See notes to condensed consolidated financial statements

McRae Industries, Inc. and Subsidiaries**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

(Unaudited)

NOTE A - BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements have been prepared by the Company pursuant to the rules and regulation of the Securities and Exchange Commission (SEC). Accordingly, they do not include all of the information and footnotes required by the accounting principals generally accepted in the United States for complete financial statements. In addition, all adjustments (consisting only of normal recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the six months ended January 31, 2004 are not necessarily indicative of the results that may be expected for the year ending July 31, 2004. The interim condensed consolidated financial information should be read in conjunction with the Company's August 2, 2003 audited consolidated financial statements and footnotes thereto included in the McRae Industries, Inc. Annual Report filed on Form 10-K with the SEC.

Certain reclassifications have been made to the prior year's financial statements to conform with the current year's presentation.

NOTE B - INVENTORIES

The components of inventory consist of the following (in thousands):

	<u>January 31, 2004</u>	<u>August 2, 2003</u>
Raw materials	\$ 2,570	\$ 3,293
Work-in-process	1,337	1,081
Finished goods	11,946	13,185
	<u>\$ 15,853</u>	<u>\$ 17,559</u>

NOTE C - SUBSEQUENT EVENTS

On March 1, 2004, the Company declared a cash dividend of \$.06 cents per share on its Class A Common Stock payable on March 26, 2004, to shareholders of record on March 12, 2004.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with the attached unaudited condensed consolidated financial statements and notes thereto, and with the Company's Annual Report on Form 10-K for the fiscal year ended August 2, 2003, including the financial information and management's discussion and analysis contained therein.

CRITICAL ACCOUNTING ESTIMATES

Our timely preparation of financial reports and related disclosures requires us to use estimates and assumptions that may cause actual results to be materially different from our estimated results. Specifically, we use estimates when accounting for depreciation, amortization, cost per copy contract contingencies, useful lives for intangible assets, and asset valuation allowances (including those for bad debts, inventory, and deferred income tax assets). Our most critical accounting estimates include the following:

Contract Contingencies

Our office products business leases equipment (usually for a sixty-month period) to county-wide education systems and sells the lease to third party leasing companies. Under this program the school system is billed on a monthly, quarterly or annual basis at a specified rate for each copy they make. The cost per copy charged to the school system is designed to cover the equipment cost, supplies (except for paper and staples), service, and a finance charge. On a quarterly basis, on a program-by-program basis, we project an expected outcome over the life of the program. We use historical copy usage to predict the number of copies to be made over the remaining life of the program. We adjust this estimate of the number of expected future copies based on known factors that will influence copy rates in each program. We use historical service and supply costs incurred on each program to estimate future service and supply costs on a per copy basis. We adjust these estimated costs for known factors that will impact service and supplies in the future. We also estimate any other costs expected to be incurred such as depreciation on rental equipment. On programs where the sum of the estimated future costs exceeds the expected future revenue, we recognize a provision for 100% of the expected losses for these programs.

Intangible Assets

We determine the utility of goodwill and trademarks based on estimated future cash flows and test for impairment in accordance with applicable accounting pronouncements. We estimate future cash flows based on historical performance and our knowledge of known factors likely to impact future cash flows.

Inventories

Inventories are recorded at the lower of cost or market value. We regularly review inventory quantities on hand and record a provision for excess and obsolete inventory based primarily on our estimated forecast and demand requirements for the next twelve months. Actual demand and market conditions may be different from those projected by our management.

Revenue Recognition

We recognize revenue under our current boot contract when the boots are inspected and accepted by the Government's Quality Assurance Representative (QAR), thereby transferring ownership to the Government. Pursuant to the contract, the boots become Government-owned property after inspection and acceptance by the QAR. The boots are transferred and stored in our warehouse, which is a designated storage facility approved by the Government, and accounted for as bill and hold sales in accordance

Edgar Filing: MCRAE INDUSTRIES INC - Form 10-Q

with Securities and Exchange Commission Staff Accounting Bulletin No. 101, Revenue Recognition in Financial Statements.

