QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the Quarterly Period Ended September 30, 2014
OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

Commission file number 1-12387

TENNECO INC.

(Exact name of registrant as specified in its charter)

Delaware 76-0515284
(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification No.)

500 North Field Drive, Lake Forest, Illinois 60045
(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code: (847) 482-5000

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock as of the latest practicable date.

Common Stock, par value \$0.01 per share: 61,068,245 shares outstanding as of October 31, 2014.

CAUTIONARY STATEMENT FOR PURPOSES OF THE "SAFE HARBOR" PROVISIONS OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

This Quarterly Report contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 concerning, among other things, our prospects and business strategies. These forward-looking statements are included in various sections of this report, including the section entitled "Outlook" appearing in Item 2 of this report. The words "may," "will," "believe," "should," "could," "plan," "expect," "anticipate," "estimate," and similar expressions (and variations thereof), identify these forward-looking statements. Although we believe that the expectations reflected in these forward-looking statements are based on reasonable assumptions, these expectations may not prove to be correct. Because these forward-looking statements are also subject to risks and uncertainties, actual results may differ materially from the expectations expressed in the forward-looking statements. Important factors that could cause actual results to differ materially from the expectations reflected in the forward-looking statements include:

• general economic, business and market conditions;

• our ability to source and procure needed materials, components and other products and services in accordance with customer demand and at competitive prices;

• the cost and outcome of existing and any future claims, legal proceedings or investigations, including, but not limited to, any of the foregoing arising in connection with the ongoing global antitrust investigation, product performance, product safety or intellectual property rights;

• changes in capital availability or costs, including increases in our cost of borrowing (i.e., interest rate increases), the amount of our debt, our ability to access capital markets at favorable rates, and the credit ratings of our debt;

• changes in consumer demand, prices and our ability to have our products included on top selling vehicles, including any shifts in consumer preferences away from light trucks, which tend to be higher margin products for our customers and us, to other lower margin vehicles, for which we may or may not have supply arrangements;

• changes in consumer demand for our automotive, commercial or aftermarket products, or changes in automotive and commercial vehicle manufacturers' production rates and their actual and forecasted requirements for our products, due to difficult economic conditions, such as the prolonged recession in Europe;

• the overall highly competitive nature of the automobile and commercial vehicle parts industries, and any resultant inability to realize the sales represented by our awarded book of business (which is based on anticipated pricing and volumes over the life of the applicable program);

• the loss of any of our large original equipment manufacturer ("OEM") customers (on whom we depend for a substantial portion of our revenues), or the loss of market shares by these customers if we are unable to achieve increased sales to other OEMs or any change in customer demand due to delays in the adoption or enforcement of worldwide emissions regulations;

• our ability to successfully execute cash management and other cost reduction plans, including our current European cost reduction initiatives, and to realize anticipated benefits from these plans;

• industrywide strikes, labor disruptions at our facilities or any labor or other economic disruptions at any of our significant customers or suppliers or any of our customers' other suppliers;

• increases in the costs of raw materials, including our ability to successfully reduce the impact of any such cost increases through materials substitutions, cost reduction initiatives, customer recovery and other methods;

• the negative impact of higher fuel prices on transportation and logistics costs, raw material costs and discretionary purchases of vehicles or aftermarket products;

• the cyclical nature of the global vehicle industry, including the performance of the global aftermarket sector and the impact of vehicle parts' longer product lives;

• costs related to product warranties and other customer satisfaction actions;

• the failure or breach of our information technology systems, including the consequences of any misappropriation, exposure or corruption of sensitive information stored on such systems and the interruption to our business that such failure or breach may cause;

• the impact of consolidation among vehicle parts suppliers and customers on our ability to compete;

• changes in distribution channels or competitive conditions in the markets and countries where we operate, including the impact of changes in distribution channels for aftermarket products on our ability to increase or maintain

aftermarket sales;

- economic, exchange rate and political conditions in the countries where we operate or sell our products;
- customer acceptance of new products;
- new technologies that reduce the demand for certain of our products or otherwise render them obsolete;

3

- our ability to introduce new products and technologies that satisfy customers' needs in a timely fashion;
- our ability to realize our business strategy of improving operating performance;
- our ability to successfully integrate any acquisitions that we complete and effectively manage our joint ventures and other third-party relationships;
- changes by the Financial Accounting Standards Board or the Securities and Exchange Commission of authoritative generally accepted accounting principles or policies;
- changes in accounting estimates and assumptions, including changes based on additional information;
- any changes by the International Organization for Standardization (ISO) or other such committees in their certification protocols for processes and products, which may have the effect of delaying or hindering our ability to bring new products to market;
- the impact of the extensive, increasing and changing laws and regulations to which we are subject, including environmental laws and regulations, which may result in our incurrence of environmental liabilities in excess of the amount reserved;
- the potential impairment in the carrying value of our long-lived assets and goodwill or our deferred tax assets;
- potential volatility in our effective tax rate;
- natural disasters, such as the 2011 earthquake in Japan and flooding in Thailand, and any resultant disruptions in the supply or production of goods or services to us or by us or in demand by our customers;
- acts of war and/or terrorism, as well as actions taken or to be taken by the United States and other governments
- as a result of further acts or threats of terrorism, and the impact of these acts on economic, financial and social conditions in the countries where we operate; and
- the timing and occurrence (or non-occurrence) of other transactions, events and circumstances which may be beyond our control.

The risks included here are not exhaustive. Refer to "Part I, Item 1A — Risk Factors" in our annual report on Form 10-K for the year ended December 31, 2013 and "Part II, Item 1A — Risk Factors" of this Form 10-Q for further discussion regarding our exposure to risks. Additionally, new risk factors emerge from time to time and it is not possible for us to predict all such risk factors, nor to assess the impact such risk factors might have on our business or the extent to which any factor or combination of factors may cause actual results to differ materially from those contained in any forward-looking statements. Given these risks and uncertainties, investors should not place undue reliance on forward-looking statements as a prediction of actual results.

PART I.

FINANCIAL INFORMATION

ITEM 1. FINANCIAL STATEMENTS (UNAUDITED)

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Tenneco Inc.:

We have reviewed the accompanying condensed consolidated balance sheet of Tenneco Inc. and consolidated subsidiaries as of September 30, 2014, and the related condensed consolidated statements of income, comprehensive income, and cash flows for the three and nine month periods ended September 30, 2014 and 2013 and changes in shareholders' equity for the nine months ended September 30, 2014 and 2013. These interim financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole.

Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying condensed consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet as of December 31, 2013, and the related consolidated statements of income, comprehensive income, cash flows and changes in shareholders' equity for the year then ended (not presented herein), and in our report dated February 27, 2014, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2013, is fairly stated in all material respects in relation to the consolidated balance sheet from which it has been derived.

/s/ PricewaterhouseCoopers LLP

Milwaukee, Wisconsin

November 5, 2014

The "Report of Independent Registered Public Accounting Firm" included above is not a "report" or "part of a Registration Statement" prepared or certified by an independent accountant within the meaning of Sections 7 and 11 of the Securities Act of 1933, and the accountants' Section 11 liability does not extend to such report.

(1) Consolidation and Presentation

As you read the accompanying financial statements you should also read our Annual Report on Form 10-K for the year ended December 31, 2013.

In our opinion, the accompanying unaudited financial statements contain all adjustments (consisting of normal recurring adjustments) necessary to present fairly Tenneco Inc.'s results of operations, comprehensive income, financial position, cash flows, and changes in shareholders' equity for the periods indicated. We have prepared the unaudited condensed consolidated financial statements pursuant to the rules and regulations of the U.S. Securities and Exchange Commission for interim financial information. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America (U.S. GAAP) for annual financial statements.

Our condensed consolidated financial statements include all majority-owned subsidiaries. We carry investments in 20 percent to 50 percent owned companies in which the Company does not have a controlling interest, as equity method investments, at cost plus equity in undistributed earnings since the date of acquisition and cumulative translation adjustments. We have eliminated all intercompany transactions.

(2) Financial Instruments

The carrying and estimated fair values of our financial instruments by class at September 30, 2014 and December 31, 2013 were as follows:

	September 30, 2014		December 31, 2013	
	Carrying Amount (Millions)	Fair Value	Carrying Amount	Fair Value
Long-term debt (including current maturities)	\$1,188	\$1,226	\$1,021	\$1,089

Instruments with off-balance sheet risk:

Foreign exchange forward contracts:

Asset derivative contracts

— — — —

Asset and Liability Instruments — The fair value of cash and cash equivalents, short and long-term receivables, accounts payable, and short-term debt was considered to be the same as or was not determined to be materially different from the carrying amount.

Long-term Debt — The fair value of our public fixed rate senior notes is based on quoted market prices (level 1). The fair value of our private borrowings under our senior credit facility and other long-term debt instruments is based on the market value of debt with similar maturities, interest rates and risk characteristics (level 2). The fair value of our level 1 debt, as classified in the fair value hierarchy, was \$762 million and \$792 million at September 30, 2014 and December 31, 2013, respectively. We have classified \$409 million and \$287 million as level 2 in the fair value hierarchy at September 30, 2014 and December 31, 2013, respectively, since we utilize valuation inputs that are observable both directly and indirectly. We classified the remaining \$55 million and \$10 million, consisting of foreign subsidiary debt, as level 3 in the fair value hierarchy at September 30, 2014 and December 31, 2013, respectively.

Foreign Exchange Forward Contracts — We use derivative financial instruments, principally foreign currency forward purchase and sales contracts with terms of less than one year, to hedge our exposure to changes in foreign currency exchange rates. Our primary exposure to changes in foreign currency rates results from intercompany loans made between affiliates to minimize the need for borrowings from third parties. Additionally, we enter into foreign currency forward purchase and sale contracts to mitigate our exposure to changes in exchange rates on certain intercompany and third-party trade receivables and payables. We manage counter-party credit risk by entering into derivative financial instruments with major financial institutions that can be expected to fully perform under the terms of such agreements. We do not enter into derivative financial instruments for speculative purposes. The fair value of our foreign currency forward contracts is based on an internally developed model which incorporates observable inputs including quoted spot rates, forward exchange rates and discounted future expected cash flows utilizing market

interest rates with similar quality and maturity characteristics. We record the change in fair value of these foreign exchange forward contracts as part of currency gains (losses) within cost of sales in the condensed consolidated statements of income. The fair value of foreign exchange forward contracts are recorded in prepayments and other current assets or other current liabilities in the condensed consolidated balance sheet. The fair value of our foreign exchange forward contracts, presented on a gross basis at September 30, 2014 and December 31, 2013, respectively, was as follows:

14

Table of Contents

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS —(Continued)

(Unaudited)

	Fair Value of Derivative Instruments			December 31, 2013		
	September 30, 2014			December 31, 2013		
	Asset	Liability	Total	Asset	Liability	Total
	Derivatives	Derivatives		Derivatives	Derivatives	
	(Millions)					
Foreign exchange forward contracts	\$—	\$—	\$—	\$—	\$—	\$—

The fair value of our recurring financial assets at September 30, 2014 and December 31, 2013, respectively, are as follows:

	September 30, 2014			December 31, 2013		
	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
	(Millions)					
Financial Assets:						
Foreign exchange forward contracts	n/a	\$—	n/a	n/a	\$—	n/a

The fair value hierarchy definition prioritizes the inputs used in measuring fair value into the following levels:

Level 1	—	Quoted prices in active markets for identical assets or liabilities.
Level 2	—	Inputs, other than quoted prices in active markets, that are observable either directly or indirectly.
Level 3	—	Unobservable inputs based on our own assumptions.

The following table summarizes by major currency the notional amounts for foreign currency forward purchase and sale contracts as of September 30, 2014 (all of which mature in 2014):

		Notional Amount in Foreign Currency (Millions)

Japanese yen	—Purchase	144
	—Sell	(1,038)
U.S. dollars	—Purchase	12
	—Sell	(67)
Other	—Purchase	1

Guarantees —We have from time to time issued guarantees for the performance of obligations by some of our subsidiaries, and some of our subsidiaries have guaranteed our debt. All of our existing and future material domestic wholly-owned subsidiaries fully and unconditionally guarantee our senior credit facility and our senior notes on a joint and several basis. The arrangement for the senior credit facility is also secured by first-priority liens on substantially all our domestic assets and pledges of up to 66 percent of the stock of certain first-tier foreign subsidiaries. No assets

or capital stock of our direct or indirect subsidiaries secure our senior notes. For additional information, refer to Note 13 of our condensed consolidated financial statements, where we present the Supplemental Guarantor Condensed Consolidating Financial Statements.

We have two performance guarantee agreements in the U.K. between Tenneco Management Europe Limited (“TMEL”) and the two Walker Group Retirement Plans, the Walker Group Employee Benefit Plan and the Walker Group Executive

15

Table of Contents

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS —(Continued)

(Unaudited)

Retirement Benefit Plan (the “Walker Plans”), whereby TMEL will guarantee the payment of all current and future pension contributions in event of a payment default by the sponsoring or participating employers of the Walker Plans. As a result of our decision to enter into these performance guarantee agreements, the levy due to the U.K. Pension Protection Fund was reduced. The Walker Plans are comprised of employees from Tenneco Walker (U.K.) Limited and our Futaba-Tenneco U.K. joint venture. Employer contributions are funded by both Tenneco Walker (U.K.) Limited, as the sponsoring employer and Futaba-Tenneco U.K., as a participating employer. The performance guarantee agreements are expected to remain in effect until all pension obligations for the Walker Plans’ sponsoring and participating employers have been satisfied. The maximum amount payable for these pension performance guarantees is approximately \$37 million as of September 30, 2014 which is determined by taking 105 percent of the liability of the Walker Plans calculated under section 179 of the U.K. Pension Act of 2004 offset by plan assets. We did not record an additional liability for this performance guarantee since Tenneco Walker (U.K.) Limited, as the sponsoring employer of the Walker Plans, already recognizes 100 percent of the pension obligation calculated based on U.S. GAAP, for all of the Walker Plans’ participating employers on its balance sheet, which was \$6 million and \$10 million at September 30, 2014 and December 31, 2013, respectively. At September 30, 2014, all pension contributions under the Walker Plans were current for all of the Walker Plans’ sponsoring and participating employers.

In June 2011, we entered into an indemnity agreement between TMEL and Futaba Industrial Co. Ltd. which requires Futaba to indemnify TMEL for any cost, loss or liability which TMEL may incur under the performance guarantee agreements relating to the Futaba-Tenneco U.K. joint venture. The maximum amount reimbursable by Futaba to TMEL under this indemnity agreement is equal to the amount incurred by TMEL under the performance guarantee agreements multiplied by Futaba’s shareholder ownership percentage of the Futaba-Tenneco U.K. joint venture. At September 30, 2014, the maximum amount reimbursable by Futaba to TMEL is approximately \$7 million.

We have issued letters of credit in connection with some obligations of our affiliates. As of September 30, 2014, we have issued \$83 million in letters of credit to support some of our subsidiaries’ insurance arrangements, foreign employee benefit programs, environmental remediation activities and cash management and capital requirements.

Financial Instruments — One of our European subsidiaries receives payment from one of its customers whereby the accounts receivable are satisfied through the early delivery of financial instruments. We may collect these financial instruments before their maturity date by either selling them at a discount or using them to satisfy accounts receivable that have previously been sold to a European bank. Any of these financial instruments which are not sold are classified as other current assets. The amount of these financial instruments that was collected before their maturity date and sold at a discount totaled less than \$1 million and \$5 million at September 30, 2014 and December 31, 2013, respectively. No such financial instruments were held by our European subsidiary as of September 30, 2014 or December 31, 2013.

In certain instances, several of our Chinese subsidiaries receive payments from customers through the receipt of financial instruments on the date the customer payments are due. Several of our Chinese subsidiaries also satisfy vendor payments through the delivery of financial instruments on the date the payments are due. Financial instruments issued to satisfy vendor payables and not redeemed totaled \$25 million and \$13 million at September 30, 2014 and December 31, 2013, respectively, and were classified as notes payable. Financial instruments received from customers and not redeemed totaled \$20 million and \$12 million at September 30, 2014 and December 31, 2013, respectively.

