CHAIRMAN'S STATEMENT

-----

Dear Shareholders:

We are pleased to present the Semi-Annual Report of The Taiwan Fund, Inc. (the "Fund") for the six months ended February 28, 2003. During this period, the Fund's net asset value ("NAV") decreased by 12.71% in U.S. dollar terms and by 11.03% in New Taiwan ("NT") dollar terms. During the same period, the Taiwan Stock Exchange Index (the "TAIEX") decreased by 6.98% in NT dollar terms. The NT dollar depreciated against the U.S. dollar by 1.44% during this period. Despite having underperformed the TAIEX, the Fund continued to be one of the best performing funds in its peer group during the past six months.

On February 28, 2003, the Fund's shares were trading at US\$8.38 per share, reflecting a discount of 15.10% to the Fund's NAV per share of US\$9.87. The Fund's shares were trading at a discount of 18.04% on August 31, 2002.

The global economy slowed down considerably in the past six months mainly due to increasing war anxiety that deterred spending and investments. For example, the U.S. GDP growth in the fourth quarter of 2002 declined sharply to 1.4% from 4.0% in the third quarter. The growth in the first and second quarters of 2003 is also expected to be sluggish. Decreased consumer spending is a key reason behind such lackluster economic performances. The U.S. University of Michigan Consumer Sentiment Index plunged to below 80 in February, a level not seen since 1993. Uncertainties related to the economic impact brought by geopolitical tensions certainly weighed heavily on the minds of consumers, businesses, and investors. With a U.S. war with Iraq looming, investors' confidence deteriorated, as reflected by falling stock markets in early 2003. The post-war economic status should determine whether or not a recovery is likely in the near term. At this time, however, the outlook is still mixed.

It is notable that in addition to widespread concerns about war and its consequences, there are also significant structural problems in the global economy that will persist in the post-war environment, such as the lack of demand growth from the industrial world, e.g. Japan, Germany, and in particular, the United States. Spiking oil prices in the first quarter of 2003 further dampened global demand growth. Although there is a possibility that oil prices will come down soon as a result of the war, this is unlikely to substantially boost growth. Many economists have reduced their forecast on global economic growth. For example, Morgan Stanley cut its global 2003 GDP growth forecast from 2.9% to 2.5%, citing oil shock and geopolitical instability in the aftermath of the war. Lack-

2

\_\_\_\_\_

ing meaningful growth engines, a complete global recovery is less likely to emerge in the foreseeable future.

Nevertheless, a partial economic recovery is expected in the coming months, as business inventories reach historically low levels and demand rebounds following post-war construction. A rebound in IT spending may be induced by the relief about the war, in conjunction with a brightened profit outlook in the upcoming business inventory cycle. For the global economy, it is probably still going to take time before prosperity resumes, however, an upturn based on cyclical forces is expected to take hold in the next several months. This should be a stimulus for certain industries and economies. Taiwan, for instance, should see a boost in economic growth following this cyclical upswing.

Driven primarily by exports of manufactured goods, Taiwan has long been the major beneficiary of the inventory build-up cycle. This is manifested by the link between Taiwan's export growth and the U.S. ISM Inventories Index in recent years. Since mid-2002, U.S. business inventories have been at historically low levels of approximately 1.36 months of sales. As growth expectations emerge after the war, a strong restocking demand should benefit Taiwan significantly. The pending IT replacement demand, which is expected to increase, should fuel Taiwan's exports, of which 40% are information technology products. In addition, the rising Chinese domestic demand also plays an important, and perhaps integral part of Taiwan's export growth. The contributions of the Chinese economy to the world economy may still be relatively small, but they represent an important growth driver to the relatively small Taiwanese economy. In 2002, China outpaced North America to become Taiwan's largest trade partner and Taiwan was among

China's top three foreign direct investors. The cross-strait economic developments have been mutually beneficial, and this economic tie will continue to support the base-line growth for Taiwan even in the face of a continued global economic downturn. However, the SARS epidemic poses a serious risk to the pace of economic growth in the near term.

