EATON VANCE SENIOR INCOME TRUST

Eaton Vance Senior Income Trust as of December 31, 2000

LETTER TO SHAREHOLDERS

[Photo of James B. Hawkes]
James B. Hawkes
President

Eaton Vance Senior Income Trust had a total return of -4.72% for the six months ended December 31, 2000. That return was the result of shareholder distributions of \$0.536 per share from net investment income and a decrease in share price from \$9.3125 on June 30, 2000 to \$8.375 on December 31, 2000. The Trust again provided a significant yield advantage in a portfolio of senior, secured floating-rate loans. Based on the Trust's December monthly dividend of \$0.078 per share and a closing share price of \$8.375, the Trust's market yield was 11.18% at December 31, 2000.(1)

AN UNCERTAIN ECONOMIC OUTLOOK AND CHANGING MONETARY POLICY CREATED A CHALLENGING CLIMATE IN 2000...

2000 was characterized by extraordinary volatility in the financial markets amid increasing signs of weakness in the economy. In addition, the Federal Reserve's about-face on monetary policy turned the markets on end. Despite relatively low inflation figures, 3.6% for all of 2000, the Federal Reserve continued its anti-inflation fight in the first half of the year. However, as the economy slowed in the second half, the Fed signalled an easier policy.

The Trust's investment universe was affected by the economic uncertainties, as well as by weaker demand for lower-quality loans. Understandably, the Trust's performance reflected these changing conditions. However, while the Trust's total return was somewhat lower than in recent years, its volatility remained well below that of many other asset classes.

With the volatility that characterized the equity and bond markets, many risk-conscious investors sought a measure of refuge. By investing at least 80% of its assets in senior, floating-rate loans, Eaton Vance Senior Income Trust seeks to provide a high level of current yield, while its shares, trading on the New York Stock Exchange, provide daily liquidity. Eaton Vance Senior Income

Trust maintained its significant yield advantage over investments with similar maturities.

MARKET PRICING SHOULD PROVIDE NEW FLEXIBILITY FOR THE LOAN MARKET...

Clearly, 2000 marked an important transition year, as the loan market adjusted to the application of market pricing. As pioneers in the loan market, we at Eaton Vance are enthusiastic about this change. While the Trust will continue to seek high current income from senior floating-rate loans, we believe market pricing will improve liquidity, add more flexibility and create new opportunities in this unique asset class. In the pages that follow, co-portfolio managers Scott Page and Payson Swaffield review the past year and discuss their thoughts on the loan market.

Sincerely,

/S/ James B. Hawkes

James B. Hawkes President February 7, 2001

\_\_\_\_\_\_

One year -2.34%

Life of Fund (10/30/98) 5.04

Ten Largest Holdings(3)

Tokheim Corp.	1.9%
Western Wireless	1.5
Nextel Communications, Inc.	1.5
Charter Communications Operating, LLC.	1.5
Century Cable Holdings, LLC	1.5
Voicestream PCS Holdings, LLC	1.5
Crown Castle Operating Company	1.5
Huntsman ICI	1.4
Panavision International, L.P.	1.3
Lyondell Petrochemical Company	1.3

(1) The Fund's market yield is calculated by dividing the most recent dividend per share by the share market price at the end of the period and annualizing the result. 2 Returns are calculated by determining the percentage change in net asset value and share price with all distributions reinvested. 3 The ten

largest holdings account for 14.9% of the Trust's investments, determined by dividing the total market value of the holdings by the total net assets of the Trust. Holdings are subject to change.

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when sold, may be worth more or less than their original cost.

MANAGEMENT DISCUSSION

[Photo of Scott H. Page] Scott H. Page

[Photo of Payson E. Swaffield]

Payson E. Swaffield

An interview with Scott H. Page and Payson F. Swaffield, Co-portfolio Managers of the senior floating-rate loan portion of Eaton Vance Senior Income Trust.

- Q: Scott, what significant events occurred within the loan market in 2000 and how did they affect the Portfolio?
- A: Mr. Page: 2000 was an event-filled period for Eaton Vance Senior Income Trust. The Trust experienced a 9.375% decline in share price, but that decline was partially offset by the Trust's dividend. While the Trust's total return may have disappointed some investors, the Trust remained a comparatively safe haven during a period in which many equity and fixed income funds showed higher volatility and often negative returns.

