SAFE HARBOR STATEMENT

All statements, trend analyses and other information contained in this report relative to markets for our products and trends in our operations or financial results, as well as other statements including words such as anticipate, believe, plan, estimate, expect, intend, and other similar expressions, constitute forward-looking statements under the Private Securities Litigation Reform Act of 1995. Factors that may cause our actual results to differ materially from those contemplated by these forward-looking statements include, among others, the following possibilities:

(a) general economic conditions and other factors, including prevailing interest rate levels and stock and bond market performance, which may affect our ability to sell our products, the market value of our investments and the lapse rate and profitability of policies; (b) our ability to achieve anticipated levels of operational efficiencies and cost-saving initiatives and to meet cash requirements based upon projected liquidity sources; (c) customer response to new products, distribution channels and marketing initiatives; (d) mortality, morbidity, and other factors which may affect the profitability of our insurance products; (e) our ability to develop and maintain effective risk management policies and procedures and to maintain adequate reserves for future policy benefits and claims; (f) changes in the federal income tax and other federal laws, regulations, and interpretations, including currently proposed federal measures that may significantly affect the insurance business including limitations on antitrust immunity, minimum solvency requirements, and changes to the tax advantages of life insurance and annuity products or programs with which they are used; (g) increasing competition in the sale of insurance and annuities and the recruitment of sales representatives; (h) regulatory changes, interpretations or pronouncements, including those relating to the regulation of insurance companies and the regulation and sale of their products; (i) our ratings and those of our subsidiaries by independent rating organizations which we believe are particularly important to the sale of our products; (j) the performance of our investment portfolios; (k) the impact of changes in standards of accounting; (l) our ability to integrate the business and operations of acquired entities; (m) expected protection products and accumulation products margins; (n) the impact of anticipated investment transactions; and (o) unanticipated litigation or regulatory investigations or examinations.

There can be no assurance that other factors not currently anticipated by us will not materially and adversely affect our results of operations. You are cautioned not to place undue reliance on any forward-looking statements made by us or on our behalf. Forward-looking statements speak only as of the date the statement was made. We undertake no obligation to update or revise any forward-looking statement.

AMERUS GROUP CO.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

(1) CONSOLIDATION AND BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States (GAAP) for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for annual financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. All adjustments were of a normal recurring nature, unless otherwise noted in the Notes to Consolidated Financial Statements. Operating results for the six months ended June 30, 2003 are not necessarily indicative of the results that may be expected for the year ending December 31, 2003. The consolidated balance sheet at December 31, 2002 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by GAAP for complete financial statements. For further information and for capitalized terms not defined in this Form 10-Q, refer to the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2002.

The accompanying consolidated financial statements include the accounts and operations of the Company and its wholly-owned subsidiaries, principally AmerUs Life Insurance Company (ALIC), AmerUs Annuity Group Co. (AAG), AmerUs Capital Management Group, Inc. (ACM), and ILICO Holdings, Inc., the holding company of Indianapolis Life Insurance Company (ILIC) and its subsidiaries (collectively, ILICO). Effective June 30, 2003, IL Annuity and Insurance Company (IL Annuity), a wholly-owned subsidiary of ILIC, was merged into ILIC. All significant intercompany transactions and balances have been eliminated in consolidation.

The Company has certain stock-based employee compensation plans which are accounted for under the recognition and measurement principles of APB Opinion No. 25, Accounting for Stock Issued to Employees, and related interpretations. The plans are stock option plans for which no stock-based employee compensation cost is reflected in net income, as all options granted under those plans had an exercise price equal to the market value of the underlying common stock on the date of grant. The following table illustrates the effect on net income and earnings per share if the Company had applied the fair value recognition provisions of Statement of Financial Accounting Standards (SFAS) 123, Accounting for Stock-Based Compensation, to stock-based employee compensation (\$ in thousands, except share data):

	For The Three Months Ended June 30,		For The Six Months Ended June 30,	
	2003	2002	2003	2002
Net income, as reported	\$ 43,711	\$ 4,262	\$ 79,501	\$ 29,176
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards, net of related tax effects	(980)	(997)	(2,078)	(3,102)
Pro forma net income	\$ 42,731	\$ 3,265	\$ 77,423	\$ 26,074
Earnings per share:				
Basic - as reported	\$ 1.12	\$ 0.11	\$ 2.03	\$ 0.72
Basic - pro forma	\$ 1.09	\$ 0.08	\$ 1.98	\$ 0.64
Diluted - as reported	\$ 1.11	\$ 0.10	\$ 2.02	\$ 0.71
Diluted - pro forma	\$ 1.08	\$ 0.08	\$ 1.97	\$ 0.63

Table of Contents

Certain amounts in the 2002 financial statements have been reclassified to conform to the 2003 financial statement presentation.

(2) EARNINGS PER SHARE

Basic earnings per share of common stock are computed by dividing net income by the weighted-average number of common shares outstanding during the period. Diluted earnings per share assumes the issuance of common shares applicable to stock options and warrants calculated using the treasury stock method.

Diluted earnings per share applicable to the Company's Optionally Convertible Equity-linked Accreting Notes (OCEANSM) are determined using the if-converted method for the number of days in the period in which the common stock price conversion condition is met. The common stock price conversion condition was not met for the six months ended June 30, 2003 and 2002. No undistributed net income has been allocated to the convertible securities holders since their participation in dividends with common stockholders is limited to the amount of the annual regular dividend.

Diluted earnings per share applicable to the Company's PRIDESSM securities are determined using the treasury stock method as it is currently anticipated that holders of the PRIDES are more likely to tender cash in the future for the securities' forward contract. The PRIDES did not have any dilution impact for earnings per share for the six months ended June 30, 2003.

(3) CLOSED BLOCK

The Company has established two closed blocks, which we refer to as the Closed Block. The first was established on June 30, 1996 in connection with the reorganization of ALIC from a mutual company to a stock company. The second was established as of March 31, 2000 in connection with the reorganization of ILIC from a mutual company to a stock company. Insurance policies which had a dividend scale in effect as of each Closed Block establishment date were included in the Closed Block. The Closed Block was designed to provide reasonable assurance to owners of insurance policies included therein that, after the reorganization of ALIC and ILIC, assets would be available to maintain the dividend scales and interest credits in effect prior to the reorganization if the experience underlying such scales and credits continues.

Summarized financial information of the Closed Block as of June 30, 2003 and December 31, 2002 and for the three months and six months ended June 30, 2003 and 2002 are as follows:

Table of Contents**(4) DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES**

The Company accounts for derivatives as provided by Statement of Financial Accounting Standard (SFAS) 133 Accounting for Derivative Instruments and Hedging Activities, as amended by SFAS 137 and SFAS 138, which requires that all derivative instruments, including certain derivative instruments embedded in other contracts, be reported on the balance sheet at fair value. Accounting for gains and losses resulting from changes in the values of derivatives is dependent upon the use of the derivative and its qualification for special hedge accounting.

During the first six months of 2003 and 2002, realized/unrealized gains (losses) on investments included an unrealized gain of \$15.4 million and an unrealized loss of \$34.8 million, respectively, from the change in fair value on call options used as a natural hedge of embedded options within equity-indexed products. Additionally, the first six months of 2003 and 2002 included an unrealized gain of \$19.6 million and an unrealized loss of \$19.5 million, respectively, from the change in fair value on the trading securities backing the total return strategy products. Policyowner benefits included an offsetting adjustment to (increase) reduce contract liabilities for fair value changes in options embedded within the equity-indexed products and fair value changes on total return strategy annuity contracts of \$(27.2) million and \$35.9 million for the first six months of 2003 and 2002, respectively. AOCI included an unrealized gain of \$1.8 million and \$0.3 million from the fair value change in interest rate swaps used to hedge the floating rate funding agreement liability during the first six months of 2003 and 2002, respectively. In 2002, the Company undesignated a cash flow hedge and is now amortizing the amount in AOCI to earnings over the remaining life of the swap, which amounted to \$2.5 million and \$0.7 million in expense in the first six months of 2003 and 2002, respectively. The Company estimates that \$1.4 million of after-tax derivative losses, included in AOCI will be reclassified into earnings within the next twelve months.