The cross-strait political climate should be favorable in the coming months, as both sides focus on economic developments. The risk of a confrontation between Taiwan and China is currently low because of stable political and economic conditions. Political factors may provide a lift to the market when the campaign for the 2004 presidential election starts in the second half of 2003. More government stimulus may be proposed, including the possible elimination of the restrictions on direct links with China. Therefore, the market is not expected to encounter any roadblocks on the political front throughout 2003.

3

#### CHAIRMAN'S STATEMENT (continued)

The market may continue to consolidate in the near-term before the catalyst of inventory cycle comes to trigger growth. In light of a potential rally in the later part of 2003, any market weakness in the coming months should provide good entry points for investors. Through sound investment management by our portfolio manager, we believe our shareholders should enjoy handsome investment rewards in the foreseeable future.

During the past six months, the Fund's shares were trading at an average discount of around 16.2%. The discount fluctuated in the range of 12% to 20%, depending largely on market sentiments. As the market is likely to turn better going forward, we believe the discount should narrow in the coming months.

The Board maintains its confidence in the economic prospects of Taiwan, and the Fund's long-term performance should reflect Taiwan's investment fundamentals. Thank you for your continued support of The Taiwan Fund, Inc.

Sincerely,

/s/ S.Y. Wang

S.Y. Wang Chairman

REPORT OF THE INVESTMENT MANAGER

\_\_\_\_\_

### INVESTMENT PERFORMANCE

The Fund's net asset value ("NAV") decreased by 12.71% in U.S. dollar terms and by 11.03% in New Taiwan ("NT") dollar terms during the six months ended February 28, 2003. The Taiwan Stock Exchange Index (the "TAIEX") decreased by 6.98% in NT dollar terms during the same period. The Fund's performance during this period reflected a major structural change in Taiwan's investment focus: from technology-centric investing to sector-balanced investing. Despite its less than satisfactory investment results, the Fund has been one of the best performing funds in its peer group for the past six months, as we have adjusted our

investment focus ahead of our peers.

In the past six months, non-technology sectors outperformed the technology sector in a way that clearly demonstrated their fundamental differences. The technology sector fell by 17.68% in NT dollar terms during the past six months, while non-technology sectors on average rose 8.04% in NT dollar terms during the same period. The big winners in non-technology sectors, including paper and pulp, steel, automobile, and transportation, all returned over 30% during the past six months. Second-tier sectors, including cement, foods, textiles, tourism, and others, still made impressive gains of 10% to 15% during the same period. The only two sectors with negative returns during this period were finance, -0.5%, and wholesale and retail, -5.0%. Such a shift in investment focus was in fact within our expectation, as we have maintained an overweight position in non-technology sectors since last October (see below table). Within this non-technology arena, however, there were sizable differences in performance. As our investment positions in non-technology sectors did not cover the entire spectrum, the Fund's performance was worse than we would have liked for the past six months. Weak performance was nevertheless a common phenomenon among domestic funds, as evidenced by the fact that only three out of one hundred and ninety domestic funds outperformed the TAIEX on a year-to-date basis.

5

#### REPORT OF THE INVESTMENT MANAGER (continued)

TECHNOLOGY SECTOR WEIGHTING (%), THE FUND VS. TAIEX

	TAIWAN FUND	TAIEX
September	58.71	58.14
October	53.03	57.01
November	54.75	56.44
December	49.25	52.99
January	43.12	49.52
February	46.53	51.23

### Source: HSBC AMTW

On a relative basis, however, the Fund continued with its good performance record amongst its peers. In the fourth quarter of 2002, the Fund's performance ranked in the first quartile of its peer group, up from the second quartile ranking in the third quarter of 2002. In addition, the Fund has stayed in the first quartile on a year-to-date basis in 2003. Our early focus in the non-technology sector has differentiated the Fund from other funds and clearly given us an advantage in performance. We will continue to leverage our capability of identifying major market trends so as to secure our favorable position. In the meantime, we will further improve our investment efficiency to catch up with the rapid pace of market developments. This should help us close the performance gap between the Fund and the benchmark in the coming months.

