ROYAL GOLD, INC.

Notes to Consolidated Financial Statements

(Unaudited)

1. OPERATIONS, SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND RECENTLY ISSUED ACCOUNTING STANDARDS

Royal Gold, Inc. (Royal Gold , the Company , we , us , or our), together with its subsidiaries, is engaged in the business of acquiring and managing precious metals royalties (or royalty interests), metal streams (or stream interests), and similar interests. Royalties are non-operating interests in mining projects that provide the right to revenue or metals produced from the project after deducting specified costs, if any. A metal stream is a purchase agreement that provides, in exchange for an upfront deposit payment, the right to purchase all or a portion of one or more metals produced from a mine, at a price determined for the life of the transaction by the purchase agreement.

Summary of Significant Accounting Policies

The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X under the Securities Exchange Act of 1934, as amended. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for annual financial statements. In the opinion of management, all adjustments which are of a normal recurring nature considered necessary for a fair presentation of our interim financial statements have been included in this Form 10-Q. Operating results for the three and six months ended December 31, 2015, are not necessarily indicative of the results that may be expected for the fiscal year ending June 30, 2016. These interim unaudited financial statements should be read in conjunction with the Company's Annual Report on Form 10-K for the fiscal year ended June 30, 2015 filed with the Securities and Exchange Commission on August 6, 2015 (Fiscal 2015 10-K).

Certain amounts in the prior period financial statements have been reclassified for comparative purposes to conform with the presentation in the current period financial statements. Reclassified amounts were not material to the financial statements.

Asset Impairment

We evaluate long-lived assets for impairment whenever events or changes in circumstances indicate that the related carrying amounts of an asset or group of assets may not be recoverable. The recoverability of the carrying value of royalty and stream interests in production and development stage mineral properties is evaluated based upon estimated future undiscounted net cash flows from each royalty and stream interest property using estimates of proven and probable reserves and other relevant information received from the operators. We evaluate the recoverability of the carrying value of royalty interests in exploration stage mineral properties in the event of significant decreases in the price of gold, silver, copper, nickel and other metals, and whenever new information regarding the mineral properties is obtained from the operator indicating that production will not likely occur or may be reduced in the future, thus potentially affecting the future recoverability of our royalty

Edgar Filing: ROYAL GOLD INC - Form 10-Q

or stream interests. Impairments in the carrying value of each property are measured and recorded to the extent that the carrying value in each property exceeds its estimated fair value, which is generally calculated using estimated future discounted cash flows.

Estimates of gold, silver, copper, nickel and other metal prices, operators' estimates of proven and probable reserves or mineralized material related to our royalty or streaming properties, and operators' estimates of operating and capital costs are subject to certain risks and uncertainties which may affect the recoverability of our investment in these royalty and stream interests in mineral properties. It is possible

Table of Contents

ROYAL GOLD, INC.

Notes to Consolidated Financial Statements

(Unaudited)

that changes could occur to these estimates, which could adversely affect the net cash flows expected to be generated from these royalty and stream interests.

Recently Issued Account Standards

In January 2016, the Financial Accounting Standards Board (FASB) issued guidance on the recognition and measurement of financial instruments. The amended guidance requires, among other things, that equity securities classified as available-for-sale to be measured at fair value with changes in fair value recognized in net income rather than other comprehensive income as required under previous guidance. The new guidance is effective for the Company's fiscal year beginning July 1, 2018. We are currently evaluating the impact this guidance will have on our consolidated financial statements.

In November 2015, the FASB issued guidance on the presentation of deferred income taxes that requires deferred tax assets and liabilities, along with related valuation allowances, to be classified as non-current on the balance sheet. As a result, each tax jurisdiction will now only have one net non-current deferred tax asset or liability. The new guidance does not change the existing requirement that prohibits offsetting deferred tax liabilities from one jurisdiction against deferred tax assets of another jurisdiction. The new guidance is effective for the Company's fiscal year beginning July 1, 2017 and will only result in a change in presentation of these deferred taxes on our consolidated balance sheets. Early adoption is permitted, and we are currently evaluating the impact of this guidance on our consolidated financial statements.

2. ACQUISITIONS

Acquisition and Amendment of Gold Stream on Wassa, Bogoso and Prestea

On July 28, 2015, RGLD Gold AG (RGLD Gold), a wholly-owned subsidiary of the Company, closed a \$130 million gold stream transaction with a wholly-owned subsidiary of Golden Star Resources Ltd. (together Golden Star). On December 30, 2015, the parties executed an amendment providing for an additional \$15 million investment (for a total investment of \$145 million) by RGLD Gold. At Golden Star's option, RGLD Gold will increase its investment by a further \$5 million (for a total investment of \$150 million) subject to satisfaction of certain conditions, including Golden Star's procurement of a minimum of \$5 million of third party investment.

Edgar Filing: ROYAL GOLD INC - Form 10-Q

Also on July 28, 2015 and separate from the stream transaction by RGLD Gold, the Company also funded a \$20 million, 4-year term loan to Golden Star and received warrants to purchase 5 million shares of Golden Star common stock, with a grant date fair value of approximately \$0.8 million. Interest under the term loan is due quarterly at a rate equal to 62.5% of the average daily gold price for the relevant quarter divided by 10,000, but not to exceed 11.5%. The warrants have a term of four years and an exercise price of \$0.27.

Pursuant to the stream transaction and subject to certain conditions, RGLD Gold will make \$145 million in advance payments to Golden Star in stages. As of December 31, 2015, RGLD Gold has advanced \$75 million, including \$20 million advanced at closing of the amendment. RGLD Gold expects to advance the balance in four quarterly payments as follows: (i) \$20 million on each of April 1, July 1 and October 1, 2016, and (ii) \$10 million on January 1, 2017; however funds will be advanced on a pro rata basis with spending on the Wassa and Prestea underground projects and subject to satisfaction of certain conditions. Golden Star will deliver to RGLD Gold 9.25% of gold produced from the Wassa, Bogoso and Prestea mines, until the earlier of (i) December 31, 2017 or (ii) the date at which the Wassa and Prestea underground projects achieve commercial production. At that point, the stream percentage will increase

Table of Contents

ROYAL GOLD, INC.

Notes to Consolidated Financial Statements

(Unaudited)

to 10.5% (or to 10.9% if the total investment increases to \$150 million) of gold produced from the Wassa, Bogoso and Prestea projects until an aggregate 240,000 ounces have been delivered (or 250,000 ounces if the total investment increases to \$150 million). Once the applicable delivery threshold is met, the stream percentage will decrease to 5.5% for the remaining life of the mines.

RGLD Gold will pay Golden Star a cash price equal to 20% of the spot price for each ounce of gold delivered at the time of delivery until the applicable delivery threshold is met, and 30% of the spot price for each ounce of gold delivered thereafter.

The Wassa, Bogoso and Prestea gold stream acquisition has been accounted for as an asset acquisition. The \$75 million paid as part of the aggregate advance payments of \$145 million, plus direct acquisition costs, has been recorded as separate components of *Royalty and stream interests, net* on our consolidated balance sheets. Accordingly, approximately \$62.5 million and \$13.7 million was allocated to production stage and exploration stage stream interest, respectively, as of December 31, 2015. Future advance payments, plus any direct acquisition costs incurred, will be recorded as a production stage or an exploration stream interest accordingly. The acquisition costs of the production stage stream interest will be depleted using the units of production method, which is estimated using aggregate proven and probable reserves for Wassa, Bogoso and Prestea, as provided by Golden Star.

The \$20 million four-year term loan and the received warrants have been recorded within *Other assets* on our consolidated balance sheets. The warrants have been classified as a financial asset instrument and are recorded at fair value at each reporting period using the Black-Scholes model. Any change in the fair value of the warrants at subsequent reporting periods will be recorded within Interest and other on our consolidated statements of operations and comprehensive income.

Acquisition of Gold and Silver Stream at Pueblo Viejo

On September 29, 2015, RGLD Gold closed its Precious Metals Purchase and Sale Agreement with Barrick Gold Corporation (Barrick) and its wholly-owned subsidiary, BGC Holdings Ltd. (BGC) for a percentage of the gold and silver production attributable to Barrick 's 60% interest in the Pueblo Viejo mine located in the Dominican Republic. Pursuant to the Precious Metals Purchase and Sale Agreement, RGLD Gold made a single advance payment of \$610 million to BGC as part of the closing. The transaction is effective as of July 1, 2015 for the gold stream and January 1, 2016 for the silver stream.

BGC will deliver gold to RGLD Gold in amounts equal to 7.50% of Barrick 's interest in the gold produced at the Pueblo Viejo mine from July 1, 2015 until 990,000 ounces of gold have been delivered, and 3.75% of Barrick 's interest in gold produced thereafter. RGLD Gold will pay BGC 30% of the spot price per ounce of gold delivered until 550,000 ounces of gold have been delivered, and 60% of the spot price per ounce delivered thereafter. RGLD Gold began receiving gold deliveries during the quarter ended December 31, 2015.

BGC will deliver silver to RGLD Gold in amounts equal to 75% of Barrick's interest in the silver produced at the Pueblo Viejo mine beginning on January 1, 2016 until 50 million ounces of silver have been delivered, and 37.50% of Barrick's interest in silver produced thereafter. RGLD Gold will pay BGC 30% of the spot price per ounce of silver delivered until 23.10 million ounces of silver have been delivered, and 60% of the spot price per ounce of silver delivered thereafter.

The Pueblo Viejo gold and silver stream acquisition has been accounted for as an asset acquisition. The advance payment of \$610 million, plus direct transaction costs, have been recorded as a production stage stream interest within *Royalty and stream interests, net* on our consolidated balance sheets. The acquisition cost of the Pueblo Viejo gold and silver stream interest will be depleted using the units of

Table of Contents

ROYAL GOLD, INC.

Notes to Consolidated Financial Statements

(Unaudited)

production method, which is estimated using aggregate proven and probable reserves, as provided by Barrick.

Acquisition of Gold and Silver Stream at Rainy River

On July 20, 2015, RGLD Gold entered into a \$175 million Purchase and Sale Agreement with New Gold, Inc. (*New Gold*), for a percentage of the gold and silver production from the Rainy River Project located in Ontario, Canada (*Rainy River*). Pursuant to the Purchase and Sale Agreement, RGLD Gold made an advance payment to New Gold, consisting of \$100 million on July 20, 2015, and will make an additional advance payment of \$75 million once capital spending at Rainy River is 60% complete (currently expected by mid-calendar 2016). Also under the Purchase and Sale Agreement, New Gold will deliver to RGLD Gold 6.50% of the gold produced at Rainy River until 230,000 gold ounces have been delivered, and 3.25% thereafter. New Gold also will deliver 60% of the silver produced at Rainy River until 3.10 million silver ounces have been delivered, and 30% thereafter. RGLD Gold will pay New Gold 25% of the spot price per ounce of gold and silver at the time of delivery.

The Rainy River gold and silver stream acquisition has been accounted for as an asset acquisition. The \$100 million paid as part of the aggregate advance payments of \$175 million, plus direct transaction costs, have been recorded as a development stage stream interest within *Royalty and stream interests, net* on our consolidated balance sheets.

