HUANENG POWER INTERNATIONAL, INC.
Announces Annual Operating Results for 2003

Net Profit Increases by 38.50% to RMB5.430 billion

(Beijing, China, March 16, 2004) Huaneng Power International, Inc. (the "Company") [NYSE: HNP; HKEx: 902; SSE: 600011] today announced its audited operating results under International Financial Reporting Standards for the year ended December 31, 2003. The Company's net operating revenues for 2003 were RMB23.388 billion (approximately US\$2.826 billion based on the exchange rate of US\$1 to RMB8.2767 on December 31, 2003), a 26.60% increase over 2002. Net profit was RMB5.430 billion (approximately US\$656 million), a 38.50% increase over 2002. Basic earnings per share was RMB0.90 (approximately US\$0.11). Basic earnings per American Depository Share (ADS) was RMB36

Edgar Filing: HUANENG POWER INTERNATIONAL INC - Form 6-K

(approximately US\$4.35). The Board of Directors of the Company was very satisfied with the operating results for last year.

The Company's Board of Directors proposed that the Company pay dividend consisting of both cash and the Company's stock to its shareholders. Under the proposed dividend plan, which is subject to the approval by the Company's shareholders at the annual general meeting of the Company, every 10 shares of the issued and outstanding common stock of the Company will be entitled to receiving RMB5.0 in cash and 10 shares of the Company's common stock.

In 2003, the Company strengthened equipment management and effective cost control, thereby achieving safe and stable operation of the Company's power plants. The Company has contributed to meeting power consumption demand, ensuring safe power generation and supporting economic development.

In 2003, the Company's total power generation based on a consolidated basis was 90.91 billion kWh (which includes the power generation of Xindian Power Plant and Taicang Power Plant from November to December), an increase of 27.30% over 2002. The average availability factor of the power plants of the Company was 92.15% and the average capacity factor was 68.06%. Average coal consumption rates for power sold and for power generated were 335.12 gram/kWh and 318.23 gram/kWh, respectively, while the average house consumption rate was 4.76%. The unit fuel cost for output stayed within its estimated range as set in the beginning of the year and only increased by 2.28%. The Company's techno-economic indices continued to score the industry's bests in the PRC.

Huaneng Power Int'l, Inc.
Announces Annual Operating Results for 2003...P.2

The steady growth in the operating results of the Company was, on the one hand, attributable to the increased power demand driven by the rapid and steady economic growth of the country. On the other hand, the Company's power project development and acquisitions also made significant contribution to the remarkable growth of the Company's operating results for year 2003.

The Company made new breakthroughs in asset acquisitions in 2003. After acquiring 25% equity interest in Shenzhen Energy Group in the beginning of the year, the Company also acquired equity interest and assets of Qinbei Power Plant, Yushe Power Plant and Xindian Power Plant from China Huaneng Group. These two acquisitions increased the generation capacity of the Company on an equity basis by 1,231MW, and the generation capacity under construction on an equity basis by 1,020MW. The acquisitions made contribution to the growth of the Company's annual operating results.

The Company is making good and smooth progress on the preliminary work of its power plant constructions and planned projects. Two generating units with cycled fluidized bed combustion boilers at Jining Power Plant came into commercial operation in July and August 2003 respectively. Construction of two 330MW coal-fired generating units at Huaiyin Power Plant Phase II and one 600MW coal-fired generating unit at Shantou Power Plant Phase II have commenced. The feasibility study report on constructing China's first two 1,000MW ultra-supercritical coal-fired generating units at Yuhuan Power Plant Phase I has been approved by the State Council. In addition, project proposals in relation to the construction of Taicang Power Plant Phase II (2x600MW coal-fired generating units), Shanghai Gas-fired Power Plant (3 x 300MW-class Combined-Cycle-Gas-Turbine generating units) and Jinling Gas-fired Power Plant (3 x 300MW-class Combined-Cycle-Gas-Turbine generating units) have been approved by the State Council. The Company will actively push forward the

Edgar Filing: HUANENG POWER INTERNATIONAL INC - Form 6-K

progress of these projects based on sound commercial principles.

In addition, in considering rising oil prices and the need of reducing operating costs, the Company shut down two 100MW oil-fired generating units at Xindian Power Plant Phase I at the end of 2003. These two units have been in operation for 30 years and made an operating loss in the current period. Thus the generation capacity of Xindian Power Plant on an equity basis has decreased from 650MW to 450MW.

Year 2004 is a year full of challenges and opportunities. The Company needs to ensure safe production and sufficient supply of coal as well as to complete the construction projects on schedule. We expect to continue to face pressures from rising fuel prices, increased environmental related expenses and increasing market competition. However, the Company has full confidence and strength to seize opportunities and overcome challenges, and will endeavor to fulfill the following objectives in 2004:

Huaneng Power Int'l, Inc.

Announces Annual Operating Results for 2003...P.3

1. To ensure safe and operating stability of the Company's power plants, and achievement of their annual generation plans; and on this basis, to analyze and formulate effective market strategies with respect to power market and power pooling, so as to enlarge our power market shares;
2. To undertake stringent control of operating costs, in particular with respect to fuel costs and construction costs;
3. To actively develop the proposed projects and push forward the work for the power plants under construction, with a view to expanding the Company's operating scale and enhancing its business strengths; and
4. To actively seek new opportunities for asset acquisitions in order to assure continuous growth of the Company's profits and shareholder value.

The Company develops, constructs, operates and manages large thermal power plants in China nationwide, with a total generation capacity of 15,736MW on an equity basis. The Company wholly owns 14 power plants, and has controlling interests in five power plants and minority interests in three power companies. Today, the Company is one of the largest independent power producers in China.

- End -

Attached are the consolidated financial information of the Company and its subsidiaries as at and for the year ended December 31, 2003 (prepared under International Financial Reporting Standards).
