performance perspective

Pre 2000

2001 - 2003

2004 & beyond

Experienced double digit earnings per share growth

Strong economy in the Southeast

Solid equity markets

Investments in capital markets and growth in large corporate loans paid off as credit losses remained low

Southeast economy not immune to economic slowdown

Record corporate charge offs, created negative impact to many financial institutions including SunTrust

Shift in portfolio toward asset sensitivity, coupled with a shorter-term duration & assuming a rising rate environment, resulted in margin pressures

Economic rebound, stock market improvement and rising rates augur well for future performance

Focus is on execution of our model and strategies; momentum evident