The decline in the loan market was caused by a much tighter and tougher corporate credit market. Weaker demand for lower quality loans was reflected in lower market prices.

- Q: How did credit market conditions affect the Trust in 2000?
- A: Mr. Swaffield: Credit defaults increased in the bank loan market as well as other credit markets, such as the high yield market. Several factors led to a higher default rate: a slower economy in the second half of 2000; a lack of liquidity in some higher-risk markets; and an exodus of capital from "old economy" companies toward "new economy" companies, followed by a rapid retreat from these sectors later in the year. Each of these factors contributed to an overall increase in capital market volatility.

When volatility and uncertainty increase in equity markets, companies' access to capital is impeded; defaults rise, and risk premiums increase until the market finds a new equilibrium. This process has been under way for some time, and was reflected in decreases in market prices of bank loans held by the Trust, as well as by an increase in yields demanded in the primary and secondary markets.

Shares of the Trust are not insured by the FDIC and are not deposits or other obligations of, or guaranteed by, any depository institution. Shares are subject to investment risks, including possible loss of principal invested. Yield will change.

\_\_\_\_\_

- Q: Has the loan market ever faced challenging credit market conditions in the past?
- A: Mr. Page: Yes. In the early 1990s, the credit markets faced even higher default levels. This period followed the late 1980s, when non-investment grade companies were generally much more highly leveraged than today. In the early 1990s, highly leveraged companies faced a recession, the Gulf War, a severe credit crunch and the savings and loan crisis. We successfully steered our bank loan portfolios through that difficult period.

Today, the uncertainty is reflected more immediately and perhaps more severely in loan prices because of the balance of buyers and sellers for bank loans. In the short-run, that balance may encompass forces other than the intrinsic value of a holding. However, intrinsic value does tend to prevail over time, and it is our belief that, in most cases, senior secured loans have solid intrinsic value, especially when compared to unsecured and subordinated bonds or equities. Intrinsic value ultimately prevailed in the difficult markets of the early 1990s, and we believe that it ultimately is likely to prevail in this market too.

- Q: Payson, could you elaborate on market pricing in calculating bank loan prices?
- A: Mr. Swaffield: In the fall of 1999, a pricing service for the secondary market trading of bank loans emerged under the auspices of the Loan Syndication and Trading Association (LSTA). In a joint venture with Loan Pricing Corporation (LPC), a subsidiary of Reuters, LSTA/LPC began the systematic collection and reporting of indicative secondary market prices for bank loans. Prior to this service, few standards existed for soliciting and distributing price information, and those that were available were not sufficiently reliable to serve as the basis of pricing and transacting bank loans on a daily basis.

After an intensive evaluation of the new LSTA/LPC service, the Trust began the use of this independent pricing service for a portion of the Trust. Throughout 2000, we continued to evaluate the reliability of the service,

comparing its prices with actual transactions in loan interests that we and other institutional investors conducted. As we grew more comfortable with its reliability, based on the evaluation of data, we increased our reliance on the pricing service. Today, over 90% of the Trust is priced using this service and we expect that percentage to increase.

- Q: How can the Trust have losses if the loans are secured by collateral?
- A: Mr. Page: Collateral is not a guarantee that a loan will be repaid at par, nor is it a guarantee that market prices will remain at par. It does, however, improve the odds that an obligation will be met at par. Nearly all the Trust's loans are secured, and, generally, they are secured by all the assets of a company: accounts receivable, inventory, property/plant, and intangibles. This greatly increases the probability that, in the event of a reversal of fortune, the company's underlying value will accrue to the benefit of secured creditors. Security and collateral afford powerful advantages in a restructuring and, while no guarantee of full recovery, it normally improves recoveries.
- Q: How do changes in interest rates affect the Trust?
- A: Mr. Swaffield: The Trust invests in floating-rate instruments. When interest rates increase, our dividend and yield increase, and vice versa. From June 1999 through May 2000, as the Federal Reserve Bank increased rates on six occasions, the Trust's total return benefited, as well as our performance compared to fixed-rate bond instruments, which generally decline in value as rates rise. In recent years, the Fed has tended to use adjustments in short-term interest rates as its main tool for implementing monetary policy changes. That trend has increased the volatility of bonds, making bonds a less reliable alternative for risk-management. Naturally, changes in interest rates and yield curves are difficult to predict and can occur quickly, resulting in bond volatility.