Acquisition of Gold Stream at Carmen de Andacollo

On July 9, 2015, RGLD Gold entered into a Long Term Offtake Agreement (the *Andacollo Stream Agreement*) with Compañía Minera Teck Carmen de Andacollo (*CMCA*), a 90% owned subsidiary of Teck Resources Limited (*Teck*). Pursuant to the Andacollo Stream Agreement, CMCA will sell and deliver to RGLD Gold 100% of payable gold from the Carmen de Andacollo (*Andacollo*) copper-gold mine located in Chile until 900,000 ounces have been delivered, and 50% thereafter, subject to a fixed payable percentage of 89%. RGLD Gold made a \$525 million advance payment in cash to CMCA upon entry into the Andacollo Stream Agreement, and RGLD Gold will also pay CMCA 15% of the monthly average gold price for the month preceding the delivery date for all gold purchased under the Andacollo Stream Agreement.

The transaction encompasses certain of CMCA's presently owned mining concessions on the Andacollo mine, as well as any other mining concessions presently owned or acquired by CMCA or any of its affiliates within a 1.5 kilometer area of interest, and certain other mining concessions that CMCA or its affiliates may acquire. The Andacollo Stream Agreement is effective July 1, 2015, and applies to all final settlements of gold received on or after that date. Deliveries to RGLD Gold will be made monthly, and RGLD Gold began receiving gold deliveries during the quarter ended September 30, 2015.

Edgar Filing: ROYAL GOLD INC - Form 10-Q

The Company accounted for the acquisition of the stream interest at Andacollo as an asset acquisition. For US GAAP financial reporting purposes on the date of acquisition, the Company's new consolidated carrying value in its stream interest at Andacollo was approximately \$388.2 million, which included direct acquisition costs, and has been recorded as a production stage stream interest within *Royalty and stream interests, net* on our consolidated balance sheets. The Andacollo gold stream interest will be depleted using the units of production method, which is estimated using aggregate proven and probable reserves, as provided by Teck.

Table of Contents**ROYAL GOLD, INC.**

Notes to Consolidated Financial Statements

(Unaudited)

Termination of Royalty Interest at Carmen de Andacollo

On July 9, 2015, Royal Gold Chile Limitada (RG Chile), a wholly owned subsidiary of the Company, entered into a Royalty Termination Agreement with CMCA. The Royalty Termination Agreement terminated an amended Royalty Agreement originally dated January 12, 2010, which provided RG Chile with a royalty equivalent to 75% of the gold produced from the sulfide portion of the Andacollo mine until 910,000 payable ounces have been produced, and 50% of the gold produced thereafter. CMCA paid total consideration of \$345 million to RG Chile in connection with the Royalty Termination Agreement. The net carrying value of the Andacollo royalty on the date of termination was approximately \$207.5 million. The royalty termination transaction was taxable in Chile and the United States.

3. ROYALTY AND STREAM INTERESTS

The following tables summarize the Company's royalty and stream interests as of December 31, 2015 and June 30, 2015.

As of December 31, 2015 (Amounts in thousands):	Cost	Accumulated Depletion	Net

Impairment of royalty and stream interests

In accordance with our impairment accounting policy discussed in Note 1, impairments in the carrying value of each royalty or stream interest are measured and recorded to the extent that the carrying value in each royalty or stream interest exceeds its estimated fair value, which is generally calculated using estimated future discounted cash-flows. As part of the Company's regular asset impairment analysis, the Company did not record any impairment charges for the three and six months ended December 31, 2015. See Note 13 for further discussion on our Phoenix Gold streaming interest. The Company recorded impairment charges for the fiscal year ended June 30, 2015, as discussed further in the Company's Fiscal 2015 10-K.

Table of Contents**ROYAL GOLD, INC.**

Notes to Consolidated Financial Statements

(Unaudited)

4. AVAILABLE-FOR-SALE SECURITIES

The Company's available-for-sale securities as of December 31, 2015 and June 30, 2015 consist of the following:

	As of December 31, 2015 (Amounts in thousands)			
	Cost Basis	Unrealized		Fair Value
		Gain	Loss	
Non-current:				
Seabridge	\$ 9,565		(1,154)	\$ 8,411
	\$ 9,565	\$	\$ (1,154)	\$ 8,411

	As of June 30, 2015 (Amounts in thousands)			
	Cost Basis	Unrealized		Fair Value
		Gain	Loss	
Non-current:				
Seabridge	\$ 9,565		(3,292)	\$ 6,273
	\$ 9,565	\$	\$ (3,292)	\$ 6,273

Our only available-for-sale security is the investment in Seabridge Gold, Inc. (Seabridge) common stock, acquired in June 2011. The Company's policy for determining whether declines in fair value of available-for-sale securities are other than temporary includes a quarterly analysis of the investments and a review by management of all investments for which the cost exceeds the fair value. Any temporary declines in fair value are recorded as a charge to other comprehensive income. If such impairment is determined by the Company to be other than temporary, the investment's cost basis is written down to fair value and recorded in net income during the period the Company determines such impairment to be other than temporary. Based on the Company's quarterly analysis of its investments and our ability and intent to hold these investments for a reasonable period of time, there were no write downs on our available-for-sale securities during the three and six months ended December 31, 2015. The Company will continue to evaluate its investment in Seabridge common stock considering additional facts and circumstances as they arise, including, but not limited to, the progress of development of Seabridge's KSM project.

5. DEBT

The Company's non-current debt as of December 31, 2015 and June 30, 2015 consists of the following:

Edgar Filing: ROYAL GOLD INC - Form 10-Q

	As of December 31, 2015 Non-current	As of June 30, 2015 Non-current
	(Amounts in thousands)	
Convertible notes due 2019, net	\$ 327,494	\$ 322,110
Revolving credit facility	350,000	
Total debt	\$ 677,494	\$ 322,110

Table of Contents**ROYAL GOLD, INC.**

Notes to Consolidated Financial Statements

(Unaudited)

Convertible Senior Notes Due 2019

In June 2012, the Company completed an offering of \$370 million aggregate principal amount of 2.875% convertible senior notes due 2019 (2019 Notes). The 2019 Notes bear interest at the rate of 2.875% per annum, and the Company is required to make semi-annual interest payments on the outstanding principal balance of the 2019 Notes on June 15 and December 15 of each year, beginning December 15, 2012. The 2019 Notes mature on June 15, 2019. Interest expense recognized on the 2019 Notes for the three and six months ended December 31, 2015, was \$5.7 million and \$11.3 million, respectively, compared to \$5.5 million and \$10.9 million, respectively, for the three and six months ended December 31, 2014, and included the contractual coupon interest, the accretion of the debt discount and amortization of the debt issuance costs.

Revolving credit facility

The Company maintains a \$650 million revolving credit facility. As of December 31, 2015, the Company had \$350.0 million outstanding and \$300.0 million available under the revolving credit facility. Borrowings under the revolving credit facility bear interest at a floating rate of LIBOR plus a margin of 1.25% to 3.00%, based on Royal Gold's defined leverage ratio. As of December 31, 2015, the interest rate on borrowings under the revolving credit facility was LIBOR plus 2.25% for an all-in rate of 2.82%. Royal Gold may repay borrowings under the revolving credit facility at any time without premium or penalty.

As discussed in Note 6 to the notes to consolidated financial statements in the Company's Fiscal 2015 10-K, the Company has financial covenants associated with its revolving credit facility. At December 31, 2015, the Company was in compliance with each financial covenant.

6. REVENUE

Revenue is comprised of the following:

	For The Three Months Ended		For The Six Months Ended	
	December 31, 2015	December 31, 2014	December 31, 2015	December 31, 2014
	(Amounts in thousands)		(Amounts in thousands)	
Stream interests	\$ 67,312	\$ 17,318	\$ 105,168	\$ 36,975
Royalty interests	30,806	43,986	67,005	93,355

Edgar Filing: ROYAL GOLD INC - Form 10-Q

(Unaudited)

7. STOCK-BASED COMPENSATION

The Company recognized stock-based compensation expense as follows:

	For The Three Months Ended		For The Six Months Ended	
	December 31, 2015	December 31, 2014	December 31, 2015	December 31, 2014
	(Amounts in thousands)		(Amounts in thousands)	
Stock options	\$ 115	\$ 106	\$ 224	\$ 219
Stock appreciation rights	424	338	816	693
Restricted stock	774	157	2,144	1,327
Performance stock	(91)	(226)	2,265	585
Total stock-based compensation expense	\$ 1,222	\$ 375	\$ 5,449	\$ 2,824

Stock-based compensation expense is included within general and administrative in the consolidated statements of operations and comprehensive income.

During the three and six months ended December 31, 2015 and 2014, the Company granted the following stock-based compensation awards:

	For The Three Months Ended		For The Six Months Ended	
	December 31, 2015	December 31, 2014	December 31, 2015	December 31, 2014
	(Number of shares)		(Number of shares)	
Stock options	1,125		25,437	19,760
Stock appreciation rights			97,817	87,890
Restricted stock	1,125		73,187	55,589
Performance stock	1,125		48,422	46,800
Total stock-based compensation expense	3,375		244,863	210,039

As of December 31, 2015, unrecognized compensation expense (expressed in thousands below) and weighted-average vesting period for each of our stock-based compensation awards was as follows:

	Unrecognized compensation expense	Weighted- average vesting period (years)
Stock options	\$ 735	2.1
Stock appreciation rights	2,707	2.0
Restricted stock	6,817	3.3
Performance stock	4,014	1.6

8. EARNINGS PER SHARE (EPS)

Basic earnings (loss) per common share were computed using the weighted average number of shares of common stock outstanding during the period, considering the effect of participating securities. Unvested stock-based compensation awards that contain non-forfeitable rights to dividends or dividend equivalents

Table of Contents**ROYAL GOLD, INC.**

Notes to Consolidated Financial Statements

(Unaudited)

are considered participating securities and are included in the computation of earnings per share pursuant to the two-class method. The Company's unvested restricted stock awards contain non-forfeitable dividend rights and participate equally with common stock with respect to dividends issued or declared. The Company's unexercised stock options, unexercised SSARs and unvested performance stock do not contain rights to dividends. Under the two-class method, the earnings (loss) used to determine basic earnings (loss) per common share are reduced by an amount allocated to participating securities. Use of the two-class method has an immaterial impact on the calculation of basic and diluted earnings (loss) per common share.

The following tables summarize the effects of dilutive securities on diluted EPS for the period:

	For The Three Months Ended		For The Six Months Ended	
	December 31, 2015	December 31, 2014	December 31, 2015	December 31, 2014
	(in thousands, except per share data)		(in thousands, except per share data)	
Net income (loss) available to Royal Gold common stockholders	\$ 15,114	\$ (6,548)	\$ (29,933)	\$ 12,134
Weighted-average shares for basic EPS	65,073,678	65,002,307	65,061,059	64,982,595
Effect of other dilutive securities	48,066			139,590
Weighted-average shares for diluted EPS	65,121,744	65,002,307	65,061,059	65,122,185
Basic earnings (loss) per share	\$ 0.23	\$ (0.10)	\$ (0.46)	\$ 0.19
Diluted earnings (loss) per share	\$ 0.23	\$ (0.10)	\$ (0.46)	\$ 0.19

The calculation of weighted average shares includes all of our outstanding common stock. The Company intends to settle the principal amount of the 2019 Notes in cash. As a result, there will be no impact to diluted earnings per share unless the share price of the Company's common stock exceeds the conversion price of \$105.31.

9. INCOME TAXES

	For The Three Months Ended		For The Six Months Ended	
	December 31, 2015	December 31, 2014	December 31, 2015	December 31, 2014
	(Amounts in thousands, except rate)		(Amounts in thousands, except rate)	
Income tax (expense) benefit	\$ (4,740)	\$ 1,827	\$ (63,917)	\$ (2,131)
Effective tax rate	25.4%	22.4%	194.3%	14.5%

Edgar Filing: ROYAL GOLD INC - Form 10-Q

The higher effective tax rate for the three months ended December 31, 2015 was primarily related to higher discrete period charges as compared to the three months ended December 31, 2014. The increase in the effective tax rate for the six months ended December 31, 2015 is primarily related to the discrete tax impacts attributable to the Company's Andacollo transactions (Note 2) and the liquidation of our Chilean subsidiary.

As of December 31, 2015 and June 30, 2015, the Company had \$15.9 million and \$15.1 million of total gross unrecognized tax benefits, respectively. If recognized, these unrecognized tax benefits would positively impact the Company's effective income tax rate.

The Company's continuing practice is to recognize potential interest and/or penalties related to unrecognized tax benefits as part of its income tax expense. At December 31, 2015 and June 30, 2015,

Table of Contents**ROYAL GOLD, INC.**

Notes to Consolidated Financial Statements

(Unaudited)

the amount of accrued income-tax-related interest and penalties was \$5.3 million and \$4.6 million, respectively.

10. SEGMENT INFORMATION

The Company manages its business under two reportable segments, consisting of the acquisition and management of royalty interests and the acquisition and management of stream interests. Royal Gold's long-lived assets (royalty and stream interests, net) are geographically distributed as shown in the following table:

	As of December 31, 2015			Total royalty and stream interests, net
	Royalty interest	Stream interest

11. FAIR VALUE MEASUREMENTS

FASB Accounting Standards Codification (ASC) 820, *Fair Value Measurements and Disclosures* (ASC 820) establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3

measurements). The three levels of the fair value hierarchy under ASC 820 are described below:

Level 1: Quoted prices for identical instruments in active markets;

Table of Contents**ROYAL GOLD, INC.**

Notes to Consolidated Financial Statements

(Unaudited)

Level 2: Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets; and

Level 3: Prices or valuation techniques requiring inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

The following table sets forth the Company's financial assets measured at fair value on a recurring basis (at least annually) by level within the fair value hierarchy.

	Carrying Amount	Total	At December 31, 2015		
			Fair Value		
			Level 1	Level 2	Level 3
Assets (In thousands):					
Marketable equity securities(1)	\$ 8,411	\$ 8,411	\$ 8,411	\$	\$
Warrants(2)	\$ 414	\$ 414	\$	\$ 414	\$
Total assets		\$ 8,825	\$ 8,411	\$ 414	\$
Liabilities (In thousands):					
Debt(3)	\$ 404,494	\$ 335,313	\$ 335,313	\$	\$
Total liabilities		\$ 335,313	\$ 335,313	\$	\$

-
- (1) Included in *Available for sale securities* on the Company's consolidated balance sheets.
- (2) Included in *Other assets* on the Company's consolidated balance sheets.
- (3) Included in the carrying amount is the equity component of our 2019 Notes in the amount of \$77 million, which is included within *Additional paid-in capital* on the Company's consolidated balance sheets.

The Company's marketable equity securities classified within Level 1 of the fair value hierarchy are valued using quoted market prices in active markets. The fair value of the Level 1 marketable equity securities is calculated as the quoted market price of the marketable equity security multiplied by the quantity of shares held by the Company. The Company's debt classified within Level 1 of the fair value hierarchy is valued using quoted prices in an active market. The carrying value of the Company's revolving credit facility (Note 5) approximates fair value as of December 31, 2015. During the six months ended December 31, 2015, the warrants issued by Golden Star (Note 2) were added to the Level 2

fair value hierarchy.

As of December 31, 2015, the Company also had assets that, under certain conditions, are subject to measurement at fair value on a non-recurring basis like those associated with royalty and stream interests, intangible assets and other long-lived assets. For these assets, measurement at fair value in periods subsequent to their initial recognition is applicable if any of these assets are determined to be impaired. If recognition of these assets at their fair value becomes necessary, such measurements will be determined utilizing Level 3 inputs.

12. COMMITMENTS AND CONTINGENCIES

Rainy River Gold and Silver Stream Acquisition

As of December 31, 2015, the Company has a remaining commitment, subject to certain conditions, of \$75.0 million as part of its Rainy River gold and silver stream acquisition in August 2015 (Note 2).

Table of Contents

ROYAL GOLD, INC.

Notes to Consolidated Financial Statements

(Unaudited)

Wassa, Bogoso and Prestea Gold Stream Acquisition and Amendment

As of December 31, 2015, the Company has a remaining commitment, subject to certain conditions, of \$70.0 million as part of its Wassa, Bogoso and Prestea gold stream acquisition (July 2015) and amendment (December 2015) as discussed further in Note 2.

Ilovica Gold Stream Acquisition

As of December 31, 2015, the Company has a remaining commitment, subject to certain conditions, of \$163.75 million as part of its Ilovica gold stream acquisition in October 2014.

Voisey's Bay

The Company indirectly owns a royalty on the Voisey's Bay mine in Newfoundland and Labrador owned by Vale Newfoundland & Labrador Limited (VNL). The royalty is directly owned by the Labrador Nickel Royalty Limited Partnership (LNRLP), in which the Company's wholly-owned indirect subsidiary, Canadian Minerals Partnership, is the general partner and 89.99% owner. The remaining interests in LNRLP are owned by Altius Investments Ltd. (10%), a company unrelated to Royal Gold, and the Company's wholly-owned indirect subsidiary, Voisey's Bay Holding Corporation (0.01%).

On December 5, 2014, LNRLP filed amendments to its October 16, 2009 Statement of Claim in the Supreme Court of Newfoundland and Labrador Trial Division against Vale Inco Limited, now known as Vale Canada Limited (Vale Canada) and its wholly-owned subsidiaries, Vale Inco Atlantic Sales Limited and VNL, related to calculation of the NSR on the sale of concentrates, including nickel concentrates, from the Voisey's Bay mine. LNRLP asserts that the defendants have incorrectly calculated the NSR since production at Voisey's Bay began in late 2005, have indicated an intention to calculate the NSR in a manner LNRLP believes will violate the royalty agreement as Voisey's Bay concentrates are processed at Vale's new Long Harbour processing facility, and have breached their contractual duties of good faith and honest performance in several ways. LNRLP requests an order in respect of the correct calculation of future payments, and unspecified damages for non-payment and underpayment of past royalties to the date of the claim, together with additional damages until the date of trial, interest, costs and other damages. The litigation is in the discovery phase.

13. SUBSEQUENT EVENT

Phoenix Gold

RGLD Gold owns the right to purchase 6.30% of any gold produced from the Phoenix Gold Project until 135,000 ounces have been delivered, and 3.15% thereafter. The Phoenix Gold Project is located in Red Lake, Ontario, Canada, and operated by Rubicon Minerals Corporation (Rubicon). The Company's carrying value for its stream interest at Phoenix Gold is \$75.8 million as of December 31, 2015.

On January 11, 2016, Rubicon provided an updated geologic model and mineralized material statement for the Phoenix Gold Project, which included a significant reduction in mineralized material compared to previous statements provided by Rubicon. Rubicon also announced that they are evaluating strategic alternatives, including merger and divestiture opportunities either at the corporate or asset level, obtaining new financing or capital restructurings.

A significant reduction in mineralized material, along with recent decreases in the long-term metal price assumptions used by the industry, are indicators of potential impairment. The Company is currently

Table of Contents

ROYAL GOLD, INC.

Notes to Consolidated Financial Statements

(Unaudited)

evaluating the updated geologic model and mineralized material statement in an effort to properly assess the recoverability of our carrying value. The Company's technical evaluation will include a detailed review of the geological model and mineralized material statement by internal and external qualified personnel. Other factors under consideration by the Company as part of its recoverability analysis include any developments with respect to Rubicon's strategic alternatives, which may have implications on RGLD Gold's \$75 million security interest on the assets of the Phoenix Gold Project.

The Company anticipates that it will conclude its technical evaluation of the revised geologic model and mineralized material statement prior to the release of our financial results for the period ended March 31, 2016. Upon completion of our evaluation and upon consideration of any strategic developments with Rubicon or the Phoenix Gold Project, the Company could determine that an impairment in the near future is necessary.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

General

This Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) is intended to provide information to assist you in better understanding and evaluating our financial condition and results of operations. Royal Gold, Inc. (Royal Gold , the Company , we , us , or our), recommends that you read this MD&A in conjunction with our consolidated financial statements included in Item 1 of this Quarterly Report on Form 10-Q, as well as our Annual Report on Form 10-K for the fiscal year ended June 30, 2015 filed with the Securities and Exchange Commission (the SEC) on August 6, 2015 (the Fiscal 2015 10-K).

This MD&A contains forward-looking information. You should review our important note about forward-looking statements following this MD&A.

We refer to GSR, NSR, metal stream and other types of royalty or similar interests throughout this MD&A. These terms are defined in our Fiscal 2015 10-K.

Overview

Royal Gold, together with its subsidiaries, is engaged in the business of acquiring and managing precious metals royalties, metal streams, and similar interests. Royalties are non-operating interests in mining projects that provide the right to revenue or metals produced from the project after deducting specified costs, if any. A metal stream is a purchase agreement that provides, in exchange for an upfront deposit payment, the right to purchase all or a portion of one or more metals produced from a mine, at a price determined for the life of the transaction by the purchase agreement. We seek to acquire existing royalty and stream interests or to finance projects that are in production or in the development stage in exchange for royalty or stream interests. In the ordinary course of business, we engage in a continual review of opportunities to acquire existing royalty and stream interests, establishing new streams on operating mines, to create new royalty and stream interests through the financing of mine development or exploration, or to acquire companies that hold royalty and stream interests. We currently, and generally at any time, have acquisition opportunities in various stages of active review, including, for example, our engagement of consultants and advisors to analyze particular opportunities, analysis of technical, financial and other confidential information, submission of indications of interest, participation in preliminary discussions and negotiations and involvement as a bidder in competitive processes.

As of December 31, 2015, the Company owned stream interests on four producing properties and three development stage properties and owned royalty interests on 34 producing properties, 21 development stage properties and 135 exploration stage properties, of which the Company considers 49 to be evaluation stage projects. The Company uses evaluation stage to describe exploration stage properties that contain mineralized material and on which operators are engaged in the search for reserves. We do not conduct mining operations on the properties in which we hold royalty and streaming interests, and except for our interest in Peak Gold, LLC joint venture, we are not required to contribute to capital costs, exploration costs, environmental costs or other operating costs on those properties. During the three months ended December 31, 2015, we focused on the management of our existing royalty and stream interests and the acquisition of additional royalty and stream interests.

Our financial results are primarily tied to the price of gold and, to a lesser extent, the price of silver, copper and nickel, together with the amounts of production from our producing stage royalty and stream interests. The price of gold, silver, copper, nickel and other metals has fluctuated widely in recent years and most recently has experienced declines from highs experienced in the first half of our fiscal year 2013. The marketability and the price of metals are influenced by numerous factors beyond the control of

Table of Contents

the Company and significant declines in the price of gold, silver, copper or nickel could have a material and adverse effect on the Company's results of operations and financial condition.

For the three and six months ended December 31, 2015 and 2014, gold, silver, copper and nickel price averages and percentage of revenue by metal were as follows:

Metal	Three Months Ended				Six Months Ended			
	December 31, 2015		December 31, 2014		December 31, 2015		December 31, 2014	
	Average Price	Percentage of Revenue	Average Price	Percentage of Revenue	Average Price	Percentage of Revenue	Average Price	Percentage of Revenue
Gold (\$/ounce)	\$ 1,106	90%	\$ 1,201	78%	\$ 1,116	86%	\$ 1,243	77%
Silver (\$/ounce)	\$ 14.77	2%	\$ 16.50	3%	\$ 14.84	2%	\$ 18.14	4%
Copper (\$/pound)	\$ 2.22	3%	\$ 3.00	5%	\$ 2.30	4%	\$ 3.09	8%
Nickel (\$/pound)	\$ 4.28	2%	\$ 7.17	10%	\$ 4.54	4%	\$ 7.80	7%
Other	N/A	3%	N/A	4%	N/A	4%	N/A	4%

Recent Business Developments*Acquisition and Amendment of Gold Stream on Wassa, Bogoso and Prestea*

On July 28, 2015, RGLD Gold AG (RGLD Gold), a wholly-owned subsidiary of the Company, closed a \$130 million gold stream transaction with a wholly-owned subsidiary of Golden Star Resources Ltd. (together Golden Star). On December 30, 2015, the parties executed an amendment providing for an additional \$15 million investment (for a total investment of \$145 million) by RGLD Gold. At Golden Star's option, RGLD Gold will increase its investment by a further \$5 million (for a total investment of \$150 million) subject to satisfaction of certain conditions, including Golden Star's procurement of a minimum of \$5 million of third party investment.

Funds will be used for ongoing development of Golden Star's Wassa, Bogoso and Prestea mines in Ghana, including underground development at Wassa and Prestea. As of December 31, 2015, RGLD Gold has advanced \$75 million, including \$20 million advanced at closing of the amendment. RGLD Gold expects to advance the balance in four quarterly payments as follows: (i) \$20 million on each of April 1, July 1 and October 1, 2016, and (ii) \$10 million on January 1, 2017; however funds will be advanced on a pro rata basis with spending on the Wassa and Prestea underground projects and subject to satisfaction of certain conditions.

In return, Golden Star will deliver to RGLD Gold 9.25% of gold produced from the Wassa, Bogoso and Prestea mines, until the earlier of (i) December 31, 2017 or (ii) the date at which the Wassa and Prestea underground projects achieve commercial production. At that point, the stream percentage will increase to 10.5% (or to 10.9% if the total investment increases to \$150 million) of gold produced from the Wassa, Bogoso and Prestea mines until an aggregate 240,000 ounces have been delivered (or 250,000 ounces if the total investment increases to \$150 million). Once the applicable delivery threshold is met, the stream percentage will decrease to 5.5% for the remaining term of the transaction.

RGLD Gold will pay Golden Star a cash price equal to 20% of the spot price for each ounce of gold delivered at the time of delivery until the applicable delivery threshold is met, and 30% of the spot price for each ounce of gold delivered thereafter.

RGLD Gold sold approximately 12,000 ounces of gold delivered from Golden Star during the six months ended December 31, 2015, and has approximately 700 ounces of gold remaining in inventory as of such date.

The Wassa mine is located approximately 90 miles west of Accra and has operated continuously since 2005. Golden Star forecasts calendar 2016 production of 100,000 to 110,000 ounces of gold from the single Wassa open pit. Open pit proven and probable reserves are 812,000 ounces at 1.42 grams per

Table of Contents

tonne, as of December 31, 2014. RGLD Gold's investment will fund development of the Wassa underground deposit, which has 746,000 ounces of proven and probable gold reserves at 4.27 grams per tonne. Once the underground deposit is in production, Golden Star expects average annual gold production of 150,000 ounces of gold over the life of mine from the combined open pit and underground at Wassa.

Bogoso and Prestea are located approximately 125 miles west of Accra and have produced over 9 million ounces of gold from both open pit and underground sources over the last 100 years. Golden Star forecasts calendar 2016 production of 60,000 to 70,000 ounces of gold from the open pit operations. Underground development at Prestea is already well advanced and Golden Star plans to modify the Bogoso plant to process Prestea material. Golden Star expects to spend \$63 million of capital investment on Prestea, which includes hoist and shaft upgrades, electrical infrastructure, ventilation and a process plant upgrade. Once in full production, Golden Star expects annual production of approximately 75,000 ounces from Prestea, with estimated life of mine production of 450,000 ounces. Golden Star forecasts underground gold production from the Wassa and Prestea mines by mid-calendar 2016 and early calendar 2017, respectively.

Also on July 28, 2015 and separate from the stream transaction by RGLD Gold, the Company funded a \$20 million, 4-year term loan to a wholly-owned subsidiary of Golden Star and received warrants to purchase 5 million shares of Golden Star common stock. Interest under the term loan is due quarterly at a rate equal to 62.5% of the average daily gold price for the relevant quarter divided by 10,000, but not to exceed 11.5%. The warrants have a term of four years and an exercise price of \$0.27.

Acquisition of Gold and Silver Stream at Pueblo Viejo

On September 29, 2015, RGLD Gold entered into a Precious Metals Purchase and Sale Agreement with Barrick Gold Corporation (Barrick) and its wholly-owned subsidiary, BGC Holdings Ltd. (BGC) for a percentage of the gold and silver production attributable to Barrick's 60% interest in the Pueblo Viejo mine located in the Dominican Republic. Pursuant to the Precious Metals Purchase and Sale Agreement, RGLD Gold made a single advance payment of \$610 million to BGC as part of the closing. The transaction is effective as of July 1, 2015 for the gold stream and January 1, 2016 for the silver stream.

BGC will deliver gold to RGLD Gold in amounts equal to 7.50% of Barrick's interest in the gold produced at the Pueblo Viejo mine from July 1, 2015 until 990,000 ounces of gold have been delivered, and 3.75% of Barrick's interest in gold produced thereafter. RGLD Gold will pay BGC 30% of the spot price per ounce of gold delivered until 550,000 ounces of gold have been delivered, and 60% of the spot price per ounce delivered thereafter. RGLD Gold received its first delivery of approximately 20,600 ounces of gold from Pueblo Viejo on December 15, 2015, for gold production during the period July 1, 2015 to November 30, 2015.

BGC will deliver silver to RGLD Gold in amounts equal to 75% of Barrick's interest in the silver produced at the Pueblo Viejo mine beginning on January 1, 2016 until 50.0 million ounces of silver have been delivered, and 37.50% of Barrick's interest in silver produced thereafter. RGLD Gold will pay BGC 30% of the spot price per ounce of silver delivered until 23.10 million ounces of silver have been delivered, and 60% of the spot price per ounce of silver delivered thereafter.

The Pueblo Viejo mine is an open-pit mining operation located approximately 60 miles northwest of Santo Domingo, in the Dominican Republic, and is owned by a joint venture in which Barrick owns a 60% interest and is responsible for operations, and in which Goldcorp Inc. (Goldcorp) owns a 40% interest. The mine began production in 2013. Barrick reported preliminary calendar 2015 production, on a 60% basis

Edgar Filing: ROYAL GOLD INC - Form 10-Q

of 572,000 ounces of gold. Barrick also reported proven and probable gold reserves attributable to Barrick of 9.3 million contained ounces at 3.30 grams per tonne, and attributable proven

Table of Contents

and probable silver reserves of 58.3 million contained ounces grading 20.7 grams per tonne, in each case as of December 31, 2014.

Acquisition of Gold and Silver Stream at Rainy River

On July 20, 2015, RGLD Gold entered into a \$175 million Purchase and Sale Agreement with New Gold, Inc. (*New Gold*), for a percentage of the gold and silver production from the Rainy River Project located in Ontario, Canada (*Rainy River*). Pursuant to the Purchase and Sale Agreement, RGLD Gold made an advance payment to New Gold, consisting of \$100 million on July 20, 2015, and will make an additional payment of \$75 million once capital spending at Rainy River is 60% complete (currently expected by mid-calendar 2016). Also under the Purchase and Sale Agreement, New Gold will deliver to RGLD Gold 6.50% of the gold produced at Rainy River until 230,000 gold ounces have been delivered, and 3.25% thereafter. New Gold also will deliver 60% of the silver produced at Rainy River until 3.10 million silver ounces have been delivered, and 30% thereafter. RGLD Gold will pay New Gold 25% of the spot price per ounce of gold and silver at the time of delivery.

The Rainy River Project is located approximately 40 miles northwest of Fort Frances in western Ontario, Canada. Over its first nine years of full production, the 21,000 tonne per day, combined open pit-underground operation is scheduled to produce an average of 325,000 ounces of gold per year. Construction was initiated in calendar 2015 and at the end of the third quarter of calendar 2015 detailed engineering was complete, site earthworks over 50% complete and key initial mining equipment successfully commissioned and 19% of the total development capital estimate of \$877 million has been spent. Rainy River has an estimated fourteen year mine life based on current reserves and is projected by New Gold to start-up in mid-calendar 2017.

Acquisition of Gold Stream at Carmen de Andacollo

On July 9, 2015, RGLD Gold entered into a Long Term Offtake Agreement (the *Andacollo Stream Agreement*) with Compañía Minera Teck Carmen de Andacollo (*CMCA*), a 90% owned subsidiary of Teck Resources Limited (*Teck*). Pursuant to the *Andacollo Stream Agreement*, CMCA will sell and deliver to RGLD Gold 100% of payable gold from the Carmen de Andacollo (*Andacollo*) copper-gold mine until 900,000 ounces have been delivered, and 50% thereafter, subject to a fixed payable percentage of 89%. RGLD Gold made a \$525 million advance payment in cash to CMCA upon entry into the *Andacollo Stream Agreement*, and RGLD Gold will also pay CMCA 15% of the monthly average gold price for the month preceding the delivery date for all gold purchased under the *Andacollo Stream Agreement*.

The transaction encompasses certain of CMCA's presently owned mining concessions on the Andacollo mine, as well as any other mining concessions presently owned or acquired by CMCA or any of its affiliates within a 1.5 kilometer area of interest, and certain other mining concessions that CMCA or its affiliates may acquire. The *Andacollo Stream Agreement* is effective as of July 1, 2015, and applies to all final settlements of gold received on or after that date. RGLD Gold sold approximately 14,700 ounces of gold delivered from CMCA during the six months ended December 31, 2015, and has approximately 5,200 ounces of gold remaining in inventory as of such date.

Termination of Royalty Interest at Carmen de Andacollo

Edgar Filing: ROYAL GOLD INC - Form 10-Q

On July 9, 2015, Royal Gold Chile Limitada (RG Chile), a wholly owned subsidiary of the Company, entered into a Royalty Termination Agreement with CMCA. The Royalty Termination Agreement terminated an amended Royalty Agreement originally dated January 12, 2010, which provided RG Chile with a royalty equivalent to 75% of the gold produced from the sulfide portion of the Andacollo mine until 910,000 payable ounces have been produced, and 50% of the gold produced thereafter. CMCA paid

Table of Contents

total consideration of \$345 million to RG Chile in connection with the Royalty Termination Agreement. The royalty termination transaction was taxable in Chile and the United States.

Principal Royalty and Stream Interests

The Company considers both historical and future potential revenues in determining which royalty and stream interests in our portfolio are principal to our business. Estimated future potential revenues from both producing and development properties are based on a number of factors, including reserves subject to our royalty and stream interests, production estimates, feasibility studies, metal price assumptions, mine life, legal status and other factors and assumptions, any of which could change and could cause the Company to conclude that one or more of such royalty and stream interests are no longer principal to our business. Our principal producing and development royalty and stream interests are listed alphabetically in the following tables.

Please refer to our Fiscal 2015 10-K for further discussion of our principal producing and development royalty and stream interests.

Principal Producing Properties

Mine	Location	Operator	Royalty or stream interests (Gold unless otherwise stated)
Andacollo	Region IV, Chile	Compañía Minera Teck Carmen de Andacollo	Gold stream - 100% of gold produced (until 900,000 ounces delivered; 50% thereafter)
Cortez	Nevada, USA	Barrick	GSR1: 0.40% to 5.0% sliding-scale GSR GSR2: 0.40% to 5.0% sliding-scale GSR GSR3: 0.71% GSR NVR1: 1.014% NVR; 0.618% NVR (Crossroads)
Holt	Ontario, Canada	Kirkland Lake Gold, Inc. (Kirkland Lake)	0.00013 x quarterly average gold price NSR
Mt. Milligan	British Columbia, Canada	Thompson Creek Metals Company Inc. (Thompson Creek)	Gold stream - 52.25% of payable gold
Peñasquito	Zacatecas, Mexico	Goldcorp	2.0% NSR (gold, silver, lead, zinc)
Pueblo Viejo(1)	Dominican Republic	Barrick (60%)	Gold stream - 7.5% of gold produced (until 990,000 ounces delivered; 3.75% thereafter) Silver stream - 75% of silver produced (until 50.0 million ounces delivered; 37.5% thereafter)
Voisey s Bay	Newfoundland and Labrador, Canada	Vale Newfoundland & Labrador Limited (Vale)	2.7% NSR (nickel, copper, cobalt)
Wassa/Bogoso/Prestea(1)	Western Region of Ghana	Golden Star	Gold stream - 8.5% of gold produced for the six months ended December 31, 2015; 9.25% of the gold produced effective January 1, 2016.

(1) The gold and silver stream at Pueblo Viejo and the gold stream at Wassa/Bogoso/Prestea were acquired during the three months ended September 30, 2015. Please refer to Recent Business Developments above for further

discussion on these acquisitions.

Table of Contents*Principal Development Properties*

Mine	Location	Operator	Royalty or stream interests (Gold unless otherwise stated)
Rainy River(1)	Ontario, Canada	New Gold	Gold stream - 6.5% of gold produced (until 230,000 ounces delivered; 3.25% thereafter) Silver stream - 60% of silver produced (until 3.1 million ounces delivered; 30% thereafter)
Pascua-Lama(1)	Region III, Chile	Barrick	0.78% to 5.45% sliding-scale NSR 1.09% fixed rate royalty (copper)

(1) The gold and silver stream at Rainy River and the additional royalty interest at Pascua-Lama were acquired during the three months ended September 30, 2015. Please refer to Recent Business Developments above for further discussion on these acquisitions.

Operators Production Estimates by Royalty and Stream Interest for Calendar 2015

We received annual production estimates from many of the operators of our producing mines during the first calendar quarter of 2015. The following table shows such production estimates for our principal producing properties for calendar 2015 as well as the actual production reported to us by the various operators through December 31, 2015. The estimates and production reports are prepared by the operators of the mining properties. We do not participate in the preparation or calculation of the operators estimates or production reports and have not independently assessed or verified the accuracy of such information. Please refer to Property Developments below within this MD&A for further discussion on our principal producing or development properties.

Operators Estimated and Actual Production by Royalty and Stream Interest for Calendar 2015

Principal Producing Properties

For the period January 1, 2015 through December 31, 2015

Royalty/Stream	Calendar 2015 Operator s Production Estimate(1),(2)			Calendar 2015 Operator s Production Actual(3),(4)		
	Gold (oz.)	Silver (oz.)	Base Metals (lbs.)	Gold (oz.)	Silver (oz.)	Base Metals (lbs.)
Andacollo(5)	52,200			47,600		
Cortez GSR1	104,100			113,700		
Cortez GSR2	27,900			35,000		
Cortez GSR3	132,000			148,700		
Cortez NVR1	97,200			110,100		
Holt	64,000			63,000		

Edgar Filing: ROYAL GOLD INC - Form 10-Q

Mount Milligan(6)	200,000-220,000		218,100	
Penasquito(7),(8)	700,000-750,000	24-26 million	690,400	19.5 million
Lead(7),(8)		175-185 million		133.4 million
Zinc(7),(8)		400-415 million		299.5 million
Pueblo Viejo(9)	625,000-675,000		572,000	
Wassa/Bogoso/Prestea(10)	205,000-215,000		222,400	

(1) Production estimates received from our operators are for calendar 2015. There can be no assurance that production estimates received from our operators will be achieved. Please refer to our cautionary language regarding forward-looking statements following this MD&A, as well as the Risk Factors identified in Part I, Item 1A, of our Fiscal 2015 10-K for information regarding factors that could affect actual results.

(2) Vale did not release public production guidance for calendar 2015, thus estimated and actual production information for Voisey's Bay is not shown in the table.

(3) Actual production figures shown are for the period January 1, 2015 through December 31, 2015, unless otherwise noted.

Table of Contents

- (4) Actual production figures for Andacollo and Cortez are based on information provided to us by the operators, and actual production figures for Holt, Mount Milligan, Peñasquito (gold) and Wassa/Bogoso/Prestea are the operators' publicly reported figures.
- (5) The estimated and actual production figures shown for Andacollo are contained gold in concentrate.
- (6) The estimated and actual production figures shown for Mount Milligan are payable gold in concentrate.
- (7) The estimated gold and silver production figures reflect payable gold and silver in concentrate and doré, while the estimated lead and zinc production figures reflect payable metal in concentrate.
- (8) The actual gold production figure for gold reflects payable gold in concentrate and doré as reported by the operator. The actual production for silver, lead and zinc were not publicly available. The Company's royalty interest at Peñasquito includes gold, silver, lead and zinc. Actual production shown is for the nine months ended September 30, 2015. Full year 2015 information was not available from the operator as of the date of this report.
- (9) The gold and silver stream at Pueblo Viejo was acquired during the quarter ended September 30, 2015 and the first gold delivery is expected in December 2015 for the period July 1 - November 30, 2015. Please refer to Recent Business Developments above for further information. The estimated and actual production figures shown are payable gold in doré and represent Barrick's 60% interest in Pueblo Viejo.
- (10) The gold stream at Wassa/Bogoso/Prestea was acquired during the quarter ended September 30, 2015. Please refer to Recent Business Developments above for further information. The estimated production figure shown is payable gold in doré.

Property Developments

The following information is provided by the operators of the property, either to Royal Gold or in various documents made publicly available.

Andacollo

Production attributable to our interest at Andacollo decreased nearly 50% when compared to the prior year quarter. The area near Andacollo experienced an earthquake in September 2015, which resulted in some downtime at the operations and port facilities and impacted timing of sales.

Andacollo delivers gold to RGLD Gold within five business days following the end of the month in which final smelter settlement occurs. RGLD Gold typically sells gold ounces over a few weeks following physical receipt. Andacollo final settlements generally take five to six months from the bill-of-lading date. The difference in timing between Andacollo quarterly production and final smelter settlements may result in the divergence of produced ounces reported by Teck and those reported as sold by Royal Gold for future quarters.

Cortez

Production attributable to our royalty interest at Cortez decreased approximately 72% over the prior year quarter as mining continued at Cortez Hills. Barrick indicated earlier that mining during calendar 2015 would include Cortez Hills, which is not subject to our royalty interest.

Holt

Production attributable to our royalty interest at Holt increased 5% over the prior year quarter. Head grades were slightly higher than expected but lower than the previous quarter due to stope sequencing. The average throughput for the quarter was similar to the previous quarters. Mill recoveries were at their expected level of 94%. The development of the lower Zone 6 on the 925m Level started during the current quarter and will continue in calendar 2016. St Andrew Goldfields (St Andrew) expects Zone 6 to provide a new mining horizon later in calendar 2016.

On January 26, 2016, Kirkland Lake and St Andrew announced the completion of their previously announced plan of arrangement, whereby Kirkland Lake has acquired all of the outstanding common shares of St Andrew. Upon closing of the arrangement, St Andrew became a wholly-owned subsidiary of Kirkland Lake.

Table of Contents

Mount Milligan

Thompson Creek reported production of 58,300 ounces of payable gold during the quarter, an increase of 42% over the prior year quarter. Mill throughput averaged 48,176 tonnes per day for the quarter, an increase of 10% over the prior year quarter. Thompson Creek surpassed the mill design capacity of 60,000 tonnes per day during the last week of December when mill throughput averaged 61,212 tonnes with highest daily throughput in December being 64,478 tonnes. Thompson Creek continues to optimize the operation and expects to make a decision on construction of the permanent secondary crusher during the March 2016 quarter.

Gold grades averaged 0.63 grams per tonne, an increase of 17% over the prior year quarter and gold recoveries averaged 67.3% for the quarter, an increase of 11% over the prior year quarter.

For calendar 2016, Thompson Creek forecasts annual gold payable production of 240,000 to 270,000 ounces, an increase of approximately 10% to 24% over calendar year 2015 production of approximately 218,000 ounces.

Thompson Creek announced that they have engaged Moelis & Company and BMO Capital Markets to assist them in evaluating strategic and financial alternatives, including debt refinancing and restructuring, new capital transaction and asset sales. The Company continues to monitor Thompson Creek's financial situation and is working to ensure our interests at Mount Milligan are protected.

Thompson Creek delivers gold to RGLD Gold within two business days of receipt of final smelter settlement proceeds and RGLD Gold typically sells gold ounces over a few weeks following physical receipt. Mount Milligan final settlements generally take five months from the bill-of-lading date. The difference in timing between Mount Milligan quarterly production results and final smelter settlements may result in the divergence of produced ounces reported by Thompson Creek and those reported as sold by Royal Gold for each quarter.

Peñasquito

Gold, silver, lead and zinc production attributable to our royalty interest at Peñasquito increased approximately 56%, 33%, 41% and 17%, respectively, over the prior year quarter. Goldcorp continued with the Metallurgical Enhancement Project (MEP) feasibility study, which remains on schedule to be completed in early calendar 2016.

Phoenix Gold

On January 11, 2016, Rubicon Minerals Corporation (Rubicon) provided an updated geological model and mineralized material statement for the Phoenix Gold Project that included a significant reduction in mineralized material compared to previous statements provided by Rubicon. Rubicon stated the decrease in reported mineralized material was mainly the result of new drilling information, changes in modeling approach

Edgar Filing: ROYAL GOLD INC - Form 10-Q

and restrictions to the depth of the interpreted extent of gold mineralization. Rubicon suspended activities related to their previously announced Phoenix Project Implementation Plan has retained BMO Capital Markets, TD Securities, and Stikeman Elliott LLP as advisors to assist in evaluating strategic alternatives available to Rubicon.

A significant reduction in mineralized material, along with recent decreases in the long-term metal price assumptions used by the industry, are indicators of potential impairment that required Royal Gold to consider the carrying value of this asset. Royal Gold is currently evaluating the updated geologic model and mineralized material statement in an effort to properly assess the recoverability of our carrying value. Royal Gold anticipates that it will conclude its technical evaluation of the revised geologic model and

Table of Contents

mineralized material statement prior to the release of our financial results for the period ended March 31, 2016. Upon completion of our evaluation and upon consideration of any strategic developments with Rubicon or the Phoenix Gold Project, the Company could determine that an impairment of its carrying value in the near future is necessary.

Pueblo Viejo and Pascua-Lama

On January 21, 2016, Barrick announced that it is in the process of carrying out its annual impairment review. Barrick indicated that its preliminary analysis suggests a potential asset impairment charge in the range of \$1.0-\$1.2 billion primarily related to Pascua-Lama and Pueblo Viejo. Barrick did not provide any further information on what the impairment charges were attributable to at Pueblo Viejo or Pascua-Lama. Barrick is scheduled to report final impairment results and provide a reserve and mineralized material update on February 17, 2016. Consistent with our asset impairment policy, Royal Gold will evaluate and review Barrick's updated reserve and mineral material report for Pueblo Viejo and Pascua-Lama as part of our third quarter fiscal 2016 impairment analysis.

In November 2015, Barrick announced that two of three electric motors at the Pueblo Viejo oxygen plant experienced unexpected failures and were shipped to the United States for repair. A comprehensive plan to mitigate the impact of the motor failure was implemented by Barrick in December 2015, which involved installing a number of portable compressors and bringing forward autoclave maintenance that was originally scheduled for January 2016. One of the two repaired motors has arrived in the Dominican Republic and will be installed and tested by the end of January 2016. The second motor is due to arrive on-site in mid-February 2016.

Voisey's Bay

In April 2015, we announced our intention to recognize Voisey's Bay royalty revenue on a cash basis, or in the period in which actual payment information is received from Vale, beginning with the June 2015 quarter. Production attributable to our royalty interest at Voisey's Bay for the December 2015 quarter (from Vale's production during the September 2015 quarter) was 15.2 million pounds of copper and 23.6 million pounds of nickel.

Vale reported that it will transition from processing a blend of nickel matte from its Indonesian operations and nickel concentrates from Voisey's Bay at its new Long Harbour hydrometallurgical plant, and will begin processing only Voisey's Bay concentrate at Long Harbour by the first calendar quarter of 2016. We received the first three quarterly royalty payments relating to processing Voisey's Bay nickel concentrates at Long Harbour. Vale has made clear its intention to deduct full Long Harbour operating costs, depreciation and cost of capital from actual proceeds when calculating the net smelter return royalty, which could have the effect of further reducing or eliminating royalty payments. Royal Gold strongly disagrees with Vale's position that operating costs, capital costs and cost of capital are permissible net smelter return deductions pursuant to the royalty agreement and is aggressively pursuing its legal remedies. See Note 12 to the consolidated financial statements for discussion of litigation between the Company and Vale.

Wassa and Prestea

Edgar Filing: ROYAL GOLD INC - Form 10-Q

Golden Star announced gold production of approximately 52,000 ounces during the December 2015 quarter, with approximately 31,300 ounces attributable to Wassa and approximately 20,700 ounces attributable to Prestea. For calendar 2016, Golden Star forecasts annual gold production of 180,000 to 205,000 ounces, which is a slight decrease from actual calendar year 2015 production of approximately 222,000 ounces.

Table of Contents

Golden Star reported that the Wassa Underground project made substantial progress during calendar 2015, with stope development of the upper mineralization expected to commence in the June 2016 quarter and first ore production anticipated mid-calendar 2016. Infill drilling early in calendar 2015 was successful in expanding the F Shoot target and further drilling will be conducted to determine additional mineral potential in the area. Golden Star also reported work on the Prestea Underground project is progressing as scheduled with first ore production expected in early calendar 2017.

Golden Star delivers gold to RGLD Gold within five business days of its receipt of final smelter settlement proceeds and RGLD Gold typically sells gold ounces over a few weeks following physical receipt.

Results of Operations

Quarter Ended December 31, 2015, Compared to Quarter Ended December 31, 2014

For the quarter ended December 31, 2015, we recorded net income attributable to Royal Gold stockholders of \$15.1 million, or \$0.23 per basic and diluted share, as compared to a net loss attributable to Royal Gold stockholders of \$6.5 million, or (\$0.10) per basic and diluted share, for the quarter ended December 31, 2014. The increase in our earnings per share in the current period was primarily attributable to an increase in our revenue, as discussed below. During the prior year quarter, the Company recognized impairment charges of approximately \$29.6 million (including a royalty receivable write down of \$3.0 million) on certain non-principal royalty interests, which impacted earnings per share by \$0.34 per share, after taxes.

For the quarter ended December 31, 2015, we recognized total revenue of \$98.1 million, which is comprised of stream revenue of \$67.3 million and royalty revenue of \$30.8 million, at an average gold price of \$1,106 per ounce, an average silver price of \$14.77 per ounce, an average nickel price of \$4.28 per pound and an average copper price of \$2.22 per pound. This is compared to total revenue of \$61.3 million for the three months ended December 31, 2014, which was comprised of royalty revenue of \$44.0 million and stream revenue of \$17.3 million, at an average gold price of \$1,201 per ounce, an average silver price of \$16.50 per ounce, an average nickel price of \$7.17 per pound and an average copper price of \$3.00 per pound for the quarter ended December 31, 2014. Revenue and the corresponding production attributable to our royalty and stream interests for the quarter ended December 31, 2015 compared to the quarter ended December 31, 2014 is as follows:

Total Revenue		\$ 98,118		\$ 61,304	

(1) Reported production relates to the amount of metal sales, subject to our royalty and stream interests, for the three months ended December 31, 2015 and 2014, as reported to us by the operators of the mines, and may differ from the operators' public reporting.

(2) Refer to Property Developments above for further discussion on our principal stream interests. Our streams at Andacollo, Pueblo Viejo and Wassa/Bogoso/Prestea were acquired during the quarter ended September 30, 2015. The first gold delivery as part of the Pueblo Viejo gold stream was received in December 2015. Refer to Recent Business Developments above for further discussion on the recent stream acquisitions.

(3) Refer to Recent Business Developments above for further discussion on the recent Andacollo royalty sale.

(4) Individually, no stream or royalty included within the Other category contributed greater than 5% of our total revenue for either period.

The increase in our total revenue for the three ended December 31, 2015, compared with the three months ended December 31, 2014, resulted primarily from an increase in our stream revenue, which was a result of increased production at Mount Milligan and new production from our recently acquired streams, Pueblo Viejo and Wassa/Prestea and Andacollo. Gold ounces purchased and sold during the three months ended December 31, 2015 and 2014, and gold ounces in inventory as of December 31, 2015, for our streaming interests was as follows:

Table of Contents

Stream	Three months ended December 31, 2015			Three months ended December 31, 2014			As of December 31, 2015
	Gold ounces purchased	Gold ounces sold	Average realized gold price/ounce	Gold ounces purchased	Gold ounces sold	Average realized gold price/ounce	Gold ounces in inventory
Mount Milligan	38,700	38,700	\$ 1,093	13,000	14,300	\$ 1,208	8,068
Wassa/Prestea	6,300	8,800	\$ 1,116	N/A	N/A	N/A	699
Pueblo Viejo	20,600	8,800	\$ 1,068	N/A	N/A	N/A	11,769
Andacollo	10,100	5,200	\$ 1,102	N/A	N/A	N/A	5,152
Phoenix Gold	100	100	\$ 1,126	N/A	N/A	N/A	
Total	75,800	61,600	\$ 1,094	13,000	14,300	\$ 1,208	25,688

Our royalty revenue decreased during the quarter ended December 31, 2015, compared with the quarter ended December 31, 2014, due to decreases in the average gold, silver, copper and nickel prices and due to a production decrease at Cortez and the recent sale of the Andacollo royalty. These decreases were partially offset by increased production at Peñasquito. Please refer to [Recent Business Developments](#) and [Property Developments](#) earlier within this MD&A for further discussion on any recent developments regarding properties covered by certain of our royalty and stream interests.

Cost of sales were approximately \$22.6 million for the three months ended December 31, 2015, compared to \$6.2 million for the three months ended December 31, 2014. The increase is primarily attributable to an increase in production at Mount Milligan and new stream production at Andacollo, Pueblo Viejo and Wassa/Prestea. Cost of sales is specific to our stream agreements and is the result of RGLD Gold's purchase of gold for a cash payment. For Mount Milligan the cash payment is the lesser of \$435 per ounce, or the prevailing market price of gold when purchased, while the cash payment for our other streams is a set contractual percentage of the gold or silver spot price near the date of metal delivery.

General and administrative expenses decreased to \$5.8 million for the three months ended December 31, 2015, from \$8.5 million for the three months ended December 31, 2014. The decrease was primarily due to recognition of an allowance on the outstanding receivable associated with our Wolverine interest of approximately \$3.0 million during the prior year quarter.

Depreciation, depletion and amortization increased to \$40.4 million for the three months ended December 31, 2015, from \$20.3 million for the quarter ended December 31, 2014. The increase was primarily attributable to the ramp-up in production at Mount Milligan (\$8.2 million) and new production from the recently acquired streams at Pueblo Viejo (\$5.6 million) and Wassa/Prestea (\$3.6 million).

Interest and other expense increased to \$8.9 million for the three months ended December 31, 2015, from \$6.4 million for the quarter ended December 31, 2014. The increase was primarily due to an increase in interest expense associated with the outstanding balance on our revolving credit facility. The Company had \$350.0 million outstanding under the revolving credit facility as of December 31, 2015. The Company did not have any amounts outstanding under the revolving credit facility during the quarter ended December 31, 2014.

Edgar Filing: ROYAL GOLD INC - Form 10-Q

During the three months ended December 31, 2015, we recognized income tax expense totaling \$4.7 million compared with an income tax benefit of \$1.8 million during the three months ended December 31, 2014. This resulted in an effective tax rate of 25.4% in the current period, compared with 22.4% in the quarter ended December 31, 2014. The higher effective tax rate for the three months ended December 31, 2015 was primarily related to higher discrete period charges as compared to the three months ended December 31, 2014. For further discussion of the factors that influence our effective tax rate, refer to Note 11 to the notes to consolidated financial statements in the Company's Fiscal 2015 10-K.

Table of Contents

Six Months Ended December 31, 2015, Compared to Six Months Ended December 31, 2014

For the six months ended December 31, 2015, we recorded a net loss attributable to Royal Gold stockholders of \$29.9 million, or (\$0.46) per basic and diluted share, as compared to net income attributable to Royal Gold stockholders of \$12.1 million, or \$0.19 per basic and diluted share, for the six months ended December 31, 2014. The decrease in our earnings per share was primarily attributable to an increase in tax expense due to the Company's termination of the Andacollo royalty interest, as discussed below, and the planned liquidation of our Chilean subsidiary of approximately \$56.0 million during the quarter ended September 30, 2015. This decrease was partially offset by an increase in our revenue, which is also discussed below. The effect of the tax expense attributable to the termination of the Andacollo royalty interest during the quarter ended September 30, 2015, was \$0.86 per share. During the prior year period, our earnings per share was negatively impacted by impairment charges of approximately \$31.3 million (including a royalty receivable write down of \$3.0 million) on certain non-principal royalty interests. The effect of the impairment charges during the six months ended December 31, 2014, was \$0.37 per basic share, after taxes.

For the six months ended December 31, 2015, we recognized total revenue of \$172.2 million, which is comprised of stream revenue of \$105.2 million and royalty revenue of \$67.0 million, at an average gold price of \$1,116 per ounce, an average silver price of \$14.84 per ounce, an average nickel price of \$4.54 per pound and an average copper price of \$2.30 per pound. This is compared to total revenue of \$130.3 million for the six months ended December 31, 2014, which is comprised of royalty revenue of \$93.3 million and stream revenue of \$37.0 million, at an average gold price of \$1,243 per ounce, an average silver price of \$18.14 per ounce, an average nickel price of \$7.80 per pound and an average copper price of \$3.09 per pound for the six months ended December 31, 2014. Revenue and the corresponding production attributable to our royalty and stream interests for the six months ended December 31, 2015 compared to the six months ended December 31, 2014 is as follows:

Phoenix Gold	200	200	\$ 1,128	N/A	N/A	N/A	
Total	115,700	95,300	\$ 1,104	26,600	29,700	\$ 1,246	25,688

Our royalty revenue decreased during the six months ended December 31, 2015, compared with the six months ended December 31, 2014, due to decreases in the average gold, silver, copper and nickel prices and due to a production decrease at Cortez and the recent sale of the Andacollo royalty. These decreases were partially offset by increased production at Peñasquito. Please refer to Property Developments earlier within this MD&A for further discussion on any recent developments regarding properties covered by certain of our royalty interests.

Cost of sales were approximately \$34.0 million for the six months ended December 31, 2015, compared to \$12.9 million for the six months ended December 31, 2014. The increase is primarily attributable to an increase in production at Mount Milligan and new stream production at Andacollo, Pueblo Viejo and Wassa/Prestea. Cost of sales is specific to our stream agreements and is the result of RGLD Gold's purchase of gold for a cash payment. For Mount Milligan the cash payment is the lesser of \$435 per ounce, or the prevailing market price of gold when purchased, while the cash payment for our other streams is a set contractual percentage of the gold or silver spot price near the date of metal delivery.

Depreciation, depletion and amortization increased to \$67.6 million for the six months ended December 31, 2015, from \$42.5 million for the six months ended December 31, 2014. The increase was primarily attributable to the ramp-up in production at Mount Milligan (\$9.8 million) and new production from the recently acquired streams at Pueblo Viejo (\$5.6 million) and Wassa/Prestea (\$4.6 million).

Interest and other expense increased to \$16.1 million for the six months ended December 31, 2015, from \$13.1 million for the quarter ended December 31, 2014. The increase was primarily due to an increase in interest expense associated with the outstanding balance on our revolving credit facility. The Company had \$350.0 million outstanding under the revolving credit facility as of December 31, 2015. The Company did not have any amounts outstanding under the revolving credit facility during the six months ended December 31, 2014.

During the six months ended December 31, 2015, we recognized income tax expense totaling \$63.9 million compared with \$2.1 million during the six months ended December 31, 2014. This resulted in an effective tax rate of 194.3% in the current period, compared with 14.5% during the six months ended December 31, 2014. The increase in the effective tax rate for the six months ended December 31, 2015 is primarily related to the discrete tax impacts attributable to the Company's Andacollo transactions and the liquidation of our Chilean subsidiary during the quarter ended September 30, 2015. Excluding discrete items, our effective tax rate for the six months ended December 31, 2015 would have been 15.6%. For further discussion of the factors that influence our effective tax rate, refer to Note 12 to the notes to consolidated financial statements in the Company's Fiscal 2015 10-K.

Table of Contents

Liquidity and Capital Resources

Overview

At December 31, 2015, we had current assets of \$162.9 million compared to current liabilities of \$20.5 million for a current ratio of 8 to 1. This compares to current assets of \$790.8 million and current liabilities of \$25.0 million at June 30, 2015, resulting in a current ratio of approximately 32 to 1. The decrease in our current ratio was primarily attributable to a decrease in our cash and equivalents as a result of the recent royalty and stream acquisitions during the current period, as discussed earlier under Recent Business Developments. Please refer to Summary of Cash Flows below for further discussion on changes to our cash and equivalents during the period.

During the quarter ended December 31, 2015, liquidity needs were met from \$75.5 million in net revenue, our available cash resources, and borrowings under our revolving credit facility. As of December 31, 2015, the Company had \$300 million available and \$350 million outstanding under its revolving credit facility. The Company was in compliance with each financial covenant as of December 31, 2015. Refer to Note 5 of our notes to consolidated financial statements for further discussion on our debt.

Working capital totaled approximately \$142.3 million at December 31, 2015. When combined with the \$300 million of availability under our revolving credit facility, total liquidity at December 31, 2015, was \$442.3 million. Cash flow from operations was \$54.6 million for the six months ended December 31, 2015, which considers the effects of approximately \$47.7 million of total cash taxes related to the termination of the Andacollo royalty during the quarter ended September 30, 2015. Operating cash flow is expected to increase during the remainder of fiscal year 2016 (assuming similar gold prices) as three of the new transactions discussed above under Recent Business Developments are expected to deliver incremental operating cash flow during fiscal year 2016.

We believe that our current financial resources and funds generated from operations will be adequate to cover anticipated expenditures for debt service, general and administrative expense costs and capital expenditures for the foreseeable future. Our current financial resources are also available to fund dividends and for acquisitions of royalty and stream interests, including the remaining conditional commitments incurred in connection with the Ilovica, Golden Star and Rainy River stream acquisitions and Peak Gold joint venture. Our long-term capital requirements are primarily affected by our ongoing acquisition activities. The Company currently, and generally at any time, has acquisition opportunities in various stages of active review. In the event of one or more substantial royalty and stream interest or other acquisitions, we may seek additional debt or equity financing as necessary.

Please refer to our risk factors included in Part 1, Item 1A of our Fiscal 2015 10-K and in Part II, Item 1A of this Quarterly Report on Form 10-Q for a discussion of certain risks that may impact the Company's liquidity and capital resources.

Summary of Cash Flows

Operating Activities

Net cash provided by operating activities totaled \$54.6 million for the six months ended December 31, 2015, compared to \$82.3 million for the six months ended December 31, 2014. The decrease was primarily due to an increase in income taxes paid of approximately \$45.9 million. This decrease was partially offset by an increase in proceeds received from our royalty and streaming interests, net of production taxes and cost of sales.

Table of Contents

Investing Activities

Net cash used in investing activities totaled \$1.0 billion for the six months ended December 31, 2015, compared to cash used in investing activities of \$39.3 million for the six months ended December 31, 2014. The increase in cash used in investing activities is primarily due to an increase in acquisitions of royalty and stream interests in mineral properties (primarily Pueblo Viejo and Andacollo stream acquisition) compared to the prior year period. Refer to Recent Business Developments above for further discussion on our recently acquired streams.

Financing Activities

Net cash provided by financing activities totaled \$320.4 million for the six months ended December 31, 2015, compared to cash used in financing activities of \$27.4 million for the six months ended December 31, 2014. The increase in cash provided by financing activities is primarily due to the Company's \$350 million borrowing under its revolving credit facility to fund stream acquisitions during the current period. Refer to Recent Business Developments above for further discussion on our recently acquired streams.

Recently Adopted Accounting Standards

There were no new accounting standards adopted during the three and six months ended December 31, 2015. Refer to Note 1 of our notes to consolidated financial statements for further discussion on recently issued accounting standards.

Critical Accounting Policies

Asset Impairment

We evaluate long-lived assets for impairment whenever events or changes in circumstances indicate that the related carrying amounts of an asset or group of assets may not be recoverable. The recoverability of the carrying value of royalty and stream interests in production and development stage mineral properties is evaluated based upon estimated future undiscounted net cash flows from each royalty and stream interest property using estimates of proven and probable reserves and other relevant information received from the operators. We evaluate the recoverability of the carrying value of royalty interests in exploration stage mineral properties in the event of significant decreases in the price of gold, silver, copper, nickel and other metals, and whenever new information regarding the mineral properties is obtained from the operator indicating that production will not likely occur or may be reduced in the future, thus potentially affecting the future recoverability of our royalty or stream interests. Impairments in the carrying value of each property are measured and recorded to the extent that the carrying value in each property exceeds its estimated fair value, which is generally calculated using estimated future discounted cash flows.

Our estimates of gold, silver, copper, nickel and other metal prices, operators' estimates of proven and probable reserves or mineralized material related to our royalty or streaming properties, and operators' estimates of operating and capital costs are subject to certain risks and uncertainties which may affect the recoverability of our investment in these royalty and stream interests in mineral properties. Although we have made our best assessment of these factors based on current market conditions, it is possible that changes could occur, which could adversely affect the net cash flows expected to be generated from these royalty and stream interests. Refer to Note 3 of our notes to consolidated financial statements for further discussion on our quarterly impairment assessment.

