The financial information provided below should be read in conjunction with and is qualified in its entirety by reference to "Management's Discussion and Analysis of Financial Condition and Results of Operations" and the consolidated financial statements and the related notes contained in RGA's Annual Report on Form 10-K for the year ended December 31, 2002, Quarterly Reports on Form 10-Q for the quarters ended March 31, and June 30, 2003 and Current Report on Form 8-K which RGA filed with the Securities and Exchange Commission on August 25, 2003.

KEY COMPONENTS OF PRE-TAX OPERATING EARNINGS AND PRE-TAX OPERATING EARNINGS PER SHARE

RGA announces its results using a non-GAAP financial measure RGA calls "operating earnings," which RGA has previously referred to as "operating

Edgar Filing: REINSURANCE GROUP OF AMERICA INC - Form 8-K

income." Management believes that operating earnings, on a pre-tax and after-tax basis, better measures the ongoing profitability of RGA's continuing operations by excluding from operating income the effect of net realized capital gains and losses and related deferred acquisition costs, which tend to be highly variable, any net gain or loss from discontinued operations and specified other items, which management believes are not indicative of ongoing operations. However, the definition of operating earnings can vary by company and is not considered a substitute in all applications for GAAP net income.

The following are the key components of RGA's consolidated pre-tax operating earnings for the years ended December 31, 1998, 1999, 2000, 2001 and 2002 and for the nine-months ended September 30, 2002 and 2003 (amounts in millions):

For additional financial information about RGA's operational segments, see Note 17 to RGA's financial statements for the year ended December 31, 2002 contained in the Current Report on Form 8-K filed by RGA with the Securities and Exchange Commission on August 25, 2003.

EFFECTS OF SFAS 115 ON TOTAL STOCKHOLDERS' EQUITY

RGA has traditionally evaluated its stockholders' equity position excluding the impact of Statement of Financial Accounting Standards No. 115, Accounting for Certain Investments in Debt and Equity Securities ("SFAS 115"). This is considered a non-GAAP measure. RGA believes it is important to evaluate its stockholders' equity position to exclude the effect of the net unrealized gains or losses required by SFAS 115 since the net unrealized gains or losses primarily relate to changes in interest rates and credit spreads on investment securities that are not permanent and can fluctuate significantly from period to period.

At December 31, 1998, 1999, 2000, 2001 and 2002, RGA's total stockholders' equity was \$748.5 million, \$732.9 million, \$862.9 million, \$1.0 billion and \$1.2 billion, respectively. At September 30, 2002 and 2003, RGA's total stockholders' equity was \$1.2 billion and \$1.4 billion, respectively.

At December 31, 1998, 1999, 2000, 2001 and 2002, the effects of SFAS 115 on our total stockholders' equity was \$45.3 million, \$(131.3) million, \$(42.0) million, \$0 and \$102.8 million, respectively. At September 30, 2002 and 2003,

Edgar Filing: REINSURANCE GROUP OF AMERICA INC - Form 8-K

the effects of SFAS 115 on our total stockholders' equity was \$90.2 million and \$173.3 million, respectively.

CERTAIN ADDITIONAL THIRD QUARTER INFORMATION

On October 23, 2003, RGA issued a press release announcing its earnings for the three and nine months ended September 30, 2003 and providing certain additional information. Tables showing RGA's condensed consolidated statements of income and the results of operations for each of the U.S., Canadian, other international and corporate and other segments have been included in this Current Report. See "Selected Financial Data" below. The following is additional information related to RGA's third quarter results:

Information related to net premiums and income (loss) from continuing operations before income taxes for each reportable segment are summarized below (amounts in \$ millions):

Mortality experience for the quarter ended September 30, 2003 was approximately \$6.0 million unfavorable on a pre-tax basis when compared with expectations. This differs from the first two quarters of 2003 in which RGA experienced positive mortality variances. Mortality experience does fluctuate from quarter to quarter. For 2003, on a year-to-date basis, U.S. mortality experience remained favorable. In the third quarter of 2003, RGA also reflected a \$3.0 million, pretax, reduction in the reserves associated with the terrorist attacks on September 11, 2001.