Income Taxes

As part of the process of preparing our consolidated financial statements, we are required to estimate our income taxes in each of the jurisdictions in which we operate. This process involves us estimating our actual current exposure together with assessing temporary differences resulting from differing treatment of items, such as leasing activity, allowances, and depreciation, for tax and accounting purposes. These differences result in deferred tax assets and liabilities, which are included within our consolidated balance sheet. We then assess the likelihood that our deferred tax assets will be recovered from future taxable income and to the extent we believe that recovery is not likely, we establish a valuation allowance. To the extent we establish a valuation allowance or increase this allowance in a period, we include an expense within the tax provision in the statement of operations. Significant management judgment is required in determining our provision for income taxes, our deferred tax assets and liabilities, and any valuation allowance recorded against our net deferred tax assets. In the event that actual results differ from these estimates or we adjust these estimates in future periods, we would establish an additional valuation allowance, which could materially impact our financial position and results of operations.

FINANCIAL CONDITION AND LIQUIDITY

Our cash and cash equivalents for the six months ended January 31, 2004, totaled approximately \$4.1 million as compared to approximately \$6.2 million at August 2, 2003. Working capital at the end of the first six months of fiscal 2004 amounted to \$24.8 million, down slightly from \$25.2 million at August 2, 2003.

Currently, we have two lines of credit with a bank totaling \$4.75 million, all of which was available at January 31, 2004. One credit line totaling \$1.75 million expires in June 2004. The \$3.0 million credit line expires in November 2004. In January 2004, we obtained a \$600,000 construction loan from a bank, all of which was available at January 31, 2004, to finance the expansion of our military boot facility. Principal and interest on this loan is due on July 11, 2004.

We believe that our current cash and cash equivalents, cash generated from operations, and available line of credit will be sufficient to meet our capital requirements for the remainder of fiscal 2004. Our contractual commitments for fiscal 2004 are approximately \$833,000.

Selected cash flow data for the first six months of fiscal 2004 are presented below (in thousands):

	For the six months ended January 31, 2004
Source (Use) of Cash	
Operating activities:	
Net earnings adjusted for depreciation	\$ 1,138
Accounts receivable	363
Inventories	1,706
Accounts payable	(1,787)
Income taxes	(1,085)
Net cash used in operating activities	(1,251)

Net cash used in operating activities for the first six months of fiscal 2004 totaled approximately \$1.25 million as adjusted for non-cash transfers from inventory to rental equipment for the office products business. Net earnings adjusted for depreciation provided \$1.1 million of cash. Trade accounts receivable

provided \$363,000 of cash primarily attributable to the timing of collection of accounts related to the heavier fall sales season and the decrease in second quarter demand for western boot products. This decrease in accounts receivable was partially offset by the timing of collection on increased military boot sales to the U.S. Government and bar code product sales in January. Inventory, net of transfers to rental equipment for the office products business, decreased by approximately \$987,000 primarily the result of the planned reduction in the number of boot styles in the western boot business and the timing of inventory purchases to replace higher bar code product sales. This decrease in inventory was partially offset by higher material requirements for the military boot business and the timing of sales of office equipment to large county wide education and state government systems. The decrease in accounts payable used approximately \$1.8 million of cash primarily attributable to the timing of payments for inventory related to heavy fourth quarter sales of office equipment to large county-wide school systems. Income tax payments for prior year's tax liability and current year's estimated tax payments used approximately \$1.1 million of cash for the first six months of fiscal 2004.

Capital expenditures consisting primarily of production equipment for the military boot business totaled approximately \$349,000. Rental equipment related to the office products business cost per copy program increased by approximately \$719,000, all of which was transferred from inventory, for the first six months of fiscal 2004.

For the first six months of fiscal 2004, we used approximately \$322,000 for principal and interest payments related to our long-term debt. Dividend payments amounted to approximately \$230,000.

The increase in military boot sales to the U.S. Government may require substantial investment in raw materials, production equipment, and plant facilities. We will be required to invest approximately \$1.0 million in manufacturing equipment and supplies to comply with the U.S. Government Contract requirements. (See discussion below under Military Boot Business).

Off-Balance Sheet Arrangements

As of January 31, 2004, we did not utilize any off-balance sheet financing arrangements and do not anticipate doing so in the future.

SECOND QUARTER FISCAL 2004 COMPARED TO SECOND QUARTER FISCAL 2003

Consolidated net revenues for the second quarter of fiscal 2004 totaled \$19.4 million, a 10% increase over net revenues of \$17.6 million for the second quarter of fiscal 2003. This increase in net revenues resulted primarily from significantly higher military boot requirements for the U.S. Government (the Government) and slight market improvement for bar code products. The increase in military boot and bar code product sales was partially offset by reduced demand for western and work boots.