We classify financial instruments received from our customers as other current assets if issued by a financial institution of our customers or as customer notes and accounts, net if issued by our customer. We classified \$20 million and \$12 million in other current assets at September 30, 2014 and December 31, 2013, respectively. Some of our Chinese subsidiaries that issue their own financial instruments to pay vendors are required to maintain a cash balance if they exceed certain credit limits with the financial institution that guarantees those financial instruments. A restricted cash balance was required at those Chinese subsidiaries at September 30, 2014 for \$1 million and was not required at December 31, 2013.

The financial instruments received by one of our European subsidiaries and some of our Chinese subsidiaries are drafts drawn that are payable at a future date and, in some cases, are negotiable and/or are guaranteed by banks of the customers. The use of these instruments for payment follows local commercial practice. Because certain of such financial instruments are guaranteed by our customers' banks, we believe they represent a lower financial risk than the outstanding accounts receivable that they satisfy which are not guaranteed by a bank.

Supply Chain Financing — Near the end of the second quarter of 2013 certain of our suppliers in the U.S. extended their payment terms to Tenneco. The liquidity benefit to Tenneco from the extended payment terms totaled \$14 million at September 30, 2014. These suppliers also began participating in a supply chain financing program under which they securitize their accounts receivables from Tenneco with two financial institutions. The financial institutions participate in the supply chain financing program on an uncommitted basis and can cease purchasing receivables from Tenneco's suppliers at any time. If the financial institutions did not continue to purchase receivables from Tenneco's suppliers under this program, the participating

Table of Contents

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS —(Continued)

(Unaudited)

vendors could reduce their payment terms to Tenneco which in turn would cause our borrowings under our revolving credit facility to increase.

Restricted Cash - Two of our Australian subsidiaries arranged for \$4 million in guarantees to be issued by a financial institution to support some of our subsidiaries' property lease arrangements and workers compensation programs. These guarantees were supported by a cash deposit with the financial institution which has been classified as restricted cash on the Tenneco Inc. consolidated balance sheet at September 30, 2014.

Some of our Chinese subsidiaries are required to maintain a cash balance if they exceed certain credit limits with the financial institution that guarantees the financial instruments issued by Tenneco to pay vendors. At the end of the third quarter of 2014, one of our Chinese subsidiaries exceeded their credit limits and was required to maintain a cash balance. The cash balance required was \$1 million which has been classified as restricted cash on the Tenneco Inc. consolidated balance sheet at September 30, 2014.

(3) Long-Term Debt and Financing Arrangements

Our financing arrangements are primarily provided by a committed senior secured financing arrangement with a syndicate of banks and other financial institutions. The arrangement is secured by substantially all our domestic assets and pledges of up to 66 percent of the stock of certain first-tier foreign subsidiaries, as well as guarantees by our material domestic subsidiaries.

On March 22, 2012, we completed an amendment and restatement of our senior credit facility by increasing the amount and extending the maturity date of our revolving credit facility and adding a new \$250 million Tranche A Term Facility. As of September 30, 2014, the senior credit facility provides us with a total revolving credit facility size of \$850 million and had a \$213 million balance outstanding under the Tranche A Term Facility, both of which will mature on March 22, 2017. Funds may be borrowed, repaid and re-borrowed under the revolving credit facility without premium or penalty. The revolving credit facility is reflected as debt on our balance sheet only if we borrow money under this facility or if we use the facility to make payments for letters of credit. Outstanding letters of credit reduce our availability to enter into revolving loans under the facility. We are required to make quarterly principal payments under the Tranche A Term Facility of \$6.3 million through March 31, 2015, \$9.4 million beginning June 30, 2015 through March 31, 2016, \$12.5 million beginning June 30, 2016 through December 31, 2016 and a final payment of \$125 million is due on March 22, 2017. We have excluded the required payments, within the next twelve months, under the Tranche A Term Facility totaling \$31 million from current liabilities as of September 30, 2014, because we have the intent and ability to refinance the obligations on a long-term basis by using our revolving credit facility.

The financial ratios required under the amended and restated senior credit facility, and the actual ratios we achieved for the three quarters of 2014, are as follows:

	Quarter Ended					
	September 30, 2014		June 30, 2014		March 31, 2014	
	Required	Actual	Required	Actual	Required	Actual
Leverage Ratio (maximum)	3.50	1.55	3.50	1.57	3.50	1.63
Interest Coverage Ratio (minimum)	2.75	10.99	2.75	10.62	2.75	10.39

The senior credit facility includes a maximum leverage ratio covenant of 3.50 and a minimum interest coverage ratio of 2.75 through March 22, 2017.

At September 30, 2014, of the \$850 million available under the revolving credit facility, we had unused borrowing capacity of \$572 million with \$196 million in outstanding borrowings and \$82 million in outstanding letters of credit. As of September 30, 2014, our outstanding debt also included \$213 million related to our Tranche A Term Facility which is subject to quarterly principal payments as described above through March 22, 2017, \$225 million of 7.75 percent senior notes due August 15, 2018, \$500 million of 6.875 percent senior notes due December 15, 2020, and \$164 million of other debt.

(4) Income Taxes

For interim tax reporting we estimate our annual effective tax rate and apply it to our year to date ordinary income. Jurisdictions with a projected loss for the year or an actual year-to-date loss where no tax benefit can be recognized due to a valuation allowance are excluded from the estimated annual effective tax rate. The impact of including these jurisdictions on the quarterly effective rate calculation could result in a higher or lower effective tax rate during a particular quarter due to the mix and timing of actual earnings versus annual projections. The tax effects of certain unusual or infrequently occurring items,

Table of Contents

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS —(Continued)

(Unaudited)

including changes in judgment about valuation allowances and effects of changes in tax laws or rates, are excluded from the estimated annual effective tax rate calculation and recognized in the interim period in which they occur. We reported income tax expense of \$31 million and \$30 million in the three month periods ended September 30, 2014 and 2013, respectively. The tax expense recorded in the third quarter of 2014 included a net tax benefit of \$10 million for tax adjustment to prior year estimates. The tax expense recorded in the third quarter of 2013 included a net tax benefit of \$9 million for tax adjustments to prior year estimates. Because our operations in Spain and Belgium are in a valuation allowance position, we were unable to recognize a tax benefit for the \$55 million of restructuring charges incurred in these two countries during the third quarter of 2013.

We reported income tax expense of \$117 million and \$89 million in the first nine months 2014 and 2013, respectively. The tax expense recorded in the first nine months of 2014 included a net tax benefit of \$9 million for tax adjustments to prior year estimates. The tax expense recorded in the first nine months of 2013 included a net tax benefit of \$22 million for tax adjustments primarily related to recognizing a U.S. tax benefit for foreign taxes and changes to prior year estimates. U.S. tax benefit for foreign taxes is driven by our ability to claim a U.S. foreign tax credit beginning in 2013. The U.S. foreign tax credit law provides for a credit against U.S. taxes otherwise payable for foreign taxes paid with regard to dividends, interest and royalties paid to us in the U.S.

In 2012, we reversed the tax valuation allowance against our net deferred tax assets in the U.S. based on operating improvements we had made, the outlook for light and commercial vehicle production in the U.S. and the positive impact this should have on our U.S. operations. We have fully utilized our federal net operating loss ("NOL") as of June 30, 2014. The state NOLs expire in various tax years through 2032.

(5) Accounts Receivable Securitization

We securitize some of our accounts receivable on a limited recourse basis in North America and Europe. As servicer under these accounts receivable securitization programs, we are responsible for performing all accounts receivable administration functions for these securitized financial assets including collections and processing of customer invoice adjustments. In North America, we have an accounts receivable securitization program with three commercial banks comprised of a first priority facility and a second priority facility. We securitize original equipment and aftermarket receivables on a daily basis under the bank program. In March 2014, the North American program was amended and extended to March 20, 2015. The first priority facility continues to provide financing of up to \$110 million and the second priority facility, which is subordinated to the first priority facility, continues to provide up to an additional \$40 million of financing. Both facilities monetize accounts receivable generated in the U.S. and Canada that meet certain eligibility requirements, and the second priority facility also monetizes certain accounts receivable generated in the U.S. and Canada that would otherwise be ineligible under the first priority securitization facility. The amount of outstanding third-party investments in our securitized accounts receivable under the North American program was \$30 million at September 30, 2014 and \$10 million at December 31, 2013.

Each facility contains customary covenants for financings of this type, including restrictions related to liens, payments, mergers or consolidations and amendments to the agreements underlying the receivables pool. Further, each facility may be terminated upon the occurrence of customary events (with customary grace periods, if applicable), including breaches of covenants, failure to maintain certain financial ratios, inaccuracies of representations and warranties, bankruptcy and insolvency events, certain changes in the rate of default or delinquency of the receivables, a change of control and the entry or other enforcement of material judgments. In addition, each facility contains cross-default provisions, where the facility could be terminated in the event of non-payment of other material indebtedness when due and any other event which permits the acceleration of the maturity of material indebtedness.

We also securitize receivables in our European operations with regional banks in Europe under various separate facilities. The commitments for these arrangements are generally for one year, but some may be canceled with notice 90 days prior to renewal. In some instances, the arrangement provides for cancellation by the applicable financial institution at any time upon 15 days, or less, notification. The amount of outstanding third-party investments in our

securitized accounts receivable in Europe was \$165 million and \$134 million at September 30, 2014 and December 31, 2013, respectively.

If we were not able to securitize receivables under either the North American or European securitization programs, our borrowings under our revolving credit agreement might increase. These accounts receivable securitization programs provide us with access to cash at costs that are generally favorable to alternative sources of financing, and allow us to reduce borrowings under our revolving credit agreement.

In our North American accounts receivable securitization programs, we transfer a partial interest in a pool of receivables and the interest that we retain is subordinate to the transferred interest. Accordingly, we account for our North American securitization program as a secured borrowing. In our European programs, we transfer accounts receivables in their entirety to

Table of Contents

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS —(Continued)

(Unaudited)

the acquiring entities and satisfy all of the conditions established under Accounting Standards Codification (ASC) Topic 860, “Transfers and Servicing,” to report the transfer of financial assets in their entirety as a sale. The proceeds received in exchange for the transfer of accounts receivable under our European securitization programs approximates the fair value of such receivables. We recognized less than \$1 million interest expense in each of the three month periods ended September 30, 2014 and 2013, and \$2 million for each of the nine month periods ended September 30, 2014 and 2013, relating to our North American securitization program. In addition, we recognized a loss of \$1 million in each of the three month periods ended September 30, 2014 and 2013, and \$3 million for each of the nine month periods ended September 30, 2014, and 2013, on the sale of trade accounts receivable in our European accounts receivable securitization programs, representing the discount from book values at which these receivables were sold to our banks. The discount rate varies based on funding costs incurred by our banks, which averaged approximately two percent during the first nine months of 2014 and three percent during the first nine months of 2013, respectively.

(6) Restructuring and Other Charges

Over the past several years, we have adopted plans to restructure portions of our operations. These plans were approved by our Board of Directors and were designed to reduce operational and administrative overhead costs throughout the business. In 2013, we incurred \$78 million in restructuring and related costs, primarily related to European cost reduction efforts including non-cash asset write downs of \$3 million, the costs to exit the distribution of aftermarket exhaust products and ending production of leaf springs in Australia, headcount reductions in various regions and the net impact of freezing our defined benefit plans in the United Kingdom, of which \$70 million was recorded in cost of sales, \$6 million in SG&A, \$1 million in engineering expense and \$1 million in other expense. In the third quarter of 2014, we incurred \$8 million in restructuring and related costs including non-cash charges of \$2 million, primarily related to European cost reduction efforts, headcount reductions in Australia and the sale of a closed facility in Cozad, Nebraska, of which \$5 million was recorded in cost of sales and \$3 million in other expense. In the third quarter of 2013, we incurred \$58 million in restructuring and related costs primarily related to European cost reduction efforts including non-cash asset write downs of \$2 million and headcount reductions in various regions, of which \$56 million was recorded in cost of sales, \$1 million in SG&A and \$1 million in other expense. In the first nine months of 2014, we incurred \$28 million in restructuring and related costs including non-cash charges of \$3 million, primarily related to European cost reduction efforts, headcount reductions in Australia and South America and the sale of a closed facility in Cozad, Nebraska, of which \$20 million was recorded in cost of sales, \$3 million in SG&A, \$1 million in engineering expense and \$4 million in other expense. In the first nine months of 2013, we incurred \$69 million in restructuring and related costs primarily related to European cost reduction efforts including non-cash asset write downs of \$2 million, the costs to exit the distribution of aftermarket exhaust products and ending of production of leaf springs in Australia, headcount reductions in various regions, and the net impact of freezing our defined benefit plans in the United Kingdom, of which \$63 million was recorded in cost of sales, \$5 million in SG&A and \$1 million in other expense.

Amounts related to activities that are part of our restructuring reserves are as follows:

	December 31, 2013	2014	2014	Impact of	September
	Restructuring	Expenses	Cash	Exchange	30, 2014
	Reserve		Payments	Rates	Restructuring
	(Millions)				Reserve
Employee Severance, Termination Benefits and Other Related Costs	\$44	25	(32) (3) \$34

Under the terms of our amended and restated senior credit agreement that took effect on March 22, 2012, we are allowed to exclude \$80 million of cash charges and expenses, before taxes, related to cost reduction initiatives incurred after March 22, 2012 from the calculation of the financial covenant ratios required under our senior credit facility. As of December 31, 2013, we had excluded the entire \$80 million of allowable charges relating to

restructuring initiatives.

On January 31, 2013, we announced our intent to reduce structural costs in Europe. This initiative includes the closing of the Vittaryd facility in Sweden that we announced in September 2012 and a \$7 million charge recorded in the fourth quarter of 2012 related to the impairment of certain assets in the European ride performance business. As part of our European structural cost reduction initiative, on September 5, 2013 we announced our intent to close our ride performance plant in Gijon, Spain and reduce the workforce at our ride performance plant in Sint-Truiden, Belgium. The actions were subject to consultation with the relevant employee representatives. We incurred \$78 million in restructuring and related costs in 2013, of which \$69 million was related to this initiative including \$3 million non-cash asset write downs. In the third quarter of 2014, we incurred \$8 million in restructuring and related costs, of which \$4 million was related to this initiative. In the first nine months of 2014, we incurred \$28 million in restructuring and related costs, of which \$18 million was related to this initiative including \$1 million for non-cash asset write downs. We concluded the consultation period with employee representatives at Gijon without having reached

19

Table of Contents

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS —(Continued)

(Unaudited)

agreement and on December 17, 2013 notified the Gijon employees' works council that the Company was proceeding with the plant closure. Employee terminations at Gijon were completed by the end of 2013. During the first quarter of 2014, the employees' works council filed suit challenging the decision to close the Gijon plant and local High Court of Justice of Asturias ruled in favor of the employees' works council. On February 25, 2014, we announced the intention of the Company to appeal that decision to the Supreme Court of Spain in Madrid, and at the same time we worked closely with local and European government officials to reach a solution to address the challenge to our restructuring plan by the Gijon plant's employees' works council. In July 2014, we finalized the agreements related to the restructuring with employee representatives at Gijon as well as Sint-Truiden. Under the final agreement for Gijon, the plant re-opened in July 2014 with about half of its prior workforce and will continue to be operated by Tenneco until a complete transfer of ownership takes place in approximately two years. In the first quarter of 2014, we announced and finalized the closure of the clean air just-in-time plant in Iwuy, France, due to reduced demand for the plant's products. The actions were subject to the required consultation process with the relevant employee representatives.

