The Cushing MLP Total Return Fund
Shareholder Letter

Dear Shareholders:

Performance of the master limited partnership (MLP) equities continued to struggle over the first half of our 2008 fiscal year, or from November 2007 to May 2008. The NAV of the Cushing MLP Total Return Fund (NYSE: SRV), or the Fund , declined \$0.78, or 4.3%, from \$18.18 per share to \$17.40 per share over this period. However, the Fund s dividends over this period totaled \$0.627 per share.

The Fund paid a \$0.309 per share dividend for the quarter ended February 2008, which reflected a 3% increase over our initial \$0.30 dividend for the quarter ended November 2007.

The Fund paid a \$0.318 per share dividend for the quarter ended May 2008, which reflected an additional 3% increase from the prior period.

Therefore, when including the effect of dividends, the total return for the period was a loss of 0.84%.

The Fund was able to provide these dividend increases as our underlying portfolio partnerships continued to perform well operationally and similarly increased their distributions.

As you know, the Fund primarily invests in MLPs involved in owning and operating energy infrastructure assets. Examples of these assets are pipelines and terminals as well as processing and treating facilities. Simply put, these are the infrastructure assets that crude oil, natural gas and their refined products must flow through in order to be used by their respective buyers. Refined products include gasoline, jet fuel and heating oil.

The MLPs in our portfolio continued to grow their businesses and increase their distributions through improved volumes on current assets, the development of new assets and, to a lesser degree, the acquisition of assets. We expect these businesses will continue to grow as the demand for new infrastructure appears robust.

The continued development of several natural gas fields across the country has and continues to require the construction and operation of vast new infrastructure systems to move natural gas from these often remote locations to population centers to be used for home heating or power generation

Table of Contents

purposes. Examples of these fields include the Barnett shale in Texas, the Woodford shale in Oklahoma, the Fayetteville shale in Arkansas, and the Pinedale, Piceance, and Uinta basins in the Rockies. Further, the Marcellus shale in the Appalachian Basin and the Haynesville shale in Louisiana are just now emerging as potentially significant resource basins that will likely require new infrastructure as well.

Despite the very strong operating performance of and outlook for the energy infrastructure sector, the price performance of the group's equities continued to suffer. Over this period, the S&P 500 declined 5.45%, which resulted in a decline of 4.47% when including the effect of dividends. Though our portfolio held up better than the broader markets, as measured by the S&P 500, we remain frustrated by the disconnect between the healthy operating performance of the businesses in the sector and the prices of their equities.

Exhibits 1a and 2a attempt to highlight this disconnect. **Exhibit 1a** reflects the slow down experienced by the broader economy as measured by the earnings per share performance of the constituents of the S&P 500 and the relatively consistent sell off of these stocks. **Exhibit 1b** reflects the strength of the MLP infrastructure businesses as measured by the average rate of quarter-over-quarter distribution increases provided by the group and the disconnected performance of the equities of these same businesses.

Exhibit 1a: S&P 500 Index Price Performance vs. Quarterly EPS Growth

Source: Standard & Poor's Index Services.

¹ The S&P 500 is a gauge of the U.S. equities market and includes 500 companies across many industries of the U.S. economy. The S&P 500 focuses on the large cap segment of the market but covers approximately 75% of U.S. equities.

Table of Contents

Exhibit 1b: MLP Price Performance vs. Quarterly Distribution Growth

Note: The AMZ² simple average index shown above represents the simple average of daily price movements of the constituents of the AMZ index². The cumulative distribution increases represents the simple average of quarterly distribution growth of the constituents of the AMZ index².

Source: Company filings, Alerian Capital Management, LLC.

We continue to believe that time will correct the recent disconnect between the fundamental performance of these businesses and the performance of the equities. Though the operating performance of these energy infrastructure businesses is stable, the equities continue to provide higher yields and, we believe, offer better distribution growth prospects than alternatives, such as utilities and REITs (see **Exhibit 2** below).

Exhibit 2: Total Return Potential Comps

Source: Citigroup Investment Research, as of 05-09-2008.