Consolidated gross profit amounted to \$4.2 million for the second quarters of both fiscal 2004 and 2003. As a percentage of net revenues, gross profit for the second quarter of fiscal 2004 was 22% as compared to 24% for the second quarter of fiscal 2003. This decline in gross profit resulted primarily from manufacturing inefficiencies associated with tripling military boot production to meet the surge in the Government's requirements and lower selling prices for military boots.

Consolidated research and development (R&D) costs for the second quarter of fiscal 2004 totaled \$479,000 as compared to \$265,000 for the same period of fiscal 2003. This increase in research and development costs was primarily related to the continuing development of a new bar code product.

Consolidated selling, general and administrative (SG&A) expenses for the second quarter of fiscal 2004 equaled \$3.8 million as compared to \$3.7 million for the second quarter of fiscal 2003. As a percentage of

net revenues, SG&A expenditures decreased from 20.9% for the second quarter of fiscal 2003 to 19.5% for the second quarter of fiscal 2004. Increased expenditures for health insurance were partially offset by decreased expenditures for sales and marketing activities and supplies.

Other income for the second quarter of fiscal 2004 did not include any significant gains on sale of assets as compared to \$314,000 for the sale of our motel property in the second quarter of fiscal 2003.

As a result of the above, a consolidated loss from operations amounted to \$22,000 for the second quarter of fiscal 2004 as compared to earnings from operations of \$601,000 for the second quarter of fiscal 2003.

Bar Code Business

Net revenues for the bar code business for the second quarter of fiscal 2004 amounted to \$2.7 million as compared to \$2.1 million for the second quarter of fiscal 2003. The market for bar code products continues to improve as the economic recovery continues.

Gross profit totaled \$792,000 for the second quarter of fiscal 2004 as compared to \$537,000 for the same quarter of fiscal 2003. This growth in gross profit resulted primarily from higher net revenues and improved sales of higher margin manufactured products.

R&D costs for the second quarter of fiscal 2004 increased to \$450,000 as compared to \$227,000 for the second quarter of fiscal 2003 as a result of intensified efforts to bring a new product to market.

SG&A expenses decreased from \$813,000 for the second quarter of fiscal 2003 to \$714,000 for the second quarter of fiscal 2004 primarily attributable to reduced travel costs, sales and marketing expenditures, and depreciation charges.

As a result of the above, the bar code business loss from operations for the second quarter of fiscal 2004 amounted to \$358,000 as compared to a loss from operations of \$496,000 for the second quarter of fiscal 2003.

Office Products Business

Net revenues for the office products business remained steady at \$4.5 million for the second quarter of fiscal 2004 and 2003, respectively. Service and supply sales continue to remain steady with a slight decrease in hardware, rental, and lease income.

Gross profit for the second quarter of fiscal 2004 amounted to \$1.3 million, up 8.3% from \$1.2 million for the second quarter of fiscal 2003. This increase in gross profit was primarily the result of increased service and supply sales. Gross profit as a percentage of net revenues for the second quarter of fiscal 2004 increased to 28.9% as compared to 26.7% for the second quarter of fiscal 2003.

Research and development costs decreased from \$38,000 for the second quarter of fiscal 2003 to \$29,000 for the second quarter of fiscal 2004.

SG&A costs for the second quarter of fiscal 2004 increased to \$1.4 million as compared to \$1.3 million for the second quarter of fiscal 2003. This 7.7% increase was primarily the result of higher sales salaries and group health insurance costs.

As a result of the above, the office products business loss from operations was \$228,000 for the second quarter of fiscal 2004 as compared to a loss from operations of \$192,000 in fiscal 2003.

Military Boot Business

Net revenues for the military boot business for the second quarter of fiscal 2004 totaled \$7.4 million, up 57% from \$4.7 million for the second quarter of fiscal 2003. This increase in net revenues was primarily the result of higher military boot requirements for the U.S. Government (the Government).

Gross profit amounted to \$923,000 for the second quarter of fiscal 2004 as compared to \$943,000 for the second quarter of fiscal 2003. As a percentage of net revenues, gross profit fell from 20% for the second quarter of fiscal 2003 to 12.4% for the second quarter of fiscal 2004. This decline in gross profit resulted primarily from lower selling prices for Government boots, smaller contribution of higher margin foreign and commercial boots in the sales mix, and manufacturing inefficiencies associated with expanded production requirements.

SG&A expenditures increased from \$242,000 for the second quarter of fiscal 2003 to \$338,000 for the second quarter of fiscal 2004 primarily as a result of higher administrative salaries, group health insurance costs, and professional fees.

