FORWARD-LOOKING STATEMENTS

In order to utilize the “Safe Harbor” provisions of the United States Private Securities Litigation Reform Act of 1995 (the “Reform Act”), Sappi Limited (the “Company”) is providing the following cautionary statement. Except for historical information contained herein, statements contained in this Report on Form 6-K may constitute “forward-looking statements” within the meaning of the Reform Act. The words “believe”, “anticipate”, “expect”, “intend”, “estimate”, “plan”, “assume”, “positioned”, “will”, “may”, “should”, “risk” and other similar expressions which are predictions of or indicate future events and future trends which do not relate to historical matters identify forward-looking statements. In addition, this Report on Form 6-K may include forward-looking statements relating to the Company’s potential exposure to various types of market risks, such as interest rate risk, foreign exchange rate risk and commodity price risk. Reliance should not be placed on forward-looking statements because they involve known and unknown risks, uncertainties and other factors which are in some cases beyond the control of the Company, together with its subsidiaries (the “Group”), and may cause the actual results, performance or achievements of the Group to differ materially from anticipated future results, performance or achievements expressed or implied by such forward-looking statements (and from past results, performance or achievements). Certain factors that may cause such differences include but are not limited to: the highly cyclical nature of the pulp and paper industry; pulp and paper production, production capacity, input costs including raw material, energy and employee costs, and pricing levels in North America, Europe, Asia and southern Africa; any major disruption in production at the Group’s key facilities; changes in environmental, tax and other laws and regulations; adverse changes in the markets for the Group’s products; any delays, unexpected costs or other problems experienced with any business acquired or to be acquired; consequences of the Group’s leverage (including as a result of adverse changes in credit markets that affect our ability to raise capital when needed); adverse changes in the South African political situation and economy or the effect of governmental efforts to address present or future economic or social problems; and the impact of future investments, acquisitions and dispositions (including the financing of investments and acquisitions) and any delays, unexpected costs or other problems experienced in connection with dispositions. These and other risks, uncertainties and factors are discussed in the Company’s Annual Report on Form 20-F and other filings with and submissions to the Securities and Exchange Commission, including this Report on Form 6-K. Shareholders and prospective investors are cautioned not to place undue reliance on these forward-looking statements. These forward-looking statements are made as of the date of the submission of this Report on Form 6-K and are not intended to give any assurance as to future results. The Company undertakes no obligation to publicly update or revise any of these forward-looking statements, whether to reflect new information or future events or circumstances or otherwise.

third quarter

Comment

In a seasonally slower quarter, operating performance improved compared to last year. The quarter was marked by severe input cost increases, offset to some extent by our cost savings efforts across the group and successful price increases in North America and South Africa. Selling prices in Europe were flat quarter-on-quarter, but declined from last year. The unfavourable impact of wood, energy and chemical price increases on the group results was US\$19 million compared to the prior quarter and US\$45 million compared to a year earlier.

Pulp prices continued to increase with NBSK increasing to an average of US\$900 per ton from an average of US\$880 per ton in the previous quarter. The increase in pulp prices was beneficial to the group as we sell slightly more pulp than we purchase.

Operating profit excluding special items improved to US\$88 million from US\$81 million last year, but the group operating profit margin excluding special items declined from 6.2% last year to 5.9% this quarter. Special items of US\$111 million include an unfavourable plantation price fair value revaluation adjustment of US\$105 million and a loss of contribution resulting from a flood at Saiccor amounting to US\$6 million. The negative plantation price fair value adjustment was mainly due to a sharp increase in fuel prices. More details of special items are set out on page 9.

An operating loss of US\$23 million (including special items) was recorded, compared to an operating profit of US\$87 million a year ago.

Group sales for the quarter were US\$1.5 billion, a 15.2% increase compared to the third quarter last year, mainly as a result of higher sales volumes in our fine paper businesses together with improved selling prices in North America and Southern Africa.

Net finance costs of US\$45 million for the quarter increased by US\$8 million from last year due to discontinuing capitalisation of interest on the Saiccor expansion project during the quarter, higher debt levels and higher interest rates.

Tax relief on the reported loss before taxation of US\$68 million was limited due to tax losses in certain regions that could not be brought to account.

Basic earnings per share (unfavourably impacted by special items) for the quarter was a loss of 28 US cents, compared to earnings of 23 US cents a year ago.

Cash flow and debt

Cash generated from operations for the quarter was US\$156 million compared to US\$142 million a year ago. Working capital decreased by US\$29 million during the quarter compared to an increase of US\$36 million during the third quarter last year. We expect a further significant reduction in working capital in our fourth quarter.

