NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
(In thousands, except per share data)

(1) Basis of Presentation

Tennant Company is referred to as Tennant, us, we, or our in these notes to the condensed consolidated financial statements.

In our opinion, the accompanying unaudited, condensed consolidated financial statements contain all adjustments (consisting of only normal recurring adjustments, except as noted elsewhere in the notes to the condensed consolidated financial statements) necessary to present fairly our financial position as of March 31, 2006 and the results of our operations and cash flows for the three months ended March 31, 2006 and 2005. These statements are condensed and, therefore, do not include all of the information and note disclosures required by accounting principles generally accepted in the United States of America for complete financial statements. The statements should be read in conjunction with the consolidated financial statements and notes included in our Annual Report on Form 10-K for the year ended December 31, 2005. The results of operations for the three months ended March 31, 2006 are not necessarily indicative of the results to be expected for the full year.

(2) Stock Split

On April 27, 2006, the Board of Directors declared a two-for-one common stock split effective July 26, 2006. As a result of the stock split, shareholders of record will receive one additional common share for every share held at the close of business on July 12, 2006. Share and per share data in these consolidated financial statements and related notes have not been adjusted to reflect the future stock split.

(3) Inventories

Inventories are valued at the lower of cost or market. Inventories at March 31, 2006 and December 31, 2005 consisted of the following:

	March 31, 2006	December 31, 2005
	<u> </u>	<u> </u>
Inventories carried at LIFO:		
Finished goods	\$ 18,570	\$ 17,642

	March 31, 2006	December 31, 2005
Raw materials, production parts and work-in-process	36,200	35,539
LIFO reserve	(24,827)	(24,060)
Total LIFO inventories	29,943	29,121
Inventories carried at FIFO:		
Finished goods	5,262	5,259
Raw materials, production parts and work-in-process	18,371	18,286
Total FIFO inventories	23,633	23,545
Total inventories	\$ 53,576	\$ 52,666

The LIFO reserve approximates the difference between LIFO carrying cost and replacement cost.

(4) Supplemental Cash Flow Information

Income taxes paid during the three months ended March 31, 2006 and 2005 were \$734 and \$515, respectively. Interest costs paid during the three months ended March 31, 2006 and 2005 were \$162 and \$213, respectively.

(5) Comprehensive Income

We report accumulated other comprehensive income as a separate item in the shareholders' equity section of the balance sheet. Comprehensive income is comprised of the net earnings and other comprehensive income (loss). Other comprehensive income (loss) consists solely of foreign currency translation adjustments. The reconciliations of net earnings to comprehensive income are as follows:

	Three Months Ended March 31	
	2006	2005
Net earnings	\$ 4,437	\$ 3,543
Foreign currency translation adjustments	395	(838)
Comprehensive income (loss)	\$ 4,832	\$ 2,705

(9) Stock-Based Compensation

On January 1, 2006, we adopted Statement of Financial Accounting Standards No. 123(R), Share Based Payment Revised 2004 (SFAS No. 123(R)), using the modified prospective transition method. Under this method, stock-based employee compensation cost is recognized using the fair-value based method for all new awards granted after January 1, 2006. Compensation costs for unvested stock options and awards that are outstanding as of the adoption date are being recognized, beginning January 1, 2006, over the requisite service period based on the grant-date fair value of those options and awards as previously calculated under the pro-forma disclosures pursuant to Statement of Financial Accounting Standards No. 123, Accounting for Stock-Based Compensation (SFAS No. 123). As of March 31, 2006, we had six plans under which stock-based compensation grants are provided annually, which are described in Note 13 of the 2005 Annual Report. A maximum of 2,350,000 shares can be awarded under these plans; 322,922 shares were available for award under current and future equity compensation plans as of March 31, 2006.

Stock Option and Stock Appreciation Right Awards

We determined the fair value of our option awards using the Black-Scholes option pricing model. The following weighted-average assumptions were used to value the options granted during the first quarter of 2006:

	2006
Expected life in years	5
Risk-free interest rate	4.7%
Expected volatility	24.1%
Expected dividend yield	2.1%
Weighted-average fair value	\$ 11.55

No options were granted during the three months ended March 31, 2005.

The expected life selected for options granted during the quarter represents the period of time that the options are expected to be outstanding based on historical data of option holder exercise and termination behavior for similar

grants. The risk-free interest rate for periods within the contractual life of the option is based on the U.S. Treasury rate over the expected life at the time of grant. Expected volatilities are based upon historical volatility of our stock over a period equal to the expected life of each option grant. Dividend yield is estimated over the expected life based on our dividend policy and historical dividends paid.

The total intrinsic value of options exercised during the three months ended March 31, 2006 and 2005 was \$1,494 and \$117, respectively. New stock option awards granted during the first quarter of fiscal 2006 vest one-third each year over a three-year period and have a ten-year contractual term. Compensation expense equal to the grant date fair value is recognized for these awards over the vesting period. Reload options granted during the first quarter of 2006 vested immediately and have a term equal to the remaining life of the initial grant. Compensation expense is fully recognized for reload options as of the reload date.

At March 31, 2006, the aggregate intrinsic value of shares outstanding and exercisable was \$12,185 and \$11,311, respectively.

In addition to stock options, we also grant cash settled stock appreciation rights to employees in certain foreign locations. Total outstanding stock appreciation rights as of March 31, 2006 were 9,151. No new stock appreciation rights were granted during the first quarter of 2006.

8

TENNANT COMPANY
Quarterly Report Form 10-Q

Compensation expense related to stock options and stock appreciation rights was \$270 for the three-month period ended March 31, 2006. As of March 31, 2006, there was unrecognized compensation cost for non-vested options and rights of \$1,045 of which \$618 is expected to be recognized during the remainder of 2006 and the remaining \$427 during 2007 and 2008.

The following table summarizes activity related to stock options and stock appreciation rights under our employee and non-employee director equity compensation plans during the three months ended March 31, 2006:

Restricted Share Awards

The following table summarizes the activity during the three months ended March 31, 2006 for unvested restricted share awards which contain vesting provisions:

	<u>Unvested Shares</u>	<u>Weighted-Average Grant Date Fair Value</u>
Non-vested at December 31, 2005	9,717	\$ 39.35
Granted	25,245	51.49
Vested	(435)	38.08
Forfeited	(450)	41.40

	<u>Unvested Shares</u>	<u>Weighted- Average Grant Date Fair Value</u>
Non-vested at March 31, 2006	34,077	\$ 44.03

Restricted share awards typically have a two- or three-year vesting period from the effective date of grant. The total fair value of shares vested during the three months ended March 31, 2006 and 2005 was \$17 and \$326, respectively. Compensation expense related to restricted stock was \$150 and \$117 for the three-month periods ended March 31, 2006 and 2005, respectively. As of March 31, 2006, there was \$1,040 of total unrecognized compensation cost related to non-vested shares, of which \$529 is expected to be recognized during the remainder of 2006, and the remaining \$511 during 2007 and 2008.

Performance Share Awards

We also grant performance share awards to key employees as a part of our management compensation program. These awards are earned based upon achievement of certain financial performance targets. We determine the fair value of these awards as of the date of grant and recognize the expense over a three-year performance period. The compensation expense for these awards was \$311 and \$122 for the three-months ended March 31, 2006 and 2005, respectively.

During November 2005, we also granted a performance share award, which vests and is earned upon achieving certain total shareholder return targets over a five-year performance period. The maximum number of shares of common stock issuable upon payout of the award is 20,000. Compensation cost is based on the fair value of this award as of the date of grant and recognized over the derived requisite service period of three years. Compensation expense related to this award was \$35 for the three-month period ended March 31, 2006. As of March 31, 2006, there was \$378 of total unrecognized compensation cost related to this award, of which \$106 is expected to be recognized during the remainder of 2006, and the remaining \$272 during 2007 and 2008.