The following table summarizes the income (loss) impact of the market value adjustments on trading securities and derivatives and the cash flow hedge amortization for the first six months ended June 30, 2003 and 2002:

	For The Six Months Ended June 30, 2003	2002
	(\$ in thousands)	
Fixed maturity securities held for trading	\$ 19,608	\$(19,450)
Options on equity-indexed products	15,419	(34,786)
Equity-indexed and total return strategy liabilities	(27,209)	35,867
Cash flow hedge amortization	(2,478)	(697)
DAC amortization impact of net adjustments above	(609)	(2,662)
	Pre-tax total	(21,728)
	4,731	7,605
Income taxes	(1,656)	7,605
	After-tax total	\$ (14,123)
	\$ 3,075	\$ (14,123)

Table of Contents**(5) NOTES PAYABLE**

Notes payable consist of the following:

	June 30, 2003	December 31, 2002
	(\$ in thousands)	
Federal Home Loan Bank community investment long-term advances maturing at various dates through June 12, 2012	\$ 13,609	\$ 13,871
OCEANs due on March 6, 2032	186,978	186,233
PRIDES notes (A)	143,750	
Senior notes bearing interest at 6.95% due June, 2005	125,000	125,000
Revolving credit agreement	10,000	113,000
Surplus notes bearing interest at 8.66% due on April 11, 2011	25,000	25,000
AmerUs Capital I 8.85% Capital Securities Series A due February 1, 2007	48,095	48,095
AmerUs Capital II 7.00% Quarterly Income Preferred Securities due July 27, 2003	154	154
	<u>\$552,586</u>	<u>\$511,353</u>

(A) On May 28, 2003, the Company issued \$125.0 million of PRIDES which were registered on Form S-3 filed with the Securities and Exchange Commission. On June 5, 2003, the underwriters exercised their over-allotment option in full and the Company issued an additional \$18.8 million of PRIDES. The PRIDES initially consist of a \$25 senior note and a contract requiring the holder to purchase the Company's common stock. The note has a minimum term of 4.75 years, which may be extended by the Company in certain circumstances. The PRIDES have quarterly payments of interest at an annual rate of 5.5 percent and quarterly contract adjustment payments at an annual rate of 0.75 percent, both payable on February 16, May 16, August 16 and November 16 of each year, commencing August 16, 2003. Under the purchase contract, holders of each contract are required to purchase the Company's common stock on the settlement date of August 16, 2006 based on a specified settlement rate, which will vary according to the applicable market value of the Company's common stock at the settlement date. The value of the common stock to be issued upon settlement of each purchase contract will not exceed \$25, the stated value of the PRIDES, unless the applicable market value of the Company's common stock (which is measured by the common stock price over a 20-day trading day period) increases to more than \$33.80 per share. The present value of the contract adjustment payments, amounting to \$2.9 million, has been reflected as an other liability with a corresponding charge to additional paid-in capital. Subsequent contract adjustment payments will be allocated between the liability and interest expense based on a constant rate over the life of the PRIDES. Expenses incurred with the offering were allocated

Table of Contents

between the senior notes and the purchase contracts. The expenses allocated to the senior notes, amounting to \$0.7 million, have been capitalized and will be recognized as interest expense over the term of the notes. The amount allocated to the purchase contracts, totaling \$4.2 million, was charged to additional paid-in capital.

(6) FEDERAL INCOME TAXES

The effective income tax rate for the three months and six months ending June 30, 2003 and 2002, respectively, varied from the prevailing corporate rate primarily as a result of tax-exempt income in 2003 and non-deductible demutualization costs, low income housing and rehabilitation credits, and tax-exempt income in 2002.

(7) RESTRUCTURING CHARGES

During the third quarter of 2001, the Company began consolidating various functions in connection with a restructuring of its protection products and accumulation products operations and investment activities. The objective of the restructuring plan is to eliminate duplicative functions for all business units and to reduce ongoing costs. Corporate administrative functions are being transitioned so they are performed primarily in Des Moines, Iowa. Protection products administrative processes are being transitioned so they are performed primarily in Des Moines; Woodbury, New York; or outsourced. Accumulation products functions have been transitioned so they are primarily performed in Topeka, Kansas. Investment activities have been restructured to eliminate certain real estate management services which have been outsourced.

The Company has listed its office building located in Indianapolis, Indiana, with a real estate broker. During the second quarter of 2003, the Company began to substantially vacate this location as a result of the position eliminations taking place. In addition, the Company also selected a new location in the second quarter of 2003 for those employees who are going to continue to work in Indianapolis. The new space is to be ready for occupancy sometime during August 2003, at which time the majority of the remaining Indianapolis employees will move to the new location. On June 30, 2003, the Company determined that the plan of sale criteria in SFAS 144, Accounting for the Impairment or Disposal of Long-Lived Assets, had been met. Accordingly, the carrying value of the building was adjusted to its fair value less costs to sell, amounting to \$15.5 million, which was based upon comparable properties recently marketed in Indianapolis. The resulting \$7.7 million pre-tax impairment loss has been recorded as restructuring costs in the consolidated statement of income. The carrying value of the building that is held for sale is included in the other assets line item of the consolidated balance sheet.

During the second quarter of 2003, the Company initiated and executed a restructuring plan to merge one of its subsidiaries, IL Annuity, into its parent, ILIC. The merger was effective June 30, 2003 and total restructuring costs associated with this plan amounted to \$2.4 million pre-tax, which primarily consisted of legal, accounting, and printing costs and the write off of \$2.2 million of insurance licenses.

Restructuring charges have been included in operating expenses in the consolidated statement of income and include severance and termination benefits for additional benefits provided to previously terminated individuals during the first six months of 2003 and benefits associated with the elimination of approximately 80 positions for the six months ended June 30, 2002. The other costs in the six months ended June 30, 2003, primarily related to the impairment loss on the Indianapolis office building, expenses associated with the merger of IL Annuity into ILIC, and systems conversion costs. Other costs in the six months ended June 30, 2002, primarily consisted of systems conversion and relocation of employees. A summary of the pre-tax restructuring charges are as follows (\$ in thousands):

Table of Contents

	Accrual at December 31, 2002	2003 Charge	Other Adjustments	Payments and Write-downs	Accrual at June 30, 2003
Severance and termination benefits	\$ 5,133	\$ 913	\$ (77)	\$ (2,937)	\$ 3,032
Other costs	1,012	15,028		(15,834)	206
	<u>6,145</u>	<u>15,941</u>	<u>(77)</u>	<u>(18,771)</u>	<u>3,238</u>

	Accrual at December 31, 2001	2002 Charge	Other Adjustments	Cash Payments	Accrual at June 30, 2002
Severance and termination benefits	\$ 2,065	\$ 5,373	\$ (77)	\$ (4,809)	\$ 2,552
Other costs	36	3,130	(215)	(2,895)	56
	<u>2,101</u>	<u>8,503</u>	<u>(292)</u>	<u>(7,704)</u>	<u>2,608</u>

Additional charges will be incurred for continuing restructuring activities primarily involving severance or relocation benefits for affected employees and various administrative, financial, and actuarial system conversion costs. Expenditures for all restructuring activities are expected to be completed by the fourth quarter of 2003.