Included in our cash flow for the quarter were post employment benefit payments of US\$12 million compared to US\$35 million in the equivalent quarter last year. Post employment benefit payments are expected to be US\$90 million for the year, compared to US\$101 million last year, and are expected to decline in 2009.

Net finance costs paid increased to US\$83 million compared to US\$42 million a year ago, mainly as a result of the settlement of forward exchange contracts related to long term debt and higher debt levels.

sappi limited

3

third quarter

Taxation paid of US\$40 million, was US\$25 million higher than a year ago mainly due to a provisional tax payment made by our South African business.

Capital expenditure of US\$103 million included US\$52 million for the Saiccor expansion project. We expect to make the final capital expenditure payments on the Saiccor expansion project of approximately US\$50 million over the next two quarters.

Net debt was US\$2,667 million at quarter end, a net increase of US\$6 million from the prior quarter. This increase was the net effect of cash utilised offset by a positive currency movement for the quarter.

Current interest-bearing borrowings of US\$990 million include US\$393 million of securitised trade debtors under a facility, which in the normal course of business is expected to run until 2012. The group has access to US\$620 million as part of a committed revolving loan facility as at the end of June 2008 and cash resources of US\$227 million.

Net debt to total capitalisation was 50.2% at the end of the quarter compared to 50.3% for the prior quarter.

Sales volumes for our Fine Paper business increased by 6.5% from last year, while average prices in Dollar terms improved 11%, partly due to currency movements. Pricing and margins improved in our North American business, but worsened in our European business.

Cost pressure, particularly in raw materials and energy, increased in all regions.

In a tough economic and trading environment, we recovered some market share in Europe during the quarter with sales volumes improving 6% compared to last year. Selling prices for coated fine paper sheets were down from last year and flat compared to last quarter, while there was an improvement in coated fine paper reel prices in some European countries.

Demand for our graphics paper was seasonally weaker in the quarter, except for coated mechanical paper, which showed no sign of seasonal decline. Our speciality paper performed well in the quarter.

Despite our continued focus on cost savings efforts, our operating margin excluding special items declined from 2.4% to 1.4%, mainly due to significant increases in input cost prices. The impact of energy and chemical cost increases compared to the equivalent quarter last year was US\$18 million. These cost increases were partially offset by the sale of carbon credits to the value of US\$9 million during the quarter.

We have announced price increases effective from 1 September 2008 of between 8% and 10%, in order to offset the input cost price increases.

Our North American business continued to improve with stronger reel volumes and increased reel and pulp selling prices, compared to last year. Sales volumes increased 8% compared to the equivalent quarter last year. Our order books for reels remained strong; however, we saw the impact of a slowing US economy on our sheet business.

Realised paper prices improved 6% on last year, while realised pulp prices increased by 14%. During the quarter, coated fine paper price increases have been widely announced by the US industry.

The operating profit margin increased to 5.9% compared to 2.2% last year despite significant input cost increases, particularly in wood, energy and chemicals. Price escalation of these input costs had a negative impact of US\$20 million compared to the equivalent quarter last year.

US imports of coated paper continued to decline during the quarter due to the weakness of the US Dollar, increased transport costs and improved demand in the Far East.

Although we saw improved pricing during the quarter, margins came under pressure from increased input costs, mainly pulp and chemicals. Sales volume was flat on last year. The results were negatively impacted by a seasonal slowing of demand and a temporary shut of the pulp plant at Stanger due to the unavailability of bagasse fibre.

Demand remained strong for chemical cellulose, but softened for our other products. Our pulp and paper sales volumes were down 3% for the quarter compared to a year ago.

Pricing improved in our Kraft business, chemical cellulose prices remained strong and our export margins benefited from a weaker Rand against the US Dollar compared to last year.

Special items include an unfavourable plantation price fair value adjustment of US\$105 million. The valuation takes into account the cost of delivering wood to market which was impacted by increased fuel prices.

The results of Saiccor were negatively impacted by production interruptions related to our expansion project and a severe flood giving rise to property damage and business interruption that was self-insured. The US\$6 million financial impact of the flood is included under special items. The Saiccor expansion is substantially complete and is now expected to be commissioned towards the end of August.

Input cost pressure, particularly from chemicals, has increased in recent months and has put increased pressure on margins.

sappi limited

8

third quarter

Outlook

Continued upward pressure on input costs remains our biggest challenge in the short term. Further increases are expected in energy, fibre and chemical costs during the fourth quarter. In South Africa wage negotiations have been completed. Wage inflation remains an important factor in all our businesses. To mitigate high energy costs, we have initiated further energy projects in all regions.