² The Alerian MLP Index is a composite of the 50 most prominent energy master limited partnerships calculated by Standard & Poor's using a float-adjusted market capitalization methodology. The index is disseminated by the New York Stock Exchange real-time on a price return basis (NYSE: AMZ). The corresponding total return index is calculated and disseminated daily through ticker AMZX.

Table of Contents

Despite the disruptions we have seen in the market prices of these securities, we believe our strategy remains correct. We believe the stocks of the MLPs that are able to grow their businesses and distribution the best will perform the best over time and we expend tremendous effort and time in our fundamental research to invest wisely.

Again, as always, thank you for your support and confidence.

Regards,

Jerry V. Swank
CEO

- (1) Commencement of Operations
- (2) Information presented relates to a share of common stock outstanding for the entire period.
- (3) Not Annualized. Total investment return is calculated assuming a purchase of common stock at the initial public offering price and a sale at the closing price on the last day of the period reported. The calculation also assumes reinvestment of dividends at actual prices pursuant to the Company's dividend reinvestment plan. Total investment return does not reflect brokerage commissions.
- (4) Annualized for periods less than one full year.
- (5) For the period from December 1, 2007 through May 31, 2008, the Company accrued \$725,993 in net current and deferred tax benefit. For the period from August 27, 2007 through November 30, 2007, the Company accrued \$3,153,649 in net current and deferred income tax benefit.
- (6) This ratio excludes current and deferred income tax benefit on net investment income.

The Cushing MLP Total Return Fund

Notes to Financial Statements

May 31, 2008 (Unaudited)

1. Organization

The Cushing MLP Total Return Fund (the Fund) was formed as a Delaware statutory trust on May 23, 2007, and is a non-diversified, closed-end management investment Company under the Investment Company Act of 1940, as amended (the 1940 Act). The Fund s investment objective is to obtain a high after-tax total return from a combination of capital appreciation and current income. The Fund seeks to provide its stockholders with an efficient vehicle to invest in the energy infrastructure sector. The Fund commenced operations on August 27, 2007. The Fund s shares are listed on the New York Stock Exchange under the symbol SRV.

2. Significant Accounting Policies

A. Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, recognition of distribution income and disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

B. Investment Valuation

The Fund will use the following valuation methods to determine either current market value for investments for which market quotations are available, or if not available, the fair value, as determined in good faith pursuant to such policies and procedures may be approved by the Fund s Board of Trustees (Board of Trustees) from time to time. The valuation of the portfolio securities of the Fund currently includes the following processes:

(i) The market value of each security listed or traded on any recognized securities exchange or automated quotation system will be the last reported sale price at the relevant valuation date on the composite tape or on the principal exchange on which such security is traded. If no sale is reported on that date, Swank Energy Income Advisors, LP (the Advisor) utilizes, when available, pricing quotations from principal market makers. Such quotations may be obtained from third-party pricing services or directly from investment brokers and dealers in the

Table of Contents

secondary market. Generally, the Fund's loan and bond positions are not traded on exchanges and consequently are valued based on market prices received from third-party services or broker-dealer sources.

(ii) Listed options on debt securities are valued at the average of bid price and ask price. Unlisted options on debt or equity securities are valued based upon their composite bid prices if held long, or their composite ask prices if held short. Futures are valued at the last sale price on the commodities exchange on which they trade.

(iii) The Fund's non-marketable investments will generally be valued in such manner as the Investment Advisor determines in good faith to reflect their fair values under procedures established by, and under the general supervision and responsibility of, the Board of Trustees. The pricing of all assets that are fair valued in this manner will be subsequently reported to and ratified by the Board of Trustees

The Fund may engage in short sale transactions. For financial statement purposes, an amount equal to the settlement amount is included in the Statement of Assets and Liabilities as a liability. The amount of the liability is subsequently marked-to-market to reflect the current value of the short positions. Subsequent fluctuations in market prices of securities sold short may require purchasing the securities at prices which may differ from the market value reflected on the Statement of Assets and Liabilities. The Fund is liable for any dividends paid on securities sold short. The Fund's obligation to replace the borrowed security will be secured by collateral deposited with the broker-dealer. The Fund also will be required to segregate similar collateral to the extent, if any, necessary so that the value of both collateral amounts in the aggregate is at all times equal to at least 100 percent of the current market value of the securities sold short.