(8) COMMITMENTS AND CONTINGENCIES

In recent years, the life insurance industry, including the Company and its subsidiaries, have been subject to an increase in litigation pursued on behalf of purported classes of insurance purchasers, questioning the conduct of insurers in the marketing of their products. The Company is often involved in litigation and other proceedings, including class actions, reinsurance claims and regulatory proceedings, arising in the ordinary course of its business. Some of these claims and legal actions are in jurisdictions where juries are given substantial latitude in assessing damages, including punitive damages. Although no assurances can be given and no determinations can be made at this time, the Company believes that the ultimate liability, if any, with respect to these claims and legal actions, would have no material effect on its results of operations and financial position.

(9) SIGNIFICANT SECOND QUARTER TRANSACTIONS

During the second quarter of 2003, one of the Company's subsidiaries, IL Annuity, settled an arbitration with a reinsurer on a block of its annuity business and amended its reinsurance agreement with that reinsurer. In conjunction with those actions, the Company released a liability (which had been accrued as part of the Company's acquisition of ILICO) related to the reinsurance arrangement in the pre-

Table of Contents

tax amount of \$8.2 million. The release of the liability has been recorded as an offset to underwriting, acquisition and other expenses.

During the second quarter of 2003, as part of the Company's continuing review of the Closed Block, the Company identified that the settlements provided for under the reinsurance agreement between the open and closed block of business at ILIC had been incorrectly processed. The error impacted the Company's financial statements over the period from May 2001 through March 2003 by incorrectly increasing pre-tax income by \$4.3 million. As the Company has determined that the error was not material to any prior individual quarter or annual financial statements, the Company has recorded the impact of the error in its second quarter of 2003 financial statements.

(10) OPERATING SEGMENTS

The Company has two operating segments: Protection Products and Accumulation Products. Products generally distinguish a segment. A brief description of each segment follows:

Protection Products. The primary product offerings consist of interest-sensitive whole life, term life, universal life and equity-indexed life insurance policies. These products are marketed on a national basis primarily through a Preferred Producer agency system, a Personal Producing General Agent (PPGA) distribution system and Independent Marketing Organizations (IMOs).

Accumulation Products. The primary product offerings consist of individual fixed annuities and equity-indexed annuities, marketed on a national basis primarily through IMOs and independent brokers, and insurance contracts issued through funding agreements.

The Company uses the same accounting policies and procedures to measure operating segment income and assets as it uses to measure its consolidated income from operations and assets with the exception of the elimination of certain items which management believes are not necessarily indicative of overall operating trends. These items are shown between adjusted pre-tax operating income and income from continuing operations on the following operating segment tables and are as follows:

- 1) Realized gains and losses on open block investments.
- 2) Market value changes and amortization of assets and liabilities associated with the application of SFAS 133, such as:
 - Unrealized gains and losses on open block options and securities held for trading.
 - Change in option value of equity-indexed products and market value adjustments on total return strategy annuities.
 - Cash flow hedge amortization.
- 3) Amortization of deferred policy acquisition costs (DAC) and value of business acquired (VOBA) related to the realized gains and losses on the open block investments and the SFAS 133 adjustments.
- 4) Demutualization costs.
- 5) Restructuring costs.
- 6) Non-recurring reinsurance adjustments.
- 7) Other income from non-insurance operations.

These items will fluctuate from period to period depending on the prevailing interest rate and economic environment, or are not continuing in nature, or are not part of the core insurance operations. As a result, management believes they do not reflect the Company's ongoing earnings capacity of its operating segments.

Premiums, product charges, policyowner benefits, insurance expenses, amortization of DAC and VOBA and dividends to policyowners are attributed directly to each operating segment. Net investment

Table of Contents

income and closed block realized gains and losses on investments are allocated based on directly-related assets required for transacting the business of that segment. Other revenues and benefits and expenses which are deemed not to be associated with any specific segment are grouped together in the All Other category. These items primarily consist of holding company revenues and expenses and the operations of the Company's real estate management subsidiary.

Assets are segmented based on policy liabilities directly attributable to each segment. There are no significant intersegment transactions. Depreciation and amortization, excluding amortization of DAC and VOBA as previously discussed, are not significant. There have been no material changes in segment assets since December 31, 2002.

Table of Contents**Item 2. Management's Discussion And Analysis Of Financial Condition And Results Of Operations**

The following analysis of the consolidated results of operations and financial condition of AmerUs Group Co. should be read in conjunction with the consolidated financial statements and related notes.

RESULTS OF OPERATIONS

We are a holding company whose subsidiaries are primarily engaged in the business of marketing, underwriting and distributing a broad range of individual life, annuity and insurance deposit products to individuals and businesses in 50 states, the District of Columbia and the U.S. Virgin Islands. We have two reportable operating segments: protection products and accumulation products. The primary offerings of the protection products segment are interest-sensitive whole life, term life, universal life and equity-indexed life insurance policies. The primary offerings of the accumulation products segment are individual fixed annuities and funding agreements.

FINANCIAL HIGHLIGHTS

Our financial highlights are as follows:

Net income	\$ 43,711	\$ 4,262	\$ 79,501	\$ 29,176
Diluted earnings per share	\$ 1.11	\$ 0.10	\$ 2.02	\$ 0.71
	June 30, 2003	December 31, 2002		
Total assets	\$ 21,846,715	\$ 20,293,665		
Stockholders' equity	\$ 1,416,340	\$ 1,262,948		

(A) Non-segment expense, net consists primarily of open block gains and losses, SFAS 133 related market value adjustments, non-insurance operations, non-recurring reinsurance adjustments, restructuring costs, interest expense and income taxes.

Operating segment income increased for the protection products segment in the 2003 periods, compared to the respective periods in 2002. The increase in our protection products pre-tax operating segment income was primarily

Table of Contents

attributable to increased product margins. The increase was partially offset by higher DAC and VOBA amortization expense resulting from the increased product margins. Operating income for the accumulation products segment decreased in the three months and increased in the six months ended June 30, 2003 as compared to the respective periods in 2002. Our accumulation products pre-tax operating segment income decreased for the three months ended June 30, 2003 compared to the same period in 2002 primarily due to decreased spreads and lower contributions from IMO operations.

Net income increased in the 2003 periods compared to the respective 2002 periods primarily due to increased realized gains on open block investments and increased net unrealized gains from SFAS 133 related market value adjustments on trading securities, derivatives and certain equity-indexed contracts.

Total assets increased \$1.6 billion during the first six months of 2003 primarily as a result of additional invested assets under management and the utilization of securities lending arrangements and dollar-roll repurchase investment transactions. Assets also increased due to higher reinsurance receivables as more business is subject to reinsurance coverages as a result of additional treaties entered into in the fourth quarter of 2002.

Stockholders' equity increased \$153.4 million for the first six months of 2003 primarily as a result of year-to-date net income of \$79.5 million and the increase in accumulated other comprehensive income for unrealized investment gains of \$73.8 million.

PROTECTION PRODUCTS

Our protection products segment primarily consists of interest-sensitive whole life, term life, universal life and equity-indexed life insurance policies. These products are marketed on a national basis primarily through a Preferred Producer agency system, PPGA distribution system and IMOs. Included in protection products is the closed block of ALIC and the closed block of ILIC established when the companies reorganized from mutual companies to stock companies. When protection products are sold, we invest the premiums we receive in our investment portfolio and establish a liability representing our commitment to the policyholder. We manage investment spread by seeking to maximize the return on these invested assets, consistent with our asset/liability and credit quality needs. We enter into reinsurance arrangements in order to reduce the effects of mortality risk and the statutory capital strain from writing new business. All income statement line items are presented net of reinsurance amounts. Protection products in force totaled \$83.3 billion at June 30, 2003 and \$80.6 billion at December 31, 2002. Protection products in force is a non-GAAP financial measure utilized by investors, analysts and the Company to assess the Company's position in the industry. We do not believe there is a comparable GAAP financial measure. A summary of our protection products segment operations follows:

Table of Contents

	For The Three Months Ended June 30,		For The Six Months Ended June 30,	
	2003	2002	2003	2002
(\$ in thousands)				
Revenues:				
Insurance premiums	\$ 76,512	\$ 90,135	\$ 156,673	\$ 178,692
Product charges	42,441	24,292	76,142	53,319
Net investment income	80,706	83,418	164,452	163,843
Realized gains (losses) on closed block investments	275	(5,378)	7,344	(754)
Other income	993	992	2,046	1,945
Total revenues	200,927	193,459	406,657	397,045
Benefits and expenses:				
Policyowner benefits	92,614	106,226	193,282	210,034
Underwriting, acquisition and other expenses	23,812	23,702	41,616	45,281
Amortization of DAC and VOBA, net of open block gain/loss adjustment	20,918	14,506	40,482	28,839
Dividends to policyowners	29,740	19,221	64,314	47,624
Total benefits and expenses	167,084	163,655	339,694	331,778
Adjusted pre-tax operating income - Protection Products segment	\$ 33,843	\$ 29,804	\$ 66,963	\$ 65,267

Adjusted pre-tax operating income from our protection products increased 13.6% in the second quarter of 2003 and 2.6% in the first six months of 2003 compared to the respective 2002 periods. The increase in income was due to higher product margins, which was partially offset by increased DAC and VOBA amortization. The key drivers of our protection products business include sales, persistency, net investment income, mortality and expenses.

Sales. Sales are presented as annualized premium, which is measured in accordance with industry practice, and represent the amount of new business sold during the period. Sales are a non-GAAP financial measure for an insurance company for which there is no comparable GAAP financial measure. We use sales to measure the productivity of our distribution network and as a basis for compensation of sales and marketing employees and agents. Sales are also a leading indicator of future revenue trends. However, revenues are driven by prior period sales as well as current period sales and therefore, a reconciliation of sales to revenues would not be meaningful or determinable. The following table summarizes annualized premium by life insurance product:

	For The Three Months Ended June 30,		For The Six Months Ended June 30,	
	2003	2002	2003	2002
(\$ in thousands)				
Traditional life insurance:				
Whole life	\$ 18	\$ 1,140	\$ 220	\$ 2,260
Interest-sensitive whole life	5,818	11,282	12,838	21,486
Term life	3,628	5,967	7,340	8,515
Universal life	9,438	6,399	16,378	14,725
Equity-indexed life	11,750	12,095	25,227	20,760
Direct first year annualized premiums	30,652	36,883	62,003	67,746
Private label term life premiums	1,756	1,048	3,693	4,644
Total	\$ 32,408	\$ 37,931	\$ 65,696	\$ 72,390

Direct first year annualized premiums decreased 16.9% in the second quarter and 8.5% on a year-to-date basis in 2003 compared to the same periods in 2002. We experienced a temporary decline in sales early in the second quarter of 2003, but results have improved during the later part of the quarter. In addition, in the second quarter of 2002, we experienced our highest quarterly sales level in our history. We continue to focus our marketing efforts on equity-indexed life products. In the first six months of 2003, sales of equity-indexed life products

Table of Contents

were \$25.2 million as compared to \$20.8 million for 2002. We are a leading writer of equity-indexed life products in the United States.

Premiums and Product charges. We recognize premiums on traditional life insurance policies as revenues when the premiums are due. Amounts received as payments for universal life and equity-indexed life insurance policies are not recorded as premium revenue, but are instead recorded as a policyholder liability. Revenues from the universal life and equity-indexed life policies consist of product charges for the cost of insurance, policy administration and policy surrender and are included on the line item product charges. All revenue is reported net of reinsurance ceded.

Insurance premium revenue was lower in the second quarter and first six months of 2003 as compared to the same periods in 2002 primarily due to lower sales of traditional products and from new reinsurance agreements in place. Product charge revenue was higher in the second quarter and first six months of 2003 as compared to the same periods in 2002 due to the growth in the equity-indexed life block of business and fluctuations in reinsurance premiums between periods.

Persistency. Annualized lapse rates were 6.3 % in the first six months of 2003 compared to 7.7% in the first six months of 2002. Our persistency experience remained within our pricing assumptions.

Net Investment Income. Net investment income decreased for the second quarter and increased for the first six months of 2003 as compared to the same periods a year ago. The decrease in net investment income for the second quarter was a result of record low interest rates. The year-to-date increase was primarily due to growth in assets, partially offset by lower effective yields as compared to 2002. The year-to-date effective yield of the investment portfolio was 6.85% compared to 7.16% a year ago.

Mortality and Benefit Expense. We experienced favorable mortality in the second quarter and first six months of 2003 as compared to the same periods a year ago. In addition, due to the additional reinsurance arrangements we have in place for mortality, policyowner benefits declined in the second quarter and first six months of 2003 compared to the same periods in 2002.

Underwriting, Acquisition and Other Expenses. Expenses decreased for the second quarter and year-to-date periods of 2003 compared to the respective periods in 2002. The decrease was primarily due to increased reimbursement from reinsurers of commission and expense allowances as more policies are subject to reinsurance and from expense changes resulting from the restructuring activities.

Amortization of DAC and VOBA. The amortization of DAC and VOBA increased for the second quarter and year-to-date periods of 2003 as compared to the same periods a year ago. DAC and VOBA are generally amortized in proportion to gross margins, which increased in both periods of 2003 compared to 2002.

Dividends to Policyowners. Dividend expense increased for the second quarter and first six months of 2003 compared to the respective 2002 periods due to the maturing of the closed block and realized investment gains of the closed block. Dividend expense includes increases or decreases to the closed block policyholder dividend obligation liability carried on the consolidated balance sheet. To the extent cumulative actual earnings of the closed block exceed the cumulative expected earnings based on the actuarial calculation at the time of formation of the closed block (which we refer to as the closed block glide path), a policyholder dividend obligation is recorded. The higher realized gains in both periods of 2003 as compared to 2002 increased closed block earnings, which in turn were added to the policyholder dividend obligation liability. In addition, the reinsurance adjustment related to the settlement activity of the closed block caused an increase in the dividend expense and related policyholder dividend obligation liability. See Non-Recurring Expenses for additional information. As a result of this accounting treatment, operating earnings only include the predetermined closed block glide path.

Table of Contents

Outlook. We expect to increase sales through our multiple distribution channels and to continue to shift to higher return products, in particular the equity-indexed life products. We also expect to continue to realize operating efficiencies created by the restructuring of the protection products operations and centralization of our administrative functions.

ACCUMULATION PRODUCTS

Our accumulation products segment primary offerings consist of individual fixed annuities and funding agreements. The fixed annuities are marketed on a national basis primarily through IMOs and independent brokers. Similar to our protection products segment, we invest the premiums we receive from accumulation product deposits in our investment portfolio and establish a liability representing our commitment to our policyholder. We manage investment spread by seeking to maximize the return on our invested assets consistent with our asset/liability management and credit quality needs. When appropriate, we periodically reset the interest rates credited to our policyholder liability. Accumulation products in force totaled \$11.5 billion at June 30, 2003 and \$11.3 billion at December 31, 2002. Accumulation products in force is a non-GAAP financial measure utilized by investors, analysts and the Company to assess the Company's position in the industry. We do not believe there is a comparable GAAP financial measure. A summary of our accumulation products segment operations follows:

	For The Three Months Ended June 30,		For The Six Months Ended June 30,	
	2003	2002	2003	2002
	(\$ in thousands)			
Revenues:				
Immediate annuity and supplementary contract premiums	\$ 1,059	\$ 1,507	\$ 2,242	\$ 2,809
Product charges	8,985	10,724	19,392	20,739
Net investment income	166,122	166,544	333,899	324,887
Other income	2,780	2,956	5,855	5,803
Total revenues	178,946	181,731	361,388	354,238
Benefits and expenses:				
Policyowner benefits	120,861	125,702	245,418	242,392
Underwriting, acquisition and other expenses	6,666	7,878	13,135	15,432
Amortization of DAC and VOBA, net of open block gain/loss adjustment	24,753	20,658	49,040	44,611
Total benefits and expenses	152,280	154,238	307,593	302,435
IMO Operations:				
Other income	12,867	14,941	24,558	22,639
Other expenses	10,113	10,512	19,579	15,956
Net IMO operating income	2,754	4,429	4,979	6,683
Adjusted pre-tax operating income - Accumulation Products segment				
	\$ 29,420	\$ 31,922	\$ 58,774	\$ 58,486

Adjusted pre-tax operating income from our accumulation products operations decreased 7.8% in the second quarter of 2003 and increased 0.5% in the first six months of 2003 compared to the respective 2002 periods. The decrease in the second quarter was primarily due to decreased spreads and lower contribution from IMO operations. The drivers of profitability in our accumulation products business are deposits, persistency, investment spread, expenses and IMO operations.