### INVESTMENT OUTLOOK

The market is likely to be range-bound in the next few months before a significant rally comes in sight during the second half of 2003. The global economy remained weak in early 2003, with most investors expecting a period of

little growth under the threat of war. Nevertheless, expectations for the second half of the year are relatively optimistic, especially as the economy enters the post-war construction stage that usually encourages economic developments. By some estimates, the U.S. GDP growth should be only 0.6% in the second quarter of 2003, but in the third and fourth quarters, the growth rate is expected to accelerate to 4.5%. We believe this promising outlook for the second half of the year should protect against the market's downsides. While upsides are potentially rewarding, current market sentiments suggest investors are still very cautious about what may lie ahead, given the fact that economic indicators are trending down amid weak confidence for businesses and consumers.

We anticipate a late-year recovery in the global economy based on our observations that a mid-term cyclical upturn may play a significant role

6

at the time. Due to a difficult economic environment and negative news flows, businesses are keeping their inventories at such a low level that they may turn out to be insufficient once demand rises. This upturn in demand growth may stem from various sources, such as policy stimulus in the industrial world, China's continued investment needs, reconstruction activities in the Middle East, or a resurgence in pent-up demand from businesses and consumers. From a cyclical point of view, an inventory build-up cycle is also anticipated in late 2003. An 18-month long down-cycle, as suggested by looking at the U.S. inventoryto-sales ratio, started in mid-2002. The down-cycle should turn into an up-cycle in late 2003, according to the repetitive pattern. We believe there is a good chance of accelerated economic growth for the final part of this year, driven by increasing investment demand in inventories and capital spending. We expect the market to experience a strong rally well ahead of the fundamentals as we enter into the second half of 2003.

### INVESTMENT STRATEGY

We have been advocating four major themes for investing in Taiwan: (1) China Harvest Plays (2) Outsourcing Winners (3) Consumer Banking and (4) New Products. We will adhere to these themes because they are still applicable to today's market trends. On the other hand, we intend to add more color to these themes, as there are various angles to ride on these trends.

For China Harvest Plays, we continue to favor auto-related companies for their foreseeable growth. We are particularly keen on companies making auto parts, i.e. tires or lamps, because of their dominant positions in their respective markets. The thriving investment activities in China are another area of focus, for they are the major reason behind the strong price momentum in commodity markets, including cement, plastics, chemicals, paper & pulp, steel, etc. This rising demand for industrial materials also benefits the transportation industry, which is gaining from China's growing imports, on top of the already thriving exports. So there are many stories behind the theme of China Harvest Plays. We will increase our exposure to the above investment ideas accordingly.

For Outsourcing Winners, we will expand our reach to encompass smaller companies with niche focus. Although the larger ones are generally the winners, the smaller ones can find their fair shares in a carefully selected market segment, especially in industries that are less capital intensive. As a result, we will hedge our bets in some of these targets in addition to the well-known names in foundries and in the OEM/ODM business.

7

\_\_\_\_\_

REPORT OF THE INVESTMENT MANAGER (continued) \_\_\_\_\_

For Consumer Banking, we are seeing strong growth potential in the cash card (credit cards with an ATM cash withdrawal feature) business in Taiwan. It is expected that Taiwan's cash card business may reach NT\$350 billion to NT\$600 billion in the future, a substantial increase from the current market size of NT\$65 billion. Drawing from Japan's experience, the delinquency ratio in the cash card business is actually small, and the interest spread has not come down even under intense competition. With this tempting fundamental, the cash card business will be an important investment focus in the banking sector down the road. Our investment in this area will likely be part of a long-term investment strategy, however, since in our view the market has yet to see its growth potential.

For New Products, we will direct our focus to one particular product, the digital camera. As pointed out by Sony, the digital camera is the only consumer electronics product that is growing "in full swing" this year. The digital camera has offered the required functionality at the "sweet spot" price level that triggers a worldwide acceptance among consumers. Color or 3G (third generation) handsets, in comparison, may be less compelling to consumers with their limited functional benefits and higher prices. Our investment strategy will be to place bets on OEM/ ODM manufacturers, as well as key component providers. As the digital camera industry is moving towards its up-cycle, these participants are likely to enjoy the benefits without worrying too much about price competition, a nightmare for others in the technology sector.

