PERFORMANCE UPDATES ON THE FIRST HALF OF 2005

In order to provide greater disclosure to investors and potential investors,
this performance updates statement aims to provide the most updated operating
information that Huaneng Power International, Inc. (the "Company") has, so as
to allow investors to arrive at assessments that closely reflect the current
situation of the Company.

Increase of Power Generation

Based on preliminary statistics, as of June 30, 2005, the Company's total power
generation based on a consolidated basis for the first half of 2005 amounted to
71.843 billion kWh, an increase of 47.1% over the same period last year.

The increase in power generation of the Company's power plants was mainly
attributable to the following reasons:

1. Newly acquired power plants, such as Luohuang Power Plant, Yueyang Power
Plant, Yingkou Power Plant, Jinggangshan Power Plant, Pingliang Power
Plant and Sichuan Hydro Power have made significant contribution to the
increase of the Company's generation;
2. Stable generation capacity contributed by the six newly operated
generating units at Yushe Power Plant, Qinbei Power Plant and Huaiyin
Power Plant;
3. As a result of rapid economic growth, power consumption in the regions
where the Company's power plants operated underwent continued growth,
thereby providing favorable conditions for the growth of the Company's
power generation;

Edgar Filing: HUANENG POWER INTERNATIONAL INC - Form 6-K

4. Safe and stable operation of power generating units has ensured the growth in the Company's power generation.

The power generation of each of the Company's power plants for the first half of 2005 was listed below (in billion kWh):

Dalian	4.50	Changxing	0.93
Fuzhou	4.07	Taicang	2.04
Nantong	4.51	Huaiyin	2.61
Shangan	3.99	Yushe	2.55
Shanghai Shidongkou Second	4.18	Qinbei	3.51
Shantou Coal-fired	2.19	Xindian	1.30
Shantou Oil-fired	0.003	Yingkou	2.18
Dandong	2.13	Jinggangshan	1.58
Nanjing	2.18	Yueyang	1.88
Dezhou	6.95	Luohuang	4.37
Jining	1.67	Pingliang	4.28
Weihai	2.52	Sichuan Hydro Power	2.46
Shanghai Shidongkou First	3.26		

Increase of Fuel Costs

Inasmuch as the power generation of the Company increased, the Company encountered great pressure on its operating costs for the first half of 2005. Since the second half of 2004, coal prices rose continuously, and maintained at a high level during the first half of 2005. This has imposed great pressure on the operation of the Company. Compared with the comparatively low coal prices during the same period last year, the Company's fuel costs increased substantially during the first half of 2005.

It is expected that the net profit of the Company for the first half ended 30th June 2005 will decrease in the range between 30% and 40% compared to the same period last year. As the interim results for the first half of 2005 have not yet been finalised, the Company is not in a position to provide confirmed figures to quantify the relevant financial effect at this stage. The Company expects to announce its unaudited consolidated interim results for the six-month period ended 30th June 2005 on 10th August 2005. Shareholders of the Company and investors are advised to exercise caution when dealing in the shares of the Company.

By Order of the Board
Huang Long
Director