Deposits. Deposits are presented as collected premiums, which is measured in accordance with industry practice, and represent the amount of new business sold during the period. Deposits are a non-GAAP financial measure for an insurance company for which there is no comparable GAAP financial measure. We use deposits to

Table of Contents

measure the productivity of our distribution network and as a basis for compensation of sales and marketing employees and agents. The following table summarizes our accumulation products segment deposits:

	For The Three Months Ended June 30,		For The Six Months Ended June 30,	
	2003	2002	2003	2002
	(\$ in thousands)			
Annuities				
Fixed annuities:				
Deferred fixed annuities	\$ 101,200	\$ 245,936	\$ 243,862	\$ 470,391
Equity-indexed annuities	367,255	157,137	600,445	326,643
Variable annuities	901	1,818	1,888	4,481
Total Annuities	469,356	404,891	846,195	801,515
Funding agreements		75,000		350,000
Total	469,356	479,891	846,195	1,151,515
Reinsurance assumed				
Reinsurance ceded	(7,551)	(2,905)	(15,619)	(4,382)
Total deposits, net of reinsurance	\$ 461,805	\$ 476,986	\$ 830,576	\$ 1,147,133

Direct annuity deposits increased 5.6% year-to-date for 2003 compared to 2002. The increase was from our sales of equity-indexed annuities as consumers continue to favor these products. We slowed our 2003 deferred fixed annuity sales due to the low interest rate environment and have focused on sales of our higher returning equity-indexed products.

We placed fixed rate funding agreements totaling \$75 million and \$350 million in the second quarter and first six months of 2002, respectively. Funding agreements are insurance contracts for which we receive deposit funds and for which we agree to repay the deposit and a contractual return for the duration of the contract. Total funding agreements as of June 30, 2003 amounted to \$1.125 billion.

Reinsurance ceded increased in the second quarter and first six months of 2003 compared to the respective 2002 periods as we entered into a new modified coinsurance reinsurance agreement in the third quarter of 2002 to cede 25% of certain equity-indexed annuity products.

Product Charges. The deposits we receive on accumulation products are not recorded as revenue but instead as a policyholder liability. Surrender charges are recorded as revenue as an annuity product charge. Annuity product charges decreased in the second quarter and year-to-date periods of 2003 as compared to the respective 2002 periods, due to lower withdrawals of products within the surrender charge period.

Persistency. Withdrawals represent funds taken out of accumulation products by policyowners not including those due to the death of policyowners. Annuity withdrawal rates without internal replacements continued to improve in 2003 and amounted to 8.6% and 10.9% for the first six months of 2003 and 2002, respectively. Annuity withdrawals totaled \$661.1 million and \$812.5 million for the first six months of 2003 and 2002, respectively.

Our withdrawal experience remained within our pricing assumptions. Withdrawal rates declined for the first six months of 2003 as compared to 2002 as our annuity products provide a favorable investment return in this current low interest rate and uncertain equity market environment.

Table of Contents

Investment Spread. Investment results and interest crediting rates were as follows for deferred fixed annuities:

	For The Six Months Ended June 30,	
	2003	2002
Investment yield	6.03%	6.72%
Average crediting rate	4.17%	4.73%
Investment spread	1.86%	1.99%

The investment spread on deferred fixed annuities decreased thirteen basis points to 186 basis points in the first six months of 2003 compared to the first six months of 2002. Crediting rates were lowered throughout 2002 and the first six months of 2003 to correspond with the decline in investment yields caused by lower rates on new and reinvested funds. In addition, during the first quarter of 2003, we held cash in anticipation of better investment opportunities in future periods. This increased the decline in our investment yield in 2003. At June 30, 2003, the account value of deferred fixed annuities totaled \$7.1 billion of which \$2.7 billion did not have a differential between the credited rate and minimum guarantee rate and as such, could not be lowered. Additionally, deferred fixed annuities with account values totaling \$1.2 billion have multi-year interest rate guarantees for which the credited rate cannot be decreased until the end of the multi-year period. At the end of the multi-year guarantee period, we will have the ability to lower the crediting rate to the minimum guaranteed rate by an average of approximately 275 basis points. Also, at June 30, 2003, account values of equity-indexed annuities totaled \$3.8 billion, which provide guaranteed rates based on a cumulative floor over the term of the product. Due to these limitations on the ability to lower interest crediting rates and the potential for additional credit defaults and lower reinvestment rates on investments, we could experience spread compression in future periods.

The level of margins on funding agreements increased \$6.6 million in the first six months of 2003 compared to the first six months of 2002. The increase was primarily due to the \$875 million of the agreements placed throughout 2002.

IMO Operations. IMOs have contractual arrangements to promote our insurance products to their networks of agents and brokers. Additionally, they also contract with third party insurance companies. We own five such IMOs. The income from IMO operations primarily represents annuity commissions received by our IMOs from those third party insurance companies. Net IMO operating income decreased \$1.7 million between the first six months of 2003 and the first six months of 2002 due to increased expenses.

Outlook. We anticipate increased product sales from our IMOs but decreased product sales from other distribution channels as we manage our sales in this current low interest rate environment. We also expect to continue the shift of our product mix to higher return products, in particular the equity-indexed annuity products. In addition, we will continue to manage our spreads as we strive for our desired profitability in this economic environment.

OTHER

The other segment primarily consists of holding company revenues and expenses and operations of our real estate management subsidiary. The adjusted pre-tax operating loss in the first six months of 2003 decreased as compared with the first six months of 2002 due to higher investment income of our real estate management subsidiary.

Table of Contents**INCOME STATEMENT RECONCILIATION**

A reconciliation of our segment pre-tax operating income to net income as shown in our consolidated statements of income follows:

	For The Three Months Ended June 30,		For The Six Months Ended June 30,	
	2003	2002	2003	2002
(\$ in thousands)				
Segment pre-tax operating income:				
Protection Products	\$ 33,843	\$ 29,804	\$ 66,963	\$ 65,267
Accumulation Products	29,420	31,922	58,774	58,486
Other operations	169	(722)	(1,735)	(2,993)
Total segment pre-tax operating income	63,432	61,004	124,002	120,760
Non-segment items - increases (decreases) to income:				
Realized and unrealized losses on assets and liabilities:				
Realized gains (losses) on open block investments	16,374	(35,755)	24,453	(45,633)
Unrealized gains (losses) on open block options and trading investments	42,320	(34,778)	35,027	(54,236)
Change in option value of equity-indexed products and market value adjustments on total return strategy annuities	(35,811)	20,736	(27,209)	35,867
Cash flow hedge amortization	(1,065)	(697)	(2,478)	(697)
Amortization of DAC & VOBA due to open block realized gains and losses	(3,907)	6,840	(10,452)	5,286
Non-recurring income (expenses):				
Reinsurance adjustments	3,854		3,854	
Demutualization costs		(179)		(464)
Restructuring costs	(12,670)	(6,416)	(15,864)	(8,211)
Other income from non-insurance operations	1,118	540	2,326	996
Income from continuing operations	73,645	11,295	133,659	53,668
Interest expense	(7,575)	(6,337)	(14,374)	(12,364)
Income tax expense	(22,359)	(696)	(39,784)	(12,128)
Net income	\$ 43,711	\$ 4,262	\$ 79,501	\$ 29,176

Realized and Unrealized Gains (Losses) on Assets and Liabilities. Realized gains (losses) on open block investments will fluctuate from period to period depending on the prevailing interest rate, the economic environment and the timing of investment sales. The realized losses on open block investments, amounting to \$35.8 million in the second quarter of 2002 and \$45.6 million the first six months of 2002, primarily consisted of realized losses and writedowns on investments mainly related to Worldcom, Inc. and its related entities.