C. Security Transactions and Investment Income

Security transactions are accounted for on the date the securities are purchased or sold (trade date). Realized gains and losses are reported on a high cost basis. Interest income is recognized on the accrual basis, including amortization of premiums and accretion of discounts. Distributions are recorded on the ex-dividend date. Distributions received from the Fund's investments in master limited partnerships (MLPs) generally are comprised of ordinary income, capital gains and return of capital from the MLP. The Fund records investment income on the ex-date of the distributions. For financial statement purposes, the Fund uses return of capital and income estimates to allocate the dividend income received. Such estimates are based on historical information available from each MLP and other industry

Table of Contents

sources. These estimates may subsequently be revised based on information received from MLPs after their tax reporting periods are concluded, as the actual character of these distributions is not known until after the fiscal year-end of the Fund.

For the period from December 1, 2007 through May 31, 2008, the Fund estimated the allocation of investment income and return of capital for the distributions received from MLPs within the Statement of Operations. For this period, the Fund had estimated approximately 10 percent as investment income and approximately 90 percent as return of capital.

Subsequent to November 30, 2007, the Company reclassified the amount of investment income and return of capital it recognized based on the 2007 tax reporting information received from the individual MLPs. This reclassification amounted to a decrease in pre-tax net investment income of approximately \$197,000 or \$0.021 per share (\$122,000 or \$0.013 per share, net of deferred tax expense); an increase of approximately \$46,000 or \$0.005 per share (\$29,000 or \$0.003 per share, net of deferred tax benefit) in unrealized appreciation of investments; and an increase in realized gains of approximately \$151,000 or \$0.016 per share (\$94,000 or \$0.010 per share, net of deferred tax benefit) for the period from December 1, 2007 through May 31, 2008.

D. Dividends and Distributions to Stockholders

Dividends and distributions to common stockholders are recorded on the ex-dividend date. The character of dividends and distributions to common stockholders made during the year may differ from their ultimate characterization for federal income tax purposes. For the period ended May 31, 2008, the Fund's dividends and distributions for book purposes were expected to be comprised of 100 percent return of capital. For the year ended November 30, 2007, the Company's dividends, for tax purposes, were comprised of approximately 1.7 percent qualified dividend income and 98.3 percent return of capital. The tax character of distributions paid for the period ended May 31, 2008 will be determined subsequent to November 30, 2008.

E. Federal Income Taxation

The Fund, as a corporation, is obligated to pay federal and state income tax on its taxable income. Currently, the maximum marginal regular federal income tax rate for a corporation is 35 percent. The Fund may be subject to a 20 percent federal alternative minimum tax on its federal alternative minimum taxable income to the extent that its alternative minimum tax exceeds its regular federal income tax.

Table of Contents

The Fund invests its assets primarily in MLPs, which generally are treated as partnerships for federal income tax purposes. As a limited partner in the MLPs, the Fund reports its allocable share of the MLP's taxable income in computing its own taxable income. The Fund's tax expense or benefit is included in the Statement of Operations based on the component of income or gains (losses) to which such expense or benefit relates. Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. A valuation allowance is recognized if, based on the weight of available evidence, it is more likely than not that some portion or all of the deferred income tax asset will not be realized. Management expects to realize the full benefit of the deferred tax asset.

F. Cash and Cash Equivalents

The Fund considers all highly liquid investments purchased with initial maturity equal to or less than three months to be cash equivalents.

G. Cash Flow Information

The Fund makes distributions from investments, which include the amount received as cash distributions from MLPs, paid-in-kind distributions, and dividend and interest payments. These activities are reported in the accompanying Statement of Changes in Net Assets, and additional information on cash receipts and payments is presented in the accompanying Statement of Cash Flows.