It is our belief that a genuine, inventory-led up cycle may be seen in late 2003. As such, we will gradually build up our position in cyclical sectors, mainly, the technology sector. The expected consolidations in the next few months will only offer good entry points for well-managed leading companies. We will be on the buy side should those corrections come into play. Nevertheless, a sector-balanced portfolio is still our top priority in the coming months. Residing near the world's strongest growth engine, Taiwan has a lot to gain from China's economic growth. This is something we, as investors, should keep in mind in setting our investment strategy.

Thank you for your support and we look forward to presenting our strategy again in coming reports.

Sincerely,

/s/ Vincent Lai /s/ Jovi Chen Vincent Lai Portfolio Manager

NOTES TO FINANCIAL STATEMENTS (unaudited)

\_\_\_\_\_

1. SIGNIFICANT ACCOUNTING POLICIES The Taiwan Fund, Inc. (the "Fund"), a Delaware corporation, is registered under the Investment Company Act of 1940, as amended (the "Act"), as a diversified closed-end management investment company.

The Fund is not permitted to invest directly in the securities of Republic of China ("ROC") companies. Therefore, it invests through a contractual securities investment trust fund arrangement. This arrangement was established by means of the Securities Investment Trust, Investment Management and Custodian Contract ("Management Contract") among HSBC Asset Management (Taiwan) Limited ("Adviser"), the International Commercial Bank of China (Custodian) and the Fund. Under the Management Contract the Adviser manages and invests the assets of the Fund and the Custodian holds the assets. The Fund is the sole beneficiary of the assets held under the Management Contract and, as required by ROC regulations, its interest in the assets is evidenced by units of beneficial interest.

The Fund concentrates its investments in the securities listed on the Taiwan Stock Exchange. Because of this concentration, the Fund may be subject to additional risks resulting from future political or economic conditions in Taiwan and the possible imposition of adverse governmental laws of currency exchange restrictions affecting Taiwan.

The Fund is treated as a Qualified Foreign Institutional Investor ("QFII"), which allows the Fund to own 100% of a company's shares. However, all Funds managed by the Adviser are limited in aggregate to 10% ownership of a company's shares.

The policies described below are consistently followed by the Fund in the preparation of its financial statements in conformity with accounting principles generally accepted in the United States of America.

Security Valuation. All securities, including those traded over-the-counter, for which market quotations are readily available are valued at the last sales price prior to the time of determination of the Fund's net asset value per share or, if there were no sales on such date, at the closing price quoted for such securities (but if bid and asked quotations are available, at the mean between the last current bid and asked prices, rather than such quoted closing price). In certain instances where the price determined above may not represent fair market value, the value is determined in such manner as the Board of Directors may prescribe. Short-term investments, having maturity of 60 days or less are valued at amortized cost, which approximates market value, with accrued interest or discount earned included in interest receivable.

Foreign Currency Translation. The financial accounting records of the Fund are maintained in U.S. dollars. Investment securities, other assets and liabilities denominated in a foreign currency are translated into U.S. dollars at the current exchange rate. Purchases and sales of securities, income receipts and expense payments are translated into U.S. dollars at the exchange rate on the dates of the transactions.

Reported net realized gains and losses on foreign currency transactions represent net gains and losses from disposition of foreign currencies, currency gains and losses realized between the trade dates and settlement dates of security transactions, and the difference between the amount of net investment income accrued and the U.S. dollar amount actually received. The effects of changes in foreign currency exchange rates on investments in securities are not segregated in the Statement of Operations from the effects of changes in market prices of those securities, but are included in realized and unrealized gain or loss on investments in securities.

Forward Foreign Currency Transactions. A forward foreign currency contract ("Forward") is an agreement between two parties to buy or sell currency at a set price on a future date. The Fund may enter into Forwards in order to hedge foreign currency risk or for other risk management purposes. Realized gains or losses on Forwards include net

17

NOTES TO FINANCIAL STATEMENTS (continued) (unaudited)

\_\_\_\_\_

### 1. SIGNIFICANT ACCOUNTING POLICIES - continued

gains or losses on contracts that have matured or which the Fund has terminated by entering into an offsetting closing transaction. Unrealized appreciation or depreciation of Forwards is included in the Statement of Assets and Liabilities and is carried on a net basis. The portfolio could be exposed to risk of loss if the counterparty is unable to meet the terms of the contract or if the value of the currency changes unfavorably. As of February 28, 2003 the Fund had no open Forwards.