Unrealized losses on open block investments are generated from our options and trading securities. We use options to hedge our equity-indexed products. In accordance with SFAS 133, we adjusted our options to market value, which, due to the economic environment and stock market conditions, resulted in an unrealized gain of \$25.0 million and \$15.4 million in the second quarter and first six months of 2003, respectively, and an unrealized loss of \$28.0 million and \$34.8 million in the second quarter and first six months of 2002, respectively. In addition, we also have trading securities that back our total return strategy fixed annuity products. The market value adjustment on the trading securities resulted in a gain of \$17.3 million and \$19.6 million in the second quarter and first six months of 2003, respectively, and a loss of \$6.8 million and \$19.4 million in the second quarter and first six months of 2002, respectively. Most of the unrealized gains and losses on the options and trading securities are offset by similar adjustments to the option portion of the equity-indexed product reserves and to the total return strategy annuity reserves. The reserve adjustments are reflected in policyowner benefits expense in the consolidated statements of income and are included in the fair value change of (\$35.8) million and (\$27.2) million in the second quarter and first

Table of Contents

six months of 2003, respectively, and \$20.7 million and \$35.9 million in the second quarter and first six months of 2002, respectively, explained in the following paragraph.

The fair value change in options embedded within our equity-indexed products and the fair value changes on our total return strategy fixed annuity contracts are being recorded in accordance with SFAS No. 133. As previously discussed, these fair value changes are offset by similar adjustments to unrealized gains (losses) on investments related to the fair value changes on the options that hedge the equity-indexed products and on the trading securities that back the total return strategy products.

Non-recurring Income (Expenses). Reinsurance related adjustments consist of the release of a \$8.2 million liability in conjunction with the settlement and amendment of a reinsurance arrangement and a \$4.3 million true-up of pre-2003 reinsurance settlements under a reinsurance arrangement between ILIC open block and closed block.

Restructuring costs relate to our consolidation of various functions in connection with a restructuring of our protection products and accumulation products operations and investment activities which began in the third quarter of 2001. The objective of the restructuring plan is to eliminate duplicative functions for all business units and to reduce on-going operating costs. Corporate administrative functions are being transitioned so they are performed primarily in Des Moines, Iowa. Protection products administration processes are being transitioned so they are performed in Des Moines; Woodbury, New York; or outsourced. Accumulation products functions have been transitioned to Topeka, Kansas. Investment activities have been restructured to eliminate certain real estate management services which have been outsourced.

The Company listed its office building located in Indianapolis, Indiana, with a real estate broker. During the second quarter of 2003, the Company has begun to substantially vacate this location as a result of the position eliminations taking place. In addition, the Company also selected a new location in the second quarter of 2003 for those employees who are going to continue to work in Indianapolis. The new space is to be ready for occupancy sometime during August 2003, at which time the majority of the remaining Indianapolis employees will move to the new location. On June 30, 2003, the Company determined that the plan of sale criteria in SFAS 144, Accounting for the Impairment or Disposal of Long-Lived Assets, had been met. Accordingly, the carrying value of the building was adjusted to its fair value less costs to sell, amounting to \$15.5 million, which was based upon comparable properties recently marketed in Indianapolis. The resulting \$7.7 million pre-tax impairment loss has been recorded as restructuring costs in the consolidated statement of income. The carrying value of the building that is held for sale is included in the other assets line item of the consolidated balance sheet.

During the second quarter of 2003, the Company initiated and executed a restructuring plan to merge one of its subsidiaries, IL Annuity, into its parent, ILIC. The merger was effective June 30, 2003 and total restructuring costs associated with this plan amounted to \$2.4 million pre-tax, which primarily consisted of legal, accounting, and printing costs and the write off of \$2.2 million of insurance licenses.

The restructuring charges expensed in the first six months of 2003 included pre-tax severance and termination benefits of \$0.8 million for severance accrual adjustments and other pre-tax costs of \$15.0 million primarily related to the impairment loss on the Indianapolis office, expenses associated with the merger of IL Annuity into ILIC, and systems conversion costs. For the first six months of 2002, restructuring charges included pre-tax severance and termination benefits of \$5.3 million for the elimination of approximately 80 positions and other pre-tax costs of \$2.9 million. An accrual for severance and termination benefits not yet paid amounted to \$3.2 million at June 30, 2003. Additional charges will be incurred for continuing restructuring activities primarily involving severance or relocation benefits for affected employees and various administrative, financial and actuarial system conversion costs. Expenditures for all restructuring activities are expected to be completed by the fourth quarter of 2003.

Interest expense increased for the second quarter and year-to-date periods of 2003 as compared to the same periods a year ago. The increase was primarily due to interest associated with the PRIDESSM securities of \$125 million issued in the second quarter of 2003.

Table of Contents

Liquidity And Capital Resources

AmerUs Group Co.

As a holding company, AmerUs Group Co.'s cash flows from operations consist of dividends from subsidiaries, if declared and paid, interest from income on loans and advances to subsidiaries (including a surplus note issued to us by ALIC), investment income on our assets and fees which we charge our subsidiaries, offset by the expenses incurred for debt service, salaries and other expenses.

We intend to rely primarily on dividends, interest income and fees from our insurance subsidiaries in order to make dividend payments to our shareholders. The payment of dividends by our insurance subsidiaries is regulated under various state laws. Generally, under the various state statutes, our insurance subsidiaries' dividends may be paid only from the earned surplus arising from their respective businesses and must receive the prior approval of the respective state regulators to pay any dividend that would exceed certain statutory limitations. The current statutes generally limit any dividend, together with dividends paid out within the preceding 12 months, to the greater of (i) 10% of the respective company's policyowners' statutory surplus as of the preceding year end or (ii) the statutory net gain from operations for the previous calendar year. Generally, the various state laws give the state regulators discretion to approve or disapprove requests for dividends in excess of these limits. Based on these limitations and 2002 results, our life insurance subsidiaries could pay us an estimated \$82.3 million in dividends in 2003 without obtaining regulatory approval. Our subsidiaries paid us \$46.6 million in the first six months of 2003. We also consider risk-based capital levels, capital and liquidity operating needs, and other factors prior to paying dividends from the insurance subsidiaries.

We have a \$175 million revolving credit facility with a syndicate of lenders (which we refer to as the Revolving Credit Agreement). As of June 30, 2003, there was a \$10 million outstanding loan balance under the facility. The Revolving Credit Agreement provides for typical events of default and covenants with respect to the conduct of business and requires the maintenance of various financial levels and ratios. Among other covenants, we (a) cannot have a leverage ratio greater than 0.35:1.0, (b) cannot have an interest coverage ratio less than 2.50:1.0, (c) are prohibited from paying cash dividends on common stock in excess of an amount equal to 3% of consolidated net worth as of the last day of the preceding fiscal year, and (d) must cause our insurance subsidiaries to maintain certain levels of risk-based capital. We closely monitor all of these covenants to ensure continued compliance.