(7) Environmental Matters, Legal Proceedings and Product Warranties

We are involved in environmental remediation matters, legal proceedings, claims, investigations and warranty obligations. These matters are typically incidental to the conduct of our business and create the potential for contingent losses. We accrue for potential contingent losses when our review of available facts indicates that it is probable a loss has been incurred and the amount of the loss is reasonably estimable. Each quarter we assess our loss contingencies based upon currently available facts, existing technology, presently enacted laws and regulations and taking into consideration the likely effects of inflation and other societal and economic factors and record adjustments to these reserves as required. As an example, we consider all available evidence, including prior experience in remediation of contaminated sites, other companies' cleanup experiences and data released by the United States Environmental Protection Agency or other organizations when we evaluate our environmental remediation contingencies. All of our loss contingency estimates are subject to revision in future periods based on actual costs or new information. With respect to our environmental liabilities, where future cash flows are fixed or reliably determinable, we have discounted those liabilities. We evaluate recoveries separately from the liability and, when they are assured, recoveries are recorded and reported separately from the associated liability in our consolidated financial statements.

Environmental Matters

We are subject to a variety of environmental and pollution control laws and regulations in all jurisdictions in which we operate. We expense or capitalize, as appropriate, expenditures for ongoing compliance with environmental regulations that relate to current operations. We expense costs related to an existing condition caused by past operations that do not contribute to current or future revenue generation. As of September 30, 2014, we have the obligation to remediate or contribute towards the remediation of certain sites, including one Federal Superfund site. At September 30, 2014, our aggregated estimated share of environmental remediation costs for all these sites on a discounted basis was approximately \$16 million, of which \$3 million is recorded in other current liabilities and \$13 million is recorded in deferred credits and other liabilities in our condensed consolidated balance sheet. For those locations where the liability was discounted, the weighted average discount rate used was 2.2 percent. The undiscounted value of the estimated remediation costs was \$19 million. Our expected payments of environmental remediation costs are estimated to be approximately \$2 million in both 2014 and 2015, \$1 million each year beginning 2016 through 2018 and \$12 million in aggregate thereafter.

Based on information known to us, we have established reserves that we believe are adequate for these costs. Although we believe these estimates of remediation costs are reasonable and are based on the latest available information, the costs are estimates and are subject to revision as more information becomes available about the extent of remediation required. At some sites, we expect that other parties will contribute to the remediation costs. In addition, certain environmental statutes provide that our liability could be joint and several, meaning that we could be required to pay in excess of our share of remediation costs. Our understanding of the financial strength of other

potentially responsible parties at these sites has been considered, where appropriate, in our determination of our estimated liability. We do not believe that any potential costs associated with our current status as a potentially responsible party in the Federal Superfund site, or as a liable party at the other locations referenced herein, will be material to our consolidated financial position, results of operations, or liquidity.

Antitrust Investigations

On March 25, 2014, representatives of the European Commission were at Tenneco GmbH's Edenkoben, Germany administrative facility to gather information in connection with an ongoing global antitrust investigation concerning multiple automotive suppliers. On March 25, 2014, we also received a related subpoena from the U.S. Department of Justice ("DOJ").

Table of Contents

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS —(Continued)

(Unaudited)

On November 5, 2014, the DOJ granted us conditional leniency pursuant to an agreement we entered into under the Antitrust Division's Corporate Leniency Policy. This agreement provides us with important benefits in exchange for our self reporting of matters to the DOJ and our continuing full cooperation with the DOJ's resulting investigation. For example, the DOJ will not bring any criminal antitrust prosecution against us, nor seek any criminal fines or penalties, in connection with the matters we reported to the DOJ. Additionally, there are limits on our liability related to any follow on civil antitrust litigation in the U.S. The limits include single rather than treble damages, as well as relief from joint and several antitrust liability with other relevant civil antitrust action defendants. These limits are subject to our satisfying the DOJ and any court presiding over such follow on civil litigation. We cannot provide any assurance as to when such actions will be filed in the future or how they will ultimately be resolved.

Certain other competition agencies are also investigating possible violations of antitrust laws relating to products supplied by our company. We have cooperated and continue to cooperate fully with all of these antitrust investigations, and take other actions to minimize our potential exposure.

Antitrust law investigations and related matters often continue for several years and can result in significant penalties and liability. At this point, we cannot estimate the ultimate impact on our company from investigations into our antitrust compliance and related matters in light of the uncertainties and many variables involved, and there can be no assurance that the ultimate resolution of these matters, including any civil litigation claims, will not have a material adverse effect on our consolidated financial position, results of operations or liquidity.

Other Legal Proceedings, Claims and Investigations

We are also from time to time involved in other legal proceedings, claims or investigations. Some of these matters involve allegations of damages against us relating to environmental liabilities (including toxic tort, property damage and remediation), intellectual property matters (including patent, trademark and copyright infringement, and licensing disputes), personal injury claims (including injuries due to product failure, design or warning issues, and other product liability related matters), taxes, employment matters, and commercial or contractual disputes, sometimes related to acquisitions or divestitures. Additionally, some of these matters involve allegations relating to legal compliance. For example, one of our Argentine subsidiaries is currently defending against a criminal complaint alleging the failure to comply with laws requiring the proceeds of export transactions to be collected, reported and/or converted to local currency within specified time periods. As another example, in the U.S. we are subject to an audit in 11 states with respect to the payment of unclaimed property to those states, spanning a period as far back as over 30 years. While we vigorously defend ourselves against all of these legal proceedings, claims and investigations and take other actions to minimize our potential exposure, in future periods, we could be subject to cash costs or charges to earnings if any of these matters are resolved on unfavorable terms. Although the ultimate outcome of any legal matter cannot be predicted with certainty, based on current information, including our assessment of the merits of the particular claim, except as described above under "Antitrust Investigations," we do not expect the legal proceedings, claims or investigations currently pending against us will have any material adverse impact on our consolidated financial position, results of operations or liquidity.

In addition, we are subject to lawsuits initiated by a significant number of claimants alleging health problems as a result of exposure to asbestos. In the early 2000's we were named in nearly 20,000 complaints, most of which were filed in Mississippi state court and the vast majority of which made no allegations of exposure to asbestos from our product categories. Most of these claims have been dismissed and our current docket of active and inactive cases is less than 500 cases nationwide. A small number of claims have been asserted by railroad workers alleging exposure to asbestos products in railroad cars manufactured by The Pullman Company, one of our subsidiaries. The substantial majority of the remaining claims are related to alleged exposure to asbestos in our automotive products. Only a small percentage of the claimants allege that they were automobile mechanics and a significant number appear to involve workers in other industries or otherwise do not include sufficient information to determine whether there is any basis for a claim against us. We believe, based on scientific and other evidence, it is unlikely that mechanics were exposed to asbestos by our former products and that, in any event, they would not be at increased risk of asbestos-related

disease based on their work with these products. Further, many of these cases involve numerous defendants, with the number in some cases exceeding 100 defendants from a variety of industries. Additionally, the plaintiffs either do not specify any, or specify the jurisdictional minimum, dollar amount for damages. As major asbestos manufacturers and/or users continue to go out of business or file for bankruptcy, we may experience an increased number of these claims. We vigorously defend ourselves against these claims as part of our ordinary course of business. In future periods, we could be subject to cash costs or charges to earnings if any of these matters are resolved unfavorably to us. To date, with respect to claims that have proceeded sufficiently through the judicial process, we have regularly achieved favorable resolutions. Accordingly, we presently believe that these asbestos-related claims will not have a material adverse impact on our future consolidated financial position, results of operations or liquidity.

(Unaudited)

Warranty Matters

We provide warranties on some of our products. The warranty terms vary but range from one year up to limited lifetime warranties on some of our premium aftermarket products. Provisions for estimated expenses related to product warranty are made at the time products are sold or when specific warranty issues are identified on OE products. These estimates are established using historical information about the nature, frequency, and average cost of warranty claims. We actively study trends of our warranty claims and take action to improve product quality and minimize warranty claims. We believe that the warranty reserve is appropriate; however, actual claims incurred could differ from the original estimates, requiring adjustments to the reserve. The reserve is included in both current and long-term liabilities on the balance sheet.

Below is a table that shows the activity in the warranty accrual accounts:

	Nine Months Ended September 30,	
	2014	2013
	(Millions)	
Beginning Balance January 1,	\$24	\$23
Accruals related to product warranties	18	12
Reductions for payments made	(16) (13
Ending Balance September 30,	\$26	\$22

(8) Earnings Per Share

Earnings per share of common stock outstanding were computed as follows:

	Three Months Ended September 30, 2014	Three Months Ended September 30, 2013	Nine Months Ended September 30, 2014	Nine Months Ended September 30, 2013
	(Millions Except Share and Per Share Amounts)			
Basic earnings per share —				
Net income attributable to Tenneco Inc.	\$78	\$12	\$205	\$129
Weighted Average shares of common stock outstanding	60,762,667	60,624,358	60,671,410	60,475,652
Earnings per share of common stock	\$1.29	\$0.19	\$3.39	\$2.13
Diluted earnings per share —				
Net income attributable to Tenneco Inc.	\$78	\$12	\$205	\$129
Weighted Average shares of common stock outstanding	60,762,667	60,624,358	60,671,410	60,475,652
Effect of dilutive securities:				
Restricted stock	122,865	220,132	135,170	182,378
Stock options	828,319	1,020,885	828,482	925,599
Weighted Average shares of common stock outstanding including dilutive securities	61,713,851	61,865,375	61,635,062	61,583,629
Earnings per share of common stock	\$1.27	\$0.19	\$3.33	\$2.09

Options to purchase 834 and 516,957 shares of common stock were outstanding as of September 30, 2014 and 2013, respectively, but not included in the computation of diluted earnings per share respectively, because the options were anti-dilutive.

(9) Common Stock

Equity Plans — We have granted a variety of awards, including common stock, restricted stock, restricted stock units, performance units, stock appreciation rights (“SARs”), and stock options to our directors, officers, and employees.

Accounting Methods — We recorded \$1 million in compensation expense in each of the three month periods ended September 30, 2014 and 2013 and \$3 million and \$4 million in compensation expense for the nine month periods ended September 30, 2014 and 2013, respectively, related to nonqualified stock options as part of our selling, general and administrative expense. This resulted in a decrease of \$0.01 and \$0.02 in both basic and diluted earnings per share for the three month period ended September 30, 2014 and 2013 and a decrease of \$0.05 and \$0.07 in both basic and diluted earnings per share for the nine month period ended September 30, 2014 and 2013.

For employees eligible to retire at the grant date, we immediately expense stock options and restricted stock. If employees become eligible to retire during the vesting period, we immediately recognize any remaining expense associated with their stock options and restricted stock.

As of September 30, 2014, there was approximately \$7 million of unrecognized compensation costs related to our stock option awards that we expect to recognize over a weighted average period of 1.1 years.

Table of Contents

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS —(Continued)

(Unaudited)

Compensation expense for restricted stock, restricted stock units, long-term performance units and SARs was \$1 million and \$4 million for the three month periods ended September 30, 2014 and 2013, respectively, and \$10 million and \$14 million for the nine month periods ended September 30, 2014 and 2013, respectively, and was recorded in selling, general, and administrative expense in our condensed consolidated statements of income.

Cash received from stock option exercises for the nine months ended September 30, 2014 and 2013 was \$1 million and \$13 million, respectively.

Stock options exercised in the first nine months of 2014 generated a tax benefit of \$4 million. We started to record this tax benefit in the third quarter of 2013 when we began utilizing our federal and state NOLs. In the first nine months of 2014, we recorded a tax benefit of \$18 million, of which \$14 million was related to the historic tax benefit on stock options from 2011 through 2013.

Assumptions — We calculated the fair values of stock option awards using the Black-Scholes option pricing model with the weighted average assumptions listed below. The fair value of share-based awards is determined at the time the awards are granted which is generally in January of each year, and requires judgment in estimating employee and market behavior.

	Nine Months Ended September 30,		
	2014	2013	
Stock Options Granted			
Weighted average grant date fair value, per share	\$26.46	\$19.84	
Weighted average assumptions used:			
Expected volatility	52.8	% 66.4	%
Expected lives	5.0	4.9	
Risk-free interest rates	1.7	% 0.7	%
Dividend yields	—	% —	%

Expected volatility is calculated based on current implied volatility and historical realized volatility for the Company. Expected lives of options are based upon the historical and expected time to post-vesting forfeiture and exercise. We believe this method is the best estimate of the future exercise patterns currently available.

The risk-free interest rates are based upon the Constant Maturity Rates provided by the U.S. Treasury. For our valuations, we used the continuous rate with a term equal to the expected life of the options.

Stock Options — The following table reflects the status and activity for all options to purchase common stock for the period indicated:

Table of Contents

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS —(Continued)

(Unaudited)

	Nine Months Ended September 30, 2014			Aggregate Intrinsic Value (Millions)
	Shares Under Option	Weighted Avg. Exercise Prices	Weighted Avg. Remaining Life in Years	
Outstanding Stock Options				
Outstanding, January 1, 2014	1,983,573	\$ 22.93	4.5	\$62

Canceled	(31,299)	19.78		
Forfeited	(300)	22.77		
Exercised	(25,595)	14.72		1
Outstanding, March 31, 2014	2,119,003	\$ 26.10	4.6	\$67
Granted	—	—		
Forfeited	—	—		
Exercised	(32,233)	25.49		1
Outstanding, June 30, 2014	2,086,770	\$ 26.11	4.3	\$75
Granted	834	66.54		
Canceled	(526)	36.00		
Forfeited	(1,535)	29.72		
Exercised	(12,358)	23.81		
Outstanding, September 30, 2014	2,073,185	\$ 26.13	4.1	\$77

The weighted average grant-date fair value of options granted during the nine months ended September 30, 2014 and 2013 was \$26.48 and \$19.91, respectively. The total fair value of shares vested was \$6 million and \$5 million for the periods ended September 30, 2014 and 2013, respectively.

Restricted Stock — The following table reflects the status for all nonvested restricted shares for the period indicated:

	Nine Months Ended September 30, 2014	
	Shares	Weighted Avg. Grant Date Fair Value
Nonvested Restricted Shares		
Nonvested balance at January 1, 2014	368,268	\$34.90
Granted	131,561	54.90
Vested	(186,112)	36.57
Forfeited	—	—
Nonvested balance at March 31, 2014	313,717	\$42.30
Granted	2,838	66.96
Vested	(2,286)	31.63
Forfeited	(575)	38.52
Nonvested balance at June 30, 2014	313,694	\$42.60
Granted	1,160	67.02
Vested	(10,664)	55.36
Forfeited	—	—
Nonvested balance at September 30, 2014	304,190	\$42.25

The fair value of restricted stock grants is usually equal to the average of the high and low trading price of our stock on the date of grant. As of September 30, 2014, approximately \$7 million of total unrecognized compensation costs related to restricted stock awards is expected to be recognized over a weighted-average period of approximately 1.9 years. The total fair value of restricted shares vested was \$8 million and \$6 million at September 30, 2014 and 2013, respectively.

Table of Contents

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS —(Continued)

(Unaudited)

In January 2014, our Board of Directors approved a share repurchase program, authorizing our company to repurchase up to 400,000 shares of our outstanding common stock over a 12 month period. This repurchase program does not obligate Tenneco to make repurchases at any specific time or situation and is intended to offset dilution from shares of restricted stock and stock options issued in 2014 to employees. We did not purchase any shares through this program in the nine month period ended September 30, 2014.

Repurchased shares held as part of our treasury stock were at 2,844,692 shares at both September 30, 2014 and December 31, 2013.

Long-Term Performance Units, Restricted Stock Units and SARs — Long-term performance units, restricted stock units and SARs are paid in cash and recognized as a liability based upon their fair value. As of September 30, 2014, \$17 million of total unrecognized compensation costs is expected to be recognized over a weighted-average period of approximately 1.8 years.

