RBS Exchange Traded Notes BUILDING TOMORROW (TM)

RBS US Large Cap Trendpilot(TM) ETN (TRND)

[GRAPHIC OMITTED]

The RBS US Large Cap Trendpilot(TM) Exchange Traded Notes ("RBS ETNs") are unsecured and unsubordinated obligations of The Royal Bank of Scotland N.V. ("RBS NV"), and are fully and unconditionally guaranteed by RBS Holdings N.V. ("RBS Holdings"). Any payments on the RBS ETNs when they become due at maturity or upon early repurchase or redemption are dependent on the ability of RBS NV and RBS Holdings to pay, and are also subject to market risk.

RBS ETNs track the RBS US Large Cap Trendpilot(TM) Index (USD) (the "Index"). The Index utilizes a systematic trend-following strategy to provide exposure to either the S-P 500([R]) Total Return Index (the "Benchmark Index") or the yield on a hypothetical notional investment in 3-month U.S. Treasury bills (the "Cash Rate").

RBS US Large Cap Trendpilot(TM) Index Methodology

If the closing level of the Benchmark Index is at or above its historical 200-Index business day simple moving average for five consecutive Index business days	A positive trend is established: The Index will track the Benchmark Index
---	--

If the closing level of the Benchmark Index is below its historical 200-Index business day simple moving average for five consecutive Index business days	A negative trend is established: The Index will track the Cash Rate
---	--

If neither of the above conditions is satisfied, the trend of the Index will be the same as the trend of the Index on the immediately preceding Index business day. The Index will implement any trend reversal at the open of trading on the second Index business day immediately following the Index business day on which the Index trend switches from positive to negative or from negative to positive, as the case may be.

Illustration of the Trendpilot(TM) Index Methodology

[GRAPHIC OMITTED]

The above graph illustrates the operation of the Trendpilot Index Methodology. It does not reflect any actual performance of the Benchmark Index or the Trendpilot Index, and is not an indication of how either index may perform in the future. The hypothetical illustration above also does not include any fees, transaction costs or expenses.

The chart above presents the actual performance of the Index, the RBS ETNs, the S-P 500([R]) Total Return Index (the Benchmark Index), and the S-P 500([R]) Index (Price Only), over the specified periods. For information regarding the performance of the Trendpilot Index, see pages PS-32 to PS-35 of the pricing supplement and the RBS ETNs filed with the U.S. Securities and Exchange Commission (SEC).

1) Includes the deduction of the annual investor fee, which accrues on a daily basis. The annual investor fee will be equal to (i) 1.00% per annum when the Index is tracking the Benchmark Index, and (ii) 0.50% per annum when the Index is tracking the Cash Rate.

2) Since the inception date of the RBS ETNs, the Index has tracked the Benchmark Index and has remained in a positive trend, without any trend reversal. Consequently, the historical performance of the Index over the time periods specified above is identical to the Benchmark Index. In a negative trending market the Index trend is expected to switch from positive to negative, and the Index is expected to experience trend reversals in volatile markets, switching from a positive to negative or from negative to positive, as the case may be. The Index performance will not always be the same as the Benchmark Index, could underperform the Benchmark Index, and may track the Cash Rate for extended periods of time in a low interest rate environment. Does not include any fees, transaction costs or expenses.