TENNANT COMPANY
Quarterly Report Form 10-Q

Prior to the adoption of SFAS No. 123(R), we accounted for stock-based compensation using the intrinsic value method prescribed in Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees. As we adopted SFAS No. 123(R) using the modified prospective approach, prior period net earnings and basic and diluted earnings per share have not been restated. The pro forma effects of recognizing the estimated fair value of stock-based compensation as previously calculated under SFAS No. 123 for the three months ended March 31, 2005 are summarized below:

	<u>Three Months Ended March 31 2005</u>
Net earnings as reported	\$ 3,543

Earnings per share:		
Basic as reported	\$	0.39
Basic pro forma	\$	0.37
Diluted as reported	\$	0.39
Diluted pro forma	\$	0.36

As of March 31, 2006, we had \$1,468 in total share-based liabilities recorded on our balance sheet. During the three-month period ended March 31, 2006, we paid out \$1,739 related to 2005 share-based liability awards.

(10) Guarantees

We record a liability for warranty claims at the time of sale. The amount of the liability is based on the trend in the historical ratio of claims to sales, the historical length of time between the sale and resulting warranty claim, new product introductions and other factors. Warranty periods on machines generally range from one to four years. The changes in warranty reserve balances for the three months ended March 31, 2006 and 2005 were as follows:

	March 31, 2006	March 31, 2005
	<u> </u>	<u> </u>
Beginning balance	\$ 6,146	\$ 6,180
Additions charged to expense	1,839	2,114

Claims paid	(1,907)	(1,813)
	<u> </u>	<u> </u>
Ending balance	\$ 6,279	\$ 6,457
	<u> </u>	<u> </u>

Certain operating leases for vehicles contain residual value guarantee provisions, which would become due at the expiration of the operating lease agreement if the fair value of the leased vehicles is less than the guaranteed residual value. Of those leases that contain residual value guarantees, the aggregate residual value at lease expiration is \$10.7 million, of which we have guaranteed \$8.2 million. As of March 31, 2006, we have recorded a liability for the estimated end of term loss related to this residual value guarantee of \$0.7 million for certain vehicles within our fleet. Our fleet also contains vehicles we estimate will settle at a gain. Gains on these vehicles will be recognized at the end of the lease term.

(11) Retirement Benefit Plans

As of March 31, 2006, we had four defined benefit retirement plans and a postretirement medical plan, which are described in Note 9 of the 2005 Annual Report on Form 10-K.

We have contributed \$59 and \$229 during the first quarter of 2006 to our pension benefit plans and to our postretirement medical benefit plan, respectively. We expect to contribute approximately \$300 and \$1,000 to our pension benefit plans and to our postretirement medical benefit plan in 2006, respectively.

The components of the net periodic cost for the three months ended March 31, 2006 and 2005 were as follows:

	Pension Benefits		Postretirement Medical Benefits	
	2006	2005	2006	2005

ITEM 2 Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

Tennant Company is a world leader in designing, manufacturing and marketing of solutions that help create a cleaner,

safer world. We provide equipment, parts and consumables and floor coatings to contract cleaners, end-user businesses, healthcare facilities, schools and local, state and federal governments. We sell our products through our direct sales and service organization and a network of authorized distributors worldwide. Geographically, our customers are primarily located in North America, Europe and other international markets including the Middle East, Asia, Japan, Latin America and Australia. We strive to be an innovator in our industry through our commitment to understanding our customers' needs and using our expertise to create innovative solutions.

Net earnings for the first quarter of 2006 were up 25.2% to \$4.4 million, or \$0.47 per diluted share. Net earnings were impacted by:

Growth in net sales of 7.5%.

A decline in gross profit margins of 1.0 percentage point.

A 1.2 percentage point improvement in selling and administrative expenses as a percentage of net sales.

During the first quarter of 2006, we adopted Financial Accounting Standards Board Statement No. 123 (Revised 2004), Share-Based Payment (SFAS No. 123(R)). SFAS No. 123(R) requires compensation costs relating to share-based payment transactions, including employee stock options, be recognized in the financial statements. We applied the modified prospective approach to transition in our adoption of this standard. The modified prospective approach uses the fair value-based accounting method for all employee awards granted, modified, or settled after the adoption date. Compensation cost related to the nonvested portion of awards outstanding as of the adoption date is based on the grant-date fair value of those awards as calculated under the original provisions of SFAS No. 123. As a result of the adoption of SFAS No. 123(R), selling and administrative expenses for the three months ended March 31, 2006 included \$0.3 million of expense related to stock options.

Quarterly Report Form 10-Q

Net Sales

Consolidated net sales of \$135.5 million for the first quarter of 2006 increased 7.5% compared to first quarter 2005 sales of \$126.0 million. The growth in net sales for the quarter was primarily driven by volume growth and price increases in all geographies. Direct foreign currency exchange fluctuations decreased net sales by approximately 2% in the 2006 first quarter.

The following table sets forth the net sales by geographic area for the three-month periods ended March 31, 2006 and 2005 and the percentage change from the prior year (dollars in thousands):

	<u>2006</u>	<u>2005</u>	<u>%</u>
North America	\$ 90,015	\$ 82,736	8.8
Europe	32,320	30,761	5.1
Other International	13,127	12,461	5.3
Total	<u>\$ 135,462</u>	<u>\$ 125,958</u>	<u>7.5</u>

North America

North American sales for the first quarter of 2006 increased 8.8% to \$90.0 million compared with \$82.7 million reported in 2005. Growth in sales was driven by increases in all product categories. The growth in equipment sales was primarily driven by volume, partially due to expanded market coverage, as well as price increases. Growth in service, parts and consumables also contributed to the increase, driven by organic growth.

Europe

In Europe, net sales for the first quarter of 2006 increased 5.1% to \$32.3 million versus the comparable 2005 period. The increase in net sales was primarily driven by growth in equipment sales as a result continued success selling products introduced in 2004 and 2005, increased demand in certain geographic markets and price increases. Growth in service, due to expanded market coverage, also contributed to the increase. Negative direct foreign currency translation effects decreased European net sales by approximately 9% in the 2006 first quarter.

Other International

In Other International markets, net sales for the first quarter of 2006 totaled \$13.1 million, up 5.3% from the first quarter of 2005. Overall growth in net sales was primarily driven by increased sales in certain markets, partially due to expanded market coverage in these areas, as well as price increases in certain markets. Negative direct foreign currency translation exchange effects decreased sales in Other International markets by approximately 4% in the 2006 first quarter.

Gross Profit

Gross profit margin was 41.9% for the first quarter of 2006 compared with 42.9% reported in 2005. Gross profit margins in the first quarter of 2006 were unfavorably impacted by the effects of foreign currency translation and the mix of products sold during the respective periods. Higher material and transportation costs were more than offset by the benefit of selling price increases between periods.

Operating Expenses

Research & Development Expenses

Research and development (R&D) expenses in the first quarter of 2006 increased 11.7% to \$5.0 million from \$4.5 million in 2005. R&D expenses as a percentage of net sales was 3.7% for the first quarter of 2006 compared to 3.5% in the comparable quarter last year, which is in line with our target of investing 3 to 4% of net sales annually on R&D.

Quarterly Report Form 10-Q

Selling & Administrative Expenses

Selling and administrative (S&A) expenses in the first quarter of 2006 increased 3.8% to \$45.1 million from \$43.4 million in 2005. The increase in S&A expenses is due in part to an increase in performance-based incentive compensation expense, including the recognition of stock option expense associated with the adoption of SFAS No. 123(R) as previously discussed. General inflationary cost increases such as salary increases and higher fuel costs for sales and service fleet vehicles as well as increased costs associated with expanded sales and service market coverage also contributed to the increase. Partially offsetting these increases was a favorable direct foreign currency exchange impact on this category.

S&A expenses as a percentage of net sales was 33.3% for the first quarter of 2006, down from 34.5% in the comparable quarter last year. The decrease as a percentage of net sales is primarily due to increased sales leverage, partially offset by the cost increases discussed above.

Other Income (Expense), Net

Other income (expense), net was \$0.5 million in the first quarter of 2006 compared to \$(0.3) million in 2005. An increase in interest income as a result of the higher levels of cash and cash equivalents during the period was the primary source of other income, net in the first quarter of 2006. During the first quarter of 2005, other expense, net included a \$0.4 million discretionary contribution to Tennant's charitable foundation.

Income Taxes

The effective tax rates for the first quarter were 38.4% for 2006 and 39.0% for 2005. The decrease in the effective tax rate between quarters is primarily related to the mix in expected full-year taxable earnings by country.

Our effective tax rate for the full year is subject to change and may be impacted by changes to our forecasts of operating profit in total or by taxing jurisdiction, or to changes in the tax laws and regulations.

Liquidity and Capital Resources

The debt-to-total-capitalization ratio was 1.9% at March 31, 2006 versus 2.0% at December 31, 2005. Cash, cash equivalents and short-term investments totaled \$39.0 million at March 31, 2006, compared to \$41.3 million at December 31, 2005. We believe that the combination of cash, internally generated funds and available financing sources are more than sufficient to meet our cash requirements for the next year.

OPERATING ACTIVITIES Operating activities provided \$2.5 million of cash during the three months ended March 31, 2006. Cash provided by operating activities for the three months ended March 31, 2006 was driven primarily by strong net earnings and a decrease in accounts receivable offset by a decrease in accounts payable, accrued expenses and deferred revenues. The decrease in accounts receivable is primarily due to the seasonality of sales volumes. The decrease in accounts payable, accrued expenses and deferred revenues was primarily a result of payments of 2005 performance awards, annual rebates, incentives and profit sharing as well as timing of accounts payable payments.

In the comparable 2005 period, operating activities used \$1.2 million of cash. Cash used in operating activities for the three months ended March 31, 2005 was primarily due to decreases in accounts payable, accrued expenses and deferred revenue, increases in inventory levels and decreases in other current/noncurrent assets and liabilities. The decrease in accounts payable, accrued expenses and deferred revenue was a result of payments of annual rebates, incentives and profit-sharing and accrued severance as well as timing of accounts payable payments. Inventory level increases were due to a build-up of inventory to replenish certain inventories to normal levels due to the seasonality of sales volumes and to support new products launched during the latter part of 2004. The decrease in other current/noncurrent assets and liabilities is primarily a result of a payment of deferred compensation. Partially offsetting these uses of cash was a decrease in receivables due to seasonality of sales volumes.

Management evaluates how effectively we utilize two of our key operating assets, receivables and inventories, using Accounts Receivable Days Sales Outstanding (DSO) and Days Inventory on Hand (DIOH), on a FIFO basis. These metrics are as follows (in days):

	March 31, 2006	December 31, 2005	March 31, 2005
DSO	61	61	61
DIOH	90	82	103

During the first quarter of 2006, DIOH improved 13 days compared to the same period last year, primarily due to our continued focus on lean principles including inventory reduction initiatives. In addition, inventory levels at the end of March 2005 were higher due to a build up of inventory during the first quarter of 2005 as previously discussed. In comparison to December 31, 2005, DIOH increased 8 days as a result of replenishing certain inventories to normal levels due to seasonality of sales volumes.

INVESTING ACTIVITIES Capital expenditures were \$4.2 million during the first three months of 2006 compared to \$3.7 million in the same period of 2005. We currently anticipate full-year capital spending to be in the range of \$23 to \$28 million.

FINANCING ACTIVITIES Net cash used by financing activities was \$1.1 million during the first three months of 2006 and \$7.3 million in the comparable 2005 period. During the first three months of 2006, significant uses of cash included repurchases of common stock under our share repurchase program and payments of dividends. Proceeds from issuance of common stock of \$3.4 million driven by employee stock options exercises generated a significant source of cash in the 2006 first quarter. During the first three months of 2005, significant uses of cash included a \$5.0 million scheduled debt repayment as well as \$2.0 million in dividend payments.

Quantitative and Qualitative Disclosures About Market Risk and Other Matters

Foreign Currency Risk

Due to the global nature of our operations, we are subject to exposures resulting from foreign currency exchange fluctuations in the normal course of business. Our primary exchange rate exposure is with the Euro, the Canadian dollar, the Australian dollar, the British pound, the Chinese yuan and the Japanese yen against the U.S. dollar. The direct financial impact of foreign currency exchange includes the effect of translating profits from local currencies to U.S. dollars, the impact of currency fluctuations on the transfer of goods between Tennant operations in the United States and abroad and transaction gains and losses. In addition to the direct financial impact, foreign currency exchange has an indirect financial impact on our results, including the effect on sales volumes within local economies and the impact of pricing actions taken as a result of foreign exchange rate fluctuations. We could experience favorable or unfavorable foreign exchange effects for the remainder of 2006, compared with prior year results.

Because our products are currently manufactured or sourced primarily from the United States, a stronger dollar generally has a negative impact on results from operations outside the United States while a weaker dollar generally has a positive effect. Our objective in managing the exposure to foreign currency fluctuations is to minimize the earnings effects associated with foreign exchange rate changes on certain of our foreign currency-denominated assets and liabilities. We periodically enter into various contracts, principally forward exchange contracts, to protect the value of certain of our foreign currency-denominated assets and liabilities. The gains and losses on these contracts generally approximate changes in the value of the related assets and liabilities.

Commodity Risk

We are subject to exposures resulting from potential cost increases related to our purchases of raw materials or other product components. We do not use derivative commodity instruments to manage our exposures to changes in

commodity prices such as steel, oil, gas, and other commodities.

Various factors beyond our control affect the price of oil and gas, including but not limited to worldwide and domestic supplies of oil and gas, political instability or armed conflict in oil-producing regions, the price and level of foreign imports, the level of consumer demand, the price and availability of alternative fuels, domestic and foreign governmental regulation, weather-related factors and the overall economic environment. We purchase petroleum-related component parts for use in our manufacturing operations. In addition, our freight costs associated with shipping and receiving product and sales and service vehicle fuel costs are impacted by fluctuations in the cost of oil and gas. If the price of oil and gas continue to increase, our results could be unfavorably impacted in 2006.

We seek to mitigate the risk of future raw material or other product component increases through product pricing and negotiations with our vendors. The success of these efforts depends upon our ability to increase our selling prices in a competitive market. If the commodity prices remain at their current levels or continue to increase, our results may be unfavorably impacted in 2006.

Other Matters

Management regularly reviews our business operations with the objective of improving financial performance and maximizing our return on investment. As a result of this ongoing process to improve financial performance, we may incur restructuring charges in the future which, if taken, could be material to our financial results.

Additional information on market risk is included in the Management's Discussion and Analysis section of our Form 10-K filing for the year ended December 31, 2005.

ITEM 4 Controls and Procedures

(a) Evaluation of disclosure controls and procedures. Based on their evaluation as of the end of the period covered by this report, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the Exchange Act)) are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms.

(b) Changes in internal controls. There were no changes in our internal controls over financial reporting during the

most recently completed fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1A Risk Factors

There have been no material changes in our risk factors from those disclosed in our Form 10-K for the year ended December 31, 2005.

ITEM 2 Changes in Securities, and Use of Proceeds and Issuer Purchases of Equity Securities

In November 2004, Tennant Company's Board of Directors authorized the repurchase of 400,000 shares of our common stock under the share repurchase program approved by the Board of Directors in May 2001. These share repurchases are made from time to time in the open market or through privately negotiated transactions, primarily to offset the dilutive effect of shares issued through our stock-based compensation programs.
