contract insurance segment. The company monitors the reserve balances quarterly and makes adjustments to the reserve as deemed necessary. We continued to expand our direct unit sales and rental business through the acquisition of BMR-Neurotech, which was included in our results of operations for the period ended March 31, 2004, but not the period ended March 31, 2003, as the acquisition occurred in May 2003.

Our consumer business in the U.S. has seen a very modest, but steady, ramp in sales. We began actively promoting the Slendertone line in October 2003, received favorable publicity in December 2003 and January 2004 in two fitness magazine articles, and obtained very favorable results from a sports study conducted at the University of Wisconsin La Crosse in January 2004. We feel we have to overcome what could be conceived as a negative image for abdominal belt products and do not expect to generate substantial sales of these products until we have secured sales arrangements with major retail chains. We recently signed an endorsement contract with Sarah Ferguson, Duchess of York, whose assistance may help overcome the market image of these products.

Our European operations posted a revenue increase of 20% for the quarter. Approximately 17% was generated by a favorable impact of exchange rates, reflecting the strength of the euro versus the dollar. The acquisition of FilSport in Italy accounted for 12% and revenue from the addition of Slendertone products contributed 4% to our European revenue increase. This increase was partially offset by a 13% decrease in sales of our Compex line of products. The actual number of Compex units sold are down 6% when compared to prior year unit sales. Additionally, the product mix shifted toward our newly introduced lower-priced models. We recently introduced the Energy line of products targeted at the health and wellness markets, which is an entirely new market opportunity for us. The price points for this market are below our higher priced models for competitive athletes.

Revenue by product line during the quarter ended March 31, 2004 was roughly \$4.4 million in rehabilitation products, \$4.3 million in pain management products, \$6.4 million in consumer products, and \$6.5 million in accessories and supplies. All revenue segments, except accessories and supplies, were above prior year amounts with consumer products reflecting the largest nominal increase. Our increase in consumer products revenue is primarily attributable to our Italian acquisition and Slendertone product sales in Europe. Revenue from accessories and supplies is below prior year amounts due primarily to the slowdown of our European consumer business discussed earlier, and a slight reduction in our average selling prices for our domestic medical supplies due to pricing competition.

Our gross profit was \$14,571,000 or 67.3% of revenue during the quarter, and \$42,594,000 or 67.3% of revenue during the nine months ended March 31, 2004. This compares to gross profit of \$13,438,000 or 70.2% of revenue in the quarter and \$38,686,000 or 69.6% of revenue during the nine months ended March 31, 2003. The overall decrease in margin percentage is primarily due to a decrease in our higher margin accessories and supplies as a percentage of total revenue in both the three months and the nine months ended March 31, 2004 as compared to prior year and lower average selling prices in Europe due to the introduction of our fitness line of Compex products. We anticipate gross profit to stabilize in the lower 60% range as our domestic consumer business becomes a greater percentage of our revenue and as we enter the health and wellness markets in Europe. Cost of sales and gross profit for periods ended March 31, 2004 also reflect the sale of inventory that was acquired in the FilSport acquisition which, because FilSport was a distributor, has a higher cost than inventory we have manufactured and sold through FilSport after this acquired

inventory was sold. Subsequently, the majority of the inventory that was acquired as a part of the Filsport acquisition has been sold. In the future, our margin in Italy is expected to be consistent with the margin in our other European countries.

For the quarter ended March 31, 2004, our selling, general and administrative expenses increased 22% to \$13,005,000 or 60.1% of revenue, from \$10,648,000 or 55.6% of revenue for the same quarter last year. Our selling, general and administrative expenses increased 18% to \$36,898,000 or 58.3% of revenue during the