Typically, senior, floating-rate loans do not have volatility arising from unpredictable changes in interest rates or the slope of the yield curve. We believe this greatly increases the Trust's attractiveness for risk-aware investors, especially given a track record of significantly beating inflation. Because of their floating-rate feature and a low or negative correlation with most large asset classes, bank loans can be an attractive means of reducing risk and diversifying a broader portfolio of equity and fixed-income securities.

- $\ensuremath{\mathtt{Q}}$ : How have you positioned the Trust in recent months?
- A: Mr. Page: In an uncertain economic outlook, the flexibility of the Trust has allowed us to shift to sectors that we believe can better withstand a softer business climate. Now, as always, we have maintained a very diversified Trust and have, therefore, been able to accomplish the re-positioning of the Trust with relative ease.

While the Trust's largest industry weighting at December 31 was telecommunications, we have become increasingly selective within the group. Our telecom weighting (wireless and wireline) was 12.8%, compared to the DLJ Leveraged Loan Index weighting of 19.4%. In contrast, the Trust had a 8.2% weighting in cable television companies, compared to a 6.9% DLJ Leveraged Loan Index weighting. We view new jurisdictions and revenue sources as major opportunities for cable providers.

The Trust continued its use of leverage to add incrementally to yield. At December 31, the Trust had \$121 million in leverage. That figure represented 26.9% of the Trust's total assets. Finally, the high-yield bond market had one of its worst years on record in 2000, as the liquidity crunch was

especially hard on high-yield issuers. In this difficult climate, the Trust strictly limited its exposure to the high-yield segment.

- Q: What are some of the Trust's largest investments?
- A: Mr. Swaffield: In the telecom sector, Western provides wireless and cellular phone services under the Cellular One brand in rural areas, primarily in 19 western states. In addition, Western's international subsidiary has continued to make inroads in emerging foreign markets, including Bolivia, Croatia, Haiti and Ghana. Reflecting strong subscriber growth and increased roaming traffic, the company registered 30% revenue growth in the first nine months of 2000.

In the cable television sector, Charter Communications is the nation's fourth largest cable operator, with 6.2 million customers. While continuing to build subscriber growth in its core cable business, the company has begun to offer bandwidth services, including high-speed Internet service, and has indicated plans to add interactive services. Charter saw revenues rise 175% in the first nine months of 2000, primarily due to its successful acquisition strategy.

An offshoot of the telecom sector is the tower industry, a provider of telecom network services. Crown Castle International owns and operates tower and transmission sites, an important element of the wireless infrastructure. The surge in telecom services in recent years has resulted in corresponding growth in site selection. Crown is one of only three nationwide providers and is also very active in foreign markets. In 2000, the company made major tower acquisitions in Australia and the U.K., bringing its global tower count to more than 13,000. Crown generated 93% revenue growth in the first nine months of the year.

- Q: What is your outlook for the loan market in the coming year?
- A: Mr. Page: The loan market appears to have already discounted the possibility of an economic slowdown, as recent prices of economically-sensitive loans have clearly reflected a softer business climate. While we expect that the slowdown will continue well into 2001, the risk of an outright recession has been significantly lessened by the Federal Reserve's more accommodative monetary policy.

Lenders should receive a two-fold benefit from such a policy: banks will likely structure loans more conservatively, while lower interest rates should improve credit quality. Whichever direction the economy takes, we believe that the Trust is well-positioned for the coming year.

	exempt from registration under Rule 144A of the Seese securities may be resold in transactions exempt		

- f 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers.
- (2) Senior secured floating rate interests often require prepayments from excess cash flows or permit the borrower to repay at its election. The degree to which borrowers repay, whether as a contractual requirement or at the election, cannot be predicted with accuracy. As a result, the actual remaining maturity may be substantially less than the stated maturities shown. However, it is anticipated that the senior secured floating rate interests will have an expected average life of approximately three years. Non-income producing.

Note: At December 31, 2000, the Trust had unfunded commitments amounting to \$ 5,156,706 under various revolving credit agreements.

Offering costs charged to paid-in capital	\$	\$	
Net asset value End of period	\$ 9.120	\$ 9.810	
Market value End of period	\$ 8.375	\$ 9.313	
Total Return(3)	(4.72)%	2.00%	
Ratios/Supplemental Data+			
Net assets, end of period (000's omitted) Ratios (As a percentage of average daily net assets):	\$325,348	\$349,803	
Net expenses	1.88%(4)	1.84%	
Interest expense	2.74%(4)	2.41%	
Total expense	4.62%(4)	4.25%	
Net investment income	9.69%(4)	8.73%	
Portfolio Turnover	28%	63%	

<sup>+</sup> The operating expenses of the Trust may reflect a reduction of the investment adviser fee and the administration fee. Had such actions not been taken, the ratios and net investment income per share would have been as follows:

Ratios (As a percentage of average daily net assets):

Expenses

Interest expense

Net investment income

Net investment income per share

- (1) Net investment income per share was computed using average shares outstanding.
- (2) For the period from the start of business, October 30, 1998, to June 30, 1999.
- (3) Total return is calculated assuming a purchase at market value on the first day and a sale at the market value on the last day of the period reported. Dividends and distributions, if any, are assumed reinvested on the reinvestment date. Total return is not computed on an annualized basis.
- (4) Annualized.

Eaton Vance Senior Income Trust as of December 31, 2000

NOTES TO FINANCIAL STATEMENTS

#### 1 Significant Accounting Policies

Eaton Vance Senior Income Trust (the Trust) is an entity commonly known as a Massachusetts business trust and is registered under the Investment Company Act of 1940 as a non-diversified closed-end management investment company. The following is a summary of significant accounting policies consistently followed by the Trust in the preparation of its financial statements. The policies are in conformity with generally accepted accounting principles.

\_\_\_\_\_\_

A Investment Valuation -- The Trust's investments are primarily in interests in senior floating rate loans (Senior Loans). Certain Senior Loans are deemed liquid if reliable market quotations are readily available for them. The Trust's investment adviser, Eaton Vance Management (EVM), values liquid loans on the basis of prices furnished by a pricing service daily. Other Senior Loans are valued at fair value by EVM under procedures established by the Trustees as permitted by Section 2(a)(41) of the Investment Company Act of 1940. Such procedures include the consideration of relevant factors, data and information relating to fair value, including (i) the characteristics of and fundamental analytical data relating to the Senior Loan, including the cost, size, current interest rate, period until next interest rate reset, maturity and base lending rate of the Senior Loan, the terms and conditions of the Senior Loan and any related agreements and the position of the loan in the borrower's debt structure; (ii) the nature, adequacy and value of the collateral, including the Trust's rights, remedies and interests with respect to the collateral; (iii) the creditworthiness of the Borrower, based on evaluations of its financial condition, financial statements and information about the Borrower's business, cash flows, capital structure and future prospects; (iv) information relating to the market for the Senior Loan including price quotations for and trading in the Senior Loan and interests in similar loans and the market environment and investor attitudes towards the Senior Loan and interests in similar loans; (v) the reputation and financial condition of the agent and any intermediate participant in the loan; and (vi) general economic and market conditions affecting the fair value of the Senior Loan. Other portfolio securities (other than short-term obligations, but including listed issues) may be valued on the basis of prices furnished by one or more pricing services which determine prices for normal, institutional-size trading units of such securities using market information, transactions for comparable securities and various relationships between securities which are generally recognized by institutional traders. In certain circumstances, portfolio securities will be valued at the last sales price on the exchange that is the primary market for such securities, or the last quoted bid price for those securities for which the over-the-counter market is the primary market or for listed securities in which there were no sales during the day. The value of interest rate swaps will be determined in accordance with a discounted

present value formula and then confirmed by obtaining a bank quotation. Short-term obligations which mature in sixty days or less are valued at amortized cost, if their original term to maturity when acquired by the Trust was 60 days or less or are valued at amortized cost using their value on the 61st day prior to maturity, if their original term to maturity when acquired by the Trust was more than 60 days, unless in each case this is determined not to represent fair value. Repurchase agreements are valued at cost plus accrued interest. Other portfolio securities for which there are no quotations or valuations are valued at fair value as determined in good faith by or on behalf of the Trustees.

B Income -- Interest income from Senior Loans is recorded on the accrual basis at the then-current interest rate, while all other interest income is determined on the basis of interest accrued, adjusted for amortization of premium or discount when required for federal income tax purposes. Facility fees received are recognized as income over the expected term of the loan.

C Federal Taxes -- The Trust's policy is to comply with the provisions of the Internal Revenue Code applicable to regulated investment companies and to distribute to shareholders each year all of its taxable income, including any net realized gain on investments. Accordingly, no provision for federal income or excise tax is necessary.

D Expense Reduction -- Investors Bank & Trust Company (IBT) serves as custodian of the Trust. Pursuant to the custodian agreement, IBT receives a fee reduced by credits which are determined based on the average daily cash balances the Trust maintains with IBT. All significant credit balances used to reduce the Trust's custodian fees are reported as a reduction of expenses on the Statement of Operations.

E Use of Estimates -- The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of income and expense during the reporting period. Actual results could differ from those estimates.

F Other -- Investment transactions are accounted for on the date the investments are purchased or sold. Gains and losses on securities sold are determined on the basis of identified cost.

#### 2 Distributions to Shareholders

Distributions to shareholders are recorded on the ex-dividend date. The Trust distinguishes between distributions on a tax basis and a financial reporting basis. Generally accepted accounting principles require that only distributions in excess of tax basis earnings and profits be reported in the financial statements as a tax return of capital. Differences in the recognition or classification of income between the financial statements and tax earnings and profits which result in temporary over-distributions for financial statement purposes are classified as distributions in excess of net investment income or accumulated net realized gains. Permanent differences between book and tax accounting relating to distributions are reclassified to paid-in capital.

### 3 Shares of Beneficial Interest

The agreement and Declaration of Trust permits the Trustees to issue an unlimited number of full and fractional \$0.01 par value shares of beneficial interest.

4 Investment Adviser Fee and Other Transactions with Affiliates

-----

The investment adviser fee, computed at a monthly rate of 17/240 of 1% (0.85% annually) of the Trust's average weekly gross assets, was earned by EVM as compensation for management and investment advisory services rendered to the Trust. For the six months ended December 31, 2000, the fee was equivalent to 0.85% (annualized) of the Trust's average daily gross assets and amounted to \$2,035,665. Except for Trustees of the Trust who are not members of EVM's organization, officers and Trustees receive remuneration for their services to the Trust out of such investment adviser fee. EVM also serves as the administrator of the Trust. An administration fee, computed at the monthly rate of 1/48 of 1% (0.25% annually) of the average weekly gross assets of the Trust, is paid to EVM for managing and administering business affairs of the Trust. For the six months ended December 31, 2000, the fee was equivalent to 0.25% (annualized) of the Trust's average daily gross assets for such period and amounted to \$598,671.

Certain officers and Trustees of the Trust are officers of the above organization.

#### 5 Investment Transactions

The Trust invests primarily in Senior Loans. The ability of the issuers of the Senior Loans held by the Trust to meet their obligations may be affected by economic developments in a specific industry. The cost of purchases and the proceeds from principal repayments and sales of Senior Loans and corporate bonds aggregated \$125,197,810 and \$126,432,176, respectively, for the six months ended December 31, 2000.

\_\_\_\_\_\_

#### 6 Short-Term Debt and Credit Agreements

The Trust has entered into a revolving credit agreement that will allow the Trust to borrow \$178 million to support the issuance of commercial paper and to permit the Trust to invest in accordance with its investment practices. Interest is charged under the revolving credit agreement at the bank's base rate or at an amount above either the bank's adjusted certificate of deposit rate or federal funds effective rate. Interest expense includes a commitment fee of approximately \$136,000 which is computed at the annual rate of 0.15% on the unused portion of the revolving credit agreement. There were no significant borrowings under this agreement during the period. As of December 31, 2000, the Trust had commercial paper outstanding of \$121,000,000, at an interest rate of 6.60%. Maximum and average borrowings for the six months ended December 31, 2000 were \$136,000,000 and \$134,000,000, respectively, and the average interest rate was 6.55%.

### 7 Federal Income Tax Basis of Investments

The cost and unrealized appreciation (depreciation) in value of the investments at December 31, 2000, as computed on a federal income tax basis, were as follows:

\_\_\_\_\_\_

Aggregate cost	\$468,689,221
Gross unrealized appreciation Gross unrealized depreciation	\$ 1,126,098 (27,793,886)
Net unrealized depreciation	\$ (26,667,788)

#### 8 Annual Meeting of Shareholders (Unaudited)

The Fund held its annual meeting of Shareholders on October 26, 2000. 35,660,000 shares were outstanding on August 29, 2000, the record date for

\_\_\_\_\_\_

the shares eligible to vote at the meeting. 32,859,373 (92.15% of the record date shares) were represented at the meeting. The following actions were taken by the shareholders:

Item 1: The election of Samuel L. Hayes, III and Norton H. Reamer as  $\mathsf{Trustees}$  of the  $\mathsf{Trust}$ .

INDEPENDENT AUDITORS' REPORT

\_\_\_\_\_\_\_

To the Trustees and Investors of Eaton Vance Senior Income Trust

\_\_\_\_\_

We have audited the accompanying statement of assets and liabilities, including the portfolio of investments, of Eaton Vance Senior Income Trust (the Trust) as of December 31, 2000, and the related statement of operations and cash flows for the six months then ended, the statement of changes in net assets for the six months then ended and the year ended June 30, 2000, and the financial highlights for the six months then ended and each of the years in the two year period ended June 30, 2000. These financial statements and financial highlights are the responsibility of the Trust's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. Our procedures included confirmation of securities and Senior Loans owned at December 31, 2000 by correspondence with the custodian, brokers and selling or agent banks; where replies were not received from brokers and selling or agent banks, we performed other auditing procedures. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements and financial highlights, referred to above, present fairly, in all material respects, the financial position of Eaton Vance Senior Income Trust at December 31, 2000, and the results of its operations, the changes in its net assets, its cash flows and its financial highlights for the respective stated periods in conformity with accounting

principles generally accepted in the United States of America.

DELOITTE & TOUCHE LLP Boston, Massachusetts February 16, 2001

Eaton Vance Senior Income Trust

#### DIVIDEND REINVESTMENT PLAN

\_\_\_\_\_\_

The Trust offers a dividend reinvestment plan (the Plan) pursuant to which shareholders automatically have dividends and capital gains distributions reinvested in common shares (the Shares) of the Trust unless they elect otherwise through their investment dealer. On the distribution payment date, if the net asset value per Share is equal to or less than the market price per Share plus estimated brokerage commissions then new Shares will be issued. The number of Shares shall be determined by the greater of the net asset value per Share or 95% of the market price. Otherwise, Shares generally will be purchased on the open market by the Plan Agent. Distributions subject to income tax (if any) are taxable whether or not shares are reinvested.

If your shares are in the name of a brokerage firm, bank, or other nominee, you can ask the firm or nominee to participate in the Plan on your behalf. If the nominee does not offer the Plan, you will need to request that your shares be re-registered in your name with the Trust's transfer agent, PFPC, Inc. or you will not be able to participate.

The Plan Agent's service fee for handling distributions will be paid by the Trust. Each participant will be charged their pro rata share of brokerage commissions on all open-market purchases.

Plan participants may withdraw from the Plan at any time by writing to the Plan Agent at the address noted on the following page. If you withdraw, you will receive shares in your name for all Shares credited to your account under the Plan. If a participant elects by written notice to the Plan Agent to have the Plan Agent sell part or all of his or her Shares and remit the proceeds, the Plan Agent is authorized to deduct a \$5.00 fee plus brokerage commissions from the proceeds.

If you wish to participate in the Plan and your shares are held in your own name, you may complete the form on the following page and deliver it to the Plan Agent.

Any inquires regarding the Plan can be directed to the Plan Agent, PFPC, Inc., at 1-800-331-1710.

Eaton Vance Senior Income Trust

APPLICATION FOR PARTICIPATION IN DIVIDEND REINVESTMENT PLAN

-----

This form is for shareholders who hold their common shares in their own names. If your common shares are held in the name of a brokerage firm, bank, or other nominee, you should contact your nominee to see if it will participate in the Plan on your behalf. If you wish to participate in the Plan, but your brokerage firm, bank or nominee is unable to participate on your behalf, you should

request that your common shares be re-registered in your own name which will enable your participation in the Plan.

\_\_\_\_\_\_

The following authorization and appointment is given with the understanding that I may terminate it at any time by terminating my participation in the Plan as provided in the terms and cond itions of the Plan.

Please print exact name on account:

Shareholder signature

Date

Shareholder signature Date

Please sign exactly as your common shares are registered. All persons whose names appear on the share certificate must sign.

YOU SHOULD NOT RETURN THIS FORM IF YOU WISH TO RECEIVE YOUR DIVIDENDS AND DISTRIBUTIONS IN CASH. THIS IS NOT A PROXY.

THE AUTHORIZATION FORM, WHEN SIGNED, SHOULD BE MAILED TO THE FOLLOWING ADDRESS:
