Portfolio Managers'
Comments

Portfolio managers Tom Futrell and Rick Huber discuss economic and market conditions, key strategies, and recent Fund performance. With 19 years of investment experience, Tom assumed investment management responsibility for the Nuveen Arizona, Michigan and Texas Funds in March 2002. Rick, who has 17 years of investment experience, has managed NUO and NXI since March 2001 and added NBJ and NVJ upon their inceptions in September 2001 and March 2002, respectively.

WHAT WERE THE MAJOR DRIVERS OF THE U.S. ECONOMY AND THE MUNICIPAL MARKET DURING THIS REPORTING PERIOD?

The two major forces at work during the twelve months ended July 31, 2002, were slow economic growth and the Federal Reserve's efforts to address this situation by aggressively easing short-term interest rates. The events of September 11, 2001, and the uncertain geopolitical climate that has followed also have impacted the economy and the markets.

In the municipal market, the general economic environment of the past twelve months, including a sluggish recovery and lack of inflationary pressures, helped many bonds perform well. The first seven months of 2002 also saw a continuation of the trend toward increased municipal issuance at the national level, with \$189.9 billion in new supply, up 21% over January-July 2001. On the demand side, municipal bonds continued to be highly sought after by individual investors looking for diversification, tax-free income, and an alternative to a volatile stock market. Institutional investors, especially traditional purchasers such as property/casualty insurance companies, have also been active buyers in the municipal market.

TOM, HOW WAS THE ECONOMIC AND MUNICIPAL ENVIRONMENT IN ARIZONA, MICHIGAN AND TEXAS?

During the first seven months of 2002, Arizona issued \$5.6 billion in new bonds, up 107% over the same period in 2001. This increase can be attributed to the state's rapid growth, the concurrent rise in need for essential services, and low interest rates. However, both Michigan and Texas experienced declines in issuance from 2001 levels. Michigan was affected by a slowdown in the manufacturing sector, and its \$4 billion in new issuance over the first seven months of 2002 represented a decrease of 24% from 2001. Supply in Texas was off slightly, with \$13.2 billion of issuance, down 4%.

Over the past decade, Arizona had one of the fastest growing state economies in the nation, driven primarily by rapid development in the high-tech sector and growth of the state's tourism industry. However, weakness in the national economy, contraction in the high-tech sector, and deterioration of tourism following September 11 have all had an impact. State revenues for 2002 and 2003

Edgar Filing: NUVEEN OHIO QUALITY INCOME MUNICIPAL FUND INC - Form N-30D

are expected to be 11% and 16%, respectively, lower than original estimates. The projected budget gap is being addressed through a combination of expense reductions, fund transfers, federal revenue adjustments, and use of stabilization funds and lease-purchase financing. In addition, the Arizona economy is also expected to benefit from an increase in the national defense budget. As of July 31, 2002, Arizona appropriation bonds were rated A1 with a stable outlook by Moody's, and AA- with a negative outlook by Standard & Poor's, which revised its evaluation from stable in June 2002.

In contrast to Arizona, Michigan experienced a more significant slowdown in economic activity over the past few years, as the state's job market weakened and unemployment trended higher, particularly in manufacturing and construction. As of July 31, 2002, Michigan's jobless rate was 6.6%, compared with the national average of 5.9%. Permanent job cuts and productivity gains are expected to keep employment in the state's manufacturing sector from returning to the high

2

levels seen during the 1990s. In addition, Michigan continues to face fiscal pressure from a weaker economy, with the latest state revenue forecast projecting a \$1.2 billion budget shortfall. Michigan has responded with expenditure reductions and the deployment of surpluses carried forward from prior years. Overall, the state's debt position remains low and well managed, and its pension system remains fully funded. Michigan's debt is rated Aaa/AAA/AA+, with S&P and Fitch maintaining stable credit outlooks and Moody's revising its outlook to negative from stable in December 2001.

While Texas also experienced a slowdown in line with the national economy, the state's economic fundamentals remained stable, as growth in construction, services, and manufacturing, especially high-tech and computer manufacturing, helped the state continue to diversify away from its reliance on the oil and gas industries. Although the state lost a number of high-paying jobs, the Texas economy has already shown signs of recovery, with job growth in the services and retail trade sectors over the past few months. Since Texas does not levy personal or corporate income taxes, the state has managed to avoid the budget shortfalls faced by many other states following a decline in these revenue sources.

RICK, WHAT ABOUT OHIO?

Ohio saw a sharp drop in new municipal issuance in the first half of 2002, primarily as a result of the recession in manufacturing and resultant budgetary pressures. For January-July 2002, the state issued \$3.6 billion in new bonds, down 39% from 2001. Although the manufacturing sector has stabilized somewhat in recent months, Ohio's recovery has been constrained by weak employment growth, including continued job losses in the trade and services industries, and by its demographic profile, particularly the state's difficulty in keeping university graduates. Following significant shortfalls in tax collections and a downward revision in revenue projections for 2003 and 2004, Ohio is facing a substantial budget gap. Adding to concerns about Ohio's ability to achieve a balanced budget for fiscal 2003 and 2004 is the state's reliance on one-time revenue resources to balance operations. While the credit ratings for state-issued debt remained intact at Aa1/AA+/AA+, Moody's and S&P revised their credit outlooks for Ohio to negative from stable in December 2001 and June 2002, respectively.

HOW DID THESE NUVEEN FUNDS PERFORM OVER THE PAST TWELVE MONTHS?

Fund performance for the twelve months ended July 31, 2002, is summarized in the following table:

In a market characterized by rising bond values, funds with longer durations⁴ typically would be expected to outperform funds or indexes with shorter durations. As of July 31, 2002, the durations of the Nuveen Funds having at least one year of history ranged from 7.75 to 11.91, compared with 8.01 for the unleveraged Lehman Brothers Municipal Bond Index. These generally longer durations were one reason that most of these funds outperformed the Lehman benchmark.

sidebar:

1 The Funds' total annual returns on common share net asset value are compared with the total annual return of the Lehman Brothers Municipal Bond Index, an unleveraged index comprising a broad range of investment-grade municipal bonds. Results for the Lehman index do not reflect any expenses.

2 The total returns of the Arizona, Ohio, and Texas Funds are compared with the average annualized return of the 26 funds in the Lipper Other States Closed-End Municipal Debt Funds category, while the Michigan Funds are compared with the average annualized return of the 5 funds in the Lipper Michigan Closed-End Municipal Debt Funds category. Fund and Lipper returns assume reinvestment of dividends.

3 The taxable-equivalent yield represents the yield that must be earned on a taxable investment in order to equal the yield of the Nuveen Fund on an after-tax basis. The taxable-equivalent yield is based on the Fund's market yield on the indicated date and a federal income tax rate of 30% plus the applicable state income tax rate. The combined federal and state tax rates

Edgar Filing: NUVEEN OHIO QUALITY INCOME MUNICIPAL FUND INC - Form N-30D

used in this report are as follows: Arizona 33.5%, Michigan 33%, and Ohio 35%. Because Texas has no state income tax, NTX's taxable-equivalent yield is based on the federal income tax rate of 30%.

4 Duration is a measure of a Fund's NAV volatility in reaction to interest rate movements. Fund duration, also known as leverage-adjusted duration, takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund. Unless otherwise noted, references to duration in this commentary are intended to indicate Fund duration.

3

In addition to duration, the relative total return performance of these Funds also was influenced by market activity, portfolio structure, call exposure and individual holdings. NAZ's underperformance, for example, reflects this portfolio's holding of bonds issued by the Gila County Industrial Development Authority for the ASARCO Incorporated project. While credit deterioration affecting this company has negatively impacted the value of these bonds, the bonds continue to pay interest on a timely basis. We are working to bring about a resolution to this situation that we believe will serve the best interests of shareholders.

WHAT ABOUT THE FUNDS' DIVIDENDS AND SHARE PRICES?

As the Fed continued to keep short-term interest rates relatively low, the dividend-payment capabilities of all these Funds benefited from the use of leverage, a strategy that can potentially enhance the dividends paid to common shareholders. This is because of the relatively low rates that were paid to the Funds' MuniPreferred(R) shareholders. Low short-term rates, such as those currently in effect, can enable the Funds to reduce the amount of income they pay preferred shareholders, which can leave more earnings to support common share dividends.

During the fiscal year ended July 31, 2002, low short-term interest rates enabled us to implement four dividend increases in NMP, NUO and NTX, three in NAZ, two in NUM, and one in NXI. Among the newer Funds, NFZ, NZW, and NBJ maintained steady, attractive dividends during this period, while NKR and NVJ, which were introduced in March 2002, paid their first monthly dividends in June.

Over the past year, the share prices of these Nuveen Funds remained relatively stable (see the charts on individual Performance Overview pages). Steady demand helped to substantially narrow the discounts (share prices below NAV) on NMP and NTX during the past twelve months, while the remaining nine Funds were trading at a premium to their common share net asset values as of July 31, 2002.

WHAT KEY STRATEGIES WERE USED TO MANAGE THESE NUVEEN FUNDS DURING THE FISCAL YEAR ENDED JULY 31, 2002?

During the twelve months ended July 31, 2002, we focused on purchasing attractive bonds with the potential to enhance the Funds' long-term dividend-payment capabilities and add diversification. Specifically in the Arizona, Michigan, and Texas Funds, we found value in the essential services sectors (e.g., water and sewer, utilities) and--on a case-by-case basis--in healthcare, education, and airport issues. In contrast, we remained cautious about industrial development bonds and other issues that rely on private sector revenues to meet their obligations.

Because of current spread relationships and the potential for state and county budget pressures if the current economic weakness persists, we also emphasized strong credit quality, with many of the bonds added to our portfolios rated AAA/insured, AA, or A. In addition, we focused on yield curve positioning, finding the most attractive yields in the 15- to 20-year maturity range. In

general, as a result of this positioning, the Funds' durations have shortened somewhat over the past six months. We believe this will help make our portfolios less sensitive to potential interest rate changes while still providing yields and returns that are competitive with longer duration funds.

Although tighter supply in the Ohio market during 2002 limited our ability to execute some of our targeted strategies, we looked to optimize yield curve positioning and lengthen the effective duration of the Ohio Funds, moving quickly as favorable situations developed. In light of NUO's duration, however, which at 6.61 as of July 31, 2001, was significantly shorter than its benchmark, we took a slightly different path with this Fund. Over the past year, in an effort to bring NUO's duration more closely in line with the other Funds, we reinvested bond call proceeds further out on the yield curve and successfully extended NUO's duration to 8.66.

4

As mentioned earlier, in the current geopolitical and economic climate, we believed that maintaining strong credit quality remained a key requirement for all of the Nuveen Funds. As of July 31, 2002, each of these Funds continued to offer excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 68% to 89%.

In March 2002, we introduced the Nuveen Arizona Dividend Advantage Municipal Fund 2 (NKR) and the Nuveen Ohio Dividend Advantage Municipal Fund 3 (NVJ). These Funds are now fully invested and, in our opinion, performing well for shareholders. As mentioned earlier, both Funds paid their first dividends in June 2002, and we believe the Funds' holdings place them in an excellent position to pay attractive, dependable dividends on a monthly basis going forward. Because of the strong supply of high-quality bonds in the Arizona market at the time we were assembling NKR, this Fund offers extremely high credit quality, with 89% of its assets invested in AAA/U.S. guaranteed and AA issues. Availability also affected our sector allocation decisions in NVJ, as the Ohio market provided a heavier supply of healthcare and general obligation bonds early in 2002. Over time, we plan to bring NVJ's and NBJ's weightings in these two sectors more closely in line with established targets.

WHAT IS YOUR OUTLOOK FOR THE MUNICIPAL MARKET IN GENERAL AND THESE NUVEEN FUNDS IN PARTICULAR?

In general, our outlook for the fixed-income markets over the next twelve months remains positive. We believe the U.S. economy is headed for an eventual recovery, but one that could be slower to arrive and offer a slower rate of growth than some are currently predicting. We also expect inflation and interest rates to remain relatively low over the near term, while new municipal supply should continue to be strong. Demand for tax-exempt municipal bonds should remain solid, as investors look for ways to rebalance their portfolios and reduce risk. One item that will bear watching, however, is any increase in budgetary pressures at the state and county levels that could potentially result in a credit rating downgrade.

Most of these Funds continued to offer excellent levels of call protection through 2002 and 2003. However, NAZ and NMP, which reach their ten-year anniversaries in late 2002, face a slightly higher level of potential calls (22% and 34%, respectively) during this period, as the Funds work their way through the phase of the bond market cycle normally associated with increased call exposure. The number of actual calls will depend largely on market interest rates over this time. In general, we believe the call exposure of these Funds is very manageable, and we foresee no problems in working through it. Given current market interest rates, our general approach has been to hold higher-yielding bonds as long as possible to support the Funds' current dividends while we look

Edgar Filing: NUVEEN OHIO QUALITY INCOME MUNICIPAL FUND INC - Form N-30D

for attractive replacement opportunities that can enhance credit quality, diversification, and future dividend-payment capabilities.

In coming months, we plan to remain focused on strategies that add value for our shareholders, provide support for the Funds' dividends, and fully utilize Nuveen's experience and research expertise. Specific areas of concentration will include managing interest rate volatility through the purchase of bonds in the 15- to 20-year part of the yield curve, and watching changes in credit spreads for specific investment opportunities. Overall, we believe these Nuveen Funds are well positioned for the market environment ahead. In our opinion, they continue to represent an important element of investors' long-range financial programs, providing dependable tax-free income, diversification, and balance in uncertain times.

THE NUVEEN INVESTOR

BOND SURVEILLANCE -
A HIGH PRIORITY AT NUVEEN

The Enron scandal has raised numerous questions about the real value of American securities. Investors want to know what safeguards are in place to inspire their trust and ensure their holdings are dependable. The Nuveen Investor recently spoke with David Blair, Assistant Vice President and Senior Analyst at Nuveen, about the research and surveillance processes used for Nuveen funds.

HOW DO NUVEEN'S RESEARCH ANALYSTS EVALUATE BONDS PRIOR TO PURCHASE?

We evaluate factors impacting market sectors, issuers and specific bonds and assign credit ratings to bonds we consider for purchase. We seek to purchase bonds with stable and improving credit characteristics, which have attractive prices and yields relative to other bonds in their sectors.

HOW DO YOU CONDUCT YOUR RESEARCH?

We conduct detailed analyses that often involve site visits and discussions with managers of the projects being financed. Since Nuveen is a major investor with large buying power, issuers and project managers are willing to listen to us and respond to our concerns.

IS THE RESEARCH AND ANALYSIS PROCESS ANY DIFFERENT WHEN CONSIDERING HIGH-YIELD BONDS?

Up to 20 percent of some funds can be invested in below investment grade bonds to help the fund attain a higher yield. This underscores the need for research. If one of our 16 analysts believes a high-yield bond should be purchased, a second analyst reviews the issue as well.

HOW DO YOU MONITOR THE VARIOUS BONDS ONCE THEY'VE BEEN PURCHASED?

We have a proprietary database with information and analysis on the bonds Nuveen holds in its funds. Among other things, we are able to evaluate risk exposure to sectors, issuers and specific bonds on an on-going basis.

HOW DOES THE RESEARCH DEPARTMENT COMMUNICATE THE INFORMATION GATHERED?

We conduct biweekly meetings within the research department and weekly meetings with portfolio managers. We also write-up our findings and distribute them with "buy," "hold" or "sell" recommendations to portfolio managers.

VI

IS IT TIME TO RETHINK YOUR BOND STRATEGY?

Significant stock market losses in recent history have sent many investors toward bonds as a way to potentially cut their losses and balance equity-dominated portfolios. While many consider bonds a set-and-forget investment, there are several circumstances that might prompt you to reassess -- and perhaps revamp -- your bond holdings.

TAX BRACKET CHANGES

The Economic Growth and Tax Relief Reconciliation Act of 2001 has dropped tax brackets a percentage point this year, but a higher salary, large bonus, sale of assets or retirement may push you into a higher tax bracket for 2002.

If you are in a higher tax bracket and want to generate an income stream without raising your tax burden, tax-free municipal bonds may be a prudent option. Even if you are in a lower tax bracket, municipal bonds could make sense. The question is whether municipal or taxable bonds will deliver a better taxable yield.

RETIREMENT PLANS CHANGE

Whether you are near retirement or are currently enjoying it, you may want to consider rebalancing your retirement accounts with less stock and more bonds, to potentially reduce risk and try to preserve the assets that you have accumulated. If you are just entering retirement you may want to make tax-free municipal bonds a part of your portfolio to emphasize income generation and protection from taxation.

RISK TOLERANCE CHANGES

The recent market volatility and market downturn may have caused many investors to reevaluate their tolerance for risk. On the other hand, your portfolio might have performed well over the last few years and you may not need to take on extra risk to meet your long-term goals. In either situation you could take a

Edgar Filing: NUVEEN OHIO QUALITY INCOME MUNICIPAL FUND INC - Form N-30D

look at your bond portfolio and determine whether you need to make changes to correspond with your tolerance for risk.

PORTFOLIO CHANGES

If you make significant changes to one or more of your investments, you'll want to look at your portfolio as a whole, particularly with regard to overall asset allocation. You may need to do some rebalancing to stay on track with your investment strategy.

Your financial advisor can help. Regardless of how your circumstances change, he or she can provide up-to-date information on the bond market and various funds to help you decide how to maximize your returns consistent with your short- and long-term financial goals.

No investment is risk free and some investments carry more risk than others. It is important to know what the risks are, to evaluate them against any potential rewards, and to determine your tolerance for risk when selecting an investment.

MANY INVESTORS CONTINUE TO FIND SOLUTIONS WITH PROFESSIONAL ADVICE

For many investors, current financial markets are confusing and frustrating. According to research conducted for the Forum for Investor Advice*, that's the number one reason many turn to a financial advisor. They want someone to suggest ideas and provide consultation, dialogue and professional advice.

Investors say their advisors are helpful in other key ways, including...

- o Saving time. After consultation, investors note that the second most important reason for using an advisor is to have someone else monitor their portfolio, reducing the amount of time they spend on investing.
- o Help in sorting through information. Investors in the 21st century have more products from which to choose than in the past. For example, there are approximately 8,000 mutual funds today, up from 3,000 in 1990.
- o Assistance in setting financial goals. According to investors who use a financial advisor, they are more likely to have a plan for a specific financial goal than do-it-yourself investors.
- o Staying focused. Advisor-assisted investors are more likely than do-it-yourself investors to have developed a comprehensive investment program.
- o Peace of mind. Investors say their comfort level in all types of markets is higher when using an advisor for a "second opinion" on an investment decision.

*The survey of 324 investors was conducted in December of 2000 by Market Facts and analyzed by New York based Neuwirth Research. Of the 324, 166 said they had an ongoing relationship with a financial advisor, while 157 described themselves as do-it-yourselfers.

(continued from page 17)

HOW ARE PROBLEM BONDS IDENTIFIED AND HANDLED?

We conduct surveillance on our bonds on a regular basis to ensure, among other things, that deteriorating bonds are identified early. We then discuss any emerging problems and potential courses of action with the portfolio manager.

HOW MANY ISSUES DOES THE RESEARCH DEPARTMENT FOLLOW?

We follow 12 sectors and 1,500 uninsured bonds, worth about \$18 billion of Nuveen's \$45 billion in total municipal assets. The remaining \$27 billion in municipal assets are insured or escrowed (backed by Treasury bonds). For the insured bonds, we monitor closely on a regular basis the insurers guaranteeing the bonds.

WILL RESEARCH AND SURVEILLANCE CHANGE IN LIGHT OF PROBLEMS WITH ENRON SECURITIES?

Overall, our investment process and surveillance have worked well and been effective. However, we meet as a group on a regular basis and are constantly evaluating ways to improve the process to respond to issues and the market environment.

Notes to Financial Statements

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The state funds (the "Funds") covered in this report and their corresponding exchange symbols are Nuveen Arizona Premium Income Municipal Fund, Inc. (NAZ), Nuveen Arizona Dividend Advantage Municipal Fund (NFZ), Nuveen Arizona Dividend Advantage Municipal Fund 2 (NKR), Nuveen Michigan Quality Income Municipal Fund, Inc. (NUM), Nuveen Michigan Premium Income Municipal Fund, Inc. (NMP), Nuveen Michigan Dividend Advantage Municipal Fund (NZW), Nuveen Ohio Quality Income Municipal Fund, Inc. (NUO), Nuveen Ohio Dividend Advantage Municipal Fund (NXI), Nuveen Ohio Dividend Advantage Municipal Fund 2 (NBJ), Nuveen Ohio Dividend Advantage Municipal Fund 3 (NVJ) and Nuveen Texas Quality Income Municipal Fund (NTX). Arizona Premium Income (NAZ), Michigan Quality Income (NUM), Michigan Premium Income (NMP), Ohio Quality Income (NUO) and Texas Quality Income (NTX) are traded on the New York Stock Exchange while Arizona Dividend Advantage (NFZ), Arizona Dividend Advantage 2 (NKR), Michigan Dividend Advantage (NZW), Ohio Dividend Advantage (NXI), Ohio Dividend Advantage 2 (NBJ) and Ohio Dividend Advantage 3 (NVJ) are traded on the American Stock Exchange. Prior to the commencement of operations of Arizona Dividend Advantage (NFZ), Arizona Dividend Advantage 2 (NKR), Michigan Dividend Advantage (NZW), Ohio Dividend Advantage (NXI), Ohio Dividend Advantage 2 (NBJ) and Ohio Dividend Advantage 3 (NVJ), each Fund had no operations other than those related to organizational matters, the initial capital contribution of \$100,275 by Nuveen Advisory Corp. (the "Adviser"), a wholly owned subsidiary of The John Nuveen Company, and the recording of the organization expenses (\$15,000, \$11,500, \$11,500, \$15,000, \$11,500 and \$11,500, respectively) and their reimbursement by Nuveen Investments, also a wholly owned subsidiary of The John Nuveen Company.

Each Fund seeks to provide current income exempt from both regular federal and designated state income taxes, where applicable, by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities within a single state. The Funds are registered under the Investment Company Act of 1940 as closed-end management investment companies.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States.

Securities Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Directors/Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers and general market conditions. If it is determined that market prices for a security are

Edgar Filing: NUVEEN OHIO QUALITY INCOME MUNICIPAL FUND INC - Form N-30D

unavailable or inappropriate, the Board of Directors/Trustees of the Funds may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. The securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets in a separate account with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At July 31, 2002, Arizona Premium Income (NAZ) had an outstanding when-issued purchase commitment of \$1,123,740. There were no such outstanding purchase commitments in any of the other Funds.

Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis.

68

Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its share holders. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and designated state income taxes, where applicable, to retain such tax-exempt status when distributed to shareholders of the Funds. All monthly tax-exempt income dividends paid during the period ended July 31, 2002, have been designated Exempt Interest Dividends.

Dividends and Distributions to Common Shareholders

Tax-exempt net investment income is declared monthly as a dividend. Generally, payment is made or reinvestment is credited to shareholder accounts after month-end. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to Common Shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States. Accordingly, temporary over-distributions as a result of these differences may occur and will be classified as either distributions in excess of net investment income, distributions in excess of net realized gains and/or distributions in excess of net ordinary taxable income from investment transactions, where applicable.

Preferred Shares

The Funds have issued and outstanding \$25,000 stated value Preferred shares.

Edgar Filing: NUVEEN OHIO QUALITY INCOME MUNICIPAL FUND INC - Form N-30D

Each Fund's Preferred shares are issued in one or more Series. The dividend rate on each Series may change every seven days, as set pursuant to a dutch auction process by the auction agent, and is payable at or near the end of each rate period. The number of shares outstanding, by Series and in total, for each Fund is as follows:

Effective November 16, 2001, Michigan Dividend Advantage (NZW) and Ohio Dividend Advantage 2 (NBJ) issued 640 Series W and 960 Series F, respectively, \$25,000 stated value Preferred shares.

Effective May 17, 2002, Arizona Dividend Advantage 2 (NKR) and Ohio Dividend Advantage 3 (NVJ) issued 740 Series W and 660 Series T, respectively, \$25,000 stated value Preferred shares.

Derivative Financial Instruments

The Funds may invest in certain derivative financial instruments including futures, forward, swap, and option contracts, and other financial instruments with similar characteristics. Although the Funds are authorized to invest in such financial instruments, and may do so in the future, they did not make any such investments during the period ended July 31, 2002.

Edgar Filing: NUVEEN OHIO QUALITY INCOME MUNICIPAL FUND INC - Form N-30D

Notes to Financial Statements (continued)

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Offering Costs

Nuveen Investments has agreed to pay all offering costs (other than the sales load) that exceed \$.03 per Common share for Arizona Dividend Advantage (NFZ), Arizona Dividend Advantage 2 (NKR), Michigan Dividend Advantage (NZW), Ohio Dividend Advantage (NXI), Ohio Dividend Advantage 2 (NBJ) and Ohio Dividend Advantage 3 (NVJ). Arizona Dividend Advantage's (NFZ), Arizona Dividend Advantage 2's (NKR), Michigan Dividend Advantage's (NZW), Ohio Dividend Advantage's (NXI), Ohio Dividend Advantage 2's (NBJ) and Ohio Dividend Advantage 3's (NVJ) share of offering costs (\$45,873, \$72,150, \$61,530, \$126,237, \$93,150 and \$64,500, respectively) were recorded as a reduction of the proceeds from the sale of the common shares.

Costs incurred by Arizona Dividend Advantage (NFZ), Arizona Dividend Advantage 2 (NKR), Michigan Dividend Advantage (NZW), Ohio Dividend Advantage (NXI), Ohio Dividend Advantage 2 (NBJ) and Ohio Dividend Advantage 3 (NVJ) in connection with their offering of Preferred shares (\$262,500, \$291,302, \$326,000, \$452,250, \$408,000 and \$269,918, respectively) were recorded as a reduction to paid-in surplus.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

Change in Accounting Policy

As required, effective August 1, 2001, the following Funds have adopted the provisions of the new AICPA Audit and Accounting Guide for Investment Companies and began accreting taxable market discount on debt securities. Prior to August 1, 2001, the Funds did not accrete taxable market discount on debt securities until they were sold. The cumulative effect of this accounting change had no impact on the total net assets applicable to Common shares or the Common share net asset values of the Funds, but resulted in an increase in the cost of securities and a corresponding decrease in net unrealized appreciation based on securities held by the Funds on August 1, 2001, as follows:

ARIZONA PREMIUM INCOME (NAZ)	ARIZONA DIVIDEND ADVANTAGE (NFZ)	MICHIGAN QUALITY INCOME (NUM)	MICHIGAN PREMIUM INCOME (NMP)	OHIO QUALITY INCOME (NUO)	OHIO DIVIDEND ADVANTAGE (NXI)
\$--	\$2,248	\$158,627	\$269,926	\$36,378	\$12,758

The Statement of Changes in Net Assets and Financial Highlights for the prior periods have not been restated to reflect this change in presentation.

The net effect of this change for the fiscal year ended July 31, 2002, is as follows:

	ARIZONA PREMIUM INCOME (NAZ)	ARIZONA DIVIDEND ADVANTAGE (NFZ)	MICHIGAN QUALITY INCOME (NUM)	MICHIGAN PREMIUM INCOME (NMP)	OHIO QUALITY INCOME (NUO)	OHIO DIVIDEND ADVANTAGE (NXI)

Classification and Measurement of Redeemable Securities

The Funds have adopted the classification requirement of EITF D-98, Classification and Measurement of Redeemable Securities. EITF D-98 requires that Preferred shares, at liquidation value, be presented separately in the Statement of Assets and Liabilities. Accordingly, certain reclassifications have been made to the financial statements and financial highlights for all prior periods presented. The adoption of EITF D-98 had no impact on the Funds' Common share net asset values.

5. INCOME TAX INFORMATION

The following information is presented on an income tax basis as of July 31, 2002. Differences between amounts for financial statement and federal income tax purposes are primarily due to timing differences in recognizing income on taxable market discount securities and timing differences in recognizing certain gains and losses on security transactions.

Directors/Trustees and Officers

The management of the Funds, including general supervision of the duties performed for the Funds under the Management Agreement, is the responsibility of the Board of Directors/Trustees of the Funds. The number of directors/trustees of the Funds is currently set at seven, one of whom is an "interested person" (as the term is defined in the Investment Company Act of 1940) and six of whom are not interested persons. None of the directors/trustees who are not interested persons of the Funds have ever been a director or employee of, or consultant to, Nuveen or its affiliates. The names and business addresses of the

Build Your Wealth
Automatically

SIDEBAR TEXT:

Nuveen makes reinvesting easy. A phone call is all it takes to set up your reinvestment account.

end sidebar text

NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement

Edgar Filing: NUVEEN OHIO QUALITY INCOME MUNICIPAL FUND INC - Form N-30D

showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

FLEXIBILITY

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.