Although demand remains fairly robust for our products in all regions, a global economic slow-down would impact demand. We are responding to these challenges by continuing to focus on cost control, harnessing our buying power through a global procurement drive and through maximising manufacturing efficiencies. Increasing selling prices continues to be essential to restore and improve profitability. We are implementing price increases in all our businesses.

The operating performance for our Southern African and US businesses is expected to remain strong, while margins in all our businesses, particularly in Europe, will be under pressure due to high input costs. Our Southern African business will be further impacted by a recovery boiler rebuild at our Usutu mill, which will have an unfavourable impact of approximately US\$12 million on operating profit in the fourth quarter. In light of unrelenting input cost increases, we expect our fourth quarter operating profit, excluding special items, to be lower than the third quarter, however for the full year, we expect operating profit, excluding special items, to be well above last year.

special items

Special items cover those operating items which management believe are material by nature or amount to the results and

require separate disclosure. Such items would generally include profit and loss on disposal of property, investments and

businesses, asset impairments, restructuring charges, financial impacts of natural disasters and non-cash gains or losses

on the price fair value adjustment of plantations.

Special items, excluding interest and tax effects, for the relevant periods are:

forward-looking statements

Certain statements in this release that are neither reported financial results nor other historical information, are forward-looking statements, including but not limited to statements that are predictions of or indicate future earnings, savings, synergies, events, trends, plans or objectives. Undue reliance should not be placed on such statements because, by their nature, they are subject to known and unknown risks and uncertainties and can be affected by other factors, that could cause actual results and company plans and objectives to differ materially from those expressed or implied in the forward-looking statements (or from past results). Such risks, uncertainties and factors include, but are not limited to the highly cyclical nature of the pulp and paper industry (and the factors that contribute to such cyclical nature, such as levels of demand, production capacity, production, input costs including raw material, energy and employee costs, and pricing), adverse changes in the markets for the group's products, consequences of substantial leverage, including as a result of adverse changes in credit markets that affect our ability to raise capital when needed, changing regulatory requirements, unanticipated production disruptions (including as a result of planned or unexpected power outages), economic and political conditions in international markets, the impact of investments, acquisitions and dispositions (including related financing), any delays, unexpected costs or other problems experienced with integrating acquisitions and achieving expected savings and synergies and currency fluctuations. The company undertakes no obligation to publicly update or revise any of these forward-looking statements, whether to reflect new information or future events or circumstances or otherwise.

Notes to the group results

1.

Basis of preparation

The condensed financial statements have been prepared in accordance with International Accounting Standard 34, *Interim Financial Reporting*. The accounting policies and methods of computation used in the preparation of the results are consistent, in all material respects, with those used in the annual financial statements for September 2007 which are compliant with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board.

Standards Board.

The preliminary results for the quarter and nine month period ended June 2008 as set out on pages 12 to 17 have been reviewed in terms of the International Standard on Review Engagements 2410 by the group's auditors, Deloitte & Touche. Their unmodified review report is available for inspection at the company's registered offices. The results for the quarters ended March 2008 and December 2007 have not been audited or reviewed on a stand-alone basis by the auditors.

Reclassification of comparative figures – Cash outflows relating to contributions to post employment benefit funds previously reflected in cash utilised in investing activities, have been included in cash generated from operations.

2.

Restatement

During third quarter 2007, the group recognised a taxation credit of US\$14 million related to a tax rate change in Germany. The recognition was based on the group's judgment that the change in the German tax rate from 38% to 30% had been substantively enacted during the quarter ended June 2007. The group has subsequently concluded that the tax law change was substantively enacted on 6 July 2007, and accordingly, the impact of the tax rate change should have been reflected in its fourth quarter results. The change has no impact on the group's results for the year ended September 2007, however it does impact the deferred taxation and profit for the period for the quarters ended June and September 2007 and for the nine months ended June 2007 as follows:

69

** The decrease in contingent liabilities reflects management's revised estimate of losses which could arise from taxation queries to which*

certain group companies are subject. These amounts have now been recognised as liabilities.

9.

Material balance sheet movements

Current and non-current interest bearing borrowings

The movement on these balances between September 2007 and June 2008 is largely due to (i) US\$190 million of expenditure on the Saiccor expansion project, (ii) financing for the purchase of leased equipment for US\$75 million and (iii) US\$133 million of currency movements and fair value adjustments.

Taxation

The movement is a result of certain tax liabilities which the group has settled in the past nine months.