Taxes. As a qualified regulated investment company under Subchapter M of the Internal Revenue Code, the Fund is not subject to income taxes to the extent that it distributes all of its investment company taxable income and net realized capital gains for its fiscal year. In addition to federal income tax for which the Fund is liable on undistributed amounts, the Fund is subject to federal excise tax on undistributed investment company taxable income and net realized capital gains. The Schedule of Investments includes information regarding income taxes under the caption "Income Tax Information." The Fund is organized in Delaware and as such is required to pay Delaware an annual franchise tax. Also, the Fund is currently subject to a Taiwan security transaction tax of 0.3% on equities and 0.1% on corporate bonds and mutual fund shares of the transaction amount.

The Fund's functional currency for tax reporting purposes is the New Taiwan dollar.

Investment Income. Dividend income is recorded on the ex-dividend date, except where the ex-dividend date may have passed; certain dividends from foreign securities are recorded as soon as the Fund is informed of the ex-dividend date.

Taiwanese companies typically declare dividends in the Fund's third fiscal quarter of each year. As a result, the Fund receives substantially less dividend income in the first half of its year. Interest income, which includes accretion of original discount, is accrued as earned.

Dividend and interest income generated in Taiwan is subject to a 20% withholding tax. Stock dividends received (except those which have resulted from capitalization of capital surplus) are taxable at 20% of the par value of the stock dividends received.

Distributions to Shareholders. The distributable income from the assets held under the Management Contract, which is limited to cash dividends and interest income received, may be distributed to the Fund only once in each year at the Fund's discretion and is recorded on the ex-dividend date. Realized capital gains and stock dividends may also be distributed to the Fund. Within the above limitations the Fund will, under current ROC regulations, be able to remit out of the ROC the proceeds of income and capital gains distributions, unit redemptions and other distributions of assets held under the Management

Contract.

The Fund distributes to shareholders at least annually, substantially all of its taxable ordinary income and expects to distribute its taxable net realized gains. Certain foreign currency gains (losses) are taxable as ordinary income and, therefore, increase (decrease) taxable ordinary income available for distribution. Pursuant to the Dividend Reinvestment and Cash Purchase Plan (the "Plan"), shareholders may elect to have all distributions automatically reinvested in Fund shares. (See the summary of the Plan.) Shareholders who do not participate in the Plan will receive all distributions in cash paid by check in U.S. dollars. Income and capital gain distributions are determined in accordance with income tax regulations, which may differ from generally accepted accounting principles. These differences are primarily due to differing treatments for foreign currency transactions, losses deferred due to wash sales and excise tax regulations will result in reclassifications to paid in capital.

Security Transactions. Security transactions are accounted for as of the trade date. Gains and losses on securities sold are determined on the basis of identified cost.

18

NOTES TO FINANCIAL STATEMENTS (continued) (unaudited)

\_\_\_\_\_

1. SIGNIFICANT ACCOUNTING POLICIES - continued

Use of Estimates. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

2. PURCHASES AND SALES OF SECURITIES

Purchases and sales of securities, other than short-term securities, aggregated \$179,746,069 and \$182,264,958, respectively.

3. FEES AND OTHER TRANSACTIONS WITH AFFILIATES

Management Fee. As the Fund's investment adviser, HSBC receives a fee that is computed daily at an annual rate of 1.30% of the Fund's average net assets. The basic fee is subject to a performance adjustment (up to a maximum of +/-0.30%) based on the Fund's investment performance as compared to the Taiwan Stock Exchange Index over a rolling 36-month period.

For the six month period ending February 28, 2003, the management fee, including the performance adjustments, was equivalent to an annual rate of 1.11% of average net assets.

Directors Fees. No director, officer or employee of the Adviser or its' affiliates will receive any compensation from the Fund for serving as an officer or director of the Fund. The Fund pays each of its directors who is not a director, officer or employee of the Adviser an annual fee of \$10,000 plus \$1,000 for each Board of Directors' meeting or Audit Committee meeting attended. In addition, the Fund will reimburse each of the directors for travel and out-of-pocket expenses incurred in connection with Board of Directors' meetings.

Administration Fees. State Street Corporation ("State Street") provides, or

arranges for the provision of certain administrative and accounting services for the Fund, including maintaining the books and records of the Fund, and preparing certain reports and other documents required by federal and/or state laws and regulations. The Fund pays State Street a fee at the annual rate of 0.11% of the Fund's average daily net assets up to \$150 million, 0.08% of the next \$150 million, and 0.05% of those assets in excess of \$300 million, subject to certain minimum requirements.

4. FUND SHARES

At February 28, 2003, there were 20,000,000 shares of \$0.01 par value capital stock authorized, of which 16,365,572 were issued and outstanding.

### 5. SUBSEQUENT EVENT

New Secretary and Treasurer of the Fund. On April 2, 2003, the Board of Directors of the Fund appointed Carol Wang as the new Secretary and Treasurer of the Fund. Vicki Hau resigned as the Fund's Secretary and Treasurer effective April 2, 2003.

19

OTHER INFORMATION

RESULTS OF ANNUAL STOCKHOLDER MEETING VOTING HELD JANUARY 27, 2003

ELECTION OF DIRECTORS -- The stockholders of the Fund elected David Dean, Benny T. Hu, Lawrence J. Lau, Joe O. Rogers, Jack C. Tang, Gloria Wang, Lawrence Weber and Shao-Yu Wang to the Board of Directors to hold office until their successors are elected and qualified.

#### SHARE REPURCHASE PROGRAM

The Board of Directors of the Fund, at a meeting held on April 23, 2001, authorized the Fund to repurchase up to 15% of the Fund's outstanding shares of common stock. The Fund will purchase such shares in the open market at times and prices determined by management of the Fund to be in the best interest of stockholders of the Fund. As of February 28, 2003 no shares have been repurchased by the Fund.

### PRIVACY POLICY

#### PRIVACY NOTICE

The Taiwan Fund, Inc. collects nonpublic personal information about its

shareholders from the following sources:

- [] Information it receives from shareholders on applications or other forms;
- [ ] Information about shareholder transactions with the Fund, its affiliates, or others; and
- [ ] Information it receives from a consumer reporting agency.

THE FUND'S POLICY IS TO NOT DISCLOSE NONPUBLIC PERSONAL INFORMATION ABOUT ITS SHAREHOLDERS TO NONAFFILIATED THIRD PARTIES (OTHER THAN DISCLOSURES PERMITTED BY LAW).

The Fund restricts access to nonpublic personal information about its shareholders to those agents of the Fund who need to know that information to provide products or services to shareholders. The Fund maintains physical, electronic, and procedural safeguards that comply with federal standards to guard it shareholders' nonpublic personal information.

20

SUMMARY OF DIVIDEND REINVESTMENT AND

CASH PURCHASE PLAN

WHAT IS THE DIVIDEND REINVESTMENT AND CASH PURCHASE PLAN?

The Dividend Reinvestment and Cash Purchase Plan (the "Plan") offers shareholders of The Taiwan Fund, Inc. (the "Fund") a prompt and simple way to reinvest their dividends and capital gains distributions in shares of the Fund. The Fund will distribute to shareholders, at least annually, substantially all of its net income and expects to distribute annually its net realized capital gains. State Street Bank and Trust Company acts as Plan Agent for shareholders in administering the Plan. The Plan also allows you to make optional cash investments in Fund shares through the Plan Agent.

\_\_\_\_\_

### WHO CAN PARTICIPATE IN THE PLAN?

If you own shares in your own name, you can elect to participate directly in the Plan. If you own shares that are held in the name of a brokerage firm, bank, or other nominee, you should contact your nominee to arrange for them to participate on your behalf.

WHAT DOES THE PLAN OFFER?

The Plan has two components; reinvestment of dividends and capital gains distributions, and a voluntary cash purchase feature.

#### REINVESTMENT OF DIVIDENDS AND CAPITAL GAINS DISTRIBUTIONS

If you choose to participate in the Plan, your dividends and capital gains distributions will be promptly invested for you, automatically increasing your holdings in the Fund. If the Fund declares a dividend or capital gains distribution payable in cash, you will automatically receive shares purchased by the Plan Agent on the New York Stock Exchange or otherwise on the open market.