Forward-Looking Statements

Cautionary Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995: With the exception of historical matters, the matters discussed in this Quarterly Report on Form 10-Q are forward-looking statements that involve risks and uncertainties that could cause actual results to differ

Table of Contents

materially from projections or estimates contained herein. Such forward-looking statements include, without limitation, statements regarding projected production estimates and estimates pertaining to timing and commencement of production from the operators of properties where we hold royalty and stream interests; effective tax rate estimates; the adequacy of financial resources and funds to cover anticipated expenditures for general and administrative expenses as well as costs associated with exploration and business development and capital expenditures, and our expectation that substantially all our revenues will be derived from royalty and stream interests. Words such as may, could, should, would, believe, estimate, expect, anticipate, plan, forecast, potential, intend, continue, project words, comparable words and similar expressions generally indicate forward-looking statements, which speak only as of the date the statement is made. Do not unduly rely on forward-looking statements. Actual results may differ materially from those expressed or implied by these forward-looking statements. Factors that could cause actual results to differ materially from these forward-looking statements include, among others:

- a continued low price environment for gold and other metals prices on which our royalty and stream interests are paid or a continued low price environment for the primary metals mined at properties where we hold royalty and stream interests;
- the production at or performance of properties where we hold royalty and stream interests;
- the ability of operators to bring projects, particularly development stage properties, into production on schedule or operate in accordance with feasibility studies;
- challenges to mining, processing and related permits and licenses, or to applications for permits and licenses, by or on behalf of indigenous populations, non-governmental organizations or other third parties;
- liquidity or other problems our operators may encounter, including shortfalls in the financing required to complete construction and a bring a mine into production;
- decisions and activities of the operators of properties where we hold royalty and stream interests;
- hazards and risks at the properties where we hold royalty and stream interests that are normally associated with developing and mining properties, including unanticipated grade, continuity and geological, metallurgical, processing or other problems, mine operating and ore processing facility problems, pit wall or tailings dam failures, industrial accidents, environmental hazards and natural catastrophes such as floods or earthquakes and access to raw materials, water and power;

- changes in operators' mining, processing and treatment techniques, which may change the production of minerals subject to our royalty and stream interests;
- changes in the methodology employed by our operators to calculate our royalty and stream interests in accordance with the agreements that govern them;
- changes in project parameters as plans of the operators of properties where we hold royalty and stream interests are refined;
- decreases in estimates of reserves and mineralization by the operators of properties where we hold royalty and stream interests;
- contests to our royalty and stream interests and title and other defects to the properties where we hold royalty and stream interests;
- adverse effects on market demand for commodities, the availability of financing, and other effects from adverse economic and market conditions;
- future financial needs of the Company and the operators;

Table of Contents

- federal, state and foreign legislation governing us or the operators of properties where we hold royalty and stream interests;

- the availability of royalty and stream interests for acquisition or other acquisition opportunities and the availability of debt or equity financing necessary to complete such acquisitions;

- our ability to make accurate assumptions regarding the valuation, timing and amount of revenue to be derived from our royalty and stream interests when evaluating acquisitions;

- risks associated with conducting business in foreign countries, including application of foreign laws to contract and other disputes, validity of security interests, environmental, governmental consents for granting interests in exploration and exploration licenses, real estate, contract and permitting laws, currency fluctuations, expropriation of property, repatriation of earnings, taxation, price controls, inflation, import and export regulations, community unrest and labor disputes, endemic health issues, corruption, enforcement and uncertain political and economic environments;

- changes in laws governing us, the properties where we hold royalty and stream interests or the operators of such properties;

- risks associated with issuances of additional common stock or incurrence of indebtedness in connection with acquisitions or otherwise including risks associated with the issuance and conversion of convertible notes;

- acquisition and maintenance of permits and authorizations, completion of construction and commencement and continuation of production at the properties where we hold royalty and stream interests;

- changes in management and key employees; and

- failure to complete future acquisitions;

as well as other factors described elsewhere in this report and our other reports filed with the SEC. Most of these factors are beyond our ability to predict or control. Future events and actual results could differ materially from those set forth in, contemplated by or underlying the forward-looking statements. Forward-looking statements speak only as of the date on which they are made. We disclaim any obligation to update any forward-looking statements made herein, except as required by law. Readers are cautioned not to put undue reliance on forward-looking statements.

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET

Our earnings and cash flows are significantly impacted by changes in the market price of gold and other metals. Gold, silver, copper, nickel and other metal prices can fluctuate significantly and are affected by numerous factors, such as demand, production levels, economic policies of central banks, producer hedging, world political and economic events and the strength of the U.S. dollar relative to other currencies. Please see *Volatility in gold, silver, copper, nickel and other metal prices may have an adverse impact on the value of our royalty and stream interests and may reduce our revenues. Certain contracts governing our royalty and stream interests have features that may amplify the negative effects of a drop in metals prices,* under Part I, Item 1A of our Fiscal 2015 10-K, for more information that can affect gold, silver, copper, nickel and other metal prices as well as historical gold, silver, copper and nickel prices.

During the three month period ended December 31, 2015, we reported revenue of \$98.1 million, with an average gold price for the period of \$1,106 per ounce, an average silver price of \$14.77 per ounce, an

Table of Contents

average copper price of \$2.22 per pound and an average nickel price of \$4.28 per pound. Approximately 90% of our total reported revenues for the three months ended December 31, 2015 were attributable to gold sales from our gold producing royalty and stream interests, as shown within the MD&A. For the three months ended December 31, 2015, if the price of gold had averaged 10% higher or lower per ounce, we would have recorded an increase or decrease in revenue of approximately \$15.5 million and \$15.4 million, respectively.

Approximately 3% of our total reported revenues for the three months ended December 31, 2015 were attributable to copper sales from our copper producing royalty interests. For the three months ended December 31, 2015, if the price of copper had averaged 10% higher or lower per pound, we would have recorded an increase or decrease in revenue of approximately \$0.9 million.

Approximately 2% of our total reported revenues for the three months ended December 31, 2015 were attributable to nickel sales from our nickel producing royalty interests. For the three months ended December 31, 2015, if the price of nickel had averaged 10% higher or lower per pound, we would have recorded an increase or decrease in revenue of approximately \$0.8 million.

Approximately 2% of our total reported revenues for the three months ended December 31, 2015 were attributable to silver sales from our silver producing royalty interests. For the three months ended December 31, 2015, if the price of silver had averaged 10% higher or lower per ounce, we would have recorded an increase or decrease in revenue of approximately \$0.5 million.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

As of December 31, 2015, the Company's management, with the participation of the President and Chief Executive Officer (the principal executive officer) and Chief Financial Officer and Treasurer (the principal financial and accounting officer) of the Company, carried out an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the Exchange Act)). Based on such evaluation, the Company's President and Chief Executive Officer and its Chief Financial Officer and Treasurer have concluded that, as of December 31, 2015, the Company's disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the required time periods and that such information is accumulated and communicated to the Company's management, including the President and Chief Executive Officer and its Chief Financial Officer and Treasurer, as appropriate to allow timely decisions regarding required disclosure.

Edgar Filing: ROYAL GOLD INC - Form 10-Q

Disclosure controls and procedures involve human diligence and compliance and are subject to lapses in judgment and breakdowns resulting from human failures. As a result, a control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected.

Changes in Internal Controls

There has been no change in the Company's internal control over financial reporting during the three months ended December 31, 2015, that has materially affected, or that is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Voisey's Bay

Refer to Note 12 of our notes to consolidated financial statements for a discussion of the litigation associated with our Voisey's Bay royalty.

ITEM 1A. RISK FACTORS

Information regarding risk factors appears in Part I, Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations, Forward-Looking Statements, and various risks faced by us are also discussed elsewhere in Part I, Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations of this Quarterly Report on Form 10-Q. In addition, risk factors are included in Part I, Item 1A of our Fiscal 2015 10-K. Other than as set forth below, there have been no material changes from those risk factors set forth in our Fiscal 2015 10-K.

Many of our royalty and stream interests are important to us and any adverse development related to these properties could adversely affect our revenues and future prospects.

Our investments in the Mount Milligan, Andacollo, Voisey's Bay and Peñasquito properties, among others, were significant to us in fiscal year 2015, as our interests in these properties generated approximately \$179.1 million in revenue in fiscal year 2015, which was nearly 65% of our revenue for the period. We expect these properties, our new gold and silver stream at Pueblo Viejo, and others to be important to us in fiscal year 2016 and beyond. Any adverse development affecting the operation of or production from any of these properties would have a material adverse effect on our business, results of operations, cash flows, financial condition and future prospects. Any adverse decision made by the operators, such as changes to mine plans, production schedules, metallurgical processes or royalty calculation methodologies, may materially and adversely impact the timing and amount of revenue that we receive. In addition, any decision by an operator to impair assets of a project on which we have a royalty or stream interest, such as Rubicon's November 2015 announcement of the impairment of its Phoenix Gold Project and Barrick's January 2016 announcement of anticipated impairments at Pascua-Lama and Pueblo Viejo, could lead us to re-evaluate the carrying value of our royalty and stream interests.

Thompson Creek announced in November 2015 that it engaged Moelis & Company and BMO Capital Markets to assist its board in evaluating strategic and financial alternatives, including debt financing and restructuring, new capital transactions and asset sales. Thompson Creek's market capitalization has declined by over 90% from mid-2014. If Thompson Creek were to experience liquidity issues that impacted the operation of the Mount Milligan mine, or were to seek bankruptcy protection, we may not realize the future benefits from our stream interest on the Mount Milligan mine and our results could be materially and adversely affected.

Problems concerning the existence, validity, enforceability, terms or geographic extent of our royalty and stream interests could adversely affect our business and revenues, and our interests may similarly be materially and adversely impacted by change of control, bankruptcy or the insolvency of operators.

Defects in or disputes relating to the royalty and stream interests we hold or acquire may prevent us from realizing the anticipated benefits from our royalty and stream interests, and could have a material adverse effect on our business, results of operations, cash flows and financial condition. It is also possible that

Table of Contents

material changes could occur that may adversely affect management's estimate of the carrying value of our royalty and stream interests and could result in impairment charges. While we seek to confirm the existence, validity, enforceability, terms and geographic extent of the royalty and stream interests we acquire, there can be no assurance that disputes or other problems concerning these and other matters will not arise. Confirming these matters, as well as the title to mining property on which we hold or seek to acquire a royalty or stream interest, is a complex matter, and is subject to the application of the laws of each jurisdiction to the particular circumstances of each parcel of mining property and to the documents reflecting the royalty or stream interest. Similarly, royalty and stream interests in many jurisdictions are contractual in nature, rather than interests in land, and therefore may be subject to change of control, bankruptcy or the insolvency of operators, and our royalty or stream interests could be materially impaired or set aside through judicial or administrative proceedings. We often do not have the protection of security interests over property that we could liquidate to recover all or part of our investment in a royalty or stream interest. Even if we retain our royalty and stream interests in a mining project after any change of control, bankruptcy or insolvency of the operator, the project may end up under the control of a new operator, who may or may not operate the project in a similar manner to the current operator, which may negatively impact us.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Not applicable.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Not applicable.

ITEM 4. MINE SAFETY DISCLOSURE

Not applicable.