Supplemental information
(This information has not been reviewed)
general definitions

Average – averages are calculated as the sum of the opening and closing balances for the relevant period divided by two

Fellings – the amount charged against the income statement representing the standing value of the plantations harvested

NBSK – Northern Bleached Softwood Kraft pulp. One of the main varieties of market pulp, mainly produced from spruce trees in Scandinavia, Canada and north eastern USA. The NBSK is a benchmark widely used in the pulp and paper industry for comparative purposes

SG&A – selling, general and administrative expenses

Non-GAAP measures

The group believes that it is useful to report these non-GAAP measures for the following reasons:

- these measures are used by the group for internal performance analysis;
- the presentation by the group's reported business segments of these measures facilitates comparability with other companies in our industry, although the group's measures may not be comparable with similarly titled profit measurements reported by other companies; and
- it is useful in connection with discussion with the investment analyst community and debt rating agencies.

These non-GAAP measures should not be considered in isolation or construed as a substitute for GAAP measures in accordance with IFRS

EBITDA excluding special items – earnings before interest (net finance costs), tax, depreciation, amortisation and special items

Headline earnings – as defined in circular 8/2007 issued by the South African Institute of Chartered Accountants, separates from earnings all separately identifiable re-measurements. It is not necessarily a measure of sustainable earnings. It is a listing requirement of the JSE Limited to disclose headline earnings per share

Net debt – current and non-current interest-bearing borrowings, and bank overdrafts (net of cash, cash equivalents and short-term deposits)

Net debt to total capitalisation – Net debt divided by shareholders' equity plus minority interest, non-current liabilities, current interest-bearing borrowings and overdraft

Net operating assets – total assets (excluding deferred taxation and cash) less current liabilities (excluding interest-bearing borrowings and bank overdraft)

Net assets – total assets less current liabilities

Net asset value – shareholders' equity plus deferred tax liabilities minus deferred tax assets

Net asset value per share – net asset value divided by the number of shares in issue at balance sheet date

ROE – return on average equity. Profit for the period divided by average shareholders' equity

RONOA – return on net operating assets. Operating profit excluding special items divided by average net operating assets

Special items – special items cover those items which management believe are material by nature or amount to the operating results and require separate disclosure. Such items would generally include profit and loss on disposal of property, investments and businesses, asset impairments, restructuring charges, financial impacts of natural disasters and non-cash gains or losses on the price fair value adjustment of plantations

The above financial measures are presented to assist our shareholders and the investment community in interpreting our financial

results. These financial measures are regularly used and compared between companies in our industry.

 (1)

In connection with the U.S. Securities Exchange Commission (“SEC”) rules relating to “Conditions for Use of Non-GAAP Financial Measures”, we have reconciled EBITDA excluding special items to net profit rather than operating profit. As a result our definition retains minority interest as part of EBITDA excluding special items. Operating profit excluding special items represents earnings before interest (net finance costs), taxation and special items. Net finance costs includes: gross interest paid; interest received; interest capitalised; net foreign exchange gains; and net fair value adjustments on interest rate financial instruments. See the group income statement for an explanation of the computation of net finance costs. Special items cover those items which management believe are material by nature or amount to the results and require separate disclosure. Such items would generally include profit and loss on disposal of property, investments and businesses, asset impairments, restructuring charges, financial impacts of natural disasters and non-cash gains or losses on the price fair value adjustment of plantations. EBITDA excluding special items represents operating profit before depreciation, amortisation and special items. We use both operating profit excluding special items and EBITDA excluding special items as internal measures of performance to benchmark and compare performance, both between our own operations and as against other companies. Operating profit excluding

special items and EBITDA excluding special items are measures used by the group, together with measures of performance under IFRS, to compare the relative performance of operations in planning, budgeting and reviewing the performances of various businesses. We believe they are useful and commonly used measures of financial performance in addition to net profit, operating profit and other profitability measures under IFRS because they facilitate operating performance comparisons from period to period and company to company. By eliminating potential differences in results of operations between periods or companies caused by factors such as depreciation and amortisation methods, historic cost and age of assets, financing and capital structures and taxation positions or regimes, we believe both operating profit excluding special items and EBITDA excluding special items can provide a useful additional basis for comparing the current performance of the operations being evaluated. For these reasons, we believe operating profit excluding special items and EBITDA excluding special items and similar measures are regularly used by the investment community as a means of comparison of companies in our industry. Different companies and analysts may calculate operating profit excluding special items and EBITDA excluding special items differently, so making comparisons among companies on this basis should be done very carefully. Operating profit excluding special items and EBITDA excluding special items are not measures of performance under IFRS and should not be considered in isolation or construed as a substitute for operating profit or net profit as indicators of the company's operations in accordance with IFRS.