On May 28, 2003, we issued \$125 million of PRIDES securities. On June 5, 2003, the underwriters exercised their over-allotment option in full and we issued an additional \$18.8 million of PRIDES. The PRIDES initially consist of a \$25 senior note and a contract requiring the holder to purchase AmerUs Group common stock. The note has a minimum term of 4.75 years, which may be extended by AmerUs Group in certain circumstances. The PRIDES offer quarterly payments at an annual rate of 5.5 percent and quarterly contract adjustment payments at an annual rate of 0.75 percent, both payable on February 16, May 16, August 16 and November 16 of each year, commencing August 16, 2003. Under the purchase contract, holders of each contract are required to purchase AmerUs Group Co. common stock at the settlement date of August 16, 2006 based on a specified settlement rate, which will vary according to the applicable market value of AmerUs Group Co. common stock at the settlement date. The value of AmerUs Group Co. common stock to be issued upon settlement of each purchase contract will not exceed \$25, the stated value of the PRIDES, unless the applicable market value of AmerUs Group Co. common stock (which is measured by the common stock price over a 20-day trading day period) increases to more than \$33.80 per share. The PRIDES were registered with the Securities and Exchange Commission on Form S-3 by means of a prospectus supplement filed on May 22, 2003, as further supplemented on May 23, 2003.

The proceeds from the PRIDES were used to repay borrowings on the Company's Revolving Credit Agreement and for general operating purposes. The senior note component of the PRIDES ranks equally with all other senior debt of the Company.

Table of Contents

Our Board of Directors approved a stock purchase program effective August 9, 2002, under which we may purchase up to three million shares of our common stock at such times and under such conditions, as we deem advisable. The purchases may be made in the open market or by such other means as we determine to be appropriate, including privately negotiated purchases. The purchase program supercedes all prior purchase programs. Approximately 2.3 million shares remain available for repurchase under this program. We consider a variety of factors such as liquidity needs, capital levels and stock price in determining whether to repurchase shares. We do not anticipate any purchases of our common stock in 2003.

We manage liquidity on a continuing basis. One way is to minimize our need for capital. We accomplish this by attempting to use our capital as efficiently as possible and by developing capital-efficient products in our insurance subsidiaries. We also manage our mix of sales by focusing on the more capital-efficient products. In addition, we use reinsurance agreements, where cost-effective, to reduce capital strain in the insurance subsidiaries. We also focus on optimizing the consolidated capital structure to properly balance the levels and sources of borrowing and the issuance of equity securities.

Insurance Subsidiaries

The cash flows of our insurance subsidiaries consist primarily of premium income, deposits to policyowner account balances, income from investments, sales, maturities and calls of investments and repayments of investment principal. Cash outflows are primarily related to withdrawals of policyowner account balances, investment purchases, payment of policy acquisition costs, payment of policyowner benefits, payment of debt, income taxes and current operating expenses. Insurance companies generally produce a positive cash flow from operations, as measured by the amount by which cash flows are adequate to meet benefit obligations to policyowners and normal operating expenses as they are incurred. The remaining cash flow is generally used to increase the asset base to provide funds to meet the need for future policy benefit payments and for writing new business.

Management believes that the current level of cash and available-for-sale and short-term securities, combined with expected net cash inflows from operations, maturities of fixed maturity investments, principal payments on mortgage-backed securities and its insurance products, will be adequate to meet the anticipated short-term cash obligations of the life insurance subsidiaries.

Matching the investment portfolio maturities to the cash flow demands of the type of insurance being provided is an important consideration for each type of protection product and accumulation product. We continuously monitor benefits and surrenders to provide projections of future cash requirements. As part of this monitoring process, we perform cash flow testing of assets and liabilities under various scenarios to evaluate the adequacy of reserves. In developing our investment strategy, we establish a level of cash and securities which, combined with expected net cash inflows from operations, maturities of fixed maturity investments and principal payments on mortgage-backed securities, are believed adequate to meet anticipated short-term and long-term benefit and expense payment obligations. There can be no assurance that future experience regarding benefits and surrenders will be similar to historic experience since withdrawal and surrender levels are influenced by such factors as the interest rate environment and general economic conditions and the claims-paying and financial strength ratings of the insurance subsidiaries.

We take into account asset/liability management considerations in the product development and design process. Contract terms for the interest-sensitive products include surrender and withdrawal provisions which mitigate the risk of losses due to early withdrawals. These provisions generally do one or more of the following: limit the amount of penalty-free withdrawals, limit the circumstances under which withdrawals are permitted, or assess a surrender charge or market value adjustment relating to the underlying assets. The following table summarizes statutory liabilities for interest-sensitive life products and annuities by their contractual withdrawal provisions at June 30, 2003 (including liabilities in the closed blocks and the general account):

Table of Contents

	(\$ in millions)
Not subject to discretionary withdrawal	\$ 515
Subject to discretionary withdrawal with adjustments:	
Specified surrender charges (A)	7,459
Market value adjustments	3,295
Subtotal	10,754
Subject to discretionary withdrawal without adjustments	1,805
Total	\$ 13,074

(A) Includes \$998 million of statutory liabilities with a contractual surrender charge of less than five percent of the account balance.

In addition to the interest-sensitive products, an insurance subsidiary is party to a \$250 million fixed rate funding agreement. Under the agreement, a five-year floating rate insurance contract was issued to a commercial paper conduit which was swapped to a fixed-rate. During 2002, our insurance subsidiaries placed additional funding agreements totaling \$875 million in six to ten year fixed rate insurance contracts. The assets backing the funding agreements are legally segregated and are not subject to claims that arise out of any other business of the insurance subsidiaries. The funding agreements are further backed by the general account assets of the insurance subsidiaries. The segregated assets and liabilities are included with general account assets in the financial statements. The funding agreements may not be cancelled unless there is a default under the agreement, but the insurance subsidiaries may terminate the agreement at any time.

We also have variable separate account assets and liabilities representing funds that are separately administered, principally for variable annuity contracts, and for which the contractholder bears the investment risk. Separate account assets and liabilities are reported at fair value and amounted to \$242.1 million at June 30, 2003. Separate account contractholders have no claim against the assets of the general account. The operations of the separate accounts are not included in the accompanying consolidated financial statements.

Through their respective memberships in the Federal Home Loan Banks (FHLB) of Des Moines and Topeka, ALIC and American are eligible to borrow under variable-rate short term fed funds arrangements to provide additional liquidity. These borrowings are secured and interest is payable at the current rate at the time of each advance. There were no borrowings under these arrangements outstanding at June 30, 2003. In addition, ALIC has long-term fixed rate advances from FHLB outstanding of \$13.6 million at June 30, 2003.

The insurance subsidiaries may also obtain liquidity through sales of investments. The investment portfolio as of June 30, 2003 had a carrying value of \$17.9 billion, including closed block investments.

The level of capital in the insurance companies is regulated by risk-based capital formulas and is monitored by rating agencies. In order to maintain appropriate capital levels, it may be necessary from time to time for AmerUs Group Co. to provide additional capital to the insurance companies.

Table of Contents

In the current economic environment, including the declines in interest rates and in the bond and equity markets, insurance regulators are closely monitoring the capital and liquidity position of insurance companies in their periodic financial examinations. IL Annuity, a wholly-owned subsidiary of ILIC, which is no longer writing business, has undergone its periodic financial examination. These discussions were concluded without any material effect upon the Company's consolidated financial position or results of operations. Effective June 30, 2003, we merged IL Annuity into ILIC.

The Company participates in dollar-roll repurchase agreement transactions. Such transactions involve the lending of a mortgage-backed security to a holding institution and a simultaneous agreement to purchase a substantially similar security for forward settlement at a lower dollar price. The proceeds are invested in short-term investments at a positive spread until the settlement date of the similar security. During this same time period, the Company will continue to reflect the mortgage-backed security sold to the holding institution as a fixed maturity security, the cash received for such security as cash and short-term investments, and the Company's repurchase obligation as an other liability. The amount outstanding to repurchase securities under dollar-roll repurchase agreements was \$68.9 million at June 30, 2003.