As a result of the above, the military boot business earnings from operations totaled \$592,000 for the second quarter of fiscal 2004 as compared to \$702,000 for the same period of fiscal 2003.

During the second quarter of fiscal 2004, we completed our production obligations for military boots under the various extensions of the contract that was scheduled to expire on April 12, 2002. In addition, we began production of military boots under the U.S. Government contract (the Contract) awarded to us on September 30, 2003. Also, the Government issued a contract modification to change the sole construction of the boots covered by the Contract. While the Government is expected to allow price changes to cover the costs of this boot construction change, we will be required to invest approximately \$1.0 million in manufacturing equipment and supplies to comply with the Contract requirements.

Western and Work Boot Business

Net revenues for the western and work boot business for the second quarter of fiscal 2004 amounted to \$5.1 million as compared to \$6.3 million for the second quarter of fiscal 2003. This decrease in net revenues was primarily the result of a soft market for western footwear.

Gross profit for the second quarter of fiscal 2004 totaled \$1.2 million as compared to \$1.6 million for the second quarter of fiscal 2003. As a percentage of net revenues, gross profit fell from 25.4% for the second quarter of fiscal 2003 to 23.5% for the second quarter of fiscal 2004. This decrease in gross profit was primarily the result of unabsorbed import costs, inventory markdowns and write-offs, manufacturing inefficiencies, and training costs related to the conversion of the factory to military boot production (discussed below).

SG&A expenditures amounted to approximately \$1.25 million for the second quarters of both fiscal 2004 and 2003. Lower sales commissions and marketing expenses were partially offset by increased expenditures for travel costs and bad debt write-offs.

As a result of the above, the western and work boot business net loss from operations amounted to \$178,000 for the second quarter of fiscal 2004 as compared to net earnings from operations of \$169,000 for the second quarter of fiscal 2003.

During the second quarter, management decided to discontinue the manufacture of western and work boots at the Waverly, Tennessee plant. Future western and work boot products will be imported from global contract manufacturers. The Tennessee plant was converted to full military boot production in January 2004.

FIRST SIX MONTHS FISCAL 2004 COMPARED TO FIRST SIX MONTHS FISCAL 2003

Consolidated net revenues for the first six months of fiscal 2004 totaled \$40.8 million as compared to \$37.4 million for the first six months of fiscal 2003. This increase in net revenues was primarily attributable to higher military boot requirements by the Government partially offset by lower sales of western and work boots and lower selling prices for military boots.

Consolidated gross profit amounted to \$9.3 million for the first six months of fiscal 2004 as compared to \$9.0 million for the first six months of fiscal 2003. As a percentage of net revenues, gross profit decreased from 24% to 23% for the first six months of fiscal 2003 and 2004, respectively. Gross profit increases attributable to higher net revenues were partially offset by lower sales prices and greater per unit manufacturing costs for military boots.

Consolidated research and development (R&D) costs for the first six months of fiscal 2004 totaled \$833,000 as compared to \$425,000 for the same six-month period of fiscal 2003. The increase in R&D was the result of intensified efforts to bring a new bar code product to market.

Consolidated selling, general and administrative (SG&A) expenditures for the first six months of fiscal 2004 totaled \$7.7 million as compared to \$7.4 million for the first six months of fiscal 2003. This 4% growth in SG&A costs for the comparative periods was primarily attributable to increased expenditures for administrative salaries, sales commissions, group health insurance, professional fees, and bad debt write-offs that were partially offset by lower charges for sales and marketing costs and depreciation.

Other income for the first six months of fiscal 2004 did not include any significant gains on sale of assets as compared to \$314,000 for the sale of our motel property in the first six months of fiscal 2003.

As a result of the above, consolidated earnings from operations for the first six months of fiscal 2004 totaled \$840,000 as compared to \$1.5 million for the first six months of fiscal 2003.

Bar Code Business

Net revenues for the bar code business for the first six months of fiscal 2004 totaled \$4.9 million as compared to \$5.0 million for the first six months of fiscal 2003. The soft bar code products market was the primary reason for the depressed net revenues for these comparative six-month periods of fiscal 2004 and 2003.

Gross profit for the first six months of fiscal 2004 amounted to \$1.5 million as compared to \$1.3 million for the first six months of fiscal 2003. As a percent of net revenues, gross profit improved from 26% for the first six months of fiscal 2003 to 31% for the first six months of fiscal 2004. This growth in gross profit resulted primarily from increased contribution to the sales mix of higher margin manufactured bar code products.

R&D costs for the first six months of fiscal 2004 were \$788,000 as compared to \$374,000 for the same period of fiscal 2003 as a result of intensified efforts to bring the new product to market.

SG&A expenditures for the first six months of fiscal 2004 totaled \$1.4 million, a reduction of 17.6% from \$1.7 million for the first six months of fiscal 2003. This decrease in SG&A expenditures was primarily attributable to reduced sales and administrative salaries, sales and marketing costs, real estate and equipment rentals, travel expenses, and depreciation charges.

As a result of the above, the bar code business net loss amounted to \$700,000 for the first six months of fiscal 2004 and 2003.

Office Products Business

Net revenues for the office products business totaled \$9.9 million for the first six months of fiscal 2004 as compared to \$9.3 million reported for the first six months of fiscal 2003. This 6.5% increase was primarily the result of increased rental income and service and supply sales offset slightly by a decrease in hardware, lease, and freight income.

Gross profit for the first six months of fiscal 2004 amounted to \$2.4 million, a 14.3% increase from the \$2.1 million reported in fiscal 2003. This increase in gross profit is primarily attributable to an increase in service and supply sales while costs remained stable.

Research and development costs for the first six months of fiscal 2004 amounted to \$44,000, a decrease of 13.7% from \$51,000 reported for first six months of fiscal 2003.

SG&A expenses for the first six months of fiscal 2004 were \$2.9 million as compared to \$2.5 million reported in the first six months of fiscal 2003. This increase in SG&A expenses was primarily attributable to increased sales salaries, commissions, travel expenses, administrative salaries, group health insurance and professional fees.

As a result of the above, the operating loss for the office products business amounted to \$649,000 for the first six months of fiscal 2004 as compared to \$530,000 reported for the first six months of fiscal 2003.

Military Boot Business

Net revenues for the military boot business for the first six months of fiscal 2004 totaled \$15.7 million as compared to \$9.9 million for the first six months of fiscal 2003. This 59% increase in net revenues was the result of significantly higher military boot requirements for the Government.

Gross profit was \$2.7 million for the first six months of fiscal 2004 as compared to \$2.0 million for the first six months of fiscal 2003. This growth in gross profit resulted from the increase in net revenues. As a percentage of net revenues, gross profit decreased from 20.2% for the first six months of fiscal 2003 to 17.2% for the first six months of fiscal 2004. The decline in gross profit percentage was primarily attributable to lower military boot sales prices, decreased contribution of higher margin foreign and commercial boot sales in the overall sales mix, and higher per unit manufacturing costs.

SG&A expenditures for the first six months of fiscal 2004 totaled \$671,000 as compared to \$449,000 for the first six months of fiscal 2003. This increase in SG&A expenses resulted from higher administrative salaries, group health insurance costs, and professional fees.

As a result of the above, the military boot business net earnings from operations amounted to \$2.1 million for the first six months of fiscal 2004 as compared to \$1.5 million for the first six months of fiscal 2003.

Western and Work Boot Business

Net revenues for the western and work boot business totaled \$11.0 million for the first six months of fiscal 2004 as compared to \$13.1 million for the first six months of fiscal 2003. The decrease in net revenues was primarily the result of a soft market for western and work boot products.

Gross profit for the first six months of fiscal 2004 amounted to \$2.7 million, down from the \$3.5 million for the first six months of fiscal 2003. This reduction in gross profit was primarily attributable to lower net revenues. As a percentage of net revenues, gross profit decreased from 26.7% for the first six months of fiscal 2003 to 24.5% for the first six months of fiscal 2004. This decline in gross profit percentage resulted from inventory write-offs and manufacturing costs associated with assisting the military footwear business in making military boots for the Government.

SG&A expenditures for the first six months of both fiscal 2004 and 2003 amounted to \$2.5 million as a result of lower sales commissions, sales and marketing costs, and employee benefits that were offset by higher professional fees and bad debt write-offs.

As a result of the above, the western and work boot business loss from operations amounted to \$165,000 for the first six months of fiscal 2004 as compared to earnings from operations of \$650,000 for the first six months of fiscal 2003.

IMPACT OF RECENTLY ISSUED ACCOUNTING STANDARDS

In May 2003, SFAS No. 150, Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity, was issued and established standards for how an issuer classifies and measures certain financial instruments with characteristics of both liabilities and equity. This statement is effective for us beginning with the first quarter of fiscal 2004.