Table of Contents

nine months ended March 31, 2004, compared to \$31,358,000 or 56.4% of revenue during the nine months ended March 31, 2003. Selling, general and administrative expenses associated with the July 2003 acquisition of FilSport and the marketing expenses for our new consumer products both domestically and in Europe contributed significantly to the increases in 2004. We have also increased the number of our direct sales employees to 58 as of March 31, 2004 as compared to 40 for the same period last year. This reflects our commitment to a direct physician selling model. Additionally, foreign currency exchange rates, which effectively increase our expenses from our European operations, contributed approximately 4% of the increase of general and administrative expenses for the quarter. We have finalized contracts with several individuals who have expressed an interest in endorsing our products that require specific payments as part of these expenditures. We will continue to devote substantial resources to marketing our consumer products during the remainder of fiscal 2004 and currently expect to increase our promotion and advertising expenditures for both Slendertone and Compex as these products require a continuous marketing push. We will also incur additional administrative expense as we work to complete the documentation of internal controls to meet the requirements of Sarbanes Oxley. We started this process in the second fiscal quarter. Although our timeline for compliance has been deferred by one year, we plan to continue to devote resources to this process through this fiscal year. In future periods, internal control compliance expenses will become an ongoing part of our selling, general, and administrative expenditures. Accordingly, we expect the rate of selling, general, and administrative expenditures to increase slightly during the fourth quarter of this year.

Our research and development expenses increased 36% to \$780,000 in the third quarter of fiscal 2004 from \$572,000 in the third quarter of fiscal 2003. For the nine months ended March 31, 2004, research and development costs increased 27% to \$2,055,000 from \$1,614,000 for the same period ended March 31, 2003. Approximately 16% and 17% of the increases, respectively, are due to the effects of foreign exchange rates. We anticipate the R&D spending will increase slightly in absolute dollars as we continue to pursue new complementary products, such as our IFII medical device, our Energy and Body line of consumer products in Europe, and our Fitness Trainer model to be introduced in the domestic consumer market. Our R&D spending will decrease as a percentage of revenue in future periods as our quarterly revenue from consumer products increases.

Interest expense decreased 21% to \$81,000 in the third quarter of fiscal year 2004 from \$102,000 in the third quarter of fiscal year 2003. Interest expense increased 19% to \$377,000 from \$316,000 for the comparable nine-month periods. The increase for the nine-month period was due to balances outstanding under the newly established \$3,300,000 credit facility with a bank in Switzerland that we used to finance the acquisition of FilSport on July 3, 2003. The decrease for the quarter was due to repayments under our US credit facility. We anticipate reduced interest expense in coming quarters as long as our debt levels remain comparable to current levels.

The provision for income taxes was 40% for the fiscal 2004 and 40% in fiscal 2003. The tax rate was lowered in the third quarter of fiscal 2003 from 42% to 40% after a preliminary review of the tax rates in several of our European tax jurisdictions. We believe that 40% is a reasonable estimate of the effective rate for fiscal 2004 based on our most recent estimates of tax liabilities in the U.S. and in the various European tax authorities. We anticipate our final review of our consolidated tax provision to be completed prior to our year-end.

As a result of the above activity, our net income decreased to \$429,000 in the third quarter of fiscal 2004 from \$1,355,000 in the third quarter of fiscal 2003. For the nine months ended March 31, 2004, net income decreased to \$2,011,000 from \$3,285,000 during the same period in fiscal 2003. Diluted earnings per share decreased from \$0.12 during the quarter ended March 31, 2003 to \$0.03 during the quarter ended March 31, 2004 and diluted earnings per share decreased from \$.30 to \$.16 per share for the nine-month period.

Liquidity and Capital Resources

On July 3, 2003, we acquired all the capital stock of Filsport Assistance S.r.l., an independent distributor of the Compex® brand of consumer products in Italy. The transaction involved an exchange of approximately \$4.9 million in cash for stock and requires that we pay additional contingent consideration if a certain performance milestone is achieved following the transaction. The acquisition was financed through a newly-established credit facility and with existing funds. Prior to the acquisition, Filsport operated under an exclusive distribution arrangement and accounted for 25% of Compex SA total sales (10% of consolidated sales) in fiscal 2003. The purchase consideration exceeded the net fair value of tangible assets by \$4,511,888 that was assigned to goodwill.