H. Indemnifications

Under the Fund's organizational documents, its officers and directors are indemnified against certain liabilities arising out of the performance of their duties to the Fund. In addition, in the normal course of business, the Fund may enter into contracts that provide general indemnification to other parties. The Fund's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Fund that have not yet occurred, and may not occur. However, the Fund has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

I. Recent Accounting Pronouncements

In July 2006, the Financial Accounting Standards Board (FASB) released FASB Interpretation No. 48 Accounting for Uncertainty in Income Taxes (FIN 48). FIN 48 provides guidance for how uncertain tax positions should be recognized, measured, presented and disclosed in the financial statements. FIN 48 requires the evaluation of tax positions taken or expected to be taken in the course of preparing the Fund's tax returns to determine whether the tax

Table of Contents

positions are more-likely-than-not of being sustained by the applicable tax authority. FIN 48 was effective as of the beginning of the first fiscal year beginning after December 15, 2006. The Fund has evaluated the application of FIN 48 and determined that it does not have a material impact on the financial statements.

In March 2008, Statement of Financial Accounting Standards No. 161, Disclosures about Derivative Instruments and Hedging Activities (SFAS 161) was issued and is effective for fiscal years beginning after November 15, 2008. SFAS 161 is intended to improve financial reporting for derivative instruments by requiring enhanced disclosure that enables investors to understand how and why an entity uses derivatives, how derivatives are accounted for, and how derivative instruments affect an entity's results of operations and financial position. Management is currently evaluating the implications of SFAS 161. The impact on the Fund's financial statement disclosures, if any, is currently being assessed.

3. Concentration of Risk

The Fund's investment objective is to obtain a high after-tax total return from a combination of capital appreciation and current income. The Fund will seek to achieve its investment objective by investing, under normal market conditions, at least 80% of its net assets, plus any borrowings for investment purposes, in MLP investments; up to 50% of its managed assets in securities of MLPs and other natural resource companies that are not publicly traded, or that are otherwise restricted securities; up to 20% of its managed assets in securities of companies that are not MLPs, including other natural resource companies, and U.S. and non-U.S. issuers that may not constitute other natural resource companies; and up to 20% of its managed assets in debt securities of MLPs, other natural resource companies and other issuers.

4. Agreements

The Fund has entered into an Investment Management Agreement with the Advisor. Under the terms of the agreement, the Fund will pay the Advisor a fee, payable at the end of each calendar month, at an annual rate equal to 1.25% of the average weekly value of the Fund's managed assets during such month for the services and facilities provided by the Investment Advisor to the Fund. The Investment Advisor is reimbursing the Fund's expenses to the extent that total annual Fund operating expenses, not including interest payments or other expenses on borrowed funds, exceed 1.50% of average weekly managed assets. The Investment Advisor is not obligated to do so, however, and reimbursement may be discontinued at any time. The Advisor

Table of Contents

earned \$1,138,807 in management fees for the period ended May 31, 2008, of which \$215,798 was waived by the Advisor.

The Fund has engaged U.S. Bancorp Fund Services, LLC to serve as the Fund's administrator. The Fund pays the administrator a monthly fee computed at an annual rate of 0.08 percent of the first \$100,000,000 of the Fund's managed assets, 0.05 percent on the next \$200,000,000 of managed assets and 0.04 percent on the balance of the Fund's managed assets.

Computershare Trust Fund, N.A. serves as the Fund's transfer agent, dividend paying agent, and agent for the automatic dividend reinvestment plan.

U.S. Bank, N.A. serves as the Fund's custodian. The Fund pays the custodian a monthly fee computed at an annual rate of 0.004 percent of the Fund's daily market value.