The Company also participates in a securities lending program whereby certain fixed maturity securities from the investment portfolio are loaned to other institutions for a short period of time. The Company receives a fee in exchange for the loan of securities and requires initial collateral equal to 102 percent of the market value of the loaned securities to be separately maintained. Securities with a market value of \$429.9 million were on loan under the program and the Company was liable for cash collateral under its control of \$447.2 million at June 30, 2003.

At June 30, 2003, the statutory surplus of the insurance subsidiaries was approximately \$780 million. Management believes that each life insurance company has statutory capital which provides adequate risk based capital that exceeds required levels.

In the future, in addition to cash flows from operations and borrowing capacity, the insurance subsidiaries may obtain their required capital from AmerUs Group Co.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The main objectives in managing our investment portfolios and our insurance subsidiaries are to maximize investment income and total investment returns while minimizing credit risks in order to provide maximum support to the insurance underwriting operations. Investment strategies are developed based on many factors including asset liability management, regulatory requirements, fluctuations in interest rates and consideration of other market risks. Investment decisions are centrally managed by investment professionals based on guidelines established by management and approved by the boards of directors.

Market risk represents the potential for loss due to adverse changes in the fair value of financial instruments. The market risks related to our financial instruments primarily relate to the investment portfolio, which exposes us to risks related to interest rates, credit quality and prepayment variation. Analytical tools and monitoring systems are in place to assess each of these elements of market risk.

Interest rate risk is the price sensitivity of a fixed income security to changes in interest rates. Management views these potential changes in price within the overall context of asset and liability management. Actuarial professionals estimate the payout pattern of our liabilities, primarily lapses, to determine duration, which is the present value of the fixed income investment portfolios after consideration of the duration of these liabilities and other factors, which management believes mitigates the overall effect of interest rate risk.

For variable and equity-indexed products, profitability on the portion of the policyholder's account balance invested in the fixed general account option, if any, is also affected by the spreads between interest yields on

Table of Contents

investments and rates credited to the policies. For the variable products, the policyholder assumes essentially all the investment earnings risk for the portion of the account balance invested in the separate accounts. For the equity-indexed products, we purchase call options that are designed to match the return owed to contract holders who elect to participate in one or more market indices. Profitability on the portion of the equity-indexed products tied to market indices is significantly impacted by the spread on interest earned on investments and the sum of (1) the cost of underlying call options purchased to match the returns owed to contract holders and (2) the minimum interest guarantees owed to the contract holder, if any. Profitability on the equity-indexed products is also impacted by changes in the fair value of the embedded option which provides the contract holder the right to participate in market index returns after the next anniversary date of the contract. This impacts profitability as we primarily purchase one-year call options to fund the returns owed to the contract holders at the inception of each contract year. This practice matches with the contract holders' rights to switch to different indices on each anniversary date. The value of the forward starting options embedded in the equity-indexed products can fluctuate with changes in assumptions as to future volatility of the market indices, risk free interest rates, market returns and the lives of the contracts.

The following table provides information about our fixed maturity investments and mortgage loans for both our trading and other than trading portfolios at June 30, 2003. The table presents amortized cost and related weighted average interest rates by expected maturity dates. The amortized cost approximates the cash flows of principal amounts in each of the periods. The cash flows are based on the earlier of the call date or the maturity date or, for mortgage-backed securities, expected payment patterns. Actual cash flows could differ from the expected amounts.

	Expected Cash Flows						Amortized Cost	Fair Value
	6 months 2003	2004	2005	2006	2007	2008	Thereafter	
	(\$ in millions)							
Fixed maturity securities available-for-sale	\$ 911	\$ 1,425	\$ 1,333	\$ 1,098	\$ 1,067	\$ 1,284	\$ 6,019	\$ 13,137
Average interest rate	6.5%	6.4%	6.6%	6.1%	6.7%	5.5%	5.5%	
Fixed maturity securities held for trading purposes	\$ 59	\$ 222	\$ 184	\$ 176	\$ 147	\$ 173	\$ 894	\$ 1,855
Average interest rate	3.9%	1.3%	1.9%	3.8%	2.5%	3.7%	4.2%	
Mortgage loans	\$ 26	\$ 63	\$ 65	\$ 64	\$ 61	\$ 68	\$ 564	\$ 1,014
Average interest rate	7.9%	7.9%	7.9%	7.8%	7.8%	7.7%	7.6%	
Total	\$ 996	\$ 1,710	\$ 1,582	\$ 1,338	\$ 1,275	\$ 1,525	\$ 7,477	\$ 15,903

In accordance with our strategy of minimizing credit quality risk, we consistently invest in high quality marketable securities. Fixed maturity securities are comprised of U.S. Treasury, government agency, mortgage-backed and corporate securities. Approximately 67% of fixed maturity securities are issued by the U.S. Treasury or U.S. government agencies or are rated A or better by Moody's, Standard and Poor's, or the NAIC. Less than 7.5 % of the bond portfolio is below investment grade. Fixed maturity securities have an average maturity of approximately 6.65 years.

Prepayment risk refers to the changes in prepayment patterns that can either shorten or lengthen the expected timing of the principal repayments and thus the average life and the effective yield of a security. Such risk exists primarily within the portfolio of mortgage-backed securities. Management monitors such risk regularly. We invest primarily in those classes of mortgage-backed securities that have average or lower prepayment risk.

Our use of derivatives is generally limited to hedging purposes and has principally consisted of using interest rate swaps and options. These instruments, viewed separately, subject us to varying degrees of market and credit risk. However when used for hedging, the expectation is that these instruments would reduce overall market risk. Credit risk arises from the possibility that counterparties may fail to perform under the terms of the contracts.

Table of Contents

Equity price risk is the potential loss arising from changes in the value of equity securities. In general, equities have more year-to-year price variability than intermediate term grade bonds. However, returns over longer time frames have been consistently higher. Our equity securities are readily marketable.

All of the above risks are monitored on an ongoing basis. A combination of in-house systems and proprietary models and externally licensed software are used to analyze individual securities as well as each portfolio. These tools provide the portfolio managers with information to assist them in the evaluation of the market risks of the portfolio.

Item 4. Controls and Procedures

(a) Based upon their evaluation as of the end of the period covered by this Quarterly Report on Form 10-Q, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended, are effective for recording, processing, summarizing and reporting the information we are required to disclose in our reports filed under such act.

(b) There were no significant changes in our internal controls or in other factors that could significantly affect these controls subsequent to the date of the evaluation referred to above.

Table of Contents

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

In recent years, the life insurance industry, including the Company and its subsidiaries, have been subject to an increase in litigation pursued on behalf of purported classes of insurance purchasers, questioning the conduct of insurers in the marketing of their products. The Company is often involved in litigation and other proceedings, including class actions, reinsurance claims and regulatory proceedings, arising in the ordinary course of its business. Some of these claims and legal actions are in jurisdictions where juries are given substantial latitude in assessing damages, including punitive damages. Although no assurances can be given and no determinations can be made at this time, the Company believes that the ultimate liability, if any, with respect to these claims and legal actions, would have no material effect on its results of operations and financial position.

As previously disclosed, one of the Company's subsidiaries, IL Annuity, was party to an arbitration proceeding brought by a reinsurer of a block of its annuity business. On June 23, 2003, IL Annuity and the reinsurer settled that proceeding and amended their reinsurance agreement. For more information, see note 9 to the consolidated financial statements.

Item 4. Submission of Matters to a Vote of Security Holders

At the annual meeting of the Company's shareholders on May 8, 2003, a majority of the Company's shareholders approved (1) the reelection of David A. Arledge, John W. Norris, Jr. and John A. Wing; (2) the approval of the AmerUs Group Co. 2003 Stock Incentive Plan and reservation of shares for issuance thereunder; and (3) the ratification of the appointment by the Board of Directors of the Company of Ernst & Young LLP as the Company's independent auditors. The result of the vote is as follows:
