#### ¥ Illiquid security

<sup>#</sup> Coupon rate is variable based on the weighted average coupon of the underlying collateral. To the extent the weighted average coupon of the underlying assets which comprise the collateral increases or decreases, the coupon rate of this security will increase or decrease correspondingly. The rate disclosed is as of December 31, 2018.

<sup>^</sup> Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional buyers. These securities are determined to be liquid by the Adviser, unless otherwise noted, under procedures established by the Fund s Board of Trustees. At December 31, 2018, the value of these securities amounted to \$138,360,152 or 46.7% of net assets.

- @ Security pays interest at rates that represent residual cashflows available after more senior tranches have been paid. The interest rate disclosed reflects the estimated rate in effect as of December 31, 2018.
- ß The interest rate may step up conditioned upon the aggregate remaining principal balance of the underlying mortgage loans being reduced below a targeted percentage of the aggregate original principal balance of the mortgage loans. The interest rate shown is the rate in effect as of December 31, 2018.
- Þ Value determined using significant unobservable inputs.

I/O Interest only security

I/F Inverse floating rate security whose interest rate moves in the opposite direction of reference interest rates. Reference interest rates are typically based on a negative multiplier or slope. Interest rate may also be subject to a cap or floor.

All or partial amount transferred for the benefit of the counterparty as collateral for reverse repurchase agreements.

Seven-day yield as of December 31, 2018

> This U.S. Agency bond accrues interest which is added to the outstanding principal balance. The interest payment will be deferred until all other tranches in the structure are paid off. The rate disclosed is as of December 31, 2018.

December 31, 2018 (Unaudited)

#### **Organization**

DoubleLine Opportunistic Credit Fund (the Fund ) was formed as a closed-end management investment company registered under the Investment Company Act of 1940, as amended (the 1940 Act ), and originally classified as a non-diversified fund. The Fund is currently operating as a diversified fund. The Fund has previously operated as a non-diversified fund and may operate as a non-diversified fund in the future to the extent permitted by applicable law. The Fund was organized as a Massachusetts business trust on July 22, 2011 and commenced operations on January 27, 2012. The Fund is listed on the New York Stock Exchange (NYSE) under the symbol DBL. The Fund s investment objective is to seek high total investment return by providing a high level of current income and the potential for capital appreciation.

#### **Significant Accounting Policies**

The Fund is an investment company that applies the accounting and reporting guidance issued in Topic 946, Financial Services Investment Companies, by the Financial Accounting Standards Board (FASB). The following is a summary of the significant accounting policies of the Fund. These policies are in conformity with accounting principles generally accepted in the United States of America (US GAAP).

**Security Valuation**. The Fund has adopted US GAAP fair value accounting standards which establish a definition of fair value and set out a hierarchy for measuring fair value. These standards require additional disclosures about the various inputs and valuation techniques used to develop the measurements of fair value and a discussion of changes in valuation techniques and related inputs during the period. These inputs are summarized in the three broad levels listed below:

Level 1 Unadjusted quoted market prices in active markets for identical securities

Level 2 Quoted prices for identical or similar assets in markets that are not active, or inputs derived from observable market data

Level 3 Significant unobservable inputs (including the reporting entity s estimates and assumptions)

Assets and liabilities may be transferred between levels. The Fund uses end of period timing recognition to account for any transfers.

Market values for domestic and foreign fixed income securities are normally determined on the basis of valuations provided by independent pricing services. Vendors typically value such securities based on one or more inputs described in the following table which is not intended to be a complete list. The table provides examples of inputs that are commonly relevant for valuing particular classes of fixed income securities in which the Fund is authorized to invest. However, these classifications are not exclusive, and any of the inputs may be used to value any other class of fixed-income securities. Securities that use similar valuation techniques and inputs as described in the following table are categorized as Level 2 of the fair value hierarchy. To the extent the significant inputs are unobservable, the values generally would be categorized as Level 3.

Fixed-income class Examples of Inputs

All

Benchmark yields, transactions, bids, offers, quotations from dealers and trading systems, new issues, spreads and other relationships observed in the markets among comparable securities; and proprietary pricing models such as yield measures calculated using factors such as cash

flows, financial or collateral performance and other reference data

(collectively referred to as standard inputs)

Corporate bonds and notes;

convertible securities

US bonds and notes of government and

government agencies

Residential and commercial

mortgage-backed obligations; asset-backed obligations (including collateralized loan obligations)

Standard inputs and underlying equity of the issuer

Standard inputs

Standard inputs and cash flows, prepayment information, default rates, delinquency and loss assumptions, collateral characteristics, credit enhancements and specific deal information, trustee reports

Investments in registered open-end management investment companies will be valued based upon the net asset value (NAV) of such investments and are categorized as Level 1 of the fair value hierarchy.

The Fund may enter into reverse repurchase agreements. In a reverse repurchase agreement, the Fund sells to a financial institution a security that it holds with an agreement to repurchase the same security at an agreed-upon price and date. A reverse repurchase agreement involves the risk that the market value of the security may decline below the repurchase price of the security. The Fund will segregate assets determined to be liquid by the Adviser or otherwise cover its obligations under reverse repurchase agreements. Due to the short term nature of the reverse repurchase agreements, face value approximates fair value at December 31, 2018

Securities may be fair valued in accordance with the fair valuation procedures approved by the Board of Trustees (the Board ). The valuation committee is generally responsible for overseeing the day to day valuation processes and reports periodically to the Board. The valuation committee and the pricing group are authorized to make all necessary determinations of the fair values of portfolio securities and other assets for which market quotations are not readily available or if it is deemed that the prices obtained from brokers and dealers or independent pricing services are deemed to be unreliable indicators of market or fair value.

The following is a summary of the fair valuations according to the inputs used to value the Fund s investments as of December 31, 2018<sup>1</sup>:

#### Category

Investments in Securities	
Level 1	
Money Market Funds	\$ 1,836,249
Total Level 1	1,836,249
