HUANENG POWER INTERNATIONAL, INC.
Announces Tariff Adjustments

(Beijing, China, May 10, 2005) Huaneng Power International, Inc. (the "Company") [NYSE: HNP; HKEx: 902; SSE: 600011] announced tariff adjustments for its power plants.

Recently, the National Development and Reform Commission has issued a notice in respect of the implementation of the Coal-Electricity Price Linkage Mechanism (the "Mechanisms") for the power grids of East China, North China, Central China, Northeast China and South China. Except for the enforcement in Henan Province commencing from May 15, 2005, all other regions shall start to implement the Mechanisms from May 1, 2005 (policy for Gansu Province to be confirmed).

There are three major aspects regarding the Mechanism:

1. Appropriate adjustments of on-grid tariffs as a result of the Mechanisms: in order to alleviate the impact of rising coal prices upon tariffs since June 2004, on-grid tariffs for power generating companies are to be appropriately raised.
2. Abolition of excess generation tariffs in principle: Except for the

Edgar Filing: HUANENG POWER INTERNATIONAL INC - Form 6-K

power grids in South Hebei and Hunan (see table below), power output for all regions (other than the regions which transmit electricity to other provinces and the regions under power pooling) shall adopt pre-determined on-grid tariffs as approved by the government.

| | Excess Tariff (VAT Inclusive) (RMB/MWh) | Number of Utilisation Hours corresponding to Approved On-grid Tariffs |
|------------------|---|--|
| South Hebei Grid | 250 | 5,500 |
| Hunan | 332 | 4,500 |

3. Increase the on-grid tariffs of some old-aged power plants: This is mainly for the power plants under the policy of separation of power plants and power grids, and the power plants adopting relatively low tariffs and suffering significant loss. The Company's Shanghai Shidongkou First Power Plants falls into this category.

According to a document issued by the National Development and Reform Commission, the actual adjustments of on-grid tariffs of some of the Company's power plants are as follows:

| Power Plants | On-grid Tariff before Adjustment (VAT Inclusive) (RMB/MWh) | On-grid Tariff after Adjustment (VAT Inclusive) (RMB/MWh) |
|--------------------------|---|--|
| Guangdong Province | | |
| Shantou Coal-fired | 449.41 | 468.51 |
| Shantou Oil-fired | 594.39 | 594.39 |
| Jiangsu Province | | |
| Nantong | 338 | 355.7 |
| Nanjing | 338 | 355.7 |
| Taicang | 365 | 380.7 |
| Huaiyin (Units 1 & 2) | 344 | 359.7 |
| Huaiyin (Units 3 & 4) | 370 | 385.7 |

The on-grid tariff adjustments of the Company's power plants including Dalian Power Plant, Dandong Power Plant and Yingkou Power Plant which are located at Liaoning Province are calculated by adding RMB22/MWh (VAT inclusive) on the basis of the resulted bidding tariffs for those power generation volume that under annual bidding.

The implementation of the Mechanisms will lead to a rise of the Company's average settled tariffs and will help to relieve the Company's pressure due to increase of fuel costs.

The Company develops, constructs, operates and manages large power plants in China nationwide, with a total generation capacity of 21,418MW on an equity basis. The Company wholly owns 16 operating power plants, and has controlling interests in ten operating power companies and minority interests in four operating power companies. Today, it is one of the largest independent power producers in China.