5. Income Taxes

Deferred income taxes reflect the net tax effect of temporary differences between the carrying amount of assets and liabilities for financial reporting and tax purposes. Components of the Fund's deferred tax assets and liabilities as of May 31, 2008, are as follows:

Deferred tax assets:	
Net operating loss carryforward	\$ 2,010,999
Capital loss carryforward	4,395,720
Unrealized loss on investment securities	603,020
	7,009,739
Deferred tax liabilities:	
Basis reduction of investment in MLPs	3,130,097
Total net deferred tax asset	\$ 3,879,642

For the period from December 31, 2007 to May 31, 2008, the components of income tax benefit include \$637,816 and \$88,177 for deferred federal and state income tax benefit, respectively. For the period ended May 31, 2008, the Fund had a net operating loss of approximately \$4,914,000 and a capital loss of approximately \$10,687,000 for federal income tax purposes. For the period ended November 30, 2007, the Fund had a net operating loss of approximately \$378,000 and a capital loss of approximately \$880,000 for federal income tax purposes. For corporations, capital losses can only be used to offset capital gains and cannot be used to offset ordinary income. As such, none of the capital loss was used to offset investment income. This capital loss may be carried forward for 5 years and, accordingly, would begin to expire as of November 30,

Table of Contents

2012. The net operating loss can be carried forward for 20 years and, accordingly, would begin to expire as of November 30, 2027.

Total income tax benefit (current and deferred) differs from the amount computed by applying the federal statutory income tax rate of 35 percent to net investment income and realized and unrealized gains (losses) on investments before taxes for the period ended May 31, 2008, as follows:

Application of statutory income tax rate	\$	(668,678)
State income taxes		(57,315)
Total	\$	(725,993)

At May 31, 2008, the Fund did not record a valuation allowance against its deferred tax assets, because the Fund believes it is more likely than not that the Fund will realize its deferred tax asset.

At May 31, 2008, the cost basis of investments for federal income tax purposes was \$210,463,848, and gross unrealized appreciation and depreciation of investments for federal income tax purposes were as follows:

Gross unrealized appreciation	\$	11,480,067
Gross unrealized depreciation		(5,679,370)
Net unrealized appreciation	\$	5,800,697

The Fund files a U.S. tax return. No income tax returns are currently under examination. The statute of limitations of the Fund's tax return remains open for the years ended November 30, 2007 through November 30, 2010.

6. Fair Value Measurements

The Fund adopted the provisions of Statement of Financial Accounting Standards No. 157, Fair Value Measurements (SFAS 157), effective with the beginning of the Fund's fiscal year. SFAS 157 establishes a hierarchy that prioritizes the inputs to valuation techniques giving the highest priority to readily available unadjusted quoted prices in active markets for identical assets (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements) when market prices are not readily available or reliable.

Description	5/31/2008	Fair Value Measurements at Reporting Date Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Investments	\$ 216,664,213	\$ 209,451,713	\$ 7,212,500	\$

Table of Contents**7. Restricted Securities**

Certain of the Fund's investments are restricted and are valued as determined in accordance with procedures established by the Board of Trustees and more fully described in Note 2. The table below shows the number of units held, acquisition date, acquisition cost, value per unit of such securities and percent of net assets which the securities comprise at May 31, 2008.

Investment Security	Number of Units	Acquisition Date	Acquisition Cost	Value per unit	Value as Percent of Net Assets
Crosstex Energy, L.P. Common Units	250,000	04/09/2008	\$ 7,500,000	\$ 28.85	4.4%

8. Investment Transactions

For the period ended May 31, 2008, the Fund purchased (at cost) and sold securities (proceeds) in the amount of \$105,866,816 and \$51,244,635 (excluding short-term debt securities), respectively.

9. Common Stock

The Fund has 12,500,000 shares of capital stock authorized and 9,462,817 shares outstanding at May 31, 2008. Transactions in common stock for the year ended November 30, 2007 and the period ended May 31, 2008 were as follows:

Shares sold through initial offering	8,755,236
Shares at November 30, 2007	8,755,236
Shares sold through secondary offering	707,581
Shares at May 31, 2008	9,462,817

10. Borrowing Facilities

The Fund entered into a margin account arrangement with Credit Suisse. The interest rate charged on margin borrowing is tied to the cost of funds for Credit Suisse (which approximates LIBOR) plus 0.30 percent. Proceeds from the margin account arrangement were used to execute the Fund's investment objective.

The average principal balance and interest rate for the period during which the credit facilities were utilized during the period ended May 31, 2008 was approximately \$22,700,000 and 3.52 percent, respectively. At May 31, 2008, the principal balance outstanding was \$45,000,000.

Additional Information (Unaudited)
May 31, 2008

Director and Officer Compensation

The Fund does not compensate any of its directors who are interested persons nor any of its officers. For the period ended May 31, 2008, the aggregate compensation paid by the Fund to the independent directors was \$49,500. The Fund did not pay any special compensation to any of its directors or officers.

Cautionary Note Regarding Forward-Looking Statements

This report contains forward-looking statements as defined under the U.S. federal securities laws. Generally, the words believe, expect, intend, estimate, anticipate, project, will and similar expressions identify forward-looking statements, which generally are not historical in nature. Forward-looking statements are subject to certain risks and uncertainties that could cause actual results to materially differ from the Fund's historical experience and its present expectations or projections indicated in any forward-looking statements. These risks include, but are not limited to, changes in economic and political conditions; regulatory and legal changes; MLP industry risk; leverage risk; valuation risk; interest rate risk; tax risk; and other risks discussed in the Fund's filings with the SEC. You should not place undue reliance on forward-looking statements, which speak only as of the date they are made. The Fund undertakes no obligation to update or revise any forward-looking statements made herein. There is no assurance that the Fund's investment objectives will be attained.

Form N-Q

The Fund files its complete schedule of portfolio holdings for the first and third quarters of each fiscal year with the SEC on Form N-Q. The Fund's Form N-Q and statement of additional information are available without charge by visiting the SEC's Web site at www.sec.gov. In addition, you may review and copy the Fund's Form N-Q at the SEC's Public Reference Room in Washington D.C. You may obtain information on the operation of the Public Reference Room by calling (800) SEC-0330.

Table of Contents

Certifications

The Fund's Chief Executive Officer has submitted to the New York Stock Exchange the annual CEO certification as required by Section 303A.12(a) of the NYSE Listed Fund Manual.

The Fund has filed with the SEC the certification of its Chief Executive Officer and Chief Financial Officer required by Section 302 of the Sarbanes-Oxley Act.

Privacy Policy

In order to conduct its business, the Fund collects and maintains certain nonpublic personal information about its stockholders of record with respect to their transactions in shares of the Fund's securities. This information includes the stockholder's address, tax identification or Social Security number, share balances, and dividend elections. We do not collect or maintain personal information about stockholders whose share balances of our securities are held in street name by a financial institution such as a bank or broker.

We do not disclose any nonpublic personal information about you, the Fund's other stockholders or the Fund's former stockholders to third parties unless necessary to process a transaction, service an account, or as otherwise permitted by law.

To protect your personal information internally, we restrict access to nonpublic personal information about the Fund's stockholders to those employees who need to know that information to provide services to our stockholders. We also maintain certain other safeguards to protect your nonpublic personal information.

Other accounts	1	\$ 186,000,000	1	\$ 186,000,000

(iv) Conflicts of Interest with the Investment Adviser

Conflicts of interest may arise because the Investment Adviser and its affiliates generally will be carrying on substantial investment activities for other Clients, including, but not limited to, the affiliated funds, in which the Fund will have no interest. The Investment Adviser or its affiliates may have financial incentives to favor certain of such accounts over the Fund. Any of their proprietary accounts and other customer accounts may compete with the Fund for specific trades. The Investment Adviser or its affiliates may buy or sell securities for the Fund which

Table of Contents

differ from securities bought or sold for other accounts and customers, even though their investment objectives and policies may be similar to the Fund's. Situations may occur when the Fund could be disadvantaged because of the investment activities conducted by the Investment Adviser and its affiliates for their other accounts. Such situations may be based on, among other things, legal or internal restrictions on the combined size of positions that may be taken for the Fund and the other accounts, limiting the size of the Fund's position, or the difficulty of liquidating an investment for the Fund and the other accounts where the market cannot absorb the sale of the combined position. Notwithstanding these potential conflicts of interest, the Investment Adviser, Fund's Board of Trustees and officers have a fiduciary obligation to act in the Fund's best interest.