FORWARD-LOOKING STATEMENTS

In addition to historical information, this Quarterly Report includes certain forward-looking statements as such term is defined in Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Important factors that could cause actual results or events to differ materially from those projected, estimated, assumed or anticipated in any such forward-looking statements include: the effect of competitive products and pricing, risks unique to selling goods to the Government (including variation in the Government's requirements for our products and the Government's ability to terminate its contracts with vendors), our expectations about future Government orders for military boots, loss of key customers, acquisitions, supply interruptions, additional financing requirements, loss of key management personnel, our ability to successfully develop new products and services, and the effect of general economic conditions in our markets.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company is exposed to the impact of interest rate changes due to its aggregate \$4.75 million lines of credit and a term loan through its wholly owned subsidiary, Dan Post Boot Company. As of January 31, 2004, there was no outstanding indebtedness under the lines of credit and approximately \$3.4 million was outstanding on the term loan. The Company does not buy or sell derivative financial instruments for trading or other purposes. Borrowings under the Company's credit facilities described above bear interest at rates based upon the prime rate or prime rate less a margin of one-half percent offered by the applicable lender. The Company has not entered into any swap agreements or engaged in any other hedging activities with respect to this variable rate indebtedness. A 50% increase in the interest rates under the Company's credit facilities would increase annual interest expense by approximately \$61,250 (assuming the Company's aggregate borrowings under the credit facilities averaged \$3.5 million during a fiscal year).

ITEM 4. CONTROLS AND PROCEDURES

Under the supervision and with the participation of our management, including the Chief Executive Officer and Vice President of Finance, we have evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Vice President of Finance have concluded that these disclosure controls and procedures are effective. There were no changes in our internal control over financial reporting that occurred during the second quarter of fiscal 2004 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION**Item 1. Legal Proceedings**

While from time to time we are engaged in litigation incidental to our business, we are not currently party to any material legal proceedings.

Item 2.

This item is not applicable and has been omitted.

Item 3.

This item is not applicable and has been omitted.

Item 4. Submission of Matters to a Vote of Security Holders

At the Company's Annual Meeting of Stockholders held on December 18, 2003, the following individuals were elected to the Board of Directors:

	Votes For		Votes Withheld	
	Class A	Class B	Class A	Class B
D. Gary McRae	N/A	720,056	N/A	152
William H. Swan	N/A	720,056	N/A	152
Hilton J. Cochran	N/A	720,051	N/A	157
Victor A. Karam	N/A	720,056	N/A	152
James W. McRae	N/A	720,056	N/A	152
Brady W. Dickson	1,778,319	N/A	23,031	N/A
Harold W. Smith	1,444,404	N/A	356,946	N/A

The following proposal was approved at the Company's Annual Meeting:

Affirmative Votes	Negative Votes	Votes Withheld
--------------------------	-----------------------	-----------------------

	Class A	Class B	Class A	Class B	Class A	Class B
Ratify the appointment of Grant Thornton LLP as independent certified public accountants for the current fiscal year	1,794,157	720,159	7,122	46	71	3

Item 5.

This item is not applicable and has been omitted.

Item 6. Exhibits and Reports on Form 8-K

(a) Exhibits

3.1 Certificate of Incorporation (Incorporated by reference to Exhibit 3.1 to the Registrant's Form S-14, Registration No. 2-85908).

3.2 Amendment to the Certificate of Incorporation (Incorporated by reference to Exhibit 3 to the Registrant's Form 10-K for the year ended August 1, 1987).

3.3 Restated Bylaws of the Registrant effective May 29, 2001. (Incorporated by reference to Exhibit 3.3 to the Registrant's Form 10-K for the year ended July 28, 2001).

31.1 Rule 13a-14(a)/15d-14(a) Certification for D. Gary McRae, President and CEO (Filed herein). Page 19.

31.2 Rule 13a-14(a)/15d-14(a) Certification for Marvin G. Kiser, Sr., Vice President of Finance (Filed herein). Page 20.

32.1 Certification pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 (18 U.S.C. Section 1350), for D. Gary McRae, President and CEO (Filed herein). Page 21.

32.2 Certification pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 (18 U.S.C. Section 1350), for Marvin G. Kiser, Sr., Vice President of Finance (Filed herein). Page 22.

(b) No reports on Form 8-K were filed during the quarter ended January 31, 2004.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