If a distribution is declared which is payable in shares or cash at the option of the shareholder and if on the valuation date (generally the payable date) the market price of shares is equal to or exceeds their net asset value, the Fund will issue new shares to you at the greater of the following: (a) net asset value per share or (b) 95% of the market price per share. If the market price per share on the valuation date is less than the net asset value per share, the

Fund will issue new shares to you at the market price per share on the valuation date.

All reinvestments are in full and fractional shares, carried to three decimal places. In the case of foreign (non-U.S.) shareholders, reinvestment will be made net of applicable withholding tax.

#### VOLUNTARY CASH PURCHASE OPTION

Plan participants have the option of making investments in Fund shares through the Plan Agent. You may invest any amount from \$100 to \$3,000 semi-annually. The Plan Agent will purchase shares for you on the New York Stock Exchange or otherwise on the open market on or about February 15 and August 15. If you hold shares in your own name, you should deal directly with the Plan Agent. We suggest you send your check to the following address to be received on or about February 5 or August 5 to allow time for processing: State Street Bank and Trust Company, P.O. Box 8200, Boston, MA 02266. The Plan Agent will return any cash payments received more than thirty days prior to February 15 or August 15, and you will not receive interest on uninvested cash payments. If you own shares that are held in the name of a brokerage firm, bank, or other nominee, you should contact your nominee to arrange for them to participate in the cash purchase option on your behalf.

21

SUMMARY OF DIVIDEND REINVESTMENT AND

CASH PURCHASE PLAN (continued)

\_\_\_\_\_

IS THERE A COST TO PARTICIPATE?

Each participant will pay a pro rata portion of brokerage commissions payable with respect to purchases of shares by the Plan Agent on the New York Stock Exchange or otherwise on the open market. Otherwise, there is no charge to participants for reinvesting dividends and capital gains distributions, since the Plan Agent's fees are paid by the Fund. Brokerage charges for purchasing shares through the Plan are expected to be less than the usual brokerage charges for individual transactions, because the Plan Agent will purchase stock for all participants in blocks, resulting in lower commissions for each individual participant.

For purchases from voluntary cash payments, participants are charged a service fee of \$.75 for each investment and a pro rata share of the brokerage commissions.

Brokerage commissions and service fees, if any, will be deducted from amounts to be invested.

WHAT ARE THE TAX IMPLICATIONS FOR PARTICIPANTS?

You will receive tax information annually for your personal records and to help you prepare your federal income tax return. The automatic reinvestment of dividends and capital gains distributions does not relieve you of any income tax which may be payable on dividends or distributions.

If the Fund issues shares upon reinvestment of a dividend or capital gains distribution, for U.S. federal income tax purposes, the amount reportable in respect of the reinvested amount of the dividend or distribution will be the fair market value of the shares received as of the payment date, which will be reportable as ordinary dividend income and/or long term capital gains. The shares will have a tax basis equal to such fair market value, and the holding

period for the shares will begin on the day after the payment date. State, local and foreign taxes may also be applicable.

ONCE ENROLLED IN THE PLAN, MAY I WITHDRAW FROM IT?

You may withdraw from the Plan without penalty at any time by written notice to the Plan Agent.

If you withdraw, you will receive, without charge, stock certificates issued in your name for all full shares, or, if you wish, the Plan Agent will sell your shares and send you the proceeds, less a service fee of \$2.50 and less brokerage commissions. The Plan Agent will convert any fractional shares you hold at the time of your withdrawal to cash at the current market price and send you a check for the proceeds.

WHOM SHOULD I CONTACT FOR ADDITIONAL INFORMATION?

If you hold shares in your own name, please address all notices, correspondence, questions, or other communications regarding the Plan to: State Street Bank and Trust Company, P.O. Box 8200, Boston, MA 02266, 1-800-426-5523. If your shares are not held in your name, you should contact your brokerage firm, bank, or other nominee for more information and to arrange for them to participate in the Plan on your behalf.

Either the Fund or the Plan Agent may amend or terminate the Plan. Except in the case of amendments necessary or appropriate to comply with applicable law, rules or policies or a regulatory authority, participants will be mailed written notice at least 90 days before the effective date of any amendment. In the case of termination, participants will be mailed written notice at least 90 days before the record date of any dividend or capital gains distribution by the Fund.
