TEVA WILL BE SOLE PROMOTER OF AZILECT[®] FOR PARKINSON`S DISEASE IN THE UNITED STATES

Jerusalem, Israel, July 12, 2006 - Teva Pharmaceutical Industries Ltd. (NASDAQ:TEVA) and Eisai Co., Ltd. (Tokyo Stock Exchange/Osaka Securities Exchange: 4523) today announced that they have mutually agreed to end their May 2003 alliance to co-promote Teva`s AZILECT[®] (rasagiline tablets) for Parkinson`s disease in the United States.

As a result, Teva`s U.S. innovative product marketing subsidiary, Teva Neuroscience, Inc., will have sole responsibility for the marketing of AZILECT[®] in the U.S. and Teva will enjoy the full financial benefits from AZILECT[®] sales. Since 2003, Teva Neuroscience has more than doubled its field presence in preparation for this launch and has demonstrated its capabilities in its neurological franchise through its sales efforts and significant success with COPAXONE[®] (glatiramer acetate injection) for the reduction of relapses in relapsing-remitting multiple sclerosis.

As previously announced on May 17, 2006, once-daily AZILECT® received approval from the U.S. Food and Drug Administration (FDA) as a treatment for Parkinson's disease both as initial monotherapy in early Parkinson's disease patients and as adjunct therapy to levodopa in moderate-to-advanced stages of the disease. AZILECT® will be available in the U.S. by the end of this month.

A global phase II study, in which rasagiline is used as an adjunctive treatment in Alzheimer's patients treated with Eisai's Aricept®, was initiated in 2004 and is currently on-going.

About AZILECT®

AZILECT® (rasagiline tablets) is indicated for the treatment of the signs and symptoms of idiopathic Parkinson's disease as initial monotherapy and as adjunct therapy to levodopa.

AZILECT® is contraindicated for concomitant use with: meperidine, other MAO inhibitors, tramadol, methadone, propoxyphene, dextromethorphan, St. John's wort, mirtazapine, cyclobenzaprine, sympathomimetic amines including over-the-counter cold preparations, and local anesthetics containing sympathomimetic vasoconstrictors. Patients taking AZILECT® should avoid tyramine-rich foods, beverages, and dietary supplements. It seems prudent, in general, to avoid the combination of AZILECT® with antidepressants. Caution should be used when AZILECT® is used concurrently with CYP1A2 inhibitors such as ciprofloxacin. AZILECT® should not be taken by patients with moderate to severe hepatic impairment or pheochromocytoma.

Side effects of AZILECT® as monotherapy include arthralgia and dyspepsia; and as adjunct to levodopa therapy include dyskinesia, accidental injury, weight loss, postural hypotension, vomiting, arthralgia, nausea, constipation, dry mouth, rash, and somnolence.

AZILECT® was developed by Teva based on research originating from the Technion Israel Institute of Technology.

About Parkinson's disease

Parkinson's disease is a chronic, progressive, neurodegenerative disorder. The exact cause of Parkinson's disease is unknown, and is believed to be multifactorial, involving genes, environmental factors and aging.

Symptoms include tremors, slowness of movement, stiffness, gait and posture problems. As the disease progresses, symptoms worsen, and the patient will most likely experience motor complications. Ultimately, the disease impairs the patient's ability to function.

The disease, which usually affects people over the age of 50, is estimated to affect some 4 million people worldwide, of which approximately one million in the U.S. In 2005, global sales of drugs to treat Parkinson's disease reached about USD 3 billion.

AZILECT® (rasagiline tablets) is a registered trademark of Teva Pharmaceutical Industries, Ltd.

Teva Pharmaceutical Industries Ltd., headquartered in Israel, is among the top 20 pharmaceutical companies in the world and is the leading generic pharmaceutical company. The company develops, manufactures and markets generic and innovative human pharmaceuticals and active pharmaceutical ingredients, as well as animal health pharmaceutical products. Over 80% of Teva's sales are in North America and Europe.

Safe Harbor Statement under the U. S. Private Securities Litigation Reform Act of 1995: This release contains forward-looking statements, which express the current beliefs and expectations of management. Such statements are based on management's current beliefs and expectations and involve a number of known and unknown risks and uncertainties that could cause Teva's future results, performance or achievements to differ significantly from the results, performance or achievements expressed or implied by such forward-looking statements. Important factors that could cause or contribute to such differences include risks relating to Teva's ability to rapidly integrate Ivax Corporation's operations and achieve expected synergies, Teva's ability to successfully develop and commercialize additional pharmaceutical products, the introduction of competing generic products, the impact of competition from brand-name companies that sell or license their own brand products under generic trade dress and at generic prices (so called "authorized generics") or seek to delay the introduction of generic product, the impact of consolidation of our distributors and customers, regulatory changes that may prevent Teva from exploiting exclusivity periods, potential liability for sales of generic products prior to a final resolution of outstanding litigation, including that relating to the generic versions of Allegra®, Neurontin®, Oxycontin® and Zithromax®, the effects of competition on Copaxone® sales, including as a result of the expected reintroduction of Tysabri® into the market, the impact of pharmaceutical industry regulation and pending legislation that could affect the pharmaceutical industry, the difficulty of predicting U.S. Food and Drug Administration, European Medicines Agency and other regulatory authority approvals, the regulatory environment and changes in the health policies and structures of various countries, Teva's ability to successfully identify, consummate and integrate acquisitions, potential exposure to product liability claims, dependence on patent and other protections for innovative products, significant operations worldwide that may be adversely affected by terrorism or major hostilities, environmental risks, fluctuations in currency, exchange and interest rates, operating results and other factors that are discussed in Teva's Annual Report on Form 20-F and its other filings with the U.S. Securities and Exchange Commission. Forward-looking statements speak only as of the date on which they are made and the Company undertakes no obligation to update publicly or revise any forward-looking statement, whether as a result of new information, future developments or otherwise.