Table of Contents

On November 19, 2003, we entered into definitive agreements with three independent institutional accredited investors for the private placement of 1,000,000 units of our securities at a purchase price of \$8.9072 per unit. Each unit consisted of one share of our common stock, \$.10 par value per share, and an additional right to purchase a quarter of a share of our common stock at \$9.3526 per share. The additional investment rights were exercised on February 18, 2004. The net proceeds, including the proceeds from the exercise of the additional investor rights, were approximately \$10.5 million. We have used a majority of the proceeds to reduce borrowings under our long-term and short-term credit facilities.

For the nine months ended March 31, 2004, our operating activities used cash of \$1,855,000. The \$3,365,901 that we generated during the period through net income, after adjustment for non-cash depreciation and amortization, was offset by a \$3,249,000 increase in accounts receivable, a \$634,000 increase in inventory and a \$2,882,000 decrease in accounts payable and accrued liabilities. The increase in receivables was primarily a result of increased revenue, the translation effect when converting our European receivables to U.S. dollars, slower collections in Europe as a result of the slow economy and a slight change in revenue mix in our U.S. medical product sales. Our reserve for uncollectible receivables increased by approximately \$1.4 million during the nine months ended March 31, 2004, but decreased as a percentage of receivables from 38% to 37%. The reserve will continue to decrease as a percentage of total receivables as our consumer business continues to grow as a percentage of our overall revenue. The increase in inventory is primarily due to additional purchases of Slendertone inventory in Europe. The decrease in accounts payable and accrued liabilities related to year-end June 30, 2003 timing differences and the payment of estimated income taxes during the 2004 fiscal year.

We used \$5,056,000 in investing activities in the first nine months of fiscal 2004, including \$3,390,000 to fund the net cash purchase price of FilSport Assistance S.r.l. and \$1,130,000 for net purchases of property and equipment, primarily clinical and rental equipment.

Our financing activities generated \$3,714,000 of cash during the nine months ended March 31, 2004. We raised \$10,546,000 through the private placement of 1,250,000 shares of the company's common stock described above and an additional \$3,836,000 through borrowings under our Swiss credit line to finance the FilSport Assistance acquisition. We used \$11,268,000 to repay borrowings under our U. S. credit facility and to pay-off other long-term debt. At March 31, 2004, a total of \$500,000 remains outstanding under the U. S. facility. Our U. S. credit facility has a maturity date of June 30, 2004, and we expect that all of the borrowings under this credit facility will be repaid prior to the maturity date. We believe that the agreement could be extended, with similar terms, with the current financial institution and another facility could be put in place.

We currently expect to invest in sales and marketing, and in inventory and infrastructure, over the next twelve months to introduce these products and the Compex sport products to the United States markets. We started this process during fiscal 2003 and intend to invest more in fiscal 2004 based on our experience. We may also apply cash to acquisitions during future periods.

We have engaged several celebrities who have endorsed our consumer products to act as our spokespersons in promoting those products and have agreed to pay them for their services in appearing in advertisements and for use of their names. We have contractual commitments under these agreements totaling approximately \$175,000 for the remainder of the 2004 fiscal year, totaling approximately \$800,000 for the year ending June 30, 2005, and totaling approximately \$900,000 for the year ending June 30, 2006.

We believe that available cash and borrowings under our credit lines will be adequate to fund cash requirements for the current fiscal year and the foreseeable future.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

During the quarter ended March 31, 2004, our revenue originating outside the U.S. was 38% of total revenue, substantially all of which was denominated in the local functional currency. Currently, we do not employ currency-hedging strategies to reduce the risks associated with the fluctuation of foreign currency exchange rates.

Our international business is subject to risks typical of an international business, including, but not limited to: differing economic conditions, changes in political climate, differing tax structures, other regulations and restrictions, and foreign exchange rate volatility. Accordingly, our future results could be materially adversely impacted by changes in these or other factors.

Table of Contents

We are exposed to market risk from changes in the interest rates on certain outstanding debt. The outstanding loan balance under our \$20 million credit facility bears interest at a variable rate based on the bank's prime rate or LIBOR. Based on the average outstanding bank debt for fiscal 2003, a 100 basis point change in interest rates would not change interest expense by a material amount.

ITEM 4. CONTROLS AND PROCEDURES

(a) Evaluation of disclosure controls and procedures.