At September 30, 2003, RGA had assets of \$10.5 billion, stockholders' equity of \$1.4 billion and assumed reinsurance in force of \$893 billion.

The pre-tax income on this business was approximately \$23.9 million for the first nine months of 2003.

SUPPLEMENTAL INFORMATION

Based on a survey conducted on behalf of the Reinsurance Section of the Society of Actuaries (the "SOA"), as of December 31, 2002, we had a 10.9% share of the North American life reinsurance market, with approximately \$624.9 billion of life reinsurance in force, and Allianz had a 4.0% share with \$231.5 billion of life reinsurance in force. Allianz had approximately \$231.4 billion of U.S. life reinsurance in force. The survey estimated the total amount of life reinsurance in force in North America was approximately \$5.7 trillion as of that date.

According to surveys conducted on behalf of the Reinsurance Section of the SOA, the amount of life reinsurance in force was estimated to be approximately \$5.7 trillion as of December 31, 2002, which represented a compound annual growth rate of approximately 19% since December 31, 1998.

According to surveys conducted on behalf of the Reinsurance Section of the SOA, the total amount of U.S. reinsurance in force, the amount was estimated to be approximately \$2.6 trillion as of December 31, 1998, \$3.1 trillion as of December 31, 1999, \$3.8 trillion as of December 31, 2000, \$4.5 trillion as of December 31, 2001 and \$5.2 trillion as of December 31, 2002. According to an A.M. Best report, the total amount of U.S. life insurance in force was estimated to be approximately \$13.0 trillion as of December 31, 1998, \$14.4 trillion as of

Edgar Filing: REINSURANCE GROUP OF AMERICA INC - Form 8-K

December 31, 1999, \$15.9 trillion as of December 31, 2000, \$17.4 trillion as of December 31, 2001 and \$18.8 trillion as of December 31, 2002.

According to surveys conducted on behalf of the Reinsurance Section of the SOA, with respect to U.S. ordinary recurring life reinsurance, the amount reinsured was estimated to be approximately \$679 billion as of December 31, 1998, \$811 billion as of December 31, 1999, \$985 billion as of December 31, 2000, \$947 billion as of December 31, 2001 and \$1.1 trillion as of December 31, 2002. According to a publication by the American Council of Life Insurers (the "ACLI"), the total amount of life insurance production was estimated to be approximately \$1.3 trillion as of December 31, 1998, \$1.4 trillion as of December 31, 1999, \$1.6 trillion as of December 31, 2000, \$1.6 trillion as of December 31, 2001 and \$1.8 trillion as of December 31, 2002.

An A.M. Best article dated September 2002 estimated the aggregate net premiums generated by life reinsurers in 2001 as approximately \$35.5 billion worldwide. Based on its net premiums, RGA would have had a 4.7% share of the global market.

The SOA surveys indicate that the authors obtained information from participating or responding companies and do not guarantee the accuracy and completeness of their information. Additionally, the surveys do not survey all reinsurance companies, but RGA believes most of its principal competitors are included. While RGA believes these surveys to be generally reliable, RGA has not independently verified their data.

The ACLI indicated that it obtains information from various sources, including participating or responding companies and that the ACLI does not guarantee the accuracy and completeness of the information. The ACLI does not survey all life insurance companies, although RGA believes that most of the principal life insurers are included. While RGA believes the information is generally reliable, RGA has not independently verified the data.

While RGA believes information published by A.M. Best is generally reliable, RGA has not independently verified the data. A.M. Best does not guarantee the accuracy and completeness of the information.

RGA believes that some of the factors affecting the direct insurance market include consolidation; focus on distribution and asset management and outsourcing mortality to reinsurers; slower growth; the entrance of new competitors; the establishment of alternative means of distribution; and recent capital pressures, including investment losses and reserve increases. RGA believes some of the factors affecting the life reinsurance market include a strong trend of outsourcing mortality risk to reinsurers; the creation of opportunities as a result of merger and acquisition activity in the life insurance industry; consolidation among life reinsurers; and low reinsurance penetration in select international markets.