The Fund's investment opportunities may be limited by affiliations of the Investment Adviser or its affiliates with MLPs and other natural resource companies. Additionally, to the extent that the Investment Adviser sources and structures private investments in MLPs and other natural resource companies, certain employees of the Investment Adviser may become aware of actions planned by MLPs and other natural resource companies, such as acquisitions that may not be announced to the public. It is possible that the Fund could be precluded from investing in an MLP or other natural resource company.

The Investment Adviser manages several private managed accounts (Affiliated Funds). Some of the Affiliated Funds have investment objectives that are similar to or overlap with the Fund. Further, the Investment Adviser may at some time in the future manage other investment funds with the same investment objective as the Fund.

The Investment Adviser and its affiliates generally will be carrying on substantial investment activities for other Clients, including, but not limited to, the Affiliated Funds, in which the Fund will have no interest. Investment decisions for the Fund are made independently from those of such other Clients; however, from time to time, the same investment decision may be made for more than one fund or account.

When two or more Clients advised by the Investment Adviser or its affiliates seek to purchase or sell the same publicly traded securities, the securities actually purchased or sold will be allocated among the Clients on a good faith equitable basis by the Investment Adviser in its discretion in accordance with the Clients' various investment objectives and procedures adopted by the Investment Adviser and approved by the Fund's Board of Trustees. In some cases, this system may adversely affect the price or size of the position the Fund may obtain.

The Fund's investment opportunities may be limited by investment opportunities in the MLPs and other natural resource companies that the Investment Adviser is evaluating for the Affiliated Funds. To the extent a potential investment is appropriate for the Fund and one or more of the Affiliated Funds, the Investment Adviser will need to fairly allocate that investment to the Fund or an Affiliated Fund, or both, depending on its allocation procedures and applicable law related to combined or joint transactions. There may occur an attractive limited investment opportunity suitable for the Fund in which the Fund cannot invest under the particular allocation method being used for that investment.

Under the 1940 Act, the Fund and its Affiliated Funds may be precluded from co-investing in private placements of securities. Except as permitted by law or positions of the staff of the SEC, the Investment Adviser will not co-invest its other Clients' assets in private transactions in which the Fund invests. To the extent the Fund is precluded from co-investing, the Investment Adviser will allocate private investment opportunities among its Clients, including but not limited to the

Table of Contents

Fund and the Affiliated Funds, based on allocation policies that take into account several suitability factors, including the size of the investment opportunity, the amount each Client has available for investment and the Client's investment objectives. These allocation policies may result in the allocation of investment opportunities to an Affiliated Fund rather than to the Fund.

(a)(3) As of May 31, 2008:

Compensation

Messrs. Swank and Watson are compensated by the Investment Adviser. Mr. Swank is a principal of the Investment Adviser and is compensated through partnership distributions that are based primarily on the profits and losses of the Investment Adviser. The partnership distributions are affected by the amount of assets the Investment Adviser manages and the appreciation of those assets, particularly over the long-term, but are not determined with specific reference to any particular performance benchmark or time period. Mr. Watson is compensated through a base salary and a bonus in amounts that are affected primarily by the profits and losses of the Investment Adviser but are also affected by the Investment Adviser's consideration of such factors as his work ethic, seniority, the appreciation of assets in the Fund and other accounts he manages, or any other factors the Investment Adviser determines contribute to Client goals and the long-term success of the Investment Adviser (which structure and method of compensation apply equally to any Other Accounts managed by Mr. Watson). Some of the other accounts managed by Messrs. Swank and Watson, including the Affiliated Funds, have investment strategies that are similar to the Fund's investment strategy. However, the Investment Adviser manages potential material conflicts of interest by allocating investment opportunities in accordance with its allocation policies and procedures.

(a)(4) As of May 31, 2008:

Securities Beneficially Owned in the Registrant by Portfolio Managers