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-14(c) under the Exchange Act) as of the end of the period covered by this quarterly report on Form 10-Q. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective to ensure that information we are required to disclose in the reports that we file or submit under the Securities Exchange Act of 1934 are recorded, processed, summarized, and reported within the time periods specified in Securities and Exchange Commission rules and forms.

(b) Changes in internal controls.

There were no changes made in our internal controls over financial reporting during the period covered by this report that has materially affected, or is reasonable likely to materially affect, our internal controls over financial reporting.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

In late January 2001, we were served with documents in connection with a product liability case brought in the California Superior Court for Solano County. Although we had no record of the proceedings, the action had progressed to the entry of a default judgment on January 11, 2001. We appealed the default judgment to the California Court of Appeals in March 2001. In late January 2001, we were served with documents in connection with a product liability case brought in the California Superior Court for Solano County. Although we had no record of the proceedings, the action had progressed to the entry of a default judgment on January 11, 2001. We appealed the default judgment to the California Court of Appeals in March 2001. On May 10, 2002, the appeals court overturned the default judgment holding that there was no valid complaint against us. The plaintiff in this case has indicated that they intend to submit an amended complaint, but unless and until they do, there is no pending suit in this matter. Plaintiff then filed an appeal with respect to other defendants, and the appeal was dismissed. The case is being remitted to the trial court.

From time to time, we have also been a party to claims, legal actions and complaints arising in the ordinary course of our business. We do not believe that the resolution of such matters has had or will have a material impact on our results of operations or financial position.

ITEM 2. CHANGES IN SECURITIES, USE OF PROCEEDS, AND ISSUER PURCHASES OF EQUITY SECURITIES

(f) Securities Sold without registration under the Securities Act of 1933.

On November 20, 2003, and in accordance with a purchase agreement we signed on November 19, 2003, we privately placed a total of 1,000,000 units of our equity securities at a purchase price of \$8.9072

Table of Contents

per unit. Each unit consisted of one share of our common stock, \$.10 par value per share, and an additional right to purchase a quarter of a share of our common stock at \$9.3526 per share. On February 17 and 18, 2004, the three purchasers of the units exercised the additional investment rights, purchasing 250,000 shares of our common stock for aggregate payments to the Company of \$2,338,150. We paid Credit Lyonnais Securities (USA) Inc., which acted as our selling agent in connection with the sale of the units, commissions of \$134,443.63 on exercise of the additional investment rights.

In offering and selling the units, and the common stock on exercise of the additional investment rights, we relied on the exemptions from registration contained in Section 4(2) of the Securities Act of 1933, and in Rule 506 of the Securities and Exchange Commission. We did not, and our agent represented that it did not, use any form of public solicitation in locating the purchasers. Each of the purchasers represented to us that they were an accredited investor, that they were purchasing for investment, and they understood that the units could not be resold without registration or an exemption from registration. We placed legends on the common stock certificates and the additional investment rights noting these restrictions. We filed a registration statement relating to resale of the common stock included in the units, and the common stock issued upon exercise of the additional investment rights, on December 4, 2003 and the registration statement was declared effective on December 12, 2003.

We used the \$2.2 million of net proceeds from the sale of the common stock on exercise of the additional investment rights to repay borrowings under our credit facilities and other long-term debt.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES None

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS None

ITEM 5. OTHER INFORMATION None

ITEM 6. EXHIBITS AND REPORTS ON FORM 8-K

(a) Exhibits

- 31.1 Certification of Chief Executive Officer pursuant to Rule 15d-14(a)(17 CFR 240.15d-14(a)) and Section 302 of the Sarbanes-Oxley Act of 2002
- 31.2 Certification of Chief Financial Officer pursuant to Rule 15d-14(a)(17 CFR 240, 15d-14(a)) and Section 302 of the Sarbanes-Oxley Act of 2002
- 32 Certification of Chief Executive Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 (Furnished but not filed)

(b) Reports on Form 8-K. The following reports on Form 8-K were filed during the quarter ended December 31, 2003.

A Form 8-K, filed February 12, 2004 furnishing (but not filing) the earnings release for the quarter ended December 31, 2003.