(10) Pension Plans, Postretirement and Other Employee Benefits

Net periodic pension costs and postretirement benefit costs consist of the following components:

	Three Months Ended September 30,						
	Pension				Postretirement		
	2014		2013		2014	2013	
	US	Foreign	US	Foreign	US	US	
	(Millions)						
Service cost — benefits earned during the period	\$1	\$2	\$—	\$1	\$—	\$—	
Interest cost	5	5	5	5	1	1	
Expected return on plan assets	(6) (7) (6) (5) —	—	
Net amortization:							
Actuarial loss	1	3	3	2	1	2	
Prior service cost (credit)	—	—	—	—	(2) (2)
Net pension and postretirement costs	\$1	\$3	\$2	\$3	\$—	\$1	

	Nine Months Ended September 30,						
	Pension				Postretirement		
	2014		2013		2014	2013	
	US	Foreign	US	Foreign	US	US	
	(Millions)						
Service cost — benefits earned during the period	\$1	\$6	\$1	\$6	\$—	\$—	
Interest cost	15	14	14	13	4	4	
Expected return on plan assets	(18) (19) (17) (15) —	—	
Net amortization:							
Actuarial loss	5	7	8	8	2	4	
Prior service cost (credit)	—	1	—	1	(5) (5)
Net pension and postretirement costs	\$3	\$9	\$6	\$13	\$1	\$3	

For the nine months ended September 30, 2014, we made pension contributions of \$23 million and \$18 million for our domestic and foreign pension plans, respectively. Based on current actuarial estimates, we believe we will be required to contribute approximately \$6 million for the remainder of 2014. Pension contributions beyond 2014 will be required,

but those amounts will vary based upon many factors including, for example, the performance of our pension fund investments during 2014.

We made postretirement contributions of approximately \$6 million during the first nine months of 2014. Based on current actuarial estimates, we believe we will be required to contribute approximately \$2 million for the remainder of 2014.

25

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS —(Continued)

(Unaudited)

The assets of some of our pension plans are invested in trusts that permit commingling of the assets of more than one employee benefit plan for investment and administrative purposes. Each of the plans participating in the trust has interests in the net assets of the underlying investment pools of the trusts. The investments for all our pension plans are recorded at estimated fair value, in compliance with the accounting guidance on fair value measurement.

Amounts recognized for pension and postretirement benefits in other comprehensive income for the three and nine month periods ended September 30, 2014 and 2013 include the following components:

	Three Months Ended September 30, 2014			2013		
	Before-Tax Amount	Tax Benefit	Net-of-Tax Amount	Before- Tax Amount	Tax Benefit	Net-of-Tax Amount

(11) New Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board (“FASB”) issued an amendment on revenue recognition. The amendment in this update creates Topic 606, Revenue from Contracts with Customers, and supersedes the revenue recognition requirements in Topic 605, Revenue Recognition, including most industry-specific revenue recognition

guidance throughout the Industry Topics of the Codification. In addition, the amendment supersedes the cost guidance in Subtopic 605-35, Revenue Recognition-Construction-Type and Production-Type Contracts, and creates new Subtopic 340-40, Other Assets and Deferred Costs-Contracts with Customers. The core principle of Topic 606 is that an entity recognizes revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The amendment is effective for reporting periods beginning after December 15, 2016 for public entities. We will adopt this amendment on January 1, 2017. We are currently evaluating the potential impact of this new guidance on our consolidated financial statements.

In July 2013, the FASB issued an amendment to provide explicit guidance on financial statement presentation of an unrecognized tax benefit when a net operating loss carryforward, similar tax loss, or tax credit carryforward exists. The

Table of Contents

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS —(Continued)

(Unaudited)

objective of the amendment is to eliminate the diversity in practice in the presentation of unrecognized tax benefits in those instances. This amendment is effective for reporting periods beginning after December 15, 2013. We adopted this amendment on January 1, 2014. This amendment did not have a material impact on our consolidated financial statements.

In April 2013, the FASB issued an amendment to clarify when an entity should apply the liquidation basis of accounting and to provide principles for the measurement of assets and liabilities under the liquidation basis of accounting, as well as any required disclosures. The amendment applies to all entities that issue financial statements that are presented in conformity with U.S. GAAP except investment companies that are regulated under the Investment Company Act of 1940. This amendment is effective for reporting periods beginning after December 15, 2013. This amendment did not have any impact on our consolidated financial statements.

In February 2013, the FASB issued an amendment to resolve the diversity in practice about whether Subtopic 810-10, Consolidation-Overall, or Subtopic 830-30, Foreign Currency Matters-Translation of Financial Statements, applies to the release of the cumulative translation adjustment into net income when a parent either sells a part of all of its investment in a foreign entity or no longer holds a controlling financial interest in a subsidiary or group of assets that is a nonprofit activity or a business (other than a sale of in substance real state or conveyance of oil and gas mineral rights) within a foreign entity. In addition, the amendments resolve the diversity in practice for the treatment of business combinations achieved in stages (sometimes also referred to as step acquisitions) involving a foreign entity. This amendment is effective for reporting periods beginning after December 15, 2013. This amendment did not have any impact on our consolidated financial statements.

In February 2013, the FASB issued an amendment to the accounting guidance for the recognition, measurement, and disclosure of obligations resulting from joint and several liability arrangements for which the total amount of the obligation is fixed at the reporting date, except for obligations addressed within existing guidance in U.S. GAAP. The guidance requires an entity to measure those obligations as the sum of the amount the reporting entity agreed to pay on the basis of its arrangement amount its co-obligors and any additional amount the reporting entity expects to pay on behalf of its co-obligors. The guidance in this amendment also requires an entity to disclose the nature and amount of the obligation as well as other information about those obligations. This amendment is effective for reporting periods beginning after December 15, 2013. This amendment did not have any impact on our consolidated financial statements.

(12) Segment Information

We are managed and organized along our two major product lines (clean air and ride performance) and three geographic areas (North America; Europe, South America and India; and Asia Pacific), resulting in six operating segments (North America Clean Air, North America Ride Performance, Europe, South America and India Clean Air, Europe, South America and India Ride Performance, Asia Pacific Clean Air and Asia Pacific Ride Performance). Within each geographical area, each operating segment manufactures and distributes either clean air or ride performance products primarily for the original equipment and aftermarket industries. Each of the six operating segments constitutes a reportable segment. Costs related to other business activities, primarily corporate headquarter functions, are disclosed separately from the six operating segments as "Other." We evaluate segment performance based primarily on earnings before interest expense, income taxes, and noncontrolling interests. Products are transferred between segments and geographic areas on a basis intended to reflect as nearly as possible the "market value" of the products.

The following table summarizes certain Tenneco Inc. segment information:

(13) Supplemental Guarantor Condensed Consolidating Financial Statements

Basis of Presentation

Substantially all of our existing and future material domestic 100% owned subsidiaries (which are referred to as the Guarantor Subsidiaries) fully and unconditionally guarantee our senior notes due in 2018 and 2020 on a joint and several basis. However, a subsidiary's guarantee may be released in certain customary circumstances such as a sale of the subsidiary or all or substantially all of its assets in accordance with the indenture applicable to the notes. The Guarantor Subsidiaries are combined in the presentation below.

These consolidating financial statements are presented on the equity method. Under this method, our investments are recorded at cost and adjusted for our ownership share of a subsidiary's cumulative results of operations, capital contributions and distributions, and other equity changes. You should read the condensed consolidating financial information of the Guarantor Subsidiaries in connection with our condensed consolidated financial statements and related notes of which this note is an integral part.

We revised the supplemental guarantor statements of comprehensive income and cash flows as a result of a correction to comprehensive income and to the classification of intercompany dividends in the cash flow. These revisions had no impact on any of the company's current or previously issued consolidated financial statements. The misclassification in the supplemental cash flow statements consisted of including \$9 million and \$49 million of intercompany dividend payments by the nonguarantor subsidiaries in operating activities which should have instead been included in financing activities for the three and nine month periods ended on September 30, 2013, respectively. Other comprehensive income of \$26 million was excluded in the net comprehensive income of the parent company for the three month period ended on September 30, 2013 and \$14 million of other comprehensive loss was excluded for the nine month period ended September 30, 2013. The impact of these corrections to the applicable prior periods are reflected in the guarantor financial information herein and will be reflected in future filings.

Distributions

There are no significant restrictions on the ability of the Guarantor Subsidiaries to make distributions to us.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

As you read the following review of our financial condition and results of operations, you should also read our condensed consolidated financial statements and related notes beginning on page 6.

Executive Summary

We are one of the world's leading manufacturers of clean air and ride performance products and systems for light vehicle, commercial truck and off-highway applications. We serve both original equipment (OE) vehicle designers and manufacturers and the repair and replacement markets, or aftermarket, globally through leading brands, including Monroe[®], Rancho[®], Clevite[®] Elastomers, Marzocchi[®], Axios[™], Kinetic[™] and Fric-Rot[™] ride performance products and Walker[®], XNOx[™], Fonos[™], DynoMax[®], and Thrush[™] clean air products. We serve more than 65 different original equipment manufacturers and commercial truck and off-highway engine manufacturers, and our products are included on nine of the top 10 car models produced for sale in Europe and eight of the top 10 light truck models produced for sale in North America for 2013. Our aftermarket customers are comprised of full-line and specialty warehouse distributors, retailers, jobbers, installer chains and car dealers. As of December 31, 2013, we operated 89 manufacturing facilities worldwide and employed approximately 26,000 people to service our customers' demands. Factors that continue to be critical to our success include winning new business awards, managing our overall global manufacturing footprint to ensure proper placement and workforce levels in line with business needs, maintaining competitive wages and benefits, maximizing efficiencies in manufacturing processes and reducing overall costs. In addition, our ability to adapt to key industry trends, such as a shift in consumer preferences to other vehicles in response to higher fuel costs and other economic and social factors, increasing technologically sophisticated content, changing aftermarket distribution channels, increasing environmental standards and extended product life of automotive parts, also play a critical role in our success. Other factors that are critical to our success include adjusting to economic challenges such as increases in the cost of raw materials and our ability to successfully reduce the impact of any such cost increases through material substitutions, cost reduction initiatives and other methods.

For the third quarter of 2014, light vehicle production was up eight percent in both North America and China and four percent in India. Light vehicle production was down 19 percent in South America, 16 percent in Australia and one percent in Europe in the third quarter of 2014 when compared to the third quarter of 2013.

Total revenues for the third quarter of 2014 were \$2,081 million, up from \$1,963 million in the third quarter of 2013. Excluding the impact of currency and substrate sales, revenue was up \$99 million, or six percent, from \$1,532 million to \$1,631 million, driven primarily by stronger OE light vehicle volumes in North America and China, higher OE commercial truck, off-highway and other revenue in Europe, China and Japan Clean Air and North America Ride Performance and increased aftermarket sales in North America.

Cost of sales (exclusive of depreciation and amortization): Cost of sales for the third quarter of 2014 was \$1,735 million, or 83.4 percent of sales, compared to \$1,691 million, or 86.1 percent of sales in the third quarter of 2013. The following table lists the primary drivers behind the change in cost of sales (\$ millions).

Quarter ended September 30, 2013	\$1,691
Volume and mix	118
Material	(8)
Currency exchange rates	(27)
Restructuring	(54)
Other Costs	15
Quarter ended September 30, 2014	\$1,735

The increase in cost of sales was due to the year-over-year increase in volume and higher costs, mainly manufacturing, partially offset by lower restructuring costs, lower net material costs and the impact of currency exchange rates.

Gross margin: Revenue less cost of sales for the third quarter of 2014 was \$346 million, or 16.6 percent, versus \$272 million, or 13.9 percent, in the third quarter of 2013. The effect on gross margin resulting from higher volumes, lower restructuring expenses and lower net material costs was partially offset by higher other costs, mainly manufacturing, and unfavorable currency.

Engineering, research and development: Engineering, research and development expense was \$42 million and \$35 million in the third quarters of 2014 and 2013, respectively. Increased spending to support customer programs and lower recoveries drove the year-over-year increase.

Table of Contents

Selling, general and administrative (SG&A): SG&A expense was down \$4 million in the third quarter of 2014, at \$108 million, compared to \$112 million in the third quarter of 2013. The year-over-year decrease is due to lower compensation related accruals, which was offset by higher legal and related costs related to the ongoing anti-trust investigation and growth in emerging markets.

Depreciation and amortization: Depreciation and amortization expense was \$52 million in the third quarter of 2014, compared to \$51 million in the third quarter of 2013.

Earnings before interest expense, taxes and noncontrolling interests (“EBIT”) were \$140 million for the third quarter of 2014, an increase of \$68 million when compared to \$72 million in the third quarter of the prior year. Higher light vehicle volumes globally, commercial truck and off-highway revenue growth, new platforms and an increase in commercial vehicle content, higher North American aftermarket sales, lower restructuring costs, savings from previous restructuring activities and lower compensation related accruals were partially offset by higher engineering expenses and \$5 million of unfavorable currency.

Total revenues for the first nine months of 2014 were \$6,416 million, up from \$5,933 million for the first nine months of 2013. Excluding the impact of currency and substrate sales, revenue was up \$435 million, or 10 percent, from \$4,560 million to \$4,995 million, driven primarily by stronger OE light vehicle volumes in North America and China, higher OE commercial truck, off-highway and other revenue in Europe, China and Japan Clean Air and North America Ride Performance and increased aftermarket sales in North America and South America.

Cost of sales (exclusive of depreciation and amortization): Cost of sales for the first nine months of 2014 was \$5,340 million, or 83.2 percent of sales, compared to \$5,031 million, or 84.8 percent of sales in the first nine months of 2013. The following table lists the primary drivers behind the change in cost of sales (\$ millions).

Nine months ended September 30, 2013	\$5,031
Volume and mix	403
Material	(16)
Currency exchange rates	(49)
Restructuring	(52)
Other Costs	23
Nine months ended September 30, 2014	\$5,340

The increase in cost of sales was due to the year-over-year increase in volume and higher other costs, mainly manufacturing, partially offset by lower restructuring costs, lower net material costs and the impact of currency exchange rates.

Gross margin: Revenue less cost of sales for the first nine months of 2014 was \$1,076 million, or 16.8 percent, versus \$902 million, or 15.2 percent, in the first nine months of 2013. The effect on gross margin resulting from higher volumes, lower restructuring expenses and lower net material costs was partially offset by higher other costs, mainly manufacturing.

Engineering, research and development: Engineering, research and development expense was \$126 million and \$103 million in the first nine months of 2014 and 2013, respectively. Increased spending to support customer programs and lower recoveries drove the year-over-year increase.

Selling, general and administrative: SG&A expense was up \$42 million in the first nine months of 2014, at \$379 million, compared to \$337 million in the first nine of 2013. The year-over-year increase is due to higher compensation related accruals, higher legal and related costs related to the ongoing anti-trust investigation, growth in emerging markets and other corporate expenses.

Depreciation and amortization: Depreciation and amortization expense was \$155 million in the first nine months of 2014, compared to \$151 million in the first nine months of 2013.

EBIT was \$409 million for the first nine months of 2014, an increase of \$103 million when compared to \$306 million in the first nine months of the prior year. Higher light vehicle volumes globally, commercial truck and off-highway revenue growth, new platforms and an increase in commercial vehicle content, higher aftermarket sales in North America, lower restructuring and related expenses and savings from prior restructuring activities were partially offset by higher SG&A and engineering expenses and a \$7 million adjustment to workers' compensation reserves. Currency

had a \$5 million of unfavorable impact on EBIT for the first nine months of 2014.

Results from Operations

The tables below reflect our revenues for 2014 and 2013. We show the component of our OE revenue represented by substrate sales. While we generally have primary design, engineering and manufacturing responsibility for OE emission control systems, we do not manufacture substrates. Substrates are porous ceramic filters coated with a catalyst - typically, precious

41

Table of Contents

metals such as platinum, palladium and rhodium. These are supplied to us by Tier 2 suppliers generally as directed by our OE customers. We generally earn a small margin on these components of the system. As the need for more sophisticated emission control solutions increases to meet more stringent environmental regulations, and as we capture more diesel aftertreatment business, these substrate components have been increasing as a percentage of our revenue. While these substrates dilute our gross margin percentage, they are a necessary component of an emission control system.

Our value-add content in an emission control system includes designing the system to meet environmental regulations through integration of the substrates into the system, maximizing use of thermal energy to heat up the catalyst quickly, efficiently managing airflow to reduce back pressure as the exhaust stream moves past the catalyst, managing the expansion and contraction of the emission control system components due to temperature extremes experienced by an emission control system, using advanced acoustic engineering tools to design the desired exhaust sound, minimizing the opportunity for the fragile components of the substrate to be damaged when we integrate it into the emission control system and reducing unwanted noise, vibration and harshness transmitted through the emission control system. We present these substrate sales separately in the following table because we believe investors utilize this information to understand the impact of this portion of our revenues on our overall business and because it removes the impact of potentially volatile precious metals pricing from our revenues. While our original equipment customers generally assume the risk of precious metals pricing volatility, it impacts our reported revenues. Presenting revenues that exclude “substrates” used in catalytic converters and diesel particulate filters removes this impact.

Additionally, we present these reconciliations of revenues in order to reflect value-add revenues without the effect of changes in foreign currency rates. We have not reflected any currency impact in the 2013 table since this is the base period for measuring the effects of currency during 2014 on our operations. We believe investors find this information useful in understanding period-to-period comparisons in our revenues.

Clean Air revenue was up \$103 million in the third quarter of 2014 compared to the third quarter of 2013 with higher revenues in all regions. The increase in North American revenues was driven by higher light vehicle volumes and increased

43

Table of Contents

aftermarket revenues, which accounted for \$54 million of the year-over-year change in revenues. Currency had no impact on North American revenues. The increase in European, South American and Indian revenues was mostly driven by higher volumes of \$31 million due to higher light vehicle and commercial truck and off-highway vehicle revenues in Europe, offset by lower year-over-year light vehicle and commercial truck and off-highway vehicle revenues in South America and India. Currency had a \$14 million unfavorable impact on European, South American and Indian revenues. The increase in Asia Pacific revenues was primarily driven by higher volumes of \$42 million, mostly due to higher light vehicle production, new programs and commercial truck and off-highway vehicle volumes in China and Japan. Currency had a \$2 million unfavorable impact on Asia Pacific revenues.

Ride Performance revenue was up \$15 million in the third quarter of 2014 compared to the third quarter of 2013, primarily driven by higher volumes in all regions. The increase in North American revenues was primarily driven by higher volumes and mix of \$23 million due to light vehicle and commercial truck volume growth and higher aftermarket sales. Currency had a \$3 million unfavorable impact on North American revenues. In European, South American and Indian region, higher volumes of \$3 million was driven by commercial truck increase in Europe, higher South American aftermarket sales and higher volumes in India offset by lower aftermarket volumes in Europe and lower OE light vehicle volumes in South America. Currency had a \$13 million unfavorable impact on European, South American and Indian revenues. Asia Pacific revenues were flat. Higher volumes of \$1 million mostly due to higher light vehicle production volumes in China were offset by lower volumes in Australia. Currency had no impact on Asia Pacific revenues.

Clean Air revenue was up \$386 million in the first nine months of 2014 compared to the first nine months of 2013, driven by higher sales in all the regions. The increase in North American revenues was driven by higher light vehicle volumes, new platform launches and increased off-highway and aftermarket revenues, which accounted for \$185 million of the year-over-year

45

Table of Contents

change in revenues. Currency had a \$2 million unfavorable impact on North American revenues. The increase in European, South American and Indian revenues was mostly driven by higher volumes of \$60 million, mainly due to higher year-over-year light vehicle and commercial truck and off-highway vehicle revenues in Europe partially offset by lower revenues in South America and India and lower aftermarket volumes in Europe. Currency had a \$4 million favorable impact on European, South American and Indian revenues. The increase in Asia Pacific revenues was primarily driven by higher volumes of \$170 million, mostly due to higher light vehicle production, new programs and commercial truck and off-highway vehicle volumes in China and Japan partially offset by lower volumes in Australia. Currency had a \$5 million unfavorable impact on Asia Pacific revenues.

Ride Performance revenue was up \$97 million in the first nine months of 2014 compared to the first nine months of 2013, primarily driven by higher volumes in all the regions. The increase in North American revenues was primarily driven by higher volumes and mix of \$99 million due to light vehicle and commercial truck volume growth and higher volumes and favorable mix in the aftermarket. Currency had a \$11 million unfavorable impact on North American revenues. The increase in European, South American and Indian revenues was primarily driven by higher volumes of \$24 million due to increased light vehicle and commercial truck volumes in Europe and higher aftermarket volumes in South America and India. Currency had a \$33 million unfavorable impact on European, South American and Indian revenues. The increase in Asia Pacific revenues was driven by higher volumes of \$11 million, mostly due to higher light vehicle production volumes in China, partially offset by lower volumes in Australia. Currency had a \$3 million unfavorable impact on Asia Pacific revenues.

Earnings before Interest Expense, Income Taxes and Noncontrolling Interests (“EBIT”) for the Three Months Ended September 30, 2014 and 2013

(1) Charge related to the bankruptcy of an aftermarket customer in Europe.

EBIT for the Clean Air division was \$97 million in the third quarter of 2014 compared to \$95 million in the third quarter a year ago. EBIT for North America decreased \$1 million to \$56 million in the third quarter of 2014 versus the third quarter of 2013. The benefit from higher light vehicle revenue and aftermarket sales was more than offset by higher engineering investments and negative currency. Europe, South America and India's EBIT was \$14 million in the third quarter of 2014 and \$16 million in the third quarter of 2013. Higher volumes in light vehicle and commercial truck and off-highway vehicles in Europe, lower restructuring and related expenses and year-over-year restructuring savings were more than offset by lower volumes in South America and India, lower aftermarket volumes in Europe, higher SG&A and engineering expenses, negative currency and a charge related to the bankruptcy of an European aftermarket customer. EBIT for Asia Pacific increased \$5 million to \$27 million in the third quarter of 2014 from \$22 million in the third quarter of 2013. EBIT benefited from higher light vehicle production volumes, new platforms and higher commercial truck and off-highway vehicle revenues in China and Japan, improved operational management and positive currency, partially offset by lower volumes in Australia and higher restructuring and related expenses. For the Clean Air division, restructuring and related expenses of \$1 million were included in EBIT for each of the third quarters of 2014 and 2013. EBIT for the Clean Air division included a charge of \$4 million related to the bankruptcy of an aftermarket customer in Europe in the third quarter of 2014. Currency had a \$4 million unfavorable impact on EBIT of the Clean Air division for 2014 when compared to last year.

EBIT for the Ride Performance division was \$57 million in the third quarter of 2014 compared to a loss of \$2 million in the third quarter a year ago. EBIT for North America increased \$5 million in the third quarter of 2014 to \$38 million from \$33 million in the third quarter of 2013. The benefits of increased light vehicle and commercial truck volumes and positive aftermarket product mix were partially offset by higher restructuring and related expenses, higher SG&A and engineering expenses and negative currency. Europe, South America and India's EBIT was \$9 million in the third quarter of 2014 and a loss of \$40 million in the third quarter of 2013. The benefit from lower year-over-year restructuring and related expenses, higher restructuring savings from prior restructuring activities and higher revenue in India was partially offset by lower volumes in light vehicle and aftermarket in Europe and lower volumes in South America. EBIT for Asia Pacific increased \$5 million to \$10 million in the third quarter of 2014 from \$5 million in the third quarter of 2013. EBIT benefited from higher light vehicle production volumes in China, operational cost improvements, lower restructuring and related expenses and favorable currency, partially offset by lower volumes in Australia. For the Ride Performance division, restructuring and related expenses of \$7 million were included in EBIT for the third quarter of 2014 and \$57 million for the same period in 2013. Currency had a \$1 million

unfavorable impact on EBIT of the Ride Performance division for 2014 when compared to last year. Currency had a \$5 million unfavorable impact on overall company EBIT for the third quarter of 2014 as compared to the prior year's third quarter.

Table of Contents

EBIT as a Percentage of Revenue for the Three Months Ended September 30, 2014 and 2013

	Three Months Ended September 30,	
	2014	2013
Clean Air Division		
North America	8	% 9%
Europe, South America & India	3	% 3%
Asia Pacific	11	% 10%
Total Clean Air Division	7	% 7%
Ride Performance Division		
North America	11	% 10%
Europe, South America & India	4	% (16)%
Asia Pacific	18	% 9%
Total Ride Performance Division	9	% —%
Total Tenneco Inc.	7	% 4%

In the Clean Air division, EBIT as a percentage of revenues for the third quarter of 2014 was even compared to last year's third quarter. In North America, EBIT as a percentage of revenues for the third quarter of 2014 was down one percentage point compared to last year's third quarter. The benefit from higher light vehicle revenue and aftermarket sales was more than offset by higher engineering investments and negative currency. Europe, South America and India's EBIT as a percentage of revenues for the third quarter of 2014 was even compared to the prior year's third quarter. Higher light vehicle, commercial truck and off-highway vehicle volumes in Europe, lower restructuring and related expenses and year-over-year restructuring savings were offset by lower volumes in South America and India, lower aftermarket volumes in Europe, higher SG&A and engineering expenses, negative currency and a charge related to the bankruptcy of an European aftermarket customer. EBIT as a percentage of revenues for Asia Pacific in the third quarter of 2014 was up one percentage point compared to the third quarter of 2013. EBIT benefited from higher light vehicle production volumes, new platforms and higher commercial truck and off-highway vehicle revenues in China and Japan, improved operational management and positive currency, partially offset by lower volumes in Australia and higher restructuring and related expenses.

In the Ride Performance division, EBIT as a percentage of revenues was up nine percentage points compared to the prior year's third quarter. In the third quarter of 2014, EBIT as a percentage of revenues for North America was up one percentage point compared to the third quarter of 2013. The benefits of increased light vehicle and commercial truck volumes and positive aftermarket product mix were partially offset by higher restructuring and related expenses, higher SG&A and engineering expenses and negative currency. EBIT as a percentage of revenues in Europe, South America and India was up 20 percentage points compared to the prior year's third quarter. The benefit from lower year-over-year restructuring and related expenses, higher restructuring savings from prior restructuring activities and higher revenue in India was partially offset by lower volumes in light vehicle and aftermarket in Europe and lower volumes in South America. In Asia Pacific, EBIT as a percentage of revenues for the third quarter of 2014 was up nine percentage points from last year's third quarter. EBIT benefited from higher light vehicle production volumes in China, operational cost improvements, lower restructuring and related expenses and favorable currency, partially offset by lower volumes in Australia.

(1) Charge related to the bankruptcy of an aftermarket customer in Europe.

EBIT for the Clean Air division was \$297 million in the first nine months of 2014 compared to \$277 million in the first nine months of 2013. EBIT for North America increased \$12 million to \$186 million in the first nine months of 2014 versus the first nine months of 2013. EBIT benefited from higher light vehicle, off-highway and aftermarket revenues and a ramp up on new platforms, partially offset by higher engineering investments and negative currency. Europe, South America and India's EBIT decreased \$4 million in the first nine months of 2014 to \$41 million from \$45 million in the first nine months of 2013. The decrease was driven by higher year-over-year restructuring and related expenses and a charge related to the bankruptcy of an European aftermarket customer in 2014, partially offset by higher OE revenue, new platforms in Europe and year-over-year savings from prior restructuring activities. EBIT

for Asia Pacific increased \$12 million to \$70 million in the first nine months of 2014 from \$58 million in the first nine months of 2013. EBIT benefited from higher light vehicle production volumes, new platforms and higher commercial truck and off-highway vehicle revenues in China and Japan, and restructuring savings in

Table of Contents

Australia, partially offset by higher engineering expenses, higher restructuring and related expenses and negative currency. For the Clean Air division, restructuring and related expenses of \$14 million were included in EBIT for the first nine months of 2014 and \$7 million for the same period in 2013. EBIT for the Clean Air division includes a charge of \$4 million related to the bankruptcy of an aftermarket customer in Europe in 2014. Currency had a \$2 million unfavorable impact on EBIT of the Clean Air division for 2014 when compared to last year.

EBIT for the Ride Performance division was \$180 million in the first nine months of 2014 compared to \$93 million in the first nine months of 2013. EBIT for North America increased \$22 million in the first nine months of 2014 to \$116 million from \$94 million in the first nine months of 2013. The benefits of increased light vehicle and commercial truck volumes and positive aftermarket product mix were partially offset by higher restructuring and related expenses and unfavorable currency. Europe, South America and India's EBIT was \$39 million in the first nine months of 2014, compared to a loss of \$16 million in the first nine months of 2013. The increase was driven by lower year-over-year restructuring and related expenses, increased light vehicle and commercial truck volumes in Europe, higher aftermarket revenues in South America and India and year-over-year savings from prior restructuring activities, partially offset by lower light vehicle and commercial truck sales in South America and negative currency. EBIT for Asia Pacific increased \$10 million to \$25 million in the first nine months of 2014 from \$15 million in the first nine months of 2013. EBIT benefited from higher light vehicle production volumes in China, savings from prior restructuring activities in Australia and positive currency, partially offset by lower volumes in Australia. For the Ride Performance division, restructuring and related expenses of \$14 million were included in EBIT for the first nine months of 2014 and \$60 million for the same period in 2013. Currency had a \$3 million unfavorable impact on EBIT of the Ride Performance division for 2014 when compared to last year. EBIT for the Ride Performance division also included a \$7 million expense to adjust workers' compensation reserves.

Currency had a \$5 million unfavorable impact on overall company EBIT for the first nine months of 2014 as compared to the first nine months of prior year.

EBIT as a Percentage of Revenue for the Nine Months Ended September 30, 2014 and 2013

	Nine Months Ended September 30,	
	2014	2013
Clean Air Division		
North America	9	% 9%
Europe, South America & India	3	% 3%
Asia Pacific	9	% 10%
Total Clean Air Division	7	% 7%
Ride Performance Division		
North America	11	% 10%
Europe, South America & India	5	% (2)%
Asia Pacific	15	% 9%
Total Ride Performance Division	9	% 5%
Total Tenneco Inc.	6	% 5%

In the Clean Air division, EBIT as a percentage of revenues for the first nine months of 2014 was even compared to the first nine months of last year. In North America, EBIT as a percentage of revenues for the first nine months of 2014 was even compared to the first nine months of last year. The benefit from higher light vehicle, off-highway and aftermarket revenues and a ramp up on new platforms was offset by higher engineering investments and negative currency. Europe, South America and India's EBIT as a percentage of revenues for the first nine months of 2014 was even compared to the first nine months of prior year. The decrease driven by higher year-over-year restructuring and related expenses and a charge related to the bankruptcy of an European aftermarket customer in 2014 was offset by higher OE revenue, new platforms in Europe and year-over-year savings from prior restructuring activities. EBIT as a percentage of revenues for Asia Pacific in the first nine months of 2014 was down one percentage point compared to

the first nine months of 2013. The benefit from higher light vehicle production volumes, new platforms and higher commercial truck and off-highway vehicle revenues in China and Japan and restructuring savings in Australia was more than offset by higher engineering expenses, higher restructuring and related expenses and negative currency.

In the Ride Performance division, EBIT as a percentage of revenues was up four percentage points compared to the first nine months of prior year. In the first nine months of 2014, EBIT as a percentage of revenues for North America was up one

Table of Contents

percentage point compared to the first nine months of 2013. The benefits of increased light vehicle and commercial truck volumes and positive aftermarket product mix were partially offset by higher restructuring and related expenses and unfavorable currency. EBIT as a percentage of revenues in Europe, South America and India was up seven percentage points in the first nine months of 2014 when compared to the first nine months of prior year. The increase was driven by lower year-over-year restructuring and related expenses, increased light vehicle and commercial truck volumes in Europe, higher aftermarket revenues in South America and India and year-over-year savings from prior restructuring activities, partially offset by lower light vehicle and commercial truck sales in South America and negative currency. In Asia Pacific, EBIT as a percentage of revenues for the first nine months of 2014 was up six percentage points from the first nine months of last year. EBIT benefited from higher light vehicle production volumes in China, savings from prior restructuring activities in Australia and positive currency, partially offset by lower volumes in Australia.

Interest Expense, Net of Interest Capitalized

We reported interest expense in the third quarter of 2014 of \$20 million (all in our U.S. operations) net of interest capitalized of \$1 million, and \$20 million (\$19 million in our U.S. operations and \$1 million in our foreign operations) net of interest capitalized of \$1 million in the third quarter of 2013.

We reported interest expense in the first nine months of 2014 of \$58 million (all in our U.S. operations) net of interest capitalized of \$3 million, down from \$60 million (\$58 million in our U.S. operations and \$2 million in our foreign operations) net of interest capitalized of \$3 million in the first nine months of 2013. Interest expense decreased by \$2 million in the first nine months of 2014 compared to the first nine months of prior year.

On September 30, 2014, we had \$778 million in long-term debt obligations that have fixed interest rates. Of that amount, \$500 million is fixed through December 2020, \$225 million is fixed through August 2018, and the remainder is fixed from 2015 through 2025. We also have \$410 million in long-term debt obligations that are subject to variable interest rates. For more detailed explanations on our debt structure and senior credit facility refer to "Liquidity and Capital Resources — Capitalization" later in this Management's Discussion and Analysis.

Income Taxes

We reported income tax expense of \$31 million and \$30 million in the three month periods ended September 30, 2014 and 2013, respectively. The tax expense recorded in the third quarter of 2014 included a net tax benefit of \$10 million for tax adjustments to prior year estimates. The tax expense recorded in the third quarter of 2013 included a net tax benefit of \$9 million for tax adjustments to prior year estimates. Because our operations in Spain and Belgium are in a valuation allowance position, we were unable to recognize a tax benefit for the \$55 million of restructuring charges incurred in these two countries during the third quarter of 2013.

We reported income tax expense of \$117 million and \$89 million in the first nine months of 2014 and 2013, respectively. The tax expense recorded in the first nine months of 2014 included a net tax benefit of \$9 million for tax adjustments to prior year estimates. The tax expense recorded in the first nine months of 2013 included a net tax benefit of \$22 million for tax adjustments primarily related to recognizing a U.S. tax benefit for foreign taxes. U.S. tax benefit for foreign taxes is driven by our ability to claim a U.S. foreign tax credit beginning in 2013. The U.S. foreign tax credit law provides for a credit against U.S. taxes otherwise payable for foreign taxes paid with regard to dividends, interest and royalties paid to us in the U.S.

In 2012, we reversed the tax valuation allowance against our net deferred tax assets in the U.S. based on operating improvements we had made, the outlook for light and commercial vehicle production in the U.S. and the positive impact this should have on our U.S. operations. We have fully utilized our federal net operating loss ("NOL") as of June 30, 2014. The state NOLs expire in various tax years through 2032.

Valuation allowances are established in certain foreign jurisdictions for deferred tax assets. The valuation allowances recorded against deferred tax assets will impact our provision for income taxes until the valuation allowances are released. Our provision for income taxes will include no tax benefit for losses incurred and no tax expense with respect to income generated in these jurisdictions until the respective valuation allowance is eliminated.

Restructuring and Other Charges

Over the past several years, we have adopted plans to restructure portions of our operations. These plans were approved by our Board of Directors and were designed to reduce operational and administrative overhead costs

throughout the business. In 2013, we incurred \$78 million in restructuring and related costs, primarily related to European cost reduction efforts, including non-cash asset write downs of \$3 million, the costs to exit the distribution of aftermarket exhaust products and ending production of leaf springs in Australia, headcount reductions in various regions, and the net impact of freezing our defined benefit plans in the United Kingdom, of which \$70 million was recorded in cost of sales, \$6 million in SG&A, \$1 million in engineering expense and \$1 million in other expense. In the third quarter of 2014, we incurred \$8 million in restructuring and related costs including non-cash charges of \$2 million, primarily related to European cost reduction efforts,

Table of Contents

headcount reductions in Australia and the sale of a closed facility in Cozad, Nebraska, of which \$5 million was recorded in cost of sales and \$3 million in other expense. In the third quarter of 2013, we incurred \$58 million in restructuring and related costs, primarily related to European cost reduction efforts including non-cash asset write downs of \$2 million and headcount reductions in various regions, of which \$56 million was recorded in cost of sales, \$1 million in SG&A and \$1 million in other expense. In the first nine months of 2014, we incurred \$28 million in restructuring and related costs including non-cash charges of \$3 million, primarily related to European cost reduction efforts, headcount reductions in Australia and South America and the sale of a closed facility in Cozad, Nebraska, of which \$20 million was recorded in cost of sales, \$3 million in SG&A, \$1 million in engineering expense and \$4 million in other expense. In the first nine months of 2013, we incurred \$69 million in restructuring and related costs, primarily related to European cost reduction efforts including non-cash asset write downs of \$2 million, the costs to exit the distribution of aftermarket exhaust products and ending of production of leaf springs in Australia, headcount reductions in various regions, and the net impact of freezing our defined benefit plans in the United Kingdom, of which \$63 million was recorded in cost of sales, \$5 million in SG&A and \$1 million in other expense.

Amounts related to activities that are part of our restructuring reserves are as follows:

	December 31, 2013	2014	2014 Cash Payments	Impact of Exchange Rates	September 30, 2014 Restructuring Reserve
Employee Severance, Termination Benefits and Other Related Costs	\$44	25	(32)	(3)	\$ 34

Under the terms of our amended and restated senior credit agreement that took effect on March 22, 2012, we are allowed to exclude \$80 million of cash charges and expenses, before taxes, related to cost reduction initiatives incurred after March 22, 2012 from the calculation of the financial covenant ratios required under our senior credit facility. As of December 31, 2013, we had excluded the entire \$80 million of allowable charges relating to restructuring initiatives.

On January 31, 2013, we announced our intent to reduce structural costs in Europe by approximately \$60 million annually, and anticipate related costs of approximately \$120 million, which includes the closing of the Vittaryd facility in Sweden that we announced in September 2012 and a \$7 million charge recorded in the fourth quarter of 2012 related to the impairment of certain assets in the European ride performance business. The \$120 million of anticipated costs includes approximately \$20 million of non-cash asset write downs, the cost of relocating tooling, equipment and production to other facilities, severance and retention payments to employees and other costs related to these actions. Any plans affecting our European hourly and salaried workforce have been and will be subject to consultation with the relevant employee representatives. We incurred \$78 million in restructuring and related costs in 2013, of which \$69 million was related to this initiative including \$3 million for non-cash asset write downs. In the third quarter of 2014, we incurred \$8 million in restructuring and related costs, of which \$4 million was related to this initiative. In the first nine months of 2014, we incurred \$28 million in restructuring and related costs, of which \$18 million was related to this initiative including \$1 million for non-cash asset write downs. We expect that most of the expense will be recorded by 2014, and that the Company will reach a full savings run rate in 2016. As part of our European structural cost reduction initiative, on September 5, 2013 we announced our intent to close our ride performance plant in Gijon, Spain and reduce the workforce at our ride performance plant in Sint-Truiden, Belgium. The actions were subject to consultation with the relevant employee representatives and in total would eliminate approximately 480 jobs in Western Europe while allowing the most efficient use of our capital assets and production capacity across the region. We concluded the consultation period with employee representatives at Gijon without having reached agreement and on December 17, 2013 notified the Gijon employees' works council that the Company was proceeding with the plant closure. Employee terminations at Gijon were completed by the end of 2013. During the first quarter of 2014, the employees' works council filed suit challenging the decision to close the Gijon plant and local High Court of Justice of Asturias ruled in favor of the employees' works council. On February 25, 2014, we announced the intention of the Company to appeal that decision to the Supreme Court of Spain in Madrid, and at the

same time we worked closely with local and European government officials to reach a solution to address the challenge to our restructuring plan by the Gijon plant's employees' works council. In July 2014, we finalized the agreements related to the restructuring with employee representatives at Gijon as well as Sint-Truiden. Under the final agreement for Gijon, the plant re-opened in July 2014 with about half of its prior workforce and will continue to be operated by Tenneco until a complete transfer of ownership takes place in approximately two years. Due to the ongoing operation of the Gijon plant, we now expect total charges related to the actions at the Gijon and St. Truiden plants to exceed the previous estimate of \$63 million. Overall, however, the total cost of our initiatives to reduce structural costs in Europe remains unchanged from the original estimate of approximately \$120 million. In the first quarter of 2014, we announced and finalized the closure of the clean air just-in-time plant in Iwuy, France, due to reduced demand for the plant's products. The actions were subject to the required consultation process with the relevant employee representatives.

Earnings Per Share

52

Table of Contents

We reported net income attributable to Tenneco Inc. of \$78 million or \$1.27 per diluted common share for the third quarter of 2014. Included in the results for the third quarter of 2014 were negative impacts from expenses related to our restructuring activities and a bad debt charge, which were more than offset by net tax benefits. The net impact of these items increased earnings per diluted share by \$0.02. We reported net income attributable to Tenneco Inc. of \$12 million or \$0.19 per diluted common share for the third quarter of 2013. Included in the results for the third quarter of 2013 were negative impacts from expenses related to our restructuring activities, which were partially offset by net tax benefits. The net impact of these items decreased earnings per diluted share by \$0.80.

We reported net income attributable to Tenneco Inc. of \$205 million or \$3.33 per diluted common share for the first nine months of 2014. Included in the results for the first nine months of 2014 were negative impacts from expenses related to our restructuring activities and a bad debt charge, which were partially offset by net tax benefits. The net impact of these items decreased earnings per diluted share by \$0.28. We reported net income attributable to Tenneco Inc. of \$129 million or \$2.09 per diluted common share for the first nine months of 2013. Included in the results for the first nine months of 2013 were negative impacts from expenses related to our restructuring activities, which were partially offset by net tax benefits. The net impact of these items decreased earnings per diluted share by \$0.73.

Dividends on Common Stock

On January 10, 2001, our Board of Directors eliminated the quarterly dividend on our common stock. There are no current plans to reinstate a dividend on our common stock.

Cash Flows for the Three Months Ended September 30, 2014 and 2013

	Three Months Ended September 30, 2014 2013 (Millions)	
Cash provided (used) by:		
Operating activities	\$115	\$50
Investing activities	(97) (57
Financing activities	1	38
Operating Activities		

For the third quarter of 2014, operating activities provided \$115 million in cash compared to \$50 million in cash provided during last year's third quarter. Compared to the prior year, the greater cash provided from operations was primarily driven by higher net income and working capital management. For the third quarter of 2014, cash used for working capital was \$2 million versus \$11 million of cash used for working capital in the third quarter of 2013.

Receivables were a source of cash of \$67 million in the third quarter of 2014 compared to a use of cash of \$27 million in the prior year's third quarter. Inventory represented a cash outflow of \$21 million for the third quarter of 2014 and the third quarter of 2013, respectively. Accounts payable used \$44 million of cash for the quarter ended September 30, 2014, compared to \$38 million cash used for the quarter ended September 30, 2013. Cash taxes were \$24 million for the third quarter of 2014 compared to \$21 million in the prior year's third quarter.

Investing Activities

Cash used for investing activities was \$97 million in the third quarter of 2014 compared to cash used of \$57 million in the same period a year ago. Cash payments for plant, property and equipment were \$95 million in the third quarter of 2014 versus payments of \$54 million in the third quarter of 2013, an increase of \$41 million. The majority of the spending was to support continued growth in OE Clean Air and Ride Performance programs in Europe, China and North America. Cash payments for software-related intangible assets were \$3 million and \$7 million, respectively, for the third quarters of 2014 and 2013.

Financing Activities

Cash flow from financing activities was an inflow of \$1 million for the quarter ending September 30, 2014 compared to an inflow of \$38 million for the quarter ending September 30, 2013. During the third quarter of 2013, we repurchased 374,900 shares of our outstanding common stock for \$18 million at an average price of \$48.89 per share as part of a previously announced stock buyback plan for 550,000 shares of outstanding common stock.

Cash Flows for the Nine Months Ended September 30, 2014 and 2013

53

Table of Contents

	Nine Months Ended September 30,	
	2014	2013
	(Millions)	
Cash provided (used) by:		
Operating activities	\$89	\$91
Investing activities	(273) (196
Financing activities	190	160
Operating Activities		

For the first nine months of 2014, operating activities provided \$89 million in cash compared to \$91 million in cash provided during the first nine months of last year. Compared to the prior year, the greater use of cash from operations was primarily driven by working capital investment to support business growth, partially offset by higher net income. For the first nine months of 2014, cash used for working capital was \$277 million versus \$220 million of cash used for working capital in the first nine months of 2013. Receivables were a use of cash of \$236 million in the first nine months of 2014 compared to a use of cash of \$280 million in the first nine months of prior year. Inventory represented a cash outflow of \$125 million during the first nine months of 2014, compared to a cash outflow of \$39 million during the first nine months of last year. Accounts payable provided \$116 million of cash for the first nine months ended September 30, 2014, compared to cash provided of \$111 million for the first nine months ended September 30, 2013. Cash taxes were \$98 million for the first nine months of 2014 compared to \$92 million in the first nine months of prior year.

Investing Activities

Cash used for investing activities was \$273 million in the first nine months of 2014 compared to cash used of \$196 million in the same period a year ago. Cash payments for plant, property and equipment were \$262 million in the first nine months of 2014 versus payments of \$178 million in the first nine months of 2013, an increase of \$84 million. The majority of the spending was to support continued growth in OE Clean Air and Ride Performance programs in Europe, China and North America. Cash payments for software-related intangible assets were \$12 million and \$19 million, respectively, for the first nine months of 2014 and 2013. There was no change in restricted cash in the first nine months of 2014 compared to a use of cash of \$5 million in the first nine months of 2013.

Financing Activities

Cash flow from financing activities was an inflow of \$190 million for the nine months ending September 30, 2014 compared to an inflow of \$160 million for the nine months ending September 30, 2013. During the first nine months of 2013, we repurchased 419,900 shares of our outstanding common stock for \$20 million at an average price of \$48.42 per share as part of a previously announced stock buyback plan for 550,000 shares of outstanding common stock. Borrowings under our revolving credit facility were \$196 million at September 30, 2014 and \$261 million at September 30, 2013. At September 30, 2014, there was \$30 million borrowing under the North American accounts receivable securitization programs, whereas at September 30, 2013, there was \$50 million outstanding. In the first nine months of 2014, we received \$4 million for selling 45 percent equity interest in Tenneco Fusheng (Chengdu) Automobile Parts Co., Ltd. to a third party partner.

Outlook

For the fourth quarter, IHS Automotive forecasts global light vehicle industry production to increase three percent year-over-year in the regions where we operate. North America is expected to increase four percent, China up six percent and India up 10%. Europe industry light vehicle production is expected to decrease one percent and a decline of nine percent is forecasted for South America.

In the fourth quarter, we expect positive revenue drivers from higher light vehicle unit volumes as well as higher commercial truck and off-highway content from the implementation of off-highway emission regulations in the U.S. and Europe, and from a higher sales rate of emissions content to our commercial truck customers in China. IHS's projection of lower North American pickup truck production including a changeover on a large pickup truck platform, will offset some of the positive revenue drivers. Additionally, we are seeing volume weakness in our commercial

truck and off-highway markets. We expect that the net positive revenue impact of these drivers will counteract an estimated three percent of total revenue headwind from currency exchange rates, resulting in total revenue about the same to slightly higher compared to fourth quarter of last year. For the fourth quarter, revenues in each of our light vehicle, commercial truck and off-highway and aftermarket businesses are expected to reflect this year-over-year trend if currency rates remain unchanged from their levels at the end of the third quarter.

Table of Contents

Other Event

The company announced and launched a voluntary program offering to buyout former employees vested in the U.S. pension plan during the third quarter of 2014. The company expects to complete the process in the fourth quarter and take a non-cash charge at the time. Based on participant responses, we expect more than 60% of the former employees who are eligible to participate will receive a buyout. This will result in a non-cash charge between \$20 million to \$22 million. The cash payments to those former employees who elect to take the buyout will be made from the pension plan assets and will not impact the company's cash flow. This program is expected to reduce the outstanding U.S. pension liability by about \$50 million based on the current actuarial assumptions.

Critical Accounting Policies

We prepare our condensed consolidated financial statements in accordance with accounting principles generally accepted in the United States of America. Preparing our condensed consolidated financial statements in accordance with generally accepted accounting principles requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. The following paragraphs include a discussion of some critical areas where estimates are required.

Revenue Recognition

We recognize revenue for sales to our original equipment and aftermarket customers when title and risk of loss passes to the customers under the terms of our arrangements with those customers, which is usually at the time of shipment from our plants or distribution centers. Generally, in connection with the sale of exhaust systems to certain original equipment manufacturers, we purchase catalytic converters and diesel particulate filters or components thereof including precious metals (“substrates”) on behalf of our customers which are used in the assembled system. These substrates are included in our inventory and “passed through” to the customer at our cost, plus a small margin, since we take title to the inventory and are responsible for both the delivery and quality of the finished product. Revenues recognized for substrate sales were \$1,478 million and \$1,373 million for the first nine months of 2014 and 2013, respectively. For our aftermarket customers, we provide for promotional incentives and returns at the time of sale. Estimates are based upon the terms of the incentives and historical experience with returns. Certain taxes assessed by governmental authorities on revenue producing transactions, such as value added taxes, are excluded from revenue and recorded on a net basis. Shipping and handling costs billed to customers are included in revenues and the related costs are included in cost of sales in our condensed consolidated statements of income.

Warranty Reserves

Where we have offered product warranty, we also provide for warranty costs. Provisions for estimated expenses related to product warranty are made at the time products are sold or when specific warranty issues are identified on OE products. These estimates are established using historical information about the nature, frequency, and average cost of warranty claims and upon specific warranty issues as they arise. The warranty terms vary but range from one year up to limited lifetime warranties on some of our premium aftermarket products. We actively study trends of our warranty claims and take action to improve product quality and minimize warranty claims. While we have not experienced any material differences between these estimates and our actual costs, it is reasonably possible that future warranty issues could arise that could have a significant impact on our condensed consolidated financial statements.

Pre-production Design and Development and Tooling Assets

We expense pre-production design and development costs as incurred unless we have a contractual guarantee for reimbursement from the original equipment customer. Unbilled pre-production design and development costs recorded in prepayments and other and long-term receivables totaled \$30 million at both September 30, 2014 and December 31, 2013. In addition, plant, property and equipment included \$63 million and \$59 million at September 30, 2014 and December 31, 2013, respectively, for original equipment tools and dies that we own, and prepayments and other included \$101 million and \$86 million at September 30, 2014 and December 31, 2013, respectively, for in-process tools and dies that we are building for our original equipment customers.

Income Taxes

We recognize deferred tax assets and liabilities on the basis of the future tax consequences attributable to temporary differences that exist between the financial statement carrying value of assets and liabilities and their respective tax

values, and net operating losses ("NOL") and tax credit carryforwards on a taxing jurisdiction basis. We measure deferred tax assets and liabilities using enacted tax rates that will apply in the years in which we expect the temporary differences to be recovered or paid.

Table of Contents

We evaluate our deferred income taxes quarterly to determine if valuation allowances are required or should be adjusted. U.S. GAAP requires that companies assess whether valuation allowances should be established against their deferred tax assets based on consideration of all available evidence, both positive and negative, using a "more likely than not" standard. This assessment considers, among other matters, the nature, frequency and amount of recent losses, the duration of statutory carryforward periods, and tax planning strategies. In making such judgments, significant weight is given to evidence that can be objectively verified.

Valuation allowances are established for deferred tax assets based on a "more likely than not" threshold. The ability to realize deferred tax assets depends on our ability to generate sufficient taxable income within the carryforward periods provided for in the tax law for each tax jurisdiction. We have considered the following possible sources of taxable income when assessing the realization of our deferred tax assets:

- Future reversals of existing taxable temporary differences;
- Taxable income or loss, based on recent results, exclusive of reversing temporary differences and carryforwards;
- Tax-planning strategies; and
- Taxable income in prior carryback years if carryback is permitted under the relevant tax law.

The valuation allowances recorded against deferred tax assets in certain foreign jurisdictions will impact our provision for income taxes until the valuation allowances are released. Our provision for income taxes will include no tax benefit for losses incurred and no tax expense with respect to income generated in these jurisdictions until the respective valuation allowance is eliminated.

For interim tax reporting we estimate our annual effective tax rate and apply it to our year to date ordinary income. Jurisdictions with a projected loss for the year or an actual year-to-date loss where no tax benefit can be recognized due to a valuation allowance are excluded from the estimated annual effective tax rate. The impact of including these jurisdictions on the quarterly effective rate calculation could result in a higher or lower effective tax rate during a particular quarter due to the mix and timing of actual earnings versus annual projections. The tax effects of certain unusual or infrequently occurring items, including changes in judgment about valuation allowances and effects of changes in tax laws or rates, are excluded from the estimated annual effective tax rate calculation and recognized in the interim period in which they occur.

Goodwill, net

We evaluate goodwill for impairment in the fourth quarter of each year, or more frequently if events indicate it is warranted. The goodwill impairment test consists of a two-step process. In step one, we compare the estimated fair value of our reporting units with goodwill to the carrying value of the unit's assets and liabilities to determine if impairment exists within the recorded balance of goodwill. We estimate the fair value of each reporting unit using the income approach which is based on the present value of estimated future cash flows. The income approach is dependent on a number of factors, including estimates of market trends, forecasted revenues and expenses, capital expenditures, weighted average cost of capital and other variables. A separate discount rate derived by a combination of published sources, internal estimates and weighted based on our debt and equity structure, was used to calculate the discounted cash flows for each of our reporting units. These estimates are based on assumptions that we believe to be reasonable, but which are inherently uncertain and outside of the control of management. If the carrying value of the reporting unit is higher than its fair value, there is an indication that impairment may exist which requires step two to be performed to measure the amount of the impairment loss. The amount of impairment is determined by comparing the implied fair value of a reporting unit's goodwill to its carrying value.

In the fourth quarter of 2013, the estimated fair value of each of our reporting units exceeded the carrying value of their assets and liabilities as of the testing date.

Pension and Other Postretirement Benefits

We have various defined benefit pension plans that cover some of our employees. We also have postretirement health care and life insurance plans that cover some of our domestic employees. Our pension and postretirement health care and life insurance expenses and valuations are dependent on assumptions used by our actuaries in calculating those amounts. These assumptions include discount rates, health care cost trend rates, long-term return on plan assets, retirement rates, mortality rates and other factors. Health care cost trend rate assumptions are developed based on

historical cost data and an assessment of likely long-term trends. Retirement rates are based primarily on actual plan experience while mortality rates are based upon the general population experience which is not expected to differ materially from our experience.

Our approach to establishing the discount rate assumption for both our domestic and foreign plans is generally based on the yield on high-quality corporate fixed-income investments. At the end of each year, the discount rate is determined using the results of bond yield curve models based on a portfolio of high quality bonds matching the notional cash inflows with the expected benefit payments for each significant benefit plan. Based on this approach, we raised the weighted average discount

Table of Contents

rate for all our pension plans to 4.6 percent in 2014 from 4.1 percent in 2013. The discount rate for postretirement benefits was raised to 4.8 percent in 2014 from 4.1 percent in 2013.

Our approach to determining expected return on plan asset assumptions evaluates both historical returns as well as estimates of future returns, and is adjusted for any expected changes in the long-term outlook for the equity and fixed income markets. As a result, our estimate of the weighted average long-term rate of return on plan assets for all of our pension plans remained unchanged at 6.9 percent for 2014.

Except in the U.K., our pension plans generally do not require employee contributions. Our policy is to fund our pension plans in accordance with applicable U.S. and foreign government regulations and to make additional payments as funds are available to achieve full funding of the accumulated benefit obligation. As of September 30, 2014, all legal funding requirements have been met.

New Accounting Pronouncements

Note 11 in our notes to condensed consolidated financial statements located in Part I Item 1 of this Form 10-Q is incorporated herein for reference.

Total noncontrolling interests	35	39	(10))
Tenneco Inc. shareholders' equity	613	433	42	
Total equity	648	472	37	
Total capitalization	\$ 1,974	\$ 1,594	24	

General. Short-term debt, which includes maturities classified as current, borrowings by foreign subsidiaries, and borrowings securitized by our North American accounts receivable securitization program, was \$111 million and \$83 million as of September 30, 2014 and December 31, 2013, respectively. Borrowings under our revolving credit facilities, which are classified as long-term debt, were \$196 million and \$58 million at September 30, 2014 and December 31, 2013, respectively.

The 2014 year-to-date increase in Tenneco Inc. shareholders' equity primarily resulted from net income attributable to Tenneco Inc. of \$205 million, a \$8 million increase related to pension and postretirement benefits and a \$27 million increase in premium on common stock and other capital surplus relating to common stock issued pursuant to benefit plans, partially offset by a \$60 million decrease caused by the impact of changes in foreign exchange rates on the translation of financial statements of our foreign subsidiaries into U.S. dollars.

Overview. Our financing arrangements are primarily provided by a committed senior secured financing arrangement with a syndicate of banks and other financial institutions. The arrangement is secured by substantially all our domestic assets and pledges of up to 66 percent of the stock of certain first-tier foreign subsidiaries, as well as guarantees by our material domestic subsidiaries.

On March 22, 2012, we completed an amendment and restatement of our senior credit facility by increasing the amount and extending the maturity date of our revolving credit facility and adding a new Tranche A Term Facility. As of September 30, 2014, the senior credit facility provides us with a total revolving credit facility size of \$850 million and had a \$213 million balance outstanding under the Tranche A Term Facility, both of which will mature on March 22, 2017. Funds may be borrowed, repaid and re-borrowed under the revolving credit facility without premium or penalty. The revolving credit facility is reflected as debt on our balance sheet only if we borrow money under this facility or if we use the facility to make payments for letters of credit. Outstanding letters of credit reduce our availability to enter into revolving loans under the facility. We are required to make quarterly principal payments

under the Tranche A Term Facility of \$6.3 million through March 31, 2015, \$9.4 million beginning June 30, 2015 through March 31, 2016, \$12.5 million beginning June 30, 2016 through December 31, 2016 and a final payment of \$125 million is due on March 22, 2017. We have excluded the required payments, within the next twelve months, under the Tranche A Term Facility totaling \$31 million from current liabilities as of September 30, 2014, because we have the intent and ability to refinance the obligations on a long-term basis by using our revolving credit facility.

Table of Contents

At September 30, 2014, of the \$850 million available under the revolving credit facility, we had unused borrowing capacity of \$572 million with \$213 million in outstanding borrowings and \$82 million in outstanding letters of credit. As of September 30, 2014, our outstanding debt also included \$213 million related to our Tranche A Term Facility which is subject to quarterly principal payments as described above through March 22, 2017, \$225 million of 7.75 percent senior notes due August 15, 2018, \$500 million of 6.875 percent senior notes due December 15, 2020, and \$164 million of other debt.

We monitor market conditions with respect to the potential refinancing of our outstanding debt obligations.

Depending on market and other conditions, we may seek to refinance certain of our debt obligations during the fourth quarter. Such refinancings would likely include an extension and increase in the size of our existing \$850 million revolving credit facility and \$213 million Term Loan A Facility and/or the refinancing of our existing \$225 million of 7.75 percent senior unsecured notes due in 2018 with the issuance of new senior unsecured notes. We cannot make any assurance, however, that any such refinancings will be completed during the fourth quarter.

Senior Credit Facility — Interest Rates and Fees. Beginning March 22, 2012, our Tranche A Term Facility and revolving credit facility bear interest at an annual rate equal to, at our option, either (i) London Interbank Offered Rate (“LIBOR”) plus a margin of 250 basis points, or (ii) a rate consisting of the greater of (a) the JPMorgan Chase prime rate plus a margin of 150 basis points, (b) the Federal Funds rate plus 50 basis points plus a margin of 150 basis points, and (c) the Eurodollar Rate plus 100 basis points plus a margin of 150 basis points. The margin we pay on these borrowings will be reduced by a total of 25 basis points below the original margin following each fiscal quarter for which our consolidated net leverage ratio is less than 1.50 or will be increased by a total of 25 basis points above the original margin if our consolidated net leverage ratio is greater than or equal to 2.50. We also pay a commitment fee equal to 40 basis points. In February 2014, the margin we pay on borrowing decreased by 25 basis points below the original margin, as a result of a decrease in our consolidated net leverage ratio to 1.39 at December 31, 2013. As of March 31, 2014, our consolidated net leverage ratio was 1.63 resulting in an increase of 25 basis points back to 250 basis points.

Senior Credit Facility — Other Terms and Conditions. Our senior credit facility requires that we maintain financial ratios equal to or better than the following consolidated net leverage ratio (consolidated indebtedness net of cash divided by consolidated EBITDA, as defined in the senior credit facility agreement), and consolidated interest coverage ratio (consolidated EBITDA divided by consolidated interest expense, as defined under the senior credit facility agreement) at the end of each period indicated. Failure to maintain these ratios will result in a default under our senior credit facility. The financial ratios required under the amended and restated senior credit facility and, the actual ratios we achieved for the three quarters of 2014, are as follows:

	September 30, 2014		June 30, 2014		March 31, 2014	
	Required	Actual	Required	Actual	Required	Actual
Leverage Ratio (maximum)	3.50	1.55	3.50	1.57	3.50	1.63
Interest Coverage Ratio (minimum)	2.75	10.99	2.75	10.62	2.75	10.39

The senior credit facility includes a maximum leverage ratio covenant of 3.50 and a minimum interest coverage ratio of 2.75 through March 22, 2017.

The covenants in our senior credit facility agreement generally prohibit us from repaying or refinancing our senior notes. So long as no default existed, we would, however, under our senior credit facility agreement, be permitted to repay or refinance our senior notes (i) with the net cash proceeds of permitted refinancing indebtedness (as defined in the senior credit facility agreement or with the net cash proceeds of our common stock); (ii) with the net cash proceeds of the incremental facilities (as defined in the senior credit facility agreement); (iii) with the net cash proceeds of the revolving loans (as defined in the senior credit facility agreement); (iv) with the cash generated by the operations of the Company; (v) in an amount equal to the net cash proceeds of qualified capital stock (as defined in the senior credit facility agreement) issued by the Company after March 22, 2012; and (vi) in exchange for permitted refinancing indebtedness or in exchange for shares of our common stock; provided that such purchases are capped as follows (with respect to clauses (iii), (iv) and (v) on a pro forma consolidated leverage ratio after giving effect to such purchase, cancellation or redemption):

Pro forma Consolidated Leverage Ratio	Aggregate Senior Note Maximum Amount (Millions)
Greater than or equal to 3.0x	\$ 20
Greater than or equal to 2.5x	\$ 100
Greater than or equal to 2.0x	\$ 200
Less than 2.0x	no limit

58

Table of Contents

Although the senior credit facility agreement would permit us to repay or refinance our senior notes under the conditions described above, any repayment or refinancing of our outstanding notes would be subject to market conditions and either the voluntary participation of note holders or our ability to redeem the notes under the terms of the applicable note indenture. For example, while the senior credit agreement would allow us to repay our outstanding notes via a direct exchange of the notes for either permitted refinancing indebtedness or for shares of our common stock, we do not, under the terms of the agreements governing our outstanding notes, have the right to refinance the notes via any type of direct exchange.

The senior credit facility agreement also contains other restrictions on our operations that are customary for similar facilities, including limitations on: (i) incurring additional liens; (ii) sale and leaseback transactions (except for the permitted transactions as described in the senior credit facility agreement); (iii) liquidations and dissolutions; (iv) incurring additional indebtedness or guarantees; (v) investments and acquisitions; (vi) dividends and share repurchases; (vii) mergers and consolidations; and (viii) refinancing of the senior notes. Compliance with these requirements and restrictions is a condition for any incremental borrowings under the senior credit facility agreement and failure to meet these requirements enables the lenders to require repayment of any outstanding loans.

As of September 30, 2014, we were in compliance with all the financial covenants and operational restrictions of the senior credit facility. Our senior credit facility does not contain any terms that could accelerate payment of the facility or affect pricing under the facility as a result of a credit rating agency downgrade.

Senior Notes. As of September 30, 2014, our outstanding senior notes also included \$225 million of 7.75 percent senior notes due August 15, 2018 and \$500 million of 6.875 percent senior notes due December 15, 2020. Under the indentures governing the notes, we are permitted to redeem some or all of the remaining senior notes at specified prices that decline to par over a specified period, (a) at any time, in the case of the senior notes due 2018, and (b) on or after December 15, 2015, in the case of the senior notes due 2020. In addition, prior to December 15, 2015 the senior notes due 2020 may also be redeemed at a price generally equal to 100 percent of the principal amount thereof plus a premium based on the present values of the remaining payments due to the noteholders. If we sell certain of our assets or experience specified kinds of changes in control, we must offer to repurchase the notes due 2018 and 2020 at 101 percent of the principal amount thereof plus accrued and unpaid interest.

Our senior notes require that, as a condition precedent to incurring certain types of indebtedness not otherwise permitted, our consolidated fixed charge coverage ratio, as calculated on a pro forma basis, be greater than 2.00. The indentures also contain restrictions on our operations, including limitations on: (i) incurring additional indebtedness or liens; (ii) dividends; (iii) distributions and stock repurchases; (iv) investments; (v) asset sales and (vi) mergers and consolidations. Subject to limited exceptions, all of our existing and future material domestic wholly owned subsidiaries fully and unconditionally guarantee these notes on a joint and several basis. There are no significant restrictions on the ability of the subsidiaries that have guaranteed these notes to make distributions to us. As of September 30, 2014, we were in compliance with the covenants and restrictions of these indentures.

Accounts Receivable Securitization. We securitize some of our accounts receivable on a limited recourse basis in North America and Europe. As servicer under these accounts receivable securitization programs, we are responsible for performing all accounts receivable administration functions for these securitized financial assets including collections and processing of customer invoice adjustments. In North America, we have an accounts receivable securitization program with three commercial banks comprised of a first priority facility and a second priority facility. We securitize original equipment and aftermarket receivables on a daily basis under the bank program. In March 2014, the North American program was amended and extended to March 20, 2015. The first priority facility continues to provide financing of up to \$110 million and the second priority facility, which is subordinated to the first priority facility, continues to provide up to an additional \$40 million of financing. Both facilities monetize accounts receivable generated in the U.S. and Canada that meet certain eligibility requirements. The second priority facility also monetizes certain accounts receivable generated in the U.S. or Canada that would otherwise be ineligible under the first priority securitization facility. The amount of outstanding third-party investments in our securitized accounts receivable under the North American program was \$30 million at September 30, 2014 and \$10 million at December 31, 2013.

Each facility contains customary covenants for financings of this type, including restrictions related to liens, payments, mergers or consolidations and amendments to the agreements underlying the receivables pool. Further,

each facility may be terminated upon the occurrence of customary events (with customary grace periods, if applicable), including breaches of covenants, failure to maintain certain financial ratios, inaccuracies of representations and warranties, bankruptcy and insolvency events, certain changes in the rate of default or delinquency of the receivables, a change of control and the entry or other enforcement of material judgments. In addition, each facility contains cross-default provisions, where the facility could be terminated in the event of non-payment of other material indebtedness when due and any other event which permits the acceleration of the maturity of material indebtedness.

We also securitize receivables in our European operations with regional banks in Europe under various separate facilities. The commitments for these arrangements are generally for one year, but some may be cancelled with notice 90 days prior to

Table of Contents

renewal. In some instances, the arrangement provides for cancellation by the applicable financial institution at any time upon 15 days, or less, notification. The amount of outstanding third-party investments in our securitized accounts receivable in Europe was \$165 million and \$134 million at September 30, 2014 and December 31, 2013, respectively. If we were not able to securitize receivables under either the North American or European securitization programs, our borrowings under our revolving credit agreement might increase. These accounts receivable securitization programs provide us with access to cash at costs that are generally favorable to alternative sources of financing, and allow us to reduce borrowings under our revolving credit agreement.

In our North American accounts receivable securitization programs, we transfer a partial interest in a pool of receivables and the interest that we retain is subordinate to the transferred interest. Accordingly, we account for our North American securitization program as a secured borrowing. In our European programs, we transfer accounts receivables in their entirety to the acquiring entities and satisfy all of the conditions established under ASC Topic 860, "Transfers and Servicing," to report the transfer of financial assets in their entirety as a sale. The proceeds received in exchange for the transfer of accounts receivable under our European securitization programs approximates the fair value of such receivables. We recognized less than \$1 million interest expense in each of the three month periods ended September 30, 2014 and 2013, respectively, and \$2 million in the nine month periods ended September 30, 2014 and 2013, respectively, relating to our North American securitization program. In addition, we recognized a loss of \$1 million in each of the three month periods ended September 30, 2014 and 2013, respectively, and \$3 million in each of the nine month periods ended September 30, 2014 and 2013, respectively, on the sale of trade accounts receivable in our European accounts receivable securitization programs, representing the discount from book values at which these receivables were sold to our banks. The discount rate varies based on funding costs incurred by our banks, which averaged approximately two percent during the first nine months of 2014 and three percent during the first nine months of 2013, respectively.

Financial Instruments. One of our European subsidiaries receives payment from one of its customers whereby the accounts receivable are satisfied through the early delivery of financial instruments. We may collect these financial instruments before their maturity date by either selling them at a discount or using them to satisfy accounts receivable that have previously been sold to a European bank. Any of these financial instruments which are not sold are classified as other current assets. The amount of these financial instruments that was collected before their maturity date and sold at a discount totaled at less than \$1 million and \$5 million at September 30, 2014 and December 31, 2013, respectively. No such financial instruments were held by our European subsidiary as of September 30, 2014 or December 31, 2013.

In certain instances, several of our Chinese subsidiaries receive payment from customers through the receipt of financial instruments on the date the customer payments are due. Several of our Chinese subsidiaries also satisfy vendor payments through the delivery of financial instruments on the date the payments are due. Financial instruments issued to satisfy vendor payables and not redeemed totaled \$25 million and \$13 million at September 30, 2014 and December 31, 2013, respectively, and were classified as notes payable. Financial instruments received from customers and not redeemed totaled \$20 million and \$12 million at September 30, 2014 and December 31, 2013, respectively. We classify financial instruments received from our customers as other current assets if issued by a financial institution of our customers or as customer notes and accounts, net if issued by our customer. We classified \$20 million and \$12 million in other current assets at September 30, 2014 and December 31, 2013, respectively. Some of our Chinese subsidiaries that issue their own financial instruments to pay vendors are required to maintain a cash balance if they exceed certain credit limits with the financial institution that guarantees those financial instruments. A restricted cash balance was required at those Chinese subsidiaries at September 30, 2014 for \$1 million and was not required December 31, 2013.

The financial instruments received by one of our European subsidiaries and some of our Chinese subsidiaries are drafts drawn that are payable at a future date and, in some cases, are negotiable and/or are guaranteed by banks of the customers. The use of these instruments for payment follows local commercial practice. Because certain of such financial instruments are guaranteed by our customers' banks, we believe they represent a lower financial risk than the outstanding accounts receivable that they satisfy which are not guaranteed by a bank.

Supply Chain Financing. Near the end of the second quarter of 2013 certain of our suppliers in the U.S. extended their payment terms to Tenneco. The liquidity benefit to Tenneco from the extended payment terms totaled \$14 million at September 30, 2014. These suppliers also began participating in a supply chain financing program under which they securitize their accounts receivables from Tenneco with two financial institutions. The financial institutions participate in the supply chain financing program on an uncommitted basis and can cease purchasing receivables from Tenneco's suppliers at any time. If the financial institutions did not continue to purchase receivables from Tenneco's suppliers under this program, the participating vendors could reduce their payment terms to Tenneco which in turn would cause our borrowings under our revolving credit facility to increase.

Capital Requirements. We believe that cash flows from operations, combined with our cash on hand and available borrowing capacity described above, assuming that we maintain compliance with the financial covenants and other requirements of our loan agreement, will be sufficient to meet our future capital requirements, including debt amortization,

Table of Contents

capital expenditures, pension contributions, and other operational requirements including cost reduction plans, for the following year. Our ability to meet the financial covenants depends upon a number of operational and economic factors, many of which are beyond our control. In the event that we are unable to meet these financial covenants, in addition to seeking an amendment to our senior credit facility, we would consider several options to meet our cash flow needs. Such actions include additional restructuring initiatives and other cost reductions, sales of assets, reductions to working capital and capital spending, issuance of equity and other alternatives to enhance our financial and operating position. Should we be required to implement any of these actions to meet our cash flow needs, we believe we can do so in a reasonable time frame.

Derivative Financial Instruments

Foreign Currency Exchange Rate Risk

We use derivative financial instruments, principally foreign currency forward purchase and sale contracts with terms of less than one year, to hedge our exposure to changes in foreign currency exchange rates. Our primary exposure to changes in foreign currency rates results from intercompany loans made between affiliates to minimize the need for borrowings from third parties. Additionally, we enter into foreign currency forward purchase and sale contracts to mitigate our exposure to changes in exchange rates on certain intercompany and third-party trade receivables and payables. We manage counter-party credit risk by entering into derivative financial instruments with major financial institutions that can be expected to fully perform under the terms of such agreements. We do not enter into derivative financial instruments for speculative purposes.

In managing our foreign currency exposures, we identify and aggregate existing offsetting positions and then hedge residual exposures through third-party derivative contracts. The fair value of our foreign currency forward contracts was less than \$1 million at September 30, 2014 and is based on an internally developed model which incorporates observable inputs including quoted spot rates, forward exchange rates and discounted future expected cash flows utilizing market interest rates with similar quality and maturity characteristics. The following table summarizes by major currency the notional amounts for our foreign currency forward purchase and sale contracts as of September 30, 2014. All contracts in the following table mature in 2014.

		September 30, 2014 Notional Amount in Foreign Currency (Millions)
Australian dollars	—Purchase	2
British pounds	—Purchase	30
	—Sell	(3)
Canadian dollars	—Purchase	1
	—Sell	(2)
European euro	—Purchase	6
	—Sell	(3)
South African rand	—Purchase	116
Japanese yen	—Purchase	144
	—Sell	(1,038)
U.S. dollars	—Purchase	12
	—Sell	(67)
Other	—Purchase	1

Interest Rate Risk

Our financial instruments that are sensitive to market risk for changes in interest rates are primarily our debt securities. We use our revolving credit facility to finance our short-term and long-term capital requirements. We pay a current market rate of interest on these borrowings. Our long-term capital requirements have been financed with long-term debt with original maturity dates ranging from five to ten years. On September 30, 2014, we had \$778 million in long-term debt obligations that have fixed interest rates. Of that amount, \$500 million is fixed through December

2020, \$225 million is fixed through August 2018, and the remainder is fixed from 2015 through 2026. We also have \$410 million in long-term debt obligations that are subject to variable interest rates. For more detailed explanations on our debt structure and senior credit facility refer to “Liquidity and Capital Resources — Capitalization” earlier in this Management’s Discussion and Analysis.

We estimate that the fair value of our long-term debt at September 30, 2014 was about 103 percent of its book value. A one percentage point increase or decrease in interest rates would increase or decrease the annual interest expense we recognize in the income statement and the cash we pay for interest expense by about \$5 million.

Environmental Matters, Legal Proceedings and Product Warranties

Note 7 in our notes to condensed consolidated financial statements located in Part I Item 1 of this Form 10-Q is incorporated herein for reference.

Table of Contents

The company expects to incur approximately \$3 million to \$5 million in legal and related costs related to the ongoing anit-trust investigation for the next quarter.

Tenneco 401(K) Retirement Savings Plan

Effective January 1, 2012, the Tenneco Employee Stock Ownership Plan for Hourly Employees and the Tenneco Employee Stock Ownership Plan for Salaried Employees were merged into one plan called the Tenneco 401(k) Retirement Savings Plan (the “Retirement Savings Plan”). Under the plan, subject to limitations in the Internal Revenue Code, participants may elect to defer up to 75 percent of their salary through contributions to the plan, which are invested in selected mutual funds or used to buy our common stock. We match in cash 100 percent on the first three percent and 50 percent on the next two percent of employee contributions. In connection with freezing the defined benefit pension plans for nearly all U.S. based salaried and non-union hourly employees effective December 31, 2006, and the related replacement of those defined benefit plans with defined contribution plans, we are making additional contributions to the Retirement Savings Plan. We recorded expense for these contributions of approximately \$19 million and \$17 million for the nine month periods ended September 30, 2014 and 2013, respectively. Matching contributions vest immediately. Defined benefit replacement contributions fully vest on the employee’s third anniversary of employment.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

For information regarding our exposure to interest rate risk and foreign currency exchange rate risk, see the caption entitled “Derivative Financial Instruments” in “Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations,” which is incorporated herein by reference.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

An evaluation was carried out under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) and Rule 15d-15(e) under the Securities Exchange Act of 1934) as of the end of the quarter covered by this report. Based on their evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that the Company’s disclosure controls and procedures are effective to ensure that information required to be disclosed by our Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms and such information is accumulated and communicated to management as appropriate to allow timely decisions regarding required disclosures.

Changes in Internal Control Over Financial Reporting

There have been no changes in our internal control over financial reporting during the quarter ended September 30, 2014, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II

ITEM 1A.RISK FACTORS

We are exposed to certain risks and uncertainties that could have a material adverse impact on our business, financial condition and operating results. Except for the addition of the following risk factor, there have been no other material changes in the Company's risk factors from those previously disclosed in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2013.

We are subject to an investigation by antitrust regulators and developments in these investigations and related matters could have a material adverse effect on our consolidated financial position, results of operations or liquidity.

We are subject to a variety of laws and regulations that govern our business both in the United States and internationally, including antitrust laws. Violations of antitrust laws can result in significant penalties being imposed by antitrust authorities. Costs, charges and liabilities arising out of or related to these investigations and related claims can also be significant.

Antitrust authorities are investigating possible violations of antitrust laws by multiple automotive parts suppliers, including Tenneco. At this point, we cannot estimate the ultimate impact on our company from investigations into our antitrust compliance and related matters but, in light of the uncertainties and many variables involved in such investigations and potential related claims, we cannot assure you that the outcome of these and other investigations and related claims will not be material to Tenneco's consolidated financial position, results of operations or liquidity.

ITEM 2.UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(a) None.

(b) Not applicable.

(c) Purchase of equity securities by the issuer and affiliated purchasers. The following table provides information relating to our purchase of shares of our common stock in the third quarter of 2014. These purchases reflect shares withheld upon vesting of restricted stock for minimum tax withholding obligations. We intend to continue to satisfy statutory minimum tax withholding obligations in connection with the vesting of outstanding restricted stock through the withholding of shares.

In addition, in January 2014, our Board of Directors approved a share repurchase program, authorizing our company to repurchase up to 400,000 shares of the Company's outstanding common stock over a 12 month period. This repurchase program does not obligate Tenneco to make repurchases at any specific time or situation and is intended to offset dilution from shares of restricted stock and stock options issued in 2014 to employees. We did not purchase any shares through this program in the nine month period ended September 30, 2014.

Period	Total Number of Shares Purchased	Average Price Paid	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares That May Yet be Purchased Under These Plans or Programs
July 2014	3,042	\$56.32	—	400,000
August 2014	241	\$64.67	—	400,000
September 2014	—	\$—	—	400,000
Total	3,283	\$56.94	—	400,000
